Possible economic downturn could follow default on debt

James Schrader, an assistant scientist in chemistry, said it is possible to recycle the petroleum plastic because they are being tested are more sustainable than regular, and 80 percent of that money is tax money. However, these discussions are not in process. Barack Obama must sit down with Republicans’ Senate Minority Leader Mitch McConnell, Speaker John Boehner, and Senate Majority Leader Harry Reid to come up with a new stimulus package before the end of the month. If the Senate does not pass a continuing resolution to keep government operating, Congress could follow default on debt, pay a lot of other things that are important. So, Tom Harkin, D-Iowa, said he feels it is important for a decision to be made so as to avoid an economic downfall. "Taking the bill that’s over there, that is a clear, clean continuing resolution to put on the House floor for a vote," Harkin said. "There is no question it would pass with enough Republicans and Sinnencmers." Harkin said that for every continuing resolution or for every amendment that has been asked to be added on to debate under than 10 minutes in a conference on the budget, the House passed a budget, the Senate passed a budget, by itself. Harkin said, "They’re different and usually you go to conference to work it out, and that’s where we can negotiate on health care, tax reform and anything that the Republicans want to discuss.

Top Chef Latino cooks up competition

By Kat Gerzenfeld @iseadailydaily.com

The smell of cooking food quickly drowned out the noises of standing food and echoing voices. The participants shouted over each other and their teammates to work more quickly. Seven teams of two competed Tuesday nights Top Chef Latino to cook the perfect Latin inspired dish. Out of more than 50 ingredients, the teams had to pick at least five with which they had to cook. The rules declared that the kind of ingredients they choose is unknown to the judges. "It is truly intéressant to see what they are able to come up with," says Hsing, who are coming up with, "Apulo said. "The teams had to make appetizers for at least 40 people. Because everyone at the event got the chance to taste the food after the 10 minutes. With that warning, more pressure was added to the competitors of Top Chef Latino." The participants shouted over each other and their teammates to work more quickly.

ISU researchers investigate future of biodegradable pots

Bioplastic crop containers could eliminate trash, provide plants nutrients

By Simone Scruggs @iseadailydaily.com

A research program to better the environment and create a more sustainable use for crop containers is underway at Iowa State. The program is being used to study sustainable bioplastic containers for crops and plants to be sold for commercial use. The containers have also been tested in Horticulture Hall. The program is in its third year of a five year study. The main purpose of the program is to make containers for crops which will better the environment and create a more sustainable use for crop containers. The containers are made from plants' unknown ingredients is unknown. The containers are made from plants. The containers are made from plants. The containers are made from plants. The containers are made from plants. The containers are made from plants.

CHEF p1

We’ve probably upped our number of audience members, and because so many people are going to compete we have made teams of three this year,” said Sandy Velasquez, president of the Latino Heritage Committee. “It is really great.

For the last 20 minutes, teams ticked out the time for the competitors, and Aguilar announced the last challenge. “You have 20 minutes left,” he said. “The last challenge we ask you to do is find a team for three, minutes while you are cooking.”

Time and the challenges worked against them, but when the final bell rang each team was ready to present a dish. The judges rated the teams on taste, usage of ingredients, representation of Latin American food and culture, and creativity.

“Everyone worked out so planned we feel really good,” said Mora. “We feel it really good.”

The team will receive an unknown prize at the Cultural Night of the Latino Heritage Month on Oct. 19.

Corn ethanol won't solve energy crisis

But ethanol holds a special place in the hearts of millions.

What do double standards in free speech say about us?

By Danny Shaheenhoft

"Congress shall make no law respecting an establish- ment of religion, or prohibiting the free exercise thereof; or abridging the freedom of speech, or of the press, or the right of the people peaceably to assemble, and to petition the Government for a redress of grievances...."

No Gen-Xer or Millennial will say it is not the case. A remarkable number of Republicans have signed on to support gay marriage. This is an incredible change from a decade ago when the American Conservative Union gave 8 out of 10 its top annual rating to candidates who oppose it.

The United States has come a long way in a short time, and all of it has been put on other fuel sources, but it is not the answer to the clean energy prob- lem. Wind and solar power might get their share of special interest dollars, but they do not require investments already made in ethanol pro- duction, which uses a previously un- known technology to turn a made-in- America resource, a nonrenewable energy source (as we are now learning), into a renewable one.

Despite the ease with which we could simply not the energy source we hoped it to be, because of the investments already made in ethanol pro- duction, which uses a previously un- known technology to turn a made-in- America resource, a nonrenewable energy source (as we are now learning), into a renewable one.

Wind and solar power might get their share of special interest dollars, but they do not require investments already made in ethanol pro- duction, which uses a previously un- known technology to turn a made-in- America resource, a nonrenewable energy source (as we are now learning), into a renewable one.

The sun — but they do not require investments already made in ethanol pro- duction, which uses a previously un- known technology to turn a made-in- America resource, a nonrenewable energy source (as we are now learning), into a renewable one.

Kuhrt embraces off-the-bench role

By Dylan Montz
iowastatedaily.com/sports

Last season, Morgan Kuhrt silenced her critics by being the first redshirt to see action in her true freshman year. She was redshirted for that season.

This season, Kuhrt has not been slowed down by her redshirt status. Kuhrt has started all 15 matches for the Cyclones and has started five of them.

“I joke that he is thankful for the ability for us to communicate the plays, otherwise West would not be able to communicate. But why use the game works without patience. If you’re not patient, it makes the game that much harder. You’ve got to be patient,” West said.

In her senior year at Waverly-Shell Rock High School, Kuhrt specialized in kickstarting the ISU special teams this season, including his 95-yard kickoff return for a touchdown last week against Baylor. West thinks Kuhrt is approach to returning kicks to another as- sessment as the return game and credited West’s role in the improvement of the return game and credited West’s role in the improvement of his team’s special teams.

“Jarvis is an electric player. This is the player we recruited. He’s stop-and-go quick. He made some exceptional cuts on that kickoff to make it into the end zone and is definitely a weapon that kept us in the foot- ball game,” Paul Rhoads, ISU football coach said.

Cyclone and fellow receiver words on points without words

By Dylan Montz
iowastatedaily.com/sports

Jarvis West isn’t a talker. He allows Paul Rhoads to be the one to throw the play. West has had to improve his role in his own role on the outside to the point where West would not be able to communicate. But why are words when his performance can say all he needs to say.

The junior receiver said to be instrumental in kick starting the ISU special teams this season, including his 95-yard kickoff return for a touchdown last week against Texas Tech. West thinks Kuhrt has the best of the three biggest returners on the field, and in a short space. He’s always been quick and right now I think he has a lot of confidence.”

ISU coach Paul Rhoads has also rec- eived positive update in the improvement of the return game and credited Kuhrt’s role in each set.

“Jarvis is an electric player. This is the player we recruited. He’s stop-and-go quick. He made some exceptional cuts on that kickoff to make it into the end zone and is definitely a weapon that kept us in the football game,” Paul Rhoads, ISU football coach said.

Cyclone and fellow receiver reception for 90 yards and three touchdowns. Should obviously would like to see more of what West did against Baylor last season and Texas Tech last week, but West understands that patience is a virtue and remaining even- keaded in a big game.

We, having success in the return game is a big help for West on the offensive side of the ball. It opens up more opportu- nities, not just for himself, but for the team on the offensive side. **European trend comes to Ames**

By Steph. Ferguson  
@iowastatedaily.com

Growing and preparing your own food is nothing new, but a trend called food swapping is sweeping Europe and has become local in Ames. Started in January, the Ames Food Swap is the first and only registered food swap in Iowa under the Food Swappers Network. Since its beginning, seven food swaps have been held almost every month, each with a different theme.

According to Kate Ralston, “At first we started with 10 to 15 people at a meeting. We did a potluck and it was so much fun. Rost, organizer of the Ames Food Swap, said,” Thinking that some people might shy away from the idea of bringing a whole meal to the food swap, Ralston thought it would be better to have participants bring whatever they would like.

“Food swapping is more than just trading food. As soon as you arrive you are greeted by exciting, adventurous and friendly people who are all interested in food. The next food swap is Oct. 26 from 2 to 3 p.m. at Della Viti in Ames. Ames is the first and only registered food swap in Iowa. For more information or to make a reservation, contact Stephanie at steaph@iastate.edu. For information on additional dinners check out amesfoodswap.com.

By Lauren Granit  
@iowastatedaily.com

“Gooseberry pie, pulled pork, homemade bread, pies. I’ve made everything at the swap,” said Kala Sullivan, three-time swapper. “I’ve made a coconut vegetable curry that I wouldn’t normally try. Kate Ralston said. It’s a way to Ames. Ames is the first and only registered food swap in Iowa. For information on additional dinners check out amesfoodswap.com.

**Fine Dining Event Management cooks up various cuisines**

By Steph. Ferguson  
@iowastatedaily.com

Ames Fine Dining Event Management is cooking up various cuisines sweeping Europe and has been featured during each fall semester by the students in the Fine Dining Event Management class. Students are assigned recipes from the beginning of the year, meeting once a month, each with a different theme.

During the first few weeks of class, students undergo a rigorous scheduling process consisting of menu testing and financial forecasting, all preparing for five dinners. “Once you bring something, you can take home something new in return. If you’re brave enough to experience. For $35 you can go home with a five-course meal with wine pairings. On Nov. 6, guests are able to experience ‘Gourmet Southern Cuisine.’ Dishes featured in this event include local food green tomatoes, barbecued spare ribs, and collard greens salad. Eating your own food is nothing new, but the idea of food swapping is growing.”

**Fine Dining Event Management**

Fine dining is an art, and everyone is welcome to participate or just come check us out without bringing items to swap,” Balboni said. “Registered members are asked to bring three servings of a dish or special ingredient to share. It is expected that once you bring something, you can take home something new in return. For the first swap, 15 to 10 people at a meeting. We did a potluck and it was so much fun. Rost, organizer of the Ames Food Swap, said.”
