Clapping, cheering and catcalls filled the air as dozens of people lined up to watch as the first Sigma Kappa Fashion Show was in the works. The show took place in the South Ballroom of the Memorial Union. The night began with live entertainment by By Jay and Dessie, along with a silent auction and appetizers. All proceeds from the event will go to the Sigma Kappa Foundation, which supports “making a difference in the lives of young women through education, leadership, philanthropy and service,” Mace said.

Every Sigma Kappa across the world has its own Ultra Violet event. Wanstale said, “But every event isn’t necessarily a fashion show.”

“We really did a model competition and used the best models we had represented to the chapter. The event isn’t necessarily a fashion show but it is a model competition,” Wanstale said.

Mace said she will always look forward to the event, even when she is in her late years. She said she is looking forward to the Ultra Violet Fashion Show to see what her daughter will design for the event. Mace said that she is looking forward to seeing what her daughter will design for the event.

The awards presentation featured a number of designers giving our time and help to the charities it sponsors. The event was a great opportunity for everyone to come together and enjoy the evening. The awards presentation was followed by a silent auction and a reception by Shy of a Dozen.

Iowa State makes many attempts to give back to the military community and will do so again this Monday.

Iowa State will host the sixth annual Iowa State-wide Veterans Conference. Registration begins at 9:30 a.m., and the cost of the conference is $40. Student veterans and military personnel along with their family members can attend the event for free.

The opening ceremony will begin at 9:15 a.m. in the Sun Room of the Memorial Union and will be in the Sun Room of the Memorial Union. The opening keynote speaker, Mayor Tom Fitcher, will begin the conference at 9:30 a.m. Mayor Fitcher has worked to provide command and control of more than 140 Army and Air National Guard units. His primary responsibility is to guarantee the mobilization, deployment and sustainment of the Iowa National Guard. He ensures that the state can readily provide forces in support of state and national requirements.

The opening ceremony includes a speech pertaining to this year’s theme: Learning to strings services.

**Iowa State will host the sixth annual Iowa State-wide Veterans Conference.**

The opening ceremony will feature remarks by Jonathan Wickerson, the adjutant general for Student Affairs; and Timothy Orr, the adjutant general for Student Affairs. Students who always wanted to wear the team colors are surely going to do so as well. A Google search reveals that the Aggies are favored to win.

The Blood Moon Prophecies

Prophecy: The Blood Moon is a lunar eclipse based on a 28-year cycle. This type of eclipse is rare and occurs when the moon is fully visible to the naked eye and then falls into the Earth's shadow. As the moon passes through the Earth's shadow, it turns red, giving the illusion of a blood moon.

Method: The Blood Moon Prophecies are based on the idea that theBlood Moon is a sign of the end of the world. The prophecies suggest that the Blood Moon is a warning to humanity to repent and prepare for the coming of the Lord.

Implications: The Blood Moon Prophecies are a form of conspiracy theory that suggests that the Blood Moon is a sign of the end of the world. The prophecies are not based on any scientific evidence or research and are not supported by the majority of astronomers or religious scholars.

Conclusion: The Blood Moon Prophecies are not a scientific explanation of the Blood Moon and are not supported by any credible source. Therefore, they should be disregarded as a basis for making any predictions or decisions about the end of the world.

Don't rush into anything. You need to take the time to work out your budget. Avoid getting burned by your own stuff. Work out financial possibilities, including some delicious redundancies. To get the advantage, check the day's rating: 10 is the easiest day, 0 the most difficult. You may travel for work this year (definitely for pleasure). Talk about your dreams. Share your dreams.

Blood Moon to predict end of the world will end Monday, Sept. 28, 2015

The Blood Moon phenomenon is also known as a lunar eclipse. This type of eclipse occurs when the moon passes through the Earth's shadow, causing it to appear red or orange. The phenomenon is caused by the way the Earth's atmosphere bends and refracts light, which gives the moon its distinctive color.

According to the Blood Moon Prophecies, the Blood Moon is a sign of the end of the world. The prophecies suggest that the Blood Moon is a warning to humanity to repent and prepare for the coming of the Lord.

My friend and I were talking the other day about how much better things would be if people had a little more common sense and a little less self-righteous smugness. We talked about how it’s important to be kind to others, to listen to their opinions, even if you disagree with them, and to try to see things from their perspective. We also talked about how it’s important to be honest and to own our mistakes, even if it means admitting something we don’t want to admit.

It’s easy to get caught up in our own little world and forget about the people around us. But if we take the time to listen and to understand, we can make the world a better place for everyone.

Let’s all try to be kinder to each other and to ourselves.

Sincerely,
[Your Name]
By Austin Anderson

Cory Sellers walks leisurely down the hallway past the locker room at the Ames/ISU for Arena after a rigorous Monday practice. He has 40 minutes to leave the arena, but he’s still finding something to eat and he’s on the ice to coach his little league hockey — but his body language shows he’s not in a rush.

“It’s a weightless feeling when you’re in the air,” Sellers said, referring to his love of hockey.

This isn’t new for him. Since his father signed him up for roller hockey at the age of 6, senior Cory Sellers has yet to hang up his skates. He is now seeking a national championship in his final year on the Cyclone Hockey team.

Cyclone Hockey captain seeks thrill, title

Sellers has been selected as a co-captain by Cyclone Hockey head coach Jason Farnham.

“Sellers is a leader by example,” Farnham said. “He’s aCyclone Hockey head coach Jason Farnham. He’s the most respectful and humility. He’s the best leader in our room and the guys respect him. He’s a model student athlete and a model citizen.”

Sellers has worked his way up from an average player to a key player on this year’s Cyclone team.

“He’s a leader by example,” Farnham said. “He’s a straight-A student and a straight-A student athlete.”

Sellers has been a key contributor to the Cyclones in his four years at ISU and has helped the team to be the best team in the nation.

“He’s the type of player that you want to have on your team,” Farnham said. “He’s the type of player that you want to have on your team.”

He also is a straight-A student and a straight-A student athlete.

“I’d have to tandem Sellers with a go-to player to win the championship,” Farnham said.

The rush from hockey would cap off a pretty good senior season with the hopes of winning the championship this year.

“Sellers has been a big one through the first two weekend series’ of the season. He’s been a big one through the first two weekend series’ of the season.”

On Oct. 2 the Cyclones faced off against Central Oklahoma, the surprising national champions and the team that选拔Soldell’s soccer season and the team that选拔Soldell’s soccer season. The Cyclones would face off against Central Oklahoma, the surprising national champions and the team that选拔Soldell’s soccer season.

“If we would’ve beat them, Sellers said. “I think we would’ve won it all.”

The Cyclones have been playing well throughout the year with Sellers’ contributions.

The Cyclones have been playing well throughout the year with Sellers’ contributions.

“Sellers played a key role in the team’s victory over Central Oklahoma,” Farnham said.

With Sellers’ contributions, the Cyclones have a chance to win the championship this year.

“I think we could win it all,” Sellers said.

The season has a chance to be different.

Winning a championship would be a dream come true,” Sellers said.

And the team will be the team that wins the championship.

And the team will be the team that wins the championship.

As Sellers leaves the Ames/ISU for Arena in his signature black flip flops and Chicago Blackhawks cap, it’s easy to see where he came from. The senior has his back turned to the ice now and soon Cyclone Hockey will be a part of his past.

“Sellers has his back turned to the ice now and soon Cyclone Hockey will be a part of his past.”

But before that, however, there’s potential for a third signature item for Sellers to wear to match his flip flops and hat — a championship ring.
The opening game sets the tone, and the Cyclones carried that pressure and aggression through the break and the second set as well, said sophomore Alexis Conaway, who recorded 11 kills on a team-high .476 hitting percentage in Iowa State’s Big 12 opening victory against Texas Tech on Saturday.

Sophomore Magick Harris serves up an ace to the Texas Tech (1-1, 0-4) Big 12 opener at the Hilton Coliseum on Sunday, Sept. 19. Cyclone Hockey is undefeated this season with a 4-0 record.

In the 12th Olympics, Great Britain’s 1-5 loss was a world record for a men’s preliminary round with a round of five-consecutive losses. They have yet to score higher than fifth place in the pool. The record is 1-4.

While the Cyclones did emerge from the second set win, however. It served to deflate the Cyclones a bit for a while there. It seemed to be shifting. The crowd was a little bit in awe and the team was a little bit in awe as well. We had the puck the whole time, but we couldn’t create an opportunity to put the puck down. We couldn’t create anything, but to be effective you have to think about it for a second. And in the third and final set, Iowa State eliminated all attacking errors — compared five and six in the first and second sets, respectively — and raised its hitting percentage by .200 from set two to three.

The Cyclones credited the decisive second set with helping to generate their success in the match’s final game. "It’s a lot different feeling in a locker room when you’re up 3-0 than when you’re up 1-0," said Johnson-Lynch. "I think we all relish a little bit in the third (set). We squared it up.”

The Ice Bears were a Division II program last season. They came to the ice in the first period after a 6:57 penalty in the second period against the Cyclones at the 60-minute contest.

After claiming the opening set win, however. It served to deflate the Cyclones a bit for a while there. It seemed to be shifting.
