Iowa State’s Lesbian, Gay, Bi- sexual and Transgender Student Services is trying to break down the idea of only two gender identities, something that’s becoming more prominent in the LGBTQ community.

"We celebrate Bi Sexual Awareness Day;" LGBTSS put its first "Out2Lunch" panel Friday. The panelists discussed the topic of sexual fluidity.

"Sexual fluidity is defined as "not just having homosexual and heterosexual identities but also having other identities in the middle like pansexuality, bisexuality, and queer," said the panelists.

One of the main topics discussed was the difference between the sexual identities. Brad Freihoefer, coordinator of LGBTSS, explained the concept.

"When we look at identity in this case, it’s about who we care about, who we want to build relationships with," Freihoefer said. "It’s about who we love. I mean something that’s really at the core what it’s about."

The ground rules of the discussion were laid, two sheets were passed out to the group. One contained the many models of sexual orientation and the other was the "genderbread person." It detailed four different parts of people that made up their identity: gender expression, biological sex categories included gender identity, sexual and Transgender Student Services.

"Out2Lunch" panel Tuesday. The LGBTSS put on its first event in honor of "Bi Sexual Awareness Day," said Elza McGaffin, LGBTSS intern and double major in child, adult and family education and gender studies.

Hatch campaigns in Ames, talks to supporters

Sen. Jack Hatch spoke to ISU students and Story County Democrats at the Ames Democratic field office, following a tradition to the Hatch family which launched the “50-state tour” of the Senate.

John Vandervent, junior in veterinary medical technology at the Factory Crossing in Ames, won Iowa’s largest CrossFit competition, the Mat Games competition in Des Moines, which qualified to the Hatch’s website to read Vandervent’s full story in the full section.

City Council denies Breckenridge

Amer resident Sarah Kotte said that the parking in the area is already over the maximum amount available with spaces on the street at full capacity during the work and illegal parking happening on the weekend. The city council was also told that the company is preparing the minimum amount of dwellings and the maximum amount of parking space.

Another Amer resident, Kevin Cordes, voiced concerns about the lack of awareness to all Amer residents on this month’s change and the difficulty caused by the company to be built on the street.

In April 2012, a group of graduate students began to develop prairies in order to create the perfect ecological environment. The land was originally the location for the Oakridge Feeding Supply. The graduate students discovered the land while looking at a map from the 19th century. They were interested in looking at a map from the time the land was discovered, and eventually decided to join forces to create the perfect ecological environment.

The land was cleared out and dead plant material will be burned. However, in order to maintain the prairie, a couple of changes need to be made. The prairie will be burned and dead plants will be cleared out of the space, killing the invasive species that affect it. To keep this going as long as we can, we want to be able to maintain the prairie. It’s important to continue to connect the pieces together in order to see a better interaction between the community and the environment.

The Oakridge Prairie has many different plant and animal species. Interaction between the community and the public gives the prairie a public and educational role. Bloomington and the environment.

The prairie gives students the opportunity to conduct research, gain education for classes and for a more in-depth understanding of the benefits of the prairie. “It’s a great source of the various ecosystems of Iowa.”

The prairie was the answer to his question. “Early on, we started with the English department undergraduate students. English professors would assign proposals on how to use the site,” Mortensen said. “We even have expanded to the College of Design and lab work have expanded to the College of Liberal Arts and Sciences.”

Mortensen and Sullivan said they will not always be in Iowa State and will be able to maintain the prairie. However, Sullivan also said that students wanted to join the team that takes care of the prairie.

The Oakridge Prairie has many different plant and animal species. Interaction between humans and the environment.

Dr. Lauren Sullivan, grad student in ecology and evolution and organizational biology, also played a part of the creation of the prairie. Her research focus is on plants—how plants migrate and what conditions are best for seed dispersal.

The prairie is located right behind Science I Hall and right next to the parking lot. Both students and residents of Ames assist in maintaining the prairie where Oakridge Feeding Supply used to be.

Franek Hasiuk is bringing new perspectives to geology with the use of 3-D printers to produce copies of fossils, rocks and organisms. That doesn’t mean he can’t have some fun with them.

Hasiuk, assistant pro-

fessor of geological and atmospheric sciences, has even printed a cardinal and gold T. rex skeleton.

“Soon we will be able to download and print a real, un-simplified T. rex organism,” Hasiuk said. “I’ve never seen one move ever. No human has. But now you can print it out. You can make it move ever. No human has, 250 million years,” Hasiuk said. His favorite model represents all the best aspects of a T rex.

The design data was edited and smoothed to create the ideal T. rex skull.

Hasiuk and Gray are using the CT scan technology at the center to figure out how oil flows through porous rock.

The technology in the lab is not only being used for educational purposes but also to re-search ways to extract oil from porous rocks.

"What I really love about this model is that trilobites have been dead for 250 million years,” Hasiuk said. “I've never seen one move ever. No human has. But that represents only about half of the oil that is in these rocks.”

“The problem is finding ways to get the rest of the oil from the smaller pores. Hasiuk has been collaborating with Joseph Gray at the Center for Non-destructive Evaluations in Ames to research ways to extract oil from porous rocks. "What he’s trying to do is understand what controls the rate of flow through the material,” Gray said.

Gray said the printer can control the size of the pores it prints. By choosing how oil flows through only the large pores and comparing it to how oil flows through the small pores, they can begin to better understand how to optimize extraction tech-niques.

The technology in the lab is not only being used for educational purposes but also to research ways to extract oil from porous rocks.

"So we will be able to download and print a real, un-simplified T. rex organism,” Hasiuk said. “I would be more complex and detailed than the one we have now.”

Hasiuk sees these models as extremely valu-able and innovative to teaching.

"It’s just intuitive,” Hasiuk said. "It's very easy to understand how things would have worked in the original organism, Hasiuk said. "But you can’t see how it moves, you can’t see how it moves.”

"That’s why we’re in the lab in the first place. If you want to exactly know how oil flows through porous rock, you may have heard that all of the 'easy oil' is gone,” Hasiuk said. "The oil is only in the really well-connected [is] easy to get out. But that represents only about half of the oil that is in these rocks.”

The problem is finding ways to get the rest of the oil from the smaller pores. But that represents only about half of the oil that is in these rocks.”

Support feminism: Women's rights are human rights

Emma Watson, most widely known as Hermione Granger in the Harry Potter movie franchises, has been working on something new for which she has won the admiration of many people. She has been working on many projects to promote women’s rights. Watson is known for her commitment to feminism, as she believes in the equality of women and men. Watson has been vocal about the need for action to support women’s rights and has used her platform to raise awareness about the issues affecting women.

Feminism is not a man’s issue

Feminism is not a man’s issue, but it is a human issue. It is important to understand that the fight for women’s rights is not limited to women. Men also have a role to play in this fight. Men can support feminist causes by speaking out, volunteering, and educating themselves about women’s issues. Men can also support feminist organizations and events, such as the Women’s Marches, and by attending events and meetings to learn more about the issues affecting women.

Feminism is not a derogatory term

Feminism is not a derogatory term. It does not mean that you hate men. Being a feminist means you believe in the equality of women and men. It means that you want to support women’s rights and that you want to speak out against the discrimination and violence that women face. Feminism is about empowering women and ensuring that they have the same opportunities as men.

Feminism is not something you grow out of

Feminism is not something you grow out of. Many women start as feminists, but they may not continue to support feminist causes throughout their lives. However, even if you drop out of the movement, you can still support feminism by being a good ally. You can support feminist organizations and events, and you can speak out against discrimination and violence.

Feminism is not a niche issue

Feminism is not a niche issue. It is a universal issue that affects people of all genders. It is important to remember that feminism is not just about women’s rights, but it is also about men’s rights. It is about creating a world where everyone is treated equally and with respect.

Feminism is not a political ideology

Feminism is not a political ideology. It is a universal human right that should be respected by all people. It is about empowering women and ensuring that they have the same opportunities as men. feminism is not a political ideology, but it is a human right.
If Iowa State continues to trouble opposing quarterbacks—including Baylor’s Bryce Petty—at its current rate, it will finish the season with the highest sack total since Paul Rhoads took over in 2009.

Mike Randleman
ISU men’s golfer wins first event since return from injury

The fortunate news for the Cyclones is that the depth has already been put into play. There may be a big match won or lost, but our lineups will remain the same. There will probably be six or seven starters, so anything I got to do to help the team win, I will do,” Johnson-Lynch said.

Voke’s second round of 68 left him six-under par and six shots off the lead. He began the 54-hole tournament with a 71 and was second out of 178 golfers at the start of the day.

Johnson-Lynch said that mental preparedness is a front, “You have to fight through the pain and continue to compete.”

\"Sometimes you just can’t get your head in the game,\" he said.

Ryan Biggins/ISU Daily

The fortunate news for ISU’s defense is that its season has already started, so they don’t have to wait until next year to start working on the future. They have already started working on the future, and they know that the future is now.

ISU men’s golfer wins first event since return from injury

By Beau Berkley
@iowastatedaily.com

Through its first nine matches the ISU volleyball team has dealt with nagging injuries but that has not meant its lineup has been exempt from some nagging bumps and bruises.

There are not many players in this world who can say they have brought someone in off the bench, but that is what Voke did.

Despite being hampered, Johnson-Lynch said that Voke and Hart should be able to play.

Voke did not disclose how much he was hurting on that par-5 but has been wearing a Facemask, which he said was not meant to prevent him from hitting any shots.

While those in the professional world may have their eyes on the national championship or the Masters, Voke, a freshman golfer, said that he is just happy to be able to play.

Johnson-Lynch said that mental preparedness is a front, “You have to fight through the pain and continue to compete.”

Introducing The Fighting Burrito’s 10th Anniversary Favorite Fighter Burrito

JACK TRICE

MY THOUGHTS JUST BEFORE THE FIRST REAL COLLEGE GAME OF MY LIFE: The honor of my race, family & self is at stake. Everyone is expecting me to do big things. I WILL.

-JACK TRICE, October 5th, 1923

THE FIGHTING BURRITO IS 10 YEARS OLD!

Use the #IWILL to share what you hope to do in your next 10 years. Our favorites will get a free limited edition Jack Trice poster, signed by the artists: Basemint.

SO...WHAT WILL YOU DO? #IWILL
**Manage stress of group project season**

By Jasmine Schillenger

Eight Wednesday, Sept. 24, 2014

Maddie Young, senior in elementary education, explained how she takes a similar approach to dealing with group projects as Zmolek said. “Usually take on the most important part, because this is my control of my own grade.”

Dealing with group project members can be frustrating, especially for students who take the lead role.

Chelsea Zmolek, senior in marketing, shared her advice to students who are having to deal with uncooperative group members. “To avoid confusion from the start and do everything according to what portion of the project each member is assigned to each member,” Zmolek said. “I usually start off by saying what chunk of the project I’ll be in charge of.” Young said, “This tends to create a domino effect and everyone else eventually speaks up, and says ‘what portion of the project you’re taking.’”

According to Wellman, it’s rare to center around a student who is doing nothing and those who are there, but do not actually contribute anything.

“I’m the member that always takes the lead,” Beatty said. “When this happens, he holds up his end of the project to receive a passing grade.”

“If you do get a student who never shows up to meetings or doesn’t contribute anything, I assign the professor will ultimately means less work and everyone else even-“Romano said. “In those cases, the professor will usually assign grades accordingly and your other group members sell back your work.”

Eat at local restaurants for fun, successful date night

By Emily Engh

The full semester has begun yet again, which means homework, exams and the always-dreaded group projects. According to Mariah Romano, senior in construction engineering, there are three types of group project members: those who take charge from the start and do not show up, and those who are there, but do not actually contribute anything.

“I’m the member that always takes the lead,” Beatty said. “When this happens, he holds up his end of the project to receive a passing grade.”

“If you do get a student who never shows up to meetings or doesn’t contribute anything, I assign the professor will ultimately means less work and everyone else even-“Romano said. “In those cases, the professor will usually assign grades accordingly and your other group members sell back your work.”

It’s the big day and the bride wants everyone to have a great time. But how much time and money is appropriate to spend on keeping guests entertained and engaged? It’s important to many couples to ensure that guests have fun. But ultimately, the day is about the bride and groom. Here are some ways to keep the guests and the wallet happy.

The average amount spent on weddings in Iowa County ranges from $16,000 to $27,000, according to Costofwedding.com.

When planning a wedding, keep the guests in mind, but don’t exceed the budget.

Test Their Knowledge

Crosswords, word scrambles and other search and recognize games are great ways to keep guests busy at a wedding. Keep them interacting and engaged throughout the day. The truth is, it’s easier than most people think.

Test Their Knowledge

Criss-cross word searches and other “brain games” are great ways to keep guests busy at a wedding. Keep them interacting with each other, including fun, quick questions that not just the kids should know.

1. 2. Clover? Nothing says fun at a wedding like spitting out a bouquet. No one is more often dressed up and acting with great form than your guests. Include the bridal party and those people that no one can refuse like mascots, clown noses, boom boxes and buns. You can also include items specific to the season. Are you haunted? There’s some cartoonish, and bland orange vests, may be even some dead-rolled-up bandages.

Keep the Rascals Busy

In a scenario, you can’t avoid having large numbers of kids at your wedding. You can’t avoid their crying, but you can get them to sit down and act with great form. But you can balance that out. Put together a KIT for the little rascals to grab right as they walk into the reception venue. Puts up a inkernet- streamer drawing tablets with characters, a couple of color- ing pages and a little tube of Playdough.

If you’re planning a full wedding, you can bet you’ll hear a complaint or two from the “old man” because your special day is interferred with that Sat- urday’s football game. To keep the kids entertained, you can set up some lawn games like canoodles, ladder ball, lawn bowling and frisbee to provide entertainment, a taste of the football season, and a way to pass the time while the wedding party takes pictures.

I Spy With My Little Eye

The best way to keep people entertained is to keep them busy. Have one or three disposable cam- eras to the center of each table, and at each table setting provide a checklist of fun facts they should be looking for throughout the night. Send your guests looking for anything and everything—a picture of the bride’s wedding ring, one of you holding the bouquet, or a photo of the many kisses after the glass is raised.

Horoscopes by Linda Black

Today’s Birthday

(9/24/14)

Get through the workday and get some unwell, after Saturn moves into Libra, your energy and communication connections can improve. Declare yourself as a person of importance in the partnership game and the Scorpio Moon’s edge (Oct. 4 and 5) help in focused flow.

Tuesday advantage, check the Friday rating. In the weekend, it is the most challenging.

Aries - 8

(9/22-10/21)

You feel know-it-all, put your foot down on Capricorn’s final and bolster the back of the plan. The Scorpio Moon is the best to start the bigger partnership and your high success.

Libra - 9

(9/23-10/22)

You have great confidence today and tomorrow. Libra brings the power Capitalist on the Roof of ideas. Make, and create the most useful.

Scorpio - 8

(10/23-11/21)

You have your own growth and development and can keep a focus on it. The Scorpio Moon will help you dig into the mud and many five deeply.

Sagittarius - 7

(11/22-12/21)

As you begin another chapter, you can’t lose the new, ever-evolving version of the plan. The skills in your heart must be rebuilt, and made.

Cancer - 7

(June 22-July 22)

You feel what Saturn changes and your new stage Capricorn will last not just until Monday, but until next week. Your presence is the key that allows you to open up the new.

Leo - 8

(July 23-Aug. 22)

The New Moon initiates a new adventure. Listen to your subconscious thoughts before writing off that plan. The New Moon will open up new opportunities.

Virgo - 9

(Aug. 23-Sept. 22)

You have what Pluto, Gemini, and Jupiter’s new Moon do to do. Make a new relationship, and support each other what you provide. You have a new, opinion-revealing excitement.

Libra - 9

(Sept. 23-Oct. 22)

You have great confidence today and tomorrow. Libra brings the power Capitalist on the Roof of ideas. Make, and create the most useful.

Scorpio - 8

(Oct. 23-Nov. 21)

You have your own growth and development and can keep a focus on it. The Scorpio Moon will help you dig into the mud and many five deeply.

Sagittarius - 7

(Nov. 22-Dec. 21)

As you begin another chapter, you can’t lose the new, ever-evolving version of the plan. The skills in your heart must be rebuilt, and made.

You feel what Saturn changes and your new stage Capricorn will last not just until Monday, but until next week. Your presence is the key that allows you to open up the new.

Leo - 8

(July 23-Aug. 22)

The New Moon initiates a new adventure. Listen to your subconscious thoughts before writing off that plan. The New Moon will open up new opportunities.

Virgo - 9

(Aug. 23-Sept. 22)

You have what Pluto, Gemini, and Jupiter’s new Moon do to do. Make a new relationship, and support each other what you provide. You have a new, opinion-revealing excitement.

Libra - 9

(Sept. 23-Oct. 22)

You have great confidence today and tomorrow. Libra brings the power Capitalist on the Roof of ideas. Make, and create the most useful.

Scorpio - 8

(Oct. 23-Nov. 21)

You have your own growth and development and can keep a focus on it. The Scorpio Moon will help you dig into the mud and many five deeply.

Sagittarius - 7

(Nov. 22-Dec. 21)

As you begin another chapter, you can’t lose the new, ever-evolving version of the plan. The skills in your heart must be rebuilt, and made.

Cancer - 7

(June 22-July 22)

You feel what Saturn changes and your new stage Capricorn will last not just until Monday, but until next week. Your presence is the key that allows you to open up the new.

Leo - 8

(July 23-Aug. 22)

The New Moon initiates a new adventure. Listen to your subconscious thoughts before writing off that plan. The New Moon will open up new opportunities.

Virgo - 9

(Aug. 23-Sept. 22)

You have what Pluto, Gemini, and Jupiter’s new Moon do to do. Make a new relationship, and support each other what you provide. You have a new, opinion-revealing excitement.

Libra - 9

(Sept. 23-Oct. 22)
