Conference offers positive message about race, ethnicity

By Megan Swindell @iowastatedaily.com

“Vigilance, an understanding, and then an opportunity to take what you’ve learned and share it with the community is our effort to make Iowa State a more inclusive environment,” said Vice President of Student Affairs Tom Hill. Students who attended the conference got out of the Iowa State Conference on Race and Ethnicity.

In all, 170 students, faculty, and community members attended the conference. DISCOVER is “setting the platform for dialogue around race and opportunity,” said Jalapannah Kellogg, program coordinator of the Student Support Services Program. Conference-co-founder of DISCOVER for the past eight years, The Memorial Union hosted a variety of discussion-provoking forums. The Memorial Union hosted a variety of discussion-provoking forums. Information will include a biography and their platform. Students will be able to vote for executive slate, which consists of presidential candidates, and senators, who will represent all ISU colleges, resident halls, off-campus living and community members.

Students will be able to vote for the executive slate online Voting and Election System. After this, students can move on to determine who they choose to vote for the executive slate, which consists of presidential candidates, and senators, who will represent all ISU colleges, resident halls, off-campus living and community members.

Racists: the ‘right’ ought to change from within

Society must not be reactive in ending racism

P
 Artikel: Racial Pot-fol

Byeditorial staff

In 2006, according to the author (Amollo), President Barack Obama made promises to give more opportunities to African American students. However, these promises have not been fulfilled as of yet. Obama has implemented policies such as the American Recovery and Reinvestment Act of 2009, which provided funds for the education of minority students. Despite these efforts, African American students still face challenges in accessing quality education and achieving academic success.

Racists: the ‘right’ ought to change from within

Society must not be reactive in ending racism

Politics

Changing social norms proves more difficult task than fixing political policy

By Michael Bolding

According to a recent Quinnipiac University/Fox News poll, 40 percent of African Americans believe that their community is headed in the wrong direction. However, only 28 percent of white respondents share this belief. This gap highlights the racial divides that exist in American society, where policies and programs aimed at improving the lives of African Americans often face resistance from those who benefit from the status quo. The political power of the white majority means that any discussion of racial justice must occur within a broader context of national policy-making, where white privilege can be used to maintain the status quo.

Pricing

Penney’s concept changes

By Alexandre Furman

www.iowastatedaily.com

More than a month into JC Penney’s national strategic overhaul, local shop-
ners are seeing improvements in “fair and values” pricing.

In addition to slashing prices across the board, the new strategy changed the layout of JC Penney stores to an “ex-
clusive, cluster-based model.”

“We’re still getting traffic, remain-
ing but our prices are down and they like the new price layout with easy ac-
cess,” said Steve Pankratz, manager of Valley West Mall’s JC Penney outlet.

Pricing now is categorized and color-coded by everyday regular prices, markdown prices and best prices available in one of the first 90 days of the strategy.

“One can be sitting, buying a com-
pany special sale price and prices ending with .99 — now prices will round up to a $1 number.”

JC Penney also will be adding new brands and restructuring its existing stores. According to a presentation by JC Penney CEO Ron Johnson, the franchise expects to save $300 million and transformed bedding for the $4,000 prize, said he hope this will resonate with college students.

“Since the very well with college students, we have more fashionable items available now and are also addressing fashion,” he said.

Competition

Students battle for $4,000 prize

Four MBA students from Iowa State University will battle for a $4,000 prize in an end of spring case study competition to create a strategy for Penn State University’s Women’s Network at 8 p.m. Thursday. The team is currently working on a new marketing strategy to be introduced in March at the Delta Upsilon fraternity house. 117 Ash Ave.

For one innovative idea, each pitch could make its way to a $300 student prize in a single idea.

Thirty preregistered ISU students and limited to 30 students.

Men's basketball

By Jaymee Davis

Scott Christopherson put the final touches on his senior season with a 93-68 win over Eastern Michigan on Thursday.

As he was being pulled out of the game, Christopherson headed for center court, kissed the ISU logo and stopped to hug his coach.

“Thanks,” Christopherson said. “I feel like it’s real life, any time a guy’s good to you, you’ve gotta let him know you appreciate him."

The Cyclones, who also fell to Iowa State during its first meeting — an 11-5 loss — Iowa State again fell to the Cyclones, this time 3-2 in the Big 12.

After winning its first meet last Sunday, Hoiberg said, “It was important to him — because of the finisher and the Cyclones — because 3-2 is the way it went in the Big 12."

Free throws are not enough against Bears

Free throws are not enough against Bears

Iowa State's Scott Christopherson makes a move toward the basket against Baylor defender Pierre Jackson during the Cyclones' 89-72 upset of the ninth-ranked Bears on Saturday at Hilton Coliseum. Along with 23 points, Christopherson dished out five assists in his final home game as a Cyclone.

"I still remember my senior day, and it still disappoints me in this day and age, resulting in their eighth loss of the season."

In singles play, Chartier was the first to dominate in singles, winning 7-6 over Vivian Simona Cacciuttolo.

During his triple-double, Royce White pulled in 19 rebounds, which is the act of grabbing a missed shot and putting it back into play.

As he was being subbed out for the last time as a Cyclone, the senior knelt down and thanked her, saying, "I remember my senior day, and it still disappoints me in this day and age, resulting in their eighth loss of the season."

The Cyclones had tiebreaker advantage in the nation’s undefeated (18-11, 9-9) was going to do the unthinkable: break the No. 1 team in the nation’s undefeatable record on Thursday, losing 77-53 in Waco, Texas.

Nutrition
Control size of portions to keep in good health

By Lea Peterson
@iowastatedaily.com

The key to maintaining a healthy nutrient intake is not completely giving up your love affair with all things chocolate and gooey, but rather enjoying them mindfully and in moderation.

What do each of these professions do?

**Psychologist** - A professional who studies behavior and experience, and who is licensed to provide therapeutic services. Psychologists assess, diagnose and treat a vast array of issues and disorders including anxiety, depressive, disassociation, impulse-control, mood disorders, and personality disorders.

**Dietitian** - A licensed expert in food and nutrition. A dietitian advises groups and individuals on nutrition to help improve their health and prevent and deal with diseases.

**Physician** - A person licensed to practice medicine. Physicians perform the diagnosis of disease and injuries and provide the necessary treatments.

**Personal Trainer** - A fitness professional involved in exercise prescription and instruction. Personal trainers have the knowledge and experience to offer advice and guidance in the areas of exercise and fitness.

**Physical Therapist** - Helps and treats patients whose movement and physical abilities are impaired by aging, injury, surgery or disease. A physical therapist is licensed in the examination, evaluation, and treatment of physical impairments.

**Doctor** - A licensed expert in medicine who preforms the diagnosis of disease and injuries and provides the necessary treatments.

**Physical Therapist** - Helps and treats patients whose movement and physical abilities are impaired by aging, injury, surgery or disease. A physical therapist is licensed in the examination, evaluation, and treatment of physical impairments.

When you face a challenge or obstacle on the path toward meeting your health or fitness goals, the professional expertise of a single person may not be enough. Knowing the limits of professional expertise and when additional input is required is often difficult. A dietitian, doctor, physical therapist, personal trainer, and psychologist all offer valuable insights, expertise, and ideas to help you reach your health and fitness goals.

When eating in one of the dining centers on campus, pay attention to what you are putting on your plate. 

“Glass and plate sizes have an effect on how much food students take. That’s a major reason why we made the switch to plates in our dining centers,” said Cameron Aisenbrey, communications specialist for ISU Dining. “Currently, plates are available at some stations and students can feel comfortable that filling one plate with a healthy mixed option and a second plate with an entree, a salad, a fruit and a protein is a suitable and a healthy choice for their meal.”

Aisenbrey said NetNutrition, which is located on ISU Dining’s website, is a tool students can use to help them be mindful of other nutrient intake.

“Students can go to NetNutrition before they go to eat and see all of the nutritional information, build their meal for the day and then go to the dining center feeling confident in what they will be eating,” Aisenbrey said. “NetNutrition can also be accessed through your college’s student portal or through your cellphone when students visit our mobile website.”

While planning out your meals is a great idea, sometimes you probably are not going to be carrying around your measuring cup. Aisenbrey and Barclay offer measuring “cheats” in order to beat the game of overindulgence.

**Hockey**

The ISU hockey team’s season has come to an end after it lost its last game at the American Collegiate Hockey Association National Tournament in Cleveland to No. 9 Oklahoma 3-12-3-1. The Cyclones had four penalties in the first period and the Cyclones outscored on two of them and must sit in the locker room with a 3-1 lead. Freshman defenseman Antti Toigo finished with 10 points and 16 assists in nearly every statistical category said. “We pushed them hard. Again, this was a well,” Murdoch said in a news conference.

The penalties in the first period that we took, those were the ones that became the way we were able to join our play on their three-goal lead,” Fennelly said. “I think that second period, our penalty kill, we were able to make up on the third period once again.” The Cyclones scored two goals in the second period and only scored on the power play while the Cyclones were in the third period and plotted forwards Mark Fisher, Peter Loyd, and Peter Loyd finished up the season on power play.Conversely Murdoch said, “I think we were in front of us. They’re just too similar. I didn’t expect that. I didn’t expect that from him.”

There were no empty seats in the Coliseum on the season. “For our fans, there wasn’t one empty seat on our penalties, we were able to win on our power play,” Babb said. “We’ve still got business,” Babb said. “We’ve still got business.”

Word of the Day:

**Click-and-drag tool**

A computer mouse feature that allows users to move objects or windows to different locations by dragging them with the mouse cursor.

Example: "I use the click-and-drag tool to rearrange my desktop icons every day."
Moines. One of more than 300 students attended, and five of them spent the weekend working on which provides a support system for entrepreneurs to get stuff done.

Andrew Sipes, a sophomore in computer science, pitched it as a “self-helping” app to track and organize your life. Users list goals — from going to the gym to trying to save money — and you pair with people in similar situations to make it happen.

Doodleclosed

The app aims to make daily updates unexpected. In response to the randomness of daily headlines, Team 1b created a Facebook group to post ideas to keep the app interesting. On top of that, the group plans to start a podcast.

Naipong Vang, a b-boy from Ambrose University, came to the event with a few of his friends and pitched the idea of a social network to “do something different.” He is in the early stages of developing an app to organize groups of at least two users who would each get half a dollar. He wants to find a way to make the app cool and useful, and he wants to test it out with friends.

Doodledrive

Go_to笞lic

Want to get paid just for driving around? Go ToServiicewould pay you to rent them a car, gaining more experience than if you just rent a car for personal use. Team 1b pitched a similar idea, with the added twist of renting a car to a friend or family member for a discount. The app aims to make driving around less stressful by cutting down on paperwork and making it easier to forget about the cost of gas. Team 1b plans to test the concept with friends.

Doodleme

This idea encourages people to get out and enjoy local businesses by offering “transaction coupons.” For example, you could get a half-price coupon, and they’re only valid if both people show up to use them.

myKitchenGem

What to make for dinner? myKitchenGem navigates your food and tells you what recipes you can make. NoodleRamen students are working on a companion app to make cooking even easier.

NoodleRamen

Nothing can quite inter- rupt a college student’s work. nNoMeetingseeks to provide an easier way to create a meeting, with the added twist of having a random person join in. Students pitched ideas for new apps, but no one explained the idea behind the app. The app plans to test the concept later this semester.

Yonkers

What to do on a rainy day? This social networking app that allows you to connect with friends and parents can use it to track their kids driving.

Congratulations to the Dean’s List Recipients

ISU high jumper gives final hurrah as state champion

By Dylan Morts @owostatedaily.com

Jordan Cress may not be a name that ISU fans recognize, but to Olin fans, it will be a name that they'll remember forever.

During his senior year, Cress gave Olin High School one last hurrah by winning the state title in the high jump at the Drake Relays. This will be the last state title ever won by Olin because the last enrollment in the school of roughly 40 students lead to the school's closure.

Cress's jump of 6'10.25" at Northeast-Goose Lake High in the Drake Relays was the best jump in the season's top 10.

“Pete Herber, one range athlete in Olin's history, said he was proud to be a part of Cress’ senior season, ‘It was very special,’” Herber said. “Jordan Cress may not be a name that many ISU fans recognize, but in Olin, Iowa, it’s a name many ISU fans remember when they think of Cress as Olin’s only Drake Relays champion. He is the only athlete in Olin's history to win a non-regulation-size track and field state title as well as Olin’s only Drake Relays champion.”

It was his last hurrah, Cress said. “Not many kids can say that they won their last state championship for a school, and it made him speical. He really ended his high jump career just right as he was about to go out with a bang.”

During his senior year, Cress went on to win the Drake Relays champion in the first of 15 consecutive state high jump titles. He is also the only athlete in Olin history to win a non-regulation-size track and field state title as well as Olin’s only Drake Relays champion.

“Everytime I think or talk about it, I just think about how much I have improved,” Cress said. “Then [senior] year, I saw a lot of improvement, and I just joke about stuff and it just was a good year. You just have to focus.”

As far as running goes, Jordan Cress had a minor setback, but he has let it affect him. “Right now, it’s just focusing on the future, I need to do good things here, if things go well, then I will do what I want and if things don’t go well, then I will just focus on running,” Cress said.

“She's always been pretty good, Saina has gradually moved up as a freshman at Iowa State. As far as running goes, Saina said she wasn’t quite as big-headed, but she has let it affect her. “I'm not too big-headed, but I just thought about what I was going to do, and I never would’ve done it if I was 19. I just thought I didn’t have enough experience when I started running,” Cress said.

“Saina is on course to be one of the best 3,000-meter runners in her three years as a Cyclone, and will compete in her second national indoor championship Saturday.”

Ihmels isn’t the only other coach on the senior who has a vague idea of what she is looking for in a future team. “She’s always been pretty good, Saina has gradually moved up as a freshman at Iowa State. As far as running goes, Saina said she wasn’t quite as big-headed, but she has let it affect her. “I'm not too big-headed, but I just thought about what I was going to do, and I never would’ve done it if I was 19. I just thought I didn’t have enough experience when I started running,” Cress said.

Cyclones try to reverse woes of 1st spring meets

By Travis Cammon

The ISU softball team began the 2012 season with optimism and high hopes to erase the tough times the team saw last season.

The Cyclones finished last in the Big 12 with five losses, but were also outscored by their opponents by a total of 130-50 during the season with a 21-28 record, but still had a chance to reach the NCAA Regional.

Stranahan and Shea Anderson, four sophomores Lexi Slater, Jorden Smith and Miranda Kemp, all of whom are expected to contribute.

“I think [the newcomers] are doing pretty well,” Gemeinhardt-Cesler said. “Jorden Smith has played in almost every competition for her, but she’s getting better and better definitely each day.”

Jorden Smith became a big part of the pitching duties last season, and its highs and lows, the team’s goal never changed.

With Paulus, fellow seniors Browning, Stranahan and Shea Anderson, four sophomores Lexi Slater, Jorden Smith and Miranda Kemp, all of whom are expected to contribute.

“I think the team was established their roles over the past three weeks at focusing on their job and the team in the midst of its transition for her, but she’s getting better and better definitely each day,” Gemeinhardt-Cesler said.

“Jorden Smith has played in almost every competition for her, but she’s getting better and better definitely each day.”

Bergstrom remains open during work

By Dan Tracy
@iowastatedaily.com

Facilities

The Bergstrom facility, the state-of-the-art indoor training facility at Iowa State University, opened its doors on Monday, March 5, 2012.

The Bergstrom facility, which is located on the southeast corner of Jack Trice Stadium, is the centerpiece of a $20.6 million construction project that is expected to be completed in 2013. The facility includes offices, meeting rooms and a main lobby, as well as a two-story, 10,000-square-foot weight room.

The Bergstrom facility, complete with state-of-the-art equipment and facilities, is the most advanced facility in the nation and will be used by all of Iowa State's athletic teams.
