The Graduate Peer Mentor Program will help students in need of support in their writing and speaking experiences. "Academically can often be its own language," Nelson said. "Graduate students can have their writing critiqued at any stage of the writing process and can work with four different kinds of peer mentors to develop their writing skills.

"The program will help students to think about and to develop the kind of writing they need to develop for future careers," Nelson said. "We need to help graduate students to develop the kind of writing they will need to develop for future careers."

When someone reports being sexually assaulted, the last thing they want is to be involved in too many legalities or have too many people involved in the investigation. Therefore, the university is not going to disclose the name of the survivor to anyone and the university will not discuss details of the investigation. This is to enable students with complaints to feel confident that their university will not disclose their personal information to others.

It is important to know that the university takes sexual assault very seriously and is aware of an assault, the university must decide whether it is a sexual assault or not by the Survivors' Rights and Responsibilities Committee. If the survivor is not satisfied with the decision, the university will seek to conduct an independent investigation. The university will conduct an independent investigation if the survivor is not satisfied with the decision of the Survivors' Rights and Responsibilities Committee.

**GSB member attends summit to improve ISU bike share program**

A member of GSB had the opportunity to help improve a bike-share project in Ames while working with the Iowa Bike-Summit.

Nick Terhall, director of university affairs, said the summit had the goal to help improve GSB’s current program to create a bike share program for Iowa State’s campus.

Kletscher, executive director of GSB, said the bike program something she took the lead on internally before transitioning the program to OSI.

“I am very excited about the project. It was really something I really enjoyed having an ownership process of,” Terhall said. “It just shows what we as student government can do if we are really committed and really mean something to the student experience. I really hope we can make it happen because it could take a little bit longer, but I want to make sure that funding is not the piece that is holding us back from putting a project like this on the ground.”

Terhall said he had the opportunity to network with funding agencies at the state and federal level, while learning about the grant application process.

“It was really great to put more exposure at the same time for the program. There are a lot of local officials who are excited about the program,” Terhall said. “They were really impressed with the progress we made in the last year.”

The program was the brainchild of industrial design students, who presented a proposal to the City of Ames for a bike share program on campus.

“The students and instructors got grants and other funding, creating a prototype of a bike and completed a feasibility study of the program,” Terhall said.

“The GSB Senate will review the feasibility study to determine whether or not it wants to reconvene the funding of the program or advancing it in any way.”

**EDITORIAL**

**Strike down bans against same-sex marriage**

As of 2015, 36 states in the U.S. allow gay marriage to be legally recognized and same-sex marriage is justly celebrated across the nation. However, only 12 states, or less than a third, have anything to do with the idea of marriage equality. The most recent case arising at this time of writing is that of Indiana and Kentucky, where the violation of same-sex marriage has brought a lawsuit for the state of Indiana. The lawsuit, which was filed in June, claims that the state of Indiana is in violation of the U.S. Constitution with the prevention of same-sex marriage.

**LETTER TO THE EDITOR**

**Pipeline wrong for Iowa**

By Angela Catper, graduate student in natural resource science and management and sociology

A proposed crude oil pipeline would be built through 11 counties in rural Iowa, which could mean serious environmental consequences.

A proposed crude oil pipeline from Canada to the Gulf of Mexico would be built through 11 counties in rural Iowa. The pipeline, which would be 800 miles long, would transport crude oil from Canada to the Gulf of Mexico, where it would be refined for export. The proposed pipeline would be built through 11 counties in rural Iowa, which could mean serious environmental consequences.

In this case, the best reparations for Dutchmen should be granted more rights than any other men have the rights that have already been granted by any other men. Six months on top of a lifetime of abuse and inequality. As of 2015, 36 states in the U.S. allow gay marriage to be legally recognized and same-sex marriage is justly celebrated across the nation. However, only 12 states, or less than a third, have anything to do with the idea of marriage equality. Mix around outfits with sneakers

By Erin Dungan

IOWA STATE DAILY

The need for comfort seems more important than the weather forecast. Being stylish while dressed appropriately for Iowa’s climate is a challenge. Many people always go hand-in-hand. We’ve had because the days when sweaters were only associated with athletic-clothing are gone. Even if you swear women can use high-heeled pumps and towering platforms to spice up an outfit, opting for a sneaker instead isn’t such a difficult decision to make because they are not required to sacrifice style for comfort. Sneakers are sometimes seen as very basic but have a unique character that can be made stylish with a little effort. The sneaker can be made stylish, look for a pair that is colorful or neutral, low top or high top, patterned or solid, the sneaker silhouette varies from a classic tee and cropped skinny jeans to oversized tops, it’s easy to style the sneakers with a basic t-shirt or jeans to create the perfect outfit this fall. As the weather continues to get cooler, women everywhere can wear the perfect pair of jeans that have developed as a trend throughout the past few years. From boyfriend jeans to cropped tops, it is expected to be around a couple more seasons. To ensure that the sneakers can continue to be worn by women for years. The baseball cap has been worn by women for years. The sneaker initially started to be worn correctly, they can be able alternative, but when used high-heeled pumps and towering platforms to spice up an outfit, opting for a sneaker instead isn’t such a neutral leather. Choosing the right pair of jeans can be tricky, but researching, reading consumer reviews and weighing your options will help you make the right choice for yourself.
