Lost farm bill yields worry

By Jack Calhoun
@iowastatedaily.com

With Jack Trice Stadium at capacity thanks to an all-time attendance record of 56,860 for the first time in its 83-year history, the crowd was a factor in unsettling the KSU defense Saturday. Kansas State Saturday at Jack Trice Stadium. Iowa State fell 28-21 to Kansas State on Saturday.

Having come into the game with nine wins and penalties in the first five games – the first time in 39 games that Iowa State committed seven penalties for 55 yards – the Hawkeyes were in a position they had not been in since 2007 during a 24-13 loss to Northern Iowa.

Although the penalties could have been a negative byproduct of the score, KCC coach Bill Snyder said there may have been other

ELECTION: Students can vote on campus

Even through the election is still several months away, students who wish to beat the crush on Election Day can cast their ballots early at six different locations around campus starting Monday. Students who have not yet registered should come with a driver’s license or student ID and residence. A hard copy of a ballot will be available for proof of residence. Those who are already registered should come with a valid polling card.

Students may also cast their ballots at their university office until Nov. 2 or request an absentee ballot that needs to be mailed no later than 5 p.m. Nov. 2. The six locations on campus, their hours are:

- Monday; Union Drive, Community Center and Classroom BGC, 8 a.m. to 3 p.m.
- Tuesday & Wednesday; Memorial Union and Kildee Hall, 8 a.m. to 3 p.m.
- Thursday & Friday; University and Eastside Hall from 9 a.m. to 3 p.m.
- For more information or questions students should visit www.yournet.iastate.edu, go to “voter,” and then “Iowa" Daily staff

Campaign reasserts importance of feminism
By Liz Zabel
news@iowastatedaily.com

By calling the need for feminism into question, the idea that feminism is no longer needed is widespread. The “Who Needs Feminism?” campaign reasserts to the students taking the “Women in the Public Sphere” course at Duke University, taught by Rachel Seidman. Public Sphere” course at Duke, Roberts decided to bring the campaign to ISU, saying why they personally need feminism.

“Feminism can help improve the climate of the campus as all students feel safe and valued,” Roberts said. “Feminism needs to be the voice of anyone willing to participate. Feminism is about working with students because all students should feel safe and welcomed on campus.”

Jenifer Roberts, graduate student in student affairs and graduate assistant at the Margaret Sloss Women’s Center, stumbled upon this campaign while browsing the internet and was immediately impressed by the women at Duke. Roberts decided to bring the campaign to Ames.

In the past week, Roberts has taken pictures of pictures of various students, staff, and faculty with a sign writing why they personally need feminism. “Being a feminist is a big part of my life,” she said. “I need feminism in regards to working with students because all students should feel safe and welcomed on campus.”

This applies to several issues, Roberts said, including the high rate of violence against women on campus, sexual assault and unwanted sexual advances classes for LGBT students, students of color and many others. “Feminism can help improve the climate of the campus as all students feel safe and valued.”

Feminism is not just about equality between men and women, it’s about recognizing the differences between men and women. “I think it’s really important to realize that feminism is about creating awareness of everyone’s differences to end oppression and help everyone flourish to the best of their abilities.”

Feminism to me is about these issues hiding behind the “invisible shield.” “It’s a really easy way to get involved to show awareness of what feminism actually is and what it means to a lot of people,” Walker said. “Who Needs Feminism?” is a way of reasserting the gender bias in our name. IC’s Walker said, “keeps it neutral.”

For Walker, feminism is not just about equality between men and women, it’s about recognizing the differences between men and women. “I think it’s really important to realize that feminism is about creating awareness of everyone’s differences to end oppression and help everyone flourish to the best of their abilities.”

Walker said people’s interpretation of feminism has led to notions of lesbianism and man-haters, when it started out as a means to bring negative connotations surrounding feminism, when it started out as a means to bring awareness to the fact that women deserve the same rights as anyone else. “Feminists can help improve the climate of the campus as all students feel safe and valued.”

Roberts said people have a narrow definition of what feminism is. “Feminism is about equality, equity, and respect.”

“Everyone has multiple identities and it’s silly to categorize someone on one identity… [as] a gender role, which is really no one’s business anyway.”

Walker said, “Feminism is about just means it’s about creating awareness of everyone’s differences to end oppression and help everyone flourish to the best of their abilities.”

Walker said people’s interpretation of feminism has led to notions of lesbianism and man-haters, when it started out as a means to bring awareness to the fact that women deserve the same rights as anyone else. “Feminists can help improve the climate of the campus as all students feel safe and valued.”

Ample opportunity to explore careers

The Agriculture and Life Sciences Career Day provides benefits for networking, careers for students

By Ashley Hunt
@iowastatedaily.com

Each semester, the colleges at Iowa State host career fairs to enable their students to receive the best opportunities available. The College of Business, Liberal Arts and Sciences, and Human Sciences host their career fair, as does the College of Engineering. The College of Agriculture and Life Sciences hosts one of the largest agriculture career fairs in the nation.

As one of the world’s top leaders in institutions of agriculture, Iowa State’s College of Agriculture and Life Sciences is known for providing knowledge and leadership in science, research and education. Ranked as the No. 5 agricultural education program out of 60 universities in the nation in a 2009 study by Ohio State, our very own College of Agriculture and Life Sciences is one to be proud of.

The Agriculture and Life Sciences Career Day matches the prestige of its school. The 2012 Ag Career Day is the Thursday-Williams-Allen week-long career fair to make appearances at the fair, agriculture students will have a multitude of opportunities to meet with potential employers to vie for an interview for an internship or job. Last fall, the Agriculture and Life Sciences Career Day saw more than 1,400 students with approximately 160 employers.

With more employers showing up this year, organizers can hope to see more students in attendance this fall.

Each semester, the importance of attending the Career Fairs is instilled in our minds, over and over. Whether you’re looking for an internship, a job after graduation or just networking possibilities, the career fairs have endless benefits for a student.

Freshmen and sophomores might not realize the importance of attending the career fairs until they’re ready to graduate. However, attending a career fair is still important as ever.

Attending the career fair this early on, without the pressure of needing to make a really great impression on potential employers, gives students the chance to get some practice in before it is absolutely crucial.

Of course, attending the career fair as an upperclassmen can be key to securing that internship you need to graduate or your dream job after your graduation.

Attendance the career fair this early on, without the career fair, instead of needing to make a really great impression on potential employers, gives students the chance to get some practice in before it is absolutely crucial. Students can get interview practice and also a chance to talk to potential employers to figure out what they’re looking for.

The few years of extra practice can help give students an edge in the competition when students return to the career fair looking for an internship or career.

Attending the career fair this early on, without the pressure of needing to make a really great impression on potential employers, gives students the chance to get some practice in before it is absolutely crucial. Students can get interview practice and also a chance to talk to potential employers to figure out what they’re looking for.

The Agriculture and Life Sciences Career Day provides benefits for networking, careers for students.

When: 9 a.m. to 3 p.m. Tuesday
What: The Agriculture and Life Sciences Career Day will bring more than 200 companies to campus for the career fair.

Block and Bridle helps students succeed

By Kelsey Roehrich
@iowastatedaily.com

With 450 members, Iowa State’s Block and Bridle Club is easily one of the largest clubs on campus.

Block and Bridle Club was built out of the department of animal sciences and is split into six interest groups, which include beef, horse, poultry, swine, meats and companion animals.

Brady McNeil, president of the Block and Bridle Club and senior in animal science, said the club hosts events such as the Little North American Showmanship Contest, pig and sheep sales, dog and horse shows, grill outs, and more.

“Block and Bridle Club members also give back to the Ames community by holding canned food drives, participating in Veishea service day, and donating tie blankets to the Mary Greeley Hospital,” said Sara Morine, club vice president and senior in animal science.

There are many opportunities in the club whether someone is interested in the show or commercial side of things, McNeil said.

McNeil said that the Block and Bridle Club has many leadership opportunities so everyone has a chance to become a leader in their own way.

McNeil and Morine both believe attending the Agriculture Career Fair is very important.

“The ag career fair is the largest in the nation and provides a great opportunity for networking, internship options, and full time employment,” Morine said.

“While it can be overwhelming for freshmen and sophomores, it helps to get practice and break down that barrier of nervousness,” McNeil said.

Even if you don’t think you will get the internship that you want, there are always other opportunities,” McNeil said.

The Block and Bridle Club helps students prepare by having members that want to hold a committee position go through three to five minute interviews, McNeil said.

“As members of Block and Bridle, there are numerous opportunities to speak with industry leaders and organize events,” Morine said.

“This helps give our members experience in professional situations,” McNeil said.

McNeil said that the Block and Bridle Club does not need to be a animals science major or have any previous experience with animals.

“Out club strives to promote animal agriculture and educate the public about animal sciences,” Morine said.

McNeil said that they try to have something for everybody within the club and you will get as much out of your experience as you put into it.

“No matter what you’re interested in, find a club that you find exciting and engaging and it will allow your resume to speak for itself,” McNeil said.
This year there is a new study abroad program for students in the College of Agriculture and Life Sciences. This study abroad trip will take students to Greece, where they will develop a marketing plan for a new Greek brewed tea product, which is set to launch in the New York and Boston markets this May, according to the website for the ISU Agriculture Study Abroad program.

The name of this study abroad is the Spring 2013 Travel Course to Greece. There is a $10 application fee.

This trip is a unique experience that students can’t get anywhere else, said Stacey Noe, the program’s contact person. “Ag and Life Sciences [students] don’t have much course work that relates to ag marketing,” Noe said. “If [students] want to go into ag marketing, this is where they can get experience.”

This trip is unique in the way that it gives students real life job experience on how to market a product.

“In a classroom, students don’t have the opportunity to take an international product and learn what it takes to market that product,” Noe said. Students also have the opportunity to travel around Greece and talk to other businesses. Halfway through the trip and at the end, they present their work to a board of directors.

This trip is a three credit class in the spring semester. The course number that correlates with Iowa State’s course Econ 466. The application deadline is Nov. 15.

The program contacts are Noe and Kevin Kimle. Information, including the full price of the trip, can be found on the Agriculture Study Abroad website.

The program is going to be small — maybe only 10-12 students, Noe said. This is because students will be working in small groups to find a way to market the Greek tea product.

In general, study abroad experiences are helpful when students need to gain real world experience and learn about different cultures.

Study abroad trips can help students get an internship or job because they provide a good example of something to talk about at an interview or even at the career fair when you’re talking to recruiters. It also adds to a resume and broadens a student's horizons.

A study abroad can be a priceless experience because of the variety of benefits gained from it. Going on a study abroad trip like this one could really help a student decide if they are correctly in the right major for them.

It can also help you figure out what skills you might need to work on before you get your first “grown up” job. The Greece study abroad program for Agriculture and Life Sciences students has the possibility of teaching the students who participate many things.

Besides hopefully giving you experience that you can use in the real world and at the career fair to make you stand out, studying abroad is fun. The best part about studying abroad is being able to experience different cultures and going to all the tourist traps — just so you can say you’ve been there.

Study abroad

The ISU Agriculture Study Abroad program has created a new international experience to Greece that will teach ag marketing in promoting a new Greek tea product in Boston and New York.
Global education

Study abroad, travel beyond new horizons

By Megan Shirley
www.iowastatedaily.com

When it comes to studying, why not study in a foreign country? Studying abroad is a great opportunity for you to expand your life experiences and add a few new stamps to your passport. The College of Agriculture and Life Sciences offers plenty of study abroad courses from Italy to Uganda. These courses vary from semester to semester, giving you the perfect time abroad for your time over seas.

Studying abroad will benefit and enrich your life in countless ways. The Institute for the International Education of Students surveyed students after they had returned home from their studies abroad. Their surveys showed 96 percent of students had increased self-confidence and 80 percent increased their interest in academics after studying abroad.

Students have also shown increased maturity, greater diversity, more self-exploration, and more prominent goals after students have studied abroad. Studying abroad is a great way to improve your second language skills, gain various activities or hobbies you may not be able to do at home, and network for your future.

There are many countries to choose from to study in that have a language other than English. This can give you an opportunity to either expand your knowledge of the language or learn a new language all together. Some study abroad programs will require you to take some basic language classes prior to your trip.

When you are abroad, there is going to be a whole new environment right at your fingertips. With a new environment, come new activities. While abroad, you could try new things such as, parasailing or zip lining. Networking is a great benefit to studying abroad. You will get to connect and interact with businesses across the world, which could potentially be a great contact for you in your future.

For more information about all of the study abroad options, talk with your adviser or visit www.agstudyabroad.iastate.edu/travel_courses.htm.
We're all busy college students. We're working hard to pass those classes and ace those tests. Someday, whether we can believe it or not, we'll be done with college and out in the real world. We'll be competing against our former classmates and our former friends for our dream job.

Employers are going to be looking for far more than how good your grades were when they're deciding whether to hire you or not. They want to see that you have real life experience and real life qualities that are going to be valuable and beneficial to them and their company.

Any time people talk about working on your resume, you'll hear “resume builders.” Here are some suggestions of ways to get involved during your college years — some might be obvious, others not so much.

1. Join a club — and take a position on that club
   Joining a club, particularly in your field of study, shows your interest in that field. And as we've all had pounded in our heads countless times, joining a club and getting involved is so important to your career after graduation.
   To take that next step, and to get one step ahead of your competition, try taking a position on that club. Run for president, treasurer or social chair. If that doesn't work out, try simply joining the fundraising committee of your club. By actually holding a position on that club, employers can see that you didn't just get
passion for that industry. To take it to the next level, and it shows a real motivation to take it to the involved. For the sake of getting involved for the sake of getting involved, you might as well grab a job. Working on your resume that you're involved shows many students have never considered. Working the career fair can show you have opportunities. When employers see students as having an advantage. You'll see that you understand dead lines. This is key for any job. Employers will see that you have experience with a large firm, and they've heard that you're interested in the field. When you're interviewing for large firms, they'll know that you're interested in the field. They'll be able to see that you understand deadlines. This is key for any job. Employers will see that you have experience with a large firm, and they've heard that you're interested in the field. When you're interviewing for large firms, they'll know that you're interested in the field. They'll be able to see that you understand deadlines. This is key for any job. Employers pay attention to dress, so keep it classy

By Kayla Schaudt

You know what they say: You only have one chance to make a first impression. You only have one chance to make this impression is obvious and noticeable way.

Employers pay attention to dress, so keep it classy.

After every career fair we send out an employer survey, and two career fairs ago, there were a lot of negative comments back from employers about how our female students were dressed. “Too conservative is always better than being flamboyant in a situation like this.”

Lois Pringnitz, program coordinator in the College of Human Sciences student services.

Tattoos should be covered up as much as possible, especially if you are not small and discreetly placed.

Lois Pringnitz, program coordinator in the College of Human Sciences student services.

Senior men should try to stick with footwear that’s not too dark of makeup is a turn off for males or females who are trying to make an impression on future employers. - While

Protector of human health

Food provides more than just calories. Using the tools of plant breeding and biotechnology, crops can be enhanced to provide better basic nutrition and healthier lives.

Agronomists create a healthier world by producing oils without trans fats, peanuts free of allergens, and staple foods such as rice and cassava with increased vitamin and protein content.
