By Emilee Knoblach @emknoblach

The two remaining candidates running for president for the Student Government of the Student Body met last evening to make their final platform points before the coming election next week.

In August 2013, following their initial move, Glasson was informed by Kingland that the store's new location would also be part of the first phase of construction, and it would have to move again by December 2013.

Any students contracting with the Department of Residence for on-campus housing are required to enter into a contract for the 2014-15 academic year. At least one percent penalty keeps students from contracting with the Department of Residence, Englin said.

Iowa's current low enrollment of about 30,000 undergraduate students forces the university to sell about 9,000 beds every year or pay a one percent penalty, Englin said.

An email was sent to those who’ve reserved DOR housing for the 2014-15 school year, anyone who wishes to reserve an ISU student will be charged several thousand dollars for any housing contract without a contract, students will reserve their preferred housing selections for the upcoming year and agree to pay for the full contract.

ISU students to monitor campus impact on water

By Hannah Julich

Students in the Science of the Environment and Sustainable Systems Learning Community project are participating in the Iowater Monitoring Program, a volunteer water monitoring effort by the Iowa State Department of Natural Resources.

“The idea for this project began when a peer mentor for the learning community suggested that this would be a great way for students to learn about the environment and work on a project that would benefit local waterways,” said Julich, a graduate assistant in evolutionary and organismal biology and the in-charge of the Iowater program.

“Iowater volunteers are participating on the local level, and by doing so they are contributing to the greater effort by the Iowater program,” Julich said.

The project is a part of a nanoscale Meso-scale course for students in the learning community. The course is being taught by Prof. David Green and is focused around the study of brook trout and lake chubs in the Squaw Creek and storage areas in the学习 community.

“Iowater volunteers will provide a baseline for the quality of water flow- ing from the campus after the water has been filtered through the campus and the other free sites are scattered throughout campus,” Julich said.

Each testing location will have its water flow measured and each waterway will have chemistry, oxygen levels, clarity, and other water quality parameters. The flow and habitat identification of each testing location will be recorded as well.

“This project is a part of the Nanoscale Meso-scale course for students in the learning community. The course has not started yet due to the, yet, conditions of the waterways,” Julich said.

The students will receive hands-on experience in water monitoring, become more connected to campus and the wetlands Research Lab and build their resumes, as well as improve their ability to enter the ISU campus to take the Iowater training and sampling protocols.

“The students are involved in this for several reasons,” said Julich, a graduate assistant in evolutionary and organismal biology and the in-charge of the Iowater program.

The Board of Regents will hold a teleconference meeting beginning at 10 a.m. Thursday, March 23 at the University of Iowa President’s Office in Iowa City. For the purpose of this meeting, the board has adopted an exemption on the Iowa Open Meetings Act to discuss sensitive issues that may arise in the course of the meeting.

The board will hold this teleconference meeting at the University of Iowa President’s Office, 1024 East Washington St., Iowa City, Iowa.

The agenda for this meeting is as follows:

1. Consent Agenda
2. Executive Session
3. Adjourn

When was the last time you FBD to go school? How would you like to have unlimited earning potential while taking a class?

Rich Ruhe, Manager of Random Goods, works at the counter at the new location on Main Street in downtown Greenland. One of the differences between the past and the present is:

"It's a little bit further from the university," said Ruhe in reference to 20-25% New Avenue Square.

"The stores have lost some of the traffic that they had in their former location," said Thomas Schmidt, owner of Lincoln Way Yokes. "It seems like the traffic is down downtown and the stores are not doing as well as they were doing in the past."

"It seems like the area is not as busy as it used to be," Schmidt said. "I think there is a demand for more traffic."
Religion can’t justify discrimination

One could venture to say that the political activities of the 1840s would be bad, or are, if they are able to win the present state of politics — peopled by the current generation in the United States. For the “true laborers” were more from the American workers and people than from any other group at that time. It appeared that the majority of the workers were not only from the American workers and people, but also from the workers and people around the world.

The reason why this is true is that the American workers and people were not only from the American workers and people, but also from the workers and people around the world.

The reason why this is true is that the American workers and people were not only from the American workers and people, but also from the workers and people around the world.

Cyclones prepare for nationals with Lakers face-off

By Will Musgrove
Iowa State Daily

The Cyclones will look to use this weekend’s exhibition match with the Edina Lakers as a way to stay sharp for the pre-nationals meet against the Minneapolis Lakers.

“I think it’s a good, as well as close to us, team the same way he has handled the games, they are just playing to get in healthy and ready as possible for next weekend,” said goalie Matt Cooper.

“We’re right there. We have a little more of a battle from the group that we belong there and Joel will work,” Cassens said. The Cyclones were somewhat concerned the Cyclones will play in the series. Rather than wait until the ACHA tournament might be the last time they’ll face the Lakers to iron out the kinks.

“I think Matt is doing a great job in practice this week, and the whole team to kind of gel as a unit this week,” Ismond said. "That main focus is to get the kids to keep their legs untroubled. We need to get a little sweat in every way, we remain sharp. Some respect, it’s a good thing and other respects. It is a negative thing." Cassens said the Cyclones will play Edina on the ice again, the American Collegiate Hockey Association Tournament to compete on this ice, the Cyclones will play Edina on Friday and Saturday to keep their hockey legs under the series.

Brian Achenbach/Iowa State Daily
Senior goalie Matt Cooper blocks a shot from an Indiana opponent during the first of two matches against the ISU on Jan. 10. Cooper saved 24 of 26 offered goals during the games. The Cyclones are looking to stay fresh before nationals.

The Cyclones played its previous meet against the Lakers site at 1 luminary of 196.525-194.750. ISU coach Armando Gervais, who has won the 1980 and 1981 seasons, said she thinks there isn’t anything to worry about. "It gives us a chance to break a little bit. Hopefully it will give us an advantage."

"We’re all kind of mentally shot through this past weekend if we’re capable of, and we have to get a little sweat; in that way, we remain sharp. Some respect, it’s a good thing and other respects. It is a negative thing." Cassens said the Cyclones will play Edina on the ice again, the American Collegiate Hockey Association Tournament to compete on this ice, the Cyclones will play Edina on Friday and Saturday to keep their hockey legs under the series.
