By Laura Wilcox IowaStateDaily.com

Bringing focus to preserve war and personal items moving in action was the goal of the US-wide run from the Iowa Capitol in Des Moines to the Memorial Union on Friday. The Air Force ROTC had an annual run on the third Friday of September, which is dedicated as a POW or MIA. The first run started in 1982 to honor POW and MIA flag the whole way from Des Moines to Ames. The 15th Air Force ROTC men and women run through their running lines in honor of those who have a chance to carry the flag. “We get to honor the POW and MIA to the capital on Friday morning,” said one cadet from the POW and MIA. “We get to honor the POW and MIA flag the whole way from Des Moines to Ames.”

Some people try doing the same thing, said Calvin Hagey, ROTC, in mechanical engineering, "I have done two back to back — one in the morning and the other in the afternoon. I do not switch out." Along with the run, the Air Force ROTC also has two events; "We honor POW and MIA and by having a cadet stand in front of a picture in the Gold Star Hall. The honor guard stands present in front of the flag." 

This year, the run will begin on campus from 6 a.m. at the State House and run to Albia. The Air Force ROTC will carry this flag while running to honor POW and MIA. "We hope the organization is one that could be grabbed. People that go through [the ceremony] will be able to feel the American flag and the POW/MIA Flag the whole way." said Ryan Peltier, senior in industrial engineering. "We will slow down at times that we have to slow down, and then we will run, and then we will run. "

Another tradition is carrying on the American flag and MIA flag the whole way from Des Moines to Ames. The 15th Air Force ROTC men and women run through their running lines in honor of those who have a chance to carry the flag. “We get to honor the POW and MIA to the capital on Friday morning,” said one cadet from the POW and MIA. “We get to honor the POW and MIA flag the whole way from Des Moines to Ames.”

Iowa State University’s Memorial Union is celebrating its 86th birthday on Sept. 22.

The Memorial Union will be setting up 70th table and will be offering free chili, cake, and drinks will be provided.

The Memorial Union was reopened in September 1928 to be a living memorial for ISU students who died as soldiers in World War I.

There have been 11 additions made to the Memorial Union since 1928. Today, Cold War Hall serves as the memorial for ISU students fallen in World War II and the Korean War, Vietnam, Somalia and the Global War on Terrorism.

The Memorial Union is a living memorial. Students and alumni serve as caretakers of the memorial.

Professor creates nonexplosive trash can to prevent terrorism

By Rachel Riemer

William Prindle, professor of industrial design, is working on a trash can that he claims will be beneficial to the public. "I want it to originate from Iowa State, but it’s going to be beneficial to the whole world," Prindle said.

The trash can would protect the public from lethal blast and shrapnel from explosions. It can withstand the equivalent of 2,295 pounds of TNT and last for 20 years. "It’s a safe target," Prindle said, explaining that it’s not a movie studio or other public spaces. "You don’t want to be caught in one of these," he said.

Prindle hopes his design will be obvious in its purpose. "I don’t want to use this as a way to provoke fear and the threat," he said. He hopes that his students will be able to participate in expanding the design possibilities of his trash cans. He has been testing several different designs for his trash cans so they blend in with their surroundings. He hopes his design will not be obvious in its purpose. "I hope people but also as a reason to go out and explore," he said.

Participating ISU students will contribute to the design of the trash can. Prindle plans to expand the project to the state and other departments. "We’re in the digital planning stages, gathering information from various departments in computer models of the environments we can put an idea of the calculations of the expansions," Prindle said.

The project is in its early stages and the initial cost will be paid by some ISU students. "We’re still in the early stages of his design but hopes that it will be used all around the world," Prindle said.

The rallies were meant to show the United Nations that there is support for action on climate change. The marches were organized by the People’s Climate Movement. The rally showed the United Nations that there is support for action on climate change.

The rally called March of Tuesday’s United Nations summit on climate change. According to MIU, hundreds of thousands of people marched in New York City, while also holding smaller marches in other U.S. cities.

Participants involved in the March included students from the Iowa State University Climate Change Activism group. They joined the rally to show their support for action on climate change.

"I don’t think it’s necessary, but I think it’s a good idea," Zimmer said. "I would be nice to know that there’s a team working on climate change that will take place on Tuesday."
Volunteer-organized, traditional German outfits that added to the conventional German culture of Oktoberfest. Although there were many people with German heritage in town, targeting them was not the goal of the event, said Emily Miller, events coordinator for Main Street Cultural District. 

"Rather, the coordination viewed Oktoberfest as one of the only community-oriented events hosted in the fall. Oktoberfest did however include some of the same traditional events. Polka dancing was performed Saturday by polka dancing club that also offered polka dancing lessons to those interested. There were also special nightly cards available for $10 that enabled customers to try 10 different wines each night. Oktoberfest was also a surprise for many restaurant operators. The festival took place on Main Street and was run entirely by volunteers, most of whom were Main Street business owners and operators.

"Oktoberfest was the perfect mixer for our community and is fairly included some of the many events open to minors in the future. Running it just kind of helps me think about the soldiers' lives and made the ultimate sacrifice before me. "Skadeland said. "The people that we do this for, they're not free," Kinrade said. "It's just a huge relief for us to be able to do this, knowing they are not able to."
Many students come out of college with a degree, a job and a little debt. Student debt exceeded $1.2 trillion in 2014, roughly 8.5 percent of college graduates between the ages of 22 and 24 were on average, meaning they’re unable to diversify their investments for their education. 

Some have sold their education because it’s a requirement and saddles themselves with massive debt. 

This should anger us. While we should make no excuse for the financial burden that Americans blocked attempts to reduce student debt. 

Now we're sold out to education because it’s a requirement and saddles ourselves with massive debt. 

The rental costs for textbooks gets pissed off when I have to pay for two hours at a time — it's already checked out. Oh, it's already checked out. But hey, that's business. Remember, I haven't even graduated yet and I'm not going to school at the university anymore — I'm a human being and goddamn it, we're not going to school at the university anymore — we're forced to pay for textbooks. 

Guns are no more regulated than gasoline stations.

Cyclones dominate in Cy-Hawk Series

By Mike Randleman
@iowastatedaily.com

It’s been a long wait for the ISU men’s golf team.

At this point last season, the Cyclones were pre-paring for their third of five tournaments. This year’s schedule differs. Their first fall tournaments stacked in a fifteen-day period, beginning with the Virginia Commonwealth University Shootout on Monday and Tuesday.

“It’s definitely a long wait with the slower time of year. We’re going to have four full weeks of class before we resume competing,” said head coach Andrew Tank. “I think we’re a little bit anxious about the golf season, but we’re also excited to have the golfers see what it means to compete this early in the season. We can be ready for the fall tournaments.

The Cyclones will be the only team in the field to make a return trip this week, but senior Scott Fernandez insisted it should not be a problem for the team.

“We’ve all been playing and practicing for three months. It’s going to be intense,” Fernandez said. “When you’re on the course, you’ve got to be focused on the point at hand. We’ve got to stay on point.”

“It’s a great event. We really like the golf course,” Tank said. “It’s a pretty good course, but at the end of the day, we’ve got to get there.”

The fall tournaments are the start of a long season for the Cyclones, who will compete individually.

“Iowa State’s victories in the first set and sending the match into a frenzy. The largest crowd of the season was in attendance that day with a hitting percentage of 0.38. When you have big blocks and kills like that, it gets everyone pumped up and ready to just get that last point,” Tank said. "It’s going to be interesting. We call critical points when you’re 23-24, 24-23, or 22-21. But in the big eight, you can’t just stay steady. You’ve got to keep making the kills to make a statement. It’s going to be a great match.”

Johnson-Lynch said the win is of the utmost importance for the Cyclones, as they have only one match remaining — Northern Iowa — before heading into Big 12 play and the toughest opponents of their schedule.

“We know how much this win means. It’s important that we contribute to the Cy-Hawk Series and that we beat good teams. We want to see it at the end of the year. We want to be ranked, and this type of match helps us get there.”

Men’s golf prepares for first fall tournaments

By Mike Randleman
@iowastatedaily.com

It’s only 15 years since Iowa State last fell to Iowa on its home court, but senior Scott Fernandez believes the team is currently the only team in the field to make a return trip this week.

“I think (this week) is a good test and probably the best we have seen,” said ISU head coach Chris Johnson-Lynch. “It is really good for the kids to play against a top team because you feel like they play 10 times better than what you saw in film because of the strategy.”

The ISU volleyball team (9-5, Big 12 2-2) defeated Iowa (8-3, Big 12 0-0) in straight sets 25-23, 25-22, 25-15. Yet, Iowa State’s performance on back-to-back days was unbelievable.

“It’s an exciting time,” Conaway said. “Everyone is excited to be here. Just to be surrounded by everyone who loves volleyball and everyone cheering us on, it’s a fun experience.”

Conaway made her mark on the final set as she hit a personal-best 2.4 spikes and 5 assists, while leading Iowa State with a hitting percentage of 0.38.

She said that aside from West’s victory performance on back-to-back days, the keys to Iowa State’s victories in the first two sets were the volleyball team’s confidence and consistency.

“As (the match) gets later into the second set, it gets more of an all or nothing point,” Johnson-Lynch said. “That changed our momentum tremendously, so we had some outside killers and then coupled with the ISU talent coupled with the Iowa State defense, it was a great win.”

It’s been a long wait for the ISU men’s golf team. The team has historically done well on the course and looks to continue its success this year.

“We’re hungry for golf.”

Kevin Goetz said that the narrow triumph was a satisfying moment for the Hawkeyes, but it was the triumph they were after.

Goetz said that the narrow triumph was a satisfying moment for the Hawkeyes, but it was the triumph they were after.

“We’re coming off a loss and they were at the height of being just out of conference,” Conaway said. “It was exciting. Conaway said. “Everyone is excited to be here. Just to be surrounded by everyone who loves volleyball and everyone cheering us on, it’s a fun experience.”

Cyclone Hockey splits Oklahoma series

By Wally Ganem
@Iowastatedaily.com

Cyclone Hockey (1-1-0 ACHA) opened its season against the No. 4 ranked Oklahoma Sooners (1-1-0 ACHA) on Friday.

On Saturday, the game saw a complete turnaround with Oklahoma putting up 5 goals against the Cyclones and Cyclone Hockey splitting the series at 1-1.

On Friday, Oklahoma scored on a power play with just over a minute remaining in the first period to take a 1-0 lead. The Cyclones were unable to capitalize on their chances throughout the game and suffered a 3-1 loss.

On Saturday, the Cyclones dominated the game, outshooting Oklahoma 34-20. They scored on the power play and held on for the 2-1 win, their first ACHA victory of the season.

Senior forward Alec Wilhelmi gave the Cyclones a 1-0 lead early in the second period with a shot from 40 feet out. They managed to hold onto the lead heading into the third period.

Cyclone goalie Matt Cooper made 36 saves on 39 shots on Friday and 37 saves on 38 shots for the game on Saturday.

"I think our team played well. We can definitely stack up against one of the top teams in the country," Cooper said.

"We put a really good effort forward today and it was a good team bonding experience," Jason Fairman, head coach of Cyclone Hockey, said.

The team allowed only 20 shots to be taken in the first two periods but allowed 18 in the third period alone.

The teams were tied 0-0 heading into the first intermission. The Cyclones out-shot the Sooners 11-6.

Senior forward Alec Wilhelmi gave the Cyclones a 1-0 lead early in the second period with a shot from 40 feet out. They managed to hold onto the lead heading into the third period.

Trevor Lloyd gave the Cyclones a 2-0 lead. Then a four-on-three power play put Oklahoma in the game with a goal, which they were able to capitalize on to make the score 2-1.

By Wally Ganem
@Iowastatedaily.com

Goalie Matt Cooper was integral to the Cyclone Hockey victory against Oklahoma on Saturday. Cooper only allowed one goal in the 2-1 victory, which tied the series between the teams at 1-1.
