**ARTS AND CRAFTS:** Completing a class project

Jay Owen, freshman in pre-engineering design, works on a class project outside the Memorial Union on Wednesday.

**Research**

“Since 2006, Goss’ wilt has slowly spread throughout the Midwest and is now widespread throughout Iowa. A bacterium that affects corn, Goss’ wilt can be devastating to corn yield. If infected early, it can remain airborne for many years, infecting crops for future harvests.”

—Daren Kolln, an account manager at Pioneer who also assists in the department of plant pathology and microbiology.

“Once you get it, there’s very few options,” said Jason Kolln, an associate professor in plant pathology and microbiology. “We recommend customers. There are no pesticides that can be used to control Goss’ wilt”.

“Another reason why there are so few options is because it is due to its nature. A pesticide in soil would not stick to the plant and therefore would not affect Goss’ wilt, which is caused by a bacterium.”

“The most important thing to do is pick high resistance hybrids,” said Kolln when asked what farmers should do to help control Goss’ wilt. “We also went to say that taking care of corn residue would help to slow down the spread of the disease.”

Corn

**Wiltiing hurts crops**

By Amelia Johnson

As anyone who has ever been to Iowa knows, corn is one of Iowa’s staple crops. What they may not know, however, is that corn is a very new disease in Iowa that may affect future yields called Goss’ wilt.

Goss’ wilt is a bacterial disease caused by the bacterium Pseudomonas syringae, one of the more common types of bacteria that can cause health problems. In fact, it has been reported in up to 2.2 billion hectares of corn, a good chunk of which is exported.

“Goss’ wilt was first recognized in Nebraska back in the 1960s. However, it has never been a real issue in Iowa until about five years ago. Since 2005, Goss’ wilt has slowly spread throughout the state and is now widespread throughout Iowa. A bacterium that affects corn, Goss’ wilt can be devastating to corn yield. If infected early, it can remain airborne for many years, infecting crops for future harvests,” said Daren Kolln, an account manager at Pioneer who also assists in the department of plant pathology and microbiology.

Kolln said when asked what farmers should do to help control Goss’ wilt. “We also went to say that taking care of corn residue would help to slow down the spread of the disease.”

 noting his flattish form for Christmas on this date in 2011. Speaking of Christmas, do you have a favorite holiday song or movie? It's not a good week to be a celebrity cell phone. It's not a good week to be a celebrity cell phone. It's not a good week to be a celebrity cell phone.

Saturday, September 17th

- Grant Imahara comes to Iowa State! Time: 7 p.m. - Stephens Auditorium Doors open at 6 p.m.

Tuesday, September 20th

- Lunch - Welcome to Engineers' Week Time: 11:00 a.m. - 1:00 p.m. Location: Lawns East of Marston Hall
- Kick-off Event Time: 5:00 p.m. - 7:00 p.m. Location: Lawns East of Marston Hall
- Lunch - Research Expo Time: 11:00 a.m. - 1:00 p.m. Location: Lawns East of Marston Hall
- Intramurals: 3-on-3 Basketball & Ping Pong Time: 7:00 p.m. - 12:00 a.m. Location: Lied Recreation Center
- Intramural: Broom Time: 6:15 p.m. - 9:15 p.m. Location: Ames Ice Area
- Intramural: Dodgeball Time: 6:30 p.m. - 10:00 p.m. Location: Lied Recreation Center

Saturday, September 24th

- Intramural - Sand Volleyball Time: 12:00 p.m. - 3:00 p.m. Location: Sand Volleyball Courts
- Charity Ball Time: 6:00 p.m. - Midnight Location: Howe Hall Alumni, Iowa State University Everyone is Welcome to Attend

Sunday, September 25th

- Educational Seminars Time: 12:30 p.m. - 4:30 p.m. Location: Hoover Hall Alumni, Iowa State University

Monday, September 26th

- Professionals on Campus Day Time: 2:00 p.m. - 4:00 p.m. Location: Lawns East of Marston Hall Join us for a chance to casually network with recruiters before the Career Fair.

Employer Panel Time: 5:00 p.m. - 6:30 p.m. Location: 207 Marston Hall Come with questions for experience recruiters.
The American Jobs Act, the new jobs bill President Barack Obama has unveiled to the United States, has people buzzing. On Thursday, Obama spoke in Ames, Iowa, to announce his new jobs bill, the American Jobs Act. The new bill is a mixture of new infrastructure spending and tax cuts for small businesses that are not optimistic because regional and global demand is what scares them.

The effort is meant to give businesses an incentive to hire more workers, but will this cause businesses in Ames to expand their employment? “Not likely,” Swenson said. “The uncertainty in the economic climate is not sustainable for individuals or companies, and we will increase, from Washington to Ames, small businesses an incentive to hire more workers or increasing wages for current employees. This means that businesses will not have to pay payroll taxes for adding new workers or increasing wages on the first $50 million worth of payroll increases. The effort is meant to give businesses an incentive to hire more workers, but will this cause businesses in Ames to expand their employment?

Latino Heritage Month celebrates Hispanics

By Caroline Havekost  Havekost@iowastatedaily.com

Latino Heritage Month is a time to celebrate the contributions and importance Hispanics bring to Iowa State and the United States. Yesterday marked the beginning of Latino Heritage Month here at Iowa State and in the United States.

The Latino Heritage Committee has planned this year’s celebration at Iowa State. The month is filled with speakers and events to celebrate and inform the community on Latino culture. Many new speakers and events have been added to this year’s celebration. This year the group has worked hard to bring more attention to events.

Gerardo Garcia, sophomore in Pre-Industrial Design, is the current president of the Latino Heritage Council. “This year we created a Latino Heritage Month Calendar to get the word out about events,” Garcia said. The poster is displayed all over campus with the different events, lectures and activities planned for the month.

“I want for the events this year to be more well-known,” Garcia said. “Another goal I have is for the events to educate Iowa State students on not just one issue, but many.”

Tonight is the celebration of México’s Independence Day. A celebration is scheduled at the Unitarian Universalist Fellowship of Ames, 1015 N. Hyland Ave. The event begins at 8:30pm and will have food, music, and traditional dances all for $7 a person. All are encouraged to attend the many different events put on throughout the month. For more information on México’s Independence Day celebration visit the Grito de Independencia event page on Facebook.
Agriculture

Bado: Iowas new hot tomato

As the harvest season sets in for some crops, the yield and growth of others can take a hit. The tomato harvest is more promising for some. 

Bado and graduate student in plant pathology and microbiology Taylor Berens conducted field research at Kumon Research Center in the town of Kukai, founding the Shingon Shu religious movement. The team gathered tomatoes in the last two weeks of July and film footage. The goal is to develop historical-defining documentation of one of the most famous parts of Kukai’s story. The research will also be used by museum figures. 

“Through it, we can learn about the events that led to his pilgrimage and understand how he used them to bring about change,” Bado said. “It’s a philosophical reflection, and it has teaching and historical implications.” 

Bado continues to conduct research and bring these cultural elements to the classroom and his research at Iowa State University, with the help of Paul Begala and other special guests. 

“We’re trying to get at the follow-through of these events, to start a dialogue or to start a place, like places where it is located. It’s a journey, not just history but history and culture,” Bado said. 

“There are more than 88 temples connected to the pilgrimage, and they will be there throughout the day. We want to allow visitors to come here to learn about the pilgrimage and the history that arose connected to it. The Museum is where we can learn about the pilgrimage and the history that arose connected to it,” Bado said.

Reconsider benefits for ex-convicts

The state of California took another step further in the effort to maintain its position as the most liberal, progressive state. Its decision to expand its Medi-Cal program three years before the state is required to by the federal government is another link in the chain of progress. Part of that decision is an extension of certain health-care benefits to ex-convicts.

Criminals are people who have disciplined their lives by rejecting the social contract, and entering a state of war against us all. They have left their families and communities in society to the winds; it is gone.

Criminal law differs from civil law. The state exists for individuals to seek financial compensation for the wrongs they have suffered. Criminal law exists because certain actions, if unchecked, uncontrolled, or unmonitored, damage our society and our people.

So what do we do when the criminals obtain their release? We have decided, I think, an important step in the right direction in protecting the peace and security of our nation, that we make the health and safety of our society a priority.

The United States has the highest rates of incarceration in the world, and the United States is the home of the death penalty. Many, including me, believe that life imprisonment cost was $47,102.

According to the United Nations, our rehabilitation program has been successful. They have inflicted since the invasion of Iraq and Afghanistan. They have stopped countless deployments, and returned to us within three years. That study also showed that convicts with longer prison terms had a lower recidivism rate than other outpatients. The US department of corrections had more time to think about the harm they've caused the victims and the harm they've caused to the society.

We may be able to change the character instead of providing them with a应有的选择. We could also consider extending the period of time an individual must spend in prison before being allowed to re-enter society.

We share similar views on a topic that we should work together to solve the problem. Without a doubt, the tragedy experienced by the United Nations is our shared experience. We must consider our role in the situation,

Criminals are people who have disciplined their lives by rejecting the social contract, and entering a state of war against us all. They have left their families and communities in society to the winds; it is gone.

Criminal law differs from civil law. The state exists for individuals to seek financial compensation for the wrongs they have suffered. Criminal law exists because certain actions, if unchecked, uncontrolled, or unmonitored, damage our society and our people.

So what do we do when the criminals obtain their release? We have decided, I think, an important step in the right direction in protecting the peace and security of our society, that we make the health and safety of our society a priority.

The United States has the highest rates of incarceration in the world, and the United States is the home of the death penalty. Many, including me, believe that life imprisonment cost was $47,102.

According to the United Nations, our rehabilitation program has been successful. They have inflicted since the invasion of Iraq and Afghanistan. They have stopped countless deployments, and returned to us within three years. That study also showed that convicts with longer prison terms had a lower recidivism rate than other outpatients. The US department of corrections had more time to think about the harm they've caused the victims and the harm they've caused to the society.

We may be able to change the character instead of providing them with a应有的选择. We could also consider extending the period of time an individual must spend in prison before being allowed to re-enter society.

We share similar views on a topic that we should work together to solve the problem. Without a doubt, the tragedy experienced by the United Nations is our shared experience. We must consider our role in the situation,

Editorial

Reconsider benefits for ex-convicts

The state of California took another step further in the effort to maintain its position as the most liberal, progressive state. Its decision to expand its Medi-Cal program three years before the state is required to by the federal government is another link in the chain of progress. Part of that decision is an extension of certain health-care benefits to ex-convicts.

Criminals are people who have disciplined their lives by rejecting the social contract, and entering a state of war against us all. They have left their families and communities in society to the winds; it is gone.

Arctic ice melt breaks 2007 record

WASHINGTON — Arctic sea ice melted faster in 2011 than in the previous record year of 2007, according to new satellite data released Thursday, mostly blaming increasing air and ocean temperatures in the region west of the Mississippi River, said Snow and Ice Data Center director Jeff Wilder.

“Is that all it takes to turn our climate crisis around? It’s a long-term change in Arctic climate.”

Since the 1980s, summer Arctic ice has begun using satellites to monitor melt in 1979. The new measurements were taken by the same two groups which use a different satellite sensor and has been monitoring melt since 1978.

“IT’S A LONG-TERM CHANGE IN ARCTIC CLIMATE.”

Energy

Ames to host global campaign

A simple day to remove fossil fuels. It is all about taking a personal foot print and becoming a climber, a more sustainable person.

Plus, but don’t you think it’s about time we start doing something for the climate crisis? 

The efforts will kickoff on Sept. 24. The United States will be one of 145 countries hosting Moving Planet. A day to move beyond fossil fuels. And where better to have a location than Iowa, with its environmental campus and its industry being a showcase of locally produced renewable energy.

ISU students ride all CyRide routes free.

The “off” switch is superior to your computer’s “sleep mode.” Turn off the CPU and monitor instead. Computers are usually located in closets, corners or under desks, where all will go back to the city and can be recharged. When someone is searching for a home, they tend to look for affordable and attractive, neither of which are typically associated with sustainability. The students who helped construct the Iowa House are focused on the opportunity to bring this thought to their campus. "The Iowa House is in a contest in architecture,” co-designer Andrew Bell, currently studying architecture at the master’s level, believes this house can be a good example for future contracts and building.

"With increased awareness and a little more effort, private homes can do part of the job, but the public sector and universities and colleges will need to continue to invest in sustainable education and research to help us get there," Bell said.

After it today.”

NBA:

Ex-Ohio State, NFL player pleads guilty in scam

COLUMBUS, Ohio — Former Ohio State and NFL tight end Andy Schlichter was sentenced to 10 years in prison Thursday for his role in a sports ticket-fraud scheme that federal prosecutors said defrauded victims of $680,000 in restitution, though a prosecutor conceded victims likely won’t ever see the money. Schlichter will appear Friday in federal court, where he faces related charges of bank and wire fraud, and will be ordered to pay his victims about $600,000 for a prosecutor conceded victims likely won’t ever see the money. Schlichter is also being ordered to pay restitution to a woman who lost hundreds of thousands of dollars in a fraud and apology to a woman who was likely the victim of a sports ticket-fraud scheme.

By Dan Tracy

Iowa State 44-41 in triple overtime.

By David Merrill

Iowa State Daily

After putting up the Fairfield 20 and Northern Iowa 14 in the first two games, the Cyclones are suddenly sitting at 79-1. Senior defensive end Shawn Oakman said in conversation with one attack error in 18 attempts for a player in a matchup against the Panthers was the serve and return for Nebraska. "We're going to have to be fixed for the next game, but we're going to have to be fixed for the next game."

Volleyball

By Gina Mancuso

Gina Mancuso has been a member of the ISU volleyball team for the past two seasons. She is averaging 3.78 kills per set while maintaining a .363 batting average. She is also a versatile player who can hit from the outside or from the middle. Her kills per set average is the second-best in the Big East Conference, and she is second in the nation in digs per set with a 2.57 average. She is also sixth in the nation in blocks per set with a 1.03 average. She is a key member of the Cyclones and is expected to have a successful season.

By Brooke Delano

Brooke Delano, who is hitting .281 with seven home runs and 13 RBI this season, is a key member of the Cyclones and is expected to have a successful season. She has been a consistent hitter and is a versatile player who can hit from the outside or from the middle. Her batting average is the second-best in the Big East Conference, and she is second in the nation in blocks per set with a 1.03 average. She is also sixth in the nation in digs per set with a 2.57 average. She is a key member of the Cyclones and is expected to have a successful season.

Iowa State faces 2nd straight road test
Cyclones to host only home meet of season

By Caitlin Dingm
isdaily.com

Iowa State will host its first and only cross-country meet, the Iowa Interoccial, on Saturday at the ISU cross-country course located on the corner of Hayward Avenue and Mortensen Road. Competitors in the race will include colleges in all divisions from all over Iowa. Cloud Cover Brands expects 10-15 teams to attend.

The Cyclones will be the host-school in a new event. This year, the women’s team will have a cross-country team in order to prepare for their first appearance at the Big 12 Cross-Country Championship on Sept. 24 at the Roy Griak Invitational in Minneapolis.

“I’m going to have set races for them to run,” Beltz said. “We’re going to control a little bit, see how much self-control our athletes have.”

Every runner for Iowa State will compete in the race. Freshmen will compete against freshmen in order to decide whether or not to redshirt their freshmen season.

“This race will be a decided factor for many of the players, whether or not they will re- serve a redshirt, but Beltz said it would not be the only deciding factor.

“After Saturday we’ll know whether or not I’m going to redshirt for the whole season,” said Pete as a redshirt, but Ihmels said it would not be the only deciding factor.

“After the tournament was over, we didn’t nearly move up after that,” said assistant coach Plus Gentile. “We learned some things that we could improve on for the rest of the season.”

The women’s team led by freshmen Mckenna Chapin, from Falls Church, Virginia, and Isabella Pratelli, from Alhambra, California, was strong for the team, coming close to the finish without a strike inside the top five beside 220 strokes, she finished overall with 222 strokes.

After the tournament was over, the team set new goals for the season. Gentile said, “We needed to stay focused and not get any time away from school, but golf as well,” Gentile continued.

“You have to take many time away from school, so we will bring the players that are ready to play next week,” Gentile said. “They are student-athletes and still need time for school.”

Before this weekend, the Cyclones were ranked No. 10 in the Golfweek poll and No. 30 by Golf World/NGCA poll. Both spots will likely slip the same since the Cyclones are playing preseason tournaments at the start of the season.

The next tournament for the Cyclones will be the only two-day tournament, unlike last week’s that lasted three days after the last one ended.

Because of that, the team needed not to focus on just one goal at the end of the season, Gentile said.

“Don’t waste too much time away from school, so we will bring the players that are ready to play next week," Gentile said. "They are student-athletes and still need time for school."

Word of the Day:

Suffix with nanny

Today's Horoscope:

Gemini  May 21-June 21

Today is a 9 — You’re very fortunate now. Go after what you need, someone nearby at home. If you don’t have what helps you understand a puzzle.

Taurus  April 20-May 20

Today is an 8 — Financial planning or to handle procrastinated unfinished projects. Take time to make a list and check it twice to avoid forgetting anything. Combine your tasks and make a plan.

Unusually

Scorpio  Oct. 23-Nov. 21

Today is a 9 — Today is a very important day, as you go ahead and step up to the next level. Remember that love is the most important part, as you go ahead with your plans.

Taurus  April 20-May 20

Today is an 8 — Today is an 8 — Assume more responsibility, take the lead. For love. Ask for what you want.

Pisces  Feb. 19-March 20

Today is a 7 — There may be a connection that benefits both. Call a distant friend to renew a relationship. With someone who seems fine, sock some away for later. Y our relationships are thickening, so enjoy them. Target the advantage, check the dictates of the day. It’s the easiest when the day is challenging.

Cancer  June 22-July 22

Today is a 7 — Y ou and your partner have more in common than you realize. This is a great time to share your feelings and understand each other.

Taurus  April 20-May 20

Today is an 8 — Take your partner have more in common than you realize. This is a great time to share your feelings and understand each other.
