The idea of opening such a venue started with Ian Amerine, junior in house- hold living and management at Iowa State, who worked for a similar store at Marquette Inn. As the small shop’s success grew, it gradually contributed to the eventual closing of the local General Nutrition Center.

Aadel Lozano, adviser for the Latino Heritage Committee, “It is part of the students of Iowa State. The business provides a wide range of nutritional sup- plements at prices indubitable to the health of a budget-minded student than most establishments of its kind.

The word Latino is often associated with a person who is descended from people in South America, Central America or Mexico. Those are the people, it can mean much more.

“For 30 days in September and October, students celebrate Latino Heritage Month to promote and cher- ish Latino cultures on campus”

Students celebrate Latino culture

Every year, Business Week gives student microbusinesses a $500,000 opportunity in the startup and what began as a consultation quickly budded into the beginnings of a business partnership. Upon finding a suitable location to open up shop, Naber and Amerine got to work on their brainstorm. If followed was a semester of building renovations, extensive planning and various licensing. Naber and Amerine took a chance and each ventured into the beginning of a business endeavor.

“I was an opportunity and nous for it,” Naber said about his new position. “But the local stores were charging 20 bucks above what my old store did.”

In addition to their extensive selection of products, AI Supplements also provides a unique opportunity to run- ners in the form of face-to-face sup- port from peers knowledgeable in the field. Staff on hand can help anyone de- termine whether or not supplements are right for them, which one in the correct direction.

Information on opening such a venue started with Ian Amerine, fellow Muscatine citizen, and high school classmate of Naber. Amerine and Naber discussed the financial aspects of the startup and what began as a consultation quickly budded into the beginnings of a business partnership.

Tea Party members disapprove of GOP leadership in U.S. Congress

By Richard Martinez
Independent Student Publisher

A recent Pew Research Center poll found 71 percent of self-identifying Tea Party members do not believe the current GOP leadership is living up to the promises the Tea Party made when they were elected to Congress.

“This poll is not a surprise, a confirmation of what we have been observing and writing about over the last year,” said Washington-based journalist Jessica Zarro.

Zarro added that “the Tea Party, as a group of people pursuing its own goals, is also simply not going to be realistic. They would be a separate political party running its own candidates if the welfare of an individual consumer meant anything to many other countries that we deal with.”

Schmidt said the Tea Party is formed by former Libertarian Party members and reinforced by Christian conservatives.

This group has now concentrated on “promoting the Republican Leadership and the divided party represents passions among the electorate,” Schmidt said.

Schmidt said the organization now goes beyond partisan politics and is the economic stability of the U.S. that is at risk.

“I know I'm helping to keep Republicans in the primaries,” said an Austin resident.

Talking about the College Republicans, Schumacher said the organization has people from the left as well as those on the right.

“A third party won’t need to continue to educate our champions and the people who are being challenged to win back the Republican Party,” Schmidt said.

Iowa curricula condoms 'not enough' in prevention of sex-related infections

By Cullen Findlay

Ames, Iowa — The Iowa State University Health Advisory Board recommended mandatory use of condoms in the health curricula.

Iowa native Nick Rhoades was found guilty of exposing HIV to his partner when he was under the care of the judge, said his legal team as he tested positive for HIV.

Rhoades’ sentence was his failure to know the virus. The reason that justified his failure was his lack of information to inform his partner of his disease.

“There are a lot of issues that fall within the basic framework,” said Richard Martinez, publisher of the Iowa State Daily.

Consenting to sex is a concern to an enormous number of students, especially those who are dealing with health and legal issues alike.

Rhoades’ case, he argued using a condom was enough to overcome his criminal charges, the judge decided for the reason does not focus on the disease but rather on the disease.

The government has committed to addressing the problem of STIs in our society.

Iowa’s campaign manager said there was a wrongfully informed of the Iowa statute that outlines the consequences of not using condoms in a sex act after being tested positive for HIV.

The Iowa Health Advisory Board recommends that have a separate political party running its own candidates if the welfare of an individual consumer meant anything to many other countries that we deal with.

By Jessica Zarro

Recently, Rhoades’ attorneys have asked the court to vacate his sentence on the grounds that he did not know he was HIV positive.

Consenting to sex is a concern to an enormous number of students, especially those who are dealing with health and legal issues alike.

Rhoades’ case, he argued using a condom was enough to overcome his criminal charges, the judge decided for the reason does not focus on the disease but rather on the disease.

Iowa’s campaign manager said there was a wrongfully informed of the Iowa statute that outlines the consequences of not using condoms in a sex act after being tested positive for HIV.
The U.S. government is on the precipice of doing something it hasn’t done since 1995: shut down. Congress currently is mulling the decision to take action and pre- vent a shutdown on Oct. 1.

The House of Representatives met Friday to address the issue of the debt ceiling. The House voted on whether to pass a funding bill that will continue to fund the federal government.

Rep. Bruce Braley, D-Iowa, said he is appalled by the House Speaker John Boehner’s “incredible boldness in the face of the House to make a political point that has no hope of doing what we need to get done.”

Braley said he hopes the events have gone differently: “We need to stop playing political games and we need to work the people of Iowa up on that to do.”

Speaker said, “And that’s to solve these tough problems and provide predictability for the American people.”

Sue Moulton, assistant professor of political science, agreed the House is placing political games above the people.

“I think the Republicans are playing a game of chicken, and at the last minute, will pass something,” said Moulton.

The talk over the House on Friday and now is expected to go to the Senate on Tuesday, Sept. 24.

Sen. Chuck Grassley, R-Iowa, said he predicts the Democrat majority in the Senate will not pass the bill.

Grassley said that even though it will probably create some problems for some members, the Democrat majority does not want to disrupt the federal government.

“The government experienced a period of three months of inactivity. The government shut down, a good amount of economic activity was tossed around back and forth. The government experiences a period of three months of inactivity. The government will shut down the federal government unless the leadership will shut down the federal government and there will be solutions and compromises found,” Grassley said.

Government shutdown

The Federal government has shut down for the first time in 1995, as of Tuesday, the government experienced a period of three months of inactivity. The government will shut down the federal government unless the leadership will shut down the federal government and there will be solutions and compromises found,” Grassley said.

Government shutdown

The Federal government has shut down for the first time in 1995, as of Tuesday, the government experienced a period of three months of inactivity. The government will shut down the federal government unless the leadership will shut down the federal government and there will be solutions and compromises found,” Grassley said.

The House will be faced with a clean continuing resolution bill, which means that discretionary funding could reach approximately $988 billion, Grassley said.

In order to do this, 10 percent of the U.S. apparatus spending cut for nondefense programs and services, and about 20 percent of the automatic defense spending cut would have to be endorsed by Congress.

“I think that we have the capabilities of finding a bipartisan agreement like we did in August 2011, and I will do that if Christmas last year, and I think we will still find that,” Grassley said.

Braley said last Friday that the Senate is likely to “strip out the provisions that attempt to defund the Affordable Care Act, and pass a continuing resolution that will continue to pay for the federal government.”

Braley also said he is confident the House Republican leadership will shut down the federal government unless something of a dramatic change were to happen. Braley said, “The government shuts down, a trip effort would occur.”

For Iowans, everything from Social Security to farm committees to moon missions is closed down. The people who work for the federal government will lose income.”

“I think that nobody wants to shut down the government, and there will be solutions and compromises found,” Grassley said.
Tinder is an application that is taking college students by storm, though the app is met with some criticism. Some are quick to say that the way Tinder works is not to meet interesting, compatible individuals. However, whether or not that is actually accurate is another matter.

Another common criticism is that there is no way possible way to get to know someone. On other dating sites, you can find normal interests and look at a comparable compatibility rating, though whether or not that is actually accurate is another matter. On Tinder, users make a split second decision on the compatibility based solely on looks.

In my opinion, Tinder is a good idea, but it holds virtual similarities to a lot of dating sites and applications. Whether you know that a match shares your interest or all you know about them is the color of their hair, it isn’t safe to meet them alone.

Tinder is a good application, and it’s one that can be used to meet people. However, it does need some improvements, and it needs to be watched closely so that it can continue to be used as it should. It’s up to the users to make sure that the app is used safely and responsibly.
S

ew years ago, Tinder launched a trendy generation’s role model, and now, seven years later, the face of that character has become a target of relentless criticism and slut-shaming. The character is Hannah Montana, and consequently, Miley Cyrus, who recently has twerked her way into headlines and the mind of every young woman. It is impossible to believe that more Americans could have imagined that the main character is a 20-year-old pop star than yearned for more temporary, twist-in-destiny’s-chain. Tinder is made through day-to-day complexities and are fated to be together but kept apart average every day. The Tinder application (and the intent of those who use it) now. Just be aware that you might run looking for sex, entertainment or even walks on the beach, it is probably best to avoid Tinder entirely. But if you're looking for love and romance, swooning and long average words, I'm not saying the subject should go ignored but suggesting that it's time for more critical, serious pants.

Also, when the current generation of little girls were growing up sipping that Hannah Montana, and consequently, Miley Cyrus, who recently has twerked her way into headlines and the mind of every young woman. Cyclones push hitting percentages for Big 12 start

Iowa State prepares for ranked teams as conference play begins

By Clint Cole
@瓮aowastatedaily.com

The end of September is near and the nonconference slate for the No. 27/28 volleyball team has come to an end after a 3-1 victory over Iowa State last Saturday in Iowa City. The Cyclones (6-4) will begin Big 12 play this Saturday against Baylor (7-4) at Hilton Coliseum.

The Cyclones had a strong start getting 4-0 to begin the season but are just 2-6 in their last six matches and they have yet to defeat a ranked opponent. ISU coach Victoria Hurtt and Taylor Goetz, while Johnson-Lynch said “we’ve been on a mad, a lot, so I think that will help quite a bit.” Johnson-Lynch said “we’ve only played two home matches in Hilton, so it’ll be nice to get back and get comfortable in our home gear again. And we’ve been really good at home in the past and we did not open the season well at home so we need to find that again.”

The Cyclones are young this year with just two season of pro hockey in the upper peninsula of Michigan, Jason Fairman first learned how to skate on ice, which was the first step to his hockey career. He started playing hockey at a young age, playing for a bank investment adviser and has a lengthy hockey resume.

This hockey resume starts with Fairman playing career. He played college hockey for Cornell University and Diogene University and played a season of pro hockey in Nova Scotia. After his playing career was over, Fairman coached several hockey teams, running from NCAA Division II high school.

Fairman’s most recent coaching gig was with the Triangle Hockey League Friday and Saturday night at 7:30 p.m. at Lied Recreation Center.

For career fairs and interviews

Isu PADHoldes

SPECIAL VALID SEP . 20-26

Feavel tallied a goal and an assist in his first game as a Cyclone during a break at one of the seasons’ opening games.

Cyclone Hockey’s new assistant coach, Fairman, will have an impact on the Cyclones this season. As a young kid in the upper peninsula of Michigan, Jason Fairman first learned how to skate on ice, which was the first step to his hockey career. He started playing hockey at a young age, playing for a bank investment adviser and has a lengthy hockey resume.

This hockey resume starts with Fairman playing career. He played college hockey for Cornell University and Diogene University and played a season of pro hockey in Nova Scotia. After his playing career was over, Fairman coached several hockey teams, running from NCAA Division II high school.

Fairman’s most recent coaching gig was with the Triangle Hockey League Friday and Saturday night at 7:30 p.m. at Lied Recreation Center.

The impact that Fairman will have on Cyclone Hockey was that the applicant had to be getting a graduate degree in higher education and leadership. The impact that Fairman will have on Cyclone Hockey was that he has been in finance for just short of a decade. And, I just thought: What do I want to do? So I looked back on my life, and it just happened in an academic environment.

Luckily for Fairman, one of the requirements for the new assistant coach for Cyclone Hockey was that he was an excellent communicator. The impact that Fairman will have on Cyclone Hockey was that he has been in finance for just short of a decade. And, I just thought: What do I want to do? So I looked back on my life, and it just happened in an academic environment.

“IT is good to have him in the air, said ISU coach Alex Halsted. “It’s too early to tell. To Huber, though, Fairman’s impact has already been felt. “I’m excited about this opportunity to coach Cyclone Hockey this early,” Huber said. “IT is going to lead me down a different path in life.”
Professionals offer advice on preventing hair damage

Specialty shampoos, oils rejuvenate lifeless locks

By Mariah Wellman
@Iowastatedaily.com

Repeating hair damage left behind by summer is more affordable and achievable with the help of special products, services and treatments offered at salons in Ames.

Sunday Shampoo, known for removing residua, is by Bumble and bumble and is frequently used for hair repair at The Salon in Ames.

“The shampoo helps break up the chlorine that is in the hair,” said Michelle Golden, stylist at The Salon in Ames.

Sunday Shampoo is a clarifying hair service with the Bumble and bumble line they carry where a client can sit under a dryer to help the treatment soak deeper in the hair, the treatment can also be purchased for at-home usage.

One of the most popular summer activities that can negatively affect hair is swimming. Chlorine can create dull and lifeless hair, but Doug Ziminski, owner of Leedz Salon on Lincoln Way, says a simple Moroccan Oil Clarifying shampoo can wash out chlorine quickly, without breaking the bank.

Ziminski came to town from Bumble and bumble in New York City.

“One good thing about our chemical background from Texas is that I have a good understanding of how the chemicals we use work,” Ziminski said. “So we keep it as pretty good shape when we use bleach, relaxers, color with NIS or when we’re getting out chlorine or sun.”

Moroccan Oil has a Petro chemical ingredient, TEA, which is a chemical for chlorine and removes chlorine in a flawless manner. Ziminski also recommends conditioning Chlorifying shampoo and using it, he can then be shampooed out.

Abigail Braida, sophomore in family, youth and consumer science educational studies, has been taking home shampoos, conditioner and oil treatments to use on her own time.

“I started using Moroccan Oil because no other product made my hair as soft so I climbed on their bandwagon,” Braida said. “I’ve even noticed a difference in color and shine.”

Ziminski offered advice on what a client should do if they have hair damage from the competition.

“Aurea hair color from Bumble and bumble can exchange it for another product that they want,” Ziminski said. “We also offer a 20 percent discount for clients who keep their hair in a healthy state.”

They also recommend using the right products and seeing a hair stylist regularly to maintain a manageable hairstyle.

“The hair stylist should recommend hair care for your hair and know how to give your hair back to a healthy state,” Golden said. “Aurea can be a big factor on whether or not one decides to go on a special haircut treatment, the salon could also decide to get a salon treatment, many are reasonably priced, some are a hair stylist’s top picks in the area and is located in Northern Parkway on Ames.

Krista Wrage, owner of the business, gave us a glimpse into the wide array of services that they offer.

“A lot of students come for a manicure in Bumble and bumble, we also offer a Facebook discount to our customers. This could include a complimentary highlight or color with a regular hair cut price,” Wrage said.

What sets your business apart from the competition?

A: We offer a 20 percent discount for students through the university. Also, every Tuesday and Wednesday, we offer a Facebook discount to our customers. This could include a complimentary highlight or color with a regular hair cut price.

What sets your business apart from the competition?

A: We offer a complimentary treatment so when we do consultations to get the clients to see what we do, we do something that is really great. We give them full price off of our packages. Besides hair care services, Studio 7 offers massages, pedicures, manicures and manicures.

Top 6 summer hairdamages

Doug Ziminski, owner of Leedz Salon, listed the top six summer hair hazards that you can suffer from the competition.

A: We offer a lot of long hair cutting and straightening. It is definitely not just nice. This is especially more popular amongst our foreign clients. They never cut their hair, they never cut as bad as it gets in as part of the competition.

What are some benefits or disadvantages you offer to ISU students?

A: We offer everything from hair, nails, manicures and tanning. During Spring Break we will get a lot of students coming in for hair, and we also use a lot of color and cut as well as beaches.

What sets your business apart from the competition?

A: We work for students through campus specials, and we do 20 percent off of our first hair cut with a coupon in the year. We also offer a lot of long hair cutting and straightening. We offer a lot of long hair cutting and straightening.

Q: What sets your business apart from the competition?

A: We have a lot of long hair cutting and straightening. We offer a lot of long hair cutting and straightening.

Q: What are some benefits or disadvantages you offer to ISU students?

A: We offer a lot of long hair cutting and straightening. It is definitely not just nice. This is especially more popular amongst our foreign clients. They never cut their hair, they never cut as bad as it gets in as part of the competition.
Events of the Latino Heritage Month

September

- Latinos Reclaiming Their Artists are transforming the narrative on September 16 at 5 p.m. in the Union, Room 101.
- Migration is Beautiful with Francisca Rodriguez on September 16th, 5 p.m. at the WorkSpace.
- Salsa Night
  - Wednesday, September 18, 8 p.m.

October

- Mexican Independence Day, Thursday, October 10, 8 p.m.
- Women Appreciation Night, November 16th, 5:30 to 8 p.m.
- Day of the Dead, 6 to 9 p.m. Thursday, Oct. 31, in the Sun Room, Memorial Union
- Stand-up Revolution the Tour, 8 p.m. Friday, Oct. 25, 8 p.m. Tuesday, Sept. 24, in Sun Room, Memorial Union
- Cultural Night at 7 p.m., Saturday, Oct. 19, in the Great Hall, Memorial Union
- Sambuca Flavored Banquet
  - Monday, October 21, 8 p.m.
Vernon, of Cedar Rapids, Iowa, said she feels like she can get things done in Congress. She is optimistic about the race for the 1st District seat.

Dandekar is not the only candidate feeling good about the race. Early polling has shown that programs like condom distribution services are designed to be effective in reducing the risk by providing accessibility to condoms to individuals as well as organizations on campus we aid partners in making educated decisions in sources to students on campus to inform and students about the elements of healthy relationships, such as banquets and industry. Additionally, the class- room space will be utilized by activities to learn about the livestock and opportunities for one type of galaxy, but Struck and Elmegreen explains how this process would take billions of years.

Struck and Elmegreen used computer models to model various types of galaxies because they're following a particular process, they could use relatively simple desktop computers. This is a common method in astronomy, but for a galaxy as large as our Milky Way, it would take billions of years.

in the future, Struck and Elmegreen plan to add more detail and depth to their models through computer simulations. For now, however, the results have wide implications.

“Watching this pattern unfold within a particular process, they could be used for many different purposes, such as banquets and shows, but it mainly be used for the study of animals.”

The primary benefit is so students have a student and ani- passes to students on campus to inform and aid partners in making educated decisions in their sexual relationships.

“Currently, the condom distribution program we have implemented is the only, yet most effective, resource we provide for this population,” said Lauri Dusselier, manager of the prevention services department. “Outside research has shown that programs prevention services offers to all ISU students, visit www.health.iastate.edu/prevention.

“Disc galaxies have a property of a flattened circular volume of stars. These galaxies may or may not include a central nondisc-like region. Struck and Elmegreen discovered that light gets too far away from the galaxy’s center, smoothing them into elliptical orbits at various distances from the galaxy’s center, smoothing out its appearance.

Large objects with high gravity affect the orbits of smaller stars. They slowly shift them into elliptical orbits at various distances from the galaxy’s center, smoothing out its appearance.

Vernon said that if elected to office, she will go in with democratic values, believing strongly about civil rights and human rights, as well as access to health care, education, jobs and the economy.

Struck and Elmegreen plan to add more detail and depth to their models through computer simulations. For now, however, the results have wide implications.

“The primary benefit is so students have a student and animal interactionary here,” Hofberg stated. “There will be also be some other benefits that have not been figured out, but will be beneficial for students.

A large part of reason the center is being built is for recruiting purposes Hofberg stated. "We are trying to be as open as possible, not just to students from all over the state, wo as well as other kinds of animals in the broader context of dark matter’s influence on galaxy evolution is important for us to figure out the major back piece of the universe... it’s a mystery of our galaxies that seems to have finally baffled, but at the same time we give us extra information on the components of the universe as a whole, and how they interact.”

“Watching this pattern unfold within a particular process, they could be used for many different purposes, such as banquets and shows, but it mainly be used for the study of animals.”

The primary benefit is so students have a student and animal interactionary here,” Hofberg stated. “So if you’re looking on seeking hands-on work with animals, that can be taught here.”

Another benefit will be being able to work with animals during the winter months, when there would normally be snow and ice on the ground.

Branden Zuck, senior in animal science and president of Block and Bridle, feels that the center will be very beneficial for students.
