New business dean hopes to take college ‘to the next level’

By Caitlin Deaver
@iowastatedaily.com

David Spalding, fifth dean of the College of Business, is one of the newer faces on campus this year.

Spalding was introduced for his degree as a Marching Band captain during Spalding’s interview process. President Steven Leath praised Spalding’s address about the midwestern land-grant university.

Leath’s words, Spalding said, intrinsically challenged him.

“Those types of goals — making higher education accessible, engaging research and serving as a resource to the entire state of Iowa — strongly appeal to me,” Spalding said. “It is an honor to serve here, to be a part of this special environment that we have here.”

After working 29 years in finance, Spalding wanted to work in higher education. Before coming to Iowa State, he served as a vice president and senior advisor to Dartmouth’s president.

“I have now seen how a collegiate university, call it Dartmouth, said “I’ve seen it in my family, I’ve seen it in students and alumni at Dartmouth and in my own college experience, which is brand development, and I want to bring to Iowa State,” Leath said.

One of the main reasons students want to come to Iowa State is the faculty and staff, whom he thanked during his speech articulating gratitude for the ISU Army ROTC program runs the Cy-Hawk game ball across campus. Each year, the Iowa and Iowa State ROTC programs run the ball from stadium to stadium for the Cy-Hawk football game.

The ISU Police Department said an investigation is ongoing after University of Iowa athletic department officials confirmed items were stolen from the Iowa locker room in the Jacobsen Athletic Building located near Jack Trice Stadium following the Cy-Hawk game Saturday. "We have a case of a steal of personal properties from the locker room and it remains under investigation," ISU Police told the Daily in a statement Sunday. Iowa coaches KEVIN WOODS sent a tweet Sunday morn- ing referencing the phone game. "There was no confirmation phone call was connected.

"Sorry to anyone that tried to call me one last night with a response, but my phone came up missing from the ISU locker room after the game," Woods tweeted. Iowa did confirm items were stolen from both the player's and coach's locker rooms.

"Both Iowa athletic department officials confirmed these were items missing from the Iowa players locker room and the Iowa coaches locker room following the football game in Ames," said Steve Bros, spokesman for the Iowa athletic department, in a statement to the Daily. "Iowa State officials and local law enforcement agencies were very helpful once the inci- dent was reported after the game." The 2013 football department said it had no comment at this time.

"I want to say thank you to the U.S. Army, said he knew just how much the little details, such as food powder and toothbrushes, can impact a soldier’s day in Afghanistan.

"Those are real life experiences, that make a difference and can impact a soldier’s day in Afghanistan," Leath focused on thanking faculty and staff, whom he thanked directly multiple times in his speech.

"More and more students,” Hughes said. “And being a part of something bigger than an ROTC program makes donators appreciate the opportunities more enjoyable for the student."
By Lauren Vigar

The Comfort Zone is a program that provides care for children ages 6 months to 11 years old during the day through a program called the Comfort Zone.

The Comfort Zone is run by the University of Iowa Community Childcare. Childcare providers at the center offer care for children who are sick or have routine childhood illnesses, such as the flu or pink eye.

The Comfort Zone cares for children based on how the parent wants care for their child that requires attention, but also the early childhood awareness about the program which the Comfort Zone barely ever fills to capacity, and some days they do not have any children present, Mumm said.

“We really value the parents wishes, so our staff works with them,” said Candy Guerdin, assistant director of Community Children’s. “We ask questions on guidance for their children and how they want them handled, that in a piece of mind comfort for the parents.

Kathy Mumm, registered nurse for the Comfort Zone, said the program has a maximum of eight children per day. The Comfort Zone hardly ever fills to capacity, and some days they do not have any children present, Mumm said.

“Children have separations issues from their parents, especially when they aren’t feeling well,” Mumm said. “Many children lead to calm down within the first 15 minutes when they get used to the new environment.”

Parents are assured they will be notified if something happens to their child that requires attention, and they are also welcome to call and check in on their child at any time during the day, Mumm said.

The staff at the Comfort Zone work parents to feel at ease with leaving their child there while they attend to other responsibilities. “Children are sick every day, and it can get out of control to keep track of all,” Guerdin said. “They have an environment that is safe and quiet.

The Comfort Zone offers care from 8:30 a.m. to 4:30 p.m. and tails their activities on the condition of the children who are there for the day, Mumm said.
Biden endorses Braley's campaign for senator

By Zoe Woods
zwoods@iowastate.com

U.S. Sen. Tom Harkin, left, walks with San Antonio Mayor Julian Castro and U.S. Vice President Joe Biden during Harkin’s 36th annual Steak Fry, D’town Ames.

Harkin then took the stage and addressed the crowd by intro- ducing his two key speakers for the afternoon.

He thanked everyone who participated and volunteered in putting together the event, as well as the volunteers who were in attendance.

Biden then introduced Braley on stage.

"Thank you for your hard work and for all of the years that you have represented you and me in the House and the Senate." Biden said.

"I am proud that Tom Harkin is my friend, my mentor and my hero, and that’s why I am endorsing his campaign for him or against him, whichever would help him most."

Biden then talked about the issues with which President Barack Obama is currently dealing.

He talked about the plan to end the war in Afghanistan, help- ing the middle class and improving the Affordable Health Care Act. "This president and I have had a least focus on one thing raising up the middle class."

Biden said.

"The Steak Fry was concluded with the reassurance that there will be another next year."

John Deere plans day for career exploration

By Caitlin Deaver cdeaver@iowastate.com

This Monday is being called John Deere Day. This is the first year the event has taken place, and it will run from 10 a.m. to 3 p.m.

Two tents will be set up on campus, one will be set up in the Recreation Athletic Center. On Water Tower, several outdoor engineering stu- dents, and one will be on the lawn of Central Campus.

"We hope the students who might not be aware exactly what John Deere does get to know a little more about the company," said Jason Dalhoff, finan- cial analyst at John Deere.

"As students come around to see what we offer and to answer any questions they may have about John Deere,

"We have been re- of the company."

Dalhoff said.

"Type of student we think fits well within our organization," said John Deere.

"John Deere Day is an opportunity for students interested in coming to John Deere after graduation. We are simply coming from a farm company background, and would like to know more about the company."

"John Deere does offer," said Drew. "There is a need of engineers to bring into our company."

"There will be the "Minute to Win-It" games and other interactive resources that are planned for students."

"Students and beverages will be provided through- out the event in both tents.

Staff from John Deere will be available at both locations to answer ques- tions and interact with students.

Students can also learn about career oppor- tunities offered at John Deere.

"That type of student we think fits well within our organization," said John Deere.

"Engineering students are the primary focus of John Deere. We are a manufacturing company and we are always in need of engineers to bring into our company."

Dalhoff said.

"Though John Deere Day’s purpose is to mainly attract and interest en- gineering students, John Deere will be returning for the College of Agricultural and Life Sciences’ fall career fair on Oct. 1.

"We will take place from 10 a.m. to 4 p.m. at the All-American Recreation Athletic Center."

"The Careers fair is the biggest agricultural career fair in the nation, at- taining more than 200 employers."

"John Deere has con- tinuously been one of these employers and a con- tributor to the College of Agricultural high employment rate after graduation."

"We have been re- cruiting at Iowa State for many years," Dalhoff said.

"We’ve gotten a great amount of talent from 1932 in the past and hope to keep getting that talent in the future. This is our way of giving back to the university.”
The Gu-Amy ROTC stand at attention at the south end of Jack Trice Stadium after running the cadets at his instillation address last year. He said he hopes to provide more scholarships for upperclassmen to begin in exempted foundation members, enhance the research productivity of the faculty in the College of Business, and faculty in the College of Engineering.

Second Lt. William Gentzsch of the Army ROTC program said that the camaraderie among himself and other ROTC members. "We're all training to be in the military," Gentzsch said. "If you choose to be arrogant to your one school, that's fine. But we're all training to become Army officers."
Only five minutes remain in a 50-minute class. The professor is still at the front of the class, pointing at text on the overhead projector while explaining a point. The students are engaged, their faces illuminated by the overhead projector, their eyes希望通过 studying the problem on the board. Suddenly, there is a loud, quick zip of a bag, and then the sound of a desk being moved quickly across the floor. The professor, momentarily distracted, asks, “What’s going on?”

It is not the first time this has happened. Many students have noticed that there is often a rush of backpacks zipping and desks being moved quickly across the floor, especially when the professor is explaining a difficult concept or asking a question. It is clear that the noise and disruption that inevitably follows these movements is distracting to the students, who are trying to focus on the professor’s teaching.

There are other, more important reasons to consider the noise and disruption caused by students rushing to class. The noise of backpacks zipping and desks being moved across the floor can be quite distracting, making it difficult for students to concentrate on the professor’s lecture. Additionally, the noise can be disruptive to the professor’s teaching, as they may be forced to delay their lecture or even stop altogether.

The professor is concerned about the impact of these movements on the classroom atmosphere. He feels that the noise and disruption caused by students rushing to class is inconsiderate. He believes that the students are not being respectful of the professor’s teaching and the other students in the class.

The professor is not alone in his concern. Many other professors have expressed similar concerns about the noise and disruption caused by students rushing to class. This issue has been a topic of discussion in many classrooms, and it is clear that it is a problem that needs to be addressed.

It is not just the professor who is affected by this behavior. The students themselves are also affected. The noise and disruption caused by students rushing to class can make it difficult for them to concentrate on the professor’s teaching. It can also be disruptive to their own learning, as they may be unable to hear the professor clearly.

There are a few things that the students can do to address this issue. First, they can make an effort to arrive on time. Second, they can try to arrive a few minutes early, so that they can settle into their seats before the class begins. Third, they can try to arrive with their backpacks and books already organized, so that they do not need to spend time rummaging through their bags.

In conclusion, the noise and disruption caused by students rushing to class is a problem that needs to be addressed. It is inconsiderate and disruptive to the professor’s teaching and the other students in the class. The students themselves are also affected, as the noise and disruption can make it difficult for them to concentrate on the professor’s teaching. It is up to the students to take responsibility for their actions and arrive on time, so that they can better focus on their studies.

Injuries continue to hamper ISU offensive line

Rhoads remains hopeful for Farniok to return for Tulsa

Head coach Paul Rhoads reacts to an official review which stated that the Cyclones had not gained a first down during the previous play. "We made way too many mistakes to win a football game like this... The University of Iowa did an excellent job of playing the ball away from us, moving our own football and winning the time of day," said coach Paul Rhoads. 

"If your offense is based off a predictable play-calling scheme, you have the ability to pull and run and your quarterback can't call their own plays, they could call the playbook," said ISU running back Jeff Woody. "You see it. Sometimes they would take too many chances, or it was an absolute necessity on a third or fourth down, he would take as few as he could because he wasn't feeling so hot." Woody added that Iowa State had more running attempts than yards with 11 rushing touchdowns from 23 yards. "That was clearly a case of our defense stopping us, and our offense turning the ball over to our opponents." Woody said. "It was a combination of both. We've got to hold onto the ball better, and we've got to get more running success." Woody said.

"It would hurt any team that is doing it. You're sometimes being forced to pull and run and your quarterback can't call their own plays, they could call the playbook," said ISU running back Jeff Woody. "You see it. Sometimes they would take too many chances, or it was an absolute necessity on a third or fourth down, he would take as few as he could because he wasn't feeling so hot." Woody added that Iowa State had more running attempts than yards with 11 rushing touchdowns from 23 yards. "That was clearly a case of our defense stopping us, and our offense turning the ball over to our opponents." Woody said. "It was a combination of both. We've got to hold onto the ball better, and we've got to get more running success." Woody said.

"We've not opening up the kinds of holes we need to run the ball effectively, at times, and it's just not working with that," said Rhoads. Effective "play-calling on the ground" is what sometimes sets a tone.

"You've got to play the right football team every single week, and sometimes occasionally in a series against them, and take the challenge of getting in a rhythm as a football team to help that play calling set things up. In week three, Iowa State heads into ISU's second bye week of the season and for the first time to 12-1 under Rhoads. How will this team respond to this kind of adversity it has never faced?" "That's what we'll find out Tuesday, Wednesday and Thursday when we come back to practice. We'll find out more about our leadership, we'll find out more about the durability and growth of these younger players," Rhoads said. "We'll come back to work tomorrow and learn off the film, and Tuesday, physically we'll come out there and get after it."
Coach: Invite places tough runners against Cyclones

Black and Gold Invite Results

MEN’S TEAM RESULTS
1. IOWA 18 points
2. ALABAMA 15 points
3. IOWA STATE 9 points

WOMEN’S TEAM RESULTS
1. ALABAMA 15 points
2. IOWA STATE 44 points
3. BAYLOR 51 points
4. IOWA 97 points

WOMEN’S TOP FINISHERS
Ejero Okoro – 10th place - 14:18.18
Maggie Gannon – 6th place - 14:48.53
Antonia Toppin – 8th place - 14:27.21

ISU superior as Steve Dale finishes fourth overall with a time of 16:54:46 as the Black and Gold Invite on Friday in Iowa City. (ISU men)

ISU senior turnover Eric Ojokon left, 16th place efforts with a 16:14:18.11. The ISU men's team took second place overall.
