Endowment also helps fund trips for students

By Carly McKinney

Dr. Neal Iverson, professor of geological and atmospheric sciences, has been named chairman of geological and atmospheric sciences.

The position is only the second endowed departmental chairmanship at Iowa State. Iverson graduated from Iowa State in 1983 and later earned his Ph.D. at the University of Minnesota in 1989.

The endowed chairmanship is part of his job as the chairman of geological and atmospheric sciences. With his chairmanship and the impetus of the department faculty, he is granted the responsibility to decide how to spend the money donated by the Smith family.

“The position is a chairmanship, not an endowed chairmanship at Iowa State,” said Dr. Neal Iverson, professor of geological and atmospheric sciences on July 1.

The chairmanship was first endowed at Iowa State in 1984. Founded in 1984, the department is benefiting from the endowment are plenty of jobs in the field.

“Chinese people like to hang out with Chinese people and Indians like to hang out with Indians,” Rajan said. “I got to know a lot of people to be part of it,” he said.

903 Wickers St. Suite 24, Newton, Light Center
Obama speech

Will this time be different? After President Barack Obama announced a new jobs initiative, he moved the speech up to an earlier start time to avoid conflict with the opening games of the NFL season. Why and how far off should Obama’s initiative to create new jobs be meaningful to the American people?

Weekly columns written for iewhen he was scheduled to give the address, it would conflict with the Republican Debate. Obama realized that the debate needed to be delayed to the following evening, but the president felt he had to act quickly.

Thursday night’s speech — which I happened to watch on The White House’s website — was a mistake that is slated to cost an additional $2.2 billion and may end up killing the mission.

In the wake of the event, a lack of congressional foresight over the last few decades has led us to have massive space shuttles, and to have NASA losing the race for leadership in space.

The keynote speaker’s final words were, “Thank you, President Obama!”

Where do our priorities lie?

Shorn of distractions, how many people know that there was an NFL game on Thursday? I have only been scheduled since April. For NFL fans, this is the first true drop of blood in the football season. There were 3 million more viewers for the speech than for the game. After all, last year the NFL’s opening game drew 22.5 million viewers. How do you decide who’s number one? Do you have a preference for the NFL or the president?

After the first scheduling conflict, another arose. The Second Amendment was an important issue in the presidential elections. But then, another scheduling conflict arose: the speech was scheduled for Thursday at 8:30 p.m. EDT, not to mention the governor’s debate.

Perhaps it was a ploy to steal some viewers. After all, last year the NFL’s opening game drew 22.5 million viewers. How do you decide who’s number one? Do you have a preference for the NFL or the president?

Perhaps it was simply to steal some viewers. After all, last year the NFL’s opening game drew 22.5 million viewers. How do you decide who’s number one? Do you have a preference for the NFL or the president?

If you got up early enough last Saturday morning before the football game and tuned into NASA TV, you might have been able to watch a Delta II rocket firing NASA’s new GRAIL probes into space. For the assembled GRAILs, designed to orbit the moon and use the effects of gravity to “see” beneath its surface, however, there could be better understand how planets form and how the moon was created.

For me, the most interesting GRAIL is amazing, what do they achieve in the United States’ grand plan for space exploration? Maybe we should ask ourselves:

“Do we have a goal for space exploration?”

Every since we reached the moon, it seems we have been traveling backwards, undoing the achievements we made in the 1960s in human spaceflight. The International Space Station is built in such a way that it is less than a mile past the moon.

NASA needs a purpose. It needs a reason to exist. It needs to have a job. If it doesn’t have a job, it needs to be fired. For the uninitiated, GRAIL is de-

nated to orbit the moon and use the effects of gravity to “see” beneath its surface. In this way, GRAILs can better understand how planets form and how the moon was created.

Appearance of Hot Dog Man statue mystifies law enforcement

COUNCIL BLUFFS — A Hot Dog Man statue that suddenly appeared in one Iowa town has mystified police, who would relish information about it.

The Daily Nonpareil in Council Bluffs reported that a concerned citizen called police and a pair of high-top sneakers. Its hands are missing and a U.S. flag is draped across its back.

"I have a unique family," Kennedy said and police Capt. Terry LeMaster says no one knows anything about it.

Travel

New York-Phoenix flight diverted to St. Louis

NEW YORK — Investigators have determined that there were no terrorist threats involved in an incident that caused a US Airways flight from New York to Phoenix to be diverted to St. Louis on Tuesday, officials at the St. Louis airport said.

Terrorism

NYPD: City still on high alert after 9/11 events

NEW YORK — New York City police say security measures put in place for the 10th anniversary of the Sept. 11, 2001, terrorist attacks have been scaled back.

But they caution that the city remains on high alert because of the unconfirmed tip that al-Qaida may be planning a bombing. They say New Yorkers will still see extra patrols in the subways and elsewhere.

"The flight attendant was concerned," Mason said. "There was a language barrier was part of the problem. They were also carrying a box that turned out to be for a game of backgammon. Mason said: "It was their actions that caused the immediate action in our decision," Mason said.

Put your fall produce to use

By Lindsay MacHab
AmesEats Flavors Writer

If you haven’t already, be sure to check out the local farmers markets in order to be the first to enjoy the season’s fresh produce and vegetables that growers in the area have to offer. You will most likely find juicy peaches, bell peppers, ripe melons, yellow and green tomatoes, squash, and much more. So be sure to use squash and zucchini while cooking! Here are some creative ways to use these delicious ingredients.

INTERESTED IN SIMPLE COOKING OR SHORT ON TIME?

Sautéed zucchini and yellow squash make a perfect side. Combine in a mixing bowl:

- 3-4 cups sliced or diced zucchini
- 3-4 cups sliced or diced yellow squash
- 1 Tablespoon of olive oil
- Sea salt
- Black pepper

Lightly dry sauté in a large skillet (no oil needed) until squash and vegetables are crispy. Season to taste with sea salt and black pepper.

Looking for a low-carb pasta substitute? Instead of pasta noodles, use spaghetti squash. Squash is high in fiber and low in calories. And beets and carrots make a very nutritious, easy, protein-packed salad. Cut one medium-size spaghetti squash in half and place in a baking dish. Remember to cut the skin the other way. Then use a fork to remove the inside of the squash. Use the ‘spaghetti’ as noodles and the squash as noodles and the squash as broth to make a soup. Delicious! (If you don’t have a fork, you can use a spoon but it might be a bit messy.)

Cashew Chicken

2 large skinned/boneless chicken breasts (cut into 1” cubes)
1 cup chipped green onions
1 tablespoon cornstarch
2 tablespoons cold water
2 chicken breast cubes
1 cup lemon lime soda
4 cup of cooked white rice
pinch of salt
pinch of pepper

In a large wok, season and brown the chicken in cornstarch and water. Add the choped green onions and cashews to the pan. Cook over medium heat for two minutes or until chicken is brown. Add the soda to the wok. As the rice is brown, mix the chicken and water in a separate cup to form a slurry. Once the slurry bubbles, add the sauce to the wok. Finally, add the rice and water to the wok. Add the cashew chicken to the wok and serve.

Deal of the week: green beans

By Kylee Schym
AmesEats Flavors Writer

Green beans are planned in early spring in order to be ready for harvest during mid-summer, but the good thing about green beans is that they will continue to grow throughout summer and into fall until the first frost. In some places, they are grown year-round, but the typical peak season is May to October. Green beans can be found at great prices right now.

Cost:£

Grab a pound of fresh Michigan green beans from your local grocery store for around $1.00. You can also visit the farmers market for some great savings on fresh green beans.

How to use them:

The flavor of green beans will be at its best within a day or two after purchase. They are a low calorie treat that offers a great source of dietary fiber and various vitamins keeping you healthy and fit. Green beans can be used in soups, casseroles, salads and sides, or simply used as a side dish. The easiest way to prepare them is to blanch or steam. The blanching and steam methods are the fastest way to prepare green beans and the best way to retain their nutrients. Remove them from the boiling or steaming water and place them in cold water for 30-40 seconds. This will help retain their color, flavor and nutrients. For more information visit: http://www.greenbeancore.org/recipes.html.

How to slice: an apple

With the change of season, it’s a great time to visit local orchards and pick your favorite apple. Apple slices make an easy, healthy snack, and it puts a fun twist on other desserts.

Step 1:

Slice into pieces or cut the apple in half and slice through the core. Remove the seeds with a spoon.

Step 2:

Call the apple in half and slice it down on the flat side. Squeeze your favorite fruit and make little vertical slits in the desired thickness equally all the way across. Repeat with the other half of the apple.

Step 3:

Separate the slices with your fingers and enjoy.

Volleyball
Cyclones swept in Cedar Falls

By Jean Berhow-Goll

No. 15 Panthers deal Iowa State first loss

ISU volleyball team dropped No. 15 Northern Iowa (7-1) swept No. 12 Iowa State (9-1) in Cedar Falls. The Cyclones were 2-0.

“After we started strong, they just took off from there,” said setter Alison Landwehr. “We started off with some non-serves and big hits but we just weren’t getting it.”

Johnson-Lynch said that the Cyclones have their hands full already against Lindenwood. Hof, for this weekend’s series against No. 15 Northern Iowa.

Waterloo native leads Cyclones with 10 kills

By Jean Berhow-Goll

Hannah Willms’ homecoming was spoiled by No. 15 Northern Iowa on Tuesday night in Cedar Falls. Willms, a Waterloo native and Dike-New Hartford High School graduate, led the Cyclones with 10 kills.

For ISU outside hitter Hannah Willms, it was pretty much what she knew and what she expected.

“I don’t think we can do anything but go out and play them as we know how to play,” said head coach Christy Johnson-Lynch. “When you’ve got thousands of people in people behind that serve, that’s not a service you’re going to be able to rack up 40 kills at a .225 clip while holding them to 30 kills at a .180 clip.”

Willms’ homecoming was spoiled by No. 15 Northern Iowa on Tuesday night in Cedar Falls. Willms, a Waterloo native and Dike-New Hartford High School graduate, led the Cyclones with 10 kills.

“After we started strong, they just took off from there,” said setter Alison Landwehr. “We started off with some non-serves and big hits but we just weren’t getting it.”

Johnson-Lynch said that the Cyclones have their hands full already against Lindenwood. Hof, for this weekend’s series against No. 15 Northern Iowa.

Waterloo native leads Cyclones with 10 kills

By Jean Berhow-Goll

Hannah Willms’ homecoming was spoiled by No. 15 Northern Iowa on Tuesday night in Cedar Falls. Willms, a Waterloo native and Dike-New Hartford High School graduate, led the Cyclones with 10 kills.

For ISU outside hitter Hannah Willms, it was pretty much what she knew and what she expected.

“I don’t think we can do anything but go out and play them as we know how to play,” said head coach Christy Johnson-Lynch. “When you’ve got thousands of people in people behind that serve, that’s not a service you’re going to be able to rack up 40 kills at a .225 clip while holding them to 30 kills at a .180 clip.”

On Monday, intramural flag football season kicked off with 253 teams signed up. Five men and women have volunteered to run the teams and player registration.

Many of the teams run through September, and on Oct. 3 tournaments will begin, allowing many more teams to sign up. for some of the leagues. The ultimate goal is to reach a total of 500 teams. Others, including David Parkinson, attend intramural games. "We believe everybody wants to get everybody involved and have fun playing a sport they love."
Big 12 Conference remains on shaky ground

By Jake Calhoun
iowastatedaily.com

Once removed from the departures of Nebraska and Colorado from the Big 12, the talk of conference re-alignment has again resurfaced. This time, the perceived winds could mean the end of the conference altogether. On Aug. 5, Texas A&M announced that it would leave the Big 12 by July 2012, causing BYU to seek legal action against it and the SEC, ACC and Big East ten contractual points.

Last Friday, Big 12 Executive Director Bill Snyder said the conference didn’t have the legal or financial means to take BYU to court, and therefore the conference would move on. The reaction among the Big 12 conference’s other members was mixed. Some, like Texas and Oklahoma, view it as an opportunity. Others see it as a fate worse than death.

Seeking details about the stability of the conference has been a struggle. McCarroll said since not much action has been taken outside the realm of the administrators involved in the decision-making because of the fluidity of the situation. For ISU student-athletes, the conference defection is a distinction that is not easy to come to terms with.

“Really, we’re not even the type of team to think about that stuff,” junior defensive end Tracy Claeys said. “It’s kind of weird to think about that stuff.”

Speculation of the conference’s instability has risen from the issue of uneven revenue sharing, but the members of the conference have developed hostility toward one another does not stem from dollars and cents.

“The revenue-sharing thing is more an emotional, spiritual issue for ESPN and KSPFF.com. More than anything, it’s symbolic and it just feels like a lot of resentment that you don’t see in other leagues, and I think it’s one of the many reasons the Big 12 isn’t as Redux as it used to be,” Ubben said.

Ubben, who covered the Big 12 for ESPN.com during March 2010, said last Tuesday on the ESPN show that the conference’s future isn’t sure as long as they are on TV.

**Word of the Day:**

**SOUL**

1. The essential or permanent part of a person; the life force.

2. A source of relief or consolation.

Example: After her husband's death, Mary often found solace in music, allowing her to concentrate on her feelings.

---

**Random Facts:**

The official futility coin in the world (Robert Wadlow) was 6'11" (2.15 m) and weighed 410 lb (186 kg) at his death on April 15, 1940. Despite this, futility coins were found of a man who was 11'10" (3.6 m) high. It is known as the Uskautz Crazy Dime.

Each of the suits on a deck of cards represents the four major pillars of the economy in the middle ages: hearts represented the Church, spades represented the military, clubs represented agriculture, and diamonds represented the merchant class.

The plastic things on the end of shoelaces are called aglets.

People are more likely to tilt their heads to the right when kissing instead of the left (93 percent of people go to the right).
