Cadets teach winter survival course

Central Iowa Boy Scouts learn to set traps, start fires, find water

By David Gerhold

Iowa State Daily Newsroom

On Saturday, a group of more than 200 Boy Scouts from all around Central Iowa took part in a winter survival training on campus. In a variety of indoor and outdoor sessions, the cadets learned about starting a fire and finding water, as well as how to build a shelter, start a fire and find water sources.

“This is going very well,” said Trenton Speer, senior in information technology. “The more they are able to do it on their own, the happier they are.”

While some of the Boy Scouts have been winter survival camps in the past, the cadets try to make the classes different on the classes they teach. Speer said, “Some of the Scouts last year scripted a little more in-depth information on cooking and eating the game, so one of our main goals is to teach as much as possible at the event.”

“We teach them about how to build a shelter, start a fire and find water sources,” said Logan Finley, senior in information technology. “We teach them how to boil and clean the water because in the end you have to consume it, Hawkeye.”

Michael Sanders, 13, has been a Boy Scout for almost a year. He said that he found some stuff very easy while other parts offered more of a challenge for him. “It’s no big cold out here, but I think that’s kind of the point,” Ballard said. “Most fun for me was the traps and compass class because I already learned a lot of the point,” Ballard said.

Mackenzie Seibert, 16, said she enjoyed the hands-on approach of most classes, because they allowed him to practice what he already learned. “What is my method of teaching the young,” Seibert said, “I showed the cadets how to boil water, because I want to do that myself in the future.”

Speer said that at the end of the day, a lot of information was thrown at the Boy Scouts, but they learned at least one thing from each class, then they’ll have something they needed to know if they ever get into a survival situation. “I learned this,” Speer said.
ISU researchers soybean fungus causing death of plants

Pathogen causes Sudden Death Syndrome in 17 states, Canada

By Morgan Ball
@iowastatedaily.com

Iowa State University has recently conducted genome sequencing for a fungus that causes Sudden Death Syndrome in soybean plants.

Professor Gary Mirka, assistant professor of agronomy and leader of the soybean research team at the university, and other colleagues proposed the research site in the annual “Soybean Sudden Death Syndrome” meeting in 2009.

The director of the North Central Soybean Research Program, David Wright, liked the idea of the project and funded the research idea in the soybean research lab in 2009. The pathogen is a major threat to crop production. The percentage of soybean yield was lost in the United States because of the pathogen. Iowa was also affected by the soybean loss in 2011. Around $820 million was wasted in the United States because of the pathogen.

The team is diverse and has a variety of experience levels. The team consists of four graduate students, postdoctoral scientists, and a scientist from Turkey as well as four undergraduate students. The pathogen Fusarium culmorum causes Sudden Death Syndrome and was first reported in Arkansas in 1957. Data shows that the pathogen has spread to the United States and has even spread to Canada, Minnesota, Wisconsin, and Michigan. There are three out of the 17 states that have been hit recently.

Iowa State agrees to pre-engineering program with Iowa Western

By Morgan Ball
@iowastatedaily.com

Iowa State has teamed up with Iowa Western Community College to promote a pre-engineering program. The program allows students the chance to begin their education at Iowa Western and transfer to Iowa State. Both institutions will work together to prepare courses that will help the students on the right track.

Students can expect to take a few of lower division classes such as calculus, physics, English and other general education classes will be a part of the program.

The courses are structured to help prepare the students for Iowa State. Once at Iowa State, students can begin engineering courses right away.

Iowa State’s engineering and agriculture programs have always ranked among the top programs in the nation. The programs are designed to help students get a head start on their education.

“Low cost and the accessibility of the program are two motivating factors of this serious pathogen were growing importance of the crops, and by the time symptoms, it is too late to do anything to save the crops. Iowa State University has reported that the pathogen infects the soybean plants. There are no effective chemicals to spray on the crop, and by the time the plants show any symptoms, it is too late to do anything to save the crops,” said Katelynn McCollough. “Low cost and the accessibility of the program are two motivating factors of this serious pathogen were growing importance of the crops, and by the time symptoms, it is too late to do anything to save the crops. Iowa State University has reported that the pathogen infects the soybean plants. There are no effective chemicals to spray on the crop, and by the time the plants show any symptoms, it is too late to do anything to save the crops.”

Iowa State has close ties with Des Moines Area Community College. The relations between schools,” said Kim Carter, Iowa Western’s dean of industrial technologies.

Iowa State University is trying to learn how the pathogen infects the soybean plants. The research lab is trying to figure out the functions of each gene that might play a role in the Sudden Death Syndrome development. “To our knowledge, this pathogen does not exist anywhere else, so there must be a role in the pathogen’s development,” said Professor Gary Mirka. “To our knowledge, this pathogen does not exist anywhere else, so there must be a role in the pathogen’s development.”

Iowa State wants to continue to acknowledge that programs like the pre-engineering program exist.

**Dance Marathon raises more money than previous year**

By Brian.Keck
@Iowastatedaily

Smiling, laughing, cheering and of course, dancing, these were just a few of the things that happened at the Memorial Union on Jan. 25.

Dance Marathon is a 13-hour celebration of a student’s world and hard work of those around them. They have raised money for the University of Iowa Children’s Hospital since it was created.

This year marked the 17th edition of the Iowa State Dance Marathon, which began with a send-off of core participants waiting around in the outer area of the Memorial Union.

This year Iowa State Dance Marathon was able to increase from last year’s total of $327,832.11, a difference of $100,318.01.

Once it was over, the lights started flashing, the music booming, and 1,800-plus energetic students began streaming their way around the area.

“Dance Marathon has been a fixture in the Ames gaming scene for a long time,” said Tiffany Herring. “Charlie was a huge fixture in the community, and they are just mimicking the kids like they are super stars, it’s like they have hundreds of high brothers and sisters,” said Chris Pellack, father of a miracle child.

After Tessa Huff, the mother of miracle child Grace, finished speaking about her daughter, a flash mob broke out involving her two nephews.

“I was a complete surprise, it was up on stage talking about Grace, then the kid threw a flash mob and it was my prevailing thing,” Huff said.

The day was filled with a variety of activities including arcades, healthy food, dancing and fun times for everyone and much more.

There were a variety of performers who came to celebrate, including Jamie Lee, Pantelis Fears and appearances from the Iowa State Dance and Cheer squads, swimming team, women’s soccer, volleyball and football teams.

“The kids have this way of bringing life to weakness, wakening upрапy and regal and to me it’s unbelievably inspiring,” said Sam Miller, lead singer of Paradise Fears.

The families who attended were able to express their gratitude to the hundreds of students who made Dance Marathon possible by individually thanking them during the Thank You Crawl.

“Kids are able to see things Iowa State does that makes it feel more like a home, like Gary Tyler, father of a miracle child.

Gaming of tomorrow’s event, Dance Marathon continues to fundraise and put on other events throughout the span of the year.

“People don’t realize the things they do outside this day, all the little things they do and do on a consistent basis,” Tyler said.

**Comic store honors long-term customer with weekend of gaming**

By David Garthol
@Iowastatedaily

Charlie Fisher loved games. At least once a month, he would come all the way from Fort Dodge to Ames and visit the Old Comic store in West Ames.

“Everybody knows him by face and by night,” said Chris Pellack, co-owner of Old Comicpalooza. Comic store, re-opened The Shield Comic Games & Comics. “It was a fixture in the Ames gaming community.”

In December, Fisher passed away at the age of 42. The tragic murder–suicide left the community mourning the loss of a man who had always been a big presence in the community.

“I actually broke down and started crying when I heard the news about his death. He was such a nice guy. Quiet, but always a fun guy to be around and the kind of person that everyone liked,” said Pellack.

Pellack left behind a large collection of gaming items which included the large gaming tournament put on by Shield Comic store, then on the next day, the tournament continued and Pellack said he was planning to do something bigger.

“We basically decided to throw a weekend long party to honor him and his passion for games,” Pellack said. “So this weekend, we planned all sorts of games all night long and ‘Shindig’ like.”

The Charlie Fisher Memorial Gaming Weekend is going to be an annual event every year now on, Pellack said. “Given this was Charlie loved this, I’m sure of that.”

Pellack’s mom, Hope said she was absolutely stunned when she heard about the weekend.

“It makes me so happy that he’s honored in that way. The way he loved games, what he loved,” Hartig said. She described Charlie as an introverted and socially reserved kid.

“It was very hard for him to break out of his shell,” she said. “He never got married and never had children.”

What really made him special was his passion for games. At least once a month, he would come all the way from Fort Dodge to Ames and visit the Old Comic store in West Ames.

“They say we’re fat, they call us fags, and they call us every variation,” said帕特·佩里克, grandmother of the miracle child Suzie Moorman. It is different family was able to share its miracle child to the hundreds of students who attended the event.

Sam Miller, lead singer of Paradise Fears

“People don’t realize the things they do outside this day, all the little things they do and do on a consistent basis,” Miller said.

Each year a few brave students step up and begin their campaigns toward being the next president of the Government of the Student Body. Many of these students aren’t even thinking of running mates when they first enter the GSB election process.

This year, senior Adam Guenther, GSB election commissioner, talks to a student who is interested in running for a position within the Iowa State community. Getting involved in the GSB election process can help you learn what you stand for when it comes to being the next president of the Iowa State community. It’s an opportunity for students to speak up and tell you what you stand for when it comes to the Iowa State community. It’s an opportunity for students to become GSB leaders and have a say in the issue of who will be representing you and your peers.

As students of the Iowa State community, we often see students who are not representing us in the GSB. Unfortunately, many students will not take the time to get to know the candidates or even vote on election day. It is important for students to speak up and tell you what you stand for when it comes to the Iowa State community. It’s an opportunity for students to become GSB leaders and have a say in the issue of who will be representing you and your peers.

The election process will see several debates between candidates in the coming months. The vice presidential candidates, Kletchcr and Fitten, are looking forward to the debates. They are excited to be able to share their ideas with the Iowa State community.

The theme was aggressive play for the Cyclones in this young team's first meeting of the season. It had to be, as Iowa State doesn't really have a lot of options. The idea was to follow the Cyclones' strategy.

"When you play Defense, you have to try and stop and do a lot more than you're going to have to do anything defensively as you go play," said freshman Kyle Lichte. "It's going to be harder, so if you don't step up it's going to hurt us. We need to be more effective and just keep firing the puck on the line." The goal is for Iowa State to be able to score against opponents and to reduce the average of being scored on. The goal is to keep the Cyclones' defense from giving up a goal to the Hawkeyes, as well as to continue to improve on their offensive play. The Hawkeyes were shooting from the base line and the Cyclones had to keep up with them and stop the Hawkeyes from scoring.

The key is for the Cyclones to be able to capitalize on their previous performance against the Hawkeyes. The only goal of the game was to get Iowa State to victory. The Cyclones played so much better than we did in their opening meet of 2014, in which the Cyclones fell to Florida Gulf Coast, 6-1. The Cyclones fell to 2-2-1 overall, and 0-0 in the Big Ten. The win gives the Cyclones a 2-1-0 record.

"We did have some struggles, but in the end we came away with a win," said former Iowa State women's hockey coach Fred day. "We had a great week of practice and we were able to put away the Cyclones and get the win." The Cyclones were able to put the Hawkeyes in their back pocket and made a statement to the rest of the conference.

The Cyclones defeated the Hawkeyes, 3-0, on Friday night at the ISU/Ames Ice Arena. The win gives the Cyclones a 2-1-0 record in the Big Ten and a 2-1-0 overall record. The team has been working hard to improve their offensive and defensive play, and they are showing signs of improvement.

Iowa State goes undefeated in tennis double header

By Max Dible

The theme about chess strategy is that you need to think about the big picture and not just the individual moves. This is especially true in a doubles match. The team needs to work together and communicate effectively to be successful.

**Horoscope**

**Aries** (March 21 – April 19)
- Today’s Birthday: March 21 – Aries
- Today’s Birthday: April 19 – Aries
- Career: Success in a chosen field will be evident if you take a bold step.
- Today is a 6 – Your day is filled with challenges.

**Taurus** (April 20 – May 20)
- Today’s Birthday: April 20 – Taurus
- Today’s Birthday: May 20 – Taurus
- Career: Focus on financial matters. Make sure you have all your documents in order.
- Today is a 7 – A good day for planning.

**Gemini** (May 21 – June 20)
- Today’s Birthday: May 21 – Gemini
- Today’s Birthday: June 20 – Gemini
- Career: Cooperation and communication are the keys to success.
- Today is a 7 – You may face some difficulties today.

**Cancer** (June 21 – July 22)
- Today’s Birthday: June 21 – Cancer
- Today’s Birthday: July 22 – Cancer
- Career: Take action to forward your next project.
- Today is an 8 – A successful day.

**Leo** (July 23 – Aug. 22)
- Today’s Birthday: July 23 – Leo
- Today’s Birthday: Aug. 22 – Leo
- Career: You may face some unexpected challenges.
- Today is a 7 – A good day for planning.

**Virgo** (Aug. 23 – Sept. 22)
- Today’s Birthday: Aug. 23 – Virgo
- Today’s Birthday: Sept. 22 – Virgo
- Career: Take advantage of opportunities that arise.
- Today is a 7 – A good day for planning.

**Libra** (Sept. 23 – Oct. 22)
- Today’s Birthday: Sept. 23 – Libra
- Today’s Birthday: Oct. 22 – Libra
- Career: Focus on interpersonal relationships.
- Today is a 6 – A good day for planning.

**Scorpio** (Oct. 23 – Nov. 21)
- Today’s Birthday: Oct. 23 – Scorpio
- Today’s Birthday: Nov. 21 – Scorpio
- Career: Take a practical approach to a problem.
- Today is a 7 – A good day for planning.
