**Opinion**

A year removed from a 27-0 beatdown of in-state rival Northern Iowa, the ISU football team is having the same changes when they visit Parks Trice Stadium. Saturday, the Cyclones take on a UNI squad ranked No. 7 in the preseason top 25 coaches poll for the Football Championship Subdivision.

An artist’s rendering depicts what the Ames Public Library will look like after a $20 million renovation.

According to library staff, the library has room to add 3,000 more books. Library staff said these renovations are necessary, as they won’t lose its historical feel.

The library also will add restrooms, along with two staircases. According to library staff, there will be fewer walls to make the library feel open, and meeting spaces will be expanded.

The renovations will be larger and moved toward the front of the library for easier access. Carey said there will be a dedicated space, with study rooms and services available for users of all ages.

More books and computers will be added to the library’s collection, and Carey said the library is planning ahead as the entrance will be moved more handicapped-accessible, and the building comply with high efficiency standards.

A lot of the existing windows will be added to the library's window, and the library also is planning ahead as the entrance will be moved to street level. Library staff said these renovations are necessary, as they won’t lose its historical feel.

Downtown energy also is being looked into for use. Geothermal energy also is being protected as the library will be undergoing a $20 million renovation.

The Ames Public Library, which is the main public library serving the Ames community and currently has room to add 3,000 more books and computers, will be adding new technology and better insulation to make the building comply with high efficiency standards.

A lot of the existing windows will be added to the library’s window, and the library also is planning ahead as the entrance will be moved more handicapped-accessible, and the building comply with high efficiency standards.

Students of Iowa State, unite! and exterminate bourgeois capitalists. Labor Day, the proletariat will reign.

We are the working class. The ruling class has been the source of so much of your people’s problems and we are sick of it. In particular, many young men have been turned off by the politicians’ general lack of strategy for the future. Either they are the middle-class consumers or the upper-class hogs they are! We have done our part to sustain them and keep them alive. They have grown fat from the air. We break ourselves and indebt us in a grave of suppression.

They insist on living in our world. This weekend, we stand and remember the labor-ers of the past as well as the present.

Don’t feel guilty if you don’t know what you want to do with your life. There’s nothing wrong with what you did in your childhood. We are not old enough to survive realities.

The work that Ben is doing can be done at any point in the future, prepare to have your baby boomer held 11 different jobs before you turn 40 if you live through that. As the Republican Party affiliation, has been em-

When criminal cases come down to important testimonies by eyewitnesses, practices should reflect the current scientific understanding of the human mind and the power of memory. In a similar situation, and he really is a classically trained person, the engineer will struggle. Put them to complete a task, and they might come up with workable solutions. Instead of opposing police lineup methods to reflect the fallibility of eyewitnesses, practices should reflect the current scientific understanding of the human mind and the power of memory.
Jet tempo

**Another obstacle emerges for new Vikings stadium

Iowa State Daily

Iowa State has three matches this upcoming weekend, but the usual rivalryndefies itself against Iowa because the Cyclones are also in a hot streak heading into Big 12 play. The Cyclones will run the jet tempo throughout the season, and we've seen that in the past two weeks.

Coach Chris Tiel says the Cyclones have been a great team on defense, and they have been a great team on offense. But the team has struggled with jet tempo in the past two games. The Cyclones are averaging 12.4 points per game, which is down from 18.6 points per game in the past two games.

Iowa State has spent the past two weeks preparing for a new-look defense, and they have been successful in that area. But jet tempo was not a strength in the past two games.

Coach Tiel said the Cyclones will continue to work on jet tempo in practice, and he said they will use jet tempo in every game.

**Men’s golf

By Brian Span

Iowa State Daily

It’s only the second year for both coach Andrew Tank and assistant coach Patrick Datz running the ISU men’s golf team, but it looks like they’ve been here much longer.

“I had a lot last year in my first year of making the transition to Iowa State,” Datz said. “I was a total beginner in college. The things I learned while playing golf in college, I have already used in my coaching career. I have been working on jet tempo, and I have been working on jet tempo in practice. But jet tempo was not a strength in the past two games.

FOOTBALL

Iowa State (0-0-3) vs.

Northern Iowa (0-0-1)

Where: Jack Trice Stadium.

When: 6 p.m. Saturday.

Media coverage:

Radio — KXNO 800.

Notes: The Cyclones open 2011 at home against a Northern Iowa squad that won five games last season in the Missouri Valley Football Conference last season.

In last year’s game, the Cyclones forced four turnovers, making interception return for touchdowns.

"Where they do line up is a three-down scenario. That’s the one you don’t get to as much in four-down situations."

On its return, Northern Iowa has two defensive ends and two tackles lining with two inside blockers. Iowa is on its best line and running back will be in there at some point of the game."

For the ISU offense, containing a defense that sports multiple fronts will be a challenge.

"It requires a little bit more than we’ve done in the past, but I think we’ve got some offense that’s grinding you down."

Herman said of the preparation, some of the things that you do, “focus and limiting maybe of what you’re able to do."

It’s the challenge of having one of the ends on the defensive side and having to deal with that."

In Iowa’s case, it’s likely to be less prevalent on the offensive side, as ISU coach Paul Rhoads said on the practice field.

Before investing any money, please contact the better business bureau or your local consumer protection agency. The iowa state daily public relations department is seeking an art director.

The game, which will be the first carry-over come Saturday, offensive co-

ordinator Tom Herman said. "But I wouldn’t do that."

He expects all four to get reps Saturday, filling in as the opposite to the lone outside linebacker as its

stance on the line instead of as a linebacker.

Green groups are growing

The Green Umbrella is continuing to grow at Iowa State University.

We wanted to be available for other groups to network and the umbrella of groups expanded. We are continuing to grow our umbrella of groups.

The Green Umbrella is striving to bring together more groups, to just be able to give them a place to network and to share their green endeavors they have been working on. Furthermore, groups are also finding other groups through us, which is exciting.

Our umbrella includes questions and feedback from the campus community. Therefore, every group should be encouraged to attend the umbrella meetings.

The umbrella also showcases that groups can join the umbrella as well, as a chance for groups to network and find out about green initiatives.

The umbrella is a way for groups to contribute to the sustainability of the campus community.

If you are interested in attending umbrella meetings or would like to start a group, please contact us. Our meetings are open to the public and are held each month.

For more information, please visit the Green Umbrella website at iowastatedaily.com/cystainability.

---

Market

Jan Lynch, of Onion Creek Farms, takes several minutes to weigh for a customer. The Ames Main Street Farmers Market featured the purchasing of local goods daily.

---

Hach Hall

Hach Hall, opened in August 2010, is one of the leading buildings on campus in terms of sustainability and is on the receiving end? The average college student spends a lot of time in the library, eating in dining facilities, and attending classes, all from local vendors.

You've been there. Standing in line at Walmart, you get filled with frozen food and refrigerated and frozen meals from where to where. When it comes time to pay, you swipe your card and think about how you're helping the environment. But when it comes time to see what's on offer, you can't help but wonder: What's for dinner?

For many, the answer is local. With the increasing interest in sustainable living, more people are looking for ways to be environmentally conscious.

The Green Umbrella is an initiative that brings together green groups and promotes sustainability on campus. It is a way for students to share their green endeavors and to encourage others to get involved.

The meetings are open discussion that includes questions and feedback from the campus community. They are held each month and are open to the public.

The Green Umbrella is an important part of the university and contributes to the sustainability of the campus.

If you are interested in attending umbrella meetings or would like to start a group, please contact us. Our meetings are open to the public and are held each month.

For more information, please visit the Green Umbrella website at iowastatedaily.com/cystainability.

Paint it green

The Ames Farmers Market: a bustling event every Saturday between 8 a.m. and 1 p.m. until Sept. 24.

The Ames Farmers Market advertises along Main Street Station in Ames, Iowa, and is a popular event for locals and visitors alike.

The vendors have sold out on different products every Saturday, and the farmers market is a social event as well.

The Ames Main Street Farmers Market is a fun way for families to know exactly where their money is going and they are choosing local goods.

The Farmers Market benefits by bringing in fresh local products, reducing waste, and providing a place for local businesses to sell.

For more information, please visit the Ames Main Street Farmers Market website at amesmainstreetfarmersmarket.com.

---

Going green

Hach Hall

Hach Hall has received a Gold LEED certification, which is the highest rating a building can achieve, according to the United States Green Building Council.

Hach Hall, located on the west side of the university, is a state-of-the-art classroom and research facility.

The building is designed to meet the highest environmental standards, including the use of sustainable materials and energy-efficient systems.

The building is also equipped with a green roof and is designed to be a net-zero energy building, meaning it produces as much energy as it consumes.

For more information, please visit the Iowa State University website at iowastatedaily.com/cystainability.

---

Motivating students to pursue sustainability can be challenging, but Iowa State University is making strides in this area.

The Ames Main Street Farmers Market offers fresh, locally-grown produce and is an important part of the university’s sustainability initiatives.

The market benefits the community by bringing local products to the campus, and the students benefit by learning about sustainability and the importance of supporting local businesses.

For more information, please visit the Ames Main Street Farmers Market website at amesmainstreetfarmersmarket.com.

---

Today's Word of the Day: Substrate

A word of the day for your bank

1. Substrate (noun): A base or foundation on which something is built.

2. Substrate (noun): A surface on which something (such as a film, a liquid, a paper, etc.) is placed for drying, cooling, or easy removal.

3. Substrate (noun): A supporting material on which or into which a reaction is performed.

4. Substrate (noun): A biological term for the surface or material on which an organism lives or functions.

Word of the Day: Substrate (noun)

Random Facts:

- In 1959, actor Richard Burton was arrested for driving under the influence of alcohol.
- The Mad Hatter from Alice in Wonderland is named for Mad Hatters, who wore them to sell out home games.
- The first successful submachine gun was the Sten gun, which was developed in the UK during World War II.
- The term "Lamb" is derived from the Latin word "lambus," which means "grain." This is because the term is used to describe meats prepared in a similar manner to lamb, but made from other animals such as sheep or goats.
- The term "Granola" is derived from the Greek word "grana," which means "granules." This is because granola is made up of small, granular pieces of oatmeal, nuts, and dried fruit.
- The term "Giant" is derived from the Latin word "gigas," which means "giant." This is because the term is used to describe objects or individuals that are unusually large or impressive.
- The term "Henna" is derived from the Arabic word "hena," which means "to dye." This is because henna is a plant that is used to dye hair, skin, and nails.
- The term "Submachine gun" is derived from the term "submachine," which means "a type of firearm that is smaller and lighter than a standard machine gun.
- The term "Tofu" is derived from the Chinese word "tao fu," which means "bean curd."
- The term "Kale" is derived from the Latin word "colca," which means "to break." This is because kale is a type of cruciferous vegetable that is grown for its leaves, which are used in salads and soups.
- The term "Pineapple" is derived from the Latin word "pinus," which means "pine." This is because the pineapple is a type of tropical fruit that is native to the Americas.
- The term "Lamb" is derived from the Latin word "lambus," which means "grain." This is because the term is used to describe meats prepared in a similar manner to lamb, but made from other animals such as sheep or goats.
- The term "Granola" is derived from the Greek word "grana," which means "granules." This is because granola is made up of small, granular pieces of oatmeal, nuts, and dried fruit.
