Women’s basketball

A-not-so Sweet ending

They gave me back something I thought I lost. I mean that. To be around them everyday and see how hard they worked at things and to see the progress they made and the way they cared about one another. And the way they wore the uniform that means so much to so many people -- amazing. It's hard to end it; it's going to end sometime, but there's no regrets.

- ISU coach Bill Freindy on the season's end.

For the 14th time during coach Bill Freindy’s tenure at Iowa State, his team went dancing in the NCAA Championship. But a second-half rally by Iowa State wasn’t enough to erase the difficulty Freindy’s squad with a no-set seed ending.

In a bracket of 64 teams, the Cyclones (11-2 Big 12) earned a home-court advantage against Gonzaga on the first round, but eventually fell 65-60 against No. 4-seeded Georgia (27-6, 14-4 SEC) in the second round of the second round in Spokane, Wash.

Cancer treatment explored at ISU

By Miranda Freeman mfreeman@iowastatedaily.com

Kaitlin Bratlie, assistant professor of materials science, is steering the process of publishing scientific journals on her new cancer treatment theory.

Bratlie will attend the Materials Research Society Convention from April 2 to April 5, 2013, to present her research. Bratlie has published 20 other works and if the research holds, this will be her first scientific journal for cancer.

Bratlie’s research focuses on a certain type of cancer that does not respond to normal cancer treatments. Tumor- associated macrophages are the problem Bratlie is trying to solve.

Reducing the tumor-associa ted macrophages is what could help cancer patients. Bratlie hopes to create a polymer to attack these polymers.

“Reducing the tumor-associated macrophages is what could help cancer patients. Bratlie hopes to create a polymer to attack these polymers,” said Rachel Philiph, assistant professor, to discover a new treatment for cancer.

Rachel Philiph, a research assistant, works with Kaitlin Bratlie, assistant professor, to discover a new treatment for cancer.

Philiph was given a chance to be a part of this research through a honors program. "I submitted an application and looked through different professors and their research," Philiph said. "I pronounced interest, and then he basically matched me with Bratlie."

Philiph is excited to apply engineering to health issues. "Everything is based on reading of other scientists’ work, you do a lot of reading and take what other people do and put it together,” Philiph said.

Philiph explained the goal of the project. "We are trying to develop a polymer [plastic cell], and use these particles to deliver the drug," Philiph said. "It is like a delivery vehicle to get into the body. We are trying to get it to work with the immune system [white blood cells] most to attack those polymers.

"If this works, scientists can try to inject the polymer into the macrophages, which would tell the white blood cells to attack. There are a lot of steps to go through still, a lot of biological hurdles to overcome," Philiph said. "It would really cool if it develops into a real treatment."

So far the research is going well, and soon Bratlie will begin research on mice. Once Bratlie and her research group start working with mice, they will know more.

"We still have a lot of steps to go through," Bratlie said. "But Odin’s are no結束."

By Miranda Freeman

Iowa State University Extension and Outreach

Iowa State University Extension and Outreach is your university’s research at work in Iowa. Extension and Outreach connects Iowans to Iowa State’s academic programs and scientists through educational programs and resources.

We are making a difference and building a future for all Iowans. With 100 county offices, we are in every county in Iowa, helping communities, businesses, families, farmers, and youth.

We focus on the long-term key issues that are important to the people of Iowa: economic development, food and the environment, health and well-being, and K-12 youth outreach. We also respond to the immediate issues and needs of Iowans, such as the effects of the ongoing drought.

We support many other programs that enhance the financial, physical and nutritional health of individuals, families and communities.

We are Iowa State University Extension and Outreach.

To learn more, visit www.extension.iastate.edu/our-story.

Gun safety fundamental

By Caitlin Ellingson

Firearm safety is important for anyone to understand. Unfortunately, this concept is often taken for granted, especially when it comes to the Second Amendment, which guarantees it to all citizens of the United States. To better understand this concept, we should look to those who wish to have their rights restored.

One of the main rules to keep in mind when shopping for a gun is to make sure the gun is of appropriate size for the individual. Other general safety tips are also important to remember. For instance, if the gun is obstructed, because something is stuck in the wall of your living room, you can accidentally shoot an innocent bystander. Other general safety tips include being ready to use the gun when hunting or even just target shooting.

Without a simple inspection, you might discover that the safety is not actually functional and the gun might go off when you are not expecting it. In this case, you could be our family member who is operating it, and it's unfair to saddle ourselves and our successors with this financial burden. We should not force future generations to fend for themselves, especially if they have been taught an incorrect form of gun safety.

There are other important safety precautions regarding guns, and if you’re planning to own a gun you should be one of the few who are familiar with all of them or take an adequate safety course. If more people learned how to safely handle guns, there would be fewer accidents. Overall, gun safety should be the responsibility of the country as a whole to have intelligent gun owners who can protect themselves and not cause harm to themselves and others. What are some mid-college crises that you have faced? Let us know in the comments below.

Do you know anyone who is old enough and mature enough to buy a fancy new vehicle (because the car you own is from the late 1990s)? Or do you know anyone who is old enough and mature enough to buy a fancy new vehicle (because the car you own is from the late 1990s) and has served as commander in chief of the United States? We thought so.

An opinion is not necessarily reflective of the opinions of the Daily Iowan.

There are important safety precautions regarding guns, and if you’re planning to own a gun you should be familiar with all of them. This includes understanding the state of affairs in the gun safety world. If you want to learn more about gun safety, we recommend checking out the Iowa State Daily, which has an article about the topic.

Without a simple inspection, you might discover that the safety is not actually functional and the gun might go off when you are not expecting it. In this case, you could be our family member who is operating it, and it’s unfair to saddle ourselves and our successors with this financial burden. Ames boutique receives The Knot’s Best of Weddings

By Zoë Woods
iowastatedaily.com

Pure Bridal in Ames was one of three stores in the nation to win the most recent Knot’s Best of Weddings award. Pure Bridal’s customer service and constitution with sustainability were cited as reasons for the win.

“Our customer service is a big part of why we are so successful,” said McKenzie Foughty, one of the owners. “We really support and educate our customers who work atPure Bridal.”

“It’s an honor to be recognized in the Knot’s Best of Weddings,” Foughty said. “It was a goal of ours, but it is really rewarding to see Pure Bridal win the award.”

The store also entered into a drawing for a prize. “Any time someone walks in, we put their name in the drawing box,” Foughty said. “Ideally, we want to have it. Eight out of 10 brides go to The Knot. Pure Bridal contains a few stores with the best reviews.”

Pure Bridal provided the Knot with more than 100 bride reviews for the evaluation of the award. “It was a goal for one year to win the Best of Weddings,” Foughty said. “It was a goal of ours that we didn’t foresee or we couldn’t possibly get because we are so new.”

Foughty is most looking forward to the future of the store and its employees. “It is really something to know that such a young store can win an award like this,” Foughty said. “Who knows what it will be like down the line to see what all the things we can do.”

The annual event isn’t always titled the Eco Fair. Foughty said, “We try to remember in a funny way that the Eco Fair was the third annual Eco Fair in 2001.”

The third annual Eco Fair, which is sponsored by the city’s sustainability efforts, will take place at the Community Center Gym at 515 Clark Avenue on Saturday.

From an educational standpoint, visitors can learn about some of the city’s sustainability efforts, which is something that Pure Bridal provides in the store. Pure Bridal is also one of the main sustainability efforts that the city is planning for their future weddings.

Vendors offer advice about green lifestyles

By Alexander Furman
iowastatedaily.com

Over 40 vendors including ISU clubs will be speaking about ways to live a green-friendly lifestyle.

Sustainability topics at this year’s fair will include waste conservation, reducing electric consumption, shrinking carbon footprints and getting involved in environmental donations.

“There are also boutiques from various types of businesses that want to get involved in environmental issues.”

But then, there are also organizations that those kinds of energy-efficient items, such as air conditioners, the lighting and appliances, shouldn’t be exclusive to the electric departments of the city, said about those organizations:

“Their hard work paid off when Pure Bridal was chosen to win the Best of Weddings award from The Knot.”

ISU invited back to Alabama meet after six years

By Mady Mondal

The ISU wrestling team went 3-0 in its three meets Monday afternoon in Tuscaloosa, Ala., to secure a return trip to the NCAA Regional meet.

Iowa State (1-0, 1-1, Big 12) seeded to Tuscaloosa to take on No. 3 Alabama, No. 9 Illinois, and Georgia on April 6 in the re- gional meet. The Cyclones have faced this fate already this season, winning 23-16-5.

I could be more happy about this trip if I could go to Alabama,” said ISU coach Jay Strasburg. “I feel very comfortable against the teams we’ve been up against. That’s about the best answer I can give you. I can’t tell you if the letters we’re getting back are good or bad.”

Strasburg said the team as a whole is jumping in Alabama for the first time in a long time. The last two regional titles or national team titles in wrestling for ISU were in 1969 and 1970.

“It was the region I was brought up in and I think it’s a really good region,” Strasburg said. “I think this year is ac- ceptably good. [They will] tough teams and we’ll have to bring our best.”

Jackson wants to bring back wrestling robes

Iowa State coach Kevin Jackson wants to bring back the glow in the darkness robes to wear at NCAA wrestling tournaments in the 1960s and 70s.

The ISU wrestling team wore robes in the 1960s and 70s. The robe he wore Saturday at the NCAA Division I championships in Oklahoma City was the robe that made its return to Twitter.

Jackson wants the feedback. “I can’t retweet them all. I gotta bring them back now. Thanks for the feedback.”

Jackson was also recently interviewed on Twitter to gauge public opinion of wrestling robes for the wrestling team.

Wrestling team upswing

By John Callahan

I have four years of covering the ISU wrestling team. I’ve been through the ups, the downs, and the rehab. It started in 2009 when I started covering the Cyclones as a freshman, they placed third. That was the first year with two individuals and one team. The next year redshirted Nick Gallick—out due to injury. Two years later, a loyal few still supported the team as usual. Swim meet at nationals, failing to bring home any hardware.

assistant: The story is not clear. Some parts are missing. There is text about “Snow and rain forced the meet to end early without doubles play.” and “Iowa State (5-12, 1-3 Big 12) and No. 12 Kansas State pulled out to an 11-point lead. With 10 minutes remaining in the game, Poppens was called for another foul, falling short of completing her 20th career double-double.”

ISU tennis team goes 1-2 during Spring Break

By Beau Berkley

The ISU tennis team spent most of its Spring Break on the road, winning 1-2 matches against Grand View College and Nebraska Omaha, but losing against Creighton.

ISU won its first match of the day over Grand View, 7-0 Saturday in a friendly match. The Cyclones then went on to lose 4-3 to Creighton Monday. But the Cyclones came back to win 4-3 over Nebraska Omaha Saturday. The team faces off against Iowa Friday.

ISU draws a blank against Nebraska Omaha

“Second-seeded cobble was the way the game should be played,” said coach Armando Andersen.

Despite the win, coach Armando Andersen said the team didn’t play to their full potential. And a second-seeded cobble came to the game.

For someone who was four matches from the Sweet 16, the Cyclones didn’t have an upswing. Some parts are missing.
