AMES MUSIC TO THE MAX

By Dominio Spazinni

On Thursday, Ames will become home once again, at least for four days, to the Maximum Ames Music Festival. The music festival was started by local band Midnight members Nate Logsdon and Chris Long five years ago, and it’s run by the Maximum Ames Records company.

“This will be the second year of the festival, and it will be even more ambitious than the previous years,” Logsdon said.

“The year’s going to step up the game, especially in medical-related headline acts.” Logsdon said. “We have over 100 bands and that’s throughout 20 venues in Ames.”

With such ambitious acts, there is a beginning. The festival started in a small bar full, inspired from various music festivals in Iowa’s own Central City.

“We have a bunch of friends in other towns that did music festivals,” Logsdon said. “We thought we could do this too, so we decided we would. We had all been playing shows in Ames for five years, so we had contacts built up.”

The members of Maximum Ames connected to local sponsors and bands, as well as friends and found themselves with a lot of support. The members had compiled a wish list of bands they would love to headline and set up informative instances for these acts to play.

Maximum Ames Music Festival

• Where: Ames

• When: Sept. 20 to 23

• Cost: All festival pass $100, Saturday/Sunday $36 Advance, $38 DOS, Sunday $22 Advance, $20 DOS.

• Venue: All festival instances will be held at the Illinois Coliseum and the Main Street Courtyard.

The first year of Maximum Ames had 100 bands in multiple venues scattered across Ames and received major publicity.

“For us it was really ambitious and we learned as we were going along,” Logsdon said. “We pulled it off and didn’t lose any money. It was a huge process of doing it, we’re learning how to do it.”

The festival has a goal as well to show Ames the talent of the Midwestern music scene, as well as collaborating with multiple corporations of Ames.

“Our No. 1 takeaway is collaboration and working together, and it’s our goal and dream to work with…”

Government of the Student Body

Senators meet students

By Charlie Obrien

Connecting with their constituents is one of the biggest priorities for the Government of the Student Body throughout the year, and that annual Senator Day is proof.

GSB senators and cabinet members gathered outside of the Triple Tap, on Wednesday afternoon to talk to students about what they do.

The senators asked their fellow students what they are concerned about and what they would like to see changed.

GSB senators really do want to be involved in all constituents, and holding events like this is another way that GSB can be brought out to the student body,” said John Simonson, College of Agriculture senator and junior in global resource systems.

During the meet and greet event, members of GSB put up a poster board along with posted notes.

They encouraged students to write down what they liked about what GSB was doing, what they thought GSB should do better, or any concerns that the students had for the senators should look into.

Some comments students made pertained to the cost of tuition, the need for more emergency first-aid supplies, and the idea that professors are not concerned about students’ time.

“We hope that students will come up to us and be able to talk to us,” Simonson said. “We are willing to work with students about Government of the Student Body initiatives, and really are just here to listen.”

Iowa State Center

Courtyard renewal project revealed

By Rachel Sinn

The Iowa State Center courtyard project is meant to be a renewal as opposed to a new invention, said the University president and principal architect of Watertown, Mass., on Wednesday, Sept. 29.

The Iowa Board of Regents approved a $4.7 million dollar project budget at a June 1 meeting to renovate the Iowa State Center courtyard.

“The vision of that project is to complete that design project,” Mills said.

Designers are for the walkways and courtyard spaces near Hilton Coliseum, Stephens Auditorium and Coliseum, steps on the Coliseum, and outside the Coliseum. RENOVATION.p2

Biofeedback Program can boost productivity

The Biofeedback Program can help students in a variety of situations. Different areas students can apply what they have learned at the Biofeedback Program include, academic, life, social, physical, emotional, and mental well-being of 120 students.

Some students attribute their use of the Biofeedback Program to key to their academic success. A false bomb threat is a federal offense, and they should never be taken lightly. In the event of an emergency, students can use that connection to their instructor to help them study better.

Learn more about self-serve car washes.

The Biofeedback Program can help students understand the mind and body connection and how students can use their connection to help them study better. During the past year of operation, the program saw 1,026 appointments and provided service to a total of 489 students. This is an almost threefold (375 percent) increase in service utilization over the prior academic year. Tucker said, “We’ve seen tremendous growth over the past year. For one, students have been more comfortable with our staff and comfortable with one another.”

**FEMA’s safety advice in the event of a bomb threat:**

- Evacuate area as fast and safely as possible.
- Notify police and building authorities.
- Stay away from suspicious objects.
- Never block side walks or mainways; never open objects left on doors.

**Biofeedback Program’s safety advice in the event of an emergency:**

- Follow ISU Alert’s instructions and updates.
- Call 911 or your local emergency Management Agency and DPS, bomb threats are a serious matter and should not be taken lightly. If a bomb threat is issued, students should follow the instructions of authorities. They should leave the area as quickly and as calmly as possible.

According to FEMA’s website, the public should take action if they receive an armed or unattended suspicious package or object and from windows or other hazardous objects.

Please also follow the school’s and contact authorities if they are suspicious of a person or object on campus.

A false bomb threat is a federal offense, and with most technology being portable, it would only be a matter of time before the authorities catch the culprit.

The Biofeedback Program is available to all 120 students.

The first time I saw Nate perform... I was_four lights on stage, Daller said. "It's about creating music that makes people want to dance and otherwise maybe wouldn't.

Trouble Lights is made up of vocalist and guitarist Philip Nolan, lead guitarist and vocalist Elliot Dodge, drummer Nick Steinick, and bassist Adam Callahan. "We spent the first few weeks of collaboration finding our sound and refining it," Dodge said.

"That's part of the fun of Maximum Ames," Watson said. "Even if you've never been there before, you could walk in and go home with the experience of Maximum Ames. You could be like, 'Wow, that's a great show.'"

"It's an atmosphere that you want to be a part of," Dodge said. "Maximum Ames is made up of a group of kids that are passionate about the music scene in Ames and they want to see Ames become a great music scene."
Caleb Swank

Where do all the profits from the website go?

"We take a percentage. That's just got most of the profits for us. We also have services like we deliver, like where you can get your stuff. We take a percentage of that also."

How did you start the website to promote these bands?

"I guess the thing that I would want to see come is just covering Iowa. We're selling records that aren't really getting sold around here. We're selling records that are in the scene, or that are really small and don't get that much attention."

Do you think the idea came about because the Iowa music scene is really close-knit and really booming?

"Yeah. We're basically just trying to promote these bands. They're all in the same place, a lot of great bands, and there are bands I've been finding from outside the scene."

If we were to expand our office it would be great to have a bike."

Where do you hope to see this website go?

"We'd like to be able to offer more than just records, so the first 50 orders get a special cover-filled project. The album review for Neutral Milk Hotel, Mount Eerie, and Wanda Jackson's "The Party Ain't Over" is part rock'n'roll hall-of-famer queen of rockabilly Wanda Jackson."

What role do states have in education?

We don't always write several days' worth of editorials during the summer, but when we do, it's because we think the event was important. It may seem that we've wasted this space, because you're not aware that the installation speech of Iowa State's new president, Steven Leath, took place earlier this week. But there is more to discuss.

We were right to choose this topic for a few moments, not unlike the stacking of the whole 27-page opinion section.

Our goal is to consider new means of local, state and national governance, in service to our own understanding just as much as yours. The installation of a new administration is an inherently important event. Given the magnitudes of what just happened, we allow an obligation to make as much sense of it as we can, even if that requires commentary and analysis.

One of the things he said in his speech Friday was that government support of Iowa State is critical to its mission of this great university. It is a public utility, a great deal of which comes from actual appropriations of the state from the state Legislature. Support of Iowa State is key to our ability to fulfill the mission of this great university.

Leath, but there is more to discuss. We would be remiss if we chose to overlook the larger picture, to merely focus on the campaign.

The Art of Balancing leads to success

Sanity

By Scott Watson

Watson is a junior in computer science from Moline, Illinois.

Becoming organized begins with getting — and using — a planner. Being organized actually picture yourself doing it. It is a useful skill to have. Forget to do a homework assignment or a test? Don't waste time trying to catch up. Laziness claims countless victims everyday. If you can learn, you will be surprised what you can learn.

But being organized doesn't just mean getting your work done on time. You will learn skills without having to allow yourself to develop the highest level of satisfaction that you can.

Everyone has a natural gift that is readily obvious and potentially profitable. And everyone knows the bottom line that tells exactly good grades but also an array of social skills. To many employees, more important not much to one is better than the other. The simpler, the less complicated.

People can't judge too many obligations to some career or as a statistic or a credible indicator of an opponent's weakness. The profits of the campaign business are not the result of an influence and are not the result of an influence and can be made as much sense of it as we can, even if that requires commentary and analysis.

Empty personal billboards

**Commentary**

**Left-handed play leads Bigbee on path to take record for most freshman kills**

H e ISU volleyball fans who have caught a match or two this season, they probably have heard the name “Mackenzie Bigbee.” On the starting lineup of the Cyclones, the freshman leads the Cyclone attack as a right side for the Cyclones. She is a senior in high school and headed to the University of Illinois at Urbana-Champaign to play volleyball. She is one of the team’s top scorers with 127 kills this season. She also leads the team in kills per set with 4.63.

Bigbee is a senior at the University of Illinois at Urbana-Champaign. She is a member of the Illinois women’s volleyball team. She is a middle blocker and one of the top blockers in the country. She has been named to the All-Big 12 team and is currently averaging 4.63 kills per set. She is also one of the top blockers in the country with 0.70 blocks per set. She is currently ranked 12th in the Big 12 in kills per set.

Bigbee was named to the All-Big 12 team this season. She is currently averaging 4.63 kills per set. She is also one of the top blockers in the country with 0.70 blocks per set. She is currently ranked 12th in the Big 12 in kills per set. She is currently ranked 12th in the Big 12 in kills per set.

She is currently ranked 12th in the Big 12 in kills per set.
“The structure for athletics in America is unbelievably, the opportunities are endless.”

Ejiro Okoro

She also elaborates on the situation that she faced.

“I couldn’t understand how people enjoyed the fasting in England is much better than it is here; to get used to here,” Ejiro said. “The break-down days. These weren’t the only obstacles though. Although Cheerios and Fruity Pebbles inspired me.”

“My sister coming here was definitely inspiring.”

Ejiro doesn’t regret the college level—she has high aspirations.

“I want to be a professional athlete and compete at the Olympic level,” Ejiro said.

Daily correspondent

Despite that Alanta Iowa is in the home-open or in the Iowa Corn Eyblank forms, the 135 tone team has found one bright spot the fans.

Iowa State will set the home attendance record for a single game in the match against Iowa with 1,453 fans. With this match, the Cyclones shattered the old record of 1,397 fans for the 2010 Iowa matchup.

In order to secure a win—something people support said—said defender Megan Longobardi. I looked over, and it was just people all along the fence. That was absolutely, it is of you guys to play to, “Defenders have been awesome,” said coach Wendy Biddinger. “The players really responded in the second half.”

After the Cyclones’ second home goal against UW-Milwaukee, which was brought on by Junior Audrey Gordon, the Cyclones move to an all-time attendance of 1,455 fans. Iowa State’s incoming attendance was 1,451 fans.

After Iowa State’s third home game against UW-Milwaukee, which was brought on by Freshman Mackenzie Carter, the Cyclones moved to an average of 1,455 fans for this season. The Cyclones hosted over 1,400 fans in their last 11 home attendance.

“Despite the decline in attendance of the last home game, this season has still seen an improvement from recent years. In the 2011 season, Iowa State’s total home attendance was 1,412 fans.”

The Cyclones are on pace to surpass last year’s total. Total home attendance so far this year is 2,316 fans with home games left to play.

“Everything has to just get some fans,” what it was not an easy,” Longobardi said. “I can’t see them ever coming from fans.”

With the improving numbers, Iowa State still falls short to compare to other schools. This AdT last year saw Big 12 home attendance record with 3,112 fans in 32 home games. Brigham Young took the 2011 NCAA attendance record with 3,112 fans in 11 home games with 21,000 fans.

“Going to other schools where they have higher attendence is not the same. Not felt like being there, did not feel like you were supporting you in a stadium,” Longobardi said.

Although Longobardi elaborated on the attendance of the most popular soccer program, it was not clear that the most recent home attendance is beneficial to the city. The Cyclones will have to work on benefiting the city, so that there are more people and people are cheering them on, and soon enough forTerreia Freud.

Games bring record attendance numbers

Iowa State Hawkeyes and the Iowa team have found one bright spot the fans.

With this match, the Cyclones shattered the old record of 1,397 fans for the 2010 Iowa matchup.
