Iowa State University is one of the most respected land-grant universities in the nation. Established by the Iowa General Assembly in 1858, the Iowa Agricultural College and Model Farm was designated the first land-grant college when Iowa became the first state to accept the terms of the federal Morrill Act in 1864.

The act allowed Iowa to sell federal land to finance a new college open to all, regardless of wealth, race or gender; offering a practical education in engineering, agriculture and military science as well as classical studies; and sharing research knowledge with all Iowans. Iowa State University officially opened in 1869 and was the first coeducational land-grant school.

In 1903, the nation's first cooperative agricultural extension program was launched when Iowa State professors worked with farmers and county governments to establish demonstration farms and institutes. It is our institutional commitment to the founding land-grant principles that has produced alumni who are leaders in their professions, research that has forever changed our society and knowledge-based information that has assisted the citizens of our state, nation and world community.

**Iowa State's Points of Pride**

*The world's first electronic digital computer was developed at Iowa State by math and physics professor John V. Atanasoff and graduate student Clifford Berry, in the late 1930s. Their invention, the ABC computer, has been called the most important technological innovation of the 20th century.*

*The university is a leader in virtual reality research and its most advanced virtual reality theater, the C6, is the nation’s first six-sided theater that totally immerses the user in images and sound.*

*Iowa State’s faculty members are recognized for their scholarly efforts. They serve as editors and on editorial and advisory boards of national and international academic professional journals.*

*Iowa State is one of the top three U.S. universities in the development of patentable biotechnology.*

*Iowa State’s faculty includes two professors who have been recognized among the top 100 young technology innovators in the world.*

*Iowa State’s faculty includes members of the National Academy of Engineering and the National Academy of Sciences.*

*Iowa State is a member of the prestigious Association of American Universities that has a membership of only 62 major research universities in the United States and Canada.*

*Iowa State’s learning communities program for undergraduate students is rated among the nation’s best.*

*Every state and more than 100 countries are represented in Iowa State’s student body.*

*Iowa State students have a reputation for winning national and international awards. They win contests for apparel design, NASA food technology, news writing for print and broadcast, computer software, vocal music, and music composition.*

*Iowa State is nationally ranked for its beautiful campus and its central campus has been honored by the Association of Landscape Architects as one of only three university Centennial Medallion sites in the nation.*

*Iowa State’s 600 works of art on campus make its public art collection the largest of any university in the nation.*

*Iowa State’s Reiman Gardens has been recognized for having the nation’s most outstanding public rose garden.*

*Iowa State holds two world records certified by the Guinness Book of World Records: one for making the world’s largest Rice Krispies Treat to celebrate that Mildred Day, an Iowa State alumnus, helped create the recipe for the popular snack food; and one for growing the tallest amaranth plant in the world.*

*Iowa State’s wrestling program boasts 5 Olympic gold medalists – the latest being graduate Cael Sanderson at the 2004 Olympic Games in Athens, Greece. Sanderson’s perfect collegiate wrestling record of 159 wins has been recognized by Sports Illustrated as the second most impressive feat in college sports history.*

*Washington Monthly magazine ranks Iowa State among the top 20 public universities that do the best at serving the United States through educating economically challenged students, undertaking vital research that drives the U.S. economy and promoting the ethic of service to country.*

*Iowa State’s undergraduate programs for future entrepreneurs are ranked among the top 25 in the country.*

*Iowa State’s interior design, architecture and landscape architecture programs are ranked among the best in the nation.*

*With more than 100 majors, 1700 faculty and 600 clubs and organizations, Iowa State has built a reputation for almost unlimited academic and social opportunities in a personal and welcoming environment.*

**The Iowa State University Strategic Plan 2010-2015**

The challenges of the 21st century demand that we focus on what we do best. To ensure that Iowa State University is a leading research university in 2050, we must recruit, support, and retain students, faculty, and staff who are committed to excellence, integrity, the free exchange of ideas, and collaboration. It is imperative that the creation, sharing, and application of knowledge be a global effort characterized by a profound respect for the diversity of people and ideas. These are the values that enrich our work and guide Iowa State’s Strategic Plan.

**Mission**

Create, share, and apply knowledge to make Iowa and the world a better place.

We must prepare the leaders of our nation and the world. To make the world a better place, Iowa State will call upon its great strengths in student-centered education, global collaboration, and transformational basic and applied research. Iowa State will lead in developing more sustainable ways to produce and deliver safe and nutritious food, water, materials, and energy; integrate the protection of plant, animal, and human health; and care for our environment. We will design tools and infrastructure that will create entrepreneurial opportunities. The major changes sweeping the world are creating extraordinary opportunities for Iowa State to capitalize on its land-grant mission and be at the forefront in addressing our common, global challenges.

* To create knowledge, Iowa State must be a magnet for attracting outstanding students, faculty, and staff who will learn, work, and conduct world-class research and scholarship that address the challenges of the 21st century.

* To share knowledge, Iowa State’s faculty, staff, and students must be able to communicate with and learn from diverse populations. The University must maintain a strong focus on student success and provide exceptional undergraduate, graduate, professional, and outreach programs that prepare students and citizens for leadership and success.

* To apply knowledge, Iowa State’s faculty, staff, and students must be able to develop global partnerships to convert what they know into products, services, and information that will improve the quality of life for the citizens of Iowa, the nation, and the world.*
Vision
Iowa State University will lead the world in advancing the land-grant ideals of putting science, technology, and human creativity to work.

Under the provisions of the Morrill Act of 1862, the State of Iowa designated Iowa State as the nation’s first land-grant institution. The Act established the land-grant ideals that higher education should be accessible to all, regardless of race, gender, or economic circumstance, and that the university should teach liberal arts and practical subjects to provide an outstanding quality of life for future citizens. Iowa State pioneered the nation’s first extension service and remains a leader in realizing the promise of the land-grant vision. The university enjoys a number of internationally known and prestigious assets that provide a unique foundation for continued growth and productivity. Iowa State and the city of Ames are home to a U.S. Department of Energy national laboratory; five U.S. Department of Agriculture research laboratories; the nation’s finest genomic-based agricultural breeding, health, and biotechnology programs; world-renowned virtual reality, plant science, and bioeconomy institutes; and one of the nation’s most successful technology transfer programs. Major recent investments in new research and educational facilities and an outstanding tradition of cross-disciplinary research bring all of Iowa State’s colleges and departments together with global partners. The student experience emphasizes outstanding practical, international, and leadership opportunities, as well as a focus on student success. Iowa State alumni and friends are deeply engaged and invested in improving Iowa State. Over the next five years, Iowa State will continue to enhance its campus, capitalize on and leverage its strengths, and engage with partners to realize the goals of this Strategic Plan and create a better future for all.

Priorities
Iowa State will be a magnet for attracting outstanding students who seek an education that prepares them to make a difference in the world.

Goals:
* Recruit, support, retain, and graduate a diverse group of outstanding undergraduate, graduate, and professional students dedicated to making a difference in the world.
* Provide accessible and affordable educational programs that build on Iowa State’s strengths and excellence in science and technology integrated with design, business, education, arts, humanities, and social sciences.
* Provide a high quality student life that engages and challenges students to collaboratively learn, grow, and succeed as resilient global citizens and involved alumni.

Iowa State will be a magnet for attracting outstanding faculty and staff who create, share, and apply knowledge to improve the quality of life.

Goals:
* Recruit, support, retain, and graduate an outstanding faculty and staff.
* Foster a university culture and work environment that rewards faculty and staff for their contributions, supports a balance between work and life, and inspires individuals to work together to achieve at the highest level of their abilities.
* Collaborate with Ames and surrounding communities to provide a premier living environment.

Iowa State will be internationally known for faculty, staff, and students who address the challenges of the 21st century.

Goals:
* Produce and disseminate transformational basic and applied research and creativity to improve the quality of life. Focus the resources of Iowa State on developing the basic knowledge and designing new technologies to create entrepreneurial solutions to the challenges of 2050 and beyond.
* Build and enhance outreach and global partnerships to promote scientific advances, economic growth, creative thinking, and improvement of the human condition.

Iowa State will be a treasured resource for Iowa, the nation, and the world.

Goals:
* Incorporate research and engagement in the student experience to produce civic-minded graduates who are well prepared to address complex societal problems.
* Build partnerships with communities of place and interest to solve problems and create opportunities.
* Involve citizens of Iowa and the world in collaborative interactions through extension, outreach, and engagement.

Nondiscrimination and Affirmative Action Statement
(November 1, 2010 Reaffirmation)
Iowa State University is committed to developing and implementing a program of nondiscrimination and affirmative action, a responsibility the university accepts willingly because it is the right and just thing to do. Because an educational institution exposes the youth of Iowa and of the nation to a multitude of ideas that strongly influence their future development, it is an area of our society where removing barriers is critical. We insist on promoting the concept of inclusion and participation.

This commitment is part of a larger commitment to developing a safe and supportive climate for all members of the ISU community in classrooms and laboratories, in offices, in the residence hall system, and throughout the campus. Iowa State University recognizes that a non-discriminatory environment complements a commitment to academic inquiry and intellectual and personal growth.

The goal is to provide a non-discriminatory work environment, a non-discriminatory living and learning environment and a non-discriminatory environment for visitors to the campus. Iowa State University herein recommits itself to comply with all federal and state laws, regulations, and orders, including the policies of the Iowa Board of Regents, which pertain to nondiscrimination and affirmative action.

All administrators and personnel providing input into administrative decisions are directed to ensure that all decisions relative to employment, conditions of employment and access to programs and services will be made without regard to race, color, age, religion, national origin, sexual orientation, gender identity, genetic information, sex, marital status, disability, or status as a U.S. veteran. Exceptions to this directive may be made in matters involving bona fide occupational qualifications, business necessity, actions designed to eliminate workforce underutilization, and/or where this policy conflicts with federal and state laws, rules, regulations, or orders.

Iowa State University does not discriminate on the basis of race, color, age, religion, national origin, sexual orientation, gender identity, genetic information, sex, marital status, disability, or status as a U.S. veteran. Inquiries can be directed to the Director of Equal Opportunity and Compliance, 3280 Beardshear Hall, (515) 294-7612.

No otherwise qualified person will be denied access to, or participation in, any program, activity, service, or the use of facilities on the basis of factors previously enumerated. Reasonable accommodation will be made to facilitate the participation of persons with disabilities in all such activities consistent with applicable federal and state laws, rules, and policies.
Further, all supervisory personnel will be responsible for maintaining an environment that is free of discrimination and harassment. Acts by anyone that adversely affect another person's employment, conditions of employment, academic standing, receipt of services, and/or participation in, or enjoyment of, any other activity, will be regarded as a violation of university policy and thereby subject to appropriate disciplinary action. Retaliation against persons filing complaints, for bringing the violation of this policy forward for review, or for assisting in a review, pursuant to a filed complaint or grievance, is prohibited.

Iowa State University’s commitment to nondiscrimination and affirmative action is of the highest priority and is to be adhered to as such. It applies to all university-sponsored programs and activities as well as those that are conducted in cooperation with the university.

Iowa State University has designated Carla R. Espinoza as the affirmative action officer and assigns overall program responsibility to her as the Director of Equal Opportunity. Questions regarding complaints and/or compliance with affirmative action or equal opportunity should be directed to her at 3280 Beardshear Hall, Iowa State University, Ames, IA 50011-2024, (515) 294-7612.
About the Catalog

The Iowa State University Catalog is a one-year publication which lists all academic policies, and procedures. (Previous versions were two-year publications.)

The catalog also includes the following: information for fees; curriculum requirements; first-year courses of study for over 100 undergraduate majors; course descriptions for nearly 5000 undergraduate and graduate courses; and a listing of faculty members at Iowa State University.

New courses developed and offered since catalog publication can be found on the Web at www.iastate.edu/catalog/exp/.

Every effort has been made to make the catalog accurate as of the date of publication. However, all policies, procedures, fees, and charges are subject to change at any time by appropriate action of the faculty, the university administration, or the Board of Regents, State of Iowa.

Academic Advising
Academic advising is an intentional, collaborative relationship based on trust and mutual respect that promotes the student’s development of competence, autonomy, and sound decision making skills. Adviser-student interactions are grounded in teaching and learning and are vital in promoting student growth and personal development through learning, discovery, and engagement. Academic advising supports the mission of the University.

Academic Advising Process
All undergraduate students are assigned an academic adviser based on their major/curriculum. A new adviser assignment is made when a student changes majors/curricula. Advisers serve as a primary resource for students, connecting them with the wide variety of services and academic opportunities available to them. The advising experience begins during the prospective student stage and continues through graduation. The goal of academic advising is an individualized academic experience for each student developed through a mentoring relationship.

Academic Advising Responsibilities
A successful academic advising relationship involves fulfillment of responsibilities on the part of both the student and the academic adviser.

Student responsibilities include:
- knowing Iowa State University policies and procedures
- knowing graduation requirements for degree program
- understanding and accepting the consequences of their academic decisions
- seeking, evaluating, and acting upon advising assistance
- taking responsibility for accomplishing his/her degree plan

Academic Adviser responsibilities include:
- assisting students in achieving the learning outcomes of their academic program, their college, and the university
- referring students to appropriate campus resources
- empowering students to develop an academic plan appropriate to the student’s abilities, interests, academic and career goals
- communicating university policies and procedures accurately

Learning Communities
www.lc.iastate.edu

Learning communities are a university-wide initiative providing students the opportunity to connect with peers who have similar academic goals. Students in learning communities typically take one to three courses together and may live together (or near each other) in the same residence hall.

Although many of the learning communities are focused on first-year students, opportunities are available for sophomores, juniors, seniors, and transfer students.

In addition to developing academic and social networks, advantages of joining a learning community include: getting to know people and making friends in your major or area of interest, getting to know faculty and staff members, making a smooth transition from high school to college, making connections between in-class and out-of-class learning, applying classroom learning to real world situations through hands-on experiences, exploring career opportunities, and having fun! Most learning communities employ an upper-division student as a peer mentor who organizes various activities for the students, ranging from study groups to social events. We have found that students in learning communities are more satisfied with their overall experience at Iowa State, are more engaged, are more likely to remain enrolled at Iowa State after one year, and are more likely to graduate.

First-year students are offered the opportunity to sign up for learning community courses during summer orientation. For learning communities that offer a residential living environment the sign up takes place online with the housing contract.

Any student interested in joining a learning community should contact the learning community coordinator for more information. A list of coordinators, along with current opportunities, can be found at www.lc.iastate.edu.

AccessPlus Information System
accessplus.iastate.edu

AccessPlus is a secure and confidential campus information system that is available via the World Wide Web. Students, employees, and affiliates view personalized menus from campus and home workstations. For public convenience, AccessPlus stations are available in the Memorial Union and at the Visitors Information Center. Students can use AccessPlus to register for classes, view and print current term schedules, view class meeting rooms, class instructors, academic records, final grades, financial aid status, current university bill, academic adviser assignment and projected date of graduation. University employees use the system to view personal information such as pay history and insurance. Some employees also perform business-related functions. Information about and access to AccessPlus may be found at www.registrar.iastate.edu/info/access.html or accessplus.iastate.edu.

Third Party Access on AccessPlus
Third party access is an option in AccessPlus that allows students to grant access to selected personal information to a trusted third party. For example, Third Party Access allows a student to set up a special account for a parent or family member to view their grades and/or pay their university bill. More information on creating third party accounts is available from Help after signing onto AccessPlus at https://accessplus.iastate.edu/frontdoor/tpa-info.jsp

Policies for Graduate Students
The Graduate College has specific policies approved by the Graduate College body. The Graduate College Handbook is the official source for all policies related to graduate students. See http://www.grad-college.iastate.edu/publications/gchandbook/ for the latest information.

Scholastic Recognition
The university recognizes those students who are doing exceptionally well in several ways, including the following.

1. Dean’s List. Each semester the university issues a dean’s list made up of those students who have carried at least 12 credit hours of graded or S-F courses with a 3.50 grade-point average or above for the semester. Courses taken on a P-NP basis do not count as part of the 12-credit hour requirement. No dean’s list is issued for summer school. The list can be viewed at http://www.registrar.iastate.edu/info/deanslist.pdf
2. Top 2 Percent. Each spring semester, undergraduate students in the top 2% of their class (freshman, sophomore, junior, and senior) within their college, based on cumulative grade point average, are recognized. In addition to a congratulatory letter from the university president, a notation of the accomplishment is recorded on the student’s permanent record.
3. Graduation with Distinction. Undergraduates who have a cumulative grade point average of 3.50 or higher at the beginning of their final term are eligible to graduate “with distinction” provided they have completed 60 semester credits of coursework at Iowa State University at the time they graduate, including a minimum of 50 graded credits. Students who graduate with a cumulative grade point average of 3.90 or higher will graduate Summa Cum Laude; those who graduate with a cumulative grade point average of 3.70 to 3.89 will graduate Magna Cum Laude.
Cum Laude; and those who graduate with a cumulative grade point average of 3.50 to 3.69 will graduate Cum Laude. This recognition appears on the student's official transcript and diploma and in the commencement program.

Candidates for the bachelor of liberal studies degree may be graduated with distinction providing that they (a) have completed 45 semester credits of coursework at the three Iowa Regent universities at the time of graduation, (b) have earned at least a 3.50 cumulative grade point average at ISU, and (c) their combined grade point average for coursework taken at the three Iowa Regent universities meets the honors cutoff specified above.

4. Honors Program. Students who are full members of the University Honors Program prior to Fall Semester 2011 must have a cumulative grade point average of 3.35 or higher at the beginning of their final term. Students becoming full members during Fall Semester 2011 or later need a cumulative grade point average of 3.5 at the beginning of their final term. In addition to meeting the appropriate grade point requirement, students will have completed an approved honors program of study and an honors project prior to graduation. This recognition appears on the student's permanent record and diploma, and in the commencement program.

**Academic Privileges and Opportunities**

**Credit by Examination**

Academic credit may be earned by means of special examinations. The Credit by Examination (CBE) program is available to current Iowa State students as well as prospective and entering students. Students with college-level proficiency in particular areas are encouraged to investigate credit by examination early in their college careers. For more information, see Credit by Examination.

**Pass-Not Pass Grading**

Students may choose to take a maximum of 9 semester credit hours on a Pass-Not Pass basis, meaning that only a P or NP will be recorded as their final grade in the course. The purpose of P-NP grading is to encourage students to broaden their education by taking courses outside the usual program of study for their major and minor disciplines. The following policies apply:

1. Undergraduate students who have earned at least 40 semester credits and who are not on academic probation (P) at the beginning of the semester are eligible. A special student must obtain approval from their academic adviser and college dean.

2. Only elective courses may be taken on a P-NP basis. In specific majors, some restrictions may apply, so students should consult with their academic adviser.

3. For restrictions on its own undergraduate majors, a department may not deny the availability of any of its course offerings on a P-NP basis.

4. Courses offered on a satisfactory-fail basis may not be taken P-NP.

5. Students should register for a P-NP course in the same manner and at the same time that they register for their other courses. Students should then change to P-NP by processing a schedule change form with their academic adviser's signature in the P-NP approval section of the form.

6. Students who elect to change back to a graded basis should process the change using the P-NP section of the schedule change form.

7. Changes to or from a P-NP basis must be made before the last day to drop (usually the Friday of week 10 of the term). If the change from P-NP to a graded basis is made after the first 10 class days of a semester (first five days of summer session), the course will count toward the total P-NP credits allowed.

8. Registration on a P-NP basis is not indicated on the instructor's class list. Students will receive a P if their grade is D minus or better and an NP if their grade was F.

9. Neither P (earned grade of D minus or better) nor NP (earned grade of F) is counted in calculating a student's grade point average (GPA).

10. Students who pass a course taken under the P-NP system may not repeat the course. When students have taken a course and received a grade, they may not repeat it for P-NP credit.

11. When students change their curriculum, any P credits that they have accumulated will be accepted by the new department if such credits are in courses normally accepted by the department.

12. Credits taken on a P-NP basis at another institution and transferred to Iowa State may be applied as electives in a student's degree program if the credits are otherwise acceptable in that program. The number of P-NP transfer credits that can be accepted depends on the number permitted by the institution from which the student is transferring. If a student transfers more than nine semester P-NP credits, no additional Iowa State P-NP credits can be applied to the student's degree program.

**Auditing**

To audit a course means to enroll in the course without receiving credit for the course. The instructor of the course approves the audit request.

Students are assessed tuition and fees as though they are taking the course for credit, but the audited course does not count in determining full-time student status. However, an audited course does count towards the maximum allowable credits per semester. Audited courses do not apply toward V.A. benefits.

Graduate students: An audited course counts as one credit in the graduate student's allowable course load; however, tuition and fees will be assessed for the full number of credits for the course. See Graduate College.

Changing status from credit to audit requires dropping the course for credit and adding it as an audit on a schedule change request form. After day 5 of the semester, the drop will count toward the total allowable ISU drops. The drop appears on the student's permanent record and a schedule change fee will be assessed to the student's university bill.

Rights and privileges: Once enrolled in an audited course, auditors have the same rights and privileges as any student taking the course for credit. Their names appear on the class list with a notation that they are auditing the course. Audited courses do not appear on the student's permanent record except by special request from the student. A request form can be downloaded from the Office of the Registrar web site at www.registrar.iastate.edu/forms.

Undergraduate students need approval from the instructor as well as their advisor, and college; graduate students need approval from the instructor as well as their major professor and the Graduate College.

Audit Deadlines

In addition to the deadlines provided below, note that instructors must approve all audits.

**Full semester courses:**

**Adding an audit-day 10 deadline:**

- Through day 5 of classes: instructor approval required.

- Day 6-10: instructor, adviser approval required; schedule change fee applies.

- After day 10: only with extenuating circumstances, instructor, adviser, college approval required; schedule change fee applies.

Changing status from credit to audit-day 10 deadline:

- Through day 5 of classes: instructor approval required.

- Day 6-10: instructor, adviser, college approval required; schedule change fee applies.

- After day 10: only with extenuating circumstances, instructor, adviser, college approval required; schedule change fee applies.

**Partial semester or summer courses:**

Deadlines are determined based on the length of the course. For deadlines concerning partial term or summer courses, contact the Student Scheduling Office, 515-294-2331.
Independent Study
Most departments offer opportunities for independent study through a 490 course listing. Usually a minimum of 6 to 10 credits of coursework in the department is required before independent study is permitted. Students who are interested in this kind of experience in a particular department should check the catalog to determine the department’s prerequisites to register for 490. 490H sections are reserved for students in the University Honors Program.

Students should check with the department about procedures, in addition to meeting the prerequisites, for registering for 490. A written plan of study is prepared in advance with a faculty member who has agreed to supervise the student’s work, to evaluate progress and the final product, and to assign a grade. Initiation of the plan of study should occur prior to the semester in which enrollment is desired. Both the student and the instructor should agree on the number of credits for which the student will enroll, the amount and kind of work he or she will do for that credit, and the system by which she or he will be graded (A-F or S/F). Students should not expect to register for or add 490 credit without an instructor’s permission. Some colleges and/or departments have limits on the number of credits of 490 that may be applied toward graduation.

Progressing Toward a Degree
Classification
Classification (year in school) is determined by the number of credits completed and reported to the registrar, and is based on credit hours earned, not merely credit hours attempted. The grades F and NP and the marks I and X do not contribute toward credit hours earned and thus are not considered in determining year in school.

Classification in all colleges except Veterinary Medicine is as follows:

Sophomore: 30 credit hours earned
Junior: 60 credit hours earned
Senior: 90 credit hours earned

Students who have a bachelor’s degree and are working toward another undergraduate degree, licensure, or admission to a specific graduate or professional program, are typically classified as a senior.

Transfer students without a degree are classified on the basis of credits accepted by Iowa State University.

Veterinary medicine students are promoted from the first- to the second-, third-, and fourth-year classes based upon satisfactory completion of the required courses for each year. To be promoted to the second-year class, students must have a cumulative grade-point average of at least 1.67 for all courses in the first year of the veterinary medicine curriculum. To be promoted to the third- and fourth-year classes, students must have a cumulative grade-point average of at least 2.00 for all courses in the professional curriculum.

A student, who is attending Iowa State and decides not work toward an undergraduate degree, will be classified as a special student. Admission requirements and academic standards regulations are the same as regular students. Credits taken as a special student are applicable for undergraduate degree purposes if the student is admitted later as a regular undergraduate. Credits obtained as an undergraduate special student may not, however, be applied toward a graduate degree.

Students enrolled in the Intensive English and Orientation Program (IEOP) are classified as special students in the College of Liberal Arts and Sciences and usually are not permitted to enroll in academic courses until they have satisfied requirements for admission as regular students. Permission to enroll in one academic course may be granted under special circumstances.

Transfer of Credits
Credits presented from another institution are evaluated initially by the Office of Admissions to determine whether the courses are acceptable for transfer credit. In addition, credits applied toward a particular degree will be determined by the student’s college, based on relevance to the students’ program requirements as well as the level of performance deemed necessary for successful progress in that program. For example, courses that are deemed important to a program but were earned with less than a C grade may or may not be approved for a program. This policy also applies to students already enrolled at Iowa State University and to new transfer students. Grades earned in courses transferred to Iowa State University will not be used in calculating a transfer student’s Iowa State cumulative grade-point average.

A student who is admitted as a transfer from another college or university is required to have at least a 2.00 cumulative grade-point average for all transferable work taken elsewhere. If, due to special circumstances, a student is admitted with less than a 2.00 average, that student will have a transfer quality-point deficiency.

This deficiency will be added to any deficiency accumulated at Iowa State University and will be used to determine whether satisfactory progress toward a degree is being made. To graduate, students must earn sufficient quality points above a 2.00 at Iowa State University to offset any quality-point deficiency, including a transfer quality-point deficiency.

Students should consult with their academic advisers and the Office of Admissions before taking coursework at other colleges and universities to be certain the credits will transfer and will be applicable to their program of study. Students who believe that any transfer credits have not been correctly evaluated should consult with their academic adviser and with the Office of Admissions. Questions concerning how transfer credits are applied toward a degree program should be referred to the academic adviser and college office.

No more than 65 semester or 97 quarter credits earned at two-year colleges can be applied to a bachelor’s degree from Iowa State University. While there is no limit to the number of credits that may be transferred from a four-year institution, the last 32 semester credits before receiving a degree from Iowa State University must be completed at Iowa State University.

Iowa State University students who attend one of the other Iowa Regent universities under the Regent Universities Student Exchange Program will have the credits earned at the other university counted as resident credit and grades received included in their Iowa State University cumulative grade point average, even if the credits are included in the last 32 semester credits. For information on applying to the program see Index, Regent Universities Student Exchange Program.

Degree Planning - ISU Degree Audit
In addition to being properly registered, students are responsible for knowing the requirements for their degree and planning their schedule to meet those requirements. One way to monitor progress toward a degree is with the ISU degree audit.

Students may access their ISU degree audit through AccessPlus. The degree audit shows courses that have been completed, courses in which the student is currently enrolled, and graduation requirements that need to be completed for the student’s curriculum.

Students should use the degree audit information to help them review progress towards their degree(s), plan their course of study to complete degree requirements, and select courses for the next term. Graduation evaluators in the Office of the Registrar use the degree audit during the term a student will graduate to determine if the student will meet all degree requirements upon successful completion of the courses on the student’s schedule that term.

In addition, through AccessPlus, students may request a degree audit for any major available at Iowa State. The audit results will show how their completed and in-progress course work applies toward other majors or options offered at the University.

For further information about how completed courses fulfill degree requirements or how other courses will apply toward their degree requirements, students should see their adviser.

Two Bachelor’s Degrees
Students may receive two bachelor’s degrees if the requirements for each major (curriculum) are met and the total number of semester credits earned is at least 30 more than the requirements of the curriculum requiring the greater number of credits. This rule applies whether or
not the degrees are awarded at the same time. Students should have an academic adviser in each major (curriculum), with one adviser being designated as the registration adviser. Students should request approval to pursue two degrees by completing the form, Request for Double Major/Curriculum or Two Degrees. This form is available from advisers and classification offices. Each adviser will have access to the student’s information after this form has been processed. The appropriate department and college must approve each degree program.

Students who have earned advanced degrees and wish to earn a second Bachelor’s Degree may be eligible for a college waiver of certain basic and general education requirements. Students should contact the department offering the major for advice and appropriate planning.

**Double Major/Curriculum**

A double major is a program for a single degree in which all requirements for two or more majors (curricula) have been met. The majors (curricula) may be in different colleges or within the same college or department. The diploma and permanent record will designate all majors (curricula) that are completed at the same time.

To declare a double major (curriculum), students should complete the form, “Request for a Double Major/Curriculum or Two Degrees.” This form, available from advisers and classification offices, should be completed at least one term prior to graduation. One major (curriculum) should be designated as primary and the other secondary for purposes of record keeping, but the student’s rights and responsibilities are the same in both majors. The adviser of the primary major will serve as the student’s registration adviser, but both advisers will have access to the student’s information. Degree programs must be approved for each major (curriculum) by the appropriate department and college. One of the majors may subsequently be canceled using the same form.

Students in the College of Engineering are able to earn a degree with a second major/curriculum as long as the second major/curriculum is within another college, meets all requirements of the additional programs and contains a minimum of 15 additional credits beyond the requirements for a B.S. degree in engineering for each additional area of study. A student with multiple curricula within the College of Engineering is permitted to earn only multiple degrees. All requirements for each curricula must be met plus an additional 30 credits for each curricula being pursued beyond the curriculum which requires the most credits.

Students with a primary major in another college who wish to take a second major in the College of Liberal Arts and Sciences are not required to meet the Liberal Arts and Sciences General Education requirements. They must, however, meet all requirements for the major, including complementary courses. Students in the B.L.S. curriculum in the College of Liberal Arts and Sciences do not have majors.

**Second Major (Curriculum) Completed after the Bachelor’s Degree**

After receiving a bachelor’s degree, a person may wish to complete all requirements for another major (curriculum). Approval of the department of the second major (curriculum) is needed before study for the program is begun. At the completion of the program a notation will be made on the permanent record (transcript), but no change will be made on the diploma received at the time of graduation. A degree program must be approved for the second major/curriculum by the department and by the dean’s office.

**Changing Curriculum or Major**

A student’s freedom to change their major, and the procedure that should be followed, depend on the student’s academic standing and on policies of individual colleges as approved by the provost.

1. If students are not on academic probation (P) and have never been dismissed and reinstated, they may change their major by consulting first with their adviser. If, however, they have been on academic probation in the past, students are subject to regulation 4 below. Procedures for changing curriculum or major are as follows:
   1. If the change involves majors within the same college, they should check with the college office to obtain instructions as to how to make the change.

2. If the change involves majors in different colleges, they should obtain a Change of Curriculum/Major form and their file from their adviser, present these materials to the student services office of their present college, then to the student services office of the college to which they are transferring, and finally to the office of their new major.

3. Students on academic probation (P) must first obtain permission to enter the new major. Permission comes from the dean of the college responsible for that major in consultation with the department head. If permission is granted, students should then follow the procedures described above. If they are on academic probation and want to transfer to another college in the university, they must do so before the last day to drop a course in period 2 (see Making Schedule Changes).

4. Students who have been reinstated may not transfer to another college within the university during the first term following reinstatement, and they may not at any time transfer back to the college that originally dismissed them without the permission of the academic standards committee of that college.

5. Students who transferred from one college to another while on academic probation, (P) may not transfer back unless they have the permission of the academic standards committee of the college from which they originally transferred.

**Declaring a Minor**

Many departments and programs in the university specify requirements for an undergraduate minor. A record of requirements completed appears on students’ transcripts. All minors require at least 15 credits, including at least 6 credits in courses numbered 300 or above taken at Iowa State University. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. Courses taken for a minor may not be taken on a pass-not pass basis. See /collegescurricula/#minors for additional information regarding policies which govern minors. To declare a minor, students must submit a completed Request for a Minor form to their college office at least one term before graduation. The minor may be from the catalog under which the student is graduating or a later catalog.

**Undergraduate Certificates**

An undergraduate certificate provides a way to give formal recognition of focused study in a specialized area that is less comprehensive than required for an undergraduate major.

An undergraduate certificate has the following requirements and understandings:

1. A minimum of 20 credits, with at least 12 credits taken at ISU which are applicable towards the undergraduate certificate requirements
2. At least 9 of the credits taken at Iowa State University must be in courses numbered 300 or above
3. At least 9 credits used for a certificate may not be used to meet any other department, college, or university requirement for the baccalaureate degree except to satisfy the total credit requirement for graduation and to meet credit requirements in courses numbered 300 or above
4. A student may not receive both an undergraduate major and a certificate of the same name
5. For students earning an ISU baccalaureate degree, a certificate is awarded concurrent with or after the ISU baccalaureate degree
6. A certificate is not awarded if the baccalaureate requirements are not finished
7. After receiving a baccalaureate degree from any accredited institution, a student may enroll at ISU to earn a certificate
8. Courses taken for a certificate may not be taken on a pass-not pass basis
9. A cumulative grade point average of at least 2.00 is required in all courses taken at ISU towards the certificate
10. A notation of a completed certificate will be made on a student’s transcript and a printed certificate will be awarded.
Graduation
Seniors must file a graduation application with the Graduation Office, 214 Enrollment Services Center. Students will be notified of their graduation status approximately mid semester of their graduation term. For graduation application instructions and deadlines, go to www.registrar.iastate.edu/graduation/application.html

Iowa State University commencement ceremonies are held at the end of fall and spring semesters. Undergraduate students expected to graduate at the end of summer semester are invited to participate in the spring ceremony preceeding their graduation term or the fall ceremony following their graduation term. In addition to the formal University commencement ceremony, the undergraduate colleges host graduation activities take place at the end of fall and spring semesters. For more information see www.registrar.iastate.edu/graduation/

Verification of satisfactory final grades will be completed approximately two weeks after the end of the semester and diplomas will be mailed to all successful degree candidates. Students must ensure the following before they can graduate:

1. Registration for the term has been completed and the date of graduation is correct on the degree audit printout.
2. Sufficient credits, acceptable toward graduation, have been earned to meet the minimum requirements for their curriculum. (Some examples of credit not acceptable toward graduation are: elective credits beyond those allowed in a curriculum, credits earned in passing the same course more than once, more than four credits of Athletics 101, and credit in two courses for which the catalog states that only one may count toward graduation.)
3. They have achieved a set of communication competencies established by the department as appropriate for the major.
4. A cumulative grade point average of at least 2.00 was earned in all work taken at Iowa State; and student has met all special grade point average requirements established by their college, department, or program in specified courses.
1. Students admitted from another college or university with a quality-point deficiency, must have earned sufficient quality points above a 2.00 at Iowa State to offset their transfer grade point deficiency.
2. Students who have taken work at another college or university prior to or after having been a student at Iowa State, must have submitted a transcript of all such college study attempted to the Office of Admissions. This work must average 2.00 or the deficiency of quality points will be assessed against the student. Failure to submit such a transcript is grounds for dismissal.
5. Incompletes in courses required for graduation have been removed by midterm of the term of graduation.
6. At least 32 credits have been earned in residence at Iowa State University, and the final 32 credits were taken at Iowa State. (Six of the last 32 credits may be transferred to Iowa State, with prior permission of their major department.) Iowa State University must receive an official transcript of all transfer work by midterm of the term of graduation.
7. Outstanding financial obligations owed the university have been paid in full. Students who owe an outstanding obligation to the university will have a hold placed on their records and they will not receive their diploma or transcript. If students have questions about this policy, they should contact the graduation area of the Office of the Registrar.

Examinations
Examinations are one of the most common ways instructors assess student performance. In order that examinations can be a useful part of the educational process, the following policies have been instituted:

1. One purpose of examinations is to help students’ learning. Therefore, examinations should be evaluated as soon as possible after they are given and the results should be made available to the students in a timely way to enhance learning.
2. All tests and examinations administered between the beginning of the term and final examination week shall be held during a regularly scheduled lecture or laboratory class period for that course. A department may obtain approval to administer a separately scheduled examination if all of the following criteria are met:
   1. The course is multi-sectioned.
   2. A common departmentally developed examination will be administered to all students in all sections at the same time.
3. The test scores will be used as a basis for a uniform grading procedure for all sections of the course. Requests to hold separately scheduled examinations must be made to the registrar and approved by the provost in time to be announced in the Schedule of Classes to allow students to plan in advance. Only under unusual circumstances will a course be approved for separately scheduled examinations if the deadline is past to include notification in the Schedule of Classes. Whenever a separately scheduled examination is administered, a regular class meeting during that week shall be omitted. Students who are unable to take a separately scheduled examination at the scheduled time indicated in the Schedule of Classes, because of a course conflict or other legitimate reason must notify the instructor in advance and must be given the opportunity to be examined at another time mutually convenient for the student and the instructor. The instructor shall determine whether to administer the same examination or an alternate examination, or use an alternate assessment procedure.
3. At the end of the semester, a week is set aside for final examinations or other term evaluations, with a two-hour period normally scheduled for each course. The following policies govern the responsibilities of students and faculty members during this week:
   1. Final exams may not be given at a time other than that for which the exam is scheduled by the registrar. An instructor may not give a final exam prior to final exam week nor change the time of offering of the final examination as it appears in the final exam schedule. Permission to change the time for which an exam is scheduled may be given only by the dean of the college. If the instructor elects not to give a final exam in a course of two or more credits, the class is required to meet at the scheduled final exam period for other educational activity such as a review of the course or feedback on previous exams.
   2. Final exam periods are determined according to the regularly scheduled meeting time of the class. However, certain courses are assigned special group exam times so that several sections of the same course may be tested together. The criteria for establishing special group exams are similar to those listed for separately scheduled exams listed in number 2 above. If this results in conflicting group examination periods, students should inform the instructor in charge of the first of the two conflicting courses as listed on the final exam schedule within the special groups in question; that instructor is responsible for arranging a special examination or making some other adjustment.
   3. Evening courses with lectures scheduled at 6:00 p.m. or later should give their examinations during finals week from 7:00-9:00 p.m. on the day the class normally meets. If this exam conflicts with an evening group exam, the instructor responsible for the latter must arrange a special examination for any students who have a conflict.
4. If unusual circumstances involve the need for students to change the time of their final examination, they must obtain the approval of the instructor of the course.

Evaluation of Academic Progress
Evaluation Procedures
It is university policy that the instructor shall inform the students at the beginning of each course of the evaluation procedures planned for use in the course.

Retention of Records
Records of all graded work must be retained by the instructors until mid term of the semester following completion of a course or until all pending appeals and incompletes are resolved, whichever is later. Instructors leaving the university must file records of all graded work with their department office before departure.

Retention of Records
Records of all graded work must be retained by the instructors until the educational process, the following policies have been instituted:

1. One purpose of examinations is to help students’ learning. Therefore, examinations should be evaluated as soon as possible after they are given and the results should be made available to the students in a timely way to enhance learning.
2. All tests and examinations administered between the beginning of the term and final examination week shall be held during a regularly scheduled lecture or laboratory class period for that course. A department may obtain approval to administer a separately scheduled examination if all of the following criteria are met:
   1. The course is multi-sectioned.
   2. A common departmentally developed examination will be administered to all students in all sections at the same time.
3. The test scores will be used as a basis for a uniform grading procedure for all sections of the course. Requests to hold separately scheduled examinations must be made to the registrar and approved by the provost in time to be announced in the Schedule of Classes to allow students to plan in advance. Only under unusual circumstances will a course be approved for separately scheduled examinations if the deadline is past to include notification in the Schedule of Classes. Whenever a separately scheduled examination is administered, a regular class meeting during that week shall be omitted. Students who are unable to take a separately scheduled examination at the scheduled time indicated in the Schedule of Classes, because of a course conflict or other legitimate reason must notify the instructor in advance and must be given the opportunity to be examined at another time mutually convenient for the student and the instructor. The instructor shall determine whether to administer the same examination or an alternate examination, or use an alternate assessment procedure.
3. At the end of the semester, a week is set aside for final examinations or other term evaluations, with a two-hour period normally scheduled for each course. The following policies govern the responsibilities of students and faculty members during this week:
   1. Final exams may not be given at a time other than that for which the exam is scheduled by the registrar. An instructor may not give a final exam prior to final exam week nor change the time of offering of the final examination as it appears in the final exam schedule. Permission to change the time for which an exam is scheduled may be given only by the dean of the college. If the instructor elects not to give a final exam in a course of two or more credits, the class is required to meet at the scheduled final exam period for other educational activity such as a review of the course or feedback on previous exams.
   2. Final exam periods are determined according to the regularly scheduled meeting time of the class. However, certain courses are assigned special group exam times so that several sections of the same course may be tested together. The criteria for establishing special group exams are similar to those listed for separately scheduled exams listed in number 2 above. If this results in conflicting group examination periods, students should inform the instructor in charge of the first of the two conflicting courses as listed on the final exam schedule within the special groups in question; that instructor is responsible for arranging a special examination or making some other adjustment.
   3. Evening courses with lectures scheduled at 6:00 p.m. or later should give their examinations during finals week from 7:00-9:00 p.m. on the day the class normally meets. If this exam conflicts with an evening group exam, the instructor responsible for the latter must arrange a special examination for any students who have a conflict.
4. If unusual circumstances involve the need for students to change the time of their final examination, they must obtain the approval of the instructor of the course.

Evaluation of Academic Progress
Evaluation Procedures
It is university policy that the instructor shall inform the students at the beginning of each course of the evaluation procedures planned for use in the course.

Retention of Records
Records of all graded work must be retained by the instructors until mid term of the semester following completion of a course or until all pending appeals and incompletes are resolved, whichever is later. Instructors leaving the university must file records of all graded work with their department office before departure.
5. If a student has three examinations scheduled on the same calendar day and wishes to change one to another day, the instructor of the course having the smallest number of students is responsible for arranging an alternate examination time for the student unless make-up exam times are available in one of the other courses.

6. All faculty members and teaching assistants with instructional or grading responsibilities are considered to be on duty throughout the entire final examination week and are expected to be available to students during that week for discussion of any matters pertaining to the final examination and final grade or to other aspects of the course.

**Dead Week**

The last week of fall and spring undergraduate classes has been designated Dead Week by the Government of the Student Body and Iowa State University. The intent is to provide students with time for review and preparation for final examinations. Therefore, no student organization registered with the Student Organization Office may hold meetings or sponsor events without the expressed permission of Program Coordinator in the Student Activities Center, Memorial Union. For academic programs, the last week of classes is considered to be a normal week in the semester except that in developing their syllabi faculty shall consider the following guidelines:

1. Mandatory final examinations in any course may not be given during Dead Week except for laboratory courses and for those courses meeting once a week only and for which there is no contact during the normal final exam week. Take-home final exams and small quizzes are generally acceptable. (For example, quizzes worth no more than 10 percent of the final grade and/or that cover no more than one-fourth of assigned reading material in the course could be given.)

2. Major course assignments should be assigned prior to Dead Week (major assignments include major research papers, projects, etc.). Any modifications to assignments should be made in a timely fashion to give students adequate time to complete the assignments.

3. Major course assignments should be due no later than the Friday prior to Dead Week. Exceptions include class presentations by students, semester-long projects such as a design project assignment in lieu of a final, and extensions of the deadline requested by individual students.

Instructors are reminded that most students are enrolled in several courses each semester, and widespread violation of these guidelines can cause student workloads to be excessive as students begin their preparation for final examinations. Students are reminded that their academic curriculum is their principal reason for being in college and they have a responsibility to study in a timely fashion throughout the entire semester.

**Grading System**

Grades represent the permanent official record of a student’s academic performance. The grading system at Iowa State operates according to the following regulations:

1. Student performance or status is recorded by the grades and marks described below. A student’s grade point average is calculated on the basis of credits earned at Iowa State with the grades and quality points shown below. Credits earned with R, S, or T are not used in calculating the grade point average but may be applied toward meeting degree requirements. A cumulative grade point average of 2.00 is required for a bachelor’s degree.

2. Incomplete Marks - If the instructor and student agree that an Incomplete is appropriate, they should complete an Incomplete (I) Contract (downloadable from the Office of the Registrar forms web site) to document the reason for the I, the requirements for resolving it, and the date by which it must be resolved, not to exceed one calendar year or the student’s graduation term (whichever is earlier). If the student is not available to sign the Incomplete (I) Contract, the instructor must document the conditions for the Incomplete by communicating directly with the student by e-mail or postal mail. A copy of this communication must be retained by the instructor until after the I is resolved in case there are

*See Pass Not Pass Grading*

**See Incomplete Marks (below)**
any questions in the future regarding the terms of the Incomplete. The instructor also needs to enter the Incomplete (I) electronically as part of the end of term final grade submission.

Resolving an Incomplete: When a student completes the requirements specified on the Incomplete Contract, the instructor submits the appropriate grade, which becomes part of the student’s cumulative, but not term, grade-point average. The grade does not replace the I on the record. The I remains on the record for the applicable term.

A final course grade, once submitted to the registrar, may not be changed to an Incomplete except to correct an error at the request of the instructor, and with the approval of the instructor’s department head and the dean of the instructor’s college. The Incomplete (I) Contract should be used by the instructor to document the conditions for the Incomplete as specified above. The Grade Report to the Registrar form should be used to initiate the request to change the grade to an Incomplete. The Grade Report form should be completed and forwarded by the instructor to his/her Dean for approval. The Dean will forward the Grade Report form to the Office of the Registrar if approved.

Incomplete in all courses must be resolved by the middle of the student’s term of graduation. Repeating a course will not resolve an I mark. A mark of I will automatically change to a grade of F after one calendar year (whether or not the student was enrolled during the period).

3. To change a grade or mark already reported to the registrar, the instructor submits the Grade Report to the Registrar form. This form is used for resolving an I with a grade, for correcting an instructor error, or for the late report of a grade.

4. Midterm Grades. The registrar will collect C-, D, and F midterm grades and nonattendance notifications from the instructor and report this information to students and their advisers using AccessPlus. In addition to submitting the midterm grades, the instructor is responsible for informing the class of the basis on which they were calculated.

The purpose of midterm grades is to provide the student and adviser with a timely warning that the student’s academic performance to that point in the course may be lower than desirable. Students who receive midterms are encouraged to discuss their academic performance with the course instructor and their adviser.

5. Grades in all courses attempted remain on each student’s record. If a course is repeated, the record will show the grade obtained on the initial attempt as well as grades received on subsequent attempts.

6. The cumulative grade point average is calculated by dividing the total number of quality points earned by the total number of credits in all courses attempted. Grades of S, P, NP, and T are not counted in calculating the grade point average. If a course is repeated, the cumulative grade point average is calculated according to the process described in item 6(a) below.

7. Repeating Courses.

a. The most recent grade for a course a student repeats will be used in computing the student’s cumulative grade point average rather than the previous grade(s), up to a limit of 15 credits. (This could result in a lowered grade point average if the second grade is lower than the first, or even loss of credit if the grade is lowered to an F.) All grades will remain on the student’s record.

b. Students may repeat any course for which an F grade or any passing grade except P or S was received, but they may not elect to repeat the course under the Pass-Not Pass system.

c. Beyond 15 credits of repeats, both grades will be included in computing the cumulative grade point average.

d. Courses should be repeated as soon as possible, preferably within three semesters in residence, because of changes that occur with course updating, change in course number, or revision in the number of credits.

e. Approval to repeat a course in which the course number or number of credits has changed must be noted on a Designation of Repeated Course form, which can be obtained from departmental offices. This form must be signed by the head of the department offering the course and by the student’s adviser, and then taken to the Office of the Registrar. Deadlines for filing repeated course forms for full-semester and half-semester courses are published in the university calendar.

f. Transfer students may repeat courses at Iowa State University for which a D or F was received at another institution. They must process a Designated Repeat Form indicating they are repeating the course to reduce a transfer deficiency. Such repeated credits will count toward the 15-credit request limit and will affect only their transfer deficiency.

g. A student who has earned an F at Iowa State University may repeat the course at another institution and the credits earned may be applied toward graduation at Iowa State, but the grade earned will not be used in computing a cumulative grade point average.

8. Students who want to protest a grade submitted by an instructor should follow the procedures described in the section, Appeal of Academic Grievances.

Academic Progress

Each college has an academic standards committee that is responsible for monitoring the academic progress of all undergraduate students in that college, based on policies and minimum requirements set by the Faculty Senate Committee on Academic Standards and Admissions and ratified by the Faculty Senate.

Individual college faculties may, with the approval of the Faculty Senate Committee on Academic Standards and Admissions, set additional program admission and curriculum requirements that are more stringent than those established for the university. These additional requirements must be reviewed at least every third catalog by the college academic standards committee to determine if the requirements should be continued. Requirements approved by the college academic standards committees will then be forwarded to the Faculty Senate Committee on Academic Standards and Admissions for final approval.

The college committees are responsible for actions involving individual students with respect to placing students on academic probation, dismissing students from the university for unsatisfactory academic progress, and reinstating students who have been dismissed.

For questions concerning interpretation and application of the rules governing academic progress, students should contact the chair or secretary of their college academic standards committee in their college office.

The university’s academic standards rules are presented below. In addition to taking action based on these rules, a college academic standards committee may also place a student on academic probation or dismiss a student from enrollment in the university when, in the college committee’s judgment, the student’s academic performance or progress toward a degree is exceptionally deficient. Likewise, a college committee may, under exceptional circumstances, exempt individual students from the application of these rules. Students who participate in the Regent Universities Student Exchange Program, or in a similar program where the credit taken at the other school will be considered as resident credit and the grades included in the student’s ISU cumulative grade point average, are subject to Iowa State University’s academic standards.

Academic Probation Policy

Students are placed on academic probation status as a warning that their academic progress is not satisfactory and that they should take steps to improve their academic performance to avoid dismissal from the university.

Students who are placed on academic probation should immediately seek assistance in academic improvement from such sources as academic advisers, instructors, the Student Counseling Service, and the Academic Success Center.
Academic Warning, Probation, and Dismissal

Continued enrollment at Iowa State University depends upon an undergraduate student maintaining satisfactory academic progress toward attaining a degree. To assist students in maintaining satisfactory progress, Iowa State University has adopted academic standards designed to provide early identification of students who are experiencing academic difficulty, and to provide timely intervention through academic advising and academic support programs.

Academic standing at Iowa State University is dependent upon the total number of credits a student has attempted or earned, the student’s semester grade point average (GPA), the student’s cumulative ISU GPA, and the student’s transfer GPA (if below 2.00.)

Academic Warning

While a warning (W) is the least severe of the negative academic actions, it serves as a reminder that future academic performance below 2.00 could result in more serious consequences. In fact, a student on warning whose subsequent term GPA is below a 2.00 will be placed on probation (P) the following term.

Students who receive an academic warning are required to develop a plan for academic improvement in consultation with their academic adviser or the Academic Success Center. A student who is subject to both academic warning and academic probation will be placed on academic probation. The academic warning is not a part of the student’s permanent academic record.

Students will receive an academic warning (W) at the end of any fall or spring semester when they earn a GPA of 1.00 – 1.99 for that semester. At the end of the next fall or spring semester of enrollment, one of the following actions will be taken for students on academic warning status:

- Students will be placed on academic probation if they earn less than a 2.00 GPA for the next fall or spring semester, or
- They will be removed from warning status if they earn at least a 2.00 semester GPA for the next fall or spring semester and they are not subject to academic probation based on cumulative GPA (over 75 credits).

See Summer Academic Standards Regulations section for how summer grades affect warning, probation, or dismissal status.

Academic Probation

Academic probation is an indication of very serious academic difficulty which may result in dismissal from the university. Students may be placed on academic probation as a result of either semester GPA, cumulative GPA, or both.

Students who are placed on academic probation are required to develop a plan for academic improvement in consultation with their academic adviser which may include referral to the Academic Success Center. Academic probation status is not a part of the student’s permanent academic record.

Students will be placed on academic probation (P) at the end of a semester/term for either of the following two reasons:

1. Semester GPA: Students who earn less than a 1.00 at the end of any fall or spring semester, or less than a 2.00 two consecutive semesters, will be placed on academic probation. Students will not be placed on academic probation at the end of the summer term due to summer term GPA only.

2. Cumulative GPA: Students with 75 or more credits attempted or earned, whichever is greater, will be placed on academic probation at the end of any fall or spring semester or summer term when their cumulative GPA is less than 2.00. Students with 75 or more credits attempted or earned who have a transfer GPA < 2.00 will be placed on academic probation at the end of any fall or spring semester or summer term when their combined transfer/ISU cumulative GPA is less than 2.00.

At the end of the next fall or spring semester of enrollment, one of the following actions will be taken for students on academic probation status:

- Students will be academically dismissed if they fail to earn at least a 2.00 semester GPA. At the end of any spring semester, students in dismissal status may enroll for summer term. (See Summer Option for Students in Dismissal Status in the Summer Academic Standards Regulations section.)
- Students will continue on academic probation if they earn at least a 2.00 semester GPA but are subject to continued academic probation based on their cumulative GPA (over 75 credits).
- Students will be removed from probation if they earn at least a 2.00 semester GPA and are not subject to continued academic probation based on their cumulative GPA (over 75 credits).

See Summer Academic Standards Regulations section for how summer grades affect warning, probation, or dismissal status.

Academic Dismissal

Students who do not meet the requirements of their academic probation are academically dismissed from the university. Each College Academic Standards Committee is responsible for final decisions regarding the academic status of students in that college, and any appeals to academic dismissal actions are considered by the college committee. Once dismissed, students are not allowed to reenroll at Iowa State University until they have been academically reinstated. (See section on reinstatement.) Academic dismissal is placed on the student’s academic record as a permanent notation. The official transcript of a student who has been dismissed includes a “in good standing” notation.

Summer Academic Standards Regulations

Students who are newly placed or continued on academic probation (P) at the end of the previous semester may enroll for the summer term without being in jeopardy of academic dismissal from the university at the end of that summer term.

Summer Combined Term GPA:

All students who attend summer session will have their academic status reassessed at the end of the summer based on the combined (not averaged) grade summaries of their previous term of attendance and summer term. Academic status (warning or probation) after summer session will be based on the resulting combined term GPA. The academic status resulting from the summer combined term GPA supersedes the academic status at the end of the previous term.

For students who have remaining designated repeat credits, courses taken in the previous semester and repeated in summer will be calculated as designated repeats in the combined term GPA.

The combined term GPA (summer plus preceding term) will not appear on the student’s grade report or permanent record.

Summer term GPA alone cannot determine academic status. Students who initiate enrollment at Iowa State during the summer will not be placed on warning or probation regardless of their academic performance.

Summer Cumulative GPA:

A student who was on academic probation (P) at the beginning of summer term based on cumulative GPA, who raises his or her cumulative GPA to over a 2.0 at the end of the summer term shall be removed from probation status at the end of the summer term.

A student with 75 or more credits attempted or earned, whichever is greater, will be placed on academic probation (P) at the end of the summer term if his or her cumulative GPA is less than 2.00.

A student with 75 or more credits attempted or earned who has a transfer GPA < 2.00 will be placed on academic probation (P) at the end of any summer term if his or her combined transfer/ISU cumulative GPA is less than 2.00.

Summer Option for Students in Dismissal Status:

A student considered for academic dismissal at the end of spring semester will be permitted to enroll for the summer term. The combined spring/summer GPA will be used to determine whether the student...
should be permitted to continue his/her enrollment after the summer term. If the resulting combined term GPA is not 2.00 or greater, the student will be academically dismissed.

Additional Academic Standards Regulations
Changing colleges: A student on academic probation (P) may transfer to another college within the university only with the permission of the department chair of the new department and the dean of the new college. For students on academic probation (P), transfer during period 3 (i.e., after the last day to drop a course) may be approved by the department chair of the new department and the dean of the new college only under exceptional circumstances.

A student who has transferred from a college while on academic probation (P) cannot transfer back unless permission is granted by the academic standards committee of the original college.

A student who is in dismissal status at the end of spring and chooses to exercise the Summer Option may not change colleges during the summer.

Withdrawal: A student on academic probation (P) who withdraws during period 3 will be academically dismissed at the end of term the student withdraws, except under extenuating circumstances as judged by the college academic standards committee.

Reinstated students: Reinstated students should also see the section on Reinstatement.

Veterinary Medicine: Additional rules for minimum satisfactory progress are in effect.

Special students: Students matriculated in this classification category are governed by the regular academic progress regulations. Furthermore, by special action of their college academic standards committee, additional standards may be required.

Reinstatement
The procedures delineated in this section apply to students who were dismissed from Iowa State University for academic reasons. Students who left Iowa State in good academic standing and who are seeking reentry should see Index, Reentry for more information.

1. Reinstatement is not automatic. Students who have been dismissed for academic reasons should contact the dean’s office in the college they wish to enter for instructions specific to that college.

   The college Academic Standards Committee reviews each petition and other relevant information, and reinstatement is based upon that review. As part of the petition process, students must submit a plan for academic success that identifies the causes of their poor academic performance and demonstrates that they have taken actions to avoid or eliminate these causes.

2. Students can only be reinstated after at least one academic semester has elapsed since they were academically dismissed. The summer session is not a semester for the purpose of being out of school one semester.

3. Students who have been dismissed from enrollment two or more times are not eligible for reinstatement until at least two academic semesters have elapsed since their last academic dismissal.

4. Students who were dismissed by one college and subsequently reinstated by another college cannot transfer back to the original college unless permission is granted by the Academic Standards Committee of the original college. This procedure applies regardless of the student’s academic standing when the transfer is requested.

5. To be considered for reinstatement to the university, students must submit a petition to the Academic Standards Committee of the college in which they desire to enroll at least 45 days before the beginning of the semester. Students who have not been enrolled for a period of 12 or more months or who are international students must also file a reentry form prior to their return. For more information see the Reentry web site at http://www.registrar.iastate.edu/info/reentry.html. (Students dismissed for the second time and requesting reinstatement in the College of Liberal Arts and Sciences must submit their petition 70 days before the beginning of the semester.)

6. As a condition of reinstatement, students will reenter on academic probation and must accept whatever additional requirements are stipulated by the college Academic Standards Committee. Examples include full- or part-time status, specified credit hours, specific courses, specific GPAs, restriction on choice of major, and required counseling.

Student Appeal
Students may appeal a decision regarding their academic status if they believe that new information can be provided or extenuating circumstances exist that would alter the application of any rule in this section. The appeal should be made in writing to the Academic Standards Committee of the college in which the student is enrolled. The written appeal must include the reasons for the appeal and the evidence to substantiate these reasons.

The student should initiate the appeal process by contacting the secretary of the college Academic Standards Committee in the administrative office of her or his college immediately upon receipt of notification of the committee’s action, and at least ten calendar days before the beginning of the semester. The secretary will then inform the student of the deadline for submission of the written appeal.

If the student is dissatisfied with the committee’s action, he or she may submit an appeal in writing to the dean of her or his college within seven calendar days after they are notified of the committee’s action. The dean must respond in writing within seven calendar days of receipt of the appeal.

If the issue is not resolved within the college, further appeals may be made in writing to the provost and subsequently to the president of the university. Appeals beyond the college level will, however, be considered only if based on one or both of the following contentions: (a) appropriate procedures were not followed at the college level; (b) academic rules were not applied correctly at the college level.

Academic Renewal Policy
Students who are returning to Iowa State University to pursue an undergraduate degree after an extended absence may request permission to remove one or more of their complete academic terms from future degree and GPA considerations.

1. Eligibility. To be eligible for academic renewal consideration, students must meet these requirements:

   1. Students must not have enrolled at Iowa State University for five or more consecutive years.
   2. Students must not have graduated from Iowa State University.
   3. Students must currently be in good academic standing. (If the student was previously dismissed, he or she must be reinstated.)

2. Conditions. Academic renewal is based on the following conditions:

   1. All courses and credits that were taken during the chosen terms will be removed from consideration for GPA and degree requirements. Students may not combine courses from multiple terms to comprise the semester(s) or quarter(s) dropped. Degree requirements met during the dropped terms will ordinarily have to be repeated.
   2. Renewal may be applied only to academic terms completed prior to the students’ extended absence.
   3. All courses and grades for the chosen terms will remain on the students’ academic record.
   4. Designated repeats, drops and P/NP options will be reinstated for the terms dropped.
   5. Students who have used all of their drop options will be given one extra drop.
   6. Students may be granted only one academic renewal. To be eligible for a degree after academic renewal is granted, students must complete a minimum of 24 credit hours at Iowa State University.

3. Procedures.

   1. Students should discuss their desire to pursue academic renewal with an adviser in the college they wish to enter.
   2. The student must complete the Academic Renewal Petition form available from www.registrar.iastate.edu/forms.
3. After the form is signed by the student and academic adviser, it is submitted to the Records area in the Office of the Registrar, 214 Enrollment Services Center.

**Satisfactory Academic Progress for Financial Aid Recipients**

In order to remain eligible to receive financial aid from the student aid programs listed below, a student must meet both quantitative and qualitative academic standards as described within this policy. These standards are minimum expectations; specific aid programs may require a higher level of progress. A student not in compliance will be unable to receive aid from these programs until the deficiency has been corrected. Progress toward a degree will be reviewed each term and enforced at intervals no longer than one year. The programs affected by this policy are:

- Federal, state, and institutional grants
- Federal student and parent loans
- Some private student loans

1. The qualitative academic standard for undergraduate students is to maintain a cumulative grade point average of a 2.0 or higher.

2. The quantitative academic standard for full-time undergraduate students is described below:
   a. Duration of eligibility. Students may receive federal, state, and institutional aid for a maximum of six academic years or twelve semesters. Students who have not accumulated sufficient credit hours at the end of this time period to complete their course of study will not be eligible to continue to receive financial aid.
   b. Annual credit hours to be earned. An undergraduate student who receives financial aid from one or more of the programs cited above must complete credit at a rate at least equal to the scale below, where the numbers in the top row indicate academic years completed, and those in the bottom row indicate credit hours required:

<table>
<thead>
<tr>
<th>Academic Years Completed</th>
<th>Credit Hours Required</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>15</td>
</tr>
<tr>
<td>2</td>
<td>30</td>
</tr>
<tr>
<td>3</td>
<td>51</td>
</tr>
<tr>
<td>4</td>
<td>72</td>
</tr>
<tr>
<td>5</td>
<td>96</td>
</tr>
<tr>
<td>6</td>
<td>120</td>
</tr>
</tbody>
</table>

3. The quantitative academic standard for all part-time students is as follows:
   a. The duration of eligibility for part-time students is the same as above, but adjusted by the rate of attendance. For example, a student with a maximum duration of six years who is attending school half-time would have the duration of eligibility adjusted to twelve years.
   b. Part-time students who are otherwise eligible for financial aid must maintain the academic standards or rate of completion as stated above, adjusted by the number of hours attempted at the time the financial aid was disbursed.

9 to 11 credit hours = 3/4 time
6 to 8 credit hours = 1/2 time

4. Regaining eligibility. If a student is denied financial aid because of failure to comply with the above standards, the additionally required credit must be earned at the student’s own expense at Iowa State University, or the student must transfer sufficient hours taken at another institution to make up the deficiency.

5. Transfer students. A student transferring to Iowa State University for the first time will be treated as a first-term student and will not be held responsible for previous terms or credit hours taken at former institutions. If a student attends Iowa State University, transfers to another institution, and then transfers back to Iowa State, the credits earned at the other institution will be added to the student’s total earned credit hours.

6. Noncredit courses. Noncredit courses may be converted to credit hours by translating weekly contact hours as defined by the Office of the Registrar.

7. Appeals. Students ineligible for financial aid as a result of this policy, or ineligible for any other reason, may appeal this decision by submitting in writing extenuating circumstances beyond their control that affected their progress to the Office of Student Financial Aid. Forms for this purpose are available on the Student Financial Aid web site at www.financialaid.iastate.edu. The appeal must be signed by the student’s academic adviser. If this appeal is denied, a further appeal may be made to a committee composed of the chair of the University Financial Aid Committee, the chair of the University Academic Advising Committee, and the director of Student Financial Aid. Appeals of other financial aid decisions, including loss of athletic grants-in-aid, shall also follow this procedure.

**8. General Information and Definitions**

a. Incompletes, repeated courses, withdrawals. A student who receives an Incomplete, repeats a course, or withdraws may continue to receive financial aid upon reentering the university as long as the student completes the required credit hours for each academic school year and maintains the minimum grade point average standards. However, the duration of eligibility will not be extended for a student who withdraws or repeats a course. (See the section Duration of Eligibility.)

b. Exceptions to the policy.

1. Veterinary Medicine students. For those students enrolled in the College of Veterinary Medicine, eligibility will be based on the academic criteria of the college.

2. All other Graduate students. For academic standing and time-to-degree standards please see the Graduate College Handbook.

c. Academic school year. This includes the summer session and regular semesters within any 12-month period. Credits earned during the summer session will be included when totaling credit hours earned each academic year.

d. Changes in program of study. The duration of eligibility will not be extended for a student who changes from one program of study to another. (See Duration of Eligibility, in the section, Satisfactory Academic Progress for Financial Aid Recipients.)

These academic progress criteria are defined in minimal terms. If the student earns only the minimum credit hours for financial aid eligibility, the student’s total eligibility for particular programs may be exhausted prior to degree completion. (See the Duration of Eligibility and credit hour earning scale.) In addition, the student’s college or department may require more credit hours than required by this policy.

**Sources of Help with Academic Problems**

If students are having trouble in a course, the following persons and places may be able to provide help:

1. The instructor of the course should be the primary sources of assistance to enhance the student’s academic achievement in the course. Students are encouraged to visit the instructor during stated office hours and seek individual assistance from the instructor if that is not possible.

2. Another valuable source of support is the student’s academic adviser, who often can help clarify academic issues and can recommend support services or remedial strategies.

3. The Academic Success Center in the Hixson-Lied Student Success Center has a collection of services such as tutoring, supplemental instruction (SI), the academic success course, learning lab, disability resources, and workshops designed to help students reach their academic goals.
4. The office of the department that offers the course may have a list of persons qualified to provide tutoring services for the course. They also may have help rooms or other support programs. The locations of the department offices are listed in the front of the ISU Directory.
5. The Student Counseling Service provides professional counseling services for students with problems which affect academic performance.

**Appeal of Academic Grievances**

Students who believe a faculty member (in his or her academic capacity) has behaved unfairly or unprofessionally may have their grievance reviewed through the procedure described below. A student may not initiate an appeal more than one year following completion of the course, and may not initiate the appeal of a course grade beyond midterm of the semester following completion of the course.

Prior to initiating a formal appeal, a student may wish to discuss the situation informally with the Dean of Students or designee, who can offer advice as to the most effective way to deal with it.

Grievances arising out of classroom or other academic situations should be resolved, if at all possible, with the student and the instructor involved. If resolution cannot be reached, or if the grievance involves sexual or racial harassment and the student prefers not to deal directly with the instructor, the student should discuss the grievance with the instructor’s department chair and submit it in writing to him or her. The department chair will investigate the grievance, including discussing it with the instructor involved and/or referring it to a departmental grievance committee. The department chair should respond in writing within five class days of receipt of the written notice of the grievance.

If the student is not satisfied with the resolution of the grievance proposed by the department chair, the student may appeal in writing to the dean of the instructor’s college. (In the case of a grievance involving a Graduate College policy or procedure, an appeal of the chair’s decision should be directed to the Dean of the Graduate College rather than to the dean of the instructor’s college.)

The dean will hear the explanations of the department chair and instructor, and should respond to the student in writing within ten class days of receipt of the written notice of the appeal. If the grievance cannot be resolved with the dean, the student may forward a written appeal to the provost, who will convene a Committee to Review Student Grievances (see below) to consider the appeal within ten class days of receipt of the written notice of the appeal.

Within five class days following the convening of the committee, the provost will make a decision with regard to the grievance and will transmit this decision in writing to the grievant, the dean, the department chair, and the instructor. An appeal of the provost’s decision may be made to the president of the university. The time limit specified at each level may be extended by mutual agreement of all parties concerned.

The Committee to Review Student Grievances is composed of faculty members named by the president of the Faculty Senate and students named by the president of the Government of the Student Body. The provost may serve as a chairperson for the committee, or may designate another chairperson for a specific grievance hearing. A minimum of two faculty members, two students, and the chairperson shall constitute a quorum for the convening committee.

**Academic Regulations**

**Class Attendance**

In order to attend a given class, a student must be registered for that class for credit or audit. Exceptions to this policy are at the discretion of the instructor of the course. See Index, Validation of Enrollment for regulations concerning attendance to validate students’ enrollment in a class.

Each instructor sets his or her policy with respect to class attendance, and excuses for absence from class are handled between the student and instructor. The instructor is expected to announce his or her policy at the beginning of the course. Generally, students are expected to attend all class meetings as scheduled.

**Veteran Attendance**

Students who receive benefits from the Veterans Administration required by the V.A. to attend class regularly to maintain their V.A. eligibility. If the instructor knows that a student receiving V.A. benefits is not attending class, the instructor is obligated to notify the Office of the Registrar and a notification will be forwarded to the Veterans Administration. More information about veteran benefits is available at http://www.registrar.iastate.edu/veterans/.

**Field Trips**

Trips away from campus are sometimes arranged as a means of enriching the students’ learning experience in a given course. Such trips may not take place during the first or last week of the semester, nor may they extend over more than two consecutive class days (Monday through Friday); these regulations may be waived only by special permission of the dean of the college in which the course is offered. Faculty should check with their college office to find out who is authorized to grant approvals or exceptions on behalf of the dean.

In order to go on a field trip required in one of their courses, students must first obtain permission from the instructors whose classes they will miss. If permission to miss class is not granted, students cannot be required to go on the field trip nor can they be penalized for missing the trip.

Special fees are often charged to cover the costs of field trips. Field trip fees are noted in the Schedule of Classes.

**Ownership of Course-related Presentations**

The presenter owns course-related presentations, including lectures. Individuals may take written notes or make other recordings of the presentations for educational purposes, but specific written permission to sell the notes or recordings must be obtained from the presenter. Selling notes by students without the required permission is a violation of the Conduct Code as published on the Policy Library web site at http://policy.iastate.edu/policy/SDR#4222.

**Recording and Transmission of Classes**

Recordings and transmission of classes may take place for a variety of legitimate reasons, including providing educational opportunities for those who cannot attend classes on campus, assisting students with disabilities that impair classroom note taking, and giving the instructor feedback on his or her classroom performance.

Because the lectures of faculty represent their intellectual labors, individuals are expected to obtain permission to make recordings of lectures and other classroom interactions. Recordings may be used for the purposes of the particular class, although in some cases the recordings may be preserved and used for other classes as well.

**Credit Involving a Paid Activity**

Students may obtain credit for an activity, either on- or off-campus, for which they are also paid, provided the activity is academically relevant. This policy does not apply to registrations for R credit.

In order for an activity to be defined as academically relevant, prior arrangements for receiving credit must be made with a faculty member in an appropriate department.

The arrangements must include agreement on (1) the academic objectives which the activity is expected to achieve, and (2) the procedure by which the student’s learning will be assessed.

**Academic Dishonesty**

Academic dishonesty occurs when a student uses or attempts to use unauthorized information in the taking of an exam; or submits as his or her own work themes, reports, drawings, laboratory notes, or other products prepared by another person; or knowingly assists another student in such acts or plagiarism. Such behavior is abhorrent to the university, and students found responsible for academic dishonesty face expulsion, suspension, conduct probation, or reprimand. Instances of academic dishonesty ultimately affect all students and the entire university community by degrading the value of diplomas when some are obtained dishonestly, and by lowering the grades of students working honestly.
Examples of specific acts of academic dishonesty include but are not limited to:

1. Obtaining unauthorized information. Information is obtained dishonestly, for example, by copying graded homework assignments from another student, by working with another student on a take-home test or homework when not specifically permitted to do so by the instructor, or by looking at your notes or other written work during an examination when not specifically permitted to do so.

2. Tendering of information. Students may not give or sell their work to another person who plans to submit it as his or her own. This includes giving their work to another student to be copied, giving someone answers to exam questions during the exam, taking an exam and discussing its contents with students who will be taking the same exam, or giving or selling a term paper to another student.

3. Misrepresentation. Students misrepresent their work by handing in the work of someone else. The following are examples: purchasing a paper from a term paper service; reproducing another person’s paper (even with modifications) and submitting it as their own; having another student do their computer program or having someone else take their exam.

4. Bribery. Offering money or any item or service to a faculty member or any other person to gain academic advantage for yourself or another is dishonest.

5. Plagiarism. Unacknowledged use of the information, ideas, or phrasing of other writers is an offense comparable with theft and fraud, and it is so recognized by the copyright and patent laws. Literary offenses of this kind are known as plagiarism.

Plagiarism occurs when a person does not credit the sources from which they borrow ideas, whether these ideas are reproduced exactly or summarized. The method of documentation will differ depending on whether the sources are written, oral, or visual. Ethically, communicators are responsible for providing accurate, detailed information about their sources. Practically, audiences need this information to comprehend and evaluate a message’s content. The Student Guide: English 150 and 250, available for purchase at the University Book Store, describes the process of documenting source materials as do many other reference guides.

Academic dishonesty is considered to be a violation of the behavior expected of a student in an academic setting as well as a student conduct violation. A student found responsible for academic dishonesty or academic misconduct is therefore subject to appropriate academic penalty; to be determined by the instructor of the course, as well as sanctions under the university Student Disciplinary Regulations. If an instructor believes that a student has behaved dishonestly in a course, the following steps are to be followed:

1. The instructor should confront the student with the charge of dishonesty and arrange a meeting with the student to discuss the charge and to hear the student’s explanation.

2. If the student admits responsibility for academic misconduct, the instructor shall inform the student (a) of the grade on the work in which the dishonesty occurred, and (b) how this incident will affect subsequent evaluation and the final grade.

Because academic dishonesty is also a student conduct violation under Section 4.2.1 of the Student Disciplinary Regulations, the instructor must report the incident in writing to the Dean of Students. After investigating the incident and discussing it with the instructor, the Dean of Students, or his/her designee, will meet with the student and depending on the severity of the offense as well as on the student’s past conduct record, may handle the matter through an administrative hearing or schedule a hearing before the All University Judiciary (AUJ).

This hearing, conducted according to the procedures outlined in the Student Disciplinary Regulations, is to determine the disciplinary action to be taken. In any case, the student’s academic adviser will be informed of the incident but may not insert any record of it in the student’s academic file.

3. If the student claims to be not responsible for the alleged violation of academic misconduct, the instructor may not assign the student a grade for the work in question until the question of responsibility is resolved, unless circumstances require that an interim grade be assigned. The instructor shall consult with his or her department chair and report the incident in writing to the Dean of Students.

The Dean of Students will refer the case to the Office of Judicial Affairs for investigation. After reviewing the report and completing an investigation, the Office of Judicial Affairs will file a formal complaint against the student if it is determined that there is cause to believe academic misconduct occurred. The case may be adjudicated through an administrative hearing or referred to a hearing before the All University Judiciary (AUJ) depending on the nature and severity of the violation as set forth in the Student Disciplinary Regulations.

If the case is referred to the AUJ both the student and instructor will be invited to attend an AUJ hearing and present pertinent information. If the Administrative Hearing Officer (in a minor case) or the AUJ (in a major case) finds the student responsible for the charge of academic misconduct, the instructor will inform the student (a) of the grade on the work in which the dishonesty occurred, and (b) how this incident will affect subsequent evaluation and the final grade. The Administrative Hearing Officer or AUJ will determine the appropriate disciplinary action with respect to the nature of the violation.

If the Administrative Hearing Officer or AUJ finds the student “not responsible” for academic misconduct, the instructor will grade the student accordingly on the work in question and the student’s grade in the course will not be adversely affected. If the student is found responsible the student’s adviser will be informed of the decision but shall not insert any record of the action in the student’s academic file.

4. If a student either admits dishonest behavior or is found responsible for academic misconduct by the AUJ, the Office of Judicial Affairs (OJA) or AUJ may impose any of the following sanctions:

a) Disciplinary Reprimand: An official written notice to the student that his/her conduct is in violation of university rules and regulations.

b) Conduct Probation: A more severe sanction than a disciplinary reprimand, to include a period of review and observation during which the student must demonstrate the ability to comply with university rules, regulations, and other requirements stipulated for the probation period.

c) Suspension/Deferred Suspension: The suspension is deferred subject to a definite or indefinite period of observation and review. If a student is found responsible for a further violation of the university Student Disciplinary Regulations or an order of a judiciary body, suspension will take place immediately.

- Definite - The student is dropped from the university for a specific length of time. This suspension cannot be for less than one semester or more than two years.
- Indefinite - The student is dropped from the university indefinitely. Reinstatement may be contingent upon meeting the written requirements of the AUJ specified at the time the sanction was imposed. Normally, a student who is suspended indefinitely may not be reinstated for a minimum of two years.

d) Expulsion: The student is permanently deprived of the opportunity to continue at the university in any status.

5. A student accused of academic misconduct has the option to stay in the class or to drop the class if the drop is made within the approved time periods and according to the regulations established by the university. If the student chooses to drop the class, the student will be required to sign a statement of understanding that if the student is later found responsible for academic misconduct, then the student will receive an “F” for the course.

6. Procedures for appeal of either the All University Judiciary’s conduct decision or the instructor’s grade are available from the Dean of Students Office.
7. In instances in which the student admits responsibility or is judged to be responsible by OJA or the AUJ, a staff member of the Dean of Students Office will counsel with the student in an effort to deter any further such incidents.

8. Student records concerning academic dishonesty are maintained in the Dean of Students Office for a period of seven years, after which the file records are purged. These student records are confidential; nothing from them appears on a student’s academic transcript. In the event that an instructor is uncertain how to handle an incident of suspected academic dishonesty, the Dean of Students is available at any time to provide advice and assistance to the instructor in deciding a proper course of action to be taken.

9. Students enrolled in the College of Veterinary Medicine are bound by an honor code. A charge of academic dishonesty may be made by a student or instructor to the Interclass Honor Board chairperson according to the procedures outlined in the Honor Code, or the instructor may follow procedures outlined above. The Interclass Honor Board functions as the judiciary of the College of Veterinary Medicine for the allegations presented to it.

Response to Classroom Disruption

Should any student officially enrolled for credit or audit in a class disrupt the instructor’s ability to ensure a safe environment, control the class agenda, and/or deliver the approved curriculum, the instructor has the right to ask that the disruptive action cease immediately. The instructor may find it useful to include general guidelines about disruptive behavior on the course syllabus; and in the event of a classroom disruption, the instructor may, if she or he finds it necessary, explain to the student and the class why the particular action is deemed disruptive. The instructor should also take into consideration complaints of disruptive behavior brought to their attention by students. The responsible student should cease the disruption and utilize non-disruptive means for expressing disagreement or concern. If the disruption continues, the instructor can pursue various forms of intervention, including suspension from class, use of student disciplinary regulations, or police intervention, as discussed in more detail in the Faculty Handbook.

Although most situations are best resolved without resorting to requests for police intervention, the Department of Public Safety should be called when the disruptive behavior prohibits the continuation of the class. The Department of Public Safety may also be called if any person enters or remains in the classroom after being asked by the instructor to leave.

Other violations related to academic misconduct may include subsection 4.1.11 Misuse of Computers and subsection 4.2.20 Unauthorized Sale of Others’ Intellectual Works. These subsections are located in the Iowa State University Student Disciplinary Regulations under section 4 of the Conduct Code.
Accreditation

Iowa State University is accredited by the Higher Learning Commission of the North Central Association of Colleges and Schools.

Higher Learning Commission of the North Central Association of Colleges and Schools

230 South LaSalle St., Suite 7-500
Chicago, IL 60604-1411

Board of Regents, State of Iowa

www.regents.iowa.gov/

The laws of the United States and of the State of Iowa provide for resident academic instruction, research, and extension education, and for the management of Iowa State University of Science and Technology. The university and two other state educational institutions of higher learning are governed by the Board of Regents, State of Iowa, which is composed of nine members nominated by the Governor of Iowa and confirmed by the Senate of Iowa. The immediate regulation and direction of the academic, research, and extension activities of the university are delegated by the Board of Regents, State of Iowa, to the president and faculty of the university. The board appoints an executive director with overall responsibility for the administration of the central office of the board located in Urbandale.

Officers of Administration

Gregory L. Geoffroy, Ph.D.
President of the University

Elizabeth Hoffman, Ph.D.
Executive Vice President and Provost

Warren R. Madden, M.B.A.
Vice President for Business and Finance

Thomas L. Hill, Ph.D.
Vice President for Student Affairs

Wendy K. Wintersteen, Ph.D.
Dean of the College of Agriculture and Life Sciences

Labh Hira, Ph. D.
Dean of the College of Business

Luis Rico-Gutierrez, M.S.
Dean of the College of Design

Jonathan Wickert, Ph.D.
Dean of the College of Engineering

Pamela J. White, Ph.D.
Dean of the College of Human Sciences

Michael B. Whiteford, Ph.D.
Dean of the College of Liberal Arts and Sciences

Lisa Nolan, D.V.M., Ph.D.
Dean of the College of Veterinary Medicine

Gerald A. Miller, Ph.D.
Interim Vice President for Extension and Outreach

Sharron Quisenberry, Ph.D.
Vice President for Research and Economic Development
Admissions and Registrar

Director
Marc Harding, M.Ed.

Office of the Registrar
Associate Vice President for Student Affairs and Registrar
Kathleen M. Jones, M.S.
Senior Associate Registrar and Director for Transfer Relations
Laura Doering, M.S.

Admission

When to Apply
Applicants for the fall semester are encouraged to apply during the fall of the year preceding their entry to Iowa State University. Applications for other terms should be submitted well in advance of the desired entry date.

Application deadlines are available at www.admissions.iastate.edu.

Completed applications for admission to the professional curriculum in the College of Veterinary Medicine, together with the required supporting transcripts, must be received by an established deadline. See College of Veterinary Medicine, Application and Admission.

How to Apply
Applications for admission are available online at www.admissions.iastate.edu.

Iowa State University operates on a rolling admissions basis. Admission of applicants for fall semester begins in July of the preceding year. Admission for other terms begins approximately 12 months prior to the beginning of the term. Admission offers are issued for a specific term and are valid only for the term specified.

Visits to the Campus
Visitors to Iowa State University are always welcome!

The Soults Family Visitor Center, located in the Memorial Union, is open Monday through Friday from 8 a.m. until 5 p.m., and most Saturday mornings from 9 a.m. until 1 p.m. when classes are in session. Counselors are available to speak with prospective students and their families about admission, financial aid, housing, student life, academic programs and other opportunities. Visitors are offered student-guided walking tours of campus and the residence halls along with an enrollment presentation and an academic information session.

Prospective students and parents are encouraged to visit the campus and the Soults Family Visitor Center. Arrangements for a campus visit or registration for "Experience Iowa State" or "Transfer Visit Days" open house programs can be made at www.admissions.iastate.edu or by contacting the Soults Family Visitor Center at 515-294-5836.

Admission requirements are stated in the Iowa Administrative Code. Admission policies are established by the Faculty Senate. Any Admission decisions are made by the admissions officers in accordance with the entrance requirements as set forth in the Iowa Administrative Code as well as the admission policies established by the Faculty Senate.

Undergraduate Admission Directly from High School
Students who seek admission must meet the following requirements and also any special requirements for the college or curriculum of their choice.

Applicants must submit an application for admission and the appropriate application fee (see www.admissions.iastate.edu for current application fee information). In addition applicants must have their secondary school provide an official transcript of their academic record, including cumulative grade point average, rank in class, and certification of graduation.

Applicants must also arrange to have their ACT or SAT scores reported to Iowa State directly from the testing agency. U.S. citizen and immigrant applicants who will not graduate from an approved Iowa high school and whose primary language is not English must meet university communication proficiency requirements. This can be accomplished by achieving satisfactory scores on the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS), the ACT or SAT. Contact the Office of Admissions for minimum score requirements for each examination.

Applicants may be required to submit additional information or data to support their applications.

A. Graduates of approved Iowa high schools who have the subject-matter background required by Iowa State University and who achieve a Regent Admission Index (RAI) score of at least 245 will be offered admission. Graduates of approved Iowa high schools who have the subject-matter background required by Iowa State University and who achieve less than a 245 RAI score will be considered for admission on an individual basis.

The RAI score will be calculated for each applicant based on the following equation:

\[
\text{RAI Score} = (2 \times \text{ACT composite score}) + (1 \times \text{percentile class rank}) + (20 \times \text{high school GPA}) + (5 \times \text{number of years of high school core courses completed})
\]

Note: For purposes of calculating the RAI, SAT scores will be converted to ACT composite equivalents; high school rank is expressed as a percentile with 99% as the top value; high school GPA is expressed on a 4-point scale; and number of high school courses completed in the core subject areas is expressed in terms of years or fractions of years of study.

Applicants from high schools that do not present all four of the factors required for calculation of the RAI score will be considered for admission on an individual basis.

Those applicants who are not offered unconditional admission will either be given the opportunity to enroll for a trial period during the preceding summer session or be denied admission.

B. Nonresidents of Iowa, including international students, may be held to higher academic standards, but must meet at least the same requirements as resident applicants.

C. Applicants who are graduates of nonapproved high schools will be considered for admission in a manner similar to applicants from approved high schools, but additional emphasis will be given to scores earned on standardized examinations.

D. Applications may be considered from students who did not graduate with their high school classes. They will be required to submit all academic data to the extent that it exists and achieve scores on standardized examinations which will demonstrate that they are adequately prepared for academic study.

E. Students with satisfactory academic records may be admitted, on an individual basis, for part-time university study while enrolled in high school or during the summers prior to high school graduation.
Students who wish to enter Iowa State University directly from high school (or transfer from another college or university with less than 24 semester hours of graded transferable college credit) must meet the level of academic performance described above and show evidence of the following high school preparation:

**English/Language Arts**
Four years, emphasizing writing, speaking, and reading, as well as an understanding and appreciation of literature

**Mathematics**
Three years, including one year each of algebra, geometry, and advanced algebra

**Science**
Three years, including one year each of courses from two of the following fields: biology, chemistry, and physics

**Social Studies**
Two years

**Additional Requirements for the College of Liberal Arts and Sciences and the College of Engineering**
In addition to the high school preparation requirements described above, students applying to the College of Liberal Arts and Sciences must have completed an additional year of social studies, for a total of three years, and two years of a single foreign language. Students applying to the College of Engineering must have completed two years of a single foreign language.

Students who do not meet the high school course preparation requirements listed here, but who are otherwise well qualified, may be admitted after individual review of their applications.

**Undergraduate Admission by Transfer from Other Educational Institutions**
Students who seek admission must meet the following requirements and also any special requirements for the college and curriculum of their choice.

Applicants must submit an application for admission, and the appropriate application fee (see www.admissions.iastate.edu for current application fee information). Applicants must also request that each college they have attended send an official transcript of record to the Office of Admissions. Failure to provide transcripts from all colleges or universities attended may result in denial of the application or dismissal from the university. If less than 24 semester hours of graded transferable college credit is completed prior to entry at Iowa State University, applicants must also request that their official high school transcript and ACT or SAT scores be sent to the Office of Admissions. Other transfer applicants are encouraged to provide high school academic information. Students who do not do so may be asked to take course placement examinations during orientation.

U.S. citizen and immigrant applicants who have not graduated from an approved Iowa high school and whose primary language is not English must meet the university’s English communication requirement. This can be accomplished by achieving satisfactory scores on the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS), the ACT or SAT. Contact the Office of Admissions for minimum score requirements for each examination.

A. Transfer applicants with a minimum of 24 semester hours of graded transferable credit from regionally accredited colleges or universities, who have achieved for all college work previously attempted the grade point average required by Iowa State for specific programs, will be admitted. A 2.00 grade point average (on a 4.00 grading scale) is the minimum transfer grade point average requirement. Some programs may require a transfer grade point average higher than this minimum. Higher academic standards may be required of students who are not residents of Iowa, including international students.

Applicants who have not maintained the grade point average required by Iowa State University for specific programs or who are under academic suspension from the last college attended generally will be denied admission.

B. In addition to meeting the minimum transfer grade point average requirement described above, applicants who have completed fewer than 24 semester hours of graded transferable college credit prior to their enrollment at Iowa State must also meet the admission requirements for students entering directly from high school.

C. Transfer applicants under disciplinary suspension will not be considered for admission until information concerning the reason for the suspension has been received from the college assigning the suspension. Applicants granted admission under these circumstances will be admitted on probation.

D. Transfer applicants from colleges and universities not regionally accredited will be considered for admission on an individual basis, taking into account all available academic information.

**Transfer Credit Practices**
Iowa State University endorses the Joint Statement on Transfer and Award of Academic Credit approved by the American Council on Education (ACE) and the American Association of Collegiate Registrars and Admissions Officers (AACRAO). The current issue of Transfer Credit Practices of Designated Educational Institutions, published by AACRAO is an example of a reference used in determining transfer credit.

The acceptance and use of transfer credit are subject to limitations in accordance with the educational policies of Iowa State University.

A. Students from regionally accredited colleges and universities.

Credit earned at regionally accredited colleges and universities is acceptable for transfer, except for the following, which may not be accepted, or may be accepted to a limited extent:

—credit in courses determined by Iowa State University to be of a developmental, vocational, or technical nature

—credit in courses or programs in which the institution granting the credit is not directly involved.

No more than 65 semester or 97 quarter credits earned at two-year colleges can be applied to a bachelor’s degree from Iowa State University. While there is no limit to the number of credits that may be transferred from a four-year institution, the last 32 semester credits must be completed at Iowa State University.

B. Students from colleges and universities which have candidate status.

Credit earned at colleges and universities which have become candidates for accreditation by a regional association is acceptable for transfer in a manner similar to that from regionally accredited colleges and universities if the credit is applicable to the bachelor’s degree at Iowa State University.

C. Students from colleges and universities not regionally accredited.

When students are admitted from colleges and universities not regionally accredited, they may validate portions or all of their transfer credit by satisfactory academic study at Iowa State, or by examination. The amount of transfer credit and the terms of the validation process will be specified at the time of admission.
In determining the acceptability of transfer credit from private colleges in Iowa which do not have regional accreditation, the Regent Committee on Educational Relations, upon request from such institutions, evaluates the nature and standards of the academic program, faculty, student records, library, and laboratories.

In determining the acceptability of transfer credit from colleges in states other than Iowa which are not regionally accredited, acceptance practices indicated in the current issue of Transfer Credit Practices of Designated Educational Institutions will be used as a guide. For institutions not listed in the publication, guidance is requested from the designated reporting institution of the appropriate state.

D. Students from foreign colleges and universities.

Transfer credit from foreign educational institutions may be granted after a determination of the type of institution involved, its recognition by the educational authorities of the foreign country, and an evaluation of the content, level, and comparability of the study to courses and programs at Iowa State University. Credit may be granted in specific courses or assigned to general areas of study. Extensive use is made of professional journals and references which describe the educational systems and programs of individual countries.

Additional Transfer Credit Policies

A. Students with credit obtained during military service.

Credit will be awarded for successful completion of technical or specialized schools attended while on active duty with the armed forces to the extent that the material is applicable toward degree requirements at Iowa State University. Application for such credit is made at the Office of Admissions, which follows many of the recommendations in the American Council on Education (ACE) publication A Guide to the Evaluation of Educational Experiences in the Armed Services.

B. Students with credit obtained through non-college sponsored instruction.

Credit will be awarded for successful completion of learning acquired from participation in formal courses sponsored by associations, business, government, industry, and unions to the extent that the material is applicable toward degree requirements at Iowa State University. Application for such credit is made at the Office of Admissions, which follows many of the recommendations in the American Council on Education (ACE) publication The National Guide to Educational Credit for Training Programs.

C. Students with credit obtained through correspondence courses.

Although Iowa State does not offer correspondence courses, college level courses taken by correspondence from accredited colleges or universities are acceptable for transfer at the undergraduate level if the courses taken are those that do not require laboratory study.

D. College Level Examination Program (CLEP).

Iowa State University will award credit for each of the following 14 examinations: Financial Accounting, Principles of Accounting, American Government, Biology, Calculus, French Language, Humanities, Principles of Macroeconomics, Principles of Microeconomics, Natural Sciences, Introductory Psychology, Social Sciences and History, Introductory Sociology, Spanish Language.

Application of CLEP credit to a degree program varies with the department, so students should consult with their department before they register for CLEP examinations. Additional information is available at www.admissions.iastate.edu/cbe/cbe_clep.php.

E. Students with “test-out” credit.

Students who have earned credit at other colleges or universities through Advanced Placement (AP), College Level Examination Program (CLEP), or International Baccalaureate (IB) examinations may qualify for credit at Iowa State University. Scores from these examinations should be sent directly to the Office of Admissions; credit will be awarded provided the scores satisfy Iowa State’s requirements.

Credit earned at another college through locally designed test-out examinations may transfer to Iowa State University if accompanied by at least 12 transferable semester credits earned through coursework taken at that institution.

Articulation/Transfer Agreements

A. Iowa Regent Universities General Education Articulation Agreement.

Iowa State University participates in an articulation agreement with the other two Iowa Regent universities concerning the acceptance of their general education programs into the Iowa State University College of Liberal Arts and Sciences. Under the terms of this agreement, students who have satisfied general education requirements at the University of Northern Iowa or in the College of Liberal Arts at the University of Iowa may transfer to Iowa State’s College of Liberal Arts and Sciences with their general education requirements met (with the possible exception of the foreign language and library requirements).

B. Associate of Arts (A.A.) Articulation Agreement with Iowa public community colleges.

Students who plan to enter the College of Liberal Arts and Sciences or the College of Business at Iowa State University with an associate of arts degree from an Iowa public community college, and who have at least 60 prescribed semester (90 quarter) credits acceptable for transfer and at least a 2.00 cumulative grade point average, will be considered to have met the general education requirements of that college. College of Business students will still be required to take an ethics and a global course to satisfy general education requirements unless they are taken as part of the associate of arts degree.

C. Associate of Science (A.S.) Articulation Agreement with Iowa public community colleges.

Students who plan to enter the College of Liberal Arts and Sciences and the College of Business at Iowa State University with an associate of science degree from an Iowa public community college, and who have at least 60 prescribed semester credits acceptable for transfer and at least a 2.00 cumulative grade point average, will be enrolled at junior level status upon entry to Iowa State University, College of Liberal Arts and Sciences. Transfer students with AS degrees will have their transfer credits evaluated course-by-course to determine how the courses will be applied to their intended Iowa State major/degree program requirements.

D. Career-technical credit from Iowa public community colleges.

Iowa State University will accept up to 16 semester (24 quarter) credits earned in career-technical courses where the sending Iowa public community college will accept such courses toward its associate of arts or associate in science degree. Certain career-technical courses at Iowa community colleges may be articulated to Iowa State University as academic credit. The credit hours earned in these articulated courses would transfer in addition to the 16 semester hour career-technical maximum. Please refer to the course equivalency guides on the Web (www.admissions.iastate.edu/eval) or contact the Office of Admissions for more information.

E. AP and CLEP credit from Iowa public colleges and universities.

Iowa State University has an agreement with the Iowa public colleges and universities which allows credit earned through AP and CLEP examinations to transfer directly to Iowa State University if accompanied by at least 12 transferable semester credits earned through coursework taken at the sending institution.

On-line Transfer Articulation System (TRANSIT)

TRANSIT is Iowa State’s online system, which displays how credits from a community college or another university may transfer to a degree program at Iowa State. In TRANSIT, prospective or current students can generate a transfer credit evaluation showing how their courses and degrees from a community college or university transfer to Iowa State University. In addition, students can request an unofficial degree audit,
which will display how their transfer courses are applied within a particular Iowa State major/degree program. TRANSIT is easy to use and can be accessed by going to http://transit.iastate.edu.

**Undergraduate Admission - Nondegree Undergraduate**

Students who wish to attend Iowa State University to take undergraduate courses but who do not plan to seek an undergraduate degree from Iowa State University should apply as nondegree undergraduate students. Credit taken under the nondegree undergraduate classification is applicable for undergraduate degree purposes for those who are later admitted as degree-seeking undergraduate students. Credit obtained under the nondegree undergraduate classification may not, however, be applied toward a graduate degree.

Students enrolled in the Intensive English and Orientation Program (IEOP) are classified as nondegree students in the College of Liberal Arts and Sciences, and usually are not permitted to enroll in academic courses until they have satisfied requirements for admission as degree-seeking students. Permission to enroll in one academic course in addition to full-time intensive English study may be granted under special circumstances.

**Reentering Students - Undergraduate and Graduate**

Reentering students are those who have previously attended Iowa State University and are returning after an absence of at least one full year. See Index, Academic Renewal Policy; and Reentry.

International students need to reapply after an absence of one full semester, exclusive of summer session. International reentries must also contact the International Students and Scholars office to request the necessary visa application forms.

Reentering graduate students do not need to complete a reentry form but should notify their department and the Office of the Registrar of their intent to reenter Iowa State University. See Index, Reentry for more information.

**Residency Classification for Admission and Tuition Purposes**

These criteria are contained in the Policy Manual, Board of Regents, State of Iowa and or the Iowa Administrative Code: Board of Regents, State of Iowa.

**general Information**

A. A person enrolling at one of the three state universities shall be classified as a resident or nonresident for admission, tuition, and fee purposes by the registrar or someone designated by the registrar. The decision shall be based upon information furnished by the student and other relevant information.

B. In determining resident or nonresident classification, the issue is essentially one of why the person is in the state of Iowa. If the person is in the state primarily for educational purposes, that person will be considered a nonresident. For example, it may be possible that an individual could qualify as a resident of Iowa for such purposes as voting, or holding an Iowa driver’s license, and not meet the residency requirements as established by the Board of Regents, State of Iowa, for admission, tuition, and fee purposes.

C. The registrar, or designated person, is authorized to require written documents, affidavits, verifications, or other evidence deemed necessary to determine why a student is in Iowa. The burden of establishing that a student is in Iowa for other than educational purposes is upon the student. A student may be required to file any or all of the following:

1. A statement from the student describing employment and expected source of support
2. A statement from the student’s employer
3. A statement from the student’s parents verifying nonsupport and the fact that the student was not listed as a dependent on tax returns for the past year and will not be so listed in future years
4. Supporting statements from persons who might be familiar with the family situation

D. Change of classification from nonresident to resident will not be made retroactive beyond the term in which application for resident classification is made.

E. A student who gives incorrect or misleading information to evade payment of nonresident fees shall be subject to serious disciplinary action and must also pay the nonresident fees for each term previously attended.

F. Review committee. These regulations shall be administered by the registrar or someone designated by the registrar. The decision of the registrar or designated person may be appealed to a university review committee. The finding of the review committee may be appealed to the Board of Regents, State of Iowa.

**Graduate Assistants**

Students with graduate assistantships of 1/4-time or more are assessed Iowa resident tuition and fees. Nonresident students with graduate assistantships of 1/4-time or more retain their nonresidency classification, but are assessed resident tuition and fees as long as the graduate assistantship is continued.

The spouse of a 1/4-time or more graduate assistant who is a nonresident is eligible for resident tuition and fees during the period of the assistantship appointment. Iowa residency is not granted, but a waiver of nonresident tuition and fees is in effect. When the graduate assistantship ends, the tuition and fee waiver for the spouse is terminated. (Board of Regents, State of Iowa, Minutes March 15, 1995, p. 801).

The graduate student must request the resident tuition assessment by midterm of the term in question. The benefit will not be granted retroactively.

**Guidelines**

The following guidelines are used in determining the resident classification of a student for admission, tuition, and fee purposes:

A. A financially dependent student whose parents move from Iowa after the student is enrolled remains a resident provided the student maintains continuous enrollment. A financially dependent student whose parents move from Iowa during the senior year of high school will be considered a resident provided the student has not established domicile in another state.

B. In deciding why a person is in the state of Iowa, the person’s domicile will be considered. A person who comes to Iowa from another state and enrolls in any institution of postsecondary education for a full program or substantially a full program shall be presumed to have come to Iowa primarily for educational reasons rather than to establish a domicile in Iowa.

C. A student who was a former resident of Iowa may continue to be considered a resident provided absence from the state was for a period of less than 12 months and provided domicile is reestablished. If the absence from the state is for a period exceeding 12 months, a student may be considered a resident if evidence can be presented showing that the student has long-term ties to Iowa and reestablishes an Iowa domicile. A person or the dependent of a person whose domicile is permanently established in Iowa, who has been classified as a resident for admission, tuition, and fee purposes, may continue to be classified as a resident so long as domicile is maintained, even though circumstances may require extended absence of the person from the state. It is required that a person who claims Iowa domicile while living in another state or country will provide proof of the continual domicile as evidence that the person:

1. Has not acquired domicile in another state;
2. Has maintained a continuous voting record in Iowa; and
3. Has filed regular Iowa resident income tax returns during absence from the state.
D. A student who moves to Iowa may be eligible for resident classification at the next registration following 12 consecutive months in the state provided the student is not enrolled as more than a half-time student (6 credits for an undergraduate or professional student, 5 credits for a graduate student) in any academic year term, is not enrolled for more than 4 credits in a summer term for any classification, and provides sufficient evidence of domicile in an Iowa domicile.

E. A student who has been a continuous student and whose parents move to Iowa may become a resident at the beginning of the next term provided the student is dependent upon the parents for a majority of financial assistance.

F. A person who is moved into the state as the result of military or civil orders from the government for other than educational purposes, or the dependent of such a person, is entitled to resident status. However, if the arrival of the person under orders is subsequent to the beginning of the term in which the student is first enrolled, nonresident fees will be charged in all cases until the beginning of the next term in which the student is enrolled. Legislation, effective July 1, 1977, requires that military personnel who claim residency in Iowa (home of record) will be required to file Iowa resident income tax returns.

G. A person who has been certified as a refugee or granted asylum by the appropriate agency of the United States, who enrolls as a student at a university governed by the Board of Regents, State of Iowa, may be accorded immediate resident status for admission, tuition, and fee purposes where the person:

1. Comes directly to the state of Iowa from a refugee facility or port of debarkation, or
2. Comes to the state of Iowa within a reasonable time and has not established domicile in another state.

Any refugee or individual granted asylum not meeting these standards will be presumed to be a nonresident for admission, tuition, and fee purposes and thus subject to the usual method of proof of establishment of Iowa residency.

H. An alien who has immigrant status establishes Iowa residency in the same manner as a United States citizen.

I. At the Regent institutions, American Indians who have origins in any of the original people of North America and who maintain a cultural identification through tribal affiliation or community recognition with one or more of the tribes or nations connected historically with the present state of Iowa, including the iowa, Kickapoo, Menominee, Miami, Missouri, Ojibwa (Chippewa), Omaha, Otoe, Ottowa (Odawa), Potawatomi, Sac and Fox (Sauk, Meskwaki), Sioux, and Winnebago (Ho Chunk), will be assessed Iowa resident tuition and fees. (Board of Regents, State of Iowa, Minutes October 15-16, 1997, p. 299)

Facts

A. The following circumstances, although not necessarily conclusive, have probative value in support of a claim for resident classification:

1. Reside in Iowa for 12 consecutive months, and be primarily engaged in activities other than those of a full-time student, immediately prior to the beginning of the term for which resident classification is sought.
2. Reliance upon Iowa resources for financial support.
3. Domicile in Iowa of persons legally responsible for the student.
4. Former domicile in the state and maintenance of significant connections therein while absent.
5. Acceptance of an offer of permanent employment in Iowa.
6. Other facts indicating the student’s domicile will be considered by the universities in classifying the student.

B. The following circumstances, standing alone, do not constitute sufficient evidence of domicile to affect classification of a student as a resident under these regulations:

1. Voting or registration for voting.
2. Employment in any position normally filled by a student.
3. The lease of living quarters.
4. Admission to a licensed practicing profession in Iowa.
5. Automobile registration.
6. Public records; for example, birth and marriage records, Iowa driver’s license.
7. Continuous presence in Iowa during periods when not enrolled in school.
8. Ownership of property in Iowa, or the payment of Iowa taxes.

Credit by Examination (CBE)

It is Iowa State University policy to grant academic credit by examination in many of the undergraduate courses listed in the university bulletin. Credit is awarded primarily in the introductory level classes in mathematics, natural, physical, and social sciences, and the liberal arts. Students with superior high school backgrounds or those with college-level proficiency in certain subject areas are strongly encouraged to investigate and attempt testing in the CBE programs available.

Types of CBE Programs

Students may earn academic credit in any of four ways and have that credit recorded on their academic record when they enroll. Programs accepted at Iowa State include the Advanced Placement (AP) Program, the International Baccalaureate (IB) Examinations, departmental examinations, and the College Level Examination Program (CLEP). Iowa State’s policies for awarding credit for each of these programs may be found at www.admissions.iastate.edu/cbe.

Advanced Placement (AP) Program of the College Board

This program allows students, while still in high school, to take examinations for credit at the college level. Iowa State University awards credit or advanced placement through the Advanced Placement Program in art, biology, chemistry, computer science, economics, English, environmental science, foreign languages, geography, government and politics, history, mathematics, music, physics, psychology and statistics. High school counselors and teachers will assist with testing arrangements.

Generally, students scoring 3 or better on the exams will be considered for course credit based on departmental review of the exams. In some departments, only scores of 4 or better will be considered for credit.

Correspondence concerning the Advanced Placement Program should be addressed to the College Board Advanced Placement Examinations, P.O. Box 977-IS, Princeton, New Jersey 08541, or visit their web site at www.collegeboard.com/student/testing/ap/about.html.

International Baccalaureate Examinations

The International Baccalaureate (IB) Program, offered at many high schools in the United States and abroad, allows students the opportunity to take examinations for credit at the college level. These examinations are offered at standard and higher levels.

Iowa State University awards credit for most higher level examinations and some standard level examinations. Students must receive a minimum score of 4 to qualify for academic credit in most subject areas. Some departments require higher scores. Official IB examination results must be sent directly to the Office of Admissions from the International Baccalaureate North America Office. Results listed on high school transcripts are not considered official.

Correspondence concerning the IB Program should be addressed to IB North America, 475 Riverside Drive, Suite 240, New York, NY 10115, ibna@ibo.org, or visit their website at www.ibo.org.

Departmental Examinations

Students may take locally constructed departmental examinations for undergraduate credit in specified subject areas for which they and the department feel they have the necessary preparation. These exams are generally administered by the department which offers the course (for exceptions, see CLEP offerings below). Students interested in taking departmental (or CLEP) examinations should contact the appropriate department for specific information on the course covered by the exam and the exam itself. A nonrefundable fee is charged for each departmental examination requested. If an acceptable exam score is achieved, a grade of T will be reported to the Office of the Registrar. The T grade represents performance equivalent to a C or better in the course. T grades are not used in computing students’ grade point averages; however, the credit does become part of their official acad-
College Level Examination Program
CLEP is available on computer only and Iowa State University only accepts the CLEP tests listed in this section, and does not accept College Mathematics or English Composition. Up to six semester credit hours in each of these three CLEP general tests is awarded: Social Sciences and History, Humanities, and Natural Sciences. In addition, the College of Engineering does not allow credit earned from CLEP Social Sciences and History, Humanities, and Natural Sciences tests to be used in their students’ degree programs.

CLEP tests accepted at Iowa State University include American Government (Pol S 21B); Financial Accounting (Acct 284); engineering majors should consult with their academic adviser before registering for this examination; Biology (Biol 101, not for biology or engineering majors); Introductory Psychology (Psych 101); Introductory Sociology (Soc 134); Principles of Macroeconomics (Econ 102); Principles of Microeconomics (Econ 101); and Calculus (Math 165).

In addition, Iowa State University will award up to 16 semester credit hours for CLEP French Language and up to 16 semester credit hours for CLEP Spanish Language. Please note that native or near native speakers of French or Spanish may not test out of the beginning or intermediate levels in these languages.

A nonrefundable fee is charged for each CLEP test requested, and all requests should be made one week prior to the test date. CLEP tests are administered by the Student Counseling Service Testing Office Monday through Friday. For information on whether to take any of the CLEP tests, contact your academic adviser. To obtain information on any of the CLEP tests, contact the SCS Testing Office, Rm. 2030 Student Services Building, Iowa State University, Ames, Iowa 50011, or send e-mail to scsclep@iastate.edu. To print a copy of the institutional CLEP registration form, go to http://www.public.iastate.edu/~stdtcouns/TestServiceMain.htm.

Policies and Procedures Governing CBE Tests
1. Departmental and CLEP tests are offered to newly admitted or currently enrolled students at Iowa State University. Former and future students will receive credit only if they enroll sometime during the twelve months immediately following the test(s).

2. Permission to take a departmental examination is obtained from the department. Students may be denied permission because (a) the nature of the course is such that proficiency cannot be measured by such a test, (b) the student does not appear to have adequate background to pass the examination for the course, or (c) the student would not otherwise be allowed to enroll in the course. Students may appeal such a denial to the dean of the college in which the department is administered and subsequently to the provost.

3. Students may ordinarily attempt a CBE test only once in any course or area. Under special circumstances a retest may be taken upon approval of the department in which the course is offered.

4. Departmental examinations and CLEP subject tests cover only a single course and students may not test out of independent study or special topic courses.

5. There is a nonrefundable fee for all departmental and CLEP tests. The fee is set by the Board of Regents, State of Iowa, and is subject to change.

6. Departmental examinations are usually given just prior to, or within two weeks of, the beginning of fall and spring semesters. For more information, students should contact the department that offers the class.

7. Credit for the CLEP examinations Social Sciences and History, Humanities, and Natural Sciences is not evaluated as equivalent to any specific course and cannot be used in place of specific course requirements for the major. All colleges (except Engineering, which does not accept these tests) allow these CLEP credits to be used for either general requirements (not in Liberal Arts and Sciences) or elective credit. Students are responsible for checking with their academic advisers to determine whether such credit is to their benefit.

8. Listed below are policies for transferring CBE from another college or university to Iowa State University:

   a. AP or CLEP credit which is earned at an Iowa public college or university may be transferred directly to Iowa State University provided it is accompanied by at least 12 semester credits earned in residence at the sending institution. AP or CLEP credit which is earned at any other college or university may not be transferred directly to Iowa State. However, the scores from these examinations may be sent to Iowa State University from the testing agency, and credit will be awarded based on Iowa State’s AP and CLEP policies.

   b. IB credit earned at another college or university may not be transferred directly to Iowa State University. However, the scores from IB examinations may be sent to Iowa State from the testing agency, and credit will be awarded based on Iowa State’s IB policies.

   c. Credit earned at another college or university through local test-out examinations may be transferred directly to Iowa State University provided it is accompanied by at least 12 semester credits earned in residence at the sending institution.

9. Credit earned from CBE will be posted to the student’s academic record at the end of the term. CBE credits will be counted toward the projected year in school classification used to establish registration start dates.

10. Some professional programs do not accept T (test-out) credit in preprofessional courses. Students who anticipate applying to such programs should inquire about the acceptability of such credit before registering for such CBE tests.

11. Credit established at Iowa State University will usually transfer to other colleges and universities; however, the final decision rests with the institution reviewing the transcript.

Destination Iowa State
The Destination Iowa State program is held for all new freshman and transfer students on the Thursday, Friday, and Saturday before classes begin fall semester; and on the Saturday before classes begin spring semester. The program helps new students develop academic and social strategies to ensure a successful transition to Iowa State University.

New Student Programs Office
Orientation
Orientation assists new undergraduates with the transition to Iowa State University. At orientation, students plan their academic programs, register for classes, learn about university policies and procedures, and prepare for personal and social adjustments to the university. The University Orientation Committee, composed of Iowa State University faculty, and staff, is responsible for the orientation programs; the undergraduate colleges of the university, in cooperation with the Office of New Student Programs, have responsibility for the implementation of orientation programs for new students and their families.

The Orientation Committee conducts an extensive orientation program during the summer, with additional programs held prior to each term. Special orientation sessions are conducted for transfer students during the spring. New students receive an invitation to attend an orientation program before their first semester at the university.

Summer Orientation
Summer orientation for freshmen is a two-day program scheduled in June. As early as January, new freshman students and their family members are asked to select a convenient time from among a number of orientation sessions that are scheduled during June. In addition to preparing their class schedules for fall semester, new students with their family members participate in informational activities about policies
and procedures at the university, and meet formally and informally with faculty, staff, and other new students and their families. These sessions, held in a comfortable, informative atmosphere, lessen existing anxieties, assist in the development of a clearer understanding of the university environment, and make it possible for new students—with support from their family members—to begin to make the academic and social decisions that are faced by all students at the university.

Housing and meals are available at campus residence halls for a nominal fee during June freshman orientation.

WelcomeFest
WelcomeFest activities are scheduled during the first week of fall semester to welcome students to campus. All students, including transfer students, are invited to participate in WelcomeFest.

Office of the Registrar

Student Records
Iowa State University maintains various records concerning students, to document their academic progress as well as to record their interactions with university staff and officials. In order that their right to privacy be preserved and to conform with federal law, the university has established certain policies to govern the handling of student records. All policies conform with FERPA, the Family Educational Rights and Privacy Act (also known as the Buckley Amendment).

Public Information
Certain information concerning students is considered to be open to the public upon inquiry. This public information is of two types: directory information and other information not included in the ISU Directory. ISU directory information includes local address, telephone number, campus e-mail address, college, curriculum, year in school, and enrollment status.

Other public information includes mailing address, date and place of birth, home town, dates of attendance at Iowa State, expected date of graduation, names of advisers, awards and academic honors, Iowa State degree(s) and date(s) awarded, previous educational institutions attended, degrees received, dates of attendance, full- or part-time status, participation in officially recognized activities and sports, and weight and height of members of athletic teams.

Public information will be released by the registrar to anyone upon inquiry, unless students have requested that their information not be released. A request to have public information withheld should be made at the Office of the Registrar, 214 Enrollment Services Center. Once the request is processed, the registrar will notify the appropriate university offices.

For the purposes of FERPA, Iowa State University defines directory information to include both ISU directory information and public information as defined above.

It is the policy of the university to respect the privacy of students; therefore, only lists and labels containing names of students with directory information will be made available to members of the public. This directory information will be provided on a time-available basis for the cost of producing the information. Directories are also available in the bookstores for those persons needing directory information. Directory information is available on the World Wide Web using the online phonebook; and from printed directories, which may be purchased at the bookstores.

Confidential Information
With the exception of the information noted above, all student records are considered to be confidential and are open only to school officials. A school official is a person employed by the university in administrative, supervisory, academic or research, or support staff position (including law enforcement unit personnel and health staff); a person or company with whom the university has contracted; or a student serving on an official committee, such as a disciplinary or grievance committee, or assisting another school official in performing his or her tasks. A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her professional responsibility. Iowa State University’s notification of rights under FERPA can be found at http://www.registrar.iastate.edu/info/ferpanotice.html.

The following policies govern access to student records:

1. Each type of student record is the responsibility of a designated school official, and only that person or the dean or director to whom that person reports has authority to release the record. The following is a list of the responsible officials:
   a. Academic records: registrar
   b. Admissions records: director of admissions
   c. Financial aid records: director of student financial aid
   d. Business records: university controller
   e. Traffic and security records: director, ISU Department of Public Safety
   f. Medical records: director, Thielen Student Health Center
   g. Counseling records and test scores: director, Student Counseling Service
   h. Actions of Academic Standards Committees: college deans
   i. Disciplinary records: dean of students
   j. Residence hall records: director of residence
   k. Placement hall records: college placement officers
   l. Evaluations for admission to ISU graduate or professional programs: deans or department chairs
   m. Special academic programs: faculty member in charge of the program and the dean of the college

2. The designated official may release records to other school officials who have a legitimate need for the information. A list of those persons who normally have access to each type of student record is available in 214 Enrollment Services Center.

3. All student records are reviewed periodically. Information concerning the frequency of review and expurgation of specific records is available in 214 Enrollment Services Center.

4. Students have the right to review upon request any records that pertain directly to them, and may obtain a copy of the record for a fee. This provision does not apply to records to which the student has waived his or her right to review, nor does it apply to medical and counseling records.

5. A student may waive the right to review a specific record by submitting in writing a statement to this effect to the official responsible for that record.

6. A file containing copies of records pertinent to advising is maintained on each student for use by the student’s adviser. This file may be maintained in hard copy or electronic format. Ordinarily this file is kept in the possession of the adviser, but for convenience it may be stored elsewhere such as in the dean’s office or department office. When the student changes majors, or changes advisers within the same major, the file is transferred to the new adviser. Under the university’s student records policy, the student is considered to have the right of access to this file.

7. Medical and counseling records shall be released at the written request of the student to medical or psychological professionals outside the university or to university officials.

8. University personnel who have access to student records in the course of carrying out their university responsibilities shall not be permitted to release the record to persons outside the university, unless authorized in writing by the student or unless one of the exceptions stated earlier is involved.
9. Confidential information may be released by students to their parents or other trusted third parties through the AccessPlus third party system. Confidential information may also be released by obtaining the student’s written consent or by having the parent establish the student’s dependency as defined by the Internal Revenue Code of 1954, section 152, by furnishing a certified copy of the parent’s most recent federal income tax return.

10. The officials responsible for custody of student records will maintain records of requests and disclosures of personally identifiable nonpublic information. The records of requests, whether granted or not, shall include the person or agency requesting the information and the purpose of the release. These records of requests and disclosures will be available to the student on request. Records of requests and disclosures are not necessary for requests made by the student, by school officials in carrying out their official responsibilities, by persons employed by agencies and offices conducting audits and accreditations of university programs, or any of the other exceptions listed previously.

When Records May Be Withheld

The appropriate university official may request that a student’s record not be released if that student is delinquent in an account with the university or an affiliated organization. The effect of this action is that a transcript will not be released and registration will be withheld.

The appropriate official may also request that records be withheld in instances when official disciplinary action has been taken against a student. Authorization for these actions is supported by The Iowa Code and The Iowa Administrative Code.

In order for such an action to be rescinded, the Office of the Registrar must receive written authorization from the official who originally requested the action, indicating that the student has met the obligation. Further information about this policy can be obtained from the Office of the Registrar.

Review and Challenge of Records

A student may challenge the accuracy of handling of records maintained by the university on grounds that the records are inaccurate, misleading, or otherwise violate the privacy or other rights of the student. The university has established the following procedures to provide an opportunity for the student to correct or delete inaccurate records, or to insert into the record a written explanation of the content. Students who question their records should discuss the issue first with the individual staff person who established or maintains the records. Presumably most issues can be resolved at this level. If a satisfactory resolution cannot be reached, the student should submit the question to the head of the department in which the record is maintained.

The department head will discuss the issue with the staff person and the student challenging the record. If resolution cannot be reached after meeting with the department head, the student may submit the question to the dean or director to whom the department head is responsible. The dean or director will investigate, and will respond in writing.

If the record has not been reconciled through these measures, the student may direct a written request to the president of the university. The president will convene an Ad Hoc Hearing Panel of Access and Confidentiality of Educational Records, composed of two faculty members, two students, and one administrator, appointed by the president for a period of one year, with the president or a designee serving as nonvoting chairperson. The student shall be given an opportunity to present to the panel evidence relevant to the issues raised, and the panel will issue a written response.

Posting Grades and Test Scores

Instructors who wish to inform students of their performance may post grades and test scores on a secure course web site as long as individual students may only access their own grades. The test scores or course grades of students may not be posted in any public location (World Wide Web or hard copy posting) unless the instructor posts the information using a code for each student that is known only by the instructor and the student.

Release of Grades

Students who choose to release their grades to parents or other trusted third parties may do so using the AccessPlus third party system. Reports of a student’s grades are not routinely sent to the student’s parents. Parents of students under 18 years of age may obtain grades by writing to the Office of the Registrar. The grades of other students will be sent to their parents only with written permission of the student, or by establishing dependency as outlined in item 9 under Confidential Information.

ISUCard and Identification Number

Each student is assigned a random university identification number on entry to the university. This number appears on the ISUCard that is provided to each student at the time of first registration. The ISUCard, may be required for some services and/or activities. At the time the ISUCard is issued each student also selects a university password, which is required for electronic access to personal student information.

Loss of an ISUCard should be reported immediately to the ISUCard Office, where the lost card will be invalidated and replaced for a charge. Disciplinary sanctions may be imposed for improper use of the ID card or attempts to obtain, by fraudulent means, any form of identification.

Social Security Number

Social security numbers are collected from prospective and current students, for administrative coordination and record identification purposes only. Although procedures have been established by the registrar for assignment of an alternative number upon request, students who wish to be employed on campus, desire to claim federal educational tax benefits, or are applying to receive financial aid, are required by law to provide their social security numbers for administrative use. The social security number is a confidential record and is maintained as such by the university in accordance with the Family Educational Rights and Privacy Act.

Policy on Student Names

Iowa Regent universities have a common policy regarding student names and name changes. The name on the student record should be the student’s complete and legal name. In evaluating and processing all name change requests, the university reserves the right to require adequate and appropriate documentation as warranted.

Information Disclosure

Iowa State University is required by law to make available to enrolled students, prospective students, and their parents certain information about the university. The information disclosure policy is available at www.iastate.edu/~disclosure. Students without electronic access can obtain the information from the Office of the Registrar, 214 Enrollment Services Center, 515-294-1840 or from the Office of Admissions, 100 Enrollment Services Center, 515-294-5836. A paper copy of the information will be provided upon request.

Registration/Enrollment

In order to register for classes students must first accept their offer of admission by the university. Registration and the payment of assessed fees are required of all who attend classes. Enrollment is not complete until fees are paid, including room and board fees for those living in residence halls. See Registration.

Enrollment Status

Enrollment status is defined for certification purposes as either full-time or half-time.

Full-time status, fall or spring semester
Undergraduates: 12 credits
Graduates: 9 credits

Half-time status, fall or spring semester
Undergraduates: 6 credits
Graduates: 5 credits

Summer status
Summer status depends on the number of weeks a student is enrolled. Always contact the Office of the Registrar to verify a student’s status for a summer session.
With the exception of enrollment certification for veterans' benefits, credit hours are rounded up to the next whole number. For example, credit load of 11.5 credits is rounded up to 12 credits. Contact the Office of the Registrar for more information.
Additional information is available within the college student information offices and through the Office of Admissions.

**Teacher Education**

http://www.teacher.hs.iastate.edu/

A student seeking admission to the Iowa State University Teacher Education Program must be accepted by a selection committee for the specific licensure area which the student seeks to enter. Factors considered in evaluating applications (in addition to the requirements listed below) may include scholarship, interest in teaching, character, interpersonal skills, and physical and mental health. Recommendations by selection committees must be confirmed by the University Teacher Education Coordinating Council before admission is granted.

See the Teacher Information page in this section for more detailed information.

**Preprofessional Study**

Requirements for admission to most professional academic programs can be met by study at Iowa State University. These requirements may be met in the course of obtaining a bachelor’s degree from Iowa State or at a level below that of a degree, depending on the intended field of study. The specific courses taken in a preprofessional program will depend primarily upon the admission requirements of the professional schools to which a student wants to apply. In some programs requiring three years of preprofessional work, a student may, by careful planning, complete requirements for the bachelor’s degree upon transferring to Iowa State up to 32 semester credits of professional coursework. Generally these credits will be counted as electives, but a maximum of 24 may be used as major credits in interdisciplinary studies and a smaller number as major credits in appropriate departments.

See the Preprofessional Study page in this section for more detailed information.
Opportunities for Preprofessional Study

Requirements for admission to most professional academic programs can be met by study at Iowa State University. These requirements may be met in the course of obtaining a bachelor’s degree from Iowa State or at a level below that of a degree, depending on the intended field of study. The specific courses taken in a preprofessional program will depend primarily upon the admission requirements of the professional schools to which a student wants to apply. In some programs requiring three years of preprofessional work, a student may, by careful planning, complete requirements for the bachelor’s degree upon transferring to Iowa State and taking up to 32 semester credits of professional coursework. Generally these credits will be counted as electives, but a maximum of 24 may be used as major credits in interdisciplinary studies and a smaller number as major credits in appropriate departments.

Students who have not declared a major upon entry should enter as preprofessional students, i.e., premedical, prelaw, PHP (preprofessional health programs), or GENPV (General Undergraduate Studies Pre Vet), until they choose a major or transfer to a professional school. All students, whether they have selected a major or not, are encouraged to identify their interest in a professional career by designating it on their application.

Information about preprofessional program admissions requirements and career opportunities in human health or law may be obtained in the Liberal Arts and Sciences Advising Center. Information about veterinary medicine admissions requirements and career opportunities may be obtained from the coordinator of the pre-veterinary program in the Office of the Dean of the College of Veterinary Medicine.

Clinical Laboratory Science/Medical Technology

Clinical laboratory scientists, still commonly referred to as medical technologists, are important members of health-care teams. They perform the chemical, microscopic, radio-assy, and microbiological tests that are necessary in disease diagnosis, and they type and cross-match blood samples to facilitate blood transfusions. They usually work under the supervision of a physician in a hospital or clinic laboratory, but may also be employed by a pharmaceutical company or by manufacturers of analytical instruments. The professional training requires 12 months in a hospital-based CLS/MT program following at least 3 years of college study that emphasizes chemistry and the biological sciences. Students may earn a bachelor’s degree in specific ISU majors, by completing the admissions requirements of the CLS/MT program and most of the degree requirements in 3 years on campus, then spending their fourth year in one of the hospital programs that are affiliated with Iowa State University. Before beginning the off-campus studies, students must earn at least 88 credits; the 32 most recent credits must have been earned in residence at ISU. A maximum of 32 semester credits earned in professional CLS/MT school can be used to partially fulfill the requirements for the bachelor’s degree. Students who complete all degree requirements in residence at the university may apply to any school of medical technology for which the admission requirements have been met.

The following CLS/MT programs are affiliated with Iowa State University:
- Mercy College of Health Sciences Clinical Laboratory Science Program, Des Moines, Iowa. Program Director: Kyla Deibler.
- St. Luke’s Methodist Hospital, Cedar Rapids, Iowa. Program Director: Carol Collingsworth. Medical Director: Lineah Harris, MD

Dentistry

Dentists diagnose, treat, and try to prevent diseases and injuries of the teeth, jaws, and mouth. Usually a general practitioner will have spent 3 or 4 years taking preprofessional courses at the undergraduate level and 4 years in dental school earning the degree of doctor of dental surgery (D.D.S.) or doctor of dental medicine (D.M.D.). Learning a specialty requires at least 2 more years. The courses necessary for admission to most dental schools include English, biology, general and organic chemistry, and physics. Students may earn a degree in any major that Iowa State University offers as they meet the admission requirements; they should choose their major to reflect their own interests and abilities. Highly qualified students may be accepted into dental school after 3 years of preprofessional study without earning a baccalaureate degree.

Health Information Management

Health information managers serve as supervisors of medical records departments in hospitals, clinics, nursing homes, and other healthcare institutions. Certified registered record administrators (R.R.A.) must have completed a program leading to a bachelor’s degree in medical record administration. Most professional programs are 2 years in length and follow 2 years of college study in chemistry, biology, the humanities, social sciences, languages, and philosophy. Students may take the preprofessional courses at Iowa State University and then transfer to a university offering the professional program or they may earn a bachelor’s degree at Iowa State University before entering a health information management program.

Hospital and Health Administration

Administrators of health care organizations manage and guide the varied activities in hospitals, clinics, nursing homes, and mental health facilities. The professional requirement may be for a master’s degree or a bachelor’s degree, depending upon the size of the institution and whether an upper or middle entry-level position is desired. Students at Iowa State may take general education courses for two or more years and then transfer to a university offering a bachelor’s degree in health administration, or they may spend four years earning a bachelor’s degree in any department before entering a master’s degree program at the University of Iowa or other university. Courses required for admission to master’s degree programs in hospital and health administration vary, but may include introductory accounting, management, statistics, and economics.

Human Medicine

Physicians study, diagnoses, and treat illness and injury. They may work in offices, clinics, hospitals, or laboratories, in private practice or for government or industry. Their professional training usually consists of 4 years of study in a college of medicine to earn the doctor of medicine (M.D.) degree, and then 3 or more years in hospital residency learning a specialty such as family medicine, pediatrics, surgery, obstetrics, or psychiatry. A degree of doctor of osteopathy (D.O.) is awarded to those students who complete 4 years in a college of osteopathic medicine before their residency. All medical schools recommend a broad preprofessional education that includes courses in biology, chemistry, physics, mathematics, English, the social sciences, arts and humanities. The degree of a premedical student can be from any college and in any curriculum or major offered by the university. The major should reflect the student’s interests and provide appropriate preparation for an alternative career.

Law

An attorney offers assistance, often where a third-party neutral arbitrator is required to resolve conflicts. Many attorneys work in private practice, but others secure positions in the public sector, e.g., federal or state governmental agencies. A minimum of three years from an American Bar Approved (ABA) law school is required to earn a Doctor of Jurisprudence (J.D.) degree. A bachelor’s degree is required for admission to all accredited law schools. A student planning to enter law school may pursue an undergraduate degree in any discipline. The choice of the bachelor’s degree should reflect a student’s passion and personal interests and not be perceived as being the best degree to help them be admitted into law school. Appropriate courses should be completed that will enhance a student’s development of critical thinking skills, including analytical written and oral skills. An understanding of business, social sciences, and humanities is necessary to comprehend the pluralistic society within and outside of the United States. These courses should include accounting, management, political science, psychology, crim-
inal justice, economics, philosophy, English literature, and history. The completion of these courses will provide students with a knowledge base and skill sets that will assist them with their preparation for law school. Courses in mathematics and statistics are also helpful in developing analytical skills. Advanced writing courses and speech communication courses will also serve students well.

Library and Information Science
Librarians and information science specialists select, organize, preserve and promote information resources as well as advocate and teach information literacy skills. Professional opportunities include work for libraries in academic institutions, public education, city and county municipalities, medical facilities, government agencies, and corporate settings. They also have work opportunities in the publishing and information technology professions. Master’s degree programs in library and information science provide the professional preparation. Iowa State students may earn a bachelor’s degree in any department before entering a professional master’s degree program. They may choose majors that reflect their interests and provide a foundation for working in the library and information science field. Nursing

Occupational Therapy
Occupational therapists provide purposeful activities to help those who have been disabled by physical illness or injury, birth defects, emotional disorder, aging, drug abuse, or other problems to learn to cope with everyday living. Therapists treat patients in hospitals, school systems, and rehabilitation centers. Students may complete a bachelor’s degree in any major at Iowa State University, and then enter a master’s or doctoral degree program at another university.

Optometry
Optometrists examine, diagnose, treat and manage diseases of the visual system, the eye and associated structures. Treatment may include corrective glasses or contacts, vision therapy and therapeutic drugs. Optometry programs usually set up their own offices to work in. Professional study requires 4 years in a school or college of optometry and leads to the doctor of optometry (O.D.) degree. All optometry schools require at least 90 semester credits of preparatory courses, including biology, chemistry, physics, mathematics, and English. Certain optometry schools require a bachelor’s degree. Students wishing to earn the bachelor’s degree from Iowa State University may choose any major and take the courses required for graduation with that major as they take the courses required for admission to a professional optometry program.

Pharmacy
Pharmacists prepare and dispense therapeutic drugs; educate health care professionals, patients and the general public about the appropriate use of drugs; conduct pharmaceutical research and work in industrial settings which involve the manufacture, marketing and advertising of pharmaceutical products. Students may complete prepharmacy courses at Iowa State University. A major (preveterinary medicine is not a major) should be selected that is allied to each student’s vocational interests. In addition, students must complete a knowledge base and skill sets that will assist them with their preparation for pharmacy school. Courses in mathematics and statistics are also helpful in developing analytical skills. Advanced writing courses and speech communication courses will also serve students well.

Physician Assistant
A physician assistant provides medical services under the supervision of a licensed physician. PAs conduct physical examinations, order and interpret laboratory tests, make diagnostic and treatment decisions, and are allowed to prescribe medication in most states. Certification as a physician assistant requires at least 2 years in a professional program at the master’s degree level. Applicants must have had health-care experience with direct patient contact experience. Students must have earned a bachelor’s degree before entering a PA program. The degree can be in any area but the student must complete the pre-requisite courses for the PA program. These usually include courses in biology, chemistry, psychology, and statistics.

Podiatry
Podiatrists diagnose, and treat diseases and disorders of the human foot and ankle. They treat patients in private and group practice, hospitals, and, increasingly, in industrial and sports-related positions. Professional training requires 4 years in a college of podiatric medicine and leads to the degree of doctor of podiatric medicine (D.P.M.). This is usually followed by 1 to 3 years in a hospital residency. All podiatric colleges require at least 3 years of professional study, including courses in biology, general and organic chemistry, physics, and English. Most entrants have a bachelor’s degree, which may be in any major. A few students may complete the admission requirements and must of the bachelor’s degree requirements in 3 years. If so, a maximum of 32 semester credits may be transferred to Iowa State University from the first year in an accredited podiatric college in order to complete the requirements for the bachelor’s degree.

Theology or Religious Studies
The professional education of a student of religion can follow one of two paths. The path to a profession as a pastor, priest, rabbi or other leadership position in a religious tradition usually requires 3 years in a program leading to the master of divinity (M.Div.) offered at a school of divinity or of theology. The path to a profession as a teacher of religious studies at the college level requires 4-7 years in a program leading to the Ph.D. at a graduate school of Religious Studies. Both seminaries and graduate schools require a bachelor’s degree for admission. The American Association of Theological Schools recommends the following areas of study as the best preparation for theological studies: English language and literature; history, including non-Western culture; philosophy; natural sciences, social sciences, especially psychology, sociology and anthropology; the fine arts; Biblical and modern languages; and religion, both Western and Eastern. Although students in a variety of major fields may qualify for admission to a theological school, interested persons are advised to review their proposed programs with a representative of the Religious Studies Program in the Department of Philosophy and Religious Studies.

Veterinary Medicine
About 75% of all veterinarians are engaged in private practice. In a mixed practice, they diagnose and treat health problems among a variety of animals. Others specialize in one species (e.g., feline, pet bird) and still others specialize in a specific discipline within veterinary medicine (e.g., cardiology, ophthalmology). Veterinarians may also choose public and corporate practice (e.g., public health, education, research, food safety, industry, laboratory animal medicine, aquatic animal medicine, poultry medicine, and military veterinary medicine).

The professional program requires four years at a college of veterinary medicine and leads to the doctor of veterinary medicine degree (D.V.M.). Admission to a veterinary college involves at least two years of preprofessional college education. Candidates must take courses in biology, chemistry, genetics, physics, English, humanities, social sciences, speech, anatomy and physiology, and biochemistry. (For Iowa State University see Veterinary Medicine, Admission Requirements; for most recent information, consult the College of Veterinary Medicine Web site: www.vetmed.iastate.edu.)

Students may pursue their preveterinary preparation in any college at Iowa State University. A major (preveterinary medicine is not a major) should be selected that is allied to each student’s vocational interests.
in veterinary medicine or that otherwise offers vocational satisfaction in the event that plans for entry into the College of Veterinary Medicine change. Students are encouraged to pursue a bachelor’s degree; the most effective progress toward a bachelor’s degree is made when a major is selected upon entry and no change occurs before graduation. However, students who have not even considered a career other than veterinary medicine may need some time to explore possibilities before selection of a major.

To assist students who have indicated interest in the preveterinary program for the College of Veterinary Medicine and are undecided about a major, an advising category is available known as GENPV (General Undergraduate Studies Pre Vet). Orientation and advising services for these students are designed to help students fulfill preveterinary course requirements, to introduce available majors and careers allied to veterinary medicine, and to introduce career options in veterinary medicine. GENPV students must select a major by the end of their second semester. Some Iowa State University majors allow, by careful planning, the opportunity for a student to earn the bachelor’s degree by combining credits from three years of preprofessional study and one year of professional study in the College of Veterinary Medicine.
The mission of University Teacher Education is to develop educators who are caring, competent, and certified. Students who successfully complete the requirements for any of the endorsement areas offered at ISU must demonstrate the skills and knowledge required of beginning teachers. (See Iowa Teaching Standards and Criteria section.) University Teacher Education is a shared responsibility that spans three colleges. For most licensure areas, students major in a content area while taking additional education courses. All students who are recommended by Iowa State University for teacher licensure must meet the requirements of University Teacher Education and be recommended by their department, college, and the ISU recommending official.

Undergraduate Teacher Licensure Areas
An undergraduate student seeking a bachelor’s degree must be enrolled in the department in which he or she plans to major and must meet the graduation requirements of that department and college. Currently, there are fifteen undergraduate teacher licensure areas offered at Iowa State University. These areas and their corresponding grade levels are listed below:

- Agricultural Education (grades 5-12)
- Biology (grades 5-12)
- Chemistry (grades 5-12)
- Early Childhood Education (birth-grade 3, including special education) and Early Childhood Special Education (PK)
- Earth Science (grades 5-12)
- Elementary Education (grades K-6)
- English (grades 5-12)
- Family and Consumer Sciences (grades 5-12)
- Health Education (grades 5-12)
- History-Social Sciences (grades 5-12)
- Mathematics (grades 5-12)
- Music (grades K-12)
- Physical Education (grades K-12)
- Physics (grades 5-12)
- World Languages and Cultures (French, German, and Spanish) (grades 5-12)

Additional Endorsements
Students must fulfill the requirements for one of the licensure areas listed above to add the endorsements below.

- Art (K-8)
- Basic Science (K-8)
- Coaching Interscholastic Athletics (grades K-12)
- English and Language Arts (K-8)
- English as a Second Language (grades K-12)
- General Science (grades 5-12)
- Health (K-8)
- History (K-8)
- Instructional Strategist I: Mild/Moderate Disabilities (grades K-8 or 5-12)
- Instructional Strategist II: Behavior Disorders/Learning Disabilities (K-12)
- Mathematics (K-8)
- Physical Science (5-12)
- Reading (grades K-8 or 5-12)
- Social Sciences (K-8)
- Speech Communication (grades 5-12)
- World Languages and Cultures (French, German, Latin, Russian, and Spanish) (grades K-8)

Post-Bachelor’s Teacher Licensure Areas
Students already holding an appropriate bachelor’s degree may pursue teacher licensure in any of the undergraduate licensure areas listed above. Interested students should consult with the coordinator of the area in which they plan to specialize so that an individualized program of study can be developed.

Graduate Teacher Licensure Areas
Currently, there are five graduate initial teacher licensure programs. These programs are designed for students who do not currently hold a teaching license. The programs are listed below:

- Agricultural Education (M.S.)
- Family and Consumer Sciences Education (M.Ed. or M.S.)
- Mathematics Education (M.Ed.)
- Physical Education (M.S.)
- Secondary Sciences Education (M.A.T.)

Iowa State University also offers Master’s programs for practicing teachers. The Mathematics Department offers a Masters in School Mathematics. (See Mathematics in Courses and Programs section of this catalog.) The Curriculum and Instruction Department offers a Master’s degree program and a certificate program that lead to a special education endorsement. (See Curriculum and Instruction in Courses and Programs section of this catalog.)

Graduate programs are also available for those who seek licensure in Educational Leadership and Policy Studies as PK-12 school principals or PK-12 superintendents. (See Educational Leadership and Policy Studies in Courses and Programs section of this catalog.)

Standards
University Teacher Education has a rigorous standards-based curriculum. Two sets of standards are used in the program, one that is targeted for pre-service teachers (University Teacher Education Standards which originates from the Iowa Administrative Code, Chapter 79, Standards for Practitioner Preparation Programs) and the other set that is targeted for in-service teachers (the Iowa Teaching Standards and Model Criteria adopted by the State Board of Education), the latter is emphasized during student teaching. Both are listed below in full.

University Teacher Education Standards
1. Content/subject matter specialization
   The candidate demonstrates an understanding of the central concepts, tools of inquiry, and structure of the discipline(s) the candidate teaches, and creates learning experiences that make these aspects of the subject matter meaningful for students. This is evidenced by a completion of a 30-semester-hour teaching major which, at a minimum, must include the requirements for at least one of the basic endorsement areas, special education teaching endorsements, or secondary level occupational endorsements. Each elementary candidate must also complete a field of specialization in a single discipline or a formal interdisciplinary program of at least twelve semester hours.

2. Student learning
   The candidate demonstrates an understanding of human growth and development and of how students learn, and receives learning opportunities that support intellectual, career, social and personal development.

3. Diverse learners
   The candidate demonstrates an understanding of how students differ in their approaches to learning and creates instructional opportunities that are equitable and adaptable to diverse learners.
4. **Instructional planning**  
The candidate plans instruction based upon knowledge of subject matter, students, the community, curriculum goals, and state curriculum models.

5. **Instructional strategies**  
The candidate demonstrates an understanding and use of a variety of instructional strategies to encourage students development of critical and creative thinking, problem-solving, and performance skills.

6. **Learning environment/classroom management**  
The candidate uses an understanding of individual and group motivation and behavior; creates a learning environment that encourages positive social interaction, active engagement in learning, and self-motivation; maintains effective classroom management; and is prepared to address behaviors related to substance abuse and other high-risk behaviors.

7. **Communication**  
The candidate uses knowledge of effective verbal, nonverbal, and media communication techniques, and other forms of symbolic representation, to foster active inquiry, collaboration, and support interaction in the classroom.

8. **Assessment**  
The candidate understands and uses formal and informal assessment strategies to evaluate the continuous intellectual, social, and physical development of the student, and effectively uses both formative and summative assessment of students, including student achievement data, to determine appropriate instruction.

9. **Foundations, reflective practice and professional development**  
The candidate develops knowledge of the social, historical, and philosophical foundations of education. The candidate continually evaluates the effects of the candidate’s choices and actions on students, parents, and other professionals in the learning community; actively seeks out opportunities to grow professionally; and demonstrates an understanding of teachers as consumers of research and as researchers in the classroom.

10. **Collaboration, ethics and relationships**  
The candidate fosters relationships with parents, school colleagues, and organizations in the larger community to support students learning and development; demonstrates an understanding of educational law and policy, ethics, and the profession of teaching, including the role of boards of education and education agencies; and demonstrates knowledge and dispositions for cooperation with other educators, especially in collaborative/co-teaching as well as in other educational team situations.

11. **Technology**  
The candidate effectively integrates technology into instruction to support student learning.

12. **Methods of teaching**  
Methods of teaching have an emphasis on the subject and grade level endorsement desired.

### Iowa Teaching Standards and Criteria

**Standard 1:** Demonstrates ability to enhance academic performance and support for implementation of the school district student achievement goals.

The teacher:
1. Provides evidence of student learning to students, families, and staff.
2. Implements strategies supporting student, building, and district goals.
4. Accepts and demonstrates responsibility for creating a classroom culture that supports the learning of every student.
5. Creates an environment of mutual respect, rapport, and fairness.
6. Participates in and contributes to a school culture that focuses on improved student learning.
7. Communicates with students, families, colleagues, and communities effectively and accurately.

**Standard 2:** Demonstrates competence in content knowledge appropriate to the teaching position.

The teacher:
1. Understands and uses key concepts, underlying themes, relationships, and different perspectives related to the content area.
2. Uses knowledge of student development to make learning experiences in the content area meaningful and accessible for every student.
3. Relates ideas and information within and across content areas.
4. Understands and uses instructional strategies that are appropriate to the content area.

**Standard 3:** Demonstrates competence in planning and preparing for instruction.

The teacher:
1. Uses student achievement data, local standards, and the district curriculum in planning for instruction.
2. Sets and communicates high expectations for social, behavioral, and academic success of all students.
3. Uses student developmental needs, background, and interests in planning for instruction.
4. Selects strategies to engage all students in learning.
5. Uses available resources, including technologies, in the development and sequencing of instruction.

**Standard 4:** Uses strategies to deliver instruction that meet the multiple learning needs of students.

The teacher:
1. Aligns classroom instruction with local standards and district curriculum.
2. Uses research-based instructional strategies that address the full range of cognitive levels.
3. Demonstrates flexibility and responsiveness in adjusting instruction to meet student needs.
4. Engages students in varied experiences that meet diverse needs and promote social, emotional, and academic growth.
5. Connects students’ prior knowledge, life experiences, and interests in the instructional process.
6. Uses available resources, including technologies, in the delivery of instruction.

**Standard 5:** Uses a variety of methods to monitor student learning.

The teacher:
1. Aligns classroom assessment with instruction.
2. Communicates assessment criteria and standards to all students and parents.
3. Understands and uses the results of multiple assessments to guide planning and instruction.
4. Guides students in goal setting and assessing their own learning.
5. Provides substantive, timely, and constructive feedback to students and parents.
6. Works with other staff and building and district leadership in analysis of student progress.

**Standard 6:** Demonstrates competence in classroom management.

The teacher:
1. Creates a learning community that encourages positive social interaction, active engagement, and self-regulation for every student.
2. Establishes, communicates, models, and maintains standards of responsible student behavior.
3. Develops and implements classroom procedures and routines that support high expectations for student learning.
4. Uses instructional time effectively to maximize student achievement.
5. Creates a safe and purposeful learning environment.

**Standard 7:**
Engages in professional growth.

The teacher:
1. Demonstrates habits and skills of continuous inquiry and learning.
2. Works collaboratively to improve professional practice and student learning.
3. Applies research, knowledge, and skills from professional development opportunities to improve practice.
4. Establishes and implements professional development plans based upon the teacher’s needs aligned to the Iowa Teaching Standards and district/building student achievement goals.

**Standard 8:**
Fulfills professional responsibilities established by the school district.

The teacher:
1. Adheres to board policies, district procedures, and contractual obligations.
2. Demonstrates professional and ethical conduct as defined by state law and individual district policy.
3. Contributes to efforts to achieve district and building goals.
4. Demonstrates an understanding of and respect for all learners and staff.
5. Collaborates with students, families, colleagues, and communities to enhance student learning.

**Electronic Portfolio**
Each teacher candidate is required to demonstrate acquisition of the knowledge, skills and dispositions designated by the standards above for an Iowa teaching license at a level appropriate for a novice teacher. The e-portfolio allows University Teacher Education to demonstrate to the Iowa Department of Education that each student recommended for an initial teaching license has an understanding of these standards. At decision point 1, before signing off on admission materials for the student, the adviser/coordinator will check to see if the student has started their e-portfolio with a minimum of one graded artifact uploaded. At decision point 2, before signing off on student teaching materials for the student, the adviser/coordinator will check to see if the student has one graded artifact uploaded for each of the 12 standards. At decision point 3, before signing off on licensure materials for the student, the coordinator will check to see if the student has 2 graded artifacts uploaded for each of the 12 standards. At decision point 3, prior to recommendation for licensure, students will be required to write a synthesis of evidence assignment which would address all twelve teacher education standards. The writing mechanics (punctuation, word usage, etc.) will be considered. The focus on the synthesis of evidence will be on whether or not the student has convinced the evaluator that s/he has met each standard. Students will receive notification from evaluators regarding their performance on the synthesis of evidence. A ‘not proficient’ rating on the synthesis of evidence will result in a recommendation to deny licensure. Departments may have additional requirements (see licensure area coordinator for more information). See the following webpage for more information on the electronic portfolio: [http://www.teacher.hs.iastate.edu/eportfolio.php](http://www.teacher.hs.iastate.edu/eportfolio.php)

**The General Education Requirement**
All prospective teachers are required to meet general education requirements as a part of their preparation.

### Undergraduate Students

Undergraduate students must complete studies in the following general education groups. General education courses may be found in many departments. Credits listed are minimum requirements. Specific departments and/or colleges may require additional credits. Credits used to satisfy these general education requirements typically satisfy department and college general education requirements. (See licensure area coordinator for more information.)

<table>

<td>6</td>
</tr>
<tr>
<td>Communication Skills</td>
<td>9</td>
</tr>
<tr>
<td>LIB 160 Library Instruction</td>
<td>0.5</td>
</tr>
</tbody>
</table>

The above requirements must include:
- ENGL 150 Critical Thinking and Communication
- ENGL 250 and Written, Oral, Visual, and Electronic Composition (or equivalent)

One course that develops interpersonal or group presentation
- HD FS 102 Individual and Family Life Development
- or PSYCH 230 Developmental Psychology

One course in American History or Government (see approved list)

### Post-Bachelor’s Students

Students holding an appropriate bachelor’s degree who wish to pursue teacher licensure must have at least one course in each of the following five general education groups identified for undergraduate students in the preceding section: Natural Sciences, Mathematics or Statistics, Social Sciences, Humanities, and Communication Skills. Individual departments preparing teachers may require additional credits in general education. (See licensure area coordinator for more information.)

### Master’s Students

Each Master’s program will determine what, if any, general education requirements Master’s students must fulfill beyond a bachelor’s degree from a regionally accredited institution. (See licensure area coordinator for more information.)

### Professional Teacher Education Requirement (Professional Core)

#### Clinical Experience Requirement

The Standards for Practitioner and Administrator Preparation Programs (chapter 79.13(11)) requires that “candidates admitted to a teacher preparation program participate in field experiences including both observation and participation in teaching activities in a variety of school settings and totaling at least 80 hours’ duration, with at least 10 hours occurring prior to acceptance into the program.” This requirement may be met through a pre-student teaching course (e.g., CI 280, CI 480) or, in certain endorsement areas, a course designated to provide an equivalent experience. Students complete a background check before initial placement in schools and other appropriate locations. Course fees (ranging from $8.00 to $329.00) are assessed to cover the costs of supervision and placement with a cooperating teacher.

### Undergraduate Students

Prospective teachers must complete certain studies related directly to the profession of teaching. All undergraduate students in teacher education must take the following courses prior to student teaching, unless the student’s licensure area has an approved content-area course deemed to be equivalent (see specific Licensure Area Requirements section below for details.)

#### Early Childhood Education and Elementary Education

| C I 201 | Digital Learning in the PK-6 Classroom | 3 |
| C I 204 | Social Foundations of American Education | 3 |
Admission. A minimum of 20 semester credits averaging 2.50 or above upon completion of nine semester credits averaging 2.50 or above at GPA or above may be admitted tentatively; full admission may be granted Students transferring from other institutions with a minimum of 2.50 point (see licensure area coordinator for more information).

Departments may have higher eligibility requirements for each decision without full admission to University Teacher Education (decision point 1). to Student Teaching (decision point 2) and Licensure (decision point 3) ments listed below will be checked. Students will not be able to progress progress of teacher education students. Admission to University Teacher

Education Office (133 MacKay) monitors the progress of teacher education students. Admission to University Teacher Education is the first of three decision points. At this time, the require-ments listed below will be checked. Students will not be able to progress to Student Teaching (decision point 2) and Licensure (decision point 3) without full admission to University Teacher Education (decision point 1). Departments may have higher eligibility requirements for each decision point (see licensure area coordinator for more information).

Recommendations by selection committees must be confirmed by the University Teacher Education Coordinating Council before admission is granted. Students may apply as early as four semesters before the one in which they plan to enroll for student teaching; however, they must be fully admitted into University Teacher Education at least one year prior to the semester they complete the Request for Student Teaching Place-ment. Students in accelerated graduate programs must be fully admitted by mid-semester prior to their planned student teaching semester.

Requirements for full admission to University Teacher Education as an undergraduate:
1. A minimum 2.5 cumulative grade point average.
2. Successful completion of one of the following basic skills tests: A composite Praxis I (PPST) score of 522, with a minimum of 170 for each test (reading, writing, and mathematics). Minimum scores for the basic skills tests may be subject to change. Details regarding the scores, dates and fees for these tests are available online: www.teacher.hs.iastate.edu.
3. Documented completion of ISU approved 10 hours of pre-student teaching clinical experience.
4. All Curriculum and Instruction (C I), Human Development and Family Studies (HD FS) and Special Education (Sp Ed) courses required for licensure have a minimum grade requirement of a C (pedagogy coursework). Courses in the department of the major specifically required for teacher licensure have a minimum grade requirement of a C- (content coursework).
5. An acceptable Iowa criminal background check report initiated by ISU’s recommending official.
6. E-portfolio contains a minimum of one graded artifact (that received a proficient rating).

Requirements for full admission to University Teacher Education as a post-bachelor’s student:
1. A bachelor’s degree from a regionally accredited institution and a minimum 2.5 cumulative grade point average from that institution.
2. Successful completion of one of the following basic skills test:
   - Minimum GRE scores (400 on each of the Verbal and Quantitative sections.) Some licensure areas require higher GRE scores.
   - A composite Praxis I (PPST) score of 522, with a minimum of 170 for each test (reading, writing, and mathematics.) Some licensure areas require higher Praxis I scores.
Minimum scores for the basic skills tests may be subject to change. Details regarding the scores, dates and fees for these tests are available online: www.teacher.hs.iastate.edu.
3. Documented completion of ISU approved 10 hours of pre-student teaching clinical experience.
4. All Curriculum and Instruction (C I), Human Development and Family Studies (HD FS) and Special Education (Sp Ed) courses required for licensure have a minimum grade requirement of a C (pedagogy coursework). Courses in the department of the major specifically required for teacher licensure have a minimum grade requirement of a C- (content coursework).
5. An acceptable Iowa criminal background check report initiated by ISU’s recommending official.
6. E-portfolio contains a minimum of one graded artifact (that received a proficient rating).

Requirements for full admission to University Teacher Education as a Master’s student:
1. Full admission to an appropriate Master’s degree program.

Education
C I 245 Strategies in Teaching 2
C I 268 Strategies Practicum 1
C I 332 Educational Psychology of Young Learners 3
C I 406 Multicultural Foundations of School and Society: Introduction 3
SP ED 250 Education of the Exceptional Learner in a Diverse Society 3
Student teaching (16 weeks) 16

Secondary Education and K-12

C I 333 Educational Psychology 3
C I 406 Multicultural Foundations of School and Society: Introduction 3
SP ED 401 Teaching Secondary Students with Exceptionalities in General Education 3

Student teaching (minimum 14 weeks) (See licensure area coordinator for more information) 14-16

Students in K-12 licensure areas and secondary education (grades 5-12) licensure areas must also complete the course listed below unless the student’s licensure area has an approved equivalent. Areas with approved equivalents include: Agricultural Education, Physical Education and all Secondaries. (See licensure area coordinator for more information).

C I 426 Principles of Secondary Education

Post-Bachelor’s Students
Students who hold an appropriate bachelor’s degree and seek a teaching license must complete the professional education requirements listed above through coursework or examination.

Master’s Students
Prospective teachers must complete certain studies related directly to the profession of teaching. All students enrolled in Master’s programs that lead to initial licensure must take the following courses prior to student teaching, unless the student’s licensure area has an approved content area course deemed to be equivalent. (See Master’s Programs section below for details.)

SP ED 501 Teaching Secondary Students with Exceptionalities in General Education 3
C I 505 Using Technology in Learning and Teaching 3
H P C 504 Studies in the Foundations of American Education 3
C I 506 Multicultural Foundations of School and Society: Advanced 3
C I 526 Principles of Secondary Education 3
C I 529 Educational Psychology and the Secondary Classroom 3
Student teaching (minimum 14 weeks) (See teacher licensure area coordinator for more information) 14-16

Admission to University Teacher Education (Decision Point 1)
The University Teacher Education Office (133 MacKay) monitors the progress of teacher education students. Admission to University Teacher Education is the first of three decision points. At this time, the require-ments listed below will be checked. Students will not be able to progress to Student Teaching (decision point 2) and Licensure (decision point 3) without full admission to University Teacher Education (decision point 1). Departments may have higher eligibility requirements for each decision point (see licensure area coordinator for more information).

Students transferring from other institutions with a minimum of 2.50 GPA or above may be admitted tentatively; full admission may be granted upon completion of nine semester credits averaging 2.50 or above at Iowa State University. Students who receive tentative admission are required to reapply the following semester by using the application for admission. A minimum of 20 semester credits averaging 2.50 or above must be earned at Iowa State University to receive institution licensure approval (nine of the required 20 semester hours must precede student teaching).

A student seeking admission to University Teacher Education must be accepted by a selection committee for the specific licensure area which the student seeks to enter. Factors considered in evaluating applications (in addition to the requirements listed below) may include professional dispositions, scholarship, interest in teaching, character, interpersonal skills, results from the background check, and physical and mental health.

Requirements by selection committees must be confirmed by the University Teacher Education Coordinating Council before admission is granted. Students may apply as early as four semesters before the one in which they plan to enroll for student teaching; however, they must be fully admitted into University Teacher Education at least one year prior to the semester they complete the Request for Student Teaching Place-ment. Students in accelerated graduate programs must be fully admitted by mid-semester prior to their planned student teaching semester.

Requirements for full admission to University Teacher Education as an undergraduate:
1. A minimum 2.5 cumulative grade point average.
2. Successful completion of one of the following basic skills tests: A composite Praxis I (PPST) score of 522, with a minimum of 170 for each test (reading, writing, and mathematics). Minimum scores for the basic skills tests may be subject to change. Details regarding the scores, dates and fees for these tests are available online: www.teacher.hs.iastate.edu.
3. Documented completion of ISU approved 10 hours of pre-student teaching clinical experience.
4. All Curriculum and Instruction (C I), Human Development and Family Studies (HD FS) and Special Education (Sp Ed) courses required for licensure have a minimum grade requirement of a C (pedagogy coursework). Courses in the department of the major specifically required for teacher licensure have a minimum grade requirement of a C- (content coursework).
5. An acceptable Iowa criminal background check report initiated by ISU’s recommending official.
6. E-portfolio contains a minimum of one graded artifact (that received a proficient rating).

Requirements for full admission to University Teacher Education as a post-bachelor’s student:
1. A bachelor’s degree from a regionally accredited institution and a minimum 2.5 cumulative grade point average from that institution.
2. Successful completion of one of the following basic skills test:
   - Minimum GRE scores (400 on each of the Verbal and Quantitative sections.) Some licensure areas require higher GRE scores.
   - A composite Praxis I (PPST) score of 522, with a minimum of 170 for each test (reading, writing, and mathematics.) Some licensure areas require higher Praxis I scores.
Minimum scores for the basic skills tests may be subject to change. Details regarding the scores, dates and fees for these tests are available online: www.teacher.hs.iastate.edu.
3. Documented completion of ISU approved 10 hours of pre-student teaching clinical experience.
4. All Curriculum and Instruction (C I), Human Development and Family Studies (HD FS) and Special Education (Sp Ed) courses required for licensure have a minimum grade requirement of a C (pedagogy coursework). Courses in the department of the major specifically required for teacher licensure have a minimum grade requirement of a C- (content coursework).
5. An acceptable Iowa criminal background check report initiated by ISU’s recommending official.
6. E-portfolio contains a minimum of one graded artifact (that received a proficient rating).

Requirements for full admission to University Teacher Education as a Master’s student:
1. Full admission to an appropriate Master’s degree program.
2. Successful completion of one of the following basic skills test:
   —Minimum GRE scores (400 on each of the Verbal and Quantitative sections.) Some licensure areas require higher GRE scores
   OR
   —A composite Praxis I (PPST) score of 522, with a minimum of 170 for each test (reading, writing, and mathematics.) Some licensure areas may require higher Praxis I scores.
   Minimum scores for the basic skills tests may be subject to change. Details regarding the scores, dates and fees for these tests are available online: www.teacher.hs.iastate.edu
3. Documented completion of ISU approved 10 hours of pre-student teaching clinical experience.
4. All Curriculum and Instruction (C I), Human Development and Family Studies (HD FS) and Special Education (Sp Ed) courses required for licensure have a minimum grade requirement of a C (pedagogy coursework). Courses in the department of the major specifically required for teacher licensure have a minimum grade requirement of a C- (content coursework).
5. An acceptable Iowa criminal background check report initiated by ISU’s recommending official.
6. E-portfolio contains a minimum of one graded artifact (that received a proficient rating).

**Maintaining Program Eligibility**

**GPA**
All students admitted to University Teacher Education must maintain a minimum of a 2.5 cumulative grade point average through completion of their licensure requirements.

**Grades**
For teacher education students, all Curriculum and Instruction (C I), Human Development and Family Studies (HD FS) and Special Education (Sp Ed) courses required for licensure have a minimum grade requirement of a C. Courses in the department of the major specifically required for teacher licensure have a minimum grade requirement of a C-. Note: Individual departments preparing teachers may have higher eligibility requirements (see teacher licensure area coordinator for more information). Please note, for all three decision points (admission, student teaching and licensure) incomplete grades are NOT considered acceptable passing grades.

**Electronic Portfolio**
In order to be recommended for licensure, all students must have demonstrated satisfactory performance across the teacher education competencies, as defined by their specific area. (See the teacher licensure area coordinator for more information.) Students’ progress is monitored throughout the program and standards are assessed multiple times. More information is available online: www.teacher.hs.iastate.edu

Factors considered in maintaining program eligibility may include professional dispositions, scholarship, interest in teaching, character, interpersonal skills, results from the background check, and physical and mental health. Throughout the program, a commendation/concern form may be completed by an adviser, coordinator, faculty member, cooperating teacher, or supervisor to document a teacher education student’s knowledge, skills and dispositions worthy of commendation or concern. Significant concerns will result in removal from University Teacher Education.

**Background Checks**
Two background checks will be completed on each student. First, prior to any clinical experiences taking place, students are required to undergo a state of Iowa background check through the Iowa Division of Criminal Investigation. Second, prior to receiving an initial Iowa teaching license, all candidates will undergo a national criminal history background check. The state background check costs $18.00 and the national background check costs $65.00, prices are subject to change.

At the time of a background check, students will also be required to report any prior criminal convictions or pending criminal charges. Any criminal misconduct charge other than parking or speeding violations must be reported. This includes all deferred judgments. In some cases, this will include criminal activity which occurred while a minor. Failure to accurately self-disclose to the appropriate ISU personnel may prevent the student from engaging in a clinical experience or the removal of the student if already placed in a clinical experience.

Students are required to report criminal activity in order to maintain program eligibility. Any criminal misconduct charge a student receives after the first background check is completed must be reported immediately to the Teacher Licensure Analyst located in Teacher Education Services in 133 MacKay. Failure to do so may result in the discharge of the student from University Teacher Education. Please note, on occasion, a more stringent background check may be conducted by a school or other appropriate location, which may lead to a denial of a placement. More information on the Student Self-Reporting of Alleged Criminal Misconduct Policy is located online: www.teacher.hs.iastate.edu.

**Appeals**
Students who do not meet the requirements for decision points may choose to appeal to the University Teacher Education Coordinating Council. The description of the appeals process is available online: www.teacher.hs.iastate.edu.

**Student Teaching (Decision Point 2)**
Student teaching is the culminating experience to the practitioner preparation program at Iowa State University. Depending on the licensure area pursued, student teaching varies in length for a minimum of 14 weeks. A supervisor will make frequent visits to the classroom to ensure success in this experience. Sites for student teachers are within driving distance of campus or at approved out-of-state and international locations. More information can be found online: www.teacher.hs.iastate.edu. Course fees are assessed to cover the costs of supervision and placement with a cooperating teacher. To ensure that students are prepared for this experience, the following requirements must be met prior to submitting your “Request for Student Teaching Placement” form:

1. Full admission to University Teacher Education is required a minimum of 1 year before the start of the student teaching semester. Students in accelerated graduate programs must be fully admitted by mid-semester prior to the student teaching semester.
2. Completion of the “Request for Student Teaching Placement” by the deadline in the fall semester for spring student teaching and by the deadline in the spring semester for fall student teaching. Details regarding this application are available in the University Teacher Education Office.
3. A minimum 2.5 cumulative grade point average.
4. A passing grade as determined by the licensure area must have been earned in all required professional teacher education requirement courses and selected courses in the student’s licensure area. All Curriculum and Instruction (C I), Human Development and Family Studies (HD FS) and Special Education (Sp Ed) courses required for licensure have a minimum grade requirement of a C (pedagogy coursework). Courses in the department of the major specifically required for teacher licensure have a minimum grade requirement of a C- (content coursework).
5. Complete (or concurrently completing) 80 hours of pre-student teaching field experience.
6. Report any criminal misconduct charge. Please note: When the student is enrolled in any field experience or anticipates commencing a field experience within 30 days, any criminal misconduct charge a student receives after the background check is completed must be reported immediately to Teacher Education Services. When the student is not enrolled in any field experience, the charge must be reported as soon as possible but no later than five working days after the incident. Failure to do so may result in the discharge of the student from Teacher Education. The faculty coordinator and the content major department chair will be notified. A committee will meet to review the self-reporting letter and make a decision on the student’s progress.
7. E-portfolio has one graded artifact (that received a proficient rating) uploaded for each of the 12 standards.

**Teacher Licensure (Decision Point 3)**
The Iowa Board of Educational Examiners issues teaching licenses that are valid for specific ages or grades (e.g., Birth-3 for early childhood teachers, K-6 for elementary teachers and 5-12 for secondary teachers).
Endorsements on a teaching license indicate which subject areas a teacher is qualified to teach. An initial teaching license costs $85; price is subject to change. Completion of student teaching and required coursework does NOT guarantee recommendation for a teaching license. The Iowa License may be recommended for students who hold a bachelor’s degree from Iowa State University or another regionally accredited institution and who have completed the following:

1. All requirements for an approved licensure area as designated by Iowa State University and the State of Iowa, including, but not limited to, the general education requirement, the professional teacher education requirement and clinical experiences. Note: Specific courses to be used for licensure may not be taken pass/not pass.

2. A minimum 2.5 cumulative grade point average.

3. All Curriculum and Instruction (C I), Human Development and Family Studies (HD FS) and Special Education (Sp Ed) courses required for licensure have a minimum grade requirement of a C (pedagogy coursework). Courses in the department of the major specifically required for teacher licensure have a minimum grade requirement of a C- (content coursework).

4. A national background check initiated by the Iowa Board of Educational Examiners.

5. Completion of the Iowa Application for Licensure form.

6. Documentation from the student teaching supervisor that the student has successfully completed the final assessment documenting the student’s mastery of the skills and knowledge included in the Iowa Teaching Standards.

7. Department approval by UTEP coordinator.

8. Registrar approval (at this time, graduation is confirmed and holds on records are reviewed).

9. For Early Childhood Education and Elementary Education majors only: Praxis II score of 151 for the 0011 test or a 142 for the 0014 test.

10. E-portfolio has 2 graded artifacts (that received a proficient rating) uploaded for each of the 12 standards. Also, a proficient rating is earned on the synthesis of evidence.

**Undergraduate and Post-Bachelor’s (non-Master’s) Teacher Licensure Area Requirements**

Certain competencies are required of those who plan to teach at the early childhood, elementary or secondary level. For full-time teaching in secondary schools a major in an endorsement area or an approved subject matter concentration of at least 30 semester hours is required. Students interested in adding an additional endorsement area should consult with the coordinator or adviser of the additional area (see the following website for the contact information for the adviser or coordinator who works with students on teacher licensure: www.teacher.hs.iastate.edu). Persons interested in teaching in one of the following endorsement areas should also consult with the appropriate adviser or coordinator. Specific requirements for each teacher licensure area are described below (these requirements are in addition to the General Education Requirements and the Professional Teacher Education Requirements that were listed earlier).

**Agriculture**

The Department of Agricultural Education and Studies is responsible for preparing Agricultural Education teachers for grades 5-12.

For specific content area requirements see Curriculum in Agricultural Education and Studies (Teacher Certification Option).

**Required professional courses are:**

2011-2012

C I 468K  Secondary Science II. Cr. 2.  1-2
C I 417B  Physical Sciences  arr

† Arranged with instructor.

Required content courses are:

CHEM 177  General Chemistry I  4
CHEM 177L  Laboratory in General Chemistry I  1
CHEM 178  General Chemistry II  3
CHEM 178L  Laboratory in College Chemistry II  1
CHEM 211  Quantitative and Environmental Analysis  2
CHEM 211L  Quantitative and Environmental Analysis Laboratory  2
CHEM 301  Inorganic Chemistry  2
CHEM 316  Instrumental Methods of Chemical Analysis  2
CHEM 316L  Instrumental Analysis Laboratory  2
CHEM 324  Introductory Quantum Mechanics  3
CHEM 325  Chemical Thermodynamics  3
CHEM 321L  Laboratory in Physical Chemistry  2
CHEM 322L  Laboratory in Physical Chemistry  2
CHEM 331  Organic Chemistry I  3
CHEM 331L  Laboratory in Organic Chemistry I  1
CHEM 332  Organic Chemistry II  3
CHEM 332L  Laboratory in Organic Chemistry II  1
PHYS 221  Introduction to Classical Physics I  10
PHYS 222  and Introduction to Classical Physics II  10

or

PHYS 111  General Physics  8
& PHYS 112  and General Physics  8
MATH 165  Calculus I  4
MATH 166  Calculus II  4

Minimum of one course in BIOL is required *

* BIOL 211 Principles of Biology I and BIOL 211L Principles of Biology Laboratory I are recommended.

Students with an endorsement in a natural science who seek approval to teach chemistry as an additional subject area must earn credits in the following courses (15 minimum credits):

CHEM 177  General Chemistry I  4
CHEM 177L  Laboratory in General Chemistry I  1
CHEM 178  General Chemistry II  3
CHEM 178L  Laboratory in College Chemistry II  1
CHEM 211  Quantitative and Environmental Analysis  2
CHEM 211L  Quantitative and Environmental Analysis Laboratory  2
CHEM 331  Organic Chemistry I  3
CHEM 331L  Laboratory in Organic Chemistry I  1
CHEM 332  Organic Chemistry II  3
CHEM 332L  Laboratory in Organic Chemistry II  1

or

CHEM 163  College Chemistry  4
CHEM 163L  Laboratory in College Chemistry  1
CHEM 211  Quantitative and Environmental Analysis  2
CHEM 211L  Quantitative and Environmental Analysis Laboratory  2
CHEM 231  Elementary Organic Chemistry  3
CHEM 231L  Laboratory in Elementary Organic Chemistry  1

Students with no natural science endorsement who seek approval to teach chemistry as an additional subject area must complete one of the two sets of courses listed above plus sufficient additional courses to total 24 chemistry credits chosen from:

CHEM 316  Instrumental Methods of Chemical Analysis  2
CHEM 316L  Instrumental Analysis Laboratory  2
CHEM 324  Introductory Quantum Mechanics  3
CHEM 325  Chemical Thermodynamics  3
CHEM 322L  Laboratory in Physical Chemistry  3
BBMB 301  Survey of Biochemistry  3

---

**Early Childhood Education**

The Department of Curriculum and Instruction and the Department of Human Development and Family Studies in the College of Human Sciences share the responsibility for preparing teachers to work with children from birth to age 8 (PK-3 including special education). Students receive two endorsements: Early Childhood Education (birth –grade 3, including special education) and Early Childhood Special Education (PK).

For specific course requirements, see College of Human Sciences, Curriculum in Early Childhood Education.

**Earth Science**

The Department of Geological and Atmospheric Sciences and the Department of Curriculum and Instruction share the responsibility of preparing Earth Science teachers for grades 5-12.

Required professional courses are:

C I 280M  Secondary Science. Cr. 1 or 2  0.5-2
C I 347  Nature of Science  3
C I 418  Secondary Science Methods I: A Research-Based Framework for Teaching Science  2
C I 419  Secondary Science Methods II  2
C I 468J  Secondary Science  1-2
C I 468K  Secondary Science II. Cr. 2.  1-2
C I 417J  Earth Sciences  arr

† Arranged with instructor.

Required content courses are:

GEOL 100  The Earth  3
GEOL 100L  The Earth: Laboratory  1
GEOL 102  History of the Earth  3
GEOL 102L  History of the Earth: Laboratory  1
GEOL 302  Summer Field Studies  6
GEOL 315  Mineralogy and Earth Materials  3
GEOL 315L  Laboratory in Mineralogy and Earth Materials  1
GEOL 316  Optical Mineralogy  2
GEOL 356  Structural Geology  5
GEOL 365  Igneous and Metamorphic Petrology  3
GEOL 368  Stratigraphy and Sedimentation  4
3 credit Geology elective  3
MTEOR 206  Introduction to Weather and Climate  3
ASTRO 120  The Sky and the Solar System  3
ASTRO 150  Stars, Galaxies, and Cosmology  3
CHEM 177  General Chemistry I  4
CHEM 177L  Laboratory in General Chemistry I  1
CHEM 178  General Chemistry II  3
CHEM 178L  Laboratory in College Chemistry II  1
CHEM 211  Quantitative and Environmental Analysis  2
CHEM 211L  Quantitative and Environmental Analysis Laboratory  2
CHEM 231  Elementary Organic Chemistry  3
CHEM 231L  Laboratory in Elementary Organic Chemistry  1

One of the following:

MATH 151  Calculus for Business and Social Sciences
MATH 160  Survey of Calculus
MATH 165  Calculus I
MATH 181  Calculus and Mathematical Modeling for the Life Sciences I

One of the following:

STAT 101  Principles of Statistics
STAT 104  Introduction to Statistics
COM S 107  Applied Computer Programming

3 credit BIOL course  3
Students with an endorsement in a natural science who seek approval to teach earth sciences as an additional subject area must earn 24 credits in the following courses:

- **GEO 100** The Earth 3
- **GEO 100L** The Earth: Laboratory 1
- **GEO 102** History of the Earth 3
- **GEO 102L** History of the Earth: Laboratory 1
- **MTEOR 206** Introduction to Weather and Climate 3
- **ASTRO 120** The Sky and the Solar System 3
- **ASTRO 150** Stars, Galaxies, and Cosmology 3

Additional Earth Science courses 300 level or above to total 24 credits

Students with no other natural science endorsement, but who seek endorsement in this area, must take:

- **GEO 100** The Earth 3
- **GEO 100L** The Earth: Laboratory 1
- **GEO 102** History of the Earth 3
- **GEO 102L** History of the Earth: Laboratory 1
- **MTEOR 206** Introduction to Weather and Climate 3
- **ASTRO 120** The Sky and the Solar System 3
- **ASTRO 150** Stars, Galaxies, and Cosmology 3

Additional Earth Science courses 300 level or above to total 24 credits

See licensure area coordinator for approval prior to taking courses.

**Elementary Education**

The Department of Curriculum and Instruction in the College of Human Sciences is responsible for preparing elementary (K-6) teachers.

For specific course requirements, see College of Human Sciences, Curriculum in Curriculum and Instruction. Several endorsements may be added to a K-6 teaching license. See an adviser for the most current list and the necessary additional requirements.

**English**

The Department of English prepares English teachers for grades 5-12

Required professional courses are:

- **C I 280A** Teacher Aide. Cr. 1 or 2 0.5-2
- **C I 395** Teaching Reading in Middle and Secondary Schools 3
- **ENGL 396** Teaching the Reading of Young Adult Literature 3
- **ENGL 397** Practice and Theory of Teaching Writing in the Secondary Schools 3
- **ENGL 417** Student Teaching arr
- **ENGL 494** Practice and Theory of Teaching Literature in the Secondary Schools 3

† Arranged with instructor.

Required content courses are: see Curriculum, English.

Students seeking to add English as an additional endorsement area must earn 46 credits in the following courses:

**Advanced Writing**

- **ENGL 302** Business Communication 3
- **ENGL 303** Free-Lance Writing for Popular Magazines 3
- **ENGL 304** Creative Writing—Fiction 3
- **ENGL 305** Creative Writing—Nonfiction 3
- **ENGL 306** Creative Writing—Poetry 3
- **ENGL 309** Report and Proposal Writing 3
- **ENGL 314** Technical Communication 3
- **ENGL 315** Creative Writing—Screenplays 3
- **ENGL 316** Creative Writing—Playwriting 3
- **Rhetoric** 3
- **ENGL 310** Rhetorical Analysis 3
- **Language** 3
- **ENGL 220** Descriptive English Grammar Literature 18

Students must earn grades of C or better in all of the above courses.

**Family and Consumer Sciences**

The Family and Consumer Sciences Program in the Department of Apparel, Educational Studies and Hospitality Management prepares Family and Consumer Sciences teachers for grades 5-12.

For specific content area course requirements, see Curriculum, Family and Consumer Sciences Education and Studies.

Required professional courses are:

- **FCEDS 206** Professional Roles in Family and Consumer Sciences 1
- **FCEDS 306** Educational Principles for Family and Consumer Sciences 4
- **FCEDS 318** Occupational, Career and Technical Programs 3
- **FCEDS 413** Curriculum Planning for Family and Consumer Sciences and Family Life Education 4
- **FCEDS 417A** Vocational family and consumer sciences. Cr. 8. 3-8
- **FCEDS 417B** Family and consumer sciences. Cr. 3 to 8. 3-8

Required content courses are:

- **HD FS 102** Individual and Family Life Development 3
- **HD FS 226** Development and Guidance in Middle Childhood 3
- **HD FS 276** Human Sexuality 3
- **HD FS 349** Parenting and Family Diversity Issues 3
- **HD FS 283** Personal and Family Finance 3

One of the following
- **HD FS 341** Housing Finance and Policy 3
- **HD FS 483** Advanced Personal and Family Finance 3
- **HD FS 488** Families in the Economy 2
- **FS HN 111** Fundamentals of Food Preparation 2
- **FS HN 167** Introduction to Human Nutrition 3

One of the following
- **T C 221** Apparel Assembly Processes 3
- **T C 131** Overview of the Fashion Industry 3
- **T C 165** Dress and Diversity in Society 3
- **T C 204** Textile Science 3
- **HD FS 239** Housing and Consumer Issues 3
- or **AESHM 342** Aesthetics of Consumer Experience 3

**Health Education**

The Department of Kinesiology prepares Health teachers for grades 5-12.

Required professional courses are:

- **H S 375** Teaching-Learning Process in Health Education 3
- **H S 417** Supervised Teaching in Health Education in the Secondary School 12
Required content courses are:

**Mathematics**

The Mathematics Department and the Curriculum and Instruction Department share the responsibility for the preparation of Mathematics teachers for grades 5-12.

For specific content area course requirements, contact Curriculum and Instruction Advising Office. Required professional courses are:

- **MATH 165** Calculus I 4
- **MATH 166** Calculus II 4
- **MATH 201** Introduction to Proofs 3
- **MATH 265** Calculus III 4
- **MATH 266** Elementary Differential Equations 3
- or **MATH 267** Elementary Differential Equations and Laplace Transforms
- **MATH 301** Abstract Algebra I 3
- **MATH 317** Theory of Linear Algebra 4
- **MATH 341** Introduction to the Theory of Probability and Statistics I 3
- **MATH 397** Teaching Secondary Mathematics Using University Mathematics
- **MATH 435** Geometry I 3
- **MATH 436** Geometry II 3
- **MATH 437** Geometry III 3

One of the following

- **MUSIC 351** Music-Elementary (Same as C I 417R)
- **MUSIC 352** Choral Materials and Methods
- **MUSIC 353** Instrumental Administration, Materials, and Methods or **MUSIC 456** Choral Materials and Methods
- **MUSIC 354** Methods of Music Education
- **MUSIC 355** Introduction to Music Education
- **MUSIC 356** Technology in Music Instruction

For specific content area course requirements, see Curriculum, in Music.

Required professional courses are:

- **MUSIC 101** Principles of Music Theory
- **MUSIC 201** Introduction to Music Education
- **MUSIC 202** Methods of Music Education

One of the following

- **MUSIC 401** Choral Literature
- **MUSIC 402** Marching Band and Jazz Ensemble Techniques
- **MUSIC 403** Music-Secondary (Same as C I 417S) 8-12
- **MUSIC 404** Music-Elementary (Same as C I 417R) 8-12

Required content courses are: see Curriculum, in Music.

**Physical Education**

The Kinesiology Department prepares Physical Education teachers for grades K-12.

Kinesiology and Health (instead of Health and Human Performance)

**World Languages**

The Department of World Languages and Cultures prepares World Language teachers for grades 5-12.

World Language teachers can earn an endorsement in French, German or Spanish.

For specific content area course requirements, see Curriculum, World Languages and Cultures.

Required professional courses are:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>C I 280L</td>
<td>Early Field Experience. Cr. 5</td>
<td>0.5-2</td>
</tr>
<tr>
<td>C I 280A</td>
<td>Teacher Aide. Cr. 1 or 2</td>
<td>0.5-2</td>

<td>Foreign Language (Same as C I 417G.)</td>
<td>8-12</td>
</tr>
<tr>
<td>WLC 487</td>
<td>Methods in Secondary School World Language Instruction</td>
<td>3</td>
</tr>
</tbody>
</table>
Students seeking approval to teach a world language as their first endorsement must have a major in the target language. For an additional endorsement in a world language, students must earn 25 credits in that language. Nine (9) credits must be at the 300 level or above with six (6) of these credits in composition and conversation. Courses at the 100 level are not counted in the 25 required credits. For an endorsement in Latin, 10 of the 25 credits must be at the 300 or 400 level and must include HIST 403 (CL ST 403). All students seeking to teach a world language must demonstrate their proficiency in the language by taking the ACTFL OPI (Oral Proficiency Interview). Students are responsible for the cost of the administration of the OPI and must request that their scores from the OPI be added to their transcript.

Requirements for Additional Endorsements

Students may elect to add additional endorsements to their teaching license by completing the necessary requirements. All “Undergraduate Teacher Licensure Areas” listed above can be pursued as an additional endorsement. Below are the additional endorsements only options that require students to pursue one of the undergraduate, post-bachelor’s or graduate teacher licensure areas listed above. Detailed requirements for any endorsement may be obtained from the University Teacher Education Office.

Art (grades K-8)

Students seeking an additional endorsement in Art (K-8) should see an adviser in the Department of Curriculum and Instruction.

Basic Science (grades K-8)

Students seeking an additional endorsement in Basic Science (K-8) should see an adviser in the Department of Curriculum and Instruction.

Coaching Interscholastic Athletics (grades K-12)

The Department of Kinesiology offers courses that can lead to a K-12 athletic coach endorsement.

Students seeking approval for the Iowa State University endorsement to coach interscholastic athletics must satisfy the requirements of an endorsement area listed above and earn credits in the following (to meet state minimum requirements):

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>

<td>Coaching Theory and Administrative Issues</td>
<td>3</td>
</tr>
</tbody>
</table>

English and Language Arts (grades K-8)

Students seeking an additional endorsement in English and Language Arts (K-8) should see an adviser in the Department of Curriculum and Instruction.

English as a Second Language (grades K-12)

The Department of English offers courses that can lead to a K-12 ESL Teacher endorsement.

To add a K-12 teaching endorsement in English as a Second Language, students must fulfill the requirements of an endorsement area listed above and earn credits in the following courses. In some cases, relevant special topics courses or experimental courses may be substituted. Some courses have prerequisites.

<table>

</tr>
</tbody>
</table>

At least 6 credits from courses numbered 300 or above in astronomy and astrophysics, biochemistry and biophysics, biology, botany, chemistry, genetics, geology, meteorology, microbiology, or physics.

Health (grades K-8)

Students seeking an additional endorsement in Health (K-8) should see an adviser in the Department of Curriculum and Instruction.

History (grades K-8)

Students seeking an additional endorsement in History (K-8) should see an adviser in the Department of Curriculum and Instruction.

Latin (grades 5-12)

Students seeking an additional endorsement in Latin (5-12) should see the coordinator in the Department of World Languages and Cultures.

Mathematics (grades K-8)

Students seeking an additional endorsement in mathematics (K-8) should see an adviser in the Department of Curriculum and Instruction.

Physical Science

Students seeking an additional endorsement in physical science (5-12) should see an adviser in the Department of Curriculum and Instruction. Students must have a primary area of endorsement in physics, chemistry, earth science, or biology and can add physical science as an additional endorsement by successfully completing a minimum of 24 credits in science, with coursework that includes the following:
Required professional courses are:

<table>
<thead>
<tr>

**Reading (grades K-8, 5-12)**

The Curriculum and Instruction Department offers courses that can lead to a reading endorsement for grades K-8. This department collaborates with the English Department to offer the necessary coursework for a 5-12 reading endorsement.

Students seeking an additional endorsement to teach elementary reading (K-8) should see a Department of Curriculum and Instruction adviser.

Students seeking endorsement to teach reading (5-12) as an additional endorsement must earn credits in the following courses:

- Foundations of Reading and Reading in the Content Area
- Practice and Theory of Teaching Literature in the Secondary Schools
- Practice and Theory of Teaching Writing in the Secondary Schools
- Practice and Theory of Teaching Writing in the Secondary Schools
- Foundations of Reading and Language Arts
- Reading for Adolescents with Mild/Moderate Disabilities

**Russian (grades 5-12)**

Students seeking an additional endorsement in Russian (5-12) should see the coordinator in the Department of World Languages and Cultures.

**Social Sciences (grades K-8)**

Students seeking an additional endorsement in Social Sciences (K-8) should see an adviser in the Department of Curriculum and Instruction.

**Special Education (grades K-8, 5-12, ages 5-21)**

The Department of Curriculum and Instruction offers courses that can lead to special education endorsements (Instructional Strategist I: Mild/Moderate Disabilities (grades K-8 and grades 5-12) and Instructional Strategist II: Behavior Disorders/Learning Disabilities (ages 5-21)). Students seeking special education endorsements at the graduate level must have a current teaching license.

Elementary Education students seeking an additional K-8 endorsement to teach special education should see an adviser in the Department of Curriculum and Instruction.

**Speech Communication (grades 5-12)**

The Department of Speech Communication offers courses that can lead to 5-12 speech/theatre endorsement.

Students seeking endorsement to teach speech as an additional area must earn credits in the following courses:

- Listening
- Introduction to Interpersonal Communication
- Fundamentals of Public Speaking
- Communication in Classrooms and Workshops
- Argumentation, Debate, and Critical Thinking
- Rhetorical Criticism
- Directing Speech Activities
- Teaching Speech

One of the following

<table>

**World Languages and Cultures (French, German, Latin, Russian, and Spanish) (grades K-8)**

Students seeking an additional endorsement World Languages and Cultures (K-8) should see an adviser in the Department of Curriculum and Instruction.

Master’s Programs that Lead to Initial Teacher Licensure

Agricultural Education

The Agricultural Education and Studies Department offers a Master’s of Science program that prepares Agricultural Education teachers for grades 5-12

See coordinator for program requirements.

**Mathematics**

The Curriculum and Instruction Department offers a Master’s of Education program that prepares Mathematics teachers for grades 5-12

See coordinator for program requirements.

**Physical Education**

The Department of Kinesiology offers a Master’s of Science program that prepares Physical Education teachers for grades K-12.)
See coordinator for program requirements.

**Secondary Sciences**

The Department of Curriculum and Instruction offers a Master’s of Arts in Teaching program that prepares Secondary Science teachers for grades 5-12.

See coordinator for program requirements.

**Iowa Teacher Intern License Pathway**

The Iowa Teacher Intern License Pathway is a Regent’s collaborative designed for adult learners holding a baccalaureate degree who are seeking 5-12 licensure in a high needs area. For more information: www.iowateacherintern.org.
College of Agriculture and Life Sciences

Wendy Wintersteen, Dean
Joe Colletti, Senior Associate Dean
David Acker, Associate Dean
John Lawrence, Associate Dean
www.ag.iastate.edu

Departments of the College
- Agricultural Education and Studies
- Agricultural and Biosystems Engineering
- Agronomy
- Animal Science
- Biochemistry, Biophysics, and Molecular Biology
- Ecology, Evolution, and Organismal Biology
- Economics
- Entomology
- Food Science and Human Nutrition
- Genetics, Development and Cell Biology
- Horticulture
- Natural Resource Ecology and Management
- Plant Pathology
- Sociology

Students enrolled in the College of Agriculture and Life Sciences are provided a broad-based education that includes coursework in communications; Biological, physical, and social sciences; humanities; and technical subject matter.

Upon graduation students find diverse career opportunities because of the well balanced education they have received as undergraduates. Opportunities for graduates include production agriculture, business and industry, public agencies, education, Biological and environmental sciences, value-added processing, natural resource management, rural development, animal and human health professions, and graduate studies.

High School Preparation
Requirements for students entering from high school or transferring with less than 24 college credits into the College of Agriculture and Life Sciences include four years of English; three years of mathematics which must include one year each of algebra, geometry, and advanced algebra; three years of science which must include one year each of Biology and chemistry, or Biology and physics, or chemistry and physics; and two years of social studies. No foreign language is required for admission to the College of Agriculture and Life Sciences.

Majors in the College of Agriculture and Life Sciences

A student has many majors from which to choose. Each major is unique although many courses are common. This is helpful to students in that they may transfer from one major to another before the second year with little loss of credits. Options and areas of specialization further define the majors and required coursework within some majors. In all cases, majors are designed to help students succeed in their chosen professions. Majors in agriculture and life sciences are:

Primary Majors
- Agricultural Biochemistry
- Agricultural Business
- Agricultural and Life Sciences Education
- Agricultural Studies
- Agricultural Systems Technology
- Agronomy
- Animal Ecology
- Animal Science

Biochemistry
- Biology
- Culinary Science
- Dairy Science
- Dietetics
- Diet and Exercise
- Environmental Science
- Food Science
- Forestry
- Genetics
- Global Resource Systems
- Horticulture
- Industrial Technology
- Insect Science
- Microbiology
- Nutritional Science
- Public Service and Administration in Agriculture
- Seed Science

Secondary Majors
- Environmental Studies
- International Agriculture
- Seed Science

A secondary major must be taken in conjunction with a primary major.

Minors
- Agricultural Biochemistry
- Agricultural Business
- Agricultural Education and Studies
- Agricultural Systems Technology
- Agronomy
- Animal Ecology
- Animal Science
- Biology
- Culinary Science
- Emerging Global Diseases*
- Entrepreneurial Studies*
- Environmental Studies
- Food Safety*
- Food Science
- Forestry
- Genetics
- Horticulture
- Industrial Technology
- Insect Science
- International Agriculture
- Meat Science
- Microbiology
- Nutrition

*The College of Agriculture and Life Sciences participates in these inter-departmental minors.

Certificate
- Occupational Safety

See statement on minors in the Colleges and Curricula section of this catalog.

Special Programs

Agriculture Exploration
Agriculture Exploration is a starting place for students who wish to pursue careers in the life sciences, food science, natural resources, production agriculture, business, or communications but who are unsure of which majors to choose. Students entering this program will be advised in the Student Services Office until they select their majors.

Preveterinary Medicine
Students in the College of Agriculture and Life Sciences may complete the requirements for admission to the College of Veterinary Medicine by enrolling in any major within the college. Because a solid foundation in
the sciences is basic to the program in veterinary medicine, those majors that emphasize the sciences are usually more compatible with preveterninary medicine (see College of Veterinary Medicine section of this catalog for specific admissions requirements).

Students who are undecided about choice of major may enroll in general preveterninary studies (Gen PV). These students will also enroll in an orientation course, which describes the various college majors. A Gen PV student has up to 1.5 semesters to select a major.

Preveterninary medicine students also have an opportunity, with careful planning, to complete the requirements for a bachelor of science degree in an individual curriculum within the College of Agriculture and Life Sciences after admission to the College of Veterinary Medicine. This may be done by completing the prescribed course of study established by an individual major. Students also may meet degree requirements of an individual major through the College of Agriculture and Life Sciences Honors Program. Further details are available from an academic adviser or from members of the College of Agriculture and Life Sciences Honors Committee.

Honors Program
The College of Agriculture and Life Sciences Honors Program provides an opportunity for students of high ability to maximize their educational experience by individualizing their program of study. (See statement on Honors Program in the Colleges and Curricula section of this catalog). For more information, contact the chair of the College of Agriculture and Life Sciences Honors Committee, or a department Honors contact person.

Off-Campus Programs
Coursework leading to a master of science degree in agricultural education, master of agriculture degree in professional agriculture and a master of science degree in agronomy are offered to students who choose to study off-campus; see Extended and Continuing Education for further information.

Study Abroad and International Travel Opportunities
Agriculture and life sciences are part of a highly interconnected global system; decisions made in one sector have profound impacts worldwide. It is important for students to develop an understanding and appreciation for the global system and the role that U.S. agriculture plays in providing a safe and predictable food supply for a growing world population. The College of Agriculture and Life Sciences provides study abroad and international internship opportunities in more than 25 countries around the world. For additional information, contact the Office of Global Agriculture Programs in the College of Agriculture and Life Sciences.

Internships and Cooperative Education Programs
Practical work experience can provide a unique learning opportunity that complements academic coursework. This experience is provided through internships or cooperative education programs. For additional information, contact a departmental adviser or internship coordinator.

College of Agriculture and Life Sciences Core Curriculum and Electives
All curricula in the College of Agriculture and Life Sciences lead to a bachelors of science degree. Each major has specific degree requirements for graduation based on department and college student learning outcomes. College of Agriculture and Life Sciences core curriculum requirements for the four areas listed below are established to provide the foundation for successful accomplishment of both departmental and college level learning outcomes.

Students pursuing a primary major in another college and taking a second major in the College of Agriculture and Life Sciences must fulfill the core curriculum requirements of the College of Agriculture and Life Sciences, and all the requirements of the second major. The College of Agriculture and Life Sciences core curriculum follows.

Minimum Credits | Subject Area
| 9.5 Interpersonal and public communication skills
| 6 English composition with grades of C or better
| 3 Speech fundamentals with grades of C or better; 0.5 credit in Lib 160
| 17 Mathematical, physical, and life sciences
| 3 credits of mathematics; 3 credits of statistics; 5 credits of physical science (e.g., chemistry, geological and atmospheric sciences, physics); 6 credits of life sciences including BIOL 101 Introductory Biology or BIOL 211 Principles of Biology I, and 3 credits of life sciences from a college-approved list (http://www.ag.iastate.edu/student/student_services.php)
| 12 Humanities, social sciences 3 credits of humanities; 3 credits of social sciences; 3 credits of U.S. diversity from an approved list; 3 credits of international perspectives from an approved list.

3 Ethics, Requirement met in one of two ways designated by the students major program of study: 1) 3 credits from a college-approved list; or 2) a course in foundational elements of ethical/critical thinking offered by the Department of Philosophy specifically to meet this requirement for College of Agriculture and Life Sciences majors, and a course designated by the students major program designated to coordinate with this foundational course. Refer to the College of Agriculture and Life Sciences web site for details of the ethics requirement.

All students graduating with majors within the College of Agriculture and Life Sciences are expected to be proficient in the following college-level outcomes:

Professional, Interpersonal and Cross-cultural Communications
- Speak and write clearly and persuasively.
- Prepare effective visual, oral, written and electronic presentations.
- Effectively read, listen, observe and reflect.

Problem-Solving/Critical Thinking
- Apply a holistic approach to solving complex issue-laden problems.
- Apply a rational and objective process to:
  - Distinguish verifiable facts from value claims,
  - Determine the accuracy of statements,
  - Identify assumptions and detect bias,
  - Distinguish relevant from irrelevant information,
  - Prioritize needs.

- Summarize, analyze, and interpret simple research data and policy issues.

Leadership
- Organize, facilitate, and participate effectively in a group, team, or organization.
- Define a problem or opportunity, implement an action planning process, work towards a goal and justify actions taken.

Entrepreneurship
- Demonstrate innovativeness and creativity regardless of context.
- Identify and pursue opportunities that produce value.
- Be persistent in shepherding necessary resources and managing associated risk to facilitate change.

Life-long learning
- Articulate how continued learning after graduation will enrich their lives.
- Identify and participate in new areas for learning beyond the classroom and after graduation.

Ethics
- Define and assess their ethical perspective, moral responsibility, and values.
- Identify and critically evaluate contemporary ethical and moral issues in professional and private life.

Environmental Awareness
- Explain the physical and Biological interactions within ecosystems
- Explain how human activities impact the environment and how societies are affected by environmental change.
International/Multi-Cultural Awareness

- U.S. Diversity – Students should achieve two of the following outcomes. They should be able to:
  - Articulate how their personal life experiences and choices fit within the context of the larger mosaic of U.S. society, indicating how they have confronted and critically analyzed their perceptions and assumptions about diversity-related issues,
  - Analyze and evaluate the contributions of various underrepresented social groups in shaping the history and culture of the U.S.,
  - Analyze individual and institutional forms of discrimination based on factors such as race, ethnicity, gender, religion, sexual orientation, class, etc.,
  - Analyze the perspectives of groups and individuals affected by discrimination,
  - Analyze how cultural diversity and cooperation among social groups affect U.S. society.

- International Perspectives – Students should achieve two of the following outcomes. They should be able to:
  - Analyze the accuracy and relevancy of their own worldviews and anticipate how people from other nations may perceive that worldview,
  - Describe and analyze how cultures and societies around the world are formed, are sustained, and evolve,
  - Analyze and evaluate the influence of global issues in their own lives,
  - Describe the values and perspectives of cultures other than their own and discuss how they influence individuals’ perceptions of global issues and/or events,
  - Communicate competently in a second language.

In addition to the College level learning outcomes, each department within the college has additional discipline-specific outcomes that apply to graduates of that department.

Electives
Students use electives to broaden their education or to strengthen an area of specialization. Electives may be used to meet the requirements for a double major (see statement on double majors in this catalog). Those who wish to change their major, or who decide to graduate with a double major, must be enrolled for the last two semesters in the curriculum in which they expect to graduate. Students in ROTC may apply ROTC credits toward elective requirements.

Advising
Each student in the College of Agriculture and Life Sciences works closely with an academic adviser who is associated with the major in which the student is enrolled.

All entering students are strongly encouraged to participate in the summer orientation program in which they will have the opportunity to meet and work with academic advisers in planning their first semester schedule of classes.

The advisors also assist students in making personal adjustments to university life, offer suggestions on academic and co-curricular choices, and provide information on career choices. Advisors make a special effort to adjust course schedules in accordance with students’ interests and capabilities.

A student may wish to prepare for admission to a professional program such as law, medicine, or veterinary medicine while pursuing a bachelor of science degree in the College of Agriculture and Life Sciences. This may be accomplished through several majors; however, it is recommended that the student work closely with an academic adviser.

Each department prepares a guide to help students chart their long-term programs and to specify the exact requirements for graduation. Visit the college web site www.ag.iastate.edu.

Graduate Study
Graduate study in agriculture is conducted through the Graduate College. Details are found in the Graduate College section of this catalog.

Various departments in the College of Agriculture and Life Sciences also participate in the following graduate-level interdepartmental offerings:

- Biorenewable Resources and Technology
- Ecology and Evolutionary Biology
- Environmental Science
- Genetics
- Immunobiology
- Microbiology
- Molecular, Cellular, and Developmental Biology
- Neuroscience
- Nutritional Sciences
- Plant Biology
- Professional Agriculture (off-campus)
- Seed Technology and Business
- Sustainable Agriculture
- Technology and Social Change (interdepartmental minor)
- Toxicology

For details, consult the Graduate College section of this catalog.
Agricultural Business

Curriculum in Agricultural Business

Administered by the Department of Economics. Students majoring in Agricultural Business often choose elective coursework leading to minors in the College of Business or in the College of Agriculture and Life Sciences, or emphasizing specific areas within agricultural business such as finance, management, commodity analysis, research, agricultural sales and marketing, environmental economics, farm and ranch operations, international economics, agricultural extension, or government service. To earn a degree in Agricultural Business, a minimum of 15 credits must be earned from courses taught by the Department of Economics at ISU. A minor in Agricultural Business is available; the requirements appear under Economics.

Total Degree Requirement: 120 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.

3 cr. from approved list.

U.S. Diversity: 3 cr.

3 cr. from approved list.

Communication/Library: 12.5 cr.

Course List

ENGL 150 Critical Thinking and Communication 3
ENGL 250 Written, Oral, Visual, and Electronic Composition 3
One of the following 3
ENGL 302 Business Communication
ENGL 309 Report and Proposal Writing
ENGL 314 Technical Communication
One of the following 3
SP CM 212 Fundamentals of Public Speaking
AGEDS 311 Presentation and Sales Strategies for Agricultural Audiences
LIB 160 Library Instruction 0.5
Total Credits 12.5

A grade of C or better must be earned in two of the English composition courses (ENGL 150 Critical Thinking and Communication, ENGL 250 Written, Oral, Visual, and Electronic Composition, and (ENGL 302 Business Communication or ENGL 309 Report and Proposal Writing or ENGL 314 Technical Communication)) and the speech fundamentals course (SP CM 212 Fundamentals of Public Speaking or AGEDS 311 Presentation and Sales Strategies for Agricultural Audiences).

Humanities and Social Sciences: 6 cr.

3 cr. from approved list; ECON 102 Principles of Macroeconomics.

Ethics: 3 cr.

3 cr. from approved list.

Life Sciences: 6 cr.

Course List

One of the following: 3
BIOL 101 Introductory Biology
BIOL 211 Principles of Biology I
Three credits from approved list of courses

Mathematics 12-13 cr.

Course List

One of the following: 3-4
MATH 160 Survey of Calculus
MATH 165 Calculus I
One of the following: 3

Electives:

No more than 4 cr. of ECON 297 Internship or 397 may count toward graduation.

Agricultural Business

ECON 207 Applied Economic Optimization
MATH 166 Calculus II
STAT 226 Introduction to Business Statistics I 3
STAT 326 Introduction to Business Statistics II 3
Total Credits 12-13

Physical Sciences: 5 cr.

Course List

CHEM 163 College Chemistry
& CHEM 163L and Laboratory in College Chemistry
Or:
PHYS 111 General Physics
Total Credits 5

Biological Sciences: 6 cr.

Course List

One of the following: 3
BIOL 101 Introductory Biology
or BIOL 211 Principles of Biology I
One of the following: 3
NREM 120 Introduction to Renewable Resources
or BIOL 173 Environmental Biology
Total Credits 6

Agricultural Sciences: 6 cr.

6 cr. from approved list.

General Economics 9 cr.

Course List

ECON 101 Principles of Microeconomics 3
ECON 301 Intermediate Microeconomics 3-4
One of the following: 3
ECON 302 Intermediate Macroeconomics
ECON 353 Money, Banking, and Financial Institutions
ECON 492 Graduating Senior Survey R
Total Credits 9-10

Business and Agricultural Business 28.5 cr.

Course List

ACCT 284 Financial Accounting 3
ACCT 285 Managerial Accounting 3
FIN 301 Principles of Finance 3
One of the following: 3
MGMT 310 Entrepreneurship and Innovation
MGMT 370 Management of Organizations
MKT 340 Principles of Marketing
MIS 330 Management Information Systems
SCM 301 Supply Chain Management
ECON 110 Orientation in Agricultural Business 0.5
ECON 235 Introduction to Agricultural Markets 3
ECON 292 Career Seminar 1
6 cr. from 200-489 level courses from approved department list 6
6 cr. from 400-489 level courses from approved department list 6
Total Credits 28.5

Electives:

No more than 4 cr. of ECON 297 Internship or 397 may count toward graduation.
Agricultural Education and Studies

Undergraduate Study
For undergraduate curricula in agriculture and life sciences education, and agricultural studies, leading to the degree of bachelor of science, see College of Agriculture and Life Sciences, Curricula.

The department offers two curricula for students desiring to enter careers in agriculture and related fields. These curricula are agriculture and life sciences education, and agricultural studies. The agricultural and life sciences education curriculum prepares persons for careers as agricultural education instructors, and educational specialists for industry, nonprofit organizations, and governmental agencies. The agriculture and life sciences education curriculum has two options, teacher certification and communications. The agricultural studies curriculum prepares persons for careers in production agriculture and agricultural industry. Graduates of both curricula accept positions in agricultural business, industry, agencies, and production agriculture.

Graduates will have a broad base of agricultural knowledge, and will be skilled in decision making, planning, organizing, presenting, and evaluating information. Through the successful completion of the required coursework, active participation in clubs and organizations, and the acquisition of technical skills and experiences associated with work experiences, internships, and international travel, graduates of our baccalaureate programs meet the university, college, and departmental outcomes in the following nine areas:

1. professional, interpersonal, and cross-cultural communications
2. Problem solving and critical thinking
3. leadership
4. entrepreneurship
5. life-long learning
6. ethics
7. environmental awareness
8. U.S. diversity
9. international perspectives.

More information regarding the departmental learning outcomes can be found at www.ageds.iastate.edu/assessment/agedssindex.htm.

The department offers a minor in agriculture and life sciences education which may be earned by completion of a minimum of 15 credits in agricultural education and studies courses, with a minimum of two courses at the 400 level. Courses that can be taken for a minor are:

Graduate Study
The department offers the degrees of master of science, and doctor of philosophy, with a major in agricultural education; major of agriculture, with a major in professional agriculture; a specialization in agricultural extension education; opportunities for emphasis in international agri-
cultural education; and a minor for students majoring in other curricula. Graduate students who have earned a bachelor’s degree in an agricultural discipline may plan a course of study that leads to teacher certification. Candidates pursuing the master of science degree may do so by completing either a thesis or nonthesis program of study. The master of agriculture, professional agriculture degree is nonthesis only; this interdisciplinary graduate program in professional agriculture is designed for off-campus students; see Off-Campus Credit Courses and Programs.

Students have an opportunity to develop competence in disciplinary foundations and ethics, program planning, learning theory, instructional methods, program leadership and administration, program evaluation, research methodologies, data analysis and interpretation, writing for publication, and grant proposal writing.

The department also cooperates in the international development studies option of the General Graduate Studies Program. Courses and workshops are offered, both on and off campus, for extension educators, teachers, and industry and government personnel.

Curriculum in Agricultural and Life Sciences Education
Administered by the Department of Agricultural Education and Studies. Students majoring in Agricultural Education choose between two options: Teacher Certification or Communications.

Total Degree Requirement: 128 cr.
Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA. Teacher certification requires 2.5 GPA at particular points in the program of study, and C- in selected courses.

International Perspective: 3 cr.
U.S. Diversity: 3 cr.
Communications Proficiency:
6 cr. of English composition with a C or better and 3 cr. of speech fundamentals with a C or better.

Interpersonal and Public Communication 9.5 cr.:
ENGL 150 Critical Thinking and Communication 3
ENGL 250 Written, Oral, Visual, and Electronic Composition 3
AGEDS 311 Presentation and Sales Strategies for Agricultural Audiences 3
LIB 160 Library Instruction 0.5
Total Credits 9.5

Humanities and Social Sciences: 6 cr.
PSYCH 230 Developmental Psychology 3
3 credits from approved American history list 3

Ethics: 3 cr.
From approved list.

Math, Physical and Life Sciences: 19 cr.
CHEM 163 College Chemistry 4
CHEM 177 General Chemistry I 4
CHEM 163L Laboratory in College Chemistry 1
CHEM 177L Laboratory in General Chemistry I 1
MATH 104 Introduction to Probability and Matrices 3
or MATH 150 Discrete Mathematics for Business and Social Sciences 3
BIOL 211 Principles of Biology I 3
BIOL 211L Principles of Biology Laboratory I 1
BIOL 212 Principles of Biology II 3
BIOL 212L Principles of Biology Laboratory II 1
STAT 104 Introduction to Statistics 3

Total Credits 19
Agricultural Sciences and Economics: 31 cr.
All courses minimum grade C is required.

ACEDS 284  Financial Accounting  3
ACEDS 315  Personal, Professional, and Entrepreneurial Leadership in Agriculture  3
ACEDS 488  Methods of Teaching Agricultural Mechanics  3
ACEDS 114  Principles of Agronomy  3
ACEDS 154  Fundamentals of Soil Science  3
AN S 101  Working with Animals  2
AN S 114  Survey of the Animal Industry  2
ECED 101  Principles of Microeconomics  3
ECED 230  Farm Business Management  3
HORT 221  Principles of Horticulture  3
NREM 120  Introduction to Renewable Resources  3

Total Credits  31

Electives:
No more than 4 cr. of ECON 297 Internship, (and/or 397) may count toward graduation.

Options
Teacher Certification option: 40.5 cr.
All courses minimum grade C is required.

AGEDS 110A  Agriculture and Life Sciences Education (Fall only)  0.5
AGEDS 211A  High School Agriculture Programs  1
AGEDS 310  Foundations of Agricultural Education Programs  3
AGEDS 401  Planning Agriculture and Life Sciences Education Programs  3
AGEDS 402  Methods of Teaching in Agriculture and Life Sciences  3
AGEDS 416  Pre-Student Teaching Experience in Agricultural Education  1
AGEDS 417  Supervised Teaching in Agriculture and Life Sciences 1-16
CI 202  Digital Learning in the 7-12 Classroom  3
C I 204  Social Foundations of American Education  3
CI 333  Educational Psychology  3
C I 406  Multicultural Foundations of School and Society: Introduction  3
SP ED 401  Teaching Secondary Students with Exceptionalities in General Education  3

Total Credits  275-42.5

Communications option: 128 cr.
Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.
U.S. Diversity: 3 cr.
Communications Proficiency:
6 cr. of English composition with a C or better and 3 cr. of speech fundamentals with a C or better.

Interpersonal and Public Communication 9.5 cr.:

ENGL 150  Critical Thinking and Communication  3
ENGL 250  Written, Oral, Visual, and Electronic Composition  3
AGEDS 311  Presentation and Sales Strategies for Agricultural Audiences  3
LIB 160  Library Instruction  0.5

Total Credits  9.5

Humanities and Social Sciences: 9 cr.

ECON 101  Principles of Microeconomics  3
or ECON 102  Principles of Macroeconomics  3
Psychology elective  3
Approved humanities elective  3

Total Credits  9

Ethics: 3 cr.
From approved list.

CHEM 163  College Chemistry  4
or CHEM 177  General Chemistry I  1
CHEM 163L  Laboratory in College Chemistry  1
or CHEM 177L  Laboratory in General Chemistry I  1
MATH 104  Introduction to Probability and Matrices  3
or MATH 150  Discrete Mathematics for Business and Social Sciences  3
Biol 211  Principles of Biology I  3
Biol 212  Principles of Biology II  3
STAT 101  Principles of Statistics  4
or STAT 104  Introduction to Statistics  3
Life science elective  3
PHYS 221  Structure and Reactions in Biochemical Processes  3
or PHYS 106  The Physics of Common Experience  3

Agricultural Sciences and Economics: 32 cr.
10 credits in a selected area of agricultural sciences and economics including 6 credits at the 300-400 level; 6 credits each in two additional areas of agricultural sciences and economics; 10 credits agricultural sciences and economics electives.

Professional Communications: 32.5 cr.

AGEDS 110A  Agriculture and Life Sciences Education (Fall only)  0.5
AGEDS 211  Early Field Based Experience  1
AGEDS 215  Career Seminar  1
AGEDS 315  Personal, Professional, and Entrepreneurial Leadership in Agriculture  3
AGEDS 412  Internship in Agricultural Education and Studies  2-6

21 credits from approved electives  21

Electives: 12-13 cr.

Curriculum in Agricultural Studies

Administered by the Department of Agricultural Education and Studies. Students are encouraged to develop one or more areas of concentration in agricultural sciences and economics.

Total Degree Requirement: 128 cr.
Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective:
3 cr. from approved list.

U.S. Diversity:
3 cr. from approved list.

Communications Proficiency: 6 cr. (with C or better):

English composition  3
Speech fundamentals  3

Communication/Library 12.5 cr.:

ENGL 150  Critical Thinking and Communication  3
ENGL 250  Written, Oral, Visual, and Electronic Composition  3
AGEDS 311  Presentation and Sales Strategies for Agricultural Audiences  3
AGEDS 327  Advanced Communications for Agriculture and Life Sciences  3
LIB 160  Library Instruction  0.5

Total Credits  12.5

Humanities and Social Sciences: 6 cr.

ECON 101  Principles of Microeconomics  3
Plus 3 credit hours from approved humanities list  3

Total Credits  6
### Ethics: 3 cr.
3 cr. from approved list.

### Math Physical and Life Sciences: 19 crs.
- **AGEDS 211** Principles of Biology I 3
- **AGEDS 211L** Principles of Biology Laboratory I 1
- **AGEDS 212** Principles of Biology II 3
- **AGEDS 212L** Principles of Biology Laboratory II 1
- **AGEDS 183** College Chemistry 4
- **AGEDS 177** General Chemistry I 1
- **AGEDS 183L** Laboratory in College Chemistry or **AGEDS 177L** Laboratory in General Chemistry I 1
- **AGEDS 104** Introduction to Probability and Matrices 3
- **AGEDS 105** Discrete Mathematics for Business and Social Sciences 3
- **STAT 104** Introduction to Statistics 3

Total Credits 19

### Agricultural Sciences and Economics: 43.5 cr.
- **AGEDS 110B** Agricultural Studies (Fall only) 0.5
- **AGEDS 215** Career Seminar 1
- **AGEDS 315** Personal, Professional, and Entrepreneurial Leadership in Agriculture 3
- **AGEDS 450** Farm Management and Operation 3
- **AGEDS 451** Agricultural Law 4
- **AGRON 114** Principles of Agronomy 3
- **AGRON 154** Fundamentals of Soil Science 3
- **AGRON 212** Crop Growth, Productivity and Management 3
- **AN S 101** Working with Animals 2
- **AN S 114** Survey of the Animal Industry 2
- **ECO 230** Farm Business Management 3
- **ECO 235** Introduction to Agricultural Markets 3
- **ECO 334** Entrepreneurship in Agriculture 3
- **NREM 120** Introduction to Renewable Resources 3
- **NREM 130** Natural Resources and Agriculture 3
- And 6 credit hours from **AN S**, any level. 6

Total Credits 45.5

### Other Required Course:
**ACCT 284** Financial Accounting

### Electives:
No more than 4 cr. of **ECO 297** Internship or 397 may count toward graduation.

### Preveterinary Studies
Reparation for admission to veterinary medicine may be accomplished through the agricultural studies curriculum.

### Courses primarily for undergraduate students

#### AGEDS 110. Orientation.
(1-0) Cr. 0.5. F.S.
Orientation to the department. Careers in agriculture.

- A. Agriculture and Life Sciences Education (Fall only)
- B. Agricultural Studies (Fall only)
- C. Agricultural and Life Sciences exploration (Spring only)

#### AGEDS 111. Dean’s Leadership Seminar.
(1-0) Cr. 1. F. Prereq: Permission of the Associate Dean for Academic Programs, College of Agriculture and Life Sciences
Introduction to leadership in agriculture and the life sciences, problem solving applied to current case studies, global perspective required by leaders, and designing programs to respond to societal needs in the agricultural and life sciences.

#### AGEDS 112. Agriculture Biotechnology Colloquium.
(1-0) Cr. 1. S. Prereq: Enrollment as an agricultural excellence scholar
The scientific basis of biological and social sciences in agriculture.

#### AGEDS 113. Access to Success Seminar I.
(1-0) Cr. 1. Repeatable. F.S.
Course provides career skills, learning strategies and social and academic integration techniques to student members of Step Forward Learning Community. Utilization of campus resources, encouragement of self-exploration, and development of academic skills. Offered on a satisfactory-fail basis only.

#### AGEDS 211. Early Field Based Experience.
(1-0) Cr. 1. Repeatable, maximum of 3 credits. F.S. Prereq: 110
Fifty hours on-site in an agricultural setting. Students will have an opportunity outside the classroom for career guidance, role modeling, and reflection on their observations that they can apply to their courses and other educational experiences.

- A. High School Agriculture Programs
- C. Agricultural Industries and Agencies

(1-0) Cr. 1. F.S. Prereq: Sophomore classification

#### AGEDS 310. Foundations of Agricultural Education Programs.
(3-0) Cr. 3. S.
Historical development of agricultural education programs. Philosophic premises, program goals and objectives. Educational and social issues impacting the implementation of agricultural education programs.

#### AGEDS 311. Presentation and Sales Strategies for Agricultural Audiences.
(3-0) Cr. 3. F.S.
Utilizing instructional methods, techniques, and problem solving, presentation and sales strategies with agricultural audiences.

#### AGEDS 312. Science With Practice.
(1-3) Cr. 2. Repeatable. F.S. Prereq: College of Agriculture and Life Sciences majors only
A planned learning experience wherein each student and faculty mentor develops a learning agreement that encompasses specific activities and expectations. Students are engaged in reflective activities that include journals, micro-reflections, formal presentations, and a comprehensive portfolio.

#### AGEDS 315. Personal, Professional, and Entrepreneurial Leadership in Agriculture.
(3-0) Cr. 3. F.S.
Leadership principles and strategies to influence and motivate team members to achieve personal, professional, and entrepreneurial goals in production agriculture, agricultural education, and agricultural organizations.

#### AGEDS 327. Advanced Communications for Agriculture and Life Sciences.
(2-2) Cr. 3. F.S. Prereq: English 250 or equivalent.
Development of written, oral, visual and electronic communications relevant to agriculture and life sciences. Students develop skills and perspectives consistent ethical and democratic principles applicable to agriculture, natural resource, and life science issues. Provide explanations of scientific and technical concepts to rural, industry, and urban audiences. Field trips.

#### AGEDS 398. Cooperative Education.
Cr. R. F.S.S. Prereq: Permission of the department cooperative education coordinator; junior classification
Required of all cooperative education students. Students must register for this course prior to commencing each work period.
AGEDS 401. Planning Agriculture and Life Sciences Education Programs.
(Dual-listed with 501). (3-0) Cr. 3. F. Prereq: 310
Responsibilities of an agricultural education teacher, curriculum development, experiential learning opportunities including FFA and SAE, and assessment and maintenance of program quality.

AGEDS 402. Methods of Teaching in Agriculture and Life Sciences.
(Dual-listed with 502). (3-0) Cr. 3. F. Prereq: Concurrent enrollment in 401
Topics include: principles of teaching and learning, individualized and group methods, application of learning, instructional management, special populations, and evaluation.

AGEDS 412. Internship in Agricultural Education and Studies.
Cr. 2-6. Repeatable, maximum of 6 credits. F.S.SS. Prereq: 211, junior classification in AgEds and permission of instructor
A supervised two to twelve week learning experience in an approved learning setting with application to educational, agricultural and/or environmental practices and principles. Nonmajor graduate credit.

AGEDS 414. Developing Agricultural Education Programs in Non-Formal Settings.
(2-0) Cr. 2. S. Prereq: 211 and permission of instructor
Basic concepts in planning, conducting, and evaluating educational programs in non-formal settings. Includes programming for youth and adults in Extension, agricultural industry, and related agencies. Nonmajor graduate credit.

AGEDS 416. Pre-Student Teaching Experience in Agricultural Education.
Cr. 1. F.S. Prereq: 211, 402 and admission to teacher education program
A forty hour field-based experience in an approved secondary agricultural education program. Concurrent enrollment in 417 is required.

AGEDS 417. Supervised Teaching in Agriculture and Life Sciences.
Cr. 1-16. Repeatable. F.S. Prereq: 211, 402 and admission to teacher education program
Supervised teaching in public schools.

AGEDS 450. Farm Management and Operation.
(1-6) Cr. 3. Repeatable, maximum of 9 credits. F.S.SS. Prereq: ECON 235, Econ 330, junior classification
Participation in the management and operation of a diversified Iowa farm. The class is responsible for the plans, records, and decisions for buying and selling the farm’s livestock, crops, and equipment. Special speakers on current topics. May be taken for credit 3 times at different times of the year with permission of the instructor. Nonmajor graduate credit.

(3-2) Cr. 4. S. Prereq: Senior classification
The legal framework impinging upon decision-making by firms, families, and individuals, real and personal property, contracts, secured transactions, negotiable instruments, debtor-creditor relations, bankruptcy, farm income tax organization of firms, intergenerational property transfers, trusts and farm estate planning, civil and criminal liabilities, environmental law, federal and state regulatory powers. Nonmajor graduate credit.

AGEDS 488. Methods of Teaching Agricultural Mechanics.
(2-3) Cr. 3. F.S.
Methods and management techniques in agricultural mechanics laboratories. Emphasis will be on safety, mechanical skills development and management of students, facilities, equipment, and materials. Nonmajor graduate credit.

AGEDS 490. Independent Study in Agricultural Education and Studies.
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS. Prereq: Junior or senior classification, permission of instructor
A. Philosophy, Curriculum, and Methods
B. Leadership, Evaluation, and Administration

Courses primarily for graduate students, open to qualified undergraduate students
AGEDS 501. Planning Agriculture and Life Sciences Education Programs.
(Dual-listed with 401). (3-0) Cr. 3. F. Prereq: 310
Responsibilities of an agricultural education teacher, curriculum development, experiential learning opportunities including FFA and SAE, and assessment and maintenance of program quality.

AGEDS 502. Methods of Teaching in Agriculture and Life Sciences.
(Dual-listed with 402). (3-0) Cr. 3. F. Prereq: Concurrent enrollment in 501
Topics include principles of teaching and learning, individualized and group methods, application of learning, instructional management, special populations, and evaluation.

AGEDS 510. Introduction to Research in Agricultural Education.
(3-0) Cr. 3. S. Prereq: Graduate classification
Determining your research focus; developing research problems and objectives; reviewing the literature and establishing a theoretical framework; establishing procedures for data collection and analysis; ethical issues.

AGEDS 514. Organizing Agricultural Information for Professional and Scientific Meetings.
(1-2) Cr. 2. F. Prereq: Graduate classification in agriculture
Concepts and practices in planning, preparing, and presenting materials used in professional meetings and scientific papers by agriculturalists with special emphasis on computerized delivery methods.

AGEDS 520. Instructional Methods for Adult and Higher Education in Agriculture and Natural Resources.
(3-0) Cr. 3. F. Prereq: Graduate classification
Theory and practice of adult education. Teaching and learning in formal and non-formal instructional programs for adult learners.

AGEDS 524. Program Development and Evaluation in Agricultural and Extension Education.
(3-0) Cr. 3. F. Prereq: Graduate classification
Theories and practice of program planning for nonformal education. Addresses use of program logic modeling and considers critical theories of planning to address power and interests in program development, needs assessment, and evaluation.
AGEDS 533. Introduction to Learning Theory in Agricultural Education.
(3-0) Cr. 3. S. Prereq: Graduate classification
Introduction to a variety of theoretical perspectives of learning and how they may be used within the context of agricultural education. Emphasis will be on the major domains of learning, developmental considerations, basic assumptions, concepts, and principles of various learning theories; understanding how each theoretical perspective may be used in both formal and non-formal educational settings.

AGEDS 550. Foundations of Agricultural Education.
(3-0) Cr. 3. F. Prereq: Graduate classification
Philosophical premises, ethical principles, historical development, contextual applications, and knowledge bases for agricultural education.

AGEDS 552. Data Analysis and Interpretation.
(2-0) Cr. 2. F. Prereq: 510
Strategies for analyzing, interpreting, and reporting quantitative research data in the social and behavioral sciences.

AGEDS 561. Technology Transfer and the Role of Agricultural and Extension Education.
(3-0) Cr. 3. Alt. S., offered 2012. Prereq: Graduate classification
The impact of agricultural and extension education processes on development and their role in the transfer of agricultural technology. Utilizing situational analysis techniques to analyze and solve problems in international agricultural education programs.

Meet International Perspectives Requirement.

AGEDS 590. Special Topics in Agricultural Education.
Cr. 1-3. Repeatable. F.S.S.S. Prereq: 12 credits in agricultural education
A. Curriculum
B. Methods
C. Philosophy
D. Evaluation
E. Administration
F. Leadership
G. Guidance
H. Instructional Technology
I. Extension
J. International Agriculture
K. Program Planning

AGEDS 593. Workshop in Agricultural Education.
Cr. 1-3. Repeatable. F.S.S.S. Prereq: 12 credits in agricultural education
A. Curriculum
B. Methods
C. Evaluation
D. Administration
E. Leadership
F. Extension
G. Program Planning
H. Instructional Technology
M. Biotechnology Workshop

AGEDS 599. Creative Component.
Cr. arr. Repeatable. F.S.S.S.
For nonthesis masters degree programs.

Courses for graduate students
AGEDS 604. Evaluation in Agricultural and Extension Education.
(3-0) Cr. 3. Alt. S., offered 2012. Prereq: Graduate classification
Criteria and procedures for designing and facilitating evaluations of programs in agricultural and extension education. Critique of evaluation theories. Match quantitative and qualitative methods and instruments to evaluation contexts. Evaluation reporting and utilization.
Undergraduate Study

For undergraduate curriculum in Agronomy, see College of Agriculture, Curricula.

The Department of Agronomy has a curriculum noted for its scientific rigor and breadth in crop, soil science, agricultural meteorology, and plant breeding. It prepares students for science-based professional positions, graduate study, or research careers across the spectrum of Agronomy.

The curriculum provides both flexibility and direction for students by offering four in-depth options: crop management and business, agroecology, soil and environmental science, quality and plant breeding and biotechnology. A minimum of 15 credits of Agronomy courses must be earned at Iowa State for students transferring from other institutions. The program also has many opportunities for undergraduate students to be involved in cutting edge research and international agriculture.

Graduates have the theoretical and practical knowledge needed for efficient and sustainable production of food, feed, fuel, and fiber. Graduates are skilled in communications, critical thinking, problem solving, and working effectively with others.

They understand the ethical, cultural, and environmental dimensions of issues facing professionals in agriculture and natural resources.

An Agronomy major prepares students for employment in agricultural business and industry, agricultural service organizations, crop production and soil management, environmental and natural resource management, and farm management. Graduates pursue careers in the seed, fertilizer, and agricultural chemical industries as field Agronomists, crop and soil management specialists, research technicians, sales and marketing specialists, and production managers. State and federal agencies employ Agronomists as extension specialists, county extension directors, environmental and natural resource managers, resource assessment surveyors, soil conservationists, and in regulatory agencies as plant, food, and grain inspectors. Additional areas of work open to Agronomists include integrated pest management, land appraisal, agricultural finance, turfgrass management, and the home lawn care industry.

The department offers an international scholar program leading to a minor in Agronomy. Students are required to complete an approved minor program that includes:

**Agronomy Core:**
- AGRON 114 Principles of Agronomy 3
- AGRON 154 Fundamentals of Soil Science 3
- AGRON 212 Crop Growth, Productivity and Management 3
- AGRON 354 Soils and Plant Growth 3
- 6 additional credits (3 credits must be at the 300+ level) 6
- 9 credits for the Agronomy minor must be earned at Iowa State. 9

Curriculum in Agronomy

Students majoring in agronomy study crop, soil, and environmental sciences under one of five options: agroecology; agronomy management and business; plant breeding; or soil and environmental science. A minimum of 15 credits in agronomy courses must be earned at Iowa State University.

**Total Degree Requirement: 128 cr.**

Only 6 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

**International Perspective: 3 cr.**

**U.S. Diversity: 3 cr.**

**Communications Proficiency: 6 cr.**

6 cr. of English composition with a C or better and 3 cr. of speech fundamentals with a C or better.
Students majoring in agronomy study crop, soil, and environmental sciences under one of five options: agroecology; agronomy management and business; plant breeding; or soil and environmental science. A minimum of 15 credits in agronomy courses must be earned at Iowa State University.

Total Degree Requirement: 128 cr.
Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.
U.S. Diversity: 3 cr.

Communications Proficiency (with C or better):

English composition 3
Speech Fundamentals 3

Communication/Library:
ENGL 150 Critical Thinking and Communication 3
ENGL 250 Written, Oral, Visual, and Electronic Composition 3
SP CM 212 Fundamentals of Public Speaking 3
or AGEDS 311 Presentation and Sales Strategies for Agricultural Audiences 3

Humanities and Social Sciences: 6 cr.
Approved Humanities course 3
Approved Social Science course 3

Ethics: 3 cr.
3 cr. from approved list.

Life Sciences: 6 cr.
BIOL 211 Principles of Biology I 3
Three credit from approved list 3

Mathematical Sciences: 6 cr.
Two of the following: 6
MATH 140 College Algebra
MATH 150 Discrete Mathematics for Business and Social Sciences
MATH 160 Survey of Calculus
MATH 165 Calculus I
MATH 181 Calculus and Mathematical Modeling for the Life Sciences I
STAT 104 Introduction to Statistics

Total Credits 6

Physical Sciences: 15 cr.
One of the following: 5
CHEM 163 College Chemistry
& CHEM 163L and Laboratory in College Chemistry
CHEM 177 General Chemistry I
& CHEM 177L and Laboratory in General Chemistry I
CHEM 178 General Chemistry II
& CHEM 178L and Laboratory in College Chemistry II

One of the following: 5
CHEM 231 Elementary Organic Chemistry
& CHEM 231L and Laboratory in Elementary Organic Chemistry
BBMB 221 Structure and Reactions in Biochemical Processes
CHEM 331 Organic Chemistry I
& CHEM 331L and Laboratory in Organic Chemistry I
CHEM 332 Organic Chemistry II
& CHEM 332L and Laboratory in Organic Chemistry II

One of the following: 5

Graduate Study

The department offers programs that lead to the degrees master of science and doctor of philosophy, with majors in agricultural meteorology; crop production and physiology with optional specializations in seed science and weed science; plant breeding; and soil science with specialization in soil chemistry, soil fertility, soil management, soil microbiology and biochemistry, soil morphology and genesis, or soil physics. Minor work is offered for students with majors in other departments. An M.S. nonthesis option is available for students desiring a general degree program with additional coursework and a written creative component substituting for thesis research.

Graduates have a broad knowledge base germane to their area of study. They are trained to integrate and apply knowledge to different situations. Students develop skills in scientific reasoning, organization, and logical presentation of ideas.

The department offers a Master of Science degree in Agronomy designed for the continuing education of professional Agronomists. The Program is taught at a distance using computer-based instructional media. It is a nonthesis degree requiring completion of a written creative component.

The department cooperates in the interdepartmental program in professional agriculture; interdepartmental majors in ecology and evolutionary biology; genetics; MCDH (molecular, cellular, and developmental biology); plant physiology; sustainable agriculture; and environmental science.

Prerequisite to major work in this department is completion of an undergraduate degree program with emphasis on Agronomic, biological, and physical sciences.
Agronomy Management and Business
The Agronomy Management and Business option is designed for those individuals who seek employment as agronomists working in agribusinesses such as cooperatives, seed companies, herbicide and fertilizer dealers, or crop consulting firms. More information is available from an agronomy adviser or www.agron.iastate.edu/.

Plant Breeding and Biotechnology
The Plant Breeding and Biotechnology option is a science-oriented option recommended for those who wish to work in plant breeding or plant biotechnology. More information is available from an agronomy adviser or www.agron.iastate.edu/.

Soil and Environmental Quality
The Soil and Environmental Quality option is designed for those individuals interested in careers in environmental science, soil science, or natural resource management. More information is available from an agronomy adviser or www.agron.iastate.edu/.

Courses primarily for undergraduate students

**AGRON 105. Leadership Experience.**
Cr. R. F.S.S.
A participatory experience in activities or completion of a course that enhances the development of leadership and group-dynamic skills. See adviser for departmental requirements.

**AGRON 110. Professional Development in Agronomy: Orientation.**
(0.5-0) Cr. 0.5. F.
Orientation to college life, the profession of agronomy, and the agronomy curriculum.

**AGRON 114. Principles of Agronomy.**
(2-3) Cr. 3. F.S.
Mullen. A foundation course in agronomy applying crop, soil, and environmental sciences in understanding agricultural systems in the world. Includes introductory concepts of plant, soil, tillage, pest, environmental, and sustainable aspects of crop production. Off-campus version offered through internet by interactive computer courseware.

**AGRON 120. Introduction to Renewable Resources.**
(Cross-listed with ENV S, NREM). (3-0) Cr. 3. F.S.
Overview of soil, water, plants, and animals as renewable natural resources in an ecosystem context. History and organization of resource management. Concepts of integrated resource management.

**AGRON 154. Fundamentals of Soil Science.**
(2-2) Cr. 3. F.S. Prereq: CHEM 163
Manu. Introduction to physical, chemical, and biological properties of soils, their formation, classification, and distribution. Use of soil survey and computer database information in balancing agronomic, economic, and environmental concerns in soil management. Credit for only one of Agron 154, 155, or 156 may be applied toward graduation.

**AGRON 155. Soils for Horticultural Scientists.**
(2-2) Cr. 3. F.S. Prereq: CHEM 163
Restricted to students in Horticulture. Manu. Physical, chemical and biological properties of natural and manufactured soils. Use of soil information in producing plants on natural and manufactured soils. Credit for only one of Agron 154, 155, or 156 may be applied toward graduation.

**AGRON 156. Soils for Urban Use.**
(2-2) Cr. 3. F.S.
Restricted to students outside the College of Agriculture. Manu. Fundamental properties of soils and their application to urban settings. Development of a site plan for area of land using data from soil survey and computerized data bank information. Field trip. Credit for only one of Agron 154, 155 or 156 may be applied toward graduation.

**AGRON 160. Water Resources of the World.**
(Cross-listed with GEOL, MTEOR, ENV S). (3-0) Cr. 3. S.
Study of the occurrence, history, development, and management of world water resources. Basic hydrologic principles including climate, surface water, groundwater, and water quality. Historical and current perspectives on water policy, use, and the role of water in society and the environment.

**AGRON 206. Introduction to Weather and Climate.**
(Cross-listed with MTEOR). (3-0) Cr. 3. F.S.
Arritt, Cervato, Hornbuckle. Basic concepts in weather and climate, including atmospheric measurements, radiation, stability, precipitation, winds, fronts, forecasting, and severe weather. Applied topics include global warming, ozone depletion, world climates and weather safety.

**AGRON 210. Professional Development in Agronomy: Career Planning.**
(1-0) Cr. 1. F. Prereq: Sophomore classification
Career planning, résumé and cover letter preparation, and interviewing techniques. Career orientation through invited speakers.
AGRON 212. Crop Growth, Productivity and Management. 
(3-0) Cr. 3. F.S. Prereq: 114 

L. Field Application and Problem Solving in Crop Production

AGRON 212L. Field Application and Problem Solving in Crop Production. 
(0-2) Cr. 1. F.S. Prereq: 154, credit or enrollment in AGRON 212 
Problem solving in crop production. Integration and application of concepts introduced in AGRON 212. Agronomic field skills such as crop and pest identification, integrated management strategies, staging crop growth, agricultural math and site specific management related to crop production will be emphasized.

AGRON 260. Soils and Environmental Quality. 
(Cross-listed with ENV S). (3-0) Cr. 3. F.S. 
Burras. Role of soils in environmental quality and natural resources management. Emphasis on soil erosion and conservation, water quality, and environmental planning. Saturday field trip.

AGRON 283. Pesticide Application Certification. 
(Cross-listed with ENT, FOR, HORT). (2-0) Cr. 2. S. 
Holtscher. Core background and specialty topics in agricultural, and horticultural pesticide applicator certification. Students can select certification categories and have the opportunity to obtain pesticide applicator certification at the completion of the course. Commercial pesticide applicator certification is emphasized.

AGRON 298. Cooperative Education. 
Cr. R. F.S.SS. Prereq: Permission of department cooperative education coordinator; sophomore classification 
Required of all cooperative education students. Students must register for this course prior to commencing each work period.

AGRON 300. Professional Development in Agronomy: Work Experience. 
Cr. R. F.S.SS. 
Professional work experience in agronomy. See adviser for departmental requirements. Offered on a satisfactory-fail basis only.

AGRON 311. Professional Internship in Agronomy. 
(1-0) Cr. 1. Repeatable. F.S. Prereq: 110, agronomy majors only, permission of instructor before internship begins 
Wiedenhoeft. A supervised learning experience in a professional setting related to crop production, plant breeding, soil science or environmental science.

(3-0) Cr. 3. F.S. Prereq: BIOL 212 Recommended 
Knapp. Basic principles concerning the growth, development, and production of crop communities in relation to their environment.

(2-2) Cr. 3. F. Prereq: BIOL 211 

AGRON 320. Genetics, Agriculture and Biotechnology. 
(Cross-listed with GEN). (3-0) Cr. 3. F.S. Prereq: BIOL 212 
Lee and Salas Transmission genetics with an emphasis on applications in agriculture, the structure and expression of the gene, how genes behave in populations and how recombinant DNA technology can be used to improve agriculture. Credit for graduation will not be allowed for more than one of the following: Gen 260, 313, 320 and Biol 313 and 313L.

AGRON 325. Biorenewable Systems. 
(Cross-listed with A E, AN S, BSE, BUSAD, ECON, TSM). (3-0) Cr. 3. F. Prereq: ECON 101, CHEM 163 or higher, MATH 140 or higher 
Converting biorenewable resources into bioenergy and biobased products. Biorenewable concepts as they relate to drivers of change, feedstock production, processes, products, co-products, economics, and transportation/logistics.

AGRON 330. Crop and Seed Identification Laboratory. 
(0-4) Cr. 2. S. Prereq: 114 
Identification, agronomic and binomial classification of crops, weeds, and diseases. Analysis of crop seed samples for contaminants of weed and other crop seeds.

AGRON 331. Intercollegiate Crops Team. 
(0-6) Cr. 2. Repeatable. F.S. Prereq: Permission of instructor 
Intensive training in preparation for intercollegiate competition in national crops contests.

AGRON 334. Forage Crop Management. 
(3-0) Cr. 3. F.S. Prereq: 114 
Barnhart. Production and management of forage crops; concepts applied to yield, quality, and stand persistence; systems of forage utilization including grazing, hay, and silage. Students enrolling for graduate credit will be expected to complete an additional class project. Nonmajor graduate credit.

AGRON 338. Seed Science and Technology. 
(Cross-listed with HORT). (2-3) Cr. 3. F. Prereq: 114 or HORT 221, BIOL 211 
Goggi. Seed production, maturation, dormancy, vigor, deterioration, and related aspects of enhancement, conditioning, storage, and quality evaluation. Aspects of the seed industry and regulation of seed marketing.

AGRON 342. World Food Issues: Past and Present. 
(Cross-listed with ENV S, FSHN, TSCI). (3-0) Cr. 3. F.S. Prereq: Junior classification 
Zdorkowski, Ford. Issues in the agricultural and food systems of the developed and developing world. Emphasis on economic, social, historical, ethical and environmental contexts. Causes and consequences of overnutrition/undernutrition, poverty, hunger and access/distribution. Explorations of current issues and ideas for the future. Team projects. Nonmajor graduate credit.

Meets International Perspectives Requirement.

H. Honors Section. (Honors Program students only.)

AGRON 351. Turfgrass Establishment and Management. 
(Cross-listed with HORT). (3-0) Cr. 3. F. Prereq: HORT 221 or AGRON 114 or BIOL 211 
Principles and practices of turfgrass propagation, establishment, and management. Specialized practices relative to professional lawn care, golf courses, athletic fields, highway roadsides, and seed and sod production. The biology and control of turfgrass pests. Nonmajor graduate credit.

L. Turfgrass Establishment and Management Laboratory

AGRON 351L. Turfgrass Establishment and Management Laboratory. 
(Cross-listed with HORT). (0-3) Cr. 1. F. Prereq: Credit or enrollment in 351 
Those enrolled in the horticulture curriculum are required to take 351L in conjunction with 351 except by permission of the instructor. Nonmajor graduate credit.
AGRON 354. Soils and Plant Growth.
(Cross-listed with HORT). (3-0) Cr. 3. F. Prereq: AGRON 154 and BIOL 101 or 211
Kilborn or Loynachan. Effects of chemical, physical, and biological properties of soils on plant growth, with emphasis on nutritive elements, pH, organic matter maintenance, and rooting development. Nonmajor graduate credit.

L. Soils and Plant Growth Laboratory

AGRON 354L. Soils and Plant Growth Laboratory.
(Cross-listed with HORT). (0-3) Cr. 1. F. Prereq: Credit or enrollment in AGRON 354
Henning. Laboratory exercises in soil testing that assess a soil’s ability to support nutritive requirements for plant growth.

AGRON 356. Site-Specific Crop and Soil Management.
(3-3) Cr. 4. F. Prereq: 114 and 354
Polito. Development of solutions to crop and soil management problems in consultation with a producer-client. Identification of client needs, gathering technical information, and use of geographic information systems as a tool for making crop and soil management decisions. Development and presentation of solutions for crop and soil management issues confronting the client. Emphasis will be placed on identifying and solving complex problems that require integration of biological, physical, chemical, and economic components within a crop and soil management system. Nonmajor graduate credit.

AGRON 360. Environmental Soil Science.
(Cross-listed with ENSCI). (2-3) Cr. 3. S. Prereq: AGRON 260 or GEOL 100 or 201
Burras and Kilborn. Application of soil science to contemporary environmental problems; comparison of the impacts that different management strategies have on short- and long-term environmental quality and land development. Emphasis on participatory learning activities.

AGRON 370. Field Experience in Soil Description and Interpretation.
(0-3) Cr. 1. Repeatable, maximum of 4 times. F. Prereq: 154 and permission of instructor
Description and interpretation of soils in the field and laboratory, emphasizing hands-on experience. Evaluation of soil information for land use. Students may participate in intercollegiate judging competitions.

(2-3) Cr. 3. S. Prereq: 316, 354
Wiedenhoeft. Management strategies at the level of the farm field. Emphasis will be on participatory learning activities.

AGRON 398. Cooperative Education.
Cr. R. F.S.SS. Prereq: Permission of department cooperative education coordinator; junior classification
Required of all cooperative education students. Students must register for this course prior to commencing each work period.

AGRON 402. Watershed Hydrology.
(Cross-listed with ENSCI, GEOL, MTEOR, NREM). (3-3) Cr. 4. F. Prereq: Four courses in physical or biological sciences or engineering; junior standing
Examination of watersheds as systems, emphasizing the surface components of the hydrologic cycle. Combines qualitative understanding of hydrological processes and uncertainty with quantitative representation. Laboratory emphasizes field investigation and measurement of watershed processes. Nonmajor graduate credit.

I. Watershed Hydrology and Surficial Processes

AGRON 402I. Watershed Hydrology and Surficial Processes.
(Cross-listed with IA LL, ENSCI). Cr. 4. SS. Prereq: Four courses in physical or biological sciences or engineering
Effects of geomorphology, soils, and land use on transport of water and materials (nutrients, contaminants) in watersheds. Fieldwork will emphasize investigations of the Iowa Great Lakes watershed. Nonmajor graduate credit.

AGRON 404. Global Change.
(Dual-listed with 504). (Cross-listed with ENSCI, ENV S, MTEOR). (3-0) Cr. 3. S. Prereq: Four courses in physical or biological sciences or engineering; junior standing
Recent changes in global biogeochemical cycles and climate; models of future changes in the climate system; impacts of global change on agriculture, water resources and human health; ethical issues of global environmental change. Nonmajor graduate credit.

AGRON 405. Environmental Biophysics.
(Dual-listed with 505). (Cross-listed with MTEOR, ENSCI). (3-0) Cr. 3. Alt. S., offered 2013. Prereq: MATH 165 or 182 or equivalent and some computer programming experience (any language)
Hornbuckle. A description of the physical microenvironment in which organisms live. Emphasis on the movement of energy (heat and radiation) and mass (water and carbon) among organisms, the soil, and atmosphere. Applications to humans, other animals, plants, and plant communities. Nonmajor graduate credit.

AGRON 406. World Climates.
(Cross-listed with MTEOR, ENSCI). (3-0) Cr. 3. F. Prereq: Agron/ MTEOR 206
Arritt. Distribution and causes of different climates around the world. Effects of climate and climate variations on human activities including society, economy and agriculture. Current issues such as climate change and international efforts to assess and mitigate the consequences of a changing climate. Semester project and in-class presentation required. Nonmajor graduate credit.

Meets International Perspectives Requirement.

(Dual-listed with 507). (Cross-listed with MTEOR). (3-0) Cr. 3. Alt. S., offered 2012. Prereq: MATH 166 and MTEOR 443

(1-0) Cr. 1. F. S. Prereq: Senior classification
Development of an appropriate content for professionalism. Topics include professional certification, ethics, and maintaining an active network of information sources and professional contacts in support of lifelong learning. Student interpretation, writings, presentations, and discussions.

(Dual-listed with 517). (3-0) Cr. 3. Prereq: 317
Dekker. Ecology and evolution of invasive plants and weeds in habitats disturbed by humans. Life history trait evolution and adaptation to agricultural opportunities and the consequent processes of invasion, colonization, enduring occupation and population shifts. Roles played by mating systems and biodiversity, soil seed pools and community assembly, competitive interactions with neighbors and fitness.

AGRON 421. Introduction to Plant Breeding.
(Cross-listed with HORT). (3-0) Cr. 3. F. Prereq: GEN 320 or BIOL 313
Breeding methods used in the genetic improvement of self-pollinated, cross-pollinated and asexually reproducing agronomic and horticultural crops. Applications of biotechnology techniques in the development of improved cultivars. Nonmajor graduate credit.
AGRON 446. International Issues and Challenges in Sustainable Development.
(Cross-listed with GLOBE, INTST). Cr. 4. S. Prereq: 3-credit biology course, Sophomore or higher classification, permission of Instructor Mullen. Interdisciplinary study and analysis of agricultural, biophysical, environmental, sociological, economical, political, and historical factors affecting sustainable development of communities and countries from art and science perspectives. International field experience with foreign language training required. A program fee is charged to students for international study abroad. Meets International Perspectives Requirement.

AGRON 450. Issues in Sustainable Agriculture.
(Cross-listed with ENV S). (3-0) Cr. 3. F Zdorkowski. Agricultural science as a human activity; contemporary agricultural issues from agroecological perspective. Comparative analysis of intended and actual consequences of development of industrial agricultural practices. Meets International Perspectives Requirement.

AGRON 452. GIS for Geoscientists.
(Dual-listed with 552). (Cross-listed with GEOL, ENSCI). (2-2) Cr. 3. F. Prereq: GEOL 100, GEOL 201 or equivalent. Introduction to geographic information systems (GIS) with particular emphasis on geoscientific data. Uses ESRI’s ArcGIS Desktop Software and extension modules. Emphasizes typical GIS operations and analyses in the geosciences to prepare students for advanced GIS courses. Nonmajor graduate credit.

AGRON 459. Environmental Soil and Water Chemistry.
(Dual-listed with 559). (Cross-listed with ENSCI). (3-3) Cr. 4. F. Prereq: AGRON 354 or ENSCI 360; Chem 164 or 178; MATH 140. CHEM 211 or 231 recommended. Thompson. An introduction to the chemical properties of soils, chemical reactions and transformations in soils and surface waters, and their impact on the environment. Topics include solution chemistry in soils and surface waters, solid-phase composition of soils, reactions at the solid-solution interface, and applications to contemporary environmental issues. Nonmajor graduate credit.

AGRON 463. Soil Formation and Landscape Relationships.
(Dual-listed with 563). (Cross-listed with ENSCI). (2-4) Cr. 4. S. Prereq: AGRON 154 or 260. Relationships between soil formation, geomorphology, and environment. Soil description, classification, geography, mapping, and interpretation for land use. Two weekend field trips. Nonmajor graduate credit. Credit for one of Agron 463 or 463I may be applied for graduation.

1. Soil Formation and Landscape Relationships

AGRON 463I. Soil Formation and Landscape Relationships.

AGRON 477. Soil Physics.
(Dual-listed with 577). (3-0) Cr. 3. S. Prereq: Recommended: AGRON 354 & MATH 166. Horton. The physical soil system: the soil components and their physical interactions; transport processes involving water, air, and heat.

AGRON 484. Organic Agricultural Theory and Practice.
(Dual-listed with 584). (Cross-listed with HORT). (3-0) Cr. 3. Alt. S., offered 2012. Prereq: 9 cr. in biological or physical sciences. Delate & DeWitt. Understanding of the historical origins and ecological theories underpinning the practices involved in organic agriculture. Interdisciplinary examination of crop and livestock production and socioeconomic processes and policies in organic agriculture from researcher and producer perspectives. Nonmajor graduate credit.

AGRON 485. Soil and Environmental Microbiology.
(Dual-listed with 585). (Cross-listed with ENSCI, MICRO). (2-3) Cr. 3. F. Prereq: 154 or 402, MICRO 201 (MICRO 201L recommended). Loyanchan. The living organisms in the soil and what they do. Emphasis on soil biota composition, the carbon cycle and bioremediation, soil-plant-microbial relationships, and environmental issues. Nonmajor graduate credit.

AGRON 490. Independent Study.
Cr. 1-3. Repeatable, maximum of 4 credits. FS.SS. Prereq: Junior or senior classification with at least 8 credits in agronomy; permission of instructor in specialty area after consultation. Selected studies in crops, soils, or agricultural meteorology according to the needs and interests of the student.
E. Entrepreneurship
G. General
H. Honors
Z. Service Learning

AGRON 491. Seed Science Internship Experience.
(Cross-listed with TSM, HORT). Cr. 1-2. Repeatable, maximum of 1 times. FS.SS. Prereq: AGRON 338, advanced approval and participation of employer and instructor. A professional work experience and creative project for seed science secondary majors. The project requires the prior approval and participation of the employer and instructor. The student must submit a written report.

AGRON 493. Workshop in Agronomy.
Cr. arr. Repeatable, maximum of 4 times. Prereq: Permission of instructor. Staff. Workshop experience in crops, soils, or agricultural meteorology. Nonmajor graduate credit.

AGRON 495. Agricultural Travel Course Preparation.
Cr. R. Repeatable. F. S. Prereq: Permission of instructor. Limited enrollment. Students enrolled in this course intend to register for AGRON 496 the following term. Topics will include the agricultural industries, climate, crops, culture, economics, geography, history, livestock, marketing, soils, and preparation for travel to locations to be visited.

AGRON 496. Agricultural Travel Course.
Cr. arr. Repeatable. Prereq: Permission of instructor. Limited enrollment. Tour and study of production methods in major crop and livestock regions of the world. Influence of climate, economics, geography, soils, landscapes, markets, and other factors on crop and livestock production. Location and duration of tours will vary. Tour expenses paid by students. Check with department for current offerings.
A. International Tour
B. Domestic Tour

AGRON 497. Agroecology Field Course.
(3-0) Cr. 3. F. Prereq: Jr. or Sr. classification with at least 8 credits in Agronomy. A one-week intensive class, offered off-campus. Student will visit farms within the Midwest and analyze the sustainability of each farm.

AGRON 498. Cooperative Education.
Cr. R. FS.SS. Prereq: Permission of department cooperative education coordinator; senior classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Courses primarily for graduate students, open to qualified undergraduate students

AGRON 500. Orientation Seminar.
(2-0) Cr. 1. F. Prereq: International agronomy graduate students only. Loyanchan. An introduction to Iowa and U.S. agriculture for international scholars in agronomic majors. Field trips when possible. Departmental role in the functioning of research, teaching, and extension in fulfilling the charge given the land-grant university.
AGRON 501. Crop Growth and Development.  
(3-0) Cr. 3. F. Prereq: 114, MATH 140, CHEM 163, BIOL 101  
Physiological processes in crop growth, development and yield: photosynthesis, respiration, water relations, mineral nutrition, assimilate partitioning, seedling vigor, light interception and canopy growth, root growth, reproduction and yield. Required course for the Master of Science in Agronomy degree program.

AGRON 502. Chemistry, Physics, and Biology of Soils.  
(3-0) Cr. 3. F. Prereq: 114, 154, BIOL 101, CHEM 163, and MATH 140  
Soil chemical, physical, and biological properties that control processes within the soil, their influence on plant/soil interactions, and soil classification. Basic concepts in soil science and their applications. Required course for the Master of Science in Agronomy degree program.

AGRON 503. Climate and Crop Growth.  
(3-0) Cr. 3. F. Prereq: 114 and MATH 140  
Applied concepts in climate and agricultural meteorology with emphasis on the climate-agriculture relationship and the microclimate-agriculture interaction. Basic meteorological principles are also presented to support these applied concepts. Required course for the Master of Science in Agronomy degree program.

AGRON 504. Global Change.  
(Dual-listed with 404). (Cross-listed with MTEOR, ENSCI). (3-0) Cr. 3. S. Prereq: Four courses in physical or biological sciences or engineering; junior, senior, or graduate standing  
Recent changes in global biogeochemical cycles and climate; models of future changes in the climate system; impacts of global change on agriculture, water resources and human health; ethical issues of global environmental change.

AGRON 505. Environmental Biophysics.  
(Dual-listed with 405). (Cross-listed with MTEOR, ENSCI). (3-0) Cr. 3. Alt. S., offered 2013. Prereq: MATH 165 or 182 or equivalent and some computer programming experience (any language)  
Hornbuckle. A description of the physical microenvironment in which organisms live. Emphasis on the movement of energy (heat and radiation) and mass (water and carbon) among organisms, the soil, and atmosphere. Applications to humans, other animals, plants, and plant communities. Semester project required.

AGRON 507. Mesoscale Meteorology.  
(Dual-listed with 407). (Cross-listed with MTEOR). (3-0) Cr. 3. Alt. S., offered 2012. Prereq: MATH 186 and MTEOR 454  
Arritt, Gallus. The physical nature and practical consequences of mesoscale atmospheric phenomena. Mesoscale convective systems, fronts, terrain-forced circulations. Observation, analysis, and prediction of mesoscale atmospheric structure. Semester project and in-class presentation required.

(3-0) Cr. 3. F. Prereq: 505  

AGRON 509. Agroecosystem Analysis.  
(Cross-listed with ANTHR, SOC, SUSAG). (3-4) Cr. 3. F. Prereq: Senior or above classification  
Experiential, interdisciplinary examination of Midwestern agricultural and food systems, emphasizing field visits, with some classroom activities. Focus on understanding multiple elements, perspectives (agronomic, economic, ecological, social, etc), and scales of operation.

AGRON 510. Crop Improvement.  
(Cross-listed with STB). (3-0) Cr. 3. F. Prereq: Admission to the Seed Technology and Business Master’s Degree Program or approval of the instructor  

AGRON 511. Crop Improvement.  
(3-0) Cr. 3. S. Prereq: 114, MATH 140, CHEM 163, BIOL 101  
Basic principles in the genetic improvement of crop plants. Methods of cultivar development in self-pollinated and cross-pollinated crop species. Required course for the Master of Science in Agronomy degree program.

AGRON 512. Soil-Plant Environment.  
(3-0) Cr. 3. S. Prereq: 502. Recommended 501  
Loyghanian. Soil properties and their impact on soil/plant relationships. Soil structure, aeration, moisture, and nutrients will be discussed in the context of soil fertility and environmental quality management. Required course for the Master of Science in Agronomy degree program.

AGRON 513. Quantitative Methods for Agronomy.  
(3-0) Cr. 3. S. Prereq: 114, MATH 140, STAT 104  
Quantitative methods for analyzing and interpreting agronomic information. Principles of experimental design, hypothesis testing, analysis of variance, regression, correlation, and graphical representation of data. Use of JMP for organization, analyzing, and presenting data. Required course for the Master of Science in Agronomy degree program.

AGRON 514. Integrated Pest Management.  
(3-0) Cr. 3. SS. Prereq: 114, 501, MATH 140, CHEM 163, BIOL 101. Recommended: 502, 503  
Principles and practices of weed science, entomology, and plant pathology applied to crop production systems. Biology, ecology and principles of integrated crop pest management. Required course for the Master of Science in Agronomy degree program.

AGRON 515. Integrated Crop and Livestock Production Systems.  
(Cross-listed with A E, SUSAG, AN S). (3-0) Cr. 3. F. Prereq: 509  
Methods to maintain productivity and minimize the negative ecological effects of agricultural systems by understanding nutrient cycles, managing manure and crop residue, and utilizing multispecies interactions. Crop and livestock production within landscapes and watersheds is also considered. Course includes a significant field component, with student teams analyzing Iowa farms.

AGRON 516. Crop Physiology.  
(3-0) Cr. 3. S.  
Westgate. Investigation of Molecular, whole plant, and plant community processes essential to biomass production and seed formation, and analysis of molecular approaches to overcome the limitations imposed on these processes by the environment.

(Dual-listed with 417). (3-0) Cr. 3. S. Prereq: 317  
Dekker. Ecology and evolution of invasive plants and weeds in habitats disturbed by humans. Life history trait evolution and adaptation to cultural opportunities and the consequent processes of invasion, colonization, enduring occupation and population shifts. Roles played by mating systems and biodiversity, soil seed pools and community assembly, competitive interactions with neighbors and fitness.

(Cross-listed with E E, MTEOR). (3-0) Cr. 3. Alt. S., offered 2012. Prereq: MATH 265 or equivalent  
Hornbuckle. Microwave remote sensing of Earth’s surface and atmosphere using satellite- or ground-based instruments. Specific examples include remote sensing of atmospheric temperature and water vapor, precipitation, ocean salinity, and soil moisture.
AGRON 519. Herbicide Physiology and Biochemistry.
(2-0) Cr. 2. Alt., S.; offered 2012. Prereq: 317; BIOL 330
Owen. Herbicide mechanisms of action, selectivity, uptake, and translocation. Specific sites of herbicide action as they affect plant physiology. Herbicide resistance in weeds and crops. Implications of herbicides on weed management.

AGRON 521. Principles of Cultivar Development.
(3-0) Cr. 3. F. Prereq: 421; STAT 401
Theoretical and practical analysis of alternative breeding methods to improve crop plants. Strategies to incorporate germplasm resources, develop populations, maximize genetic gain, and use marker-assisted selection. Relationship of breeding methods to commercial seed production.

AGRON 522. Field Methods in Plant Breeding.
(0-6) Cr. 1-2. Alt. SS.; offered 2012. Prereq: 521
Field experience in planning and conducting plant breeding research for germplasm and cultivar development. Offered on a satisfactory-fail basis only.

AGRON 523. Molecular Plant Breeding.
(2-2) Cr. 3. S. Prereq: AGRON 421 or 521, GDCB 542A
Plant breeding in the era of sequenced genomes and transformation. High throughout genomic technologies will be presented in relation to various applications in plant breeding.

AGRON 526. Field Plot Technique.
(2-0) Cr. 2. Alt. F., offered 2012. Prereq: STAT 401
Moore. Planning experiments for agricultural research, analysis of data, and concepts in data interpretation.

AGRON 527. Plant Genetics.
(3-0) Cr. 3. S. Prereq: GEN 410
Bhattacharya. Fundamental genetic and cytogenetic concepts from plant perspective including recombination, linkage analysis, genetic and molecular mapping, male sterility, self incompatibility, apomixis, and polyploid evolution.

(Cross-listed with HORT, NREM). (2-0) Cr. 2. S. Prereq: Permission of instructor; evidence of a publishable unit of the student’s research data Process of preparing a manuscript for submission to a refereed journal in the biological sciences. Emphasis on publishing self-generated data from thesis or dissertation research.

AGRON 530. Ecologically Based Pest Management Strategies.
(Cross-listed with SUSAG, ENT, PL P). (3-0) Cr. 3. Alt. F., offered 2012. Prereq: SUSAG 509
Durable, least-toxic strategies for managing weeds, pathogens, and insect pests, with emphasis on underlying ecological processes.

(3-0) Cr. 3. F. Prereq: 501, 502, 503. Recommended: 512, 514
Ecological principles underlying crop production systems. Crop production in the context of management approaches, system resources and constraints, and interactions. Emphasis on the ecology of row and forage crops common to the Midwest. Required course for the Master of Science in Agronomy degree program.

AGRON 532. Soil Management.
(3-0) Cr. 3. F. Prereq: 501, 503, 512. Recommended 513
Evaluates the impact of various soil management practices on soil and water resources. Combines and applies basic information gained in AGRON 502 and AGRON 512. Emphasizes the agronomic, economic, and environmental effects of soil management strategies. Required course for the Master of Science in Agronomy degree program.

AGRON 533. Crop Protection.
(3-0) Cr. 3. F. Prereq: 514
Integrated management systems for important crop pests. Cultural, biological and chemical management strategies applicable to major crops grown in the Midwest. Required course for the Master of Science in Agronomy degree program.

AGRON 534. Seed and Variety, Testing and Technology.
(Cross-listed with STB). (2-0) Cr. 2. Prereq: Admission to the Seed Technology and Business Master’s Degree Program or approval of the instructor
The components of seed quality and how they are assessed in the laboratory, including traits derived from modern biotechnology. The impact of new technologies on seed quality testing. Variety maintenance procedures and breeder seed. Variety identification: phenotype and grow-out trials, isozyme testing, and DNA marker testing. Procedures for evaluating varieties. The variance tests appropriate for fixed effects analysis of variance. Statistical inference and stratification for yield trials. Use of strip plot testing.

AGRON 535. Introduction to the Seed Industry.
(Cross-listed with STB). (2-0) Cr. 1. Prereq: Curriculum requires undergraduate specialization in a business or biological science
An analysis of the defining characteristics of the seed industry and introduction to the Master in Seed Technology and Business curriculum. The tasks of crop improvement and seed production will be analytically related to basic management functions and classifications of management activities that are used in the study of business administration. Management tasks and roles will be analyzed in relation to the public policy issues that shape the seed industry, including ethical and economical approaches to biotechnology, intellectual property, and corporate responsibility.

AGRON 536. Quantitative Methods for Seed.
(Cross-listed with STB). (1-0) Cr. 1. F. Prereq: Admission to the Seed Technology and Business Master’s Degree Program or approval of the instructor
Quantitative Methods for analyzing and interpreting agronomic and business information for the seed industry. Principles of experimental design and hypothesis testing, regression, correlation and graphical representation of data. Use of spreadsheets for manipulating, analyzing and presenting data.

AGRON 537. Plant Stress Biology.
(Cross-listed with HORT, EEOB). (3-0) Cr. 3. Alt. S., offered 2013. Prereq: Biol 330A or equivalent and BBMB 404-405
Physiology and molecular biology of plant responses to environmental stress. Emphasis on the role of hormones and hormone interactions in governing stress responses. Lectures are prepared from journal papers that elucidate key mechanisms controlling responses to drought, flooding, salt, nutrient deficiencies, freezing, pathogens and herbivores. Plants studied include genetic model systems and crops of horticultural and agronomic value.

AGRON 538. Seed Physiology.
(2-0) Cr. 2. Alt. F. offered 2012. Prereq: 328; CHEM 231 or CHEM 321
Goggi. Physiological aspects of seed development, maturation, longevity, dormancy, and germination. Emphasis on current literature and advanced methodology.

AGRON 539. Seed Conditioning and Storage.
(Cross-listed with STB). (2-0) Cr. 2. F. Prereq: Admission to the Seed Technology and Business Master’s Degree Program or approval of the instructor
The technical operations which may be carried out on a seed lot from harvest until it is ready for marketing and use. The opportunities for quality improvement and the risks of deterioration which are present during that time. Analysis of the costs of and benefits of operations. Evaluation of equipment based on benefits to the customer and producer. Interpretation of the role of the conditioning plant and store as focal points within the overall operations of a seed company.
AGRON 570. Risk Assessment for Food, Agriculture and Veterinary Medicine.  
(Cross-listed with VDPAM, TOXI). (3-0) Cr. 3. Alt. F., offered 2011. Prereq: STAT 104 or consent of instructor: Wolt, Hurd  

AGRON 575. Soil Formation and Transformation.  
(Cross-listed with ENSECI). (3-0) Cr. 3. Alt. F., offered 2012. Prereq: 463 or equivalent  
Advanced study of soil formation, emphasizing relationships among soils, landscapes, environment, humans, and land use.

AGRON 577. Soil Physics.  
(Dual-listed with 477). (Cross-listed with ENSECI). (3-0) Cr. 3. S. Prereq: Recommended: AGRON 384 and MATH 166  
Horton. The physical soil system: the soil components and their physical interactions; transport processes involving water, air, and heat.

AGRON 578. Laboratory Methods in Soil Physics.  
(Cross-listed with ENSECI). (0-3) Cr. 1. S. Prereq: 577 concurrent  
Horton. Methods of measuring soil physical properties such as texture, density, and water content, and transport of heat, water, and gases.

AGRON 584. Organic Agricultural Theory and Practice.  
(Dual-listed with 481). (Cross-listed with HORT, SUSAG). (3-0) Cr. 3. Alt. S., offered 2012. Prereq: 9 cr. in biological or physical sciences  
Delate & DeWitt. Understanding of the historical origins and ecological theories underpinning the practices involved in organic agriculture. Interdisciplinary examination of crop and livestock production and socioeconomic processes and policies in organic agriculture from researcher and producer perspectives.

AGRON 585. Soil and Environmental Microbiology.  
(Dual-listed with 485). (Cross-listed with ENSECI, MICRO). (2-3) Cr. 3. F. Prereq: 154 or 402, MICRO 201 (MICRO 201L recommended)  
Loynachan. The living organisms in the soil and what they do. Emphasis on soil biota composition, the carbon cycle and bioremediation, soil-plant-microbial relationships, and environmental issues.

AGRON 590. Special Topics.  
Cr. arr. Repeatable. Prereq: 15 credits in agronomy  
Literature reviews and conferences on selected topics in crops, soils, or agricultural meteorology according to needs and interest of student.

AGRON 591. Agronomic Systems Analysis.  
(3-0) Cr. 3. S. Prereq: 511, 513, 531, 532, 533  
Analysis of cropping systems from a problem-solving perspective. Case studies will be used to develop the students’ ability to solve agronomic problems. Required course for the Master of Science in Agronomy degree program.

(3-0) Cr. 3. S. Prereq: 501, 503, 511, 512, 513, 514  
Study and discussion of topics of current interest to the field of agronomy. While AGRON 591 deals with agronomics at the farm and landscape level, AGRON 592 seeks to address issues on a broader scale including off-farm agricultural impacts. Required course for the Master of Science in Agronomy degree program.

AGRON 593. Workshop in Agronomy.  
Cr. arr. Repeatable. Prereq: Graduate classification  
A. Crops  
B. Soils  
C. Agricultural Meteorology  
D. Seed Science  
E. Weed Science

AGRON 594. Agronomy MS Practicum.  
(1-0) Cr. 1. SS. Prereq: 501, 502, 503, 514 (or current enrollment. Recommended: 511, 512, 513  
Practical field and laboratory experiences integrating coursework in climatology, crops, and soils. Includes lectures, labs and local agri-business tours.

AGRON 595. Seed Quality, Production, and Research Management.  
(Cross-listed with STB). (3-0) Cr. 3. Prereq: Admission to the Seed Technology and Business Master’s Degree Program or approval of the instructor  
Advanced survey of the organization, staff capabilities and management characteristics typical in seed production and crop improvement in seed enterprises. Analysis of the use of quality information in the management of seed operations and sales. Process management applications for seed. Production planning for existing capacity. Analysis of the manager’s tasks in the annual cycle and how the tasks of these managers relate to the general categories of business management roles. Difference in management strategies used with different situations and groups of employees.

AGRON 599. Creative Component.  
Cr. arr. Prereq: Nonthesis M.S. option only  
A written report based on research, library readings, or topics related to the student’s area of specialization and approved by the student’s advisory committee.

A. Agricultural Meteorology  
B. Crop Production and Physiology  
C. Plant Breeding  
D. Soil Chemistry  
E. Soil Fertility  
F. Soil Management  
G. Soil Microbiology and Biochemistry  
H. Soil Morphology and Genesis  
I. Soil Physics  
K. Seed Science  
L. Weed Science  
M. Agronomy

Courses primarily for graduate students

AGRON 600. Seminar.  
(1-0) Cr. 1. Repeatable, maximum of 6 times. F.S.  
Reports and discussion of recent literature and research.

A. Plant Breeding  
B. Soils. F.S.  
C. Crop Production and Physiology. F.S.

AGRON 609. Agricultural Meteorology Conference.  
(1-0) Cr. 1. Repeatable. F.S.SS. Prereq: Permission of instructor  
Literature reviews and conferences with instructor on special problems relating to agricultural meteorology, beyond the scope of current courses offered.

AGRON 610. Foundations of Sustainable Agriculture.  
(Cross-listed with SUSAG, A E, ANTHR, SOC). (3-0) Cr. 3. F. Prereq: Graduate classification, permission of instructor  
Historical, biophysical, socioeconomic, and ethical dimensions of agricultural sustainability. Strategies for evaluating existing and emerging agricultural systems in terms of the core concepts of sustainability and their theoretical contexts.

AGRON 616. Advanced Topics in Plant Physiology and Biochemistry.  
(4-0) Cr. 4. Alt. S., offered 2012. Prereq: Graduate classification; permission of instructor  
Westgate. An in-depth treatment of physiological, biochemical and molecular processes regulating plant growth and development. Emphasis on individual study followed by in-class presentations and discussion.
AGRON 621. Advanced Plant Breeding.
(3-0) Cr. 3. F. Prereq: 521, 526, 561; GEN 410
Beavis. Estimation and interpretation of genetic effects and variances of plant breeding populations, analysis of mating designs, estimation of combining ability and heritability, best linear unbiased prediction, selection indices with and without molecular information, inbreeding and heterosis.

AGRON 625. Genetic Strategies in Plant Breeding.
(3-0) Cr. 3. Alt. S., offered 2013. Prereq: 521, GEN 410
Lee. Evaluation of genetic, molecular, and cellular approaches to crop improvement; gene transfer methods. Application and role of basic plant biology in breeding programs and processes; genome structure and function, gene isolation, expression, regulation, and modification. Integration of molecular and cellular methods in breeding strategies; analysis of alternative breeding methods, regulatory and ethical issues.

AGRON 655. Advanced Soil Fertility.
(2-0) Cr. 2. Alt. S., offered 2013. Prereq: 553
Evaluation of soil fertility and fertilizers; theory and applications.

AGRON 677. Advanced Soil Physics.
(2-0) Cr. 2. Alt. F., offered 2012. Prereq: 577; MATH 266, 267. Recommended: COM S 207
Horton. The flow and distribution of water, chemicals, and heat in soils. Physical principles and applications.

AGRON 685. Advanced Soil Biochemistry.
(Cross-listed with MICRO, ENSCI). (2-0) Cr. 2. Alt. S., offered 2012. Prereq: AGRON 585
Tabatabai. Chemistry of soil organic matter and biochemical transformations brought about by microorganisms and enzymes in soils.

AGRON 696. Research Seminar.
(Cross-listed with BBMB, GDCB, PLBIO, HORT, FOR). Cr. 1. Repeatable. Research seminars by faculty and graduate students. Offered on a satisfactory-fail basis only.

AGRON 698. Agronomy Teaching Practicum.
Cr. 1-2. Repeatable. F.S.S. Prereq: Graduate classification in agronomy and permission of instructor
Graduate student experience in the agronomy teaching program. Offered on a satisfactory-fail basis only.

AGRON 699. Research.
Cr. arr. Repeatable.

A. Agricultural Meteorology
B. Crop Production and Physiology
C. Plant Breeding
D. Soil Chemistry
E. Soil Fertility
F. Soil Management
G. Soil Microbiology and Biochemistry
H. Soil Morphology and Genesis
I. Soil Physics
J. Plant Physiology
K. Seed Science
L. Weed Science
**Animal Science**

**Undergraduate Study**

The Department of Animal Science Undergraduate Program intends for its graduates to be able to detail the symbiotic relationship of animals and humans, to contribute to the solution of complex problems of animal enterprise management using a sustainable model, and to apply their knowledge and skills in a technically demanding global community. To enable learners to pursue a wide array of career interests, the department offers learning experiences ranging from the basic to the applied sciences. The department’s undergraduate degree program has 10 major program goals. They are to provide a comprehensive animal science education in:

- science
- animal management
- agri-business

In addition, our program strives to create an environment developing:

- effective communication skills
- skills enabling students to gather and integrate information to solve problems
- self learners
- leaders and team builders
- awareness of domestic and global issues driving changes in the animal industries.

Our program also works to:

- provide career skills appropriate to job market needs
- provide superior counseling for fulfilling individual student objectives.

Learner outcomes for each of these goals, for each of our courses, and other information defining the program can be found at our web site: www.ans.iastate.edu.

The department offers the degrees bachelor of science in animal science and bachelor of science in dairy science, as well as complementary work toward admission to schools of law, medicine, and veterinary medicine which may be done while satisfying requirements for the degree bachelor of science degree (see Index). A minimum of 15 credits of animal science coursework must be earned at Iowa State University. A combined bachelor of science and master of science in animal science is also offered.

The department offers a minor in Animal Science. The minor requires:

- AN S 270L: Foods of Animal Origin Laboratory
- AN S 270: Foods of Animal Origin
- AN S 235: Animal Management
- AN S 229: Sheep Science
- AN S 226: Beef Cattle Science
- AN S 223: Poultry Science
- AN S 216: Equine Science
- AN S 214L: Domestic Animal Anatomy and Physiology Lab
- AN S 214: Domestic Animal Anatomy and Physiology
- AN S 203: Animal Nutrition
- AN S 114: Survey of the Animal Industry
- AN S 101: Working with Animals
- AN S 103: Domestic Animal Reproduction
- AN S 102: Genetics of Domestic Animals
- AN S 100: Fresh Meats

A total of 9 credits must be earned at Iowa State University in animal science coursework that meets a degree requirement for the B.S. degree in animal science. Students interested in the Animal Science minor should contact an Animal Science adviser.

The department offers a minor in Meat Science. The minor requires:

- AN S 270: Foods of Animal Origin
- AN S 235: Animal Management
- AN S 229: Sheep Science
- AN S 226: Beef Cattle Science
- AN S 223: Poultry Science
- AN S 216: Equine Science
- AN S 214L: Domestic Animal Anatomy and Physiology Laboratory
- AN S 214: Domestic Animal Anatomy and Physiology
- AN S 203: Animal Nutrition
- AN S 114: Survey of the Animal Industry
- AN S 101: Working with Animals
- AN S 103: Domestic Animal Reproduction
- AN S 102: Genetics of Domestic Animals
- AN S 100: Fresh Meats

Students majoring in Animal Science will NOT be allowed to count the 9 required credits (270, 270L, 360, 460) toward their Animal Science degree. Students interested in the Meat Science minor should contact an Animal Science adviser.

The Department also facilitates student participation in the Midwest Poultry Consortium and the Swine Science Online program to offer additional training in poultry and swine production, respectively.

**Graduate Study**

The department offers work for the degrees master of science and doctor of philosophy with majors in animal breeding and genetics; meat science; animal physiology; and animal science. Minor work is offered in these areas to students taking major work in other departments.

A strong undergraduate program is required for students interested in graduate study. Fundamental training in biology, chemistry, mathematics, and statistics is requisite to a satisfactory graduate program. Graduate programs in animal science include supporting work in areas such as agricultural engineering, agronomy; anatomy; biochemistry; chemistry; economics; environmental science; food science and human nutrition; genetics; microbiology; physics; physiology; and statistics. Students may choose graduate programs involving a co-major with one of these areas. Graduate work in meat science is offered as a co-major in animal science and food science and human nutrition.

The department also cooperates in the interdepartmental program in professional agriculture and interdepartmental majors in genetics, immunobiology, MCDB (molecular, cellular, and developmental biology), nutritional sciences, and toxicology (see Index).

The foreign language requirement, if any, is established on an individual basis by the program-of-study committee appointed to guide the work of the student.

**Curriculum in Animal Science**

Students majoring in animal science will complete the degree requirements listed below. If desired, a student may also choose a specialized option. To earn a degree in Animal Science from Iowa State University a minimum of 15 credits in Animal Science must be earned from courses taught in the Animal Science department at ISU. Students desiring to complete a minor in Animal Science must complete 17 credits in...
Animal Science courses from a list maintained in the department, and a minimum of 9 credits in Animal Science must be earned from courses taught in the Animal Science department at ISU.

**Total Degree Requirement: 128 cr.**

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

**International Perspective: 3 cr.**

**U.S. Diversity: 3 cr.**

  - & AN S 270L: and Foods of Animal Origin Laboratory

### Equine Management option: 47 cr.

- **Animal Science General Requirements**: 23 credits
- **AN S 216**: Equine Science (3)
- **AN S 415**: Equine Systems Management (3)
- Nine credits from: (9)
  - **AN S 199E**: Horses
- **AN S 217**: Equine Farm Practicum (3)
- **AN S 306**: Equine Evaluation (3)
- **AN S 313**: Exercise Physiology of Animals (3)
- **AN S 417**: Equine Reproductive Management (3)
- **AN S 475E**: Horses (3)
- **AN S 490E**: Equine Science (3)

- Two courses from: (6)
  - **AN S 223**: Poultry Science
  - **AN S 224**: Companion Animal Science
  - **AN S 225**: Swine Science
  - **AN S 226**: Beef Cattle Science
  - **AN S 229**: Sheep Science
  - **AN S 235**: Dairy Cattle Science
  - **AN S 270**: Foods of Animal Origin
  - & AN S 270L: and Foods of Animal Origin Laboratory

### Must include 15 credits taken at ISU.
Curriculum in Dairy Science

Students majoring in Dairy Science will complete the degree requirements listed below. If desired, a student may also include the specialized option in pre-veterinary medicine.

Total Degree Requirement: 128 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.

U.S. Diversity: 3 cr.

Communications Proficiency:

Total Credits: 8

Courses primarily for undergraduate students

AN S 101. Working with Animals.

(1-2) Cr. 2. FS.

A hands-on introductory course in skills for proper care and management of domestic animals. Husbandry skills including health observation, animal movement, identification, management procedures, and environmental assessment are covered.

AN S 110. Orientation in Animal Science and ISU.

Cr. R. FS.

Orientation to the university and Department of Animal Science. Challenges and opportunities available to the professional animal agriculturist. Professional goal setting, portfolio development, and development of interpersonal skills in the context of pursuing a career in animal science.

(2-0) Cr. 2. FS.SS.

Ways domestic animals serve the basic needs of humans for food, shelter, protection, fuel, and emotional well-being. Terminology, basic structures of the industries surrounding the production, care, and marketing of domestic animals in the U.S.
AN S 199. Marketing and Management of Livestock Events.  
(0-2) Cr. 1. Repeatable. F.S. Prereq: Credit or enrollment in AN S 101 or AN S 114  
Management and coordination of livestock shows, sales and events, including program planning, staff and volunteer management, time management, publicity and promotion for fairs, shows, clinics, expos, and other events. For section E students are expected to take the fall and spring courses consecutively. Offered on a satisfactory-fail basis only. A maximum of two credits of AnS 199 may be applied toward the total credits required for graduation.

A. Beef  
E. Horses  

AN S 211. Issues Facing Animal Science.  
(0-2) Cr. 1. F.S. Prereq: AN S 114, sophomore classification  
Overview of the factors that define contemporary ethical and scientifically based issues facing animal agriculture. Life skill development (including interactive skills, communication ability, organization, information gathering, and leadership skills) emphasized in the context of issues study. Offered on a satisfactory-fail basis only.

AN S 214. Domestic Animal Physiology.  
(3-0) Cr. 3. F.S. Prereq: BIOL 212, CHEM 163 or 177  
Introduction to anatomy and physiology of the neural, circulatory, respiratory, immune, endocrine, reproductive, and digestive systems of domestic animals.

L. Domestic Animal Anatomy and Physiology Lab

AN S 214L. Domestic Animal Anatomy and Physiology Lab.  
(0-2) Cr. 1. F.S. Prereq: Concurrent enrollment in AN S 214  
Basic anatomy of domestic animals.

AN S 216. Equine Science.  
(2-2) Cr. 3. F. Prereq: AN S 101 or AN S 114; one course in biology  
Introduction to contemporary concepts, and basic practices and decisions necessary when managing horses through stages of their lives.

AN S 217. Equine Farm Practicum.  
(1-2) Cr. 2. F. Prereq: Student majoring in Animal Science, riding experience An S, credit or concurrent enrollment in AN S 216  
Intensified management of the equine farm. Provide students with experiential learning in all phases of horse production and management. Students assist with general farm management, preparing horses for sale, marketing techniques and web design.

AN S 223. Poultry Science.  
(2-2) Cr. 3. F.S. Prereq: AN S 101, AN S 114  
Introduction to principles, practices and decisions necessary when raising poultry through their production cycle.

(2-2) Cr. 3. S. Prereq: Course in biology  
Introduction of students to contemporary concepts, and basic practices and decisions necessary when caring for the companion animal through stages of its life.

AN S 225. Swine Science.  
(2-2) Cr. 3. F.S. Prereq: AN S 101, AN S 114  
Introduction to principles, practices and decisions necessary when raising swine through the vertically integrated production cycle.

(2-2) Cr. 3. F.S. Prereq: AN S 101, AN S 114  
Introduction to principles, practices and decisions necessary when raising beef cattle through the vertically integrated production cycle.

AN S 229. Sheep Science.  
(2-2) Cr. 3. F.S. Prereq: AN S 101, AN S 114  
Introduction to principles, practices and decisions necessary when raising sheep through their production cycle.

AN S 235. Dairy Cattle Science.  
(2-2) Cr. 3. F. Prereq: AN S 101, AN S 114  
Introduction to principles, practices and decisions necessary when raising dairy cattle through the vertically integrated production cycle.

(2-0) Cr. 2. F.S. Prereq: BIOL 212, CHEM 163 or 177  
Principles, practices and issues impacting the production, processing and preservation of safe, wholesome, nutritious, and palatable meat, dairy, and egg products. Product evaluation, classification, value, and utilization.

L. Foods of Animal Origin Laboratory

AN S 270L. Foods of Animal Origin Laboratory.  
(0-6) Cr. 1. Prereq: Credit or current enrollment in 270  
Determination of composition and quality of meat, eggs and milk based on industry and USDA standards. Fundamentals of processing foods of animal origin to add value, maintain quality and ensure safety.

AN S 305. Livestock Evaluation.  
(0-6) Cr. 3. F. Prereq: Junior classification; AN S 270L recommended  
Fall semester leads to 475A or D. Breeding animal and market animal evaluation of beef, swine and sheep using contemporary techniques and tools. Communication and decision-making skills are practiced in the context of making selection decisions.

(0-6) Cr. 3. S. Prereq: sophomore classification or permission of instructor  
Detailed visual evaluation of conformation and performance of the equine athlete. Decision-making skills are practiced in the context of making selection choices. Development of written and oral communication skills as students defend their judgments. Industry trends will be addressed.

AN S 311. Career Preparation in Animal Science.  
(0-2) Cr. 1. F.S. Prereq: Junior classification in An S  
Life skill development emphasized in the context of career preparation. Assist students with career goal clarification, interview skills, resume and cover letter preparation. Internship development, job shadowing, and exploration of career option. Offered on a satisfactory-fail basis only.

AN S 313. Exercise Physiology of Animals.  
(2-0) Cr. 2. Alt. S., offered 2013. Prereq: AN S 214, BIOL 211, one course in chemistry  
Interaction of physiological development relative to athletic performance in domestic animals, primarily equine performance.

(0-6) Cr. 1-3.  
Modifying the behavior of the horse using systematic approaches to horse training emphasizing the psychology of training horses. Equipment and its use and preparation of horses for competition. A maximum of 4 credits of An S 317 may be applied toward graduation.

A. Young horses at halter. Cr. 1.  
B. Yearlings. Cr. 3. Permission of instructor  
C. Two-year olds and older. Cr. 3. Permission of instructor.

(3-0) Cr. 3. F.S. Prereq: AN S 214, course in organic chemistry or biochemistry  
Structure and function of organic and inorganic nutrients. Digestion, absorption, metabolism and utilization of nutrients for maintenance and productive functions. Essential nutritive requirements of domestic livestock, poultry, and companion animals. Sources of nutrients, application of energy systems and concepts, and regulation of feed intake in animals. Nonmajor graduate credit. Nonmajor graduate credit.

AN S 320. Animal Feeds and Feeding.  
(2-2) Cr. 3. F.S. Prereq: AN S 319  
Evaluation of the chemical and physical properties of feedstuffs. Preparation and processing of feedstuffs. Diet formulation, feeding recommendations and delivery systems. Case studies.
AN S 325. Biorenewable Systems.
(Cross-listed with A E, AGRON, BSE, BUSAD, ECON, TSM). (3-0) Cr. 3. F.
Prereq: ECON 101, CHEM 163 or higher, MATH 140 or higher
Converting biorenewable resources into bioenergy and biobased products. Biorenewable concepts as they relate to drivers of change, feedstock production, processes, products, co-products, economics, and transportation/logistics.

AN S 331. Domestic Animal Reproduction.
(3-0) Cr. 3. F.S. Prereq: Course in physiology
Comparative anatomy, physiology, and endocrinology of domestic mammalian animal reproduction. Techniques for the control and manipulation of reproductive processes. Nonmajor graduate credit.

AN S 332. Laboratory Methods in Animal Reproduction.
(0-2) Cr. 1. F.S. Prereq: Credit or enrollment in AN S 331
Comparative reproductive anatomy with emphasis on the physiology of normal reproductive function; ways to control and improve reproduction; principles of artificial insemination in farm animals; pregnancy testing; selected laboratory exercises with written report.

AN S 333. Embryo Transfer and Related Technologies.
(2-0) Cr. 2. F.S. Prereq: AN S 331 or AN S 332
Application of embryo transfer and related technologies to genetic improvement of mammalian livestock. Techniques for control of female reproduction, embryo collection and transfer, embryo cryopreservation, and embryo manipulation. Gender selection. Economic and genetic aspects of embryo transfer. Nonmajor graduate credit.

AN S 334. Embryo Transfer Laboratory.
(0-3) Cr. 1. F. Prereq: Credit or concurrent enrollment in AN S 333; AN S 332 or VDPAM 416; permission of instructor
Selected laboratory exercises related to embryo transfer such as synchronization of estrus, superovulation, detection of estrus, artificial insemination, embryo collection, embryo evaluation, microscopy, embryo cryopreservation, in vitro fertilization, embryo sexing, rectal palpation, and ultrasonography will be demonstrated and/or performed. Nonmajor graduate credit.

AN S 335. Dairy Cattle Evaluation.
(0-6) Cr. 3. S. Prereq: Sophomore classification
Evaluation of breeding animals for dairy herds. Comparative terminology, decision making, and presentation of oral reasons. Trips to dairy cattle farms. Livestock handling.

(2-2) Cr. 3. F. Prereq: One course in physiology
Principles of behavior relative to animal care, management and environmental design to ensure animal well-being. Examination of basic neural-endocrine mechanisms involved in the animal’s response to its environment. Awareness of animal protection, law and legislation. Methods to objectively assess animal well-being.

AN S 337. Lactation.
(3-0) Cr. 3. S. Prereq: AN S 214

AN S 345. Growth and Development of Domestic Animals.
(3-0) Cr. 3. S. Prereq: AN S 214; BIOL 313 or GEN 320
Basic principles of animal growth and development covered at the tissue, cellular and molecular level. Emphasis placed on skeletal muscle, adipose, bone, and immune system growth and development. The effects of genetics, nutrition, and pharmaceuticals on growth.

AN S 352. Genetic Improvement of Domestic Animals.
(2-2) Cr. 3. F.S. Prereq: One course in statistics, BIOL 211, course in genetics
Principles of qualitative and quantitative genetics applied to creating change in domestic animals. Impact of selection and mating schemes in achieving breeding program goals. Applications and impacts of biotechnological advancements in genetic manipulation. Nonmajor graduate credit.

AN S 360. Fresh Meats.
(2-2) Cr. 3. F. Prereq: AN S 270; a course in organic biochemistry
Impact of muscle structure, composition, rigor mortis, inspection, fabrication, handling, packaging and cooking on the palatability, nutritional value, yields, market value, and safety of fresh meat. Nonmajor graduate credit.

AN S 399. Animal Science Internship.
Cr. arr. Repeatable. F.S.S.
A. Graded Internship Experience. Cr. 2 to 6.
B. Supervised Internship Experience. Cr. R.

(0-2) Cr. 1. F.S. Prereq: Senior classification in An S
Life skill development emphasized in the context of exploring one’s perspective of the most pressing moral and scientific issues facing animal agriculture. Clarification and communication of personal conclusions in small and large group settings expected.

AN S 414. Equine Nutrition and Feeding.
(2-0) Cr. 2. Alt. S., offered 2012. Prereq: AnS 319
Total ration assessment for the equine including forage management, pasture management, and concentrates. Skill development for nutritional assessment using computer programs.

AN S 415. Equine Systems Management.
(2-2) Cr. 3. S. Prereq: AN S 216, AN S 319, AN S 320, AN S 331

AN S 417. Equine Reproductive Management.
(2-2) Cr. 3. S. Prereq: AN S 216, AN S 331, AN S 415 or concurrent and permission of instructor
Practical application of managing a breeding farm including servicing the mare, handling stallions, breeding problems, foaling mares, and marketing techniques.

(2-0) Cr. 2. F. Prereq: AN S 214, AN S 319, AN S 320
Detailed consideration of digestion, metabolism, and assimilation of nutrients. Recent advances and developments in basic nutrition. Nonmajor graduate credit.

(2-2) Cr. 3. S. Prereq: AN S 224, AN S 319, AN S 320, AN S 331, AN S 352
Decisions facing the administrator of a companion animal enterprise. Financial and business goal identification, problem clarification, and resource allocation to manage the companion animal system. Nonmajor graduate credit.

AN S 425. Swine Systems Management.
(2-2) Cr. 3. F.S. Prereq: AN S 225, AN S 270, AN S 319, AN S 320, AN S 331, AN S 352; ECON 230 or equivalent recommended
AN S 426. Beef Cattle Systems Management.
(2-2) Cr. 3. FS. Prereq: AN S 226, AN S 270, AN S 319, AN S 320, AN S 331, AN S 352; ECON 230 or equivalent recommended
Decisions facing the administrator of a beef cow-calf or feedlot enterprise. Financial and production goal identification, problem clarification, and resource allocation to manage the beef enterprise. Computer aided study. Nonmajor graduate credit.

AN S 429. Sheep Systems Management.
(2-2) Cr. 3. S. Prereq: AN S 229, AN S 319, AN S 320, AN S 331, AN S 352; AGRON 334 recommended; ECON 230 or equivalent recommended

AN S 434. Dairy Systems Management.
(3-0) Cr. 3. FS. Prereq: AN S 235, AN S 319, AN S 320, AN S 337, AN S 352; ECON 230 or equivalent recommended

(2-2) Cr. 3. S. Prereq: AN S 434; ECON 230
Evaluate nutrition, reproduction, milk quality, breeding, and related management practices of commercial dairy herds in a case study format. Students will apply knowledge gained in the classroom to commercial dairy farm situations and develop skills in information gathering, decision making, problem solving, and interpersonal communications. Nonmajor graduate credit.

AN S 460. Processed Meats.
(Dual-listed with 560). (2-2) Cr. 3. S. Prereq: AN S 270 and AN S 270L
Physical, chemical and biological properties of meat important to processed meat product characteristics. Ingredients, technology and equipment used for cured meats, loaf products and fresh, cooked, dry and semi-dry sausage products. Nonmajor graduate credit.

AN S 475. Intercollegiate Judging Training and Competition.
(0-4) Cr. 1-2. Repeatable. F.S. Prereq: permission of instructor
Specialized training in evaluation and grading of livestock, livestock products, and livestock production management plans. Maximum of 6 credits may be applied toward graduation.
A. Meat Animals
B. Dairy Cattle
C. Meats
E. Horses
F. Management Systems

AN S 480. Animal Industry Leadership Fellows.
Cr. 1. Repeatable. F.S. Prereq: A. AN S 226; permission of instructor C. AN S 225; permission of instructor
Students broaden their perspective of the livestock industry through site visits, case-study (Fellows) projects, and cooperative learning experiences that capitalize on interaction skills in the context of studying the structure of the U.S. livestock industry. This for-credit offering represents the central academic focus of the Iowa State University Animal Industry Leadership Fellows Program. Study is species specific, and enrollment is limited. Offered on a satisfactory-fail basis only.
A. Beef
C. Pork

AN S 489. Issues in Food Safety.
(Cross-listed with FS HN, HRI, VDPAM). (1-0) Cr. 1. Alt. S., offered 2012. Prereq: Credit or enrollment in FS HN 101 or 272 or HRI 233; FS HN 419 or 420; FS HN 403
Capstone seminar for the food safety minor. Case discussions and independent projects about safety issues in the food system from a multidisciplinary perspective.

AN S 490. Independent Study.
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.S. Prereq: Permission of the instructor
Open to juniors and seniors in animal science and dairy science showing satisfactory preparation for problems chosen. Individual topic conference and preparation of report. A maximum of 6 credits of An S 490 may be applied toward the total credits required for graduation.
A. Animal Science
B. Dairy Science
C. Meat Science
D. Companion Animal Science
E. Equine Science
G. Poultry Science
H. Honors
I. Entrepreneurship

AN S 493. Workshop in Animal Science.
Cr. 1-3. Repeatable. Prereq: Permission of instructor
Workshop in livestock production. Includes current concepts in breeding, nutrition, reproduction, meats, and technologies that impact the animal industry. Nonmajor graduate credit.

AN S 495. Agricultural Travel Course Preparation.
Cr. R. Repeatable. F.S. Prereq: Permission of instructor
Limited enrollment. Students enrolled in this course will also register for AGRON 495 and intend to register in AGRON 496 and AN S 496 the following term. Topics will include the agricultural industries, climate, crops, culture, history, livestock, marketing, soils, and preparation for travel to locations to be visited. Information normally available 9 months before departure.

AN S 496. Agricultural Travel Course.
Cr. arr. Repeatable. Prereq: Permission of instructor, 30 college credits
Limited enrollment. Students enroll in both AN S 496 and AGRON 496. Tour and study of production methods in major crop and livestock regions of the world. Influence of climate, economics, geography, soils, land- scapes, markets, and other factors on livestock and crop production. Locations and duration of tours will vary. Summer tour will usually visit a northern location and winter tour will usually visit a southern location. Information usually available 9 months before departure. Tour expenses paid by students.
A. International tour
B. Domestic tour

AN S 497. Undergraduate Teaching Experiences in Animal Science.
Cr. 1-2. Repeatable, maximum of 4 times. F.S.SS. Prereq: Permission of instructor
Development of oral and written communication skills of technical concepts in animal science. Emphasis on organizational skills, conducting activities and interpersonal communication skills. Responsibilities in a class under direct supervision of a faculty member. A maximum of 4 credits of An S 497 may be applied toward graduation.
Courses primarily for graduate students, open to qualified undergraduate students

AN S 500. Computer Techniques for Biological Research.
(2-0) Cr. 1. F.
Introduction to UNIX and SAS for solving research problems, including organization of data files, transfer of files between workstations, developing models, and techniques for analysis of designed experiments. Introduction to matrix algebra for solving animal breeding problems using MATLAB and computer simulation.

A. (1st half of semester) UNIX and SAS
B. (2nd half of semester) Problem solving using matrix algebra

(1-0) Cr. 1. F.
Required for Animal Science graduate students. Orientation to departmental and graduate school policies and procedures. Discussion of programs of research and outreach in Animal Science. Issues impacting the animal industry. Offered on a satisfactory-fail basis only.

AN S 503. Seminar in Animal Production.
(1-0) Cr. 1. Repeatable. F.
Prereq: Permission of instructor
Discussion and evaluation of current topics in animal production and management.

AN S 515. Integrated Crop and Livestock Production Systems.
(Cross-listed with A E, AGRON, SUSAG). (3-0) Cr. 3. Alt. F., offered 2011.
Prereq: SUSAG 509
Methods to maintain productivity and minimize the negative ecological effects of agricultural systems by understanding nutrient cycles, managing manure and crop residue, and utilizing multispecies interactions. Crop and livestock production within landscapes and watersheds is also considered. Course includes a significant field component, with student teams analyzing Iowa farms.

AN S 518. Digestive Physiology and Metabolism of Non Ruminants.
(Cross-listed with NUTRS). (3-0) Cr. 3. Alt. S., offered 2013.
Prereq: AN S 419 or NUTRS 501
Digestion and metabolism of nutrients. Nutritional requirements and current research and feeding programs for poultry and swine.

AN S 520. Digestive Physiology and Metabolism of Ruminants.
(Cross-listed with NUTRS). (2-2) Cr. 3. Alt. S., offered 2012.
Prereq: AN S 419 or NUTRS 501
Digestive physiology and nutrient metabolism in ruminant and preruminant animals.

(2-0) Cr. 2. Alt. S., offered 2012.
Prereq: General physiology course
Development of structure and function of the reproductive system. Physiological and endocrine aspects including puberty, gametogenesis, estrous cycle, pregnancy, parturition, interaction of environment, thyroid and adrenal function, and nutrition with these processes.

AN S 536. Perinatology.
(2-0) Cr. 2. S. 
Prereq: One course in physiology; one course in biochemistry
Regulation of metabolism and development in the mammalian fetus and neonate is explored in a comparative manner. Emphasis will be on the dynamic changes in these relationships occurring at birth.

AN S 537. Topics in Farm Animal Environmental Physiology, Behavior, Stress, and Welfare.
(3-0) Cr. 3. Repeatable, maximum of 6 times. F.
Prereq: permission of instructor; M.S. or Ph.D. student
Each semester students focus on different topics related to farm animal environmental physiology, behavior, stress, and welfare. Each topic is separate and distinct, and students may enroll in multiple topics. This is an on-line cooperative course involving instructors at Iowa State University, Texas Tech University, and the University of Illinois. Each topic may be taken only one time.

A. Animal rights and philosophies
B. Brain mechanisms of stress
C. Measuring behavior and welfare
D. Environmental stressors
E. Stress and the immune system
F. Other related topics

AN S 540. Livestock Immunogenetics.
Prereq: AN S 561 or MICRO 575 or V MPM 520
Basic concepts and contemporary topics in genetic regulation of livestock immune response and disease resistance.

AN S 549. Advanced Vertebrate Physiology I.
(Cross-listed with KIN). (4-0) Cr. 4. F.
Prereq: BIOL 335; credit or enrollment in BBMB 404 or 420
Neurophysiology, sensory systems, muscle, neuroendocrinology, endocrinology.

AN S 552. Advanced Vertebrate Physiology II.
(Cross-listed with KIN, NUTRS). (3-0) Cr. 3. S.
Prereq: BIOL 335; credit or enrollment in BBMB 404 or 420
Cardiovascular, renal, respiratory, and digestive physiology.

AN S 556. Current Topics in Genome Analysis.
(3-0) Cr. 3. Alt. S., offered 2012.
Prereq: BBMB 405 or GDCB 510
Introduction to principles and methodology of molecular genetics useful in analyzing and modifying large genomes.

AN S 560. Processed Meats.
(Dual-listed with 460). (2-2) Cr. 3. S.
Prereq: 270
Physical, chemical and biological properties of meat important to processed meat product characteristics. Ingredients, technology and equipment used for cured meats, loaf products and fresh, cooked, dry and semi-dry sausage products.

AN S 561. Population and Quantitative Genetics for Breeding.
(Cross-listed with AGRON). (4-0) Cr. 4. F.
Prereq: STAT 401
Population and quantitative genetics for plant and animal genetics. Study of the genetic basis and analysis of variation in quantitative traits in domestic or experimental populations using phenotypic and molecular marker data, including estimation of heritability and other genetic parameters, linkage analysis and mapping of quantitative trait loci, and the impact of inbreeding, heterosis, and genotype-by-environment interaction.

(2-0) Cr. 2. S.
Prereq: 561, STAT 402
Basic theory for genetic analysis of animal breeding data. Course A (1st half semester) covers linear models, selection index methods, and basic theory for best linear unbiased prediction. Course B (2nd half semester) best linear unbiased prediction, including genetic groups, environmental adjustment, repeated records, multiple trait models, maternal effects models, and theory for maximum likelihood estimation of genetic parameters.

A. Linear Models and Genetic Prediction
B. Advanced Genetic Prediction and Parameter Estimation.
**AN S 565. Professional Practices in Science and Engineering.**  
(Cross-listed with AGRON, BCB, CH E, CPR E, EEB, HORT, M E, MICRO, PL P, V MPM). Cr. art. Prereq: Graduate classification  
Professional, ethical and legal issues facing scientists and engineers in academia. Offered in modular format.  
A. Responsible Conduct of Research. (Cr. 1.0). F.  
B. Working with Industry. (Cr. 0.5).  
C. Communications in Science. (Cr. 0.5). Alt S., offered 2011. Reading and reviewing manuscripts; publishing papers; oral and poster presentations.  
D. Time Management and Mentoring. (Cr. 0.5). Alt F, offered 2012.  
E. The Interview Process. (Cr. 0.5). Alt S., offered 2012. Applying and interviewing for academia, industry and government.  
F. Grant Writing. (Cr. 1.0). Alt F, offered 2011. Writing a winning proposal.  
G. Teaching. (Cr. 0.5). Preparation of a teaching portfolio and course materials; lecturing, technology.  
H. Ethical and legal issues in research.  
I. Establishing productive collaborations with industry.  

**AN S 570. Advanced Meat Science and Applied Muscle Biology.**  
(2-2) Cr. 3. S. Prereq: AN S 460  
Ante and postmortem factors impacting composition, structure, and chemistry of red meat and poultry muscle/meat, the conversion of muscle to meat, and the sensory and nutritional attributes of fresh meats. Oral research reports and a research proposal.  

**AN S 571. Advanced Meat Processing Principles and Technology.**  
(2-2) Cr. 3. Alt. F, offered 2012. Prereq: AN S 460 or 570  
Physical/chemical relationships during processing. Effects of modern technology, non-meat additives and preservation technologies on quality and safety of processed meat. Laboratory demonstration of principles and technology.  

**AN S 590. Special Topics.**  
Cr. 1-3. Repeatable. F.S.SS. Prereq: Permission of instructor  
Special topics in the animal sciences, offered on demand and may be conducted by guest professors.  
A. Animal Breeding  
B. Animal Nutrition  
C. Meat Animal Production  
D. Dairy Production  
E. Meat Science  
F. Physiology of Reproduction  
G. Muscle Biology  
H. Poultry Nutrition  
I. Poultry Products  
J. Experimental Surgery  
K. Professional Topics  
L. Teaching  
M. Molecular Biology  
N. Ethology  

**AN S 599. Creative Component.**  
Cr. 1-8. F.S.SS. Prereq: Nonthesis M.S  
A written report based on research, library readings, or topics related to the student’s area of specialization and approved by the student’s advisory committee.  
A. Animal Breeding and Genetics  
B. Animal Nutrition  
C. Animal Physiology  
D. Animal Science  
E. Meat Science  

**Courses for graduate students**  

**AN S 603. Seminar in Animal Nutrition.**  
(1-0) Cr. 1. Repeatable. F.S. Prereq: Permission of instructor  
Discussion of current literature; preparation and submission of abstracts.  

**AN S 619. Advanced Nutrition and Metabolism - Protein.**  
(Cross-listed with NUTRIS). (2-0) Cr. 2. F. Prereq: BBMB 405  
Digestion, absorption, and intermediary metabolism of amino acids and protein. Regulation of protein synthesis and degradation. Integration of cellular biochemistry and physiology of mammalian protein metabolism.  

**AN S 620. Advanced Nutrition and Metabolism - Energy.**  
(2-0) Cr. 2. Alt. S., offered 2012. Prereq: BBMB 405  
Energy constituents of feedstuffs and energy needs of animals as related to cellular biochemistry and physiology. Interpretations of classical and current research.  

**AN S 633. Seminar in Animal Reproduction.**  
(1-0) Cr. 1. Repeatable. F. Prereq: Permission of instructor  
Discussion of current literature and preparation of reports on selected topics concerning physiology of reproduction.  

**AN S 652. Animal Breeding Strategies.**  
(2-0) Cr. 2. Prereq: AN S 561  
Basic concepts and methods for design and evaluation of genetic improvement programs for livestock. Topic A. (1st half semester) Prediction of response to selection, selection index theory, multiple trait selection, inbreeding, crossbreeding, and marker-assisted selection. Topic B. (2nd half semester) Advanced concepts in design and evaluation of animal breeding programs, including modeling and optimization, derivation of economic values, gene-flow, and predicting rates of inbreeding. Each topic may be taken only one time for academic credit.  
A. Breeding Goals and Response to Selection(Alt. S., offered 2012)  

**AN S 653. Applied Animal Breeding Strategies.**  
(2-0) Cr. 2. F. Prereq: 561 recommended  
Industrial applications of breeding systems, selection methods, and new genetic technologies. One or more field trips to an industry breeding company.  
A. Swine and Poultry (Alt. F, offered 2010)  
B. Beef and Dairy (Alt. F, offered 2011)  

**AN S 655. Advanced Computational Methods in Animal Breeding and Genetics.**  
Computational methods and strategies for analysis of large data sets with animal breeding data for use in research and industry applications. Course A (1st half semester) Strategies for handling large sets and for prediction using best linear unbiased prediction using a formal language and utility programs. Course B (2nd half semester) Strategies for estimation of genetic parameters and for use of non-linear models for genetic analysis of categorical and survival type data.  
A. Computational Strategies for Predicting Breeding Values  
B. Computational Strategies for Genetic Parameter Estimation  

**AN S 656. Statistical Methods for Mapping Quantitative Trait Loci.**  
(2-0) Cr. 2. Alt. S., offered 2012. Prereq: 562, STAT 447  
Statistical methods for mapping quantitative trait loci in out-bred populations. Methods based on modeling covariances between relatives. Likelihood based methods using half-sib and full-sib families and extended pedigrees. Bayesian methods applied.  

**AN S 658. Seminar in Animal Breeding and Genetics.**  
(1-0) Cr. 1. Repeatable. F.S.  
Presentation of current research related to animal breeding and genetics.  

**AN S 670. Molecular Biology of Muscle.**  
(3-0) Cr. 3. Alt. F, offered 2012. Prereq: BBMB 405, 420, or 502  
Ultrastructure of muscle; chemistry, structure, function, and molecular biology of muscle proteins. Molecular aspects of muscle contraction, development and turnover. Cytoskeletal proteins and dynamics.
**AN S 684. Seminar in Meat Science.**
(1-0) Cr. 1. Repeatable. S. *Prereq: Permission of instructor*
Discussion and evaluation of current topics in research publications in meat science.

**AN S 685. Seminar in Muscle Biology.**
(1-0) Cr. 1. Repeatable. S. *Prereq: Permission of instructor*
Reports and discussion of recent literature and current investigations.

**AN S 695. Seminar in Animal Science.**
(1-0) Cr. 1. Repeatable. S.
Reports and discussion of current issues and research in animal science.
One credit is required for all M.S. degree candidates with graduate majors in the Department of Animal Science, and two credits are required for all Ph.D. candidates with graduate majors in the Department of Animal Science. Offered on a satisfactory-fail basis only.

**AN S 699. Research.**
Cr. arr. Repeatable.

A. Animal Breeding
B. Animal Nutrition
C. Meat Animal Production
D. Dairy Production
E. Meat Science
F. Physiology of Reproduction
G. Muscle Biology
H. Poultry Nutrition
I. Poultry Products
J. Animal Ethology
(Interdepartmental Undergraduate Program)

Iowa State University is a major center for research and education in the biological sciences. With over 200 faculty in the life sciences, students have the opportunity to learn from some of the nation’s leaders in biological research and teaching and to participate in innovative, meaningful research projects that explore frontiers of biology. Few other universities have such a wealth of faculty expertise available to undergraduate students, making Iowa State’s Biology Program the logical choice for those who want to participate in a thriving academic community.

The faculties of the Department of Ecology, Evolution and Organismal Biology and the Department of Genetics, Development and Cell Biology jointly offer the undergraduate biology major. This high quality academic program has the flexibility to accommodate a range of career goals while taking advantage of the university’s strengths in science and technology. A bachelor’s degree in biology provides excellent preparation for graduate study in biological disciplines ranging from the molecular to the ecological levels, and for entrance into various professional schools, such as human medicine, physical therapy, or veterinary medicine. The major is well suited for those who plan to teach biology, who wish to enter government or industrial employment in health or environmental professions, or who prefer educational breadth as an end in itself. By working with our professional and faculty advisers, it is possible to design a unique program of study that will meet student needs and objectives.

Students with special interests and aptitudes should consider combining biology with a minor or a second major in another subject, such as chemistry, environmental studies, journalism, mathematics, music, statistics, or many other subjects offered by the university.

Courses offered at other locations

In addition to biological science courses taught on campus, students may take courses at various remote locations and arrange to have the credits count toward the advanced courses required in the biology major. Courses in field and aquatic biology are offered at the Iowa Lakeside Laboratory. Courses in marine biology can be taken at the Gulf Coast Research Laboratory in Mississippi. Iowa State University is a member of the Organization for Tropical Studies, and students may take courses at the organization’s field Station in Costa Rica. Courses taught at field Stations associated with other universities throughout the country may also be applied to the degree. Attending a summer field Station adds an important component to an undergraduate program of study.

Courses Offered at Iowa Lakeside Laboratory at Milford, Iowa

Iowa Lakeside Lab is an Iowa Regents facility located at Lake Okoboji in northwest Iowa where various summer courses in field and aquatic biology are offered. Any of the following courses taken at the lab are directly applicable to the degree program in Biology. See the Iowa Lakeside Laboratory entry elsewhere in the catalog for a full description of the courses.

Courses offered at Gulf Coast Research Laboratory

The Gulf Coast Research Laboratory is affiliated with the University of Southern Mississippi. Iowa State students may register for marine biology courses and transfer credit to their degree programs under the number BIOL 480 Studies in Marine Biology. Written permission of the Biology Program Director is required for this arrangement. Courses that are available each summer may be viewed at www.coms.usm.edu.

Courses offered at Summer Biological Field Stations

Courses taken at summer field Stations may be transferred to Iowa State University as credit in BIOL 481 Summer Field Studies. Such Stations are found throughout the country and often offer courses that emphasize the adaptation of plants and animals to unique environments. See www.biology.iastate.edu for links to field Stations in different biomes, e.g. marine/coastal, Great Lakes, taiga, deciduous forests, deserts, Rocky Mts.

Courses offered by the Organization for Tropical Studies

Iowa State students may register for courses in tropical biology taught in Costa Rica by the Organization for Tropical Studies. Credit is transferred to Iowa State as BIOL 482 Tropical Biology. For further information check www.otrsduke.edu or inquire in the Biology Program Office.

Undergraduate research. Students who have interest in biological research are encouraged to become involved in the research projects of faculty members on campus. Those doing so may receive credit for the experience in BIOL 490 Independent Study. Internship experiences are often available at universities and at industrial or government laboratories. Students participating in such projects may receive internship credit in BIOL 494 Biology Internship. Making the effort to find a suitable research mentor and engaging in research work can be one of the most valuable experiences of an undergraduate education.

International experience. Because major discoveries in science often result from global efforts, biology majors are encouraged to include an international or study abroad component in their degree programs. This can be done by participating in international field trips originating from the ISU campus in BIOL 394 International Field Trips in Biology or similar courses in other departments. Many students choose to study abroad, attending a university in another country for up to a year as an exchange student. Minors in related disciplines or a foreign language can add an international emphasis to a degree in biology.

Supporting course requirements. Understanding the modern biological sciences requires an understanding of the physical and Mathematical sciences. Consequently, a minimum number of credits in general chemistry, organic chemistry, biochemistry, and physics are required. See the Biology Program Web Site for specific supporting science requirements.

The Math requirement is competency based. After demonstrating competency in algebra and trigonometry, biology majors must take: two semesters of calculus; or two semesters of Statistics; or one semester of calculus and one semester of Statistics chosen from a list of approved courses available on the Biology Program Web Site and in the Biology Program Office.

Students in the College of Liberal Arts and Sciences, must fulfill the foreign language and general education requirements listed elsewhere in this catalog for that college. Students in the College of Agriculture and Life Sciences must meet the general education requirements for that college as listed elsewhere in the catalog.

Given the important role of writing in the modern sciences, biology majors must demonstrate communication competency by earning a minimum of C in both ENGL 150 Critical Thinking and Communication and ENGL 250 Written, Oral, Visual, and Electronic Composition or equivalent composition courses and in one advanced writing course numbered ENGL 302 Business Communication through ENGL 316 Creative Writing–Playwriting, or JL MC 347 Science Communication.

Customizing a degree

The advantage of choosing a biology major is the flexibility it allows in customizing a program of study to individual goals. That said, the faculty recognizes that many students studying biology have common goals. Consequently, the faculty has developed specific recommendations for students interested in pursuing the following areas of study:

Teacher Licensure. Biology majors seeking licensure to teach biology in secondary schools must meet requirements of the Teacher Education Program as well as those of the Biology Program. In addition they must apply formally for admission to the teacher education program. See the section on Teacher Education for a list of licensure areas, degree requirements, and other information about this program.

Premedical and Prehealth Professions Studies. Biology majors who will go on to medical or health professional schools are urged to determine the entrance requirements for the institutions where they might study. A list of courses recommended for those who wish to pursue a pre-med curriculum is available in the Biology Program office.
Preventative Studies. Many students whose goal is to attend veterinary school choose Biology as their major. The requirements for entrance to the Iowa State Veterinary College are listed elsewhere in this bulletin and should be consulted as programs of study are planned.

Preparation for Graduate Studies. Students who are considering graduate school to further their education in a biological sciences should identify a faculty member who has similar interests. Faculty can mentor students as undergraduates providing a smooth transition to graduate school.

Minor
A minor in Biology is offered by the Biology Program. The minor requires 15 credits in Biology, and includes the completion of the specific courses listed below:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 211</td>
<td>Principles of Biology I</td>
<td>3</td>
</tr>
<tr>
<td>BIOL 211L</td>
<td>Principles of Biology Laboratory I</td>
<td>1</td>
</tr>
<tr>
<td>BIOL 212</td>
<td>Principles of Biology II</td>
<td>3</td>
</tr>
<tr>
<td>BIOL 212L</td>
<td>Principles of Biology Laboratory II</td>
<td>1</td>
</tr>
</tbody>
</table>

And 7 credits in biology courses numbered 300 or above. Nine (9) credits of the required courses must only apply to the minor. For more information, see the Biology Program Web Site, or contact the Biology and Genetics Student Services Office in 103 Bessey Hall.

Undergraduate Study
Biology majors, start their studies in the biological sciences by taking a unified biology core curriculum consisting of six integrated courses, four with labs. The first year provides a broad introduction to the nature of life.

</tbody>
</table>

During the first year, students also take BIOL 110 Introduction to Biology and BIOL 111 Opportunities in Biology, which are half semester courses designed to introduce the student to the discipline of biology and opportunities for careers in biology. The second year explores concepts in ecology in BIOL 312 Ecology and the principles of genetics in BIOL 313 Principles of Genetics and BIOL 313L Genetics Laboratory. The third year includes courses in cell and molecular biology (BIOL 314 Principles of Molecular Cell Biology) and evolutionary biology (BIOL 315 Biological Evolution). Biology majors must take an additional 21 credits of biological science at the 300 level or above from an approved list of courses. Of these, at least 9 credits must be taken as biology courses, and a minimum of two laboratory or field courses must also be included. Students may earn the B.S. degree in Biology from either the College of Liberal Arts and Sciences or from the College of Agriculture and Life Sciences. Contact the Biology Program Office for details regarding differences in general education and course requirements which are specific to these colleges.

Biology majors should carefully consider their selection of upper-level courses to allow them to emphasize one or more of the sub-disciplines of Biology relevant to their post-baccalaureate objectives. The Biology Program has identified areas of special interest for many disciplines within Biology, with supporting 300-, 400-, and 500-level courses, enabling majors to gain substantial experience in these areas prior to graduation. Faculty advisers with experience in these subject areas work with students to provide advice about preparing for a range of biology-related professions. Consult the Biology Program advising staff for more information.

Most biology courses numbered 300 or above can be used to satisfy the additional credit requirement. Some courses taught in other departments can also be applied to the biology major; advanced students should consider including 500 level courses in their programs. Check the Biology Program’s web site for a complete listing of acceptable upper-level life science courses.

Biology majors must demonstrate competency in their understanding of the biological sciences. Thus, grades of C- or better in all biological science courses applied to the major are required. Furthermore, in order to graduate, a student must have a cumulative average in the major of at least 2.00.

Graduate Study
Biology is an undergraduate major only. Persons interested in graduate study in the biological sciences should apply directly to one of the life science graduate programs at Iowa State University. Interdepartmental graduate offerings in Bioinformatics and Computational Biology; Ecology and Evolutionary Biology; Genetics; Molecular, Cellular and Developmental Biology; Neuroscience; Plant Physiology; Toxicology; Immunobiology; and Environmental Science are also available. (See Index.)

A non-thesis master’s degree in Interdisciplinary Graduate Studies (biological sciences) has been established particularly for those who wish to have a more diversified program of advanced study than that generally permitted by specific departments and programs.

Curriculum in Biology
College of Agriculture and Life Sciences

Administered by the Departments of Ecology, Evolution, and Organismal Biology; and Genetics, Development and Cell Biology.

Total Degree Requirement: 120 cr.
Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.
U.S. Diversity: 3 cr.
Communications Proficiency (with a C or better)

Biology

All graded courses minimum C; 2.00 GPA average required.

BIOL 110 Introduction to Biology 1
BIOL 111 Opportunities in Biology 0.5
BIOL 211 Principles of Biology I 3
BIOL 211L Principles of Biology Laboratory I 1
BIOL 212 Principles of Biology II 3
BIOL 212L Principles of Biology Laboratory II 1
BIOL 312 Ecology 4
BIOL 313 Principles of Genetics 3
BIOL 313L Genetics Laboratory 1
BIOL 314 Principles of Molecular Cell Biology 3
BIOL 315 Biological Evolution 3
Total Credits 23.5

Advanced Biology: 21 cr.
All graded courses minimum C; 2.00 GPA average required.

Two advanced BIOL courses with lab or field components (from approved list)
Biography advanced courses (from approved list) 9
Additional approved Biology advanced courses (from approved list) 21
Total Credits 30

Courses primarily for undergraduate students

BIOL 101. Introductory Biology.
(3-0) Cr. 3. F.S.S.S.
Life considered at cellular, organism, and population levels. Function and diversity of the living world. Presentation of basic biological principles as well as topics and issues of current interest. Intended primarily for nonmajors; available to biology majors for elective credit.

BIOL 110. Introduction to Biology.
Cr. 1. F.
Orientation to the scope of the biological sciences, and discussion of professional opportunities. Required of first year biology majors. Offered on a satisfactory-fail basis only.

BIOL 111. Opportunities in Biology.
(1-0) Cr. 0.5. S.
Introduction to biological science disciplines and professional opportunities through faculty presentations which examine a variety of current research topics. Offered on a satisfactory-fail basis only.

BIOL 155. Human Biology.
(3-0) Cr. 3. F.S.
A survey course of human biology, including principal structures and functions of the body systems and the diseases and disorders associated with them. Designed to meet general education requirements in natural science. Not recommended for those seeking a career in the allied health professions or for students majoring in life science.

BIOL 173. Environmental Biology.
(Cross-listed with ENV S). (3-0) Cr. 3. F.S.
An introduction to the structure and function of natural systems at scales from the individual to the biosphere and the complex interactions between humans and their environment. Discussions of human population growth, biodiversity, sustainability, resource use, and pollution. Non-majors only.

BIOL 201. Introduction to Environmental Issues.
(Cross-listed with ENSCI, ENV S). (2-0) Cr. 2. F.S.
Discussion of current and emerging environmental issues such as human population growth, energy use, loss of biodiversity, water resources, and climate change.

BIOL 204. Biodiversity.
(Cross-listed with ENV S). (4-0) Cr. 2. S. Prereq: One course in life sciences

BIOL 211. Principles of Biology I.
(3-0) Cr. 3. F.S. Prereq: High school biology and chemistry or credit or enrollment in CHEM 163 or 177
Introduction to the nature of life, including the cellular basis of life; the nature of heredity; evolution; diversity of microbial, plant, and animal life; and principles of ecology. Intended for life science majors. First of core series of required courses for the biology major.

BIOL 211L. Principles of Biology Laboratory I.
(0-3) Cr. 1. F.S. Prereq: Credit or enrollment in 211
Laboratory to accompany 211.

BIOL 212. Principles of Biology II.
(3-0) Cr. 3. F.S. Prereq: 211
Introduction to the nature of life, including the cellular basis of life; energy relationships; the nature of heredity; evolution; form and function of microbial, plant, and animal life.

BIOL 212L. Principles of Biology Laboratory II.
(0-3) Cr. 1. F.S. Prereq: credit or enrollment in 212
Laboratory to accompany 212.

BIOL 255. Fundamentals of Human Anatomy.
(3-0) Cr. 3. F. Prereq: High School Biology and Chemistry, or BIOL 101
An introduction to human anatomy, beginning with cells and tissues, surveying all body systems, relating form to function. Systems covered include: integumentary, bones and joints, muscles, nervous, sensory, endocrine, circulatory, lymphatic, respiratory, digestive, urinary, and reproductive. Pre-Medical students should consider BIOL 351 for their anatomy background. Not intended for major credit in biology.

L. Fundamentals of Human Anatomy Laboratory
Biol 255L Fundamentals of Human Anatomy Laboratory.  
(0-3) Cr. 1. F. Prereq: Credit or enrollment in 255  
Investigation of human anatomy using models and dissections of  
preserved organs and model mammals. Pre-Medical students should  
consider 351 for their anatomy background. Not intended for major credit in  
bioogy.

Biol 256 Fundamentals of Human Physiology.  
(3-0) Cr. 3. S. Prereq: High School Biology and Chemistry, or BIOL 101, or 255 (recommended)  
An introduction to human physiology, studying the function of all body  
systems. Systems covered include: integumentary, bones and joints,  
muscles, nervous, sensory, endocrine, circulatory, lymphatic and  
immune, respiratory, digestive, urinary, and reproductive. Pre-Medical  
students should consider 353 for their physiology background. Not  
intended for major credit in biology.

Biol 256L Fundamentals of Human Physiology Laboratory.  
(0-3) Cr. 1. S. Prereq: Credit or enrollment in 256  
Student-conducted experiments investigating concepts of human phys-  
iology with computer data acquisition and analysis. Interpretation of  
experimental results and preparation of lab reports. Pre-Medical students  
should consider 353 for their anatomy and physiology background. Not  
intended for major credit in biology.

Biol 258 Human Reproduction.  
(Cross-listed with W S). (3-0) Cr. 3. F. Prereq: BIOL 101, or 155, or 211  
Anatomy and physiology of human reproductive systems, including  
fertility, pregnancy, and delivery.

Biol 306 Metabolic Physiology of Mammals.  
Cr. 3. Prereq: 211, 212  
Introduction to physiology of metabolic function in mammals and other  
animals. Metabolic processes and their interactions with various subsys-  
tems, approached form an organismal perspective. Integration of cellular,  
gastrointestinal, cardiovascular, respiratory, and renal processes, rele-  
vant to their control and integration at the nervous and endocrine system  
levels. Functional aspects of organi physiological; energy and water  
balances, physiology of rest exercise, and environmental stress. Students  
cannot receive credit for both Biol 306 and Biol 335.

(Cross-listed with W S). (3-0) Cr. 3. F. Prereq: a 200 level course in  
science, engineering or women’s studies; ENGL 250  
The interrelationships of women and science and engineering examined  
from historical, sociological, philosophical, and biological perspectives.  
Factors contributing to underrepresentation; feminist critiques of science;  
examination of successful strategies.

Meets U.S. Diversity Requirement

Biol 312 Ecology.  
(Cross-listed with A ECL, ENSCI). (3-3) Cr. 4. F.S.S. Prereq: 211L and 212L  
Fundamental concepts and principles of ecology dealing with organisms,  
populations, communities and ecosystems. Laboratory and field exer-  
cises examine ecological principles and methods as well as illustrate  
habits.

Biol 313 Principles of Genetics.  
(Cross-listed with GEN). (3-0) Cr. 3. F.S.SS. Prereq: 211, 211L, 212, and 212L  
Introduction to the principles of transmission and molecular genetics of  
plants, animals, and bacteria. Recombination, structure and replication of  
DNA, gene expression, cloning, quantitative and population genetics.  
Students may receive graduation credit for no more than one of the  
following: Gen 260, Gen 313 and 313L, Gen 320, Biol 313 and 313L, and  
Agron 320.

L. Genetics Laboratory

Biol 313L Genetics Laboratory.  
(Cross-listed with GEN). (0-3) Cr. 1. F.S. Prereq: Credit or enrollment in 313  
Laboratory to accompany 313. Students may receive graduation credit for  
no more than one of the following: Biol 313 and 313L, Gen 260, Gen 313,  
Gen 320, and Agron 320.

Biol 314 Principles of Molecular Cell Biology.  
(3-0) Cr. 3. F.S. Prereq: BIOL 313  
Integration of elementary principles of metabolism, bioenergetics, cell  
structure and function to develop a molecular view of how the cell works.

Biol 315 Biological Evolution.  
(3-0) Cr. 3. F.S. Prereq: 313  
The mechanisms of evolution. Topics in microevolution: population  
genetics, natural selection, genetic variation, and adaptation. Macroevolu-  
: speciation, extinction, phylogeny, and major evolutionary patterns.

Biol 328 Cell Physiology of Human Diseases.  
Cr. 3. Prereq: 212  
Survey of macromolecular and ultrastructural organization of animal cell  
and membrane structures, including recent molecular discoveries in  
areas of genomics and proteomics involved with cell growth and cell  
interactions. Emphasis on selected topics of cellular functions with  
known human disease states.

Biol 330 Principles of Plant Physiology.  
(3-0) Cr. 3. Prereq: BIOL 313 or GEN 320; BIOL 314 or BBMB 301;  
CHEM 231 or 332; PHYS 106 or 111  
An overview of classical and current concepts, principles and approaches  
regarding the basic mechanisms of plant function underlying growth,  
development and survival of plants. Topics covered include environ-  
mental and developmental signals, plant hormone action, signal transduc-  
tion, mineral nutrition, water relations, metabolism and photosynthesis.  
Nonmajor graduate credit.

L. Principles of Plant Physiology Laboratory

Biol 330L Principles of Plant Physiology Laboratory.  
(0-3) Cr. 1. Prereq: Credit or enrollment in 330  
Laboratory to accompany BIOL 330. Experiments and explorations illus-  
trating fundamental principles of plant physiology. Nonmajor graduate  
credit.

Biol 335 Principles of Human and Other Animal Physiology.  
(3-3) Cr. 4. F.S. Prereq: BIOL 314  
Introduction to systemic functions with emphasis on mammals.  
Nonmajor graduate credit.

Biol 336 Ecological and Evolutionary Animal Physiology.  
Cr. 3. Prereq: 211, 212  
Study of mechanisms by which animals perform life-sustaining functions;  
the evolution and adaptive significance of physiology traits, the diversity  
of physiological mechanisms, and how physiology and ecology interact.

Biol 351 Comparative Chordate Anatomy.  
(3-4) Cr. 5. S. Prereq: 212, junior classification  
The evolution of chordates as reflected in the anatomy of extinct and  
living forms. Lecture topics include the history and diversity of chordates;  
comparisons of anatomic structures among major groups, the adaptive  
significance of anatomic structures. Laboratory involves dissection of  
representative species.

Biol 352 Vertebrate Histology.  
(3-3) Cr. 4. S. Prereq: 212  
Microscopic structure of vertebrate tissues and organs, with an introduc-  
tion to histological techniques.

Biol 353 Introductory Parasitology.  
(Cross-listed with MICRO, V PTH). (3-3) Cr. 4. F. Prereq: BIOL 212  
Biology and host-parasite relationships of major groups of animal para-  
sites, and techniques of diagnosing and studying parasites.
(3-0) Cr. 3. F. Prereq: 212  
Ethological and sociobiological approaches to animal behavior. Genetic and developmental aspects of behavior, biological rhythms, orientation (including navigation, migration), communication, and social behavior (mating, aggression, parental care).  
L. Laboratory in Animal Behavior

BIOL 354L. Laboratory in Animal Behavior.  
(0-3) Cr. 1. F. Prereq: Credit or enrollment in BIOL 354  
Laboratory techniques for observation, description and analysis of animal activities; independent projects.

BIOL 355. Plants and People.  
(3-0) Cr. 3. S. Prereq: Credit in 211 and 211L  
Uses of plants and fungi by humans and the importance of plants in the past, present and future. Discussion of fruits, vegetables, grains, herbs, spices, beverages, oils, fibers, wood, medicines, and drugs, in the context of their agricultural, cultural, and economic roles in modern societies. Emphasis on origins and worldwide diversity of culturally important plants, their characteristics, and uses.

BIOL 356. Dendrology.  
(Cross-listed with FOR). (2-4) Cr. 4. F. Prereq: BIOL 211  
Identification and ecology of North American woody plant species. Importance of woody plants in timber production and wildlife habitat. Natural disturbances, human impacts, management and restoration concerns for major North American forest regions will be addressed. Nonmajor graduate credit.

BIOL 364. Invertebrate Biology.  
Cr. 3-4. F. Prereq: BIOL 212  
Emphasis on diversity, development, physiology and behavior of invertebrate organisms— the “spineless wonders” of the world. Laboratory involves hands-on study and investigation of living invertebrates.

BIOL 365. Vertebrate Biology.  
(Cross-listed with A ECL). (3-2) Cr. 4. F. Prereq: 212, 212L  
Evolution, biology, and classification of fish, amphibians, reptiles, birds, and mammals. Emphasis on a comparative analysis of the structure and function of organ systems. Laboratory exercises concentrate on morphology and identification of orders of vertebrates.

(2-4) Cr. 4. S. Prereq: 211  
Introduction to plant phylogenetic systematics, plant classification, survey of flowering plant families, identification and field study of local plants.

(Cross-listed with A ECL). (2-2) Cr. 3. F. Prereq: 312; STAT 101 or 104  
Quantitative techniques used in management of natural resources with emphasis on inventory and manipulation of habitat and animal populations. Nonmajor graduate credit.

BIOL 381. Environmental Systems I: Introduction to Environmental Systems.  
(Cross-listed with ENSCI, ENV S, MICRO). (2-2) Cr. 3. F. Prereq: 12 credits of natural science including biology and chemistry  
Introduction to the structure and function of natural environmental systems. Systems approach to the analysis of material and energy flows in natural environmental systems and the primary environmental factors controlling these systems. Nonmajor graduate credit.

BIOL 382. Environmental Systems II: Analysis of Environmental Systems.  
(Cross-listed with ENSCI). (2-2) Cr. 3. S. Prereq: ENSCI 381  
Continuation of ENSCI 381. Systems approach to the analysis of material and energy flows in natural environmental systems and the primary environmental factors controlling these systems. Nonmajor graduate credit.

BIOL 393. North American Field Trips in Biology.  
Cr. 1-4. Repeatable. Prereq: Two courses in the biological sciences and by approval of application  
Extended field trips, usually during break periods, to North American locations of interest to biologists. Inquire in the Biology Program Office, 103 Bessey Hall, for trip schedule.  
A. Pre-trip Seminar. Cr. 1. Discussion of relevant biological and cultural topics during semester preceding trip.  
B. Field trip. Cr. 1 to 3. Trip to North American location under supervision of faculty member. Report required.

BIOL 394. International Field Trips in Biology.  
Cr. 1-4. Repeatable. Prereq: Two courses in the biological sciences and by approval of application  
Extended field trips, usually during break periods, to international locations of interest to biologists. Inquire in the Biology Program Office, 103 Bessey Hall, for trip schedule.  
A. Pre-trip Seminar. Cr. 1. Discussion of relevant biological and cultural topics during semester preceding trip.  
B. Field trip. Cr. 1 to 3. Trip to international location under supervision of faculty member. Report required. Offered on a satisfactory-fail grading basis only.

BIOL 423. Developmental Biology.  
(3-0) Cr. 3. S. Prereq: BIOL 313  
Principles of embryogenesis and animal development. Establishment of body axes, organ and limb development, and specification of cell fates. Emphasis on cell signaling and the control of gene expression within the context of a developing organism. Medically relevant subjects will be discussed, including stem cells, cancer biology, fertilization, and cloning.

BIOL 423L. Developmental Biology Laboratory.  
(0-3) Cr. 1. S. Prereq: Credit or enrollment in 423  
Experiments and explorations illustrating fundamental principles of multicellular development.

BIOL 428. Topics in Cell Biology.  
(3-0) Cr. 3. S. Prereq: 314  
Selected topics on biological organization and function at the cellular level. Emphasis on biomembranes. Nonmajor graduate credit.

BIOL 434. Endocrinology.  
(3-0) Cr. 3. S. Prereq: 211, 212  
Dual-listed with EEOB 534. Chemical integration of vertebrate organisms. The structure, development, and evolution of the endocrine glands and the function and structure of their hormones. Nonmajor graduate credit.

BIOL 436. Neurobiology.  
(3-0) Cr. 3. F. Prereq: BIOL 212  
Basic principles of brain function and development. Signaling of nerve cells, synaptic transmission, structure/function of ion channels and receptors, memory and synaptic plasticity, movement and central control, sensation and sensory processing, construction of neural circuits, early brain development, complex brain functions in health and disease. Nonmajor graduate credit.

BIOL 444. Introduction to Bioinformatics.  
(Cross-listed with BCB, BCBIO, COM S, CPR E, GEN). (4-0) Cr. 4. F. Prereq: MATH 165 or STAT 401 or equivalent  
Broad overview of bioinformatics with a significant problem-solving component, including hands-on practice using computational tools to solve a variety of biological problems. Topics include: database searching, sequence alignment, gene prediction, RNA and protein structure prediction, construction of phylogenetic trees, comparative and functional genomics, systems biology. Nonmajor graduate credit.
(3-3) Cr. 4. F. Prereq: BIOL 212L; 366 recommended  
Characteristics of cell and tissue types in vascular plants. Anatomy of developing and mature stems, roots, and leaves, including secondary (woody) growth. Introduction to the special anatomy of flowers and seeds. Nonmajor graduate credit.

Biol 455. Bryophyte and Lichen Biodiversity.  
(Dual-listed with 565) Cr. 3. Prereq: BIOL 211, BIOL 211L  
(Dual-listed with EEOB) Introduction to the biology and ecology of mosses, liverworts, and lichens. Emphasis on identification and diversity of local representatives of these three groups of organisms. Required field trips and service-learning. Nonmajor graduate credit.

(Cross-listed with MICRO) (2-3) Cr. 3. F. Prereq: 10 credits in biological sciences  
Morphology, diversity and ecology of fungi; their relation to agriculture and industry and human health. Nonmajor graduate credit.

(Cross-listed with A ECL) (2-3) Cr. 3. F. Prereq: 351 or 365  
Dual-listed with EEOB 557. Biology, ecology, and evolution of amphibians (salamanders, frogs, caecilians) and reptiles (lizards, snakes, tuataras, turtles, crocodilians). Emphasis on structure, physiological adaptation to different environments, behavior, reproduction, roles of amphibians and reptiles in ecosystems, and conservation. Laboratory focus on survey methods, identification, relationships, distribution, habits, and habitats of amphibians and reptiles.

Biol 458. Ornithology.  
(Cross-listed with A ECL) (2-3) Cr. 3. S. Prereq: A ECL 365 or BIOL 351  
Dual-listed with EEOB 558. Biology, ecology, evolution, and taxonomy of birds. Emphasis on structure, physiology, behavior, communication, navigation, reproduction, and conservation. Laboratory exercises complement lecture topics, emphasize identification and distribution of Midwest birds, and include field trips.

(Cross-listed with A ECL) (2-3) Cr. 3. S. Prereq: A ECL 351 or A ECL 365  
Dual-listed with EEOB 559. Biology, ecology, and evolution of mammals. Emphasis on structure, physiological adaptation to different environments, behavior, reproduction, roles of mammals in ecosystems, and conservation. Laboratory focus on identification, distribution, habits, and habitats of mammals.

(Cross-listed with GEN) (3-0) Cr. 3. S. Prereq: BIOL 315  
The genetic basis of evolutionary processes in higher organisms. The role of genetic variation in adaptation, natural selection, adaptive processes, and the influence of random processes on evolutionary change. Nonmajor graduate credit.

(3-2) Cr. 4. Alt. S., offered 2012. Prereq: STAT 401  
Dual-listed with EEOB 565. A comprehensive overview of the theory and methods for the analysis of biological shape with emphasis on data acquisition, standardization, statistical analysis, and visualization of results. Methods for both landmark and outline data will be discussed. Nonmajor graduate credit.

Cr. 3. Prereq: BIOL 312  
Examination of conservation issues from a population and community perspective. The role of genetics, demography, and environment in determining population viability, habitat fragmentation, reserve design, biodiversity assessment, and restoration ecology.

(2-2) Cr. 3. S. Prereq: BIOL 312  
The effect of interspecific interactions on the structure and dynamics of natural and managed communities; including concepts of guild structure and trophic web dynamics and their importance to the productivity, diversity, stability, and sustainability of communities. The implications of interspecific interactions in the management of wild species will be emphasized with illustrative case histories of interactions between plants, invertebrates, and vertebrates. Nonmajor graduate credit.

(3-0) Cr. 3. S. Prereq: BIOL 312  
Principles of plant population and community ecology. Nonmajor graduate credit.

(3-0) Cr. 3. Alt. S., offered 2013. Prereq: BIOL 312  
Dual-listed with EEOB 576. The nature of adaptations to physical and biotic environments. Biophysical, biomechanical, and physiological bases of the structure, form, growth, distribution, and abundance of organisms.

Cr. 1-8. Repeatable. Courses taken at Gulf Coast Research Laboratory and other marine biological stations are transferred to Iowa State University under this number.

Biol 481. Summer Field Studies.  
Cr. 1-8. Repeatable. Courses taken at summer biological field stations are transferred to Iowa State University under this number. See www.biology.iastate.edu for links to field stations located in different biomes: coastal, Great Lakes, taiga, deciduous forests, deserts, Rocky Mountains.

Biol 482. Tropical Biology.  
Cr. 1-4. Repeatable, maximum of 8 credits. Prereq: One year of college biology; knowledge of Spanish desirable but not required. Students registering for courses taught by the Organization for Tropical Studies will receive credit for this ISU course when requesting a transfer of credits.

Biol 484. Ecosystem Ecology.  
(Cross-listed with ENSCI) (3-0) Cr. 3. S. Prereq: Combined 12 credits in biology and chemistry  
Introduction of the study of ecosystems and the factors that influence their properties and dynamics. Conceptual foundations for ecosystem studies. Quantitative analyses of accumulations, transformations, and fluxes of nutrients, water, and energy within and among ecosystems.

(Cross-listed with ENSCI, A ECL) (3-0) Cr. 3. F. Prereq: BIOL 312 or ENSCI 381 or ENSCI 402 or NREM 301  
Dual-listed with EEOB 586. Structure and function of aquatic ecosystems with application to fishery and pollution problems. Emphasis on lacustrine, riverine, and wetland ecology. Nonmajor graduate credit.  
L. Aquatic Ecology Laboratory

Biol 486L. Aquatic Ecology Laboratory.  
(Cross-listed with ENSCI, A ECL) (0-3) Cr. 1. F. Prereq: Concurrent enrollment in 486  
Dual-listed with EEOB 586L. Field trips and laboratory exercises to accompany 486. Hands-on experience with aquatic research and monitoring techniques and concepts. Nonmajor graduate credit.

(Cross-listed with ENSCI, MICRO) (3-0) Cr. 3. F. Prereq: Six credits in biology and 6 credits in chemistry  
Dual-listed with EEOB 587. Introduction to major functional groups of autotrophic and heterotrophic microorganisms and their roles in natural systems. Nonmajor graduate credit.
BIOL 488. Identification of Aquatic Organisms.
(0-3) Cr. 1. F.
On line taxonomic and identification exercises to accompany 486. Instruction and practice in the identification of algae, aquatic macrophytes, zooplankton, and benthos. Nonmajor graduate credit.

(2-2) Cr. 3. F. Prereq: BIOL 312, STAT 101 or 104, a course in calculus, or graduate standing. Dual-listed with EEOB 589. Concepts and theories of population dynamics with emphasis on models of growth, predation, competition, and regulation.

BIOL 490. Independent Study.
Cr. 1-6. Repeatable, maximum of 9 credits. Prereq: 8 credits in biology and permission of instructor. Research opportunities for undergraduate students in the biological sciences. No more than 9 credits in Biol 490 may be counted toward graduation and of those, only 6 credits may be applied to the major.

I. Iowa Lakeside Laboratory. (Same as Ia LL 490I) Cr. 1 to 4 each time taken. See Iowa Lakeside Laboratory.
R. Biological research. Cr. 1 to 6 each time taken. For students registering to work on an independent research project under the direction of a faculty member.

BIOL 491. Laboratory Teaching Experience.
Cr. 1-2. Repeatable. Prereq: Permission of supervising staff. For students registering to be undergraduate laboratory assistants. Offered on a satisfactory-fail basis only. A maximum of 2 credits can be applied toward biology advanced course requirement.

BIOL 494. Biology Internship.
Cr. 1-3. Repeatable. Prereq: 8 credits in biology and permission of instructor. Intended to provide credit for significant professional experiences in biological sciences. A written proposal is required prior to registration. Intended for Biology majors.

BIOL 495. Undergraduate Seminar.
Cr. 1-3. Repeatable. F.S. Prereq: 15 credits in biological science; permission of instructor. Content varies from year to year and may include detailed discussion of special topics in biology, current issues in biology, or careers in biology.

BIOL 498. Cooperative Education.
Cr. R. Repeatable. F.S.SS. Prereq: Junior classification and permission of the department cooperative education coordinator. Required of all cooperative education students. Students must register for this course prior to commencing each work period.
Community Development

Interinstitutional Graduate Program

Participating Institutions:
- Iowa State University
- Kansas State University
- University of Nebraska
- North Dakota State University
- South Dakota State University

Community Development is an inter-institutional distance education program offered through the Web. The student selects a home institution, which grants the degree. After admission at the home institution, the student takes courses from each of the six institutions: Iowa State University, Kansas State University, University of Nebraska, North Dakota State University, and South Dakota State University.

At Iowa State University, Community Development is an optional area of specialization within the Interdisciplinary Graduate Studies degree program that consists of 37 semester credits for completion of the program. A thesis or creative component is required. A computer with minimum specifications, Web access, and an email address are required for completing the program.

Registration

Students choosing to receive their degree from Iowa State University complete all the admissions, registration and fee payment processes through ISU.

Courses primarily for graduate students

C DEV 502. Community and Natural Resource Management. (3-0) Cr. 3.
Detailed introduction to community resource management. Theoretical frameworks, methodological investigation, applied practices. Enhancement of ability of community development professionals to work with communities to plan, develop and monitor conversation and development of natural resources with multiple functions.

C DEV 503. Community Development I: Principles and Strategies of Community Change. (3-0) Cr. 3.
Analysis of principles and practices of community change and development. Use of case studies to relate community development approaches to conceptual models from diverse disciplines. Exploration of professional practice principles, and student construction of their personal framework for practicing community development.

C DEV 504. Community Analysis: Introduction to Methods. (3-0) Cr. 3.
Introduction to research methods relevant to community development. Formulate and begin a research effort, methods of data collection and how conceptual frameworks are used to develop the questions and analyze data. Emphasis on strategies for reporting findings and applying findings in community action and methods of evaluating the entire research process. Significant attention paid to issues of research ethics and inclusiveness.

C DEV 505. Community Development II: Organizing for Community Change. (3-0) Cr. 3.
Examines role of civil society in community planning efforts. Comparative approach to planning theories and approaches. Focus on change within communities and the roles of government, planners, and citizens in reacting to or shaping change. Dimensions of social capital and the context of change covered.

C DEV 506. Community and Regional Economic Analysis I. (3-0) Cr. 3.
Introduction to concepts of communities and regions, theories of economic growth, drivers of economic growth, the economic base of a community, sources of growth or decline in the community, roles of local government and institutions, and analytical tools. Strategies for local economic development will also be explored.

C DEV 507. Introduction to Native Communities. (3-0) Cr. 3.
A base knowledge course. For students currently working within, in partnership with, or considering working with Native communities. Basic understanding within the context of community development of the diversity of the tribal structures and cultures and the unique history and jurisdictional considerations of these nations. Working with tribes, Federal and Indian relations, and governance and cultural issues.

C DEV 508. Ecological Economics. (3-0) Cr. 3.
Approaches economy and community by looking at the inherent interdependence, jointness, and potential complimentarity between ecology and economy (utility) of a place.

C DEV 509. Building Native Community and Economic Capacity. (3-0) Cr. 3.
Focus on non-western approaches to helping Native communities build their capacity. Students will learn to take a participatory, culture-centered, and strength-based approach to development.

C DEV 510. Indian Country Agriculture and Natural Resources. (3-0) Cr. 3.
Introduction to the historical and contemporary issues related to natural resource management on Native American lands. Philosophical and economic arguments concerning natural resource conservation, preservation and extraction will be explored.

C DEV 512. Sustainable Communities. (3-0) Cr. 3.
Students will learn the conceptual relationships among Community and Sustainable Development and Sustainable Communities and examine the social, environmental, and economic aspects of sustainable communities. The course includes analysis of public policy impacts on community sustainability, practical actions for enhancing sustainability, and changing power dynamics and reward structures involved in incorporating sustainability into Community Development.

C DEV 513. Economic Development Strategies and Programs. (3-0) Cr. 3.
Course explores theories of local economic development and addresses the development issues faced by communities in the 21st century. Students will understand and apply concepts from economic development planning, economic analysis, business development, human resource development, community-based development, and high-technology development.

C DEV 520. Orientation in Community Development. (1-0) Cr. 1.
Introduction to the Community Development program. Focus on on-line delivery methods, graduate level research and writing, technology skills.

C DEV 522. Community Leadership and Capacity Building. (3-0) Cr. 3.
Defining leadership and applying it to the workplace. Understanding of potential link between leadership and community capacity. Identifying strategies for leadership development in communities.
C DEV 523. Grantwriting for Community Development Professionals.  
(3-0) Cr. 3. 
Basic Grant Development and Management will introduce students to the grant-getting process and provide an overview of what happens after a project is funded. The following topics will be covered: researching funding sources, generating cutting edge ideas, assessing needs, planning a project, establishing credibility, formulating a sustainable budget, designing an evaluation plan, managing the funded project, and disseminating project results.

C DEV 524. Non-Profit Management in Community Development.  
(3-0) Cr. 3. 
Understanding of how non-profit organizations are run in order that they may participate more fully in community development efforts. Learning skills necessary to assist organizations to manage community development projects and programs, such as, budgeting, planning, personnel, facilities, volunteer management, and fundraising.

C DEV 525. Role of Tribal Colleges in Economic Development.  
(3-0) Cr. 3. 
Focus on role of tribally-chartered colleges and universities in economic development within Native communities. Social capital analytic framework to examine and evaluate tribal college model of economic development.

C DEV 526. Immigration and Community Inclusion.  
(3-0) Cr. 3. 
Mechanisms for community inclusion and exclusion in relation to immigration will be examined. Aspects of ethnicity, religion, occupation and transnationalism are addressed in terms of community mechanism for incorporating immigrants as community assets.

C DEV 528. Evaluation of Organizations and Programs.  
(3-0) Cr. 3. Prereq: 504 with grade of C or better 
Introduction to the philosophy, techniques, and methodologies of organizational and program evaluation. Overview of program evaluation and theory, techniques to evaluate program processes and performance, evaluation designs, assessing program efficiency, models to diagnose organizations, and methods to assess organizational performance.

C DEV 530. Toward Ethical Engagement.  
(3-0) Cr. 3. 
Understanding what ethics are and identify ethical dimensions of a problem. Ability to employ ethical analysis and engagement strategies in public problem-solving.

C DEV 532. Community and Regional Economic Analysis II.  
(3-0) Cr. 3. Prereq: 506 
Substantive grounding in the theories and practice of measuring community economic dynamics; build solid foundation skills for applied community economic analysis.

C DEV 542. The Policy and Politics of Coastal Areas.  
(Cross-listed with POL S). (3-0) Cr. 3. 
Exploration of political implications of coastal policy. Issues include: "Carrying capacity," zoning, regulation of human development activities, tradeoffs between conservation and jobs, the quality of coastal lifestyle, ways in which citizens participate in policy for coastal areas.

C DEV 599. Creative Component.  
Cr. arr.
**Curriculum in Culinary Science - CALS**

Administered by the Department of Food Science and Human Nutrition

**Total Degree Requirement: 122.5 cr.**

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements. Only 65 cr. from a two-year institution may apply to the degree which may include up to 16 technical cr.; 9 P-NP cr. of electives; 2.00 minimum GPA.

**International Perspectives: 3 cr.**

**U.S. Diversity: 3 cr.**

**Communications/Library: 9.5 cr.**

**Electives 0-6 cr.** Select from any university coursework to earn at least 122.5 total credits.
Curriculum in Diet and Exercise B.S./M.S.

Administered by the Department of Food Science and Human Nutrition and Department of Kinesiology

This is an accelerated program with concurrent enrollment in the undergraduate and graduate degree programs. Courses included have been approved as meeting the academic requirements of the Didactic Program in Dietetics (DPD) in preparation for admission to dietetic internship programs; the DPD is accredited by the Commission on Accreditation for Dietetics Education, the accrediting agency of the American Dietetic Association. There is a $30 fee for the verification statement of completion of the accredited dietetics program. Courses also are included to meet the ACSM requirements for certification at the level of Health Fitness Instructor.

Total Degree Requirements: 123.5 cr. for bachelor’s degree and 39-40 cr. for master’s degree

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements.

Interpersonal and public communication skills: 9.5 cr.

Mathematical Sciences:

- MATH 140 College Algebra 3
- MATH 142 Trigonometry and Analytic Geometry 3
- MATH 160 Survey of Calculus 4
- MATH 165 Calculus I 4
- or MATH 181 Calculus and Mathematical Modeling for the Life Sciences I 4
- STAT 101 Principles of Statistics 4
- or STAT 226 Introduction to Business Statistics 3
- One of the following: 4
  - CHEM 163 College Chemistry
  - CHEM 163L and Laboratory in College Chemistry
  - CHEM 177 General Chemistry I
  - CHEM 177L and Laboratory in General Chemistry I
  - CHEM 231 Elementary Organic Chemistry
  - CHEM 231L and Laboratory in Elementary Organic Chemistry
  - PHYS 111 General Physics
  - or PHYS 111 General Physics
  - PHYS 106 The Physics of Common Experience 4
  - or PHYS 111 General Physics
- BBMB 301 Survey of Biochemistry 3
- BIOL 211 Principles of Biology I 3
- BIOL 212 Principles of Biology II 3
- BIOL 255 Fundamentals of Human Anatomy 3
- BIOL 255L Fundamentals of Human Anatomy Laboratory 1
- BIOL 256 Fundamentals of Human Physiology 3
- BIOL 256L Fundamentals of Human Physiology Laboratory 1
- MICRO 201 Introduction to Microbiology 2
- Total Credits 48

Humanities: 6 cr.

Select 3 credits from approved humanities course list; select 3 credits from approved ethics course list if ethics course selected is not on the humanities list, 3 additional credits of humanities must be taken.

PSYCH 101 Introduction to Psychology

PSYCH 230 Developmental Psychology

Diet and Exercise undergraduate courses: 19-22 cr.

Courses must be completed or in progress to apply to the BS/MS program.

One of the following:

- KIN 252 Disciplines and Professions in Kinesiology and Health
- KIN 253 Orientation in Kinesiology and Health
- FS HN 110 Professional and Educational Preparation
- KIN 258 Physical Fitness and Conditioning 2
- FS HN 115 Food Preparation Laboratory 1
- or FS HN 215 Advanced Food Preparation Laboratory
- FS HN 167 Introduction to Human Nutrition 3
- FS HN 214 Scientific Study of Food 3
- FS HN 265 Nutrition for Active and Healthy Lifestyles 3
- FS HN 360 Advanced Human Nutrition and Metabolism 3
- H S 110 Personal and Consumer Health 3
- Total Credits 19

Acceptance into the BS/MS PROGRAM is required BEFORE spring semester of the THIRD year.

Diet and Exercise remaining undergraduate courses to complete the BS requirements: 41 cr.

- H S 380 Worksite Health Promotion 3
- KIN 220 Basic Athletic Training 2
- KIN 259 Leadership Techniques for Fitness Programs 2
- KIN 345 Management of Health-Fitness Programs and Facilities 3
- KIN 358 Physiology of Exercise 3
- One of the following:
  - KIN 355 Biomechanics
  - KIN 360 Sociology of Sport and Exercise
  - KIN 366 Exercise Psychology
  - KIN 372 Motor Control and Learning Across the Lifespan
  - KIN 462 Medical Aspects of Exercise 3
  - FS HN 361 Nutrition and Health Assessment 2
  - FS HN 403 Food Laws, Regulations, and the Regulatory Process 2
  - FS HN 411 Food Ingredient Interactions and Formulations 2
  - FS HN 466 Nutrition Counseling and Education Methods 3
  - HRI 380 Quantity Food Production Management 3
  - HRI 380L Quantity Food Production and Service Management 2
  - HRI 392 Foodservice Systems Management II 3
  - NJTRS 561 Medical Nutrition and Disease I 3-4

Diet and Exercise graduate courses: 37 cr.

- FS HN 581 Seminar 1
- NJTRS 501 Biochemical and Physiological Basis of Nutrition: Macronutrients and Micronutrients 4
- or KIN 570 Physical Activity Assessment for Health Related Research 2
- NJTRS 561 Medical Nutrition and Disease I 3-4
- NJTRS 563 Community Nutrition 3
- NJTRS 564 Medical Nutrition and Disease II 3-4
- KIN 501 Research Methods in Physical Activity 3
- KIN 505 Research Laboratory Techniques in Exercise Physiology 2
- KIN 551 Advanced Physiology of Exercise II 3
- KIN 558 Physical Fitness - Principles, Programs and Evaluation 3
- 6 credits from
  - NJTRS 699 Research in Nutritional Sciences 3
- or KIN 699 Research 3
- STAT 401 Statistical Methods for Research Workers 4
- additional requirement of FS HN 590C for FS HN department students
Interinstitution Graduate program

Participating institutions: Iowa State University; Colorado State University; Kansas State University; Michigan State University; Montana State University; North Dakota State University; Oklahoma State University; South Dakota State University; University of Kansas Medical Center; University of Nebraska.

Dietetics is an interinstitutional distance education program offered through the Web. The student selects a home institution, which grants the degree. After admission at the home institution, the student takes courses from each of the ten institutions: Iowa State University, Colorado State University, Kansas State University, Michigan State University, Montana State University, North Dakota State University, Oklahoma State University, South Dakota State University; Kendra Kattelman, University of Kansas Medical Center, and University of Nebraska.

At Iowa State University, Dietetics is a specialization within the Master of Family and Consumer Sciences degree program (MFCS-Diet) that consists of 36 credits. This is a non-thesis option and a special project or creative component is required. Students typically complete the program in 6-8 semesters while employed full-time. Admission is limited to those who are Registered Dietitians or Registration-eligible Dietitians. A computer with minimum specifications, web access, and an email address are required for completing the program.

Admission procedures: Admission to the MFCS-Diet program requires exactly the same procedures as admission to the Graduate College. See Graduate College section of this catalog.

Registration: Students choosing to receive their degree from Iowa State University complete all the admissions, registration and fee payment processes through ISU.

The department cooperates in the interinstitution Master of Family and Consumer Sciences program to offer a specialization in Dietetics. The Master of Family and Consumer Sciences-Dietetics is designed for the Registered Dietitian or Registration-eligible Dietitian. The 36 credit program is non-thesis and seeks to develop research skills, stimulate independent thought, and provide up-to-date knowledge in foods, nutrition, and foodservice/business management. This program prepares individuals to integrate and apply the principles from the biomedical sciences, human behavior, and management to design and lead effective food and nutrition programs in a variety of settings. Students may build a program of study from offerings of the partner institutions such as human nutrition, nutrient metabolism, biostatistics, health promotion/disease prevention, foodservice management, food science, lifespan nutrition, wellness, entrepreneurship, nutrition education, nutritional assessment and food safety. The online program is tailored for credentialed, practicing dietetics professionals who seek to enhance their knowledge in a specific area of dietetics practice or to retool for new career opportunities in dietetics practice.

Curriculum in Dietetics - CALS

Administered by the Department of Food Science and Human Nutrition

The dietetics undergraduate curriculum meets the academic requirements as the Didactic Program in Dietetics and is accredited by the Commission on Accreditation for Dietetics Education, the accrediting agency of the American Dietetic Association. Graduates of the program are eligible to apply for admission to accredited/approved supervised practice programs/dietetic internships. There is a $30 fee for the verification statement of completion of the accredited dietetics program.

Total Degree Requirement: 120.5 cr.

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements. Only 65 cr. from a two-year institution may apply to the degree which may include up to 16 technical cr.; 9 P-NP cr. of electives; 2.00 minimum GPA.

International Perspectives: 3 cr.
U.S. Diversity: 3 cr.

Communications/Library: 9.5 cr.

Total Credits: 40-41

Management: 11 cr.

HRI 380 Quantity Food Production Management 3

HRI 380L Quantity Food Production and Service Management Experience 2

HRI 391 Foodservice Systems Management I 3

HRI 392 Foodservice Systems Management II 3

Total Credits: 11

Electives: 0-14 cr. Select from any university coursework to earn at least 120.5 total credits.

Courses primarily for graduate students

DIET 511. Research Methods. (3-0) Cr. 3. F. Prereq: enrollment in GP-IDEA MFCS in Dietetics

An overview of diverse research approaches focusing on methods for collecting and analyzing quantitative and qualitative data. www only. Only one of DIET 511 or FCEdS 511 may count toward graduation.

DIET 530. Nutrition in Wellness. (3-0) Cr. 3. S. Prereq: enrollment in GP-IDEA MFCS in Dietetics

Addresses wellness promotion through nutrition. Nutritional risk and protective factors will be examined in relation to public health and individual nutrition. www only.

DIET 532. Maternal and Child Nutrition. (3-0) Cr. 3. S.S. Prereq: enrollment in GP-IDEA MFCS in Dietetics

Critical examination of behavioral, physiological, and public health issues impacting dietary and nutritional factors that support normal growth and development. Content focuses on early stages of the life cycle: gestation, lactation, infancy, preschool, school age, and adolescence. www only.

DIET 534. Nutrition Education in the Community. (3-0) Cr. 3. S.S. Prereq: enrollment in GP-IDEA MFCS in Dietetics

Principles and practices of teaching individuals and groups to translate nutrition knowledge into action. Emphasis on research in and evaluation of nutrition education. www only.

DIET 538. Nutrition: A Focus on Life Stages. (3-0) Cr. 3. S.S. Prereq: enrollment in GP-IDEA MFCS in Dietetics

Explores influence of normal physiological stresses on nutritional needs throughout the life span. Evaluates dietary intake and identification of appropriate community nutrition services in on-line discussions. Specific considerations, such as the influence of age and cultural heritage, are incorporated. www only.

WWW only. Basic physiologic changes during aging and their impacts in health and disease. The focus will be on successful aging with special emphasis on physical activity and nutrition. Practical application to community settings is addressed.

DIET 544. Pediatric Clinical Nutrition. (3-0) Cr. 3. F. Prereq: enrollment in GP-IDEA MFCS in Dietetics

Examines the physiological, biochemical and nutritional aspects of disease processes relevant to infants and children up to 18 years of age. Discussion of medical nutrition therapy for a variety of medical conditions in this population including inborn errors of metabolism, food hypersensitivity, obesity, and diseases of the major organ systems. www only.

DIET 546. Phytochemicals. (3-0) Cr. 3. F. Prereq: enrollment in GP-IDEA MFCS in Dietetics

Overview of phytochemicals (non-nutritive biologically active compounds) from fruits, vegetables, cereals and oilseeds. Covers recent findings of chemistry, physiological functions, and potential health implications of phytochemicals. www only.

DIET 548. Professional Development Assessment. (1-0) Cr. 1. F.S.SS. Prereq: Enrollment in GPIDEA MFCS in Dietetics

Web-based course providing information and practice for student to assess and evaluate own professional development and continuing professional education needs. Completion of professional 5-year plan. Offered on a satisfactory-fail basis only.

DIET 550. Finance and Cost Controls. (3-0) Cr. 3. F. Prereq: enrollment in GP-IDEA MFCS in Dietetics

Overview of the fundamental knowledge of hospitality managerial accounting, cost controls, and financial management. Important topics include financial statement analysis, cost concepts, cost-volume-profit analysis, calculating and controlling food and beverage costs, pricing, and capital budgeting. www only.

DIET 554. Statistics. (3-0) Cr. 3. S.SS. Prereq: enrollment in GP-IDEA MFCS in Dietetics

Tools used to make statistical decisions. Major emphasis on explanation and understanding of important concepts involved; basic theme is understanding of data and methods used to analyze such data. www only. Only one of DIET 554 or Stat 401, 495, 542 may count toward graduation.

DIET 556. Advanced Nutrition: Micronutrients. (3-0) Cr. 3. S. Prereq: BBMB 404 or BBMB 420 or equivalent; enrollment in GP-IDEA MFCS in Dietetics

Integration of the molecular, cellular and physiological aspects of vitamins and minerals in mammalian systems. Interactions among nutrients, metabolic consequences of deficiencies or excesses, relevant polymorphisms, major research methodologies, and current topics related to micronutrients and non-nutrient components. www only. Only one of DIET 556 or NUTRS 502 may count toward graduation.

DIET 558. Advanced Nutrition: Macronutrients. (3-0) Cr. 3. F. Prereq: BBMB 404 or BBMB 420 or equivalent; enrollment in GP-IDEA MFCS in Dietetics

Integration of the molecular, cellular and physiological aspects of macronutrients and energy metabolism in mammalian systems. Dietary energy, carbohydrates, fiber, lipids, proteins, their interactions, metabolic consequences, and major research methodologies. www only. Only one of DIET 558 or NUTRS 501 may count toward graduation.

DIET 560. Medical Nutrition and Disease. (3-0) Cr. 3. F.S.SS. Prereq: enrollment in GP-IDEA MFCS in Dietetics

Pathophysiology of selected acute and chronic disease states and their associated medical problems. Specific attention directed to medical nutrition needs of patients in the treatment of each disease state. www only. Only two of DIET 560 or NUTRS 561, 564 may count toward graduation.
DIET 565. Malnutrition in Low-Income Countries.
(3-0) Cr. 3. SS. Prereq: enrollment in GP-IDEA MFCS in Dietetics
Identification and assessment of malnutrition in low-income countries. Social, cultural, political, economic, and geographic determinants of malnutrition. Protein-energy malnutrition, vitamin and mineral deficiencies. Intervention approaches; international efforts and local sustainability. www only.

DIET 566. Nutrition Counseling and Education Methods.
(Cross-listed with FS HN). (2-2) Cr. 3. F.S. Prereq: enrollment in GP-IDEA MFCS in Dietetics
Dual listed with FS HN 466. Application of counseling and learning theories with individuals and groups in community and clinical settings. Includes discussion and experience in building rapport, assessment, diagnosis, intervention, monitoring, evaluation, and documentation. Literature review of specific counseling and learning theories. www only.

(3-0) Cr. 3. Alt. F. Prereq: 360; BBMB 301, undergraduate course in physiology; enrollment in GP-IDEA MFCS in Dietetics
Study of the current scientific literature to evaluate current trends and issues in nutrition science and dietetic practice. Emerging areas of research investigating the role of nutrients in health and disease in humans will be explored. Emphasis on the impact of emerging research on nutrition recommendations and interventions designed to promote human health. www only.

DIET 568. Entrepreneurship in Dietetics.
(3-0) Cr. 3. F. Prereq: enrollment in GP-IDEA MFCS in Dietetics
Definition and discussion of entrepreneurship and its importance to economic and business environment. www only.

(3-0) Cr. 3. S. Prereq: enrollment in GP-IDEA MFCS in Dietetics
Develop an understanding of nutrition based on knowledge of the biochemical and physiological process and functions of specific nutrients in meeting nutritional requirements. Emphasis on the relationship of optimal nutrition and physical efficiency and performance. www only.

DIET 572. Environmental Scanning and Analysis of Current Issues in Dietetics.
(3-0) Cr. 3. S. Prereq: enrollment in GP-IDEA MFCS in Dietetics
Overview of current topics, issues, and trends in dietetics practice. www only.

DIET 573. Administration of Health Care Organizations.
(3-0) Cr. 3. SS. Prereq: enrollment in GP-IDEA MFCS in Dietetics
A comprehensive review of today's health care institutions and their response to the economics, social, ethical, political, legal, technological, and ecological environments. www only.

DIET 595. Proposal and Grant Writing for the Working Professional.
(1-0) Cr. 1. Alt. F, offered 2011. Prereq: enrollment in GP-IDEA MFCS in Dietetics
Grant proposal preparation experiences including writing and critiquing of proposals and budget planning. Designed for the working professional. www only.

DIET 599. Creative Component.
Cr. arr. Repeatable. F.S.SS. Prereq: Enrollment in GPIDEA MS Dietetics
For non-thesis option only.

**Undergraduate Study**

For undergraduate curriculum in Insect Science, see College of Agriculture, Curricula.

A degree in Insect Science will provide students with a strong foundation in the biological sciences with an emphasis on insects. This degree prepares students for positions in industry, government, education, and public health. Chemical and seed companies, pest-management or consulting firms, and Horticultural nurseries employ insect scientists. State and federal agencies employ insect science graduates as consultants, extension directors, mosquito abatement agents, and research aides. A significant number of graduates pursue advanced graduate degrees in academia or professional degrees in the medical or veterinary fields.

Graduates understand the evolutionary and ecological relationships of insects with other life forms, and the impact of insects relative to human and animal health, as well as the relationships between insects and humanity’s food, fiber, structural, and aesthetic needs and expectations. They are skilled in identifying insects and related groups and understand the biology, ecology, behavior, diversity, and evolutionary relationships of the major groups of insects. Graduates understand the principles and methods available to manage beneficial and pest insect populations. They understand the application of the scientific method in problem solving and the principles of experimental design and analysis. Graduates are able to communicate research and educational materials properly and competently - orally, visually, and in writing - and are able to work effectively with others.

Graduates of the agricultural and Horticultural insect management option are skilled in identifying pests and measuring their impact on plant and animal hosts for the management of these pests. They understand the environmental, legal, and ethical issues involved in insect population management. Graduates of the insect biology option have achieved an understanding of the biochemical and physiological processes governing insect metabolism, growth, and form. They understand the evolutionary and ecological significance of insects. Graduates of this option often enter graduate or professional schools.

The department offers a minor in Insect Science that may be earned by completing ENT 370 Insect Biology and 12 credits in courses selected from an approved list supplied by the department. Entomology administers the Emerging Global Diseases minor (see http://www.ent.iastate.edu/egd). Core courses address the biology of emerging disease agents (e.g., protozoa, fungi, microbes, and viruses), the clinical manifestations and epidemiology of emerging diseases, and the impact of those diseases on human interactions and socioeconomics.

One course must be taken from each of three core areas:

<table>
<thead>
<tr>
<th>Core Area</th>
<th>Course Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pathogens and Disease</td>
<td>MICRO 310, Medical Microbiology</td>

</tbody>
</table>

The remainder of the credits (for a total of 15) may be selected from any of the above-listed courses not selected, and from other appropriate courses as approved by Emerging Global Diseases program advisers.

**Graduate Study**

The department offers work for the master of science and doctor of philosophy degrees with a major in entomology. Studies at the Ecosystem, Organismal, and Subcellar levels occur in the following areas:

- Aquatic entomology, biological control, chemical ecology, ecology, host plant resistance, insecticide toxicology, medical/veterinary entomology, pathology, pest management, physiology, population genetics, or systematics.

Graduates have a broad understanding of entomology and related disciplines, and an in-depth command of their area of concentration. They are able to communicate effectively with scientific colleagues and the general public in both formal and informal settings. Graduates are able to address complex problems facing entomology or toxicology professionals, taking into account related ethical, social, legal, economic, and environmental issues. They are skilled in research methods, data analyses, and interpretation of results. They also are skilled in working effectively with their colleagues, and writing concise and persuasive grant proposals. They have an understanding of and can critically evaluate current entomological literature.

Prerequisite to the entomology major and to minor graduate work in the department is completion of at least two years of zoological courses, for part of which credit in other closely allied biological sciences may be substituted. Specific course requirements for advanced degrees depend partly upon previous training and experience in the major field of specialization.

Any student receiving the M.S. in entomology shall have at least one course in insect physiology, one course in insect systematics, two courses of ENT 590 Special Topics (selected from topics A through D, F through I, M and N, inclusive), and at least 1 credit of ENT 600 Seminar.

Any student receiving the Ph.D. in entomology shall have at least one course in insect physiology, one course in insect systematics, four additional courses of ENT 590 Special Topics (selected from topics A through D and F through I, M through N inclusive), and at least 1 credit of ENT 600 Seminar. At least 590 must be taken from each of these subgroups: Population (C, D, N); Organismal (A, B, F, M); and Suborganismal (G, H, I).

In addition, Ph.D. students majoring either in Entomology or Toxicology shall have two semesters of teaching experience, taken as ENT 590K Teaching Experience. both semesters or ENT 590L Extension Internship. the other semester.

A student can receive a Ph.D. minor in Entomology by taking 3 Entomology courses (500 level and above) for a total of 9 credits to be determined by the student’s P.O.S. committee and approved by the Entomology Director of Graduate Education.

An option for an emphasis in molecular Entomology is available. Any student receiving the M.S. in entomology with an emphasis in molecular entomology is required to take:

- ENT 555, Insect Physiology
- ENT 590G, Molecular Entomology
- Plus one other course of 590 selected from topics A-D, F, H, I, M, N
- Plus one additional course in molecular entomology
- ENT 600 Seminar
- BBMB 404, Biochemistry I
- BBMB 542A, DNA Techniques. Includes genetic engineering procedures, sequencing, PCR, and genotyping. (F.S.S.)

And one course from the following:

- ENT 576, Systematic Entomology
- ENT 525, Aquatic Insects
- ENT 568, Advanced Systematics
Any student receiving the Ph.D. in entomology with an emphasis in molecular entomology is required to take:

ENT 555 Insect Physiology 4
ENT 590G Molecular Entomology 1-3

Plus three other courses of 590 selected from topics A-D, F, H, I, M, N 9

One additional course in molecular entomology 3
ENT 600 Seminar 1
BBMB 542A DNA Techniques. Includes genetic engineering procedures, sequencing, PCR, and genotyping. 1

Plus two other workshops selected from: 6
BBMB 542B Protein Techniques. Includes fermentation, protein isolation, protein purification, SDS-PAGE, Western blotting, NMR, confocal microscopy and laser microdissection, immunophenotyping, and monoclonal antibody production. (S,SS.)
BBMB 542C Cell Techniques. Includes immunophenotyping, ELISA, flow cytometry, microscopic techniques, and image analysis. (F.S.)
BBMB 542D Plant Transformation. Includes Agrobacterium and particle gun-mediated transformation of tobacco, Arabidopsis, and maize, and analysis of transformants. (S.)
BBMB 542E Proteomics. Includes two-dimensional electrophoresis, laser scanning, mass spectrometry, and database searching. (F.)

An additional course with a molecular component 3

Plus one from each of the following:
Systematics 3
ENT 570 Systematic Entomology
ENT 625 Aquatic Insects
ENT 568 Advanced Systematics
Biochemistry 3
BBMB 404 Biochemistry I
BBMB 405 Biochemistry II
BBMB 501 Comprehensive Biochemistry I

Entomology participates in the interdepartmental majors in ecology and evolutionary biology; genetics; Microbiology; and molecular, cellular and developmental biology; and in the interdepartmental major and minor in toxicology (see Index).

The Federal Corn Insects and Crop Genetics Research Unit and the North Central Plant Introduction Station are available for advanced study in certain phases of entomological research.

More information about the department, such as current research, faculty resumes, physical facilities, and graduate students can be viewed on the department’s website at www.ent.iastate.edu. Curriculum assessment for the department can be viewed here: http://www.ent.iastate.edu/assessment.

**Curriculum in Insect Science**

**Total Degree Requirement: 128 cr.**

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

**International Perspective: 3 cr.**
**U.S. Diversity: 3 cr.**
**Communications Proficiency (with a C or better):**

- English composition 3
- Speech fundamentals 3
- Total Credits 6

**Communication/Library:**

- ENGL 150 Critical Thinking and Communication 3
- ENGL 250 Written, Oral, Visual, and Electronic Composition 3
- SP CM 212 Fundamentals of Public Speaking 3
- LIB 160 Library Instruction 0.5

Total Credits 9.5

**Humanities and Social Sciences:**

- Humanities course 3
- ECON 101 Principles of Microeconomics 3

Total Credits 6

**Ethics: 3 cr.**
3 cr. from approved list.

**Life Sciences:**

- BIOL 211 Principles of Biology I 3
- Approved Life Sciences 3

Total Credits 6

**Mathematical and Physical Sciences: 3 cr**

- STAT 104 Introduction to Statistics

**Biological Sciences:**

- BIOL 211 Principles of Biology I 3
- BIOL 211L Principles of Biology Laboratory I 1
- BIOL 212 Principles of Biology II 3
- BIOL 212L Principles of Biology Laboratory II 1
- BIOL 312 Ecology 4

One of the following: 3

- MICRO 302 Biology of Microorganisms
- MICRO 201 Introduction to Microbiology

Total Credits 15

**Entomology:**

- ENT 110 Technical Lecture R
- ENT 201 Introduction to Insects 1
- ENT 211 Insects and Society 2
- ENT 370 Insect Biology 3
- ENT 374 Insects and Our Health 3
- ENT 376 Fundamentals of Entomology and Pest Management 3

2 credits from:

- ENT 490E Research or work experience. Additional courses to total 19 credits from the following: 5

- ENT 283 Pesticide Application Certification
- ENT 372 Livestock Entomology
- ENT 374L Insects and Our Health Laboratory
- ENT 375 Plant Protection Using Natural Enemies
- ENT 410 Insect-Virus Interactions: a Molecular Perspective
- ENT 425 Aquatic Insects
- ENT 452 Integrated Management of Diseases and Insect Pests of Turfgrasses
- ENT 471 Insect Ecology
- ENT 478 Global Protozoology - Molecular Biology of Protozoa
- ENT 511 Integrated Management of Tropical Crops
- ENT 550 Pesticides in the Environment
- ENT 555 Insect Physiology
- ENT 570 Plant-Insect Interaction
- ENT 576 Systematic Entomology
- FOR 416 Forest Insect and Disease Ecology
- PL P 416 Forest Insect and Disease Ecology

Total Credits 19

**Options**

**Agricultural and Horticultural Insect Management Option:**

- MATH 140 College Algebra 3
- CHEM 163 College Chemistry 4
- CHM 163L Laboratory in College Chemistry 1
- CHEM 231 Elementary Organic Chemistry 3
ENT 283. Pesticide Application Certification.  
(2-0) Cr. 2.  
Insect and virus genomics in combating viral disease of both human and agricultural importance. Nonmajor graduate credit.

ENT 374L. Insects and Our Health Laboratory.  
(3-0) Cr. 3. S.  
Prereq: Credit or enrollment in ENT 374.  
Discussion of the use of these organisms in plant protection, including an emphasis on genetic alteration of natural enemies. Nonmajor graduate credit.

ENT 374. Insects and Our Health.  
(Cross-listed with MICRO). (3-0) Cr. 3. S.  
Prereq: 3 credits in biological sciences  
Bartholomay. Identification, biology, and significance of insects and arthropods that affect the health of humans and animals, particularly those that are vectors of disease. Nonmajor graduate credit.

CENTRAL ILLINOIS STATE UNIVERSITY  
University catalog for 2011-2012  
Prereq: Credit or enrollment in ENT 375.  
Bonning, Bartholomay. Overview of insect-virus interactions including insect immunity to viruses, genetic enhancement of viral insecticides, transgenic mosquitoes, disruption of virus transmission, and the role of insect and virus genomics in combating viral disease of both human and agricultural importance.

(2-3) Cr. 3.  
Prereq: BIOL 101 or 211  
O'Neal. Introduction to entomology and insect-pest management, including life processes, ecology, economics, tactics of population suppression, and ecological backlash. Nonmajor graduate credit. Credit for either Ent 376 or 386, but not both, may be applied toward graduation.

(Dual-listed with 575). (3-0) Cr. 3. S.  
Bonning, Harris. Overview of the biology, ecology, and classification of insect pathogens, predators, and parasitoids. Discussion of the use of these organisms in plant protection, including an emphasis on genetic alteration of natural enemies. Nonmajor graduate credit.

ENT 376L. Insects and Our Health Laboratory.  
(0-3) Cr. 1. S.  
Prereq: Credit or enrollment in ENT 374.  
Meets International Perspectives Requirement.

ENT 374. Insects and Our Health.  
(Cross-listed with MICRO). (3-0) Cr. 3. S.  
Prereq: 3 credits in biological sciences  
Bartholomay. Identification, biology, and significance of insects and arthropods that affect the health of humans and animals, particularly those that are vectors of disease. Nonmajor graduate credit.

ENT 374. Insects and Our Health.  
(Cross-listed with MICRO). (3-0) Cr. 3. S.  
Prereq: 3 credits in biological sciences  
Bartholomay. Identification, biology, and significance of insects and arthropods that affect the health of humans and animals, particularly those that are vectors of disease. Nonmajor graduate credit.
ENT 452. Integrated Management of Diseases and Insect Pests of Turfgrasses.
(Dual-listed with 552). (Cross-listed with PL P, HORT). (3-0) Cr. 3. Alt. S., offered 2012. Prereq: HORT 351
Gleason, D. Lewis. Identification and biology of important diseases and insect pests of turfgrasses. Development of integrated pest management programs in various turfgrass environments.

ENT 471. Insect Ecology.
(Dual-listed with 571). (2-3) Cr. 3. Alt. F., offered 2012. Prereq: 9 credits biological sciences
O’Neal. The contribution of insects to ecosystem function is staggering. This course will focus on insect population ecology, predator-prey interaction and chemical ecology. The role of insects in nutrient cycling, pollination and pest management will be discussed with case studies used to highlight the applied nature of insect ecology and its relationship to agriculture.

(Dual-listed with 578). (Cross-listed with V PTH). (2-1) Cr. 3. F. Prereq: Permission of instructor
Analysis of cellular systems, molecules, and organelles of pathogenic protozoan parasites. Emphasis is placed on processes and systems that are unique to protozoa, are important to understanding vector-parasite-host biology/ecology, or are targets of disease prevention/treatment programs for international disease control. Nonmajor graduate credit.

ENT 490. Independent Study.
Cr. 1-3. Repeatable, maximum of 6 credits. Prereq: 15 credits in biological sciences, junior or senior classification
A maximum of 6 credits of Ent 490 may be used toward the total of 128 credits required for graduation.

E. Research or work experience.
U. Laboratory teaching experience. For students registering to be undergraduate laboratory assistants.

Courses primarily for graduate students, open to qualified undergraduate students

ENT 510. Insect-Virus Interactions: a Molecular Perspective.
(Dual-listed with 410). (Cross-listed with MICRO). (3-0) Cr. 3. Alt. F., offered 2011. Prereq: Permission of an instructor
Bonning, Bartholomay. Overview of insect-virus interactions including insect immunity to viruses, genetic enhancement of viral insecticides, transgenic mosquitoes, disruption of virus transmission, and the role of insect and virus genomics in combating viral disease of both human and agricultural importance.

ENT 511. Integrated Management of Tropical Crops.
(Cross-listed with PL P, HORT). (3-0) Cr. 3. Alt. S., offered 2013. Prereq: PL P 408 or 416 or ENT 370 or 376 or HORT 221
Gleason, Lewis. Applications of Integrated Crop Management principles (including plant pathology, entomology, and horticulture) to tropical cropping systems. Familiarization with a variety of tropical agroecosystems and Costa Rican culture is followed by 10-day tour of Costa Rican agriculture during spring break, then writeup of individual projects.

Meets International Perspectives Requirement.

ENT 525. Aquatic Insects.
(Dual-listed with 425). (Cross-listed with A ECL). (2-3) Cr. 3. Alt. S., offered 2013. Prereq: BIOL 312 or equivalent
Courtney. Morphology, ecology, diversity and significance of aquatic insects, with emphasis on the collection, curation and identification of taxa in local streams and lakes.

ENT 530. Ecologically Based Pest Management Strategies.
(Cross-listed with AGRON, PL P, SUSAG). (3-0) Cr. 3. Alt. F., offered 2012. Prereq: SUSAG 509
Durable, least-toxic strategies for managing weeds, pathogens, and insect pests, with emphasis on underlying ecological processes.

(Cross-listed with TOX). (2-0) Cr. 2. S. Prereq: 9 credits of biological sciences
Coats. Fate and significance of pesticides in soil, water, plants, animals, and the atmosphere.

ENT 552. Integrated Management of Diseases and Insect Pests of Turfgrasses.
(Dual-listed with 452). (Cross-listed with PL P, HORT). (3-0) Cr. 3. Alt. S., offered 2012. Prereq: HORT 351
Gleason, D. Lewis. Identification and biology of important diseases and insect pests of turfgrasses. Development of integrated pest management programs in various turfgrass environments.

ENT 555. Insect Physiology.
(3-3) Cr. 4. S. Prereq: 370
Jurenka. Life processes of the insects, including reviews of current problems in insect physiology.

ENT 568. Advanced Systematics.
(Cross-listed with EEOB). (2-3) Cr. 3. Alt. S., offered 2013. Prereq: Permission of instructor
Gassmann. Physiological, behavioral, ecological, and evolutionary factors that govern interactions between insects and plants, applications of this knowledge to agriculture, and important results from the study of natural systems. Additional topics covered during the semester include: tritrophic interactions, biological control of plants by insects, and pollination biology. Student-led discussion and draws on both the primary and secondary literature.

ENT 571. Insect Ecology.
(Dual-listed with 471). (2-3) Cr. 3. Alt. F., offered 2012. Prereq: 9 credits biological sciences
O’Neal. The contribution of insects to ecosystem function is staggering. This course will focus on insect population ecology, predator-prey interaction and chemical ecology. The role of insects in nutrient cycling, pollination and pest management will be discussed with case studies used to highlight the applied nature of insect ecology and its relationship to agriculture.

ENT 574. Medical Entomology.
(3-3) Cr. 4. Alt. S., offered 2012. Prereq: 9 credits in biological sciences
Bartholomay. Identification, biology, and significance of insects and other arthropods that attack people and animals, particularly those that are vectors of disease.

(Dual-listed with 375). (3-0) Cr. 3. Alt. S., offered 2013. Prereq: 370 or 376
Bonning, Harris. Overview of the biology, ecology, and classification of insect pathogens, predators, and parasitoids. Discussion of the use of these organisms in plant protection, including an emphasis on genetic alteration of natural enemies.

(3-6) Cr. 5. Alt. F., offered 2011. Prereq: 370
Courtney. Classification, distribution, and natural history of insects, including fundamentals of phylogenetic systematics, biogeography, taxonomic procedures, and insect collection and curation.
(Dual-listed with 478). (Cross-listed with V PTH). (2-1) Cr. 3. F. Prereq: Permission of instructor
Analysis of cellular systems, molecules, and organelles of pathogenic protozoan parasites. Emphasis is placed on processes and systems that are unique to protozoa, are important to understanding vector-parasite-host biology/ecology, or are targets of disease prevention/treatment programs for international disease control.

ENT 590. Special Topics.
A. Biological Control and Pathology.
B. Chemical Ecology and Behavior.
C. Ecology and Pest Management.
D. Evolution and Systematics.
E. Special Research Topics.
F. Medical and Veterinary Entomology.
G. Molecular Entomology.
H. Physiology and Biochemistry.
I. Toxicology.
K. Teaching Experience.
L. Extension Internship.
M. Immature Insects.
N. Population Genetics.

Courses for graduate students
ENT 600. Seminar.
Cr. 1. F.S.SS.
Presentation of research results.

ENT 675. Insecticide Toxicology.
(Cross-listed with TOX). (2-3) Cr. 3. Alt. F., offered 2011. Prereq: 555 or TOX 501
Coats. Principles of insecticide toxicology; classification, mode of action, metabolism, and environmental effects of insecticides.

ENT 699. Research.
Cr. arr. Repeatable.
Environmental Science

Interdepartmental Undergraduate Program

Environmental Science provides an integrated, quantitative, and interdisciplinary approach to the study of environmental systems. The magnitude and complexity of environmental problems are creating a growing need for scientists with rigorous, interdisciplinary training in environmental science. The Environmental Science program is designed to prepare students for positions of leadership in this rapidly changing discipline. Environmental Science graduates have a solid foundation in biological and physical natural sciences and the specialized training necessary for integrated analysis of environmental systems.

Undergraduate Study

The Environmental Science undergraduate major is offered through both the College of Agriculture and Life Sciences and the College of Liberal Arts and Sciences. Environmental Science majors complete foundation courses in biology, chemistry, earth science, geology, physics and mathematics, plus a major consisting of an integrated core of Environmental Science courses and additional advanced course work in Environmental Science. Scientific rigor is stressed throughout the program, beginning with the foundation courses in the first two years of the curriculum. The upper level core courses emphasize a dynamic systems approach that provides a framework for integrating physical, chemical, and biological aspects of environmental systems.

Students seeking an Environmental Science major complete the following:

1. A foundation of approved supporting courses in science and mathematics including biology, chemistry, earth science, physics, calculus, and statistics
2. 27 credits of course work in the major, including the Environmental Science core:

A combined average grade of C or higher is required in courses applied in the major.

Graduate Study

Environmental Science offers an interdisciplinary graduate program leading to the M.S. and Ph.D. degrees with a major in Environmental Science. Faculty from the colleges of Agriculture and Life Sciences, Engineering, and Liberal Arts and Sciences cooperate to offer courses and research opportunities covering a broad array of environmental topics.

Applicants should have completed an undergraduate or masters degree in one of the biological, chemical, physical, or engineering sciences or should have equivalent preparation.

The Environmental Science graduate program emphasizes fundamental concepts and research, which at the same time address major environmental issues. The curriculum is designed to provide the interdisciplinary approach needed in Environmental Science education and research. In addition to work in their chosen area of specialization, students are afforded a broad exposure to the biological, chemical and physical aspects of environmental systems and the specialized training necessary for integrated analysis of these systems.

Curriculum in Environmental Science

Total Degree Requirement: 120 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.

U.S. Diversity: 3 cr.

Communications Proficiency:

6 cr. of English composition with a C or better and 3 cr. of speech fundamentals with a C or better.

Communication/Library: 9.5 cr.

Total Credits 27

Courses primarily for undergraduate students

**ENSCI 110. Orientation to Environmental Science.**
(1-0) Cr. 1. F. Prereq: Freshman classification in EnSci
Overview of Environmental Science curriculum and discussion of professional opportunities. Offered on a satisfactory-fail basis only.

**ENSCI 201. Introduction to Environmental Issues.**
(Cross-listed with BIOL, ENV S). 2-0 Cr. 2. F.S.
Discussion of current and emerging environmental issues such as human population growth, energy use, loss of biodiversity, water resources, and climate change.

**ENSCI 250. Environmental Geography.**
(Cross-listed with ENV S). 3-0 Cr. 3. F.
The distribution, origins and functions of the earth’s physical systems and the spatial relationship between human activity and the natural world.

**ENSCI 301. Natural Resource Ecology and Soils.**
(Cross-listed with NREM). 3-3 Cr. 4. F. Prereq: BIOL 211, 211L; FOR 201 or a second course in biology
Effects of environmental factors on ecosystem structure and function using forest, prairie and agricultural ecosystems as models. Special emphasis is given to soil-forming factors and the role of soil in nutrient and water cycling and ecosystem dynamics. Additional emphasis is given to human influences on natural ecosystems and the role of perennial plant communities in agricultural landscapes. Nonmajor graduate credit.

**ENSCI 312. Ecology.**
(Cross-listed with A ECL, BIOL). 3-3 Cr. 4. F.S. Prereq: BIOL 211L and 212L
Fundamental concepts and principles of ecology dealing with organisms, populations, communities and ecosystems. Laboratory and field exercises examine ecological principles and methods as well as illustrate habitats.

I. Ecology

**ENSCI 312L. Ecology.**
(Cross-listed with A ECL, IA LL). Cr. 4. SS.
An introduction to the principles of ecology at the population, community and ecosystem level. Field studies of local lakes, wetlands and prairies are used to examine factors controlling distributions, interactions, and roles of plants and animals in native ecosystems.

**ENSCI 345. Natural Resource Photogrammetry and Geographic Information Systems.**
(Cross-listed with NREM). 2-3 Cr. 3. F. Prereq: Junior classification Measurement and interpretation of aerial photos in resource management. Introduction to Geographic Information Systems (GIS) using ArcGIS including digitizing, development and query of attribute tables, georeferencing, and use of multiple GIS layers in simple spatial analyses. Nonmajor graduate credit.

**ENSCI 360. Environmental Soil Science.**
(Cross-listed with AGRON). 2-3 Cr. 3. S. Prereq: AGRON 260 or GEOL 100 or 201
Burras and Killorn. Application of soil science to contemporary environmental problems; comparison of the impacts that different management strategies have on short- and long-term environmental quality and land development. Emphasis on participatory learning activities.

**ENSCI 381. Environmental Systems I: Introduction to Environmental Systems.**
(Dual-listed with 581). (Cross-listed with BIOL, ENV S, MICRO). 2-2 Cr. 3. F. Prereq: 12 credits of natural science including biology and chemistry Introduction to the structure and function of natural environmental systems. Systems approach to the analysis of material and energy flows in natural environmental systems and the primary environmental factors controlling these systems. Nonmajor graduate credit.

**ENSCI 382. Environmental Systems II: Analysis of Environmental Systems.**
(Dual-listed with 582). (Cross-listed with BIOL). 2-2 Cr. 3. S. Prereq: ENSCI 381
Continuation of ENSCI 381. Systems approach to the analysis of material and energy flows in natural environmental systems and the primary environmental factors controlling these systems. Nonmajor graduate credit.

**ENSCI 390. Internship in Environmental Science.**
Cr. arr. Repeatable. F.S.SS. Prereq: Approval of the Environmental Science coordinator
Supervised off-campus work experience in the field of environmental science. Offered on a satisfactory-fail basis only.

**ENSCI 391. Apprenticeship.**
Cr. arr. Repeatable. F.S.SS. Prereq: Approval of the Environmental Science Coordinator
Practical experience in an approved setting such as a research laboratory, government office, or private office. Offered on a satisfactory-fail basis only.

**ENSCI 402. Watershed Hydrology.**
(Dual-listed with 502). (Cross-listed with AGRON, GEOL, MTEOR, NREM). 3-3 Cr. 4. F. Prereq: Four courses in physical or biological sciences or engineering; junior standing
Examination of watersheds as systems, emphasizing the surface components of the hydrologic cycle. Combines qualitative understanding of hydrological processes and uncertainty with quantitative representation. Laboratory emphasizes field investigation and measurement of watershed processes. Nonmajor graduate credit.

I. Watershed Hydrology and Surficial Processes

**ENSCI 402I. Watershed Hydrology and Surficial Processes.**
(Cross-listed with AGRON, IA LL). Cr. 4. SS. Prereq: Four courses in physical or biological sciences or engineering
Effects of geomorphology, soils, and land use on transport of water and materials (nutrients, contaminants) in watersheds. Fieldwork will emphasize investigations of the Iowa Great Lakes watershed. Nonmajor graduate credit.
ENSCI 404. Global Change.  
(Dual-listed with 504). (Cross-listed with AGRON, ENV S, MTEOR). (3-0) Cr. 3. S. Prereq: Four courses in physical or biological sciences or engineering; junior standing  
Recent changes in global biogeochemical cycles and climate; models of future changes in the climate system; impacts of global change on agriculture, water resources and human health; ethical issues of global environmental change. Nonmajor graduate credit.

ENSCI 405. Environmental Biophysics.  
(Dual-listed with 505). (Cross-listed with AGRON, MTEOR). (3-0) Cr. 3. Alt. S., offered 2013. Prereq: MATH 165 or 182 or equivalent and some computer programming experience (any language)  
Hornbuckle. A description of the physical microenvironment in which organisms live. Emphasis on the movement of energy (heat and radiation) and mass (water and carbon) among organisms, the soil, and atmosphere. Applications to humans, other animals, plants, and plant communities. Nonmajor graduate credit.

ENSCI 406. World Climates.  
(Cross-listed with AGRON, MTEOR). (3-0) Cr. 3. F. Prereq: Agron/ MTEOR 206  
Arritt. Distribution and causes of different climates around the world. Effects of climate and climate variations on human activities including society, economy and agriculture. Current issues such as climate change and international efforts to assess and mitigate the consequences of a changing climate. Semester project and in-class presentation required. Nonmajor graduate credit.  
Meets International Perspectives Requirement.

ENSCI 407. Watershed Management.  
(Dual-listed with 507). (Cross-listed with ENV S, NREM). (3-3) Cr. 4. S. Prereq: A course in general biology  
Managing human impacts on the hydrologic cycle. Field and watershed level best management practices for modifying the impacts on water quality, quantity and timing are discussed. Field project includes developing a management plan using landscape buffers.

ENSCI 408. GIS and Natural Resources Management.  
(Dual-listed with 508). (Cross-listed with A E). (2-2) Cr. 3. F. Prereq: Working knowledge of computers and Windows environment  
Introduction to fundamental concepts and applications of GIS in natural resources management with specific focus on watersheds. Topics include: basic GIS technology, data structures, database management, spatial analysis, and modeling; visualization and display of natural resource data. Case studies in watershed and natural resource management using ArcView GIS.

ENSCI 409. Field Methods in Hydrogeology.  
(Dual-listed with 509). (Cross-listed with GEOI). (0-4) Cr. 2. Alt. SS., offered 2012. Prereq: 402 or 411 or C E 473  
Introduction to field methods used in groundwater investigations. In-field implementation of pumping tests, slug tests, monitoring well installation and drilling techniques, geochemical and water quality sampling, seepage meters, minipiezometers, stream gaging, electronic instrumentation for data collection, and geophysics. Field trips to investigate water resource, water quality, and remediation projects.

ENSCI 411. Hydrogeology.  
(Dual-listed with 511). (Cross-listed with GEOI). (3-2) Cr. 4. F. Prereq: GEOI 100 or 201; MATH 165 or 181; PHYS 111 or 221  
Physical principles of groundwater flow, nature and origin of aquifers and confining units, well hydraulics, groundwater modeling, and contaminant transport. Lab emphasizes applied field and laboratory methods for hydrogeological investigations. Nonmajor graduate credit.

(Dual-listed with 514). (Cross-listed with GEOL). (2-2) Cr. 3. Alt. S., offered 2012. Prereq: 411 or C E 473; MATH 165 or 181  
Introduction to the principles of modeling groundwater flow systems. Finite-difference and analytic-element methods, spreadsheet models, boundary conditions, calibration, sensitivity analysis, parameter estimation, particle tracking, and post-audit analysis. Application of MODFLOW to regional flow-system analysis. Computer laboratory emphasizes assigned problems that illustrate topics discussed in the course. Nonmajor graduate credit.

ENSCI 415. Paleoclimatology.  
(Dual-listed with 515). (Cross-listed with GEOL). (3-0) Cr. 3. Alt. S., offered 2013. Prereq: Four courses in biological or physical science  
Introduction to mechanisms that drive climate, including the interplay between oceanic and atmospheric circulation and fluctuation in Earth's orbital parameters. Examination and analysis of past climate records ranging from historical documentation to ecological and geochemical proxies (e.g. tree ring analysis; O and C isotopes of skeletal carbonates and soils). Dating methods used to constrain and correlate climatic periods, utility of computer models to reconstruct past climates and predict future climate change. Emphasis placed on paleoclimate and paleoecology of the late Quaternary (last ~1 million years). Nonmajor graduate credit.

ENSCI 416. Hydrologic Modeling and Analysis.  
(Dual-listed with 516). (Cross-listed with GEOL, MTEOR). (2-3) Cr. 3. Alt. S., offered 2013. Prereq: Four courses in Earth science, meteorology, or engineering; junior standing  
Study of the basic principles of hydrologic modeling, including rainfall-runoff analysis, lumped and distributed modeling, conceptual and physical models, parameter estimation and sensitivity analysis, input and validation data, uncertainty analysis, and the use of models in surface water hydrology. A range of common models are applied to study hydrologic topics such as flood forecasting and land use change impacts. Previous experience with Matlab or other programming language is needed. Nonmajor graduate credit.

(Dual-listed with 518). (Cross-listed with A ECL). (2-3) Cr. 3. Alt. F., offered 2011. Prereq: 468  
Biological, chemical, physical, and geological processes that determine the structure and function of flowing water ecosystems. Current ecological theories as well as applications to stream management for water quality and fisheries.

ENSCI 419. Environmental Geochemistry.  
(Dual-listed with 519). (Cross-listed with GEOL). (2-2) Cr. 3. F. Prereq: 402 or 411 or equivalent  
Geochemistry of natural waters and water-rock interactions. Acid-base equilibria, carbonate chemistry and buffer systems, mineral dissolution and precipitation, sorption, ion exchange, and redox reactions. Introduction to thermodynamics and kinetics. Laboratory emphasizes chemical analysis of waters and computer modeling. Nonmajor graduate credit.

ENSCI 422. Prairie Ecology.  
(Cross-listed with IA LL). Cr. 4. S. Prereq: Familiarity with basic principles in biological sciences and ecology  
Basic patterns and underlying physical and biotic causes of both regional and local distributions of plants and animals of North American prairies; field and laboratory analyses and projects. Nonmajor graduate credit.

ENSCI 424. Air Pollution.  
(Dual-listed with 524). (Cross-listed with A E, C E). (1-0) Cr. 1. Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above  
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.  
A. Air quality and effects of pollutants  
B. Climate change and causes  
C. Transportation constraints  
D. Off-gas treatment technology.
E. Agricultural sources of pollution

(Dual-listed with 526). (Cross-listed with GEOL). (3-0) Cr. 3. Alt. F., offered 2011. Prereq: Four courses in biological or physical science. Introduction to the theory, methods and applications of stable isotopes. Primary focus on the origin, natural abundance, and fractionation of carbon, hydrogen, oxygen, nitrogen isotopes. Applications of isotopic occurrence for elucidation of physical, chemical, biological, and environmental processes. Effects of plant physiology, photosynthesis, trophic structure, diffusion, evaporation, chemical precipitation, soil and atmospheric processes, and environmental factors on isotope abundance. Nonmajor graduate credit.

ENSCI 434. Contaminant Hydrogeology.

ENSCI 446. Integrating GPS and GIS for Natural Resource Management.
(Dual-listed with 546). (Cross-listed with NREM). (2-3) Cr. 3. S. Prereq: 12 credits in student’s major at 300 level or above, NREM 345 or equivalent experience with ArcGIS. Emphasis on the use of GPS as a data collection tool for GIS. Basic theory of GPS. Use of Global Positioning System technology for spatial data collection and navigation. Post-processing and real-time correction of GPS data. GPS data transfer to GIS for mapping applications. Use of GIS to construct waypoints for use in GPS navigation.

(Dual-listed with 551). (Cross-listed with GEOL). (2-2) Cr. 3. S. Prereq: GEOL 100 or 201, MATH 181 or equivalent experience or permission of instructor. Seismic, gravity, magnetic, resistivity, electromagnetic, and ground-penetrating radar techniques for shallow subsurface investigations and imaging. Data interpretation methods. Lab emphasizes computer interpretation packages. Field work with seismic- and resistivity-imaging systems and radars. Nonmajor graduate credit.

ENSCI 452. GIS for Geoscientists.
(Dual-listed with 552). (Cross-listed with AGRON, GEOL). (2-2) Cr. 3. F. Prereq: GEOL 100, GEOL 201 or equivalent. Introduction to geographical information systems (GIS) with particular emphasis on geoscientific data. Uses ESRI’s ArcGIS Desktop Software and extension modules. Emphasizes typical GIS operations and analyses in the geosciences to prepare students for advanced GIS courses. Nonmajor graduate credit.

ENSCI 459. Environmental Soil and Water Chemistry.
(Dual-listed with 559). (Cross-listed with AGRON). (3-3) Cr. 4. F. Prereq: AGRON 354 or ENSCI 360; Chem 164 or 178; MATH 140. CHEM 211 or 231 recommended. Thompson. An introduction to the chemical properties of soils, chemical reactions and transformations in soils and surface waters, and their impact on the environment. Topics include solution chemistry in soils and surface waters, solid-phase composition of soils, reactions at the solid-solution interface, and applications to contemporary environmental issues. Nonmajor graduate credit.

ENSCI 461. Introduction to GIS.
(Cross-listed with ENV S, IA LL, L A). Cr. 4. SS. Descriptive and predictive GIS modeling techniques, spatial statistics, and map algebra. Application of GIS modeling techniques to environmental planning and resource management. Nonmajor graduate credit.

ENSCI 463. Soil Formation and Landscape Relationships.
(Dual-listed with 563). (Cross-listed with AGRON). (2-4) Cr. 4. S. Prereq: 154 or 260. Relationships between soil formation, geomorphology, and environment. Soil description, classification, geography, mapping, and interpretation for land use. Two weekend field trips. Nonmajor graduate credit. Credit for one of EnSci 463 or 463I may be applied for graduation.

ENSCI 463I. Soil Formation and Landscape Relationships.

ENSCI 479. Surficial Processes.
(Dual-listed with 579). (Cross-listed with GEOL). (2-2) Cr. 3. F. Prereq: GEOL 100 or 201 or equivalent experience. Study of surficial processes in modern and ancient geological environments. Topics include weathering, sediment transport, and landform genesis with emphasis on fluvial, glacial, hillslope, eolian, and coastal processes. Applications to engineering and environmental problems. Laboratory emphasizes aerial photo and topographic map interpretation. Nonmajor graduate credit.

ENSCI 480. Engineering Analysis of Biological Systems.
(Cross-listed with BSE). (2-2) Cr. 3. F. Prereq: A E 216; MATH 266; BIOL 211 or 212; M E 231. Systems-level engineering analysis of biological systems. Economic and life-cycle analysis of bioresource production and conversion systems. Global energy and resource issues and the role of biologically derived materials in addressing these issues. Nonmajor graduate credit.

ENSCI 484. Ecosystem Ecology.
(Cross-listed with BIOL). (3-0) Cr. 3. S. Prereq: Combined 12 credits in biology and chemistry. Introduction of the study of ecosystems and the factors that influence their properties and dynamics. Conceptual foundations for ecosystem studies. Quantitative analyses of accumulations, transformations, and fluxes of nutrients, water, and energy within and among ecosystems.

ENSCI 485. Soil and Environmental Microbiology.
(Dual-listed with 585). (Cross-listed with AGRON, MICRO). (2-3) Cr. 3. F. Prereq: 402 or AGRON 154, MICRO 201 (MICRO 201L recommended). Loynachan. The living organisms in the soil and what they do. Emphasis on soil biota composition, the carbon cycle and bioremediation, soil-plant-microbial relationships, and environmental issues. Nonmajor graduate credit.

ENSCI 486. Aquatic Ecology.
(Cross-listed with 586). (Cross-listed with A ECL, BIOL). (3-0) Cr. 3. F. Prereq: BIOL 312 or ENSCI 381 or ENSCI 402 or NREM 301. Structure and function of aquatic ecosystems with application to fishery and pollution problems. Emphasis on lacustrine, riverine and wetland ecology. Nonmajor graduate credit.

L. Aquatic Ecology Laboratory

ENSCI 486L. Aquatic Ecology Laboratory.
(Dual-listed with 586L). (Cross-listed with A ECL, BIOL). (0-3) Cr. 1. F. Prereq: Concurrent enrollment in 486. Field trips and laboratory exercises to accompany 486. Hands-on experience with aquatic research and monitoring techniques and concepts. Nonmajor graduate credit.
ENSCI 487. Microbial Ecology.
(Dual-listed with 587). (Cross-listed with BIOL, MICRO). (3-0) Cr. 3. F. 
Prereq: Six credits in biology and 6 credits in chemistry 
Introduction to major functional groups of autotrophic and heterotrophic 
microorganisms and their roles in natural systems. Nonmajor graduate 
credit.

ENSCI 490. Independent Study.
Cr. arr. Repeatable. F.S.S. Prereq: Permission of the instructor and 
approval of the Environmental Science coordinator

ENSCI 495. Current Topics and Case Studies in Environmental 
Science.
Cr. 1-3. Prereq: Junior classification in Environmental Science, permission 
of instructor 
Current topics and case studies related to the analysis and management 
of environmental systems. Individual and/or group projects.

ENSCI 496. Travel Course.
Cr. arr. Repeatable. Prereq: Permission of instructor 
Extended field trips to study environmental topics in varied locations. 
Location and duration of trips will vary. Trip expenses paid by students. 
Check with department for current offerings. A. International Tour B. 
Domestic Tour.

ENSCI 498. Cooperative Education.
Cr. R. Repeatable. F.S.SS. Prereq: Permission of Environmental Science 
Coordinator 
Required of all cooperative education students. Students must register 
prior to commencing each work period.

Courses primarily for graduate students, 
open to qualified undergraduate students

ENSCI 502. Watershed Hydrology.
(Dual-listed with 402). (Cross-listed with GEOI, MTEOR). (3-3) Cr. 4. F. 
Prereq: Four courses in physical or biological sciences or engineering; 
junior standing 
Examination of watersheds as systems, emphasizing the surface compo-
nents of the hydrologic cycle. Combines qualitative understanding of 
hydrologic processes and uncertainty with quantitative representation. 
Laboratory emphasizes field investigation and measurement of water-
shed processes.

ENSCI 504. Global Change.
(Dual-listed with 404). (Cross-listed with AGRON, MTEOR). (3-0) Cr. 3. 
S. Prereq: Four courses in physical or biological sciences or engineering; 
junior, senior, or graduate standing 
Recent changes in global biogeochemical cycles and climate; models of 
future changes in the climate system, impacts of global change on agri-
culture, water resources and human health; ethical issues of global envi-
ronmental change.

ENSCI 505. Environmental Biophysics.
(Dual-listed with 405). (Cross-listed with AGRON, MTEOR). (3-0) Cr. 3. 
Alt. S., offered 2013. Prereq: MATH 165 or 182 or equivalent and some 
computer programming experience (any language) 
Hornbuckle, A description of the physical microenvironment in which 
organisms live. Emphasis on the movement of energy (heat and radia-
tion) and mass (water and carbon) among organisms, the soil, and 
atmosphere. Applications to humans, other animals, plants, and plant 
communities. Semester project required.

ENSCI 507. Watershed Management.
(Dual-listed with 407). (Cross-listed with NREM). (3-3) Cr. 4, S. Prereq: A 
course in general biology 
Managing human impacts on the hydrologic cycle. Field and watershed 
level best management practices for modifying the impacts on water 
quality, quantity and timing are discussed. Field project includes de-
veloping a management plan using landscape buffers.

ENSCI 507. Watershed Management.
(Dual-listed with 407). (Cross-listed with NREM). (3-3) Cr. 4, S. Prereq: A 
course in general biology 
Managing human impacts on the hydrologic cycle. Field and watershed 
level best management practices for modifying the impacts on water 
quality, quantity and timing are discussed. Field project includes de-
veloping a management plan using landscape buffers.

ENSCI 508. GIS and Natural Resource Management.
(Dual-listed with 408). (Cross-listed with AE). (2-2) Cr. 3. F. Prereq: 
Working knowledge of computers and Windows environment 
Introduction to fundamental concepts and applications of GIS in natural 
resources management with specific focus on watersheds. Topics 
include: basic GIS technology, data structures, database manage-
ment, spatial analysis, and modeling; visualization and display of natural 
resource data. Case studies in watershed and natural resource manage-
ment using ArcView GIS. In addition to other assignments, graduate 
students will prepare research literature reviews on topics covered in 
class and develop enterprise applications.

I. Aquatic Ecology

ENSCI 508I. Aquatic Ecology.
(Cross-listed with IA LL, NREM). Cr. 4. SS. Prereq: Courses in ecology, 
chemistry, and physics 
Analysis of aquatic ecosystems; emphasis on basic ecological principles; 
ecological theories tested in the field; identification of common plants 
and animals.

ENSCI 509. Field Methods in Hydrogeology.
(Dual-listed with 409). (Cross-listed with GEOI). (0-4) Cr. 2. Alt. SS., 
offered 2012. Prereq: 402 or 411 or C E 473 
Introduction to field methods used in groundwater investigations. In-field 
implementation of pumping tests, slug tests, monitoring well installation 
and drilling techniques, geochemical and water quality sampling, seepage 
meters, minipiezometers, stream gaging, electronic instrumentation for 
data collection, and geophysics. Field trips to investigate water resource, 
water quality, and remediation projects.

ENSCI 511. Hydrogeology.
(Dual-listed with 411). (Cross-listed with GEOI). (3-2) Cr. 4. F. Prereq: 
GEOI 100 or 201; MATH 165 or 181; PHYS 111 or 221 
Physical principles of groundwater flow, nature and origin of aquifers and 
confining units, well hydraulics, groundwater modeling, and contami-
nant transport. Lab emphasizes applied field and laboratory methods for 
hydrogeological investigations.

(Dual-listed with 414). (Cross-listed with GEOI). (2-2) Cr. 3. Alt. S., offered 
2012. Prereq: 411 or C E 473; MATH 165 or 181 
Introduction to the principles of modeling groundwater flow systems. 
Finite-difference and analytic-element methods, spreadsheet models, 
boundary conditions, calibration, sensitivity analysis, parameter estima-
tion, particle tracking, and post-audit analysis. Application of MODFLOW 
to regional flow-system analysis. Computer laboratory emphasizes 
assigned problems that illustrate topics discussed in the course.

ENSCI 515. Paleoclimatology.
(Dual-listed with 415). (Cross-listed with GEOI). (3-0) Cr. 3. Alt. S., offered 
2013. Prereq: Four courses in biological or physical science 
Introduction to mechanisms that drive climate, including the interplay 
between oceanic and atmospheric circulation and fluctuation in Earth’s 
orbital parameters. Examination and analysis of past climate records 
ranging from historical documentation to ecological and geochemical 
proxies (e.g. tree ring analysis; O and C isotopes of skeletal carbon- 
ates and soils). Dating methods used to constrain and correlate climatic 
periods; utility of computer models to reconstruct past climates and 
predict future climate change. Emphasis placed on paleoclimatology and 
paleoecology of the late Quaternary (last ~ 1 million years).
ENSCI 516. Hydrologic Modeling and Analysis.
(Dual-listed with 416). (Cross-listed with GEOL, MTEOR). (2-3) Cr. 3. Alt. S., offered 2013. Prereq: Four courses in earth science, meteorology, or engineering; junior standing
Study of the basic principles of hydrologic modeling, including rainfall-runoff analysis, lumped and distributed modeling, conceptual and physical models, parameter estimation and sensitivity analysis, input and validation data, uncertainty analysis, and the use of models in surface water hydrology. A range of common models are applied to study hydrologic topics such as flood forecasting and land use change impacts. Previous experience with Matlab or other programming language is needed.

(Dual-listed with 418). (Cross-listed with A ECL). (2-3) Cr. 3. Alt. F., offered 2011. Prereq: 486
Biological, chemical, physical, and geological processes that determine the structure and function of flowing water ecosystems. Current ecological theories as well as applications to stream management for water quality and fisheries.

ENSCI 519. Environmental Geochemistry.
(Dual-listed with 419). (Cross-listed with GEOL). (2-2) Cr. 3. F. Prereq: 511 or equivalent
Geochemistry of natural waters and water-rock interactions. Acid-base equilibria, carbonate chemistry and buffer systems, mineral dissolution and precipitation, sorption, ion exchange, and redox reactions. Introduction to thermodynamics and kinetics. Laboratory emphasizes chemical analysis of waters and computer modeling.

ENSCI 520. Environmental Engineering Chemistry.
(Cross-listed with C E). (2-3) Cr. 3. Prereq: CHEM 177 and 178, MATH 166 Principles of chemical and physical phenomena applicable to the treatment of water and wastewater and natural waters; including chemical equilibria, reaction kinetics, acid-base equilibria, chemical precipitation, redox reactions and mass transfer principles. Individual laboratory practicals and group projects required. Term paper and oral presentation for graduate level only.

ENSCI 521. Environmental Biotechnology.
(Cross-listed with C E). (2-2) Cr. 3. Prereq: C E 326
Fundamentals of biochemical and microbial processes applied to environmental engineering processes, role of microorganisms in wastewater treatment and bioremediation, bioenergetics and kinetics, metabolism of xenobiotic compounds, waterborne pathogens and parasites, and disinfection. Term paper and oral presentation.

ENSCI 522. Water Pollution Control Processes.
(Cross-listed with C E). (2-3) Cr. 3. Prereq: 521
Fundamentals of biochemical processes, aerobic growth in a single CSTR, multiple events in complex systems, and techniques for evaluating kinetic parameters; unit processes of activated sludge systems, attached growth systems, stabilization and aerated lagoon systems, biosolids digestion and disposal, nutrient removal, and anaerobic treatment systems.

ENSCI 523. Physical-Chemical Treatment Process.
(Cross-listed with C E). (2-3) Cr. 3. Prereq: C E 520
Material and energy balances. Principles and design of physical-chemical unit processes; including screening, coagulation, flocculation, chemical precipitation, sedimentation, filtration, lime softening and stabilization, oxidation, adsorption, membrane processes, ion exchange and disinfection; recovery of resources from residuals and sludges; laboratory exercises and demonstrations; case studies in mineral processing and secondary industries.

ENSCI 524. Air Pollution.
(Dual-listed with 424). (Cross-listed with A E, C E). (1-0) Cr. 1. Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

A. Air quality and effects of pollutants

(Dual-listed with 426). (Cross-listed with GEOL). (3-0) Cr. 3. Alt. F., offered 2011. Prereq: Four courses in biological or physical science
Introduction to the theory, methods and applications of stable isotopes. Primary focus on the origin, natural abundance, and fractionation of carbon, hydrogen, oxygen, nitrogen isotopes. Applications of isotopic occurrence for elucidation of physical, chemical, biological, and environmental processes. Effects of plant physiology, photosynthesis, trophic structure, diffusion, evaporation, chemical precipitation, soil and atmospheric processes, and environmental factors on isotope abundance.

ENSCI 527. Solid Waste Management.
(Cross-listed with C E). (3-0) Cr. 3. Prereq: C E 326 Planning and design of solid waste management systems; includes characterization and collection of domestic, commercial, and industrial solid wastes, waste minimization and recycling, energy and materials recovery, composting, incineration, and landfill design.

ENSCI 529. Hazardous Waste Management.
(Cross-listed with C E). (3-0) Cr. 3. Prereq: C E 326 Regulatory requirements for the classification, transport, storage and treatment of hazardous wastes. Analysis and design of alternatives for treatment and disposal technologies, including physical, chemical, and biological treatment, solidification, incineration, and secure landfill design. Regulatory requirements and procedures for hazardous waste contaminated site investigations and risk analysis. Analysis and design of remedial action alternatives for site restoration.

(Cross-listed with A E). (2-3) Cr. 3. F. Prereq: E M 378 or CH E 356 Hydrology and hydraulics in agricultural and urbanizing watersheds. Design and evaluation of systems for the conservation and quality preservation of soil and water resources. Use and analysis of hydrologic data in engineering design; relationship of topography, soils, crops, climate, and cultural practices in conservation and quality preservation of soil and water for agriculture. Small watershed hydrology, water movement and utilization in the soil-plant-atmosphere system, agricultural water management, best management practices, and agricultural water quality. Graduate students will prepare several research literature reviews on topics covered in the class in addition to the other assignments.

ENSCI 532. Erosion and Sediment Transport.
(Cross-listed with A E). (3-0) Cr. 3. Alt. F., offered 2012. Prereq: A E 422 or C E 372, MATH 266 Soil erosion processes, modified universal soil loss equation and its application to conservation planning, sediment properties, initiation of sediment motion and over land flow, flow in alluvial channels and theory of sediment transport, channel stability, reserves sedimentation, wind erosion, BMPs for controlling erosion.

ENSCI 534. Contaminant Hydrogeology.
(Dual-listed with 434). (Cross-listed with GEOL). (3-0) Cr. 3. S. Prereq: GEOL 511 or equivalent
(Cross-listed with EEOB, NREM). (2-3) Cr. 3. F. Prereq: BIOL 366 or 474 or graduate standing
Theory and practice of restoring animal and plant diversity, structure and function of disturbed ecosystems. Restored freshwater wetlands, forests, prairies and reintroduced species populations will be used as case studies.

I. Restoration Ecology

ENSCI 535I. Restoration Ecology.
(Cross-listed with A ECL, EEOB, IA LL). Cr. 4. Alt. SS., offered 2012. Prereq: A course in ecology
Ecological principles for the restoration of native ecosystems; establishment (site preparation, selection of seed mixes, planting techniques) and management (fire, mowing, weed control) of native vegetation; evaluation of restorations. Emphasis on the restoration of prairie and wetland vegetation.

ENSCI 546. Integrating GPS and GIS for Natural Resource Management.
(Dual-listed with 446). (Cross-listed with NREM). (2-3) Cr. 3. S. Prereq: 12 credits in student’s major at 300 level or above, NREM 345 or equivalent experience with ArcGIS
Emphasis on the use of GPS as a data collection tool for GIS. Basic theory of GPS. Use of Global Positioning System technology for spatial data collection and navigation. Post-processing and real-time correction of GPS data. GIS data transfer to GIS for mapping applications. Use of GIS to construct waypoints for use in GPS navigation.

(Dual-listed with 451). (Cross-listed with GEOL). (2-2) Cr. 3. S. Prereq: GEOL 100 or 201, MATH 181 or equivalent experience or permission of instructor
Seismic, gravity, magnetic, resistivity, electromagnetic, and ground-penetrating radar techniques for shallow subsurface investigations and imaging. Data interpretation methods. Lab emphasizes computer interpretation packages. Field work with seismic- and resistivity-imaging systems and radar.

ENSCI 552. GIS for Geoscientists.
(Dual-listed with 452). (Cross-listed with AGRON, GEOL). (2-2) Cr. 3. F. Prereq: GEOG 100, GEOL 201 or equivalent
Introduction to geographic information systems (GIS) with particular emphasis on geoscientific data. Uses ESRI’s ArcGIS Desktop Software and extension modules. Emphasizes typical GIS operations and analyses in the geosciences to prepare students for advanced GIS courses.

ENSCI 553. Soil-Plant Relationships.
(Cross-listed with AGRON). (3-0) Cr. 3. F. Prereq: AGRON 354 or equivalent
Killorn. Composition and properties of soils in relation to the nutrition and growth of plants.

ENSCI 558. Laboratory Methods in Soil Chemistry.
(Cross-listed with AGRON). (2-3) Cr. 3. Alt. F., offered 2012. Prereq: AGRON 354 and CHEM 178 or 211
Tabatabai. Experimental and descriptive inorganic and organic analyses. Operational theory and principles of applicable instruments, including spectrophotometry, atomic and molecular absorption and emission spectroscopy, mass spectrometry, X-ray diffraction and fluorescence, gas and ion chromatography, and ion-selective electrodes.

ENSCI 559. Environmental Soil and Water Chemistry.
(Dual-listed with 459). (Cross-listed with AGRON). (3-3) Cr. 4. F. Prereq: AGRON 354 or ENSCI 360; Chem 164 or 178; MATH 140. CHEM 211 or 231 recommended
Thompson. An introduction to the chemical properties of soils, chemical reactions and transformations in soils and surface waters, and their impact on the environment. Topics include solution chemistry in soils and surface waters, solid-phase composition of soils, reactions at the solid-solution interface, chemical-equilibrium speciation programs, and applications to contemporary environmental issues.

ENSCI 563. Soil Formation and Landscape Relationships.
(Dual-listed with 463). (Cross-listed with AGRON). (2-4) Cr. 4. S. Prereq: AGRON 154 or 260
Sandor. Relationships between soil formation, geomorphology, and environment. Soil description, classification, geography, mapping, and interpretation for land use. Two weekend field trips. Credit for only EnSci 563 or 563I may be applied for graduation.

I. Soil Formation and Landscape Relationships

ENSCI 563I. Soil Formation and Landscape Relationships.
(Dual-listed with 463I). (Cross-listed with AGRON, IA LL). Cr. 4. Alt. SS., offered 2012. Prereq: AGRON 154 or 260
Relationships between soil formation, geomorphology, and environment. Soil description, classification, geography, mapping, and interpretation for land use. Credit for only EnSci 563 or 563I may be applied for graduation.

ENSCI 564. Wetland Ecology.
(Cross-listed with AGRON, IA LL). Cr. 4. SS. Prereq: IA LL 311I

I. Wetland Ecology

ENSCI 564I. Wetland Ecology.
(Dual-listed with AGRON, IA LL). (Cross-listed with AGRON, IA LL). Cr. 4. SS. Prereq: IA LL 311I
Ecology, classification, creation, restoration, and management of wetlands. Field studies will examine the composition, structure and functions of local natural wetlands and restored prairie pothole wetlands. Individual or group projects.

ENSCI 571. Surface Water Hydrology.
(Cross-listed with C E). (3-0) Cr. 3. Prereq: C E 372
Analysis of hydrologic data including precipitation, infiltration, evapotranspiration, direct runoff and streamflow; theory and use of frequency analysis; theory of streamflow and reservoir routing; use of deterministic and statistical hydrologic models. Fundamentals of surface water quality modeling, point and non-point sources of contamination. Design project.

ENSCI 572. Analysis and Modeling Aquatic Environments.
(Cross-listed with C E). (3-0) Cr. 3. Prereq: C E 372
Principles of surface water flows and mixing. Introduction to hydrologic transport and water quality simulation in natural water systems. Advection, diffusion and dispersion, chemical and biological kinetics, and water quality dynamics. Applications to temperature, dissolved oxygen, primary productivity, and other water quality problems in rivers, lakes and reservoirs. Deterministic vs stochastic models.

(Cross-listed with C E). (3-0) Cr. 3. Prereq: C E 372

ENSCI 575. Soil Formation and Transformation.
(Cross-listed with AGRON). (3-0) Cr. 3. Alt. F., offered 2012. Prereq: 463 or equivalent
Advanced study of soil formation, emphasizing relationships among soils, landscapes, environment, humans, and land use.

ENSCI 577. Soil Physics.
(Cross-listed with AGRON). (3-0) Cr. 3. S. Prereq: Recommended: AGRON 354 and MATH 166
Horton. The physical soil system: the soil components and their physical interactions; transport processes involving water, air, and heat.

ENSCI 578. Laboratory Methods in Soil Physics.
(Cross-listed with AGRON). (3-0) Cr. 1. S. Prereq: 577 concurrent
Horton. Methods of measuring soil physical properties such as texture, density, and water content, and transport of heat, water, and gases.
ENSCI 579. Surfacial Processes.
(Dual-listed with 479). (Cross-listed with GEOL). (2-2) Cr. 3. F. Prereq: GEOL 100 or 201 or equivalent experience.
Study of surfacial processes in modern and ancient geological environments. Topics include weathering, sediment transport, and landform genesis with emphasis on fluvial, glacial hillslope, eolian, and coastal processes. Applications to engineering and environmental problems. Laboratory emphasizes aerial photo and topographic map interpretation.

(Dual-listed with 381). (Cross-listed with EEOB). (2-2) Cr. 3. F. Prereq: 12 credits of natural science including biology and chemistry.
Introduction to the structure and function of natural environmental systems. Systems approach to the analysis of material and energy flows in natural environmental systems and the primary environmental factors controlling these systems.

ENSCI 582. Environmental Systems II: Analysis of Environmental Systems.
(Dual-listed with 382). (2-2) Cr. 3. S. Prereq: ENSCI 581.
Continuation of ENSCI 581. Systems approach to the analysis of material and energy flows in natural environmental systems and the primary environmental factors controlling these systems.

ENSCI 584. Ecosystem Ecology.
(Cross-listed with EEOB). (3-0) Cr. 3. S. Alt. S., offered 2012. Prereq: Combined 12 credits in biology and chemistry.
Introduction to the study of ecosystems and the factors that influence their properties and dynamics. Conceptual foundations for ecosystem studies. Quantitative analyses of accumulations, transformations, and fluxes of nutrients, water, and energy within and among ecosystems.

ENSCI 585. Soil and Environmental Microbiology.
(Dual-listed with 485). (Cross-listed with AGRON, MICRO). (2-3) Cr. 3. F. Prereq: ENSCI 301 or 312 or 381 or 402.
Loynachan. The living organisms in the soil and what they do. Emphasis on soil biota composition, the carbon cycle and bioremediation, soil-plant-microbial relationships, and environmental issues.

ENSCI 586. Aquatic Ecology.
(Dual-listed with 486). (Cross-listed with EEOB). (3-0) Cr. 3. F. Prereq: ENSCI 581 or 301 or 312 or 381 or 402.
Structure and function of aquatic ecosystems with application to fishery and pollution problems. Emphasis on lacustrine, riverine and wetland ecology.

L. Aquatic Ecology Laboratory

ENSCI 586L. Aquatic Ecology Laboratory.
(Dual-listed with 486L). (Cross-listed with EEOB). (0-3) Cr. 1. F. Prereq: Concurrent enrollment in 586.
Field trips and laboratory exercises to accompany 586. Hands-on experience with aquatic research and monitoring techniques and concepts.

ENSCI 587. Microbial Ecology.
(Dual-listed with 487). (Cross-listed with EEOB, MICRO). (3-0) Cr. 3. F. Prereq: Six credits in biology and six credits in chemistry.
Introduction to major functional groups of autotrophic and heterotrophic microorganisms and their roles in natural systems.

ENSCI 590. Special Topics.
Cr. arr. Repeatable. F.S.S. Prereq: Permission of major professor in Environmental Science faculty.
Literature reviews and conference in accordance with needs and interest of the student.

ENSCI 599. Creative Component.
Cr. arr. Repeatable. F.S.S. Prereq: Permission of major professor in Environmental Science faculty.
Creative component for nonthesis master of science degree.
**Curriculum in Food Science - CALS**

Administered by the Department of Food Science and Human Nutrition

Students select one of the following options and complete all requirements for that option: food science and technology option, food science and industry option, or consumer food science option. Courses listed below are required for all of the options, except where specified by option below.

**Total Degree Requirement:** 120.5 cr.

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements. Only 65 cr. from a two-year institution may apply to the degree which may include up to 16 technical cr.; 9 P-NP cr. of electives; 2.00 minimum GPA.

**International Perspectives: 3 cr.**
**U.S. Diversity: 3 cr.**
**Communications/Library: 12.5 cr.**

Food science and technology option, and food science and industry option:

FS HN 421  Food Microbiology Laboratory  3
FS HN 472  Food Processing Laboratory  2

Consumer food science option:

Select at least 5 cr from:

FS HN 214  Scientific Study of Food & Advanced Food Preparation Laboratory
FS HN 265  Nutrition for Active and Healthy Lifestyles
FS HN 421  Food Microbiology Laboratory
FS HN 472  Food Processing Laboratory

Electives: 6-20 cr. Select from any university coursework to earn at least 120.5 total credits.
e-mail: genetics@iastate.edu

Genetics - Interdisciplinary

Interdepartmental Graduate Major

Undergraduate Preparation

Undergraduates wishing to prepare for graduate study in Genetics should elect courses in basic biology, chemistry at least through organic chemistry, one year of college-level physics, mathematics at least through calculus, at least one thorough course in basic transmission and molecular genetics, one semester of upper level statistics and one semester of upper level biochemistry. Incoming students who have not completed an upper level statistics course and an upper level biochemistry course prior to beginning in the program will take STAT 401 Statistical Methods for Research Workers and BBMB 404 Biochemistry I during their first year of graduate training. A waiver may be requested for these courses by providing appropriate documentation (catalog description and syllabus) to the committee showing completion of an upper level statistics and upper level biochemistry course equivalent to STAT 401 Statistical Methods for Research Workers and BBMB 404 Biochemistry I.

See Genetics - Undergraduate for information on a bachelor of science degree in Genetics.

Graduate Study

Work is offered for the master of science and doctor of philosophy degrees with a major in Genetics in fourteen cooperating departments: Agronomy; Animal Science; Biochemistry, Biophysics and Molecular Biology; Biomedical Sciences; Ecology, Evolution and Organismal Biology; Entomology; Food Science and Human Nutrition; Genetics, Development and Cell Biology; Horticulture; Plant Pathology; Natural Resource Ecology and Management; Statistics; Veterinary Microbiology and Preventive Medicine; and Veterinary Pathology.

The diversity of faculty in the Interdepartmental Genetics major ensures a broad, well-balanced education from the best instructors, while offering flexibility in choice of research area. Genetics faculty have strengths in many areas, from fundamental studies at the molecular, cellular, organismal, and population levels, to research with immediate practical application. Ongoing research projects span all the major areas of theoretical and experimental genetics, including genomics, molecular studies of gene regulation, gene mapping, genetics of disease, transposable element studies, developmental genetics, quantitative and statistical genetics, computational molecular biology, evolutionary genetics, and population genetics.

Students are admitted by the approval of the Chair after review by the Genetics Admissions Committee. Students are admitted either to participate in research rotations with several faculty before deciding on a major professor and laboratory, or by direct admission into a specific lab and department. First year students participating in rotations with Genetics faculty will take GENET 697 Graduate Research Rotation.

All Ph.D. candidates take a core curriculum comprising one course each from the following four categories and attend seminars and workshops as described:

Transmission Genetics
GDCB 510  Transmission Genetics
Molecular Genetics
GDCB 511  Molecular Genetics
Quantitative, Population, and Evolutionary Genetics
AN S 561  Population and Quantitative Genetics for Breeding
GBCB 561  and Population and Quantitative Genetics for Breeding
EEOB 562  Evolutionary Genetics
EEOB 563  Molecular Phylogenetics
EEOB 566  Molecular Evolution
EEOB 567  Empirical Population Genetics
GDCB 536  Statistical Genetics
Genomics, Bioinformatics and Statistical Genetics

AN S 556  Current Topics in Genome Analysis
BCB 544  Introduction to Bioinformatics
STAT 516  Statistical Design and Analysis of Gene Expression Experiments
BCB 567  Bioinformatics I (Fundamentals of Genome Informatics)
BCB 568  Bioinformatics II (Advanced Genome Informatics)
BCB 569  Bioinformatics III (Structural Genome Informatics)
BCB 570  Bioinformatics IV (Computational Functional Genomics and Systems Biology)
BCB 596  Genomic Data Processing
EEOB 540X Evolution of Developmental Processes (experimental course)

Students will take three research presentations (GENET 690 Graduate Student Seminar in Genetics), attend two genetics faculty seminar series (GENET 691 Faculty Seminar in Genetics), and participate in three Workshops in Genetics (GENET 591 Workshop in Genetics) during their training period. First-year graduate students will also take GENET 692 Conceptual Foundations of Genetics.

Students may elect a computational molecular biology specialty within the genetics major. This requires that the research project be in the field of computational molecular biology. IG majors will be expected to complete all of the courses required for the major, except that one semester of BCB 690 Student Seminar in Bioinformatics and Computational Biology can be substituted for GENET 690 Graduate Student Seminar in Genetics. Students will be expected to take additional courses in the area of specialization.

M.S. students will take the above core courses and seminars with the following changes: participate in two of the Workshops in Genetics (GENET 591 Workshop in Genetics) and present their research once (GENET 690 Graduate Student Seminar in Genetics). Additional coursework may be selected to satisfy individual interests or departmental requirements.

The course designator Genet applies to graduate courses taught by the interdepartmental major in Genetics.

Students wishing to minor in genetics must submit a complete application to the graduate program. Requirements for the successful completion of a minor at the Ph.D. or M.S. levels are: completion of three of the four categories of the common-core required lecture courses listed above. One semester of seminar in Genetics is recommended.

GENET 690  Graduate Student Seminar in Genetics 1
GENET 691  Faculty Seminar in Genetics 1
GENET 692  Conceptual Foundations of Genetics 1

One member of the POS committee must be a Genetics faculty member.

Student Outcomes: Most students awarded doctoral degrees continue their training as postdoctoral associates at major research institutions in the U.S. or abroad in preparation for research and/or teaching positions in academia, industry, or government. A few go directly to permanent research positions in industry. Many students awarded master’s degrees continue their training as doctoral students; however, some choose research support positions in academia, industry, or government. A more thorough list of outcomes is available at our web site.
Courses for graduate students

GENET 539. Ethics and Biological Sciences.
(2-0) Cr. 2. S.
Introduction to Bioethics through case study discussion and recent news events. Students read and discuss issues on animal moral theory and rights, animals used in research and teaching, cloning, human reproductive and stem cell research, human genetic screening, environmental ethics, world food and population issues, GMO, plant biotechnology, genetic patenting issues and honesty in science. Students present formal presentation on topic of choice. Offered on a satisfactory-fail basis only.

GENET 539. Ethics and Biological Sciences.
(2-0) Cr. 2. S.
Introduction to Bioethics through case study discussion and recent news events. Students read and discuss issues on animal moral theory and rights, animals used in research and teaching, cloning, human reproductive and stem cell research, human genetic screening, environmental ethics, world food and population issues, GMO, plant biotechnology, genetic patenting issues and honesty in science. Students present formal presentation on topic of choice. Offered on a satisfactory-fail basis only.

(Cross-listed with AGRON, AN S, BBMB, BCB, CH E, CPR E, EEB, HORT, M E, MICRO). Cr. arr.
Prereq: Graduate Classification
Professional, ethical and legal issues facing scientists and engineers in academia. Offered in modular format.
A. Responsible Conduct of Research. (Cr. 1.0). F.
B. Working with Industry. (Cr. 0.5).
C. Communications in Science. (Cr. 0.5). Alt S., offered 2011. Reading and reviewing manuscripts; publishing papers; oral and poster presentations.
D. Time Management and Mentoring. (Cr. 0.5). Alt F, offered 2012. Balancing life and career; mentoring; lab management.
E. The Interview Process. (Cr. 0.5). Alt S., offered 2012. Applying and interviewing for academia, industry and government.
F. Grant Writing. (Cr. 1.0). Alt F, offered 2011. Writing a winning proposal.
G. Teaching. (Cr. 0.5).
S. Ethical and legal issues in research.
S. Establishing productive collaborations with industry.

GENET 590. Special Topics.
Cr. arr. Repeatable. F.S.SS.
Contact individual faculty for special projects or topics. Graded.

GENET 591. Workshop in Genetics.
(1-0) Cr. 1. Repeatable. S. Prereq: Permission of instructor
Current topics in genetics research. Lectures by off-campus experts. Students read background literature, attend preparatory seminars, attend all lectures, meet with lecturers.

GENET 690. Graduate Student Seminar in Genetics.
(1-0) Cr. 1. Repeatable. F. Prereq: Permission of instructor
Research presentations by students to improve their ability to: orally present scientific work in a clear and meaningful way, critically evaluate oral presentations, and give and receive constructive criticism.

GENET 691. Faculty Seminar in Genetics.
(1-0) Cr. 1. Repeatable. F. Prereq: Permission of instructor
Faculty research seminars that introduce students to the variety of genetics research projects on campus and provide an opportunity for students to become engaged in the scientific presentation to the point where they can think critically and ask meaningful questions.

(1-0) Cr. 1. F. Prereq: Permission of instructor
Landmark papers in the development of genetics concepts. Papers are presented and discussions led by students, guided and mentored by the instructors. Instructors provide a broad overview and history of the development of fundamental concepts in genetics.
Genetics - Undergraduate

Alan M. Myers, Chair, Genetics Major Committee

Genetics is the scientific study of heredity. Understanding the basis of heredity is fundamental to all aspects of the life sciences, from the most basic molecular study to applied studies of agricultural species. At Iowa State University the study of the life sciences is interdepartmental, involving faculty in the basic, agricultural, and veterinary sciences. Faculty in 20 different departments are involved in genetics research. This large group of faculty presents a broad range of possibilities for students to learn from faculty who are at the forefront of research in many areas of genetics.

Undergraduate Study

Undergraduate study in genetics is jointly administered by three departments: the Department of Biochemistry, Biophysics, and Molecular Biology; the Department of Genetics, Development, and Cell Biology; and the Department of Ecology, Evolution, and Organismal Biology. Undergraduate degrees are offered through both the College of Agriculture and Life Sciences and the College of Liberal Arts and Science. Programs of study for genetics majors leading to a B.S. degree are available. A minor in genetics through the College of Agriculture and Life Sciences is also offered for students majoring in several areas of the life sciences.

Training in genetics may lead to employment in teaching, research, or a variety of health-related professions. Although some students find employment directly after their baccalaureate training, many students continue their education in graduate or professional programs. Students with the B.S. degree may find employment in the biotechnology, health, or food industries. Recent graduates have also developed careers in conservation biology, technical writing, science journalism, technical sales, business, and genetic counseling.

The required course work and associated electives provide students with the foundation in basic life sciences, mathematics, chemistry, and physics that is essential for professions involving modern biological/biomedical sciences. As part of these courses students develop skills in problem solving, critical thinking, writing, research-related activities in the biological sciences.

The respective communications and communication proficiency requirements of both colleges are met by an average of C or better in:

- ENGL 150 Critical Thinking and Communication 3
- ENGL 250 Written, Oral, Visual, and Electronic Composition 3
- or ENGL 250H Written, Oral, Visual, and Electronic Composition, Honors 3
- And one additional English writing course 3

The lowest grade acceptable in any of these courses is C. Students in the College of Agriculture and Life Sciences must also achieve a C or better in an oral communications course.

- SP CM 212 Fundamentals of Public Speaking 3
- or AGEDS 311 Presentation and Sales Strategies for Agricultural Audiences 3

A grade of C– or better is required in all biological science courses within the major and a cumulative GPA of at least 2.0 is required for graduation.

Specific entrance requirements for medical and health-related professions are established by the professional schools. Students interested in fulfilling pre-professional requirements for such professions as dentistry, human medicine, nursing, optometry, pharmacy, physical therapy, physicians assistant, and veterinary medicine can major in genetics while fulfilling the pre-professional requirements. (See Preprofessional Study.)

Graduate Study

Graduate study in genetics leading to the Master of Science and Doctor of Philosophy degrees is offered at ISU. Graduate study is organized as a separate interdepartmental graduate major from the undergraduate program. For more information on graduate study in genetics see: Genetics - Interdisciplinary.

Curriculum in Genetics - Requirements

In addition to basic degree requirements listed in the Curricula in Agriculture and Life Sciences, genetics majors must satisfy the following requirements:

1. 

- BIOL 211 Principles of Biology I 3
- BIOL 211L Principles of Biology Laboratory I 1
- BIOL 212 Principles of Biology II 3
- BIOL 212L Principles of Biology Laboratory II 1
- BIOL 312 Ecology 4
- BIOL 313 Principles of Genetics 3
- BIOL 313L Genetics Laboratory 1
- BIOL 314 Principles of Molecular Cell Biology 3
- BIOL 315 Biological Evolution 3
- MICRO 302 Biology of Microorganisms 3

2. 

- GEN 110 Genetics Orientation 1
- GEN 409 Molecular Genetics 3
- GEN 410 Analytical Genetics 3
- GEN 491 Undergraduate Seminar 1
- GEN 462 Evolutionary Genetics 3
- or EEOB 503 Molecular Phylogenetics 3

3. Eleven credits of calculus and Statistics including at least one course in each.

4. Three years of chemistry and biochemistry.

5. Ten credits of general college physics.

6. Six additional credits of biological science support electives chosen from an approved list.

The minor in genetics may be earned by completing:

- GEN 313 Principles of Genetics 3
- GEN 313L Genetics Laboratory 1
- BIOL 314 Principles of Molecular Cell Biology 3
- GEN 410 Analytical Genetics 3
- GEN 409 Molecular Genetics 3

And a minimum of two additional credits in Genetics at the 300 level or above. At least nine of these credits must be used only to fulfill the requirements of the minor.

A Genetics major may not double major or minor in Biology.

Curriculum in Genetics - Undergraduate Study

Undergraduate study in genetics is jointly administered by the Department of Biochemistry, Biophysics, and Molecular Biology, the Department of Genetics, Development, and Cell Biology, and the Department of Ecology, Evolution, and Organismal Biology.

Total Degree Requirement: 120 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.
**International Perspective: 3 cr.**
**U.S. Diversity: 3 cr.**

**Communication/Library:**
- C or better required (except for Lib 160).
  - ENGL 150: Critical Thinking and Communication 3
  - ENGL 250: Written, Oral, Visual, and Electronic Composition 3
  - LIB 160: Library Instruction 0.5
  - SP CM 212: Fundamentals of Public Speaking 3
  - or AGEDS 311: Presentation and Sales Strategies for Agricultural Audiences

**Advanced English Writing:**
Choose 3 credits from the following:
- ENGL 302: Business Communication 3
- ENGL 303: Free-Lance Writing for Popular Magazines 3
- ENGL 304: Creative Writing—Fiction 3
- ENGL 305: Creative Writing—Nonfiction 3
- ENGL 306: Creative Writing—Poetry 3
- ENGL 309: Report and Proposal Writing 3
- ENGL 310: Rhetorical Analysis 3
- ENGL 312: Biological Communication 3
- ENGL 313: Rhetorical Website Design 3
- ENGL 314: Technical Communication 3
- ENGL 315: Creative Writing—Screenplays 3
- ENGL 316: Creative Writing—Playwriting 3
- JL MC 347: Science Communication 3

**Humanities and Social Sciences: 6 crs**
- Humanities course 3
- Social Science course 3

**Ethics: 3 cr.**
3 cr. from approved list.

**Life Sciences: 6 cr.**
- BIOL 211: Principles of Biology I 3
- Approved Life Sciences course 3

**Mathematical Sciences: 11-12 cr.**
Complete at least one calculus course from MATH, minimum of 4 credits.
- MATH 160: Survey of Calculus 3
- MATH 165: Calculus I 4
- MATH 181: Calculus and Mathematical Modeling for the Life Sciences I 3
  - Complete at least one course from STAT, minimum of 3 credits. 3-4
  - STAT 102: Principles of Statistics 3
  - STAT 104: Introduction to Statistics 3
  - Complete at least one additional course from MATH or STAT, minimum of 4 credits. 4
- MATH 166: Calculus II 3
- MATH 182: Calculus and Mathematical Modeling for the Life Sciences II 3
- STAT 401: Statistical Methods for Research Workers 3

**Supporting Sciences: 31-32 cr.**
- CHEM 177: General Chemistry I 4
- CHEM 177L: Laboratory in General Chemistry I 1
- CHEM 178: General Chemistry II 3
- CHEM 178L: Laboratory in College Chemistry II 1
- CHEM 331: Organic Chemistry I 3
- CHEM 331L: Laboratory in Organic Chemistry I 1
- CHEM 332: Organic Chemistry II 3
- CHEM 332L: Laboratory in Organic Chemistry II 1
- PHYS 111: General Physics 4
- or PHYS 221: Introduction to Classical Physics I 1
- PHYS 112: General Physics 4
- or PHYS 222: Introduction to Classical Physics II 1

Choose one of the following options 6-7
- Option 1
  - BBMB 404: Biochemistry I
  - BBMB 405: Biochemistry II
  - BBMB 411: Techniques in Biochemical Research
- Option 2
  - CHEM 211: Quantitative and Environmental Analysis & CHEM 211L: and Quantitative and Environmental Analysis Laboratory
  - CHEM 325: Chemical Thermodynamics

**Genetics and Life Sciences: 36 cr.**
C- grade minimum; Minimum 2.0 GPA
- GEN 110: Genetics Orientation 1
- BIOL 211: Principles of Biology I 3
- BIOL 211L: Principles of Biology Laboratory I 1
- BIOL 212: Principles of Biology II 3
- BIOL 212L: Principles of Biology Laboratory II 1
- BIOL 312: Ecology 4
- GEN 313: Principles of Genetics 3
- GEN 313L: Genetics Laboratory 1
- BIOL 314: Principles of Molecular Cell Biology 3
- BIOL 315: Biological Evolution 3
- GEN 409: Molecular Genetics 3
- GEN 410: Analytical Genetics 3
- GEN 491: Undergraduate Seminar 1
- GEN 462: Evolutionary Genetics 3
- or EEOB 563: Molecular Phylogenetics 3
- MICRO 302: Biology of Microorganisms 3

**Advanced Sciences Electives: 6 cr.**
C- minimum grade; 6 cr. of advanced science electives from approved department list.

**Courses primarily for undergraduate students**

**GEN 110. Genetics Orientation.**
(1-0) Cr. 1. F.
Orientation to the area of genetics. For students considering a major in genetics. Specializations and career opportunities. Offered on a satisfactory-fail basis only.

**GEN 260. Human Heredity and Society.**
(3-0) Cr. 3. Alt. S., offered 2013. Prereq: One semester of college biology or ANTHR 202
A survey course in genetics for non-biology majors interested in heredity and its importance, and implications to self and society. Not recommended for those intending to take advanced courses in genetics. Credit for graduation will not be allowed for more than one of the following: Gen 260, 313, 320, Biol 313 and 313L and Agron 320.

**GEN 298. Cooperative Education.**
Cr. R. F.S.S.
Prereq: Permission of department cooperative education coordinator; sophomore classification
Required of all cooperative education students. Students must register for this course prior to commencing each work period.
GEN 308. Biotechnology in Agriculture, Food, and Human Health.
(3-0) Cr. 3. F.S.S. Prereq: BIOL 211 and 212

(Cross-listed with BIOL). (3-0) Cr. 3. F.S.SS. Prereq: BIOL 211, 211L, 212, and 212L
Introduction to the principles of transmission and molecular genetics of plants, animals, and bacteria. Recombination, structure and replication of DNA, gene expression, cloning, quantitative and population genetics. Credit for graduation will not be allowed for more than one of the following: Gen 260, Gen 313 and 313L, Gen 320, Biol 313 and 313L, and Agron 320.

L. Genetics Laboratory

GEN 313L. Genetics Laboratory.
(Cross-listed with BIOL). (0-3) Cr. 1. F.S. Prereq: Credit or enrollment in 313
Laboratory to accompany 313. Students may receive graduation credit for no more than one of the following: Biol 313 and 313L, Gen 260, Gen 313, Gen 320, and Agron 320.

GEN 320. Genetics, Agriculture and Biotechnology.
(Cross-listed with AGRON). (3-0) Cr. 3. F.S. Prereq: BIOL 212
Lee and Salas Transmission genetics with an emphasis on applications in agriculture, the structure and expression of the gene, how genes behave in populations and how recombinant DNA technology can be used to improve agriculture. Credit for graduation will not be allowed for more than one of the following: Gen 260, 313, 320 and Biol 313 and 313L.

(3-0) Cr. 3. Alt. S., offered 2012. Prereq: BIOL 313 or GEN 313
Fundamental concepts and current issues of human genetics. Human chromosome analysis, pedigree analysis, gene mapping, the human genome project, sex determination, genetics of the immune system, genetics of cancer, gene therapy, the genetic basis of human diversity, eugenics.

GEN 398. Cooperative Education.
Cr. arr. Repeatable, maximum of 9 credits. Prereq: 313, junior or senior classification
R. Genetics research. Cr. 1 to 5 each time taken.
S. Attendance and critique of genetics seminars. Cr. 1. Offered on a satisfactory-fail grading basis only.
U. Laboratory teaching experience. For students registering to be undergraduate laboratory assistants. Cr. 1 to 2. Offered on a satisfactory-fail grading basis only.

GEN 399. Undergraduate Seminar.
(1-0) Cr. 1. F. Prereq: Junior classification
The investigation of current issues in genetics. Graduate school and employment opportunities discussed. Practice in resume writing and interview techniques. Required for majors in genetics.

GEN 409. Molecular Genetics.
(3-0) Cr. 3. F. Prereq: BIOL 314
The principles of molecular genetics: gene structure and function at the molecular level, including regulation of gene expression, genetic rearrangement, and the organization of genetic information in prokaryotes and eukaryotes. Nonmajor graduate credit.

GEN 410. Analytical Genetics.
(3-0) Cr. 3. S. Prereq: 313 or BIOL 313, GEN 409

GEN 444. Introduction to Bioinformatics.
(Cross-listed with BCB, BCBIO, BIOL, COM S, CPR E). (4-0) Cr. 4. F. Prereq: MATH 165 or STAT 401 or equivalent
Broad overview of bioinformatics with a significant problem-solving component, including hands-on practice using computational tools to solve a variety of biological problems. Topics include: database searching, sequence alignment, gene prediction, RNA and protein structure prediction, construction of phylogenetic trees, comparative and functional genomics, systems biology. Nonmajor graduate credit.
Global Resource Systems is a cutting-edge, interdisciplinary, college-wide major that prepares students to make a difference in the world. This major is offered by the College of Agriculture and Life Sciences. The major emphasizes global and cross-cultural engagement while equipping students with a strong technical competency in a resource area of their choice. The interdisciplinary program is designed to prepare students to work on complex global resource issues through leadership positions in global businesses, governmental agencies engaged in international trade and development, non-governmental organizations and globally engaged foundations, educational institutions, and volunteer organizations. It aims to produce systemic thinkers and problem solvers with a global perspective who are trained in resource issues and able to lead teams representing high levels of cultural diversity. Students interested in this major are encouraged to contact the Faculty Coordinator at globe@iastate.edu.

Undergraduate Study
The Global Resource Systems undergraduate major employs a truly interdisciplinary and systemic approach to understanding complex global resource issues. The major allows students to develop a core set of technical competencies in a resource area selected from among the 23 minors and certificates offered by the College of Agriculture and Life Sciences. Students choose a world region in which to specialize, develop competency in a relevant world language, participate in a significant cross-cultural living and working immersion experience in their chosen world region, and carry out a senior project related to their resource specialization within the context of the world region.

Multidisciplinary themes are developed in the context of the physical, biological and sociological factors affecting global resource systems. In this context, resource systems include agricultural (including crops, livestock and aquaculture), food, fuel, natural, environmental, biological, financial, governmental, institutional, human, knowledge, and other resources. Graduates of this program have transnational leadership skills and are successful integrators of various specializations on a team. They are skilled in developing a systemic perspective and accomplished at solving complex global resource systems problems. A degree in Global Resource Systems opens the door to employment opportunities in the many businesses and organizations that require globally competent employees.

Curriculum in Global Resource Systems
Administered by a supervisory committee in the College of Agriculture and Life Sciences. Students choose a region of the world to develop an expertise; they choose a language to learn and develop proficiency through the intermediate level; they choose and possess an area of technical expertise by completing a minor or certificate program in the College of Agriculture and Life Sciences; they complete a required internship in an international setting; and they select and complete a senior research project with faculty mentoring.

Total Degree Requirement: 128.5 cr.
Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

Courses for undergraduate students

GLOBE 110. Orientation.
(1-0) Cr. 1. F
An introduction to Global Resource Systems (GRS) program. University and career acclimation, development of educational and professional skills, participation in GRS Learning Community.

(3-0) Cr. 3. F,S
A comparative analysis of global resources and the various natural and human systems affecting those resources.

(1-0) Cr. 1. Repeatable, maximum of 3 credits. F.S. Prereq: credit or enrollment in 201
Discussion of topics of current importance in global resource systems. Offered on a satisfactory-fail basis only. A maximum of 3 credits of 211 may be used towards degree requirements.

GLOBE 220. Globalization and Sustainability.
(Cross-listed with ANTHR, ENV S, M E, MAT E, SOC, T SCI) (3-0) Cr. 3. F,S
An introduction to understanding the key global issues in sustainability. Focuses on interconnected roles of energy, materials, human resources, economics, and technology in building and maintaining sustainable systems. Applications discussed will include challenges in both the developed and developing world and will examine the role of technology in a resource-constrained world. Cannot be used for technical elective credit in any engineering department.

Meets International Perspectives Requirement.

GLOBE 221. Apprenticeship.
Cr. R. Repeatable. F.S.S.S. Prereq: Approval by the Global Resource Systems Faculty Coordinator
Practical work experience in approved domestic or international settings such as with a company, research laboratory, governmental agency or non-governmental organization. Offered on a satisfactory-fail basis only.

GLOBE 290. Independent Study.
Cr. 1-2. Repeatable. F.S.S.S. Prereq: Permission of the instructor and approval by the Global Resource Systems Faculty Coordinator
Independent study on topics of special interest to the student. Comprehensive report required. Intended primarily for freshmen and sophomores.

H. Honors

(2-2) Cr. 3. S. Prereq: 201, ECON 101 or 102
In-depth analysis of the opportunities, constraints and consequences of the resource systems common in industrialized nations. Topics integrate natural resources with land tenure, societal structure, food security, agriculture, shelter, energy and wealth dynamics.

(2-2) Cr. 3. F. Prereq: 201, ECON 101 or 102
In depth appraisal of resource systems common throughout the developing world. Topics integrate natural resources with land tenure, societal structure, food security, agriculture, shelter, energy and wealth dynamics.

GLOBE 321. Internship - Global.
Cr. 3-6. Repeatable. Prereq: Junior or Senior and enrollment in Global Resource Systems major; permission of the instructor and approval by the Global Resource Systems Faculty Coordinator
A supervised learning experience including an analysis of an international location's resource system via immersion in a foreign culture lasting at least five weeks. The experience should focus on the region consistent with the student's degree track. A maximum of 12 credits of 321 and 322 may be used for degree requirements.

GLOBE 322. Internship - United States.
Cr. 3-6. Repeatable. Prereq: Junior or Senior and enrollment in Global Resource Systems major; permission of the instructor and approval by the Global Resource Systems Faculty Coordinator
A supervised learning experience including an analysis of a domestic location's resource system via immersion in a different culture within the United States lasting at least five weeks. Designed for international students and for students who are not in a position to leave the United States. A maximum of 12 credits of 321 and 322 may be used for degree requirements.

GLOBE 385. Economic Development.
(Cross-listed with ECON). (3-0) Cr. 3. Prereq: ECON 101, 102
Current problems of developing countries, theories of economic development, agriculture, and economic development, measurement and prediction of economic performance of developing countries, alternative policies and reforms required for satisfying basic needs of Third World countries, interrelationships between industrialized countries and the developing countries, including foreign aid. Nonmajor graduate credit.

Meets International Perspectives Requirement.

GLOBE 401. Senior Project.
Cr. 3. F.S. Prereq: Senior classification in Global Resource Systems
Research project in collaboration with faculty that complements and furthers a student's experiences from GLOBE 321 and 322 while simultaneously bringing into focus entire four-year experience. Student will write a research report and make either an oral or poster presentation.

H. Honors

GLOBE 402. Responses to Global Resource System Challenges.
(1-4) Cr. 3. S
Capstone analysis of critical challenges facing global resources and, especially, identification of alternative solutions.

GLOBE 446. International Issues and Challenges in Sustainable Development.
(Cross-listed with AGRON, INTST). Cr. 4. S. Prereq: 3-credit biology course, Sophomore or higher classification, permission of Instructor Mullen. Interdisciplinary study and analysis of agricultural, biophysical, environmental, sociological, economical, political, and historical factors affecting sustainable development of communities and countries from art and science perspectives. International field experience with foreign language training required. A program fee is charged to students for international study abroad.

Meets International Perspectives Requirement.

GLOBE 490. Independent Study.
Cr. 1-4. Repeatable. F.S.S.S. Prereq: Permission of the instructor and approval by the Global Resource Systems Faculty Coordinator
Independent study on topics of special interest to the student. Comprehensive report required. Intended primarily for juniors and seniors. A maximum of 4 credits may be used for degree requirements.

A. General
E. Entrepreneurship
H. Honors
Z. Service Learning

GLOBE 495. Global Resource Systems Study Abroad Course Preparation.
(1-0) Cr. 1. Repeatable. F.S. Prereq: Permission of instructor
Global resource systems topics will include the agricultural industries, climate, crops, culture, economics, food, geography, government, history, livestock, marketing, natural resources, public policies, soils, and preparation for travel to locations to be visited. Students enrolled in this course intend to register for GLOBE 496 or 497 the following term.
GLOBE 496. Global Resource Systems Study Abroad.
Cr. 2-4. Repeatable. F.S.S. Prereq: Permission of instructor
Extended field trips abroad to study global resource systems. Location and duration of trips will vary. Pre-trip sessions arranged through GLOBE 495. Trip expenses paid by students.

GLOBE 497. Deans Global Ag and Food Leadership Program.
Cr. 1-4. Repeatable. F.S.S. Prereq: Permission of instructor
An integrated agricultural and food production and policy program that allows students to assess, analyze and evaluate complex, country-specific situations and to develop their skills, knowledge and abilities via team-oriented projects that involve complex issues such as development of effective foreign food aid and agricultural and food production systems, drivers of world hunger, sustainable resource management and efficacy of policy, and the role of the USA and the United Nations and other development agencies in these systems. International location and duration of program will vary. Pre-trip sessions arranged through GLOBE 495. Trip expenses paid by students.

GLOBE 499. Undergraduate Research.
Cr. arr. F.S. Prereq: Permission of the instructor and approval by the Global Resource Systems Faculty Coordinator
Research projects in collaboration with faculty.
Horticulture

Undergraduate Study

To meet the educational needs of a student population with interests ranging from landscape design/installation to fruit and vegetable production to golf course construction and management, considerable flexibility is built into the horticulture curriculum. And the diversity of interests and need for flexibility is reflected in the impressive array of horticulture courses.

The Department of Horticulture offers six options within the horticulture major:

1. Landscape Design, Installation, and Management
2. Horticulture Food Crop Production and Management
3. Ornamental Plant Production and Garden Center Management
4. Public Horticulture
5. Science
6. Turfgrass Management

Graduates possess the technical knowledge and skills to become professional horticulturists. They understand principles of life science, plant growth and development, and are familiar with cultural and management principles for a wide assortment of horticultural crops. They are able to work and communicate effectively with fellow horticultural professionals and with other citizens who share an interest in horticulture. Graduates also understand the ethical and environmental dimensions of problems and issues facing horticultural professionals.

A degree in horticulture opens the door to employment opportunities with production nurseries, seed companies, interior landscaping firms, greenhouses, garden centers, conservatories, landscape design/installation firms, public gardens and arboreta, orchards and vineyards, food processing companies, vegetable farms, golf courses, sports fields, sod production companies, and lawn care businesses. Several allied plant-science industries also provide employment opportunities in the areas of sales, management, and communication. Opportunities exist for careers in research, teaching, extension, and business after obtaining advanced training in graduate school.

Minor

The Department of Horticulture offers work for a minor in horticulture that is earned by taking HORT 221 Principles of Horticulture plus 12 additional credits with a maximum of 3 credits at the 200-level and a minimum of 9 credits at the 300-level or above.

Visit our departmental website at www.hort.iastate.edu.

Graduate Study

The graduate major in horticulture leads to the M.S. (thesis required) and Ph.D. A nonthesis master’s degree is offered through the master of agriculture program. Some faculty members of the department serve as major professors for students in interdepartmental graduate majors in plant biology; genetics; molecular, cellular, and developmental biology; ecology and evolutionary biology; sustainable agriculture; and environmental science.

Graduates possess a broad understanding of horticulture and the allied plant sciences. They are able to communicate effectively with members of the scientific community, industry groups, and other interested citizens. They are experienced in conducting research and communicating the results from that research. They. are capable of addressing and solving complex problems that confront the many horticultural, agricultural, and plant science professions. They also understand the ethical, legal, social, and environmental issues associated with modern agricultural/horticultural practices.

Curriculum in Horticulture

Students majoring in horticulture will select an option in which to specialize before reaching junior standing and will fulfill the requirements described below under Specialization Options.

A horticulture minor is available. The requirements appear under Horticulture, Courses and Programs.

Total Degree Requirement: 128.5 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.

3 cr. from approved list

U.S. Diversity: 3 cr.

3 cr. from approved list

Communications Proficiency (with a C or better):

- English composition 3 cr.
- Speech fundamentals 3 cr.

Communication/Library:

- ENGL 150 Critical Thinking and Communication 3 cr.
- ENGL 250 Written, Oral, Visual, and Electronic Composition 3 cr.
- SP CM 212 Fundamentals of Public Speaking 3 cr.
- STAT 226 or AGEDS 311 Introduction to Business Statistics I 3 cr.
- ENGL 314 Presentation and Sales Strategies for Agricultural Audiences 3 cr.
- LIB 160 Business Communication 3 cr.
- ENGL 314 Technical Communication 3 cr.
- LIB 160 Library Instruction 0.5 cr.

Humanities and Social Sciences: 6 cr.

- BIOL 101 Humanities course 3 cr.
- BIOL 301 Approved Social Science course 3 cr.

Total Credits 6 cr.

Ethics: 3 cr.

3 cr. from approved list.

Life Sciences: 6 cr.

- BIOL 111 Principles of Biology I 3 cr.
- BIOL 301 Approved Life Sciences course 3 cr.

Total Credits 6 cr.

Mathematical Sciences: 6 cr.

One of the following:
- MATH 140 College Algebra 3 cr.
- MATH 150 Discrete Mathematics for Business and Social Sciences 3 cr.
- MATH 165 Calculus I 3 cr.
- MATH 181 Calculus and Mathematical Modeling for the Life Sciences I 3 cr.

One of the following:
- STAT 101 Principles of Statistics 3 cr.
- STAT 201 Introduction to Statistics 3 cr.
- STAT 226 Introduction to Business Statistics I 3 cr.
- STAT 401 Statistical Methods for Research Workers 3 cr.

Total Credits 6 cr.

Physical Sciences: 13 cr.

One of the following:
- CHEM 163 College Chemistry 5 cr.
- & CHEM 163L and Laboratory in College Chemistry 5 cr.
- CHEM 177 General Chemistry I 5 cr.
- & CHEM 177L and Laboratory in General Chemistry I 5 cr.
One of the following:

- CHEM 231 Elementary Organic Chemistry
- & CHEM 231L and Laboratory in Elementary Organic Chemistry
- CHEM 331 Organic Chemistry I
- & CHEM 331L and Laboratory in Organic Chemistry I

One of the following:

- PHYS 106 The Physics of Common Experience
- or PHYS 111 General Physics
- CHEM 178 General Chemistry II
- & CHEM 178L and Laboratory in College Chemistry II

Total Credits: 13

Biological Sciences: 18 cr.

- BIOL 211 Principles of Biology I
- BIOL 211L Principles of Biology Laboratory I
- BIOL 212 Principles of Biology II
- BIOL 212L Principles of Biology Laboratory II

Ten credit hours from the following:

- AGRON 260 Soils and Environmental Quality
- AGRON 316 Crop Structure-Function Relationships
- AGRON 317 Principles of Weed Science
- AGRON 354 Soils and Plant Growth
- AGRON 354L Soils and Plant Growth Laboratory

Total Credits: 10

Soil Sciences: 3 cr.

- AGRON 154 Fundamentals of Soil Science
- or AGRON 155 Soils for Horticultural Scientists

Total Credits: 3

Electives

No more than 4 cr. of ECON 297 Internship may count toward graduation.

Options

Public Horticulture option: 12 cr.

- ENGL 314 Technical Communication
- And 9 credit hours from the following:
  - ACCT 284 Financial Accounting
  - ACCT 285 Managerial Accounting
  - AGEDS 401 Planning Agriculture and Life Sciences Education Programs
  - ECON 334 Entrepreneurship in Agriculture
  - COMST 102 Introduction to Interpersonal Communication
  - COMST 214 Professional Communication
  - ENGL 220 Descriptive English Grammar

Horticultural Food Crop Production and Management option: 12 cr.

Required courses:

- HORT 422 Postharvest Technology
- HORT 461 Fruit and Nut Crop Production and Management
- HORT 471 Vegetable Production and Management

Electives:

- ACCT 284 Financial Accounting
- ACCT 285 Managerial Accounting
- ACCT 316 Business Law

Science option: 12 cr.

- Mathematical Sciences Requirement: 4
  - MATH 165 Calculus I
  - or MATH 181 Calculus and Mathematical Modeling for the Life Sciences I

- Physical Sciences Requirement:
  - CHEM 177 General Chemistry I
  - CHEM 177L Laboratory in General Chemistry I
  - CHEM 177 General Chemistry II
  - CHEM 178L Laboratory in College Chemistry II
  - CHEM 331 Organic Chemistry I
  - CHEM 331L Laboratory in Organic Chemistry I
  - CHEM 332 Organic Chemistry II
  - CHEM 332L Laboratory in Organic Chemistry II
  - PHYS 111 General Physics
  - or PHYS 112 and General Physics

- BBMB 301 Survey of Biochemistry
- or BBMB 404 Biochemistry I

- MATH 166 Calculus II
- or MATH 182 Calculus and Mathematical Modeling for the Life Sciences II

And five credit hours from the following:
BBMB 404 Biochemistry I
BBMB 405 Biochemistry II
BBMB 411 Techniques in Biochemical Research
BIOL 313 Principles of Genetics
BIOL 313L Genetics Laboratory
BIOL 314 Principles of Molecular Cell Biology
BIOL 315 Biological Evolution

CHEM 211 Quantitative and Environmental Analysis
CHEM 211L Quantitative and Environmental Analysis Laboratory
CHEM 316 Instrumental Methods of Chemical Analysis

CHEM 316L Instrumental Analysis Laboratory
CHEM 321L Laboratory in Physical Chemistry
CHEM 322L Laboratory in Physical Chemistry
CHEM 324 Introductory Quantum Mechanics

COM S 107 Applied Computer Programming
COM S 207 Fundamentals of Computer Programming
GEN 409 Molecular Genetics
GEN 410 Analytical Genetics

**Ornamental Plant Production and Garden Center Management: 12 cr.**

The following are courses that must be taken to meet Horticulture requirements:

HORT 240 Trees, Shrubs, and Woody Vines for Landscaping 3
HORT 232 Plant Propagation 3
HORT 330 Herbaceous Ornamental Plants 3
HORT 332 Greenhouse Operation, Management, and Crop Production I 4
HORT 342 Landscape Installation and Establishment 2
HORT 442 Postharvest Technology 4
HORT 442 Nursery Production and Management 6
HORT 442 Nursery Production and Management II 6

Nine credit hours from the following: 9

ACCT 284 Financial Accounting
ACCT 215 Legal Environment of Business
ACCT 285 Managerial Accounting
ACCT 316 Business Law
AGRON 206 Introduction to Weather and Climate

COM S 103 Computer Applications
ECON 101 Principles of Microeconomics
ECON 102 Principles of Macroeconomics
ECON 230 Farm Business Management
ECON 234X Small Business Management (Experimental Course)

MGMT 370 Management of Organizations
MGMT 371 Organizational Behavior
MKT 340 Principles of Marketing
MKT 343 Personal Sales
MKT 442 Sales Management
MKT 447 Fundamentals of Consumer Behavior

Total Credits 33

BBMB 221 Structure and Reactions in Biochemical Processes may be substituted for CHEM 231 Elementary Organic Chemistry/CHEM 231L Laboratory in Elementary Organic Chemistry in this option.

**Courses primarily for undergraduate students**

HORT 110. Orientation in Horticulture.

(1-0) Cr. 1 F.
Introduction to the field of horticulture.
Horticulture Physiology. (3-0) Cr. 3. F. Prereq: 221 or BIOL 211
Principles of plant physiology relating to growth and development of horticultural plants including plant water relations, membrane transport, photosynthesis, photomorphogenesis, respiration, and phytohormones. Emphasis on plant’s responses to environmental factors (temperature, water, and light) including cellular and whole-plant physiology under stressful environments.

Horticulture Physiology. (3-0) Cr. 3. F. Prereq: 221 or BIOL 211
Principles of plant physiology relating to growth and development of horticultural plants including plant water relations, membrane transport, photosynthesis, photomorphogenesis, respiration, and phytohormones. Emphasis on plant’s responses to environmental factors (temperature, water, and light) including cellular and whole-plant physiology under stressful environments.

HORT 322. Plant Propagation. (2-2) Cr. 3. S. Prereq: 221 or BIOL 211
Fundamental principles underlying sexual and asexual propagation of plants; practice in reproducing plants by use of seeds, leaves, stems, and roots.

HORT 330. Herbaceous Ornamental Plants. (2-2) Cr. 3. S. Prereq: 221 or by permission of instructor
Identification, botanical characteristics, origins, propagation, uses and general culture of herbaceous annual and perennial plants for Midwestern gardens and landscapes.

HORT 332. Greenhouse Operation, Management, and Crop Production I. (3-3) Cr. 4. F. Prereq: 221
Operation and management of greenhouses and other controlled environment agriculture structures. Methods of monitoring and manipulating environmental, cultural, and management factors such as light, temperature, fertility, substrate, etc., to maximize production efficiency. Emphasis placed on the production of several ornamental and food crops. Greenhouse design and specification project required. Field trips required. Nonmajor graduate credit.

HORT 333. Seed Science and Technology. (Cross-listed with AGRON). (3-0) Cr. 3. F. Prereq: AGRON 114 or HORT 221, BIOL 211
Goggi. Seed production, maturation, dormancy, vigor, deterioration, and related aspects of enhancement, conditioning, storage, and quality evaluation. Aspects of the seed industry and regulation of seed marketing.

HORT 341. Woody Plant Cultivars: Shade Trees, Ornamental Trees and Woody Shrubs. (2-0) Cr. 2. S. Prereq: 240 or L A 221 or L A 222
Cultivars of the most prevalent and economically important woody landscape plants will be taught. The importance of cultivars to the nursery and landscaping professions and suggestions for their proper usage will be discussed.

HORT 342. Landscape Installation and Establishment. (2-0) Cr. 2. F. Prereq: 240 or L A 221 or L A 222
Principles and practices involved with establishment of managed landscapes. Laboratory work involves site evaluation, installation techniques, postplant care, and maintenance of established landscape plants.

HORT 351. Turfgrass Establishment and Management. (Cross-listed with AGRON). (3-0) Cr. 3. F. Prereq: 221 or AGRON 114 or BIOL 211
Principles and practices of turfgrass propagation, establishment, and management. Specialized practices relative to professional lawn care, golf courses, athletic fields, highway roadsides, and seed and sod production. The biology and control of turfgrass pests. Nonmajor graduate credit.

L. Turfgrass Establishment and Management Laboratory
HORT 351. Turfgrass Establishment and Management Laboratory.
(Cross-listed with AGRON). (0-3) Cr. 1. F. Prereq: Credit or enrollment in 351
Those enrolled in the horticulture curriculum are required to take 351L in
conjunction with 351 except by permission of the instructor. Nonmajor
graduate credit.

HORT 354. Soils and Plant Growth.
(Cross-listed with AGRON). (3-0) Cr. 3. F. Prereq: BIOL 101 or 211
Killorn or Loynachan. Effects of chemical, physical, and biological proper-
ties of soils on plant growth, with emphasis on nutritive elements, pH,
organic matter maintenance, and rooting development. Nonmajor grad-
uate credit.

HORT 354L. Soils and Plant Growth Laboratory.
(Cross-listed with AGRON). (0-3) Cr. 1. F. Prereq: Credit or enrollment in 354
Henning. Laboratory exercises in soil testing that assess a soil’s ability to
support nutritive requirements for plant growth.

(2-0) Cr. 2. S. Prereq: 240
Functional and aesthetic aspects of landscape planning as a basis for
design decisions; emphasis on plant selection. Includes site analysis,
development process, and design principles.

HORT 381. Beginning Garden Composition Studio.
(0-4) Cr. 2. S. Prereq: 240, 330
To be taken concurrently with 380. Development of landscape graphic
techniques. Studio-based projects implementing principles of landscape
design. Not available as credit for LA majors.

HORT 389. Cooperative Education.
Cr. R. Repeatable. F.S.S. Prereq: Permission of department resource and
career center coordinator
Students must register for this course before commencing each work
period.

HORT 421. Introduction to Plant Breeding.
(Cross-listed with AGRON). (3-0) Cr. 3. F. Prereq: GEN 320 or BIOL 313
Breeding methods used in the genetic improvement of self-pollinated,
cross-pollinated, and asexually reproduced agronomic and horticultural
crops. Applications of biotechnology techniques in the development of
improved cultivars. Nonmajor graduate credit.

HORT 422. Postharvest Technology.
(3-3) Cr. 4. Alt. F., offered 2011. Prereq: 221, junior or senior classification
Principles, methods, and techniques related to postharvest mainte-
nance of quality of horticultural commodities. Emphasis on the effects of
handling, storage facilities and techniques, and quality evaluation. Field
trips outside scheduled class time required. Weekend/overnight field trips
may be required. Nonmajor graduate credit.

HORT 424. Sustainable and Environmental Horticulture Systems.
(Dual-listed with 524). (Cross-listed with ENV S). (3-0) Cr. 3. Alt. S.,
offered 2013.
Inquiry into ethical issues and environmental consequences of horticul-
tural cropping systems, production practices and managed landscapes.
Emphasis on systems that are resource efficient, environmentally sound,
socially acceptable, and profitable.

HORT 434. Greenhouse Crop Production I.
(3-3) Cr. 4. Alt. F., offered 2011. Prereq: 330 and 332
Principles and practices of greenhouse floricultural crop production.
Emphasis is placed on production of common bulbous, cut flower,
foliage, and containerized flowering species produced in greenhouses
and other controlled environments. Field trips outside scheduled class
time required. Weekend/overnight field trips may be required. Nonmajor
graduate credit.

HORT 435. Greenhouse Operation, Management, and Crop Production II.
(3-3) Cr. 4. Alt. S., offered 2012. Prereq: 330 and 332
Principles and practices of greenhouse production of ornamental and
food crops. Emphasis placed on the production of several potted orna-
mental and food crops, along with the complete palate of spring garden
crops. Greenhouse scheduling and costs of production projects are
required. Field trips required. Nonmajor graduate credit.

HORT 442. Nursery Production and Management.
(2-0) Cr. 2. Alt. F., offered 2011. Prereq: 221
Theory, nursery layout and design, and cultural practices important for
growing and shipping field and container-grown nursery crops. Overview
of garden center design and retailing and marketing strategies. Field
trips(s) outside scheduled class time may be required. Nonmajor graduate
credit.

HORT 444. Landscape Construction Management.
(2-3) Cr. 3. F.
Principles and practices of the business of residential landscape
construction. Encompasses personnel, business and project manage-
ment, marketing, advertising, and sales. Laboratory work involves busi-
ness evaluation of landscape firm practices and construction project
management.

(2-0) Cr. 2. F. Prereq: 221, junior or senior classification
In-depth presentation and discussion of skills and strategies needed to
manage a horticultural enterprise. Topics include motivating employees,
managing meetings, conducting performance appraisals, dealing with
conflict, and managing an increasingly diverse work force.

HORT 446. Landscape Contracting and Estimating.
(2-0) Cr. 2. F. Prereq: 240 and credit or enrollment in 342; junior or senior
classification
Overview and implementation of landscape estimating and contracting.
Includes estimating procedures (material, labor, equipment) and land-
scape business issues (contracts, personnel).

(2-0) Cr. 2. Alt. S., offered 2013. Prereq: 351
Turfgrass science including the study of (1) specific information on soil
chemistry and soil modification as they relate to the development and
maintenance of turfgrass areas, (2) specialized management practices
used in athletic field care, professional lawn care, and golf course indus-
tries, and (3) construction methods for golf courses and sports fields.
Nonmajor graduate credit.

HORT 452. Integrated Management of Diseases and Insect Pests of Turfgrasses.
(Dual-listed with 552). (Cross-listed with PL P, ENT). (3-0) Cr. 3. Alt. S.,
offered 2012. Prereq: HORT 351
Gleason, D. Lewis. Identification and biology of important diseases and
insect pests of turfgrasses. Development of integrated pest manage-
ment programs in various turfgrass environments.
(3-0) Cr. 3. Alt. F., offered 2012. Prereq: 351  
Management techniques for today's specialized athletic fields. The horticultural and budgetary aspects of football, soccer, baseball, and softball fields will be presented. Field trips and laboratory exercises will develop a practical understanding of actual principles in field development, construction, and management. Nonmajor graduate credit.

HORT 454. Turf & Landscape Irrigation.  
(3-0) Cr. 3. Alt. F., offered 2011.  
Irrigation systems and principles for turf and landscape environments. Topics include design, installation, equipment, management, and trouble shooting of irrigation systems for golf, athletic fields, residential lawns and landscapes. Participation in practical exercises and local field trips to irrigation sites is required.

HORT 461. Fruit and Nut Crop Production and Management.  
(2-2) Cr. 3. Alt. S., offered 2013. Prereq: 221  
Principles and practices of small fruit, tree fruit, and nut culture and production. Morphology, physiology of growth and development, plant establishment, pest management, pruning, training, harvesting, storage, and marketing. Emphasis on sustainable practices. Participation in practical exercises and local field trips is required. Nonmajor graduate credit.

HORT 471. Vegetable Production and Management.  
(2-2) Cr. 3. Alt. S., offered 2012. Prereq: 221 or AGRON 114 and AGRON 154 or 155  
Principles of vegetable production with emphasis on sustainable practices, market outlets, business aspects, and risk management. Organic techniques will be discussed. Major crop climatic conditions, physiological growth and development, harvesting, storage, and marketing. Nonmajor graduate credit.

HORT 475. Urban Forestry.  
(Cross-listed with FOR). (2-3) Cr. 3. F. Prereq: Junior or senior classification, 3 credits in biology.  
Discussion of establishment and management of woody perennials in community-owned urban greenspaces, consideration of urban site and soil characteristics, plant physiology, plant culture, urban forest valuation, inventory methods, species selection, and urban forest maintenance (health care and pest management). Nonmajor graduate credit.

HORT 481. Advanced Garden Composition.  
(0-4) Cr. 2. F. Prereq: 240, 330, 380, 381  
Limited to Planting Design/Installation option students. Development of residential landscapes using design principles and the design process. Projects encompass site analysis, concept development, preliminary design, final design, and graphic presentation techniques. Techniques will include hand and computer rendering.

HORT 484. Organic Agricultural Theory and Practice.  
(Dual-listed with 584). (Cross-listed with AGRON). (3-0) Cr. 3. Alt. S., offered 2012. Prereq: 9 cr in biological or physical sciences  
Delate & DeWitt. Understanding of the historical origins and ecological theories underpinning the practices involved in organic agriculture. Interdisciplinary examination of crop and livestock production and socioeconomic processes and policies in organic agriculture from researcher and producer perspectives. Nonmajor graduate credit.

HORT 490. Independent Study.  
Cr. arr. Repeatable. Prereq: Junior or Senior classification in horticulture, permission of instructor  
Investigation of topic holding special interest to the student. Comprehensive report required. Election of course and topic must be approved by department head. A maximum of 4 credits of Hort 490 and an additional 2 credits of 490 from outside Horticulture may be used toward the total of 128 credits required for graduation.

A. Greenhouse Crops  
B. Nursery Crops  
C. Turfgrass  
D. Fruit Crops  
E. Vegetable Crops  
F. Cross-Commodity
HORT 529. Publishing in Biological Sciences Journals.
(Cross-listed with AGRON, NREM). (2-0) Cr. 2. S. Prereq: Permission of instructor; evidence of a publishable unit of the student’s research data Process of preparing a manuscript for submission to a refereed journal in the biological sciences. Emphasis on publishing self-generated data from thesis or dissertation research.

HORT 530. Research Orientation.
(1-3) Cr. 2. F. Instruction in scientific methods and communication skills.

HORT 542. Introduction to Molecular Biology Techniques.
(Cross-listed with B MS, BBMB, EEOB, FS HN, GDCB, NRE, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.S.S. Prereq: Graduate classification
Sessions in basic molecular biology techniques and related procedures. Offered on a satisfactory-fail basis only.
A. DNA Techniques. Includes genetic engineering procedures, sequencing, PCR, and genotyping. (F.S.S.)
B. Protein Techniques. Includes fermentation, protein isolation, protein purification, SDS-PAGE, Western blotting, NMR, confocal microscopy and laser microdissection, immunoblotting, and monoclonal antibody production. (S.S.)
C. Cell Techniques. Includes immunomapping, ELISA, flow cytometry, microscopic techniques, and image analysis. (F.S.)
D. Plant Transformation. Includes Agrobacterium and particle gun-mediated transformation of tobacco, Arabidopsis, and maize, and analysis of transformants. (S.)
E. Proteomics. Includes two-dimensional electrophoresis, laser scanning, mass spectrometry, and database searching. (F.)
F. Techniques in Metabolomics: metabolomics and the techniques involved in metabolite profiling. For non-chemistry majoring students who are seeking analytical aspects into their biological research projects G. Genomic Techniques

HORT 543. Seed Physiology.
(Cross-listed with STB). (2-0) Cr. 2. Alt. F., offered 2012. Prereq: Admission to the Seed Technology and Business Master’s Degree Program or approval of the instructor
Brief introduction to plant physiology. Physiological aspects of seed development, maturation, longevity, dormancy and germination. Links between physiology and seed quality.

(Cross-listed with AGRON, SUSAG). (3-0) Cr. 3. Alt. S., offered 2013. Prereq: SUSAG 509
Project-focused engagement in food and farming systems using tools and perspectives drawn from multiple disciplines. Includes a field component.

HORT 551. Growth and Development of Perennial Grasses.
(Cross-listed with AGRON). (2-0) Cr. 2. Alt. S., offered 2012. Prereq: Junior or senior or graduate classification or permission of instructor
The grass plant. Selected topics on anatomy, morphology, and physiology relative to growth and development of perennial grasses. Emphasis on growth and development characteristics peculiar to grasses and variations of such characteristics under natural and managed conditions.

HORT 552. Integrated Management of Diseases and Insect Pests of Turfgrasses.

(Cross-listed with AGRON, AN S, BCB, CH E, CPR E, EEB, M E, MICRO, PL P, V MPM). Cr. arr. Prereq: Graduate classification
Professional, ethical and legal issues facing scientists and engineers in academia. Offered in modular format.
A. Responsible Conduct of Research. (Cr. 1.0). F.
B. Working with Industry. (Cr. 0.5).
C. Communications in Science. (Cr. 0.5). Alt S., offered 2011. Reading and reviewing manuscripts; publishing papers; oral and poster presentations.
D. Time Management and Mentoring. (Cr. 0.5). Alt F., offered 2012. Balancing life and career; mentoring; lab management.
E. The Interview Process. (Cr. 0.5). Alt S., offered 2012. Applying and interviewing for academia, industry and government.
F. Grant Writing. (Cr. 1.0). Alt F., offered 2011. Writing a winning proposal.
G. Teaching. (Cr. 0.5). Preparation of a teaching portfolio and course materials; lecturing, technology.
S. Ethical and legal issues in research.
S. Establishing productive collaborations with industry.

HORT 584. Organic Agricultural Theory and Practice.
(Dual-listed with 484). (Cross-listed with AGRON, SUSAG). (3-0) Cr. 3. Alt. S., offered 2012. Prereq: 9 cr in biological or physical sciences Delate & Devitt. Understanding of the historical origins and ecological theories underpinning the practices involved in organic agriculture. Interdisciplinary examination of crop and livestock production and socio-economic processes and policies in organic agriculture from researcher and producer perspectives.

HORT 590. Special Topics.
Cr. arr. Repeatable. Prereq: a major or minor in horticulture

HORT 593. Workshop in Horticulture.
Cr. arr. Repeatable. Workshops in horticulture, with emphasis on off-campus instruction.
A. Greenhouse Crops
B. Nursery Crops
C. Turfgrass
D. Fruit Crops
E. Vegetable Crops
F. Cross-Commodity
G. Landscape Horticulture

HORT 599. Creative Component.
Cr. arr. Repeatable.

Courses for graduate students
HORT 610. Graduate Seminar.
Cr. 1. Repeatable. F.S.
Offered on a satisfactory-fail basis only.

HORT 690. Advanced Topics.
Cr. arr. Repeatable.

HORT 696. Research Seminar.
(Cross-listed with GDCB, AGRON, BBMB, PLBIO, FOR). Cr. 1. Repeatable.
Research seminars by faculty and graduate students. Offered on a satisfactory-fail basis only.

HORT 698. Horticulture Teaching Practicum.
(1-0) Cr. 1. S. Prereq: Graduate student classification
Discussions are intended to foster the development of graduate students as teaching assistants and future horticulture/plant science teachers. Topics include establishing a classroom presence, improving lectures, motivating students, dealing with difficult or disruptive students, and developing a teaching philosophy. Offered on a satisfactory-fail basis only.

Cr. arr. Repeatable.
A. Greenhouse Crops
B. Nursery Crops
C. Turfgrass
D. Fruit Crops
E. Vegetable Crops
F. Cross-Commodity
G. Landscape Horticulture
I. Biotechnology
International Agriculture

Interdepartmental Undergraduate Program

The international agriculture program provides opportunities to develop knowledge and skills related to the factors that interact to impact agricultural and environmental issues, production, processes, distribution and utilization worldwide. The program puts emphasis on international experience through structured internships and study abroad. The international agriculture program is appropriate for students seeking positions that require knowledge and experience related to global agricultural issues and their impact on local, regional, national and international policies and practices. Students preparing for careers in the following areas will benefit from the international agriculture program; governmental and non-governmental development agencies, agribusinesses, educational institutions, and non-profit assistance agencies. Outcomes from participation in this program include developing an awareness for the role of international agriculture in the career development process, analyzing international agricultural issues and policies, acquiring skills for solving problems in international development and agribusiness and experiencing real situations and gaining perspectives about agriculture in a global setting.

Secondary Major

International agriculture is an undergraduate secondary major that may be taken only in conjunction with a primary major in an agriculture and life sciences curriculum. Students choosing international agriculture will strengthen their career placement with a business or agency involved in international activities. Technical knowledge of a primary major discipline will be strengthened by a global awareness of agriculture and life sciences. A secondary major in international agriculture will give students practical insight into the role of agriculture in a world of increasing food and fiber needs. It is ideal for those who wish to broaden their international perspective or prepare for international work in agriculture. The secondary major includes an emphasis on international internship or study abroad and/or foreign languages, and selection of appropriate courses (from an approved list) to meet the needs and interests of the student.

Courses for the secondary major include AGRON 342 World Food Issues: Past and Present; six credits of study abroad, travel, or language courses or any combination thereof; and six credits in selected international agriculture courses in the College of Agriculture and Life Sciences. Fifteen credits of the secondary major cannot be used to meet requirements of the major or any other college or university requirement.

Students interested in earning a secondary major in international agriculture must contact a program adviser. The early indication of an interest in international agriculture allows for effective integration of the secondary major course requirements with those of the primary major.

Minor

A minor in international agriculture is available to interested students regardless of their major. Students selecting the minor should have at least minimal familiarity with agriculture and life sciences and agricultural systems.

Courses for the minor include AGRON 342 World Food Issues: Past and Present; 3 to 6 credits of study abroad and/or foreign language and 3 to 6 credits in selected international agriculture courses in the College of Agriculture and Life Sciences. Nine credits of the 15 credit total for the minor can not be used for meeting requirements of the major.

For more information about courses for either a secondary major or a minor in international agriculture, see descriptions in the designated departments.

Curriculum in International Agriculture

Administered by an Interdepartmental Committee. International agriculture can be taken only as a secondary major in conjunction with a primary major in the College of Agriculture and Life Sciences. A minor is available to interested students regardless of their major.

15 cr. of this major cannot be used to meet requirements of the primary major or any other college or university requirements.

6 cr. from Internship in International Agriculture or Study Abroad or World Languages and Cultures; AGRON 342 World Food Issues: Past and Present; credits from approved International Agriculture Courses to total 15 cr.
Interdepartmental Undergraduate Major

**Undergraduate Study**

Undergraduate study for the bachelor of science degree with a major in microbiology. In the Microbiology curriculum, principal emphasis is placed on understanding microorganisms and their interrelationships with other organisms in nature, the application of microbiology in medicine, agriculture, and industry, and the study of fundamental life processes as exemplified by microorganisms. Some fields of microbiology, especially advanced research, may require further training. Undergraduate work in the program is designed to provide sound preparation for graduate study, training for bachelors-level employment, and admission to professional programs such as medicine, veterinary medicine and dentistry.

Graduates of the Interdepartmental Undergraduate Microbiology Program will learn about the diversity and complexity of microbial life represented by procaryotes, eucaryotes and viruses. In addition to being able to explain fundamental principles of microbial growth, physiology, genetics, biochemistry, and ecology, students will be able to evaluate the impact that the microbial world has on human, animal and plant health, as well as on environmental quality, industry and biotechnology. Graduates are able to design and implement experimental approaches to address specific questions. In addition, graduates are able to communicate scientifically, using a variety of media.

Students graduating in microbiology find career opportunities in a wide variety of areas including: hospital and clinical laboratories; federal, state, and local government agencies; research and development; dairy and food processing industries; and the pharmaceutical and fermentation industries.

The undergraduate program for the major in microbiology requires the following basic courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>

<td>Laboratory in Microbial Physiology, Diversity, and Genetics</td>
<td></td>
</tr>
</tbody>
</table>

In addition, students must take 9 credits of elective microbiology courses from an approved list. Aspects of these courses emphasize communication skills, environmental issues, problem solving, and laboratory techniques. Courses in the following areas are required as supporting work: biology, chemistry, biochemistry, genetics, mathematics and physics. Students are encouraged to participate in independent studies, internship opportunities, and international experiences.

Preveterninary preparation may be accomplished through the curriculum major in this program (see College of Veterinary Medicine, Admission Requirements).

The program offers a minor in microbiology which may be earned by accumulating a minimum of 15 credits of microbiology courses.

**Graduate Study**

The program offers work for the degrees master of science and doctor of philosophy in microbiology and for a minor for students majoring in other programs. The interdepartmental microbiology major is offered through faculty housed in twelve departments, including Agronomy; Animal Science; Biochemistry, Biophysics and Molecular Biology; Civil, Construction and Environmental Engineering; Entomology; Food Science and Human Nutrition; Genetics, Developmental and Cell Biology; Geological and Atmospheric Sciences; Plant Pathology; Veterinary Diagnostic and Production Animal Medicine; Veterinary Microbiology and Preventive Medicine; and Veterinary Pathology. Faculty coordinate graduate education and research in a wide range of topics fundamental to the discipline of microbiology. Specific information about individual faculty and their research areas is available at www.micro.iastate.edu.

Prerequisites to graduate study include a sound undergraduate background in chemistry, mathematics and biology, including microbiology and genetics.

All M.S. and Ph.D. students complete coursework that is comprised of one year of modular courses in microbiology:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>

* or equivalent

And 3 credits (M.S.) or 5 credits (Ph.D.) of MICRO 604 Seminar.

Graduates in the Microbiology Graduate program have a broad-based knowledge in the fundamentals of microbiology as well as advanced knowledge in specific areas as determined by their areas of research focus. Students completing the thesis have the technical, research, critical-thinking, problem-solving, and computer skills to design, implement, and conduct research using a variety of current techniques and equipment. They are also able to communicate research results effectively with scientific peer groups in both oral and written formats.

**Curriculum in Microbiology**

www.micro.iastate.edu

Administered by an interdepartmental committee.

**Total Degree Requirement: 128 cr.**

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

**International Perspective: 3 cr.**

U.S. Diversity: 3 cr.
Electives: 7-12

**Communications Proficiency:**

MICRO 440 Laboratory in Microbial Physiology, Diversity, and Genetics 4  
MICRO 450 Undergraduate Seminar 1  
MICRO 451 Senior Survey in Microbiology R  
One of the following: 3  
MICRO 435 Prokaryotic Diversity and Ecology  
MICRO 456 Principles of Mycology  
MICRO 477 Bacterial-Plant Interactions  
Nine credit hours from the following: 9  

**Courses primarily for undergraduate students**

**MICRO 101. Microbial World.**  
(3-0) Cr. 3. F. Prereq: High school biology or equivalent  
Introduction to the importance of viruses, bacteria, fungi, archaea and parasites both to humans and to the biosphere. Topics include past and present microbial impact on humans and society, ecology and diversity of microbes, biotechnology and microbial impact on the biosphere.

**MICRO 110. Orientation in Microbiology.**  
(1-0) Cr. 0.5. F.  
Orientation to the discipline of microbiology, the curriculum in microbiology, and educational research opportunities within the department. Offered on a satisfactory-fail basis only.

**MICRO 201. Introduction to Microbiology.**  
(2-0) Cr. 2. F. S. Prereq: One semester of college-level biology  
Selected topics in microbiology with emphasis on the relationship of microorganisms to human and animal health, agricultural technology, and the environment. With written petition to the chair of the supervisory committee, students who obtain a grade of B or better may substitute 201 FOR 302 in advanced courses.

L. Introductory Microbiology Laboratory

**MICRO 201L. Introductory Microbiology Laboratory.**  
(0-2) Cr. 1. F. S. Prereq: Credit or enrollment in 201 or 302  
Basic microbiology laboratory techniques for non-microbiology majors. Credit for either Micro 201L or 302L, but not both, may be applied toward graduation.

**MICRO 302. Biology of Microorganisms.**  
(3-0) Cr. 3. F. S. Prereq: BIOL 211, credit or enrollment in BIOL 212; 1 semester of chemistry  
Basic cell biology, physiology, metabolism, genetics and ecology of microorganisms, with an emphasis on prokaryotes and viruses, as well as the roles of microorganisms in the environment, disease, agriculture, and industry.

L. Microbiology Laboratory

**MICRO 302L. Microbiology Laboratory.**  
(0-3) Cr. 1. F. S. Prereq: Credit or enrollment in 302  
Basic microbiology laboratory techniques for majors in microbiology, biological sciences and related fields. Credit for either Micro 302L or 302L, but not both, may be applied toward graduation.

**MICRO 310. Medical Microbiology.**  
(3-0) Cr. 3. F. S. Prereq: 302 (or 201 if a B or better was obtained)  
Study of infection and immunity by bacterial and viral pathogenic agents of humans. Nonmajor graduate credit.

L. Medical Microbiology Laboratory
MICRO 310L. Medical Microbiology Laboratory.
(0-3) Cr. 1. F. Prereq: 201 or 302; 201L or 302L, credit or enrollment in 310 Isolation and identification of human bacterial pathogens using basic staining techniques and biochemical tests. Brief introduction to techniques in cell culture and virology.

MICRO 320. Molecular and Cellular Bacteriology.
(4-0) Cr. 4. S. Prereq: 302, BIOL 313, credit or enrollment in CHEM 332 Introductory course integrating physiological and genetic principles influencing bacterial growth, survival, and cellular differentiation. Emphasis is on prokaryotes although unicellular eukaryotes are also discussed. Topics include the structure, function, and assembly of cell components, bioenergetics and metabolism, regulation of gene expression, genetic adaptation, stress tolerance, biofilms, and cell-cell interactions and communication.

MICRO 353. Introductory Parasitology.
(Cross-listed with BIOL, V PTHI). (3-3) Cr. 4. S. Prereq: BIOL 212 Biology and host-parasite relationships of major groups of animal parasites, and techniques of diagnosing and studying parasites.

MICRO 374. Insects and Our Health.
(Cross-listed with ENT). (3-0) Cr. 3. S. Prereq: 3 credits in biological sciences Bartholomay. Identification, biology, and significance of insects and arthropods that affect the health of humans and animals, particularly those that are vectors of disease. Nonmajor graduate credit.

Meets International Perspectives Requirement.

L. Insects and Our Health Laboratory

MICRO 374L. Insects and Our Health Laboratory.
(Cross-listed with ENT). (0-3) Cr. 1. Alt. S., offered 2012. Prereq: Credit or enrollment in ENT 374 Bartholomay. Laboratory and field techniques for studying medical or public health entomology, including: collection, identification and maintenance of medically significant arthropods and experimental design and execution related to the biology of arthropods or arthropod-pathogen interactions.

MICRO 381. Environmental Systems I: Introduction to Environmental Systems.
(Cross-listed with BIOL, ENSC, ENV S). (2-2) Cr. 3. F. Prereq: 12 credits of natural science including biology and chemistry Introduction to the structure and function of natural environmental systems. Systems approach to the analysis of material and energy flows in natural environmental systems and the primary environmental factors controlling these systems. Nonmajor graduate credit.

MICRO 402. Microbial Genetics.
(Dual-listed with 502). (3-0) Cr. 3. Alt. F., offered 2012. Prereq: 302, BIOL 313 The fundamental concepts of bacterial and bacteriophage genetics including mutagenesis, mechanisms of both vertical and horizontal genetic information transfer, gene regulation, and genetic approaches to study complex cellular processes. Review and discussion of research literature to examine experimental design, methodology, and interpretation of both historical and contemporary relevance to microbial genetics.

(Dual-listed with 507). (Cross-listed with FS HNI). (3-0) Cr. 3. S. Prereq: 420 Examination of the various factors in the production of foods of animal origin, from animal production through processing, distribution and final consumption which contribute to the overall microbiological safety of the food. The two modules of this course will be 1) the procedures and processes which can affect the overall microbiological safety of the food, and 2) the Hazard Analysis Critical Control Point (HACCP) system.

MICRO 408. Virology.
(Dual-listed with 508). (3-0) Cr. 3. F. Prereq: BIOL 313 or BBMB 301, BIOL 314 recommended The molecular virology and epidemiology of human, animal, plant and insect viruses.

MICRO 410. Insect-Virus Interactions: a Molecular Perspective.
(Dual-listed with 510). (Cross-listed with ENT). (3-0) Cr. 3. Alt. F., offered 2011. Prereq: Permission of an instructor Bonning, Bartholomay. Overview of insect-virus interactions including insect immunity to viruses, genetic enhancement of viral insecticides, transgenic mosquitoes, disruption of virus transmission, and the role of insect and virus genomics in combating viral disease of both human and agricultural importance.

MICRO 419. Foodborne Hazards.
(Cross-listed with FS HN, TOX). (3-0) Cr. 3. Alt. S., offered 2012. Prereq: MICRO 201 or 302, a course in biochemistry Pathogenesis of human microbiological foodborne infections and intoxications, principles of toxicology, major classes of toxicants in the food supply, governmental regulation of foodborne hazards. Nonmajor graduate credit.

MICRO 420. Food Microbiology.
(Cross-listed with FS HN, TOX). (3-0) Cr. 3. F. Prereq: 201 or 302 Effects of microbial growth in foods. Methods to control, detect, and enumerate microorganisms in food and water. Foodborne infections and intoxications. Nonmajor graduate credit.

MICRO 421. Food Microbiology Laboratory.
(Cross-listed with FS HN). (0-6) Cr. 3. F. Prereq: MICRO 201 or 302, 201L Credit or enrollment in MICRO 420, FS HN 203 Standard techniques used for the microbiological examination of foods. Independent and group projects on student-generated questions in food microbiology. Emphasis on oral and written communication and group interaction. Nonmajor graduate credit.

(Dual-listed with 530). (Cross-listed with BBMB). (3-0) Cr. 3. Alt. S., offered 2013. Prereq: 302, 302L Survey of the diverse groups of procaryotes emphasizing important and distinguishing metabolic, phylogenetic, morphological, and ecological features of members of those groups.

MICRO 440. Laboratory in Microbial Physiology, Diversity, and Genetics.
(Cross-listed with BBMB). (2-6) Cr. 4. F. Prereq: 302, 302L, CHEM 332, BIOL 313L Study of the fundamental techniques and theory of studying the cellular mechanisms and diversity of microbial life. Experimental techniques will include isolation and physiological characterization of bacteria that inhabit different environments. Also included are techniques for the phylogenetic characterization, and genetic manipulation of diverse species of bacteria.

MICRO 450. Undergraduate Seminar.
Cr. 1. S. Prereq: SP CM 212 and senior standing in Microbiology Required of all undergraduate majors in microbiology. Discussion of current papers in microbiology and immunology, issues in scientific conduct, and bioethics in microbiology. Students present current papers in a journal club format.

MICRO 451. Senior Survey in Microbiology.
Cr. R. F. Prereq: Junior or Senior standing in Microbiology Preparations for graduation. Topics include job search strategies, career information, mock interviews, graduate and professional school application processes and guidelines as well as outcomes assessment activities.
(Cross-listed with BIOL). (2-3) Cr. 3. F. Prereq: 10 credits in biological sciences
Morphology, diversity, and ecology of fungi; their relation to agriculture, industry, and human health. Nonmajor graduate credit.

MICRO 475. Immunology.
(Dual-listed with 575). (3-0) Cr. 3. S. Prereq: 310
An examination of humoral and cellular immune function as well as the interaction of the cells and factors of the immune system that result in health and disease. MICRO 475L optional. Credit for either Micro 475 or V MPM 520, but not both, may be applied to graduation.

L. Immunology Laboratory

MICRO 475L. Immunology Laboratory.
(1-4) Cr. 1. S. Prereq: Credit or enrollment in 475 or 575
Techniques in primary culture and tumor cell growth, measures of lymphocyte function, and flow cytometry. Half semester course.

MICRO 477. Bacterial-Plant Interactions.
(Dual-listed with 577). (Cross-listed with PL PI). (3-0) Cr. 3. Alt. S., offered 2012. Prereq: 3 credits in microbiology or plant pathology
Focuses on plant-associated bacteria in terms of their ecology, diversity, and the physiological and molecular mechanisms involved in their interaction with plants; covers symbiotic nitrogen fixation, plant pathogenesis, plant growth promotion, and biological control.

MICRO 485. Soil and Environmental Microbiology.
(Dual-listed with 585). (Cross-listed with AGRON, ENSCI). (2-3) Cr. 3. F. Prereq: AGRON 154 or ENSCI 402, MICRO 201 (MICRO 201L recommended)
Loynachan. The living organisms in the soil and what they do. Emphasis on soil biota composition, the carbon cycle and bioremediation, soil-plant-microbial relationships, and environmental issues. Nonmajor graduate credit.

MICRO 487. Microbial Ecology.
(Dual-listed with 587). (Cross-listed with BIOL, ENSCI). (3-0) Cr. 3. F. Prereq: Six credits in biology and 6 credits in chemistry
Introduction to major functional groups of autotrophic and heterotrophic microorganisms and their roles in natural systems. Nonmajor graduate credit.

MICRO 490. Independent Study.
Cr. 1-5. Repeatable, maximum of 6 credits. F.S.SS. Prereq: A minimum of 6 credits of 300-level or above coursework in microbiology, permission of instructor
A maximum of 6 credits of Micro 490 may be used toward the total of 128 credits required for graduation.

H. Honors

MICRO 495. Internship.
Cr. 1-2. F.S. Prereq: At least 6 credits of 300-level or above coursework in microbiology, approval of academic adviser
Participation in the Cooperative Extension Intern Program or an equivalent work experience. Written report of activities required. Offered on a satisfactory-fail basis only.

Courses primarily for graduate students, open to qualified undergraduate students

(Dual-listed with 402). (Cross-listed with V MPM). (3-0) Cr. 3. Alt. F., offered 2012. Prereq: 302, BIOL 313
The fundamental concepts of bacterial and bacteriophage genetics including mutagenesis, mechanisms of both vertical and horizontal genetic information transfer, gene regulation, and genetic approaches to study complex cellular processes. Review and discussion of research literature to examine experimental design, methodology, and interpretation of both historical and contemporary relevance to microbial genetics.

(Dual-listed with 407). (Cross-listed with FS HN). (3-0) Cr. 3. S. Prereq: 420
Examination of the various factors in the production of foods of animal origin, from animal production through processing, distribution and final consumption which contribute to the overall microbiological safety of the food. The two modules of this course will be 1) the procedures and processes which can affect the overall microbiological safety of the food, and 2) the Hazard Analysis Critical Control Point (HACCP) system.

MICRO 508. Virology.
(Dual-listed with 408). (3-0) Cr. 3. F. Prereq: BIOL 313 or BBMB 301, BIOL 314 recommended
The molecular virology and epidemiology of human, animal, plant, and insect viruses.

(Cross-listed with PL PI). (2-6) Cr. 4. Alt. S., offered 2013. Prereq: PL P 408, BIOL 454, BBMB 405, CHEM 211
Hill. Plant viruses and the diseases they cause. Emphasis on epidemiology and control. Structure, function, and biochemical-biophysical properties of plant viruses.

MICRO 510. Insect-Virus Interactions: a Molecular Perspective.
(Dual-listed with 410). (Cross-listed with ENT). (3-0) Cr. 3. Alt. F., offered 2011. Prereq: Permission of an instructor
Bonning, Bartholomay. Overview of insect-virus interactions including insect immunity to viruses, genetic enhancement of viral insecticides, transgenic mosquitoes, disruption of virus transmission, and the role of insect and virus genomics in combating viral disease of both human and agricultural importance.

MICRO 530. Procaryotic Diversity and Ecology.
(Dual-listed with 430). (Cross-listed with BBMB). (3-0) Cr. 3. Alt. S., offered 2013. Prereq: 302, 302L
Survey of the diverse groups of prokaryotes emphasizing important and distinguishing metabolic, phylogenetic, morphological, and ecological features of members of those groups.

MICRO 540. Livestock Immunogenetics.
(Cross-listed with AN S, V MPM). (2-0) Cr. 2. Alt. S., offered 2013. Prereq: AN S 561 or MICRO 575 or V MPM 520
Basic concepts and contemporary topics in genetic regulation of livestock immune response and disease resistance.

MICRO 551. Microbial Diversity and Phylogeny.
(1-0) Cr. 1. F. Prereq: 302, BIOL 313
Comparisons among the three kingdoms of life (Bacteria, Archaea, and Eukarya). Topics will include metabolism, adaptation, methods of phylogenetic analysis, and comparative genomics.

MICRO 552. Bacterial Molecular Genetics and Physiology.
(1-0) Cr. 1. F. Prereq: 302, BIOL 313
Review of the molecular genetics and physiology of model organisms.

MICRO 553. Pathogenic Microorganisms.
(1-0) Cr. 1. Alt. S., offered 2012. Prereq: 302, BIOL 313
Review and contrast/comparison of common bacterial pathogens of plants and animals and their mechanisms of virulence, including toxins, protein secretion, host invasion and iron acquisition strategies. An overview of eukaryotic cell biology that is relevant to pathogenesis will also be included.

MICRO 554. Virology.
(1-0) Cr. 1. S. Prereq: 302, BIOL 313
Introduction to virus life cycles including entry, gene expression strategies, replication, and mechanisms to modify and overcome host defenses. The roles of specific viruses and sub-viral agents in animal and plant disease will also be included.
**MICRO 555. Fungal Biology.**
(1-0) Cr. 1. S. Prereq: 302, BIOL 313
Ecology, genetics, physiology and diversity of fungi, from yeasts to mushrooms, and their importance in human affairs.

**MICRO 556. Microbial Ecology and Environmental Monitoring.**
(1-0) Cr. 1. S. Prereq: 302, BIOL 313
Examination of microorganisms in their natural habitats, including aquatic, terrestrial and extreme environments, community and biofilm development, microbe-microbe interactions, and current and traditional methods of microbial analysis in natural environments.

**MICRO 557. Immunology.**
(Dual-listed with 475). (Cross-listed with V MPM). (3-0) Cr. 3. S. Prereq: 310
An examination of humoral and cellular immune function as well as the interaction of the cells and factors of the immune system that result in health and disease. MICRO 475L optional. Credit for either Micro 575 or V MPM 520, but not both, may be applied toward graduation.

**MICRO 558. Soil and Environmental Microbiology.**
(Dual-listed with 485). (Cross-listed with AGRON, ENSCI). (2-3) Cr. 3. F Prereq: AGRON 154 or 402, MICRO 201 (MICRO 201L recommended)
Loyanchan. The living organisms in the soil and what they do. Emphasis on soil biota composition, the carbon cycle and bioremediation, soil-plant-microbial relationships, and environmental issues.

**MICRO 559. Special Topics.**
Cr. 1-5. Repeatable. F.S.S. Prereq: Permission of instructor

**Courses primarily for graduate students**

**MICRO 604. Seminar.**
(1-0) Cr. 1. Repeatable. F.S.
Course will expose students to the breadth of subdisciplines within microbiology, offer opportunities for direct interaction between the students and the faculty members within the Interdepartmental Microbiology Graduate Program, and promote interactions among the students within the program. Offered on a satisfactory-fail basis only.

**MICRO 608. Molecular Virology.**
(Cross-listed with V MPM). (3-0) Cr. 3. Alt. F., offered 2012. Prereq: BBMB 405 or GDCB 511
Advanced study of virus-host cell interactions. Molecular mechanisms of viral replication and pathogenesis.

**MICRO 615. Molecular Immunology.**
(Cross-listed with BBMB, V MPM). (3-0) Cr. 3. Alt. F., offered 2011. Prereq: BBMB 405 or 502
Current topics in molecular aspects of immunology: T and B cell receptors; major histocompatibility complex; antibody structure; immunosuppressive drugs and viruses; and intracellular signalling pathways leading to expression of genes that control and activate immune function.

**MICRO 625. Mechanisms of Bacterial Pathogenesis.**
(Cross-listed with V MPM). (4-0) Cr. 4. Alt. S., offered 2013. Prereq: Credit in Biochemistry and Microbiology
Review of current concepts in specific areas of microbial pathogenesis including the genetic basis for bacterial disease, genetic regulation and control of virulence factors and their mechanisms of action, and host-pathogen interactions at the cellular and molecular levels. The application of microbial genetics to understanding pathogenesis will be included.

**MICRO 626. Advanced Food Microbiology.**
(Cross-listed with FS HN, TOX). (3-0) Cr. 3. Alt. S., offered 2013. Prereq: FS HN 420 or 421 or 504
Topics of current interest in food microbiology, including new foodborne pathogens, rapid identification methods, effect of food properties and new preservation techniques on microbial growth, and mode of action of antimicrobials.

**MICRO 627. Rapid Methods in Food Microbiology.**
(Cross-listed with FS HN, TOX). (2-0) Cr. 2. Alt. S., offered 2012. Prereq: FS HN 420 or 421 or 504
Provides an overview of rapid microbial detection methods for use in foods. Topics include historical aspects of rapid microbial detection, basic categories of rapid tests (phenotypic, genotypic, whole cell, etc.), existing commercial test formats and kits, automation in testing, sample preparation and “next generation” testing formats now in development.

**MICRO 679. Light Microscopy.**
(Cross-listed with GDCB, EEOB). (2-9) Cr. 5. Prereq: Permission of instructor
Current theories encompassing light optics and their applications for specimen preservation, paraffin and resin sectioning, general staining, histochemistry, cytophotometry, immunocytochemistry, autoradiography, image digitization, processing and presentation, and digital macro- and micrography.

**MICRO 680. Scanning Electron Microscopy.**
(Cross-listed with GDCB, EEOB). (2-9) Cr. 5. Prereq: Permission of instructor
Current theories encompassing scanning electron optics and their applications for high and low vacuum microscopy, specimen chemical and cryopreservation methods, x-ray microanalysis, backscattered and topographic imaging, image digitization, processing and presentation.
(Cross-listed with GDCB, EEOB). (2-9) Cr. 5. Prereq: GDCB 679 and permission of instructor
Current theories encompassing electron optics and their applications for chemical and physical specimen preservation, ultramicrotomy, general staining and cytochemistry, immunocytochemistry, autoradiography, negative staining and shadowing, x-ray microanalysis, image digitization, processing and presentation.

MICRO 685. Advanced Soil Biochemistry.

MICRO 690. Current Topics.
Cr. 1-3. Repeatable. F.S.SS. Prereq: Permission of instructor Colloquia or advanced study of specific topics in a specialized field.
A. Microbiology
B. Immunology
C. Infectious Diseases

(Cross-listed with PL P). (3-0) Cr. 3. Alt. F., offered 2012. Prereq: PL P 506 or BBMB 405 or Gen 411 or MICRO 402 or strong background in molecular biology. Bogdanove, Whitham. Seminal and current research in molecular and physiological aspects of plant interactions with pathogens, including mechanisms of pathogenesis, host-pathogen recognition and host defense, with an emphasis on critical evaluation of primary literature. Students also complete an interinstitutional research proposal writing and peer review exercise.

MICRO 697. Graduate Research Rotation.
Cr. arr. Repeatable. F.S. Graduate research projects performed under the supervision of selected faculty members in the Interdepartmental Microbiology major.

MICRO 698. Seminar in Molecular, Cellular, and Developmental Biology.
(Cross-listed with MCDB, GDCB, BBMB, V MPM). (2-0) Cr. 1-2. Repeatable. F.S. Student and faculty presentations.

MICRO 699. Research.
Cr. arr. Repeatable.
Natural Resource Ecology and Management

The Department of Natural Resource Ecology and Management offers work for the Bachelor of Science degree with majors in animal ecology or forestry. The department participates in interdisciplinary programs in biology, environmental studies, international studies, and pest management. By proper selection of free and restricted elective courses, students can obtain a minor or a second major in these programs or other disciplines.

The Department provides numerous scholarships; application information is available in the departmental Student Services Center.

Animal Ecology (A Ecl)
The animal ecology curriculum provides its majors with an understanding of ecological principles and processes and their applications to natural resource management. It is oriented toward students desiring a general and flexible program in environmental biology and for those planning graduate study. Students may select from four options: Fisheries and Aquatic Sciences, Interpretation of Natural Resources, Pre-veterinary and Wildlife Care, or Wildlife. Graduates find employment as aquaculturists, aquatic ecologists, wildlife biologists, fisheries biologists, resource managers, and ecologists for industry, environmental consulting firms, natural resource and environmental agencies and organizations, zoos, and as educators.

Graduates of the Animal Ecology major understand the basic principles of animal biology, ecology and management, and relevant aspects of scientific communication, basic mathematics and sciences, computing applications, and personal and professional development. Four specific options prepare students for careers in interpretation of natural resources, fisheries and aquatic sciences, pre-veterinary and wildlife care, and wildlife. Each option has specific outcomes expectations that include (1) the scope of the specialization and its relationships to broader aspects of animal ecology, biotic resource management, and other allied scientific disciplines and professions, (2) career opportunities and requirements, and (3) knowledge and skills appropriate for employment at technical and practitioner levels in each discipline. Graduates are able to communicate and work effectively in the multidisciplinary arena of ecology and natural resource management.

All options require three months (400 hours) of relevant work experience or study at a biological station prior to graduation. The latter may be accomplished at the university’s affiliate field stations: Iowa Lakeside Laboratory at West Lake Okoboji, and Gulf Coast Research Laboratory at Ocean Springs, Mississippi. Information on these laboratories is available from the department’s Student Services Center.

Pre-veterinary medicine preparation may be achieved while satisfying degree requirements in animal ecology.

Additional education and training can lead to other opportunities in such areas as research and management, natural resources planning and administration, teaching, and environmental consulting, among others. Graduate training is necessary for many specialized positions within the fields of animal ecology. Students preparing for graduate study should consult with their academic adviser concerning appropriate coursework.

Students seeking certification to teach biology in secondary schools must meet requirements of the College of Human Sciences as well as those of the Animal Ecology curriculum. In addition, they must apply formally for admission to the teacher education program (see Index, Teacher Education Program). Students with an interest in careers in outdoor writing are encouraged to obtain a minor or a second major in journalism (see Index, Journalism and Communication, Courses and Programs). Students who wish to pursue a job as a conservation officer may wish to minor in criminal justice (see Index, Criminal Justice Studies).

The department offers a minor in animal ecology that may be earned by taking 15 credits in the department including:

A ECL 312 Ecology 4
A ECL 365 Vertebrate Biology 4
NREM 120 Introduction to Renewable Resources 3

Plus four additional credits of Animal Ecology or NREM courses at the 300 level or above.

Forestry (For)
The forestry curriculum offers courses dealing with the management of forest ecosystems for multiple benefits including wood and fiber products, biodiversity, recreation, water, wilderness, and wildlife. Conservation and preservation of natural resources are emphasized. The department offers work for the Bachelor of Science degree with a major in forestry and options in forest ecosystem management, interpretation of natural resources, urban and community forestry, natural resource conservation and restoration, or sustainable materials science and technology. All options lead to a professional degree in forestry (Bachelor of Science). The forestry major has been accredited by the Society of
Graduates of the forest ecosystem management option are skilled at understanding how forests function and how forests can be managed to produce desired goods (wood, fiber, recreation, wildlife habitat) and services (clean water, carbon sequestration, wilderness) in the long-run. They are skilled at interpretation of interactions and effects of abiotic and biotic factors in forests and quantification of bio-physical, social, and economic outputs from forest ecosystems. They are skilled at complex decision-making involving private and public forest resources where ethical, legal, social, economic, and ecological dimensions are explicitly considered.

Graduates of the interpretation of natural resources option are skilled at communicating with the public about the values associated with forest ecosystems and providing educational programs for all ages.

Graduates of the urban and community forestry option are able to combine biological, social, legal, and economic expertise to effectively manage trees or forests in an urban setting. They are skilled at decision-making related to site assessment, and long-term management of urban trees and forests to achieve multiple goals.

Graduates of the natural resource conservation and restoration option are skilled at assessing the natural functions of the environment and human impacts. They are skilled at interpretation of forest and other natural environments and making decisions relating to their conservation and preservation.

Graduates of the sustainable materials science and technology option understand the anatomical, physical, and chemical properties of wood and other bio-renewable materials and know wood processing operations involved in drying, composite materials manufacturing, and chemical treatment.

In consultation with their adviser, students can select elective courses related to elective courses in the forest ecosystem management option to emphasize forest ecology; wildlife, wilderness, and recreation management; water quality and erosion protection; quantitative-analytical techniques; business and marketing; and other areas related to natural resource management. Elective courses in the urban and community forestry option can be selected to emphasize plant health, policy and planning, ecology, hydrology, sociology, business administration, or horticulture/design. Elective courses related to the natural resource conservation and restoration option can be selected to emphasize ecology, wildlife, recreation, nature interpretation, landscape design, sociology and ethics of conservation and preservation. Similarly, elective courses in the sustainable materials science and technology option can be selected to emphasize wood production, bio-renewable materials, wood fiber, business and marketing, and quality assurance. Elective courses in the interpretation of natural resources option can be selected to emphasize natural history, animal ecology, and environmental education.

Many private firms as well as national, regional, state, and local agencies seek forestry graduates to fill positions in management of natural resources for commodity and non-commodity multiple benefits. Graduates in forestry are prepared to be involved with evolving forestry systems, such as agroforestry and urban forestry. Wood processing industries, such as composite products, plywood, particle board, lumber, and pulp and paper offer professional opportunities in production, product development, quality control, and marketing.

With advanced graduate study, the range of professional job opportunities for a person with a B.S. in forestry is expanded. Opportunities include research and education as well as more specialized managerial and administrative positions with private firms and public agencies. During fall semester of the second year of study (sophomore year, typically), forestry students are required to enroll in the department’s integrated forestry modules consisting of:

- FOR 201 Forest Biology 2
- FOR 202 Wood Utilization 2
- FOR 203 Resource Measurements/Evaluation 2
- FOR 204 Forest Ecosystem Decision-Making 2
- FOR 205 Integrated Forestry Laboratory 3
- FOR 206 Fall Forestry Camp 4

That semester, consisting entirely of forestry coursework, is designed to give students an early understanding of the many aspects of forestry and how they are interrelated. In addition to work in the classroom, students will spend time in laboratory and field work each week. A 3-week off-campus fall camp during the semester will reinforce concepts learned both in the classroom and during laboratory/field sessions. Transfer students should check with the department for counsel on timing their completion of the integrated forestry modules.

The department offers a minor in forestry which can be earned by completion of a minimum of 15 credits in forestry courses. Students wishing to emphasize management and environmental aspects of forestry must select at least 15 credits from the following courses:

- FOR 302 Silviculture 3
- FOR 366 Dendrology 4
- FOR 451 Forest Resource Economics and Quantitative Methods 4
- FOR 452 Ecosystem Management 3
- FOR 475 Urban Forestry 3
- NREM 120 Introduction to Renewable Resources 3
- NREM 301 Natural Resource Ecology and Soils 4
- NREM 345 Natural Resource Photogrammetry and Geographic Information Systems 3
- NREM 390 Fire Ecology and Management 3
- NREM 407 Watershed Management 4

Students wishing to emphasize sustainable materials science and technology must complete 280 and an additional 12 credits from the following courses:

- FOR 480 Wood Anatomy and Fiber Analysis 3
- FOR 481 Conversion of Lignocellulosic Materials 3
- FOR 483 Wood Deterioration and Preservation 3
- FOR 485 Wood and Natural Fiber Composites 3
- FOR 486 Drying Processes for Wood and Other Lignocellulosic Materials 3
- FOR 487 Physical Properties of Wood 4
- NREM 490B Forestry 1-4

Graduate Study

The Department of Natural Resource Ecology and Management offers work for the degrees Master of Science and Doctor of Philosophy with majors in fisheries biology, forestry, and wildlife ecology. A non-thesis masters degree is available for students desiring a general degree program without thesis research. Students may also major in interdepartmental graduate majors in biorenewable resources technology, ecology and evolutionary biology, environmental science, genetics, plant physiology, sustainable agriculture, or toxicology (see Index). All students are required to teach and conduct research as part of their training for the Ph.D. degree.
Fisheries Biology and Wildlife Ecology
Graduates have a broad understanding of the basic principles of animal biology, ecology and management, and relevant aspects of basic mathematics and natural sciences, computing applications, and personal and professional development. They are able to execute rigorous independent research, have developed problem-solving and critical-thinking skills, and can communicate effectively with scientific colleagues and the general public in both formal and informal settings.

Personnel of the U.S. Geological Survey’s Iowa Cooperative Fish and Wildlife Research Unit contribute significantly to the graduate program of the department through teaching and research. Governmental agencies such as the U.S. Fish and Wildlife Service, Natural Resources Conservation Service and the Iowa Department of Natural Resources, and non-governmental agencies such as The Nature Conservancy and the Iowa Natural Heritage Foundation also contribute to the graduate program by funding research, providing in-kind support, and providing numerous formal and informal mentoring relationships.

No more than two dual-listed animal ecology courses may be applied for major graduate credit. Additional work is expected of students taking a dual-listed course for credit at the 500 level.

Forestry
The department offers programs leading to the degrees of Master of Science and Doctor of Philosophy with a major in forestry and minor work to students taking major work in other departments.

Graduates are skilled at defining a research problem in forestry, applying scientific principles and appropriate methods, and analyzing the results. They are capable of understanding the many facets of forest and wood science and are very knowledgeable in specific areas in forestry. They are able to deal with complex forestry problems, and where appropriate, they are capable of blending ecological, social, ethical, legal, and economic factors in the research process. They are very skilled at communicating, both in written and oral form, research results to professional and lay audiences. They are sensitive to cultural diversity and work effectively with peers, natural resource professionals, and the public.

The graduate program is open to, and suitable for, students who have majored in forestry or related natural resource fields. A non-thesis master’s option is available.

The department participates in the Masters in Business Administration (M.B.A.), with specialization in the agriculture program administered by the College of Business, providing an opportunity to obtain an M.B.A. degree while taking advanced courses in forestry and maintaining contact with the profession of forestry.

Curriculum in Animal Ecology
Total Degree Requirement: 128 cr.
Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.
U.S. Diversity: 3 cr.

Communications Proficiency (with a C or better):

Total Credits 34

Animal Ecology (A ECL)

Courses primarily for undergraduate students

A ECL 312. Ecology.
(Cross-listed with BIOL, ENSCI). (3-3) Cr. 4. F.S. Prereq: BIOL 211L and 212L
Fundamental concepts and principles of ecology dealing with organisms, populations, communities and ecosystems. Laboratory and field exercises examine ecological principles and methods as well as illustrate habitats.

I. Ecology

A ECL 312L. Ecology.
(Cross-listed with IA LL, ENSCI). Cr. 4. SS.
An introduction to the principles of ecology at the population, community and ecosystem level. Field studies of local lakes, wetlands and prairies are used to examine factors controlling distributions, interactions, and roles of plants and animals in native ecosystems.

A ECL 321. Fish Biology.
(2-3) Cr. 3. S. Prereq: 365
Biology, ecology, and evolution of fishes. Emphasis on structure, physiology, and behavior, including a focus on the conservation and management of fishes and their habitats. Laboratory focus on fish morphology, survey methods, identification, distribution, habits, and habitats of fishes.

A ECL 326L. Ornithology.
(Cross-listed with IA LL). Cr. 4. SS.
The biology, ecology, and behavior of birds with emphasis on field studies of local avifauna. Group projects stress techniques of population analysis and methodology for population studies.

A ECL 365. Vertebrate Biology.
(Cross-listed with BIOL). (3-2) Cr. 4. F. Prereq: BIOL 212, 212L
Evolution, biology, and classification of fish, amphibians, reptiles, birds, and mammals. Emphasis on a comparative analysis of the structure and function of organ systems. Laboratory exercises concentrate on morphology and identification of orders of vertebrates.

A ECL 366. Natural History of Iowa Vertebrates.
(2-3) Cr. 3. S. Prereq: BIOL 211, 211L, 212, 212L
Vertebrate fauna of Iowa, including fishes, amphibians, reptiles, birds, and mammals. Species identification, habitat requirements, community structure and assessment, conservation issues that include historical population changes and value of wild animals to the region’s ecological and economic health.

(Cross-listed with BIOL). (2-3) Cr. 3. F. Prereq: 312; STAT 101 or 104
Quantitative techniques used in management of natural resources with emphasis on inventory and manipulation of habitat and animal populations. Nonmajor graduate credit.

A ECL 401. Introductory Aquatic Animal Health and Medicine.
(Cross-listed with B M S). (1-2) Cr. 1.
8 weeks. Introductory course with focus on fin fish production, health and medicine. Course content will help define future roles for veterinarians, producers, and service providers. Emphasis will be placed on anatomy, pathology, infectious diseases, nutrition, regulatory constraints in production, food safety, and current research. Field trip to aquaculture facility.

A ECL 404L. Behavioral Ecology.
(Cross-listed with IA LL). Cr. 4. Alt. SS., offered 2012. Prereq: Two semesters of biology
Animal coloniality, courtship, territoriality, predator defense, habitat selection, foraging, mating systems, and parental care will be examined in the field in order to evaluate various ecological and evolutionary theories of animal behavior.

A ECL 415. Ecology of Freshwater Invertebrates, Plants, and Algae.
(Dual-listed with 515). (2-3) Cr. 3. Alt. F., offered 2011. Prereq: 486
Identification, biology, and ecological requirements of freshwater invertebrates, plants and algae. Additional emphasis on community sampling methods and analysis, and use of organisms as tools for aquatic ecosystem health assessment.

(Dual-listed with 518). (Cross-listed with ENSCI). (2-3) Cr. 3. Alt. F., offered 2011. Prereq: 486
Biological, chemical, physical, and geological processes that determine the structure and function of flowing water ecosystems. Current ecological theories as well as applications to stream management for water quality and fisheries.

A ECL 419I. Vertebrate Ecology and Evolution.
(Cross-listed with IA LL). Cr. 4. SS.
Field and laboratory study of representative vertebrates of northwestern Iowa. Observations and experimentation emphasize ecological histories by integrating concepts of functional morphology, behavioral ecology, and evolutionary biology. Nonmajor graduate credit.

A ECL 420I. Amphibians and Reptiles.
(Cross-listed with IA LL). Cr. 4. Alt. SS., offered 2012. Prereq: Two semesters of biology
Ecology, behavior, and conservation biology of amphibians and reptiles with emphasis on their anatomy and morphology; temperature and water regulation; locomotion; life history; reproduction; population and community ecology; and conservation.

A ECL 425. Aquatic Insects.
(Dual-listed with 525). (Cross-listed with ENSCI). (2-3) Cr. 3. Alt. S., offered 2013. Prereq: BIOL 312 or equivalent
Courtney. Morphology, ecology, diversity, and significance of aquatic insects, with emphasis on the collection, curation and identification of taxa in local streams and lakes.

A ECL 440. Fishery Management.
(Dual-listed with 540). (2-3) Cr. 3. F. Prereq: 312, 321, STAT 101 or 104; credit or enrollment in 486
Biological basis of fishery management, fishery problems, and management practices for freshwater, anadromous, and marine fisheries.

A ECL 442. Aquaculture.
(Dual-listed with 542). (3-0) Cr. 3. Alt. S., offered 2012. Prereq: credit or enrollment in 321
Concepts related to the culture of aquatic organisms including culture systems, water quality, nutrition, genetics, diseases, and marketing.
(2-3) Cr. 3. F. Prereq: 371  
Ecological theory and practice of wildlife management, including, population ecology, habitat management, and current issues in the field. Course involves a series of case studies addressing actual wildlife issues using field and quantitative methods. Nonmajor graduate credit.

(Dual-listed with 554). (3-0) Cr. 3. S. Prereq: Junior standing and at least 10 credits in biological sciences at the 300+ level  
Ecological and epidemiological aspects of diseases as they relate to wildlife populations. Topics to be covered include: major classes of disease; detection, description, monitoring, and management of disease; characteristics and interactions between disease agents and wildlife hosts; relationships among wildlife, domestic animal, and human health.

(3-0) Cr. 3. Alt. F, offered 2012. Prereq: 365, 312 or graduate standing; NREM 120  
Biological, political, social, and economic factors affecting the management of international wildlife resources. Nonmajor graduate credit.  
Meets International Perspectives Requirement.

A ECL 457. Herpetology.  
(Dual-listed with 557). (Cross-listed with BIOL). (2-3) Cr. 3. F. Prereq: BIOL 361 or 365  
Biology, ecology, and evolution of amphibians (salamanders, frogs, caecilians) and reptiles (lizards, snakes, tuatara, turtles, crocodilians). Emphasis on structure, physiological adaptation to different environments, behavior, reproduction, roles of amphibians and reptiles in ecosystems, and conservation. Laboratory focus on survey methods, identification, relationships, distribution, habits, and habitats of amphibians and reptiles.

A ECL 458. Ornithology.  
(Dual-listed with 558). (Cross-listed with BIOL). (2-3) Cr. 3. S. Prereq: A ECL 365 or BIOL 351  
Biology, evolution, ecology and taxonomy of birds. Emphasis on structure, physiology, behavior, communication, navigation, reproduction, and conservation. Laboratory exercises complement lecture topics, emphasize identification and distribution of Midwest birds, and include field trips.

A ECL 459. Mammalogy.  
(Dual-listed with 559). (Cross-listed with BIOL). (2-3) Cr. 3. S. Prereq: BIOL 361 or A ECL 365  
Biology, ecology, and evolution of mammals. Emphasis on structure, physiological adaptation to different environments, behavior, reproduction, roles of mammals in ecosystems, and conservation. Laboratory focus on identification, distribution, habits, and habitats of mammals.

Cr. 1-8. Repeatable. SS.  
Courses taken at Gulf Coast Research Laboratory and other marine biological stations are transferred to Iowa State University under this number.

A ECL 486. Aquatic Ecology.  
(Cross-listed with BIOL, ENSCI). (3-0) Cr. 3. F. Prereq: BIOL 312 or ENSCI 381 or ENSCI 402 or NREM 301  
Structure and function of aquatic ecosystems with application to fishery and pollution problems. Emphasis on lacustrine, riverine, and wetland ecology. Nonmajor graduate credit.

L. Aquatic Ecology Laboratory

A ECL 486L. Aquatic Ecology Laboratory.  
(Cross-listed with BIOL, ENSCI). (0-3) Cr. 1. F. Prereq: Concurrent enrollment in 486  
Field trips and laboratory exercises to accompany 486. Hands-on experience with aquatic research and monitoring techniques and concepts. Nonmajor graduate credit.

Courses primarily for graduate students, open to qualified undergraduate students

A ECL 515. Ecology of Freshwater Invertebrates, Plants, and Algae.  
(Dual-listed with 415). (2-3) Cr. 3. Alt. F, offered 2012. Prereq: 312  
Identification, biology, and ecological requirements of freshwater invertebrates, plants and algae. Additional emphases on community sampling methods and analysis, and use of organisms as tools for aquatic ecosystem health assessment.

A ECL 516. Avian Ecology.  
(3-0) Cr. 3. Alt. S., offered 2012. Prereq: 365, 312, or graduate standing  
Current topics and theories including avian breeding and foraging ecology, population biology, community structure, habitat selection, field methodologies, and data interpretation.

Biological, chemical, physical, and geological processes that determine the structure and function of flowing water ecosystems. Current ecological theories as well as applications to stream management for water quality and fisheries.

A ECL 520. Fisheries Science.  
(3-0) Cr. 3. Alt. S., offered 2013. Prereq: 312, 321  
Concepts, approaches, and techniques for assessment of recreational and commercial fisheries. Scope will range from individual fish to entire ecosystems, both freshwater and marine.

A ECL 523I. Fish Ecology.  
(Cross-listed with IA LL). Cr. 4. Alt. SS., offered 2012  
Basic principles of fish interaction with the biotic and abiotic environment. Field methods, taxonomy, and biology of fish with emphasis on the fish fauna of northwestern Iowa.

A ECL 525. Aquatic Insects.  
(Dual-listed with 425). (Cross-listed with ENT). (2-3) Cr. 3. Alt. S., offered 2013. Prereq: BIOL 312 or equivalent  
Courtney. Morphology, ecology, diversity and significance of aquatic insects, with emphasis on the collection, curation and identification of taxa in local streams and lakes.

A ECL 526I. Advanced Field Ornithology.  
(Cross-listed with IA LL). Cr. 2. SS. Prereq: Concurrent registration in IA LL 326I  
Field study of birds of the upper Midwest; extended field trip to Minnesota and Wisconsin; individual or group project.

A ECL 531. Conservation Biology.  
(Cross-listed with EEOB). (3-0) Cr. 3. Alt. S., offered 2013. Prereq: 312; BIOL 313 or graduate standing  
Examination of conservation issues from a population and a community perspective. Population-level analysis will focus on the role of genetics, demography, and environment in determining population viability. Community perspectives will focus on topics such as habitat fragmentation, reserve design, biodiversity assessment, and restoration ecology.

I. Conservation Biology

A ECL 531I. Conservation Biology.  
(Cross-listed with IA LL, EEOB). Cr. 4. Alt. SS., offered 2012. Prereq: IA LL 312I  
Population-and community-level examination of factors influencing the viability of plant and animal populations from both demographic and genetic perspectives; assessment of biodiversity; design and management of preserves.
(Cross-listed with IA LL, EEOB, ENSCI). Cr. 4. Alt. SS., offered 2012. Prereq: A course in ecology
Ecological principles for the restoration of native ecosystems; establishment (site preparation, selection of seed mixes, planting techniques) and management (fire, mowing, weed control) of native vegetation; evaluation of restorations. Emphasis on the restoration of prairie and wetland vegetation.

A ECL 540. Fishery Management.
(Dual-listed with 440). (2-3) Cr. 3. F. Prereq: 312, 321; STAT 401
Biological basis of fishery management, fishery problems, and practices for management of freshwater, anadromous, and marine fisheries.

A ECL 542. Aquaculture.
(Dual-listed with 442). (3-0) Cr. 3. Alt. S., offered 2012. Prereq: credit or enrollment in 321
Concepts related to the culture of aquatic organisms including culture systems, water quality, nutrition, genetic, diseases, and marketing.

(2-2) Cr. 3. Alt. S., offered 2012. Prereq: a course in ecology or animal behavior
The study of how an animal’s behavior affects its ability to survive and reproduce in its environment. Course topics, such as foraging behavior, sexual selection, parental care, etc., represent the interface of ecology, evolution, and behavior.

(Dual-listed with 454). (3-0) Cr. 3. S. Prereq: Graduate classification
Ecological and epidemiological aspects of disease as they relate to wildlife populations. Topics to be covered include: major classes of disease; detection, description, monitoring, and management of disease; characteristics and interactions between disease agents and wildlife hosts; relationship among wildlife, domestic animal, and human health.

A ECL 555. Herpetology.
(Dual-listed with 457). (Cross-listed with EEOB). (2-3) Cr. 3. F. Prereq: A ECL 365 or BIOL 351
Biology, ecology, and evolution of amphibians (salamanders, frogs, caecilians) and reptiles (lizards, snakes, tuatara, turtles, crocodilians). Emphasis on structure, physiological adaptation to different environments, behavior, reproduction, roles of amphibians and reptiles in ecosystems, and conservation. Laboratory focus on survey methods, identification, relationships, distribution, habits, and habitats of amphibians and reptiles.

A ECL 558. Ornithology.
(Dual-listed with 458). (Cross-listed with EEOB). (2-3) Cr. 3. S. Prereq: A ECL 365 or BIOL 351
Biology, evolution, ecology and taxonomy of birds. Emphasis on structure, physiology, behavior, communication, reproduction, and conservation. Laboratory exercises complement lecture topics, emphasize identification and distribution of Midwest birds, and include field trips.

A ECL 559. Mammalogy.
(Dual-listed with 459). (Cross-listed with EEOB). (2-3) Cr. 3. S. Prereq: BIOL 351 or A ECL 365
Biology, ecology, and evolution of mammals. Emphasis on structure, physiological adaptation to different environments, behavior, reproduction, roles of mammals in ecosystems, and conservation. Laboratory focus on identification, distribution, habits, and habitats of mammals.

A ECL 570. Landscape Ecology.
(Cross-listed with EEOB). (2-3) Cr. 3. Alt. F., offered 2012. Prereq: Permission of instructor; EEOB 588; a course in calculus
The study of ecological and evolutionary processes within a spatial context with emphasis on behavior, population, and community dynamics.

A ECL 573. Techniques for Biology Teaching.
(Cross-listed with IA LL, EEOB). Cr. 1-2. Repeatable. SS.
The development and implementation of laboratory exercises suitable for inclusion in elementary, middle, high school, and community college biology and environmental courses. Exercises will be built around common organisms and ecosystems in Iowa. Field trips.

(Cross-listed with EEOB). (2-2) Cr. 3. F. Prereq: BIOL 312, STAT 101 or 104, a course in calculus, or graduate standing
Concepts and theories of population dynamics with emphasis on models of growth, predation, competition, and regulation.

A ECL 590. Graduate Independent Study.
(Cross-listed with IA LL, EEOB, ANTHR). Cr. 1-4. Repeatable. SS. Prereq: Graduate classification and permission of instructor

A ECL 599. Creative Component.
Cr. arr. Prereq: Nonthesis M.S. option only

Courses for graduate students

A ECL 611. Analysis of Populations.
(Cross-listed with EEOB). (2-2) Cr. 3. Alt. S., offered 2013. Prereq: BIOL 312; STAT 401; a course in calculus
Quantitative techniques for analyzing vertebrate population data to estimate parameters such as density and survival. Emphasis on statistical inference and computing.

Cr. 1-3. Repeatable. F.S.S. Prereq: Graduate classification in animal ecology and permission of instructor
Graduate student experience in the animal ecology teaching program. Offered on a satisfactory-fail basis only.

A ECL 699. Research.
Cr. arr. Repeatable.
I. Research

A ECL 699f. Research.
(Cross-listed with IA LL, ANTHR, GDCB, EEOB). Cr. 1-4. Repeatable.

Forestry (For)

Courses primarily for undergraduate students

FOR 201. Forest Biology.
(2-0) Cr. 2. F. Prereq: Concurrent enrollment in 202, 203, 204, 205, and 206
Discussion of ecological concepts, individual tree structure and growth, variation and diversity in tree populations. Physical environment of trees and forests, ecological processes in forest communities, and introduction to different regional forest communities.

(2-0) Cr. 2. F. Prereq: Concurrent enrollment in 201, 203, 204, 205, and 206
Processing of sustainable materials including wood into products and general properties and proper use of these products.

(2-0) Cr. 2. F. Prereq: Concurrent enrollment in 201, 202, 204, 205, and 206; MATH 140
Survey techniques involved in quantification, valuation, and evaluation of tree and stand growth and other variables in the forest environment (e.g., recreational use, wildlife habitat value, biomass, and solid wood).
FOR 204. Forest Ecosystem Decision-Making.
(2-0) Cr. 2. F. Prereq: Concurrent enrollment in 201, 202, 203, 205, and 206
Methods of decision-making related to forest ecosystems including communications, teams and conflict resolution. Current issues relating to public, private, and urban forests; quantification of processes, services, and goods produced by the forest and expected by the public such as wildlife, water, range, recreation, wilderness, biodiversity, as well as wood and fiber products.

FOR 205. Integrated Forestry Laboratory.
(0-2) Cr. 3. F. Prereq: Concurrent enrollment in 201, 202, 203, 204, and 205
Field and laboratory exercises integrating the evaluation and management of forest goods, services, and the processing of wood products.

FOR 206. Fall Forestry Camp.
Cr. 4. F. Prereq: Concurrent enrollment in 201, 202, 203, 204, and 205
Three-week field camp to address topics and issues covered in 201, 202, 203, 204, and 205.

FOR 280. Wood Properties and Identification.
(3-3) Cr. 4. S.
Properties of wood and how they relate to its successful use. Comparative anatomical characteristics, scientific nomenclature, and hand lens identification of commercially important North American woods.

FOR 283. Pesticide Application Certification.
(Cross-listed with ENT, AGRON, HORT). (2-0) Cr. 2. S.
Holscher. Core background and specialty topics in agricultural, and horticultural pesticide applicator certification. Students can select certification categories and have the opportunity to obtain pesticide applicator certification at the completion of the course. Commercial pesticide applicator certification is emphasized.

FOR 290. Special Problems.
Cr. 1-4. Repeatable. Prereq: Freshman or Sophomore classification, permission of instructor
A. Leadership in Forestry Teams (LIFT) Learning Community
B. Forest Ecosystem Management
C. Natural Resource Conservation
D. Urban and Community Forestry
E. Wood Science and Technology

FOR 302. Silviculture.
(2-3) Cr. 3. S. Prereq: 201
Manipulation of forest vegetation based on ecological principles for the production of goods and services. Nonmajor graduate credit.

FOR 342. Dynamics of Forest Stands.
(2-3) Cr. 3. Alt. F., offered 2012. Prereq: 203, STAT 101
Change in forest species composition and structure at the stand and landscape scales resulting from site quality, tree growth, competition, succession, and disturbance. Methods for assessing tree growth and reconstructing past stand development. Applications to forest and savanna management. Nonmajor graduate credit.

FOR 356. Dendrology.
(Cross-listed with BIOL). (2-4) Cr. 4. F. Prereq: BIOL 211
Identification and ecology of North American woody plant species. Importance of woody plants in timber production and wildlife habitat. Natural disturbances, human impacts, management and restoration concerns for major North American forest regions will be addressed. Nonmajor graduate credit.

FOR 416. Forest Insect and Disease Ecology.
(Cross-listed with PL P). (3-3) Cr. 4. F. Prereq: 8 credits in biological sciences, including BIOL 211
Harrington. Nature of insects and pathogens of forest and shade trees; their role in the dynamics of natural and managed forest ecosystems; and the management of indigenous and exotic pests. Nonmajor graduate credit.

(3-3) Cr. 4. S. Prereq: 203, MATH 150
Application of economic principles to forest resource management considering both market and non-market goods and services. Methods of identifying and specifying problems in the management and use of forest resources. Application of mathematical and statistical models to the solution of managerial problems. Nonmajor graduate credit.

FOR 452. Ecosystem Management.
(Cross-listed with NREM). (2-3) Cr. 3. F. Prereq: Junior classification, and NREM 301 or A ECL 312
Principles of planning, regulating, and decision-making associated with public and private lands, with consideration of forest, grassland, wetland, and freshwater aquatic ecosystems. Integrated natural resources management within ecological, social, economic and policy constraints. Nonmajor graduate credit.

FOR 453. Forest Resource Policy and Administration.
(3-0) Cr. 3. S. Prereq: junior or senior classification
Forest and related natural resource policies and contemporary policy issues. Integration of elements of policy development processes, various participants in these processes, and resulting programs. Ethics in professional forestry and natural resource conservation. Participation in the policy process involving communication with policy makers and natural resource professionals, study of current issues, promotion of issues with students as issue educators. Participation in policy meetings to identify/determine various elements and applications of strategies associated with the policy development process. Nonmajor graduate credit.

FOR 454. Forestry Practicum.
(1-4) Cr. 3. S. Prereq: 20 credits in student’s major at 300 level or above
Integrated decision-making related to the conservation, management, and preservation of private and public forests, wildlands, urban/community forests, and/or the production and utilization of wood products. Student teams work with a client and develop management plans that incorporate ecological, social, economic, ethical, and institutional/political factors. Effective teamwork, written/oral/visual communication, and problem-solving stressed. Multiple trips to project site and client. Nonmajor graduate credit.

FOR 475. Urban Forestry.
(Cross-listed with HORT). (2-3) Cr. 3. F. Prereq: Junior or senior classification, 3 credits in biology
Discussion of establishment and management of woody perennials in community-owned urban greenspaces, consideration of urban site and soil characteristics, plant physiology, plant culture, urban forest valuation, inventory methods, species selection, and urban forest maintenance (health care and pest management). Nonmajor graduate credit.

FOR 480. Wood Anatomy and Fiber Analysis.
(2-3) Cr. 3. Alt. F., offered 2011. Prereq: 280 or permission of instructor
Microscopic anatomy and ultrastructure of wood and other industrial lignocellulosic materials. Microscopy techniques for fiber analysis. Comparison of fiber properties. Nonmajor graduate credit.

FOR 481. Conversion of Lignocellulosic Materials.
(Cross-listed with TSM). (2-3) Cr. 3. F. Prereq: 280 or TSM 210 or A E 216 or equivalent

FOR 483. Wood Deterioration and Preservation.
(Cross-listed with PL P). (2-3) Cr. 3. Alt. F., offered 2011. Prereq: FOR 280
Deterioration of wood in use by biological and physical agents. Wood preservation and fire retardant treatments. Environmental impact of wood treatment. Nonmajor graduate credit.
FOR 485. Wood and Natural Fiber Composites.
(2-3) Cr. 3. Alt. F., offered 2012. Prereq: 280 or TSM 240
Consolidation behavior of wood and other lignocellulosic materials. Principles of adhesion. Manufacturing processes for wood and lignocellulosic composites such as plywood, oriented strand products, laminated lumber, particleboard, medium density fiberboard, and bast fiber products. Extrusion processing of natural fiber/plastic composites. Nonmajor graduate credit.

FOR 486. Drying Processes for Wood and Other Lignocel-
losic Materials.
(2-3) Cr. 3. Alt. S., offered 2012. Prereq: 280 or TSM 240
Principles of moisture relations in hygroscopic materials; adsorption, desorption, equilibrium moisture content. Transport processes in natural materials such as wood. Drying processes for wood and other lignocellulosic materials. Influence of moisture on dimensional stability and durability of wood and lignocellulosic composites. Nonmajor graduate credit.

FOR 487. Physical Properties of Wood.
(3-3) Cr. 4. Alt. S., offered 2012. Prereq: 280
Mechanical, thermal, electrical, and acoustical properties of wood. Lumber grading and stress rating, nondestructive evaluation of wood and wood composite products. Nonmajor graduate credit.

Courses primarily for graduate students, open to qualified undergraduate students

FOR 599. Creative Component.
Cr. 1-12. Repeatable, maximum of 12 credits.
A. Forest Biology
B. Forest Biometry
C. Forest and Recreation Economics
D. Forest Management and Administration
E. Wood Science

Courses for graduate students

(4-0) Cr. 4. Alt. F., offered 2012. Prereq: NREM 301 or a course in plant physiology
Structural and functional adaptations in woody and herbaceous plant species to environmental variables, with an emphasis on understanding relationships between physiological processes at the whole plant scale with ecosystem processes related to nutrient, water, and carbon cycling. Plant physiological responses to natural disturbances, management practices, global climate change, and other forces of environmental change.

FOR 696. Research Seminar.
(Cross-listed with AGRON, BBMB, GDCB, HORT, PLBIO). Cr. 1. Repeatable.
Research seminars by faculty and graduate students. Offered on a satisfactory-fail basis only.

FOR 699. Research.
Cr. 1-12. Repeatable, maximum of 12 credits.
A. Forest Biology - Wood Science
B. Forest Biometry
C. Forest Economics
D. Forest Management and Administration
E. Wood Science
F. Plant Physiology

Natural Resource Ecology and Management (NREM)
Courses primarily for undergraduate students

NREM 104. Practical Work Experience.
Cr. R.
Three months of relevant work experience in natural resources, animal ecology, or forestry. Study at a summer biological station may be applicable. See adviser for specific requirements and approval process.

Cr. R. F.
Orientation to the University and to the Department of Natural Resource Ecology and Management. Discussion of departmental learning outcomes, strategies for academic success and academic planning. Offered on a satisfactory-fail basis only.

NREM 111. NREM Transitions Learning Community Seminar.
(1-0) Cr. 1. Repeatable. F.S.
Enrollment limited to members of the NREM Transitions Learning Community. Designed to assist new transfer students and continuing sophomore students with their transition to the academic expectations and professional development aspects of the natural resource program. Offered on a satisfactory-fail basis only.

NREM 112. Orientation to Learning and Productive Team Membership.
(Cross-listed with AER E, CON E, FS HN, HORT, TSM). (2-0) Cr. 2. F.
Introduction to developing intentional learners and worthy team members. Learning as the foundation of human enterprise; intellectual curiosity; ethics as a personal responsibility; everyday leadership; effective team and community interactions including team learning and the effects on individuals; and growth through understanding self, demonstrating ownership of own learning, and internalizing commitment to helping others. Intentional mental processing as a means of enhancing learning. Interconnectedness of the individual, the community, and the world.

NREM 114. Developing Responsible Learners and Effective Leaders.
(Cross-listed with CON E, FS HN, HORT, TSM). (2-0) Cr. 2. S. Prereq: 112
Focus on team and community. Application of fundamentals of human learning; evidence of development as a responsible learner; intentional mental processing as a habit of mind; planning and facilitating learning opportunities for others; responsibility of the individual to the community and the world; leading from within; holding self and others accountable for growth and development as learners and leaders.

NREM 120. Introduction to Renewable Resources.
(Cross-listed with AGRON, ENV S). (3-0) Cr. 3. F.S.
Overview of soil, water, plants, and animals as renewable natural resources in an ecosystem context. History and organization of resource management. Concepts of integrated resource management.

NREM 130. Natural Resources and Agriculture.
(Cross-listed with ENV S). (3-0) Cr. 3. S.
Survey of the ecology and management of fish, forest, and wildlife resources in areas of intensive agriculture, with emphasis on Iowa. Conservation and management practices for private agricultural lands. Designed for nonmajors.

NREM 211. Careers in Natural Resources.
Cr. 1. F.S. Prereq: Sophomore classification
Career planning exploration in natural resources. Discussion of the job application process, including techniques for successful interviewing and development of an effective resume. Offered on a satisfactory-fail basis only.
NREM 256. Midwestern Prairie Plants.  
(1-2) Cr. 1. F.  
Offered 1st half semester only. Survey of the major plant families, genera, and representative species of Midwestern prairies with emphasis on plant identification and use of keys. Prairie restoration, conservation, and management issues will also be considered.

(Cross-listed with L A, ENV S). (3-0) Cr. 3. Alt. F., offered 2011.  
The development of natural resource conservation philosophy and policy from the Colonial Era to the present. North American wildlife, forestry, and environmental policy; national parks and other protected lands; federal and state agencies. Relationship to cultural contexts, including urban reform and American planning movement. Discussion of common pool resources, public and private lands.

(Cross-listed with ENSCI). (3-3) Cr. 4. F. Prereq: BIOL 211, 211L; FOR 201 or a second course in biology  
Effects of environmental factors on ecosystem structure and function using forest, prairie and agricultural ecosystems as models. Special emphasis is given to soil-forming factors and the role of soil in nutrient and water cycling and ecosystem dynamics. Additional emphasis is given to human influences on natural ecosystems and the role of perennial plant communities in agricultural landscapes. Nonmajor graduate credit.

(3-0) Cr. 3. Alt. F., offered 2011. Prereq: A course in general biology  
Examination of watersheds as systems, emphasizing the surface components of the hydrologic cycle. Combines qualitative understanding of hydrological processes and uncertainty with quantitative representation. Laboratory emphasizes field investigation and measurement of watershed processes. Nonmajor graduate credit.

NREM 303. Internship.  
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.S. Prereq: Permission of instructor and sophomore standing  
Placement with county conservation boards, camps, zoos, parks, etc., for experience as interpreters, rangers, and technicians.

I. Undergraduate Internship  

NREM 303I. Undergraduate Internship.  
(Cross-listed with IA L L L). Cr. 1-5. Repeatable, maximum of 5 credits. SS. Prereq: Permission of instructor and sophomore standing  
Placement with county conservation boards, camps, parks, etc. for experience as interpreters, rangers, and technicians.

NREM 305. Seminar.  
(2-0) Cr. 1. Repeatable. F.S. Prereq: Permission of instructor  
Current topics in natural resources or related issues.

NREM 330. Interpretation of Natural Resources.  
(2-3) Cr. 3. S. Prereq: 6 credits in biological sciences  
History, objectives, forms, and techniques of natural resources interpretation in the settings of county, state, national parks, and zoos.

(Cross-listed with ENSCI). (2-3) Cr. 3. F. Prereq: Junior classification  
Measurement and interpretation of aerial photos in resource management. Introduction to Geographic Information Systems (GIS) using ArcGIS including digitizing, development and query of attribute tables, georeferencing, and use of multiple GIS layers in simple spatial analyses. Nonmajor graduate credit.

NREM 385. Natural Resource Policy.  
(Dual-listed with 585). (3-0) Cr. 3. S. Prereq: Junior classification  
Development, theory and practice of natural resource policy. Integrative approach with topical policy studies in North American wildlife, forestry, and water. Policy formation, the role of science, introduction to federal law compliance. Readings, lectures, projects.

(3-0) Cr. 3. F.  
Characteristics and role of fire in forest ecosystems. Major topics covered include fuels, fire weather, fire behavior, fire danger rating systems, fire control, prescribed burning, and fire dynamics in major ecosystem types. Nonmajor graduate credit.

NREM 402. Watershed Hydrology.  
(Cross-listed with AGRON, ENSCI, GEOL, MTEOR). (3-3) Cr. 4. F. Prereq: Four courses in physical or biological sciences or engineering; junior standing  
Principles of planning, regulating, and decision-making associated with public and private lands, with consideration of forest, grassland, wetland, and freshwater aquatic ecosystems. Integrated natural resources management within ecological, social, economic and policy constraints. Nonmajor graduate credit.

NREM 446. Integrating GPS and GIS for Natural Resource Management.  
(Dual-listed with 546). (Cross-listed with ENSCI). (2-3) Cr. 3. S. Prereq: 12 credits in student’s major at 300 level or above, NREM 345 or equivalent experience with ArcGIS  
Examination of the use of GPS as a data collection tool for GIS. Basic theory of GPS. Use of Global Positioning System technology for spatial data collection and navigation. Post-processing and real-time correction of GPS data. GPS data transfer to GIS for mapping applications. Use of GIS to construct waypoints for use in GPS navigation.

NREM 452. Ecosystem Management.  
(Cross-listed with FOR). (2-3) Cr. 3. F. Prereq: Junior classification, and NREM 301 or A ECL 312  
Principles of planning, regulating, and decision-making associated with public and private lands, with consideration of forest, grassland, wetland, and freshwater aquatic ecosystems. Integrated natural resources management within ecological, social, economic and policy constraints. Nonmajor graduate credit.

(Cross-listed with ENV S). (3-0) Cr. 3. F.S. Prereq: 120, and A ECL 312 or NREM 301, and Junior classification  
Analysis of controversial natural resource issues using a case approach that considers uncertainty and adequacy of information and scientific understanding. Ecological, social, political, economic, and ethical implications of issues will be analyzed. Nonmajor graduate credit.

NREM 465. Landscape Change and Conservation.  
(Dual-listed with 565). (Cross-listed with L A). (3-0) Cr. 3. F. Prereq: L A 202  
Exploration of issues in landscape ecology and conservation biology relevant to landscape change, design, and planning. Examination of foundational principles and their applications across a continuum of land uses, from wilderness to urban areas.

NREM 471. Agroforestry Systems; Local and Global Perspectives.  
(Dual-listed with 571). (2-3) Cr. 3. Alt. S., offered 2012. Prereq: 6 credits in biological science at 300 level or above  
Concepts of sustainable land use, agroecological dynamics, and component interactions of agroforestry systems. Agroforestry systems in temperate and tropical regions. Design and evaluation techniques for agroforestry systems. Ecological, socioeconomic and political aspects of agroforestry.  

Meets International Perspectives Requirement.
NREM 490. Independent Study.
Cr. 1-4. Repeatable, maximum of 4 credits. Prereq: Junior or senior classification, permission of instructor
A. Animal Ecology
B. Forestry
E. Entrepreneurship
H. Honors Program
I. Undergraduate Independent Study

NREM 490 I. Undergraduate Independent Study.
(Cross-listed with IA LL). Cr. 1-4. Repeatable, maximum of 4 credits. Prereq: Junior or senior classification and permission of the instructor

NREM 496. Travel Course.
(Dual-listed with 596). Cr. 1-5. Repeatable, maximum of 3 times. Prereq: Permission of instructor
Limited enrollment. Extended field trips to study ecological and management topics in varied environments. Location and duration of trips will vary. Pre-trip sessions arranged. Trip expenses paid by students.
A. International
B. Domestic

NREM 498. Cooperative Education.
Cr. 1-3. Prereq: Permission of departmental chair
Required of all cooperative education students. Students must register prior to commencing each work period.

Courses primarily for graduate students, open to qualified undergraduate students

NREM 501. Genecology.
(3-0) Cr. 3. Alt. F., offered 2011. Prereq: GEN 320 or BIOL 313
Genecology principles as they apply to natural and improved populations of plants and animals. Genetic systems as they interact with long-term natural selection to produce clinal or ecotypic variation. The impact of current environments and genetic modifications of domesticated organisms on short-term selection pressures. Special coverage of species of interest to students enrolled in the course.

NREM 504. Forest Landscapes, Wildlife, and Silviculture.
(3-3) Cr. 4. Alt. F., offered 2011. Prereq: 301
Detailed analysis of factors and processes underlying forest and stand growth and development. Applications of this knowledge to forest culture to support a diversity of use and protection objectives. Discussions of regional silviculture, tropical forests, and experimentation in forest biology.

NREM 505. Seminar.
(2-0) Cr. 1. Repeatable, maximum of 3 times. F.S. Prereq: Permission of instructor or graduate classification
Current topics in natural resources research and management.

NREM 507. Watershed Management.
(Dual-listed with 407). (Cross-listed with ENSci). (3-3) Cr. 4. S. Prereq: A course in general biology
Managing human impacts on the hydrologic cycle. Field and watershed level best management practices for modifying the impacts on water quality, quantity and timing are discussed. Field project includes developing a management plan using landscape buffers.

NREM 508 I. Aquatic Ecology.
(Cross-listed with IA LL, ENSci). Cr. 4. SS. Prereq: Courses in ecology, chemistry, and physics
Analysis of aquatic ecosystems; emphasis on basic ecological principles; ecological theories tested in the field; identification of common plants and animals.

NREM 529. Publishing in Biological Sciences Journals.
(Cross-listed with AGRON, HORT). (2-0) Cr. 2. S. Prereq: Permission of instructor; evidence of a publishable unit of the student’s research data
Process of preparing a manuscript for submission to a refereed journal in the biological sciences. Emphasis on publishing self-generated data from thesis or dissertation research.

(Cross-listed with ENSCI, EEOB). (2-3) Cr. 3. F. Prereq: BIOL 366 or 474 or graduate standing
Theory and practice of restoring animal and plant diversity, structure and function of disturbed ecosystems. Restored freshwater wetlands, forests, prairies and reintroduced species populations will be used as case studies.

NREM 542. Introduction to Molecular Biology Techniques.
(Cross-listed with B M S, BBMB, EEOB, FS HN, GDCB, HORT, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.S.S.
Prereq: Graduate classification
Sessions in basic molecular biology techniques and related procedures. Offered on a satisfactory-fail basis only.
A. DNA Techniques. Includes genetic engineering procedures, sequencing, PCR, and genotyping. (F.S.S.)
B. Protein Techniques. Includes fermentation, protein isolation, protein purification, SDS-PAGE, Western blotting, NMR, confocal microscopy and laser microdissection, immunophenotyping, and monoclonal antibody production. (S.S.)
C. Cell Techniques. Includes immunophenotyping, ELISA, flow cytometry, microscopic techniques, and image analysis. (F.S.)
D. Plant Transformation. Includes Agrobacterium and particle gun-mediated transformation of tobacco, Arabidopsis, and maize, and analysis of transformants. (S.)
E. Proteomics. Includes two-dimensional electrophoresis, laser scanning, mass spectrometry, and database searching. (F.)
F. Techniques in Metabolomics. metabolomics and the techniques involved in metabolite profiling. For non-chemistry majoring students who are seeking analytical aspects into their biological research projects
G. Genomic Techniques

NREM 546. Integrating GPS and GIS for Natural Resource Management.
(Dual-listed with 446). (Cross-listed with ENSci). (2-3) Cr. 3. S. Prereq: 12 credits in student’s major at 300 level or above, NREM 345 or equivalent experience with ArcGIS
Emphasis on the use of GPS as a data collection tool for GIS. Basic theory of GPS. Use of Global Positioning System technology for spatial data collection and navigation. Post-processing and real-time correction of GPS data. GPS data transfer to GIS for mapping applications. Use of GIS to construct waypoints for use in GPS navigation.

NREM 565. Landscape Change and Conservation.
(Dual-listed with 465). (Cross-listed with L A). (3-0) Cr. 3. F. Prereq: L A 202
Exploration of issues in landscape ecology and conservation biology relevant to landscape change, design, and planning. Examination of foundational principles and their applications across a continuum of land uses, from wilderness to urban areas.

NREM 570. Advanced Decision-making in Natural Resource Allocation.
(2-2) Cr. 3. Alt. S., offered 2012. Prereq: FOR 451 or two courses in economics
Analytical approach to economic aspects of forest resource management problems. Theory and application of economic decision-making criteria to traditional and modern forest resource management issues. Current problems in the allocation of forest resources.
NREM 571. Agroforestry Systems.
(Dual-listed with 471). (Cross-listed with SUSAG). (2-3) Cr. 3. Alt. S.,
offered 2012. Prereq: 6 credits in biological science at 300 level or above
Concepts of sustainable land use, agroecological dynamics, and compo-
nent interactions of agroforestry systems. Agroforestry systems in
temperate and tropical regions. Design and evaluation techniques for
agroforestry systems. Ecological, socioeconomic and political aspects of
agroforestry.

Meets International Perspectives Requirement.

NREM 580. Research Orientation.
(2-0) Cr. 2. F. Prereq: 20 credits in biological sciences and a course in
statistics
Research design, proposal preparation, and technical writing.

NREM 585. Natural Resource Policy.
(Dual-listed with 385). (3-0) Cr. 3. Alt. S., offered 2013. Prereq: Graduate
classification or permission of instructor
Development, theory and practice of natural resource policy. Integrative
approach with topical policy studies in North American wildlife, forestry,
and water. Policy formation, the role of science, introduction to federal
law compliance.

NREM 590. Special Topics.
Cr. 1-4. Repeatable, maximum of 4 credits. Prereq: Permission of
instructor
A. Animal Ecology
B. Forestry

NREM 593. Workshop.
Cr. 1-3. Repeatable. Prereq: Graduate classification

NREM 596. Travel Course.
(Dual-listed with 496). Cr. 1-5. Repeatable, maximum of 3 times. Prereq:
Permission of instructor
Limited enrollment. Extended field trips to study ecological topics in
varied environments. Location and duration of trips will vary. Pre-trip
sessions arranged. Trip expenses paid by students.
A. International
B. Domestic

NREM 599. Creative Component.
Cr. arr.

Courses for graduate students

NREM 600. Seminar.
Cr. 1. Repeatable. F.S.
Current topics in natural resources research and management.

NREM 699. Research.
Cr. 1-12. Repeatable, maximum of 12 credits.
Nutritional Sciences

Interdepartmental Graduate Major
Graduate Study

The Interdepartmental Graduate Program in Nutritional Sciences (IGPNS), administered through the Graduate College, under the auspices of the Chairs of Food Science and Human Nutrition (FS HN) and Animal Science, will provide the structure for coordinating and enhancing interdisciplinary nutrition research and graduate education. M.S. and Ph.D. degrees in Nutritional Sciences will be offered with three specializations: Animal Nutrition, Human Nutrition, or Biochemical & Molecular Nutrition.

The following undergraduate course work is recommended of all applicants who are applying to the IGPNS, but may be modified depending upon the student's area of emphasis. Recommended course work includes organic chemistry with laboratory, physics, analytical chemistry, a nutrition course that requires biochemistry or organic chemistry as a prerequisite, and a course in biology/physiology or anatomy. Under certain circumstances students can be admitted or provisionally admitted with course work deficiencies. Students with an undergraduate degree will be generally admitted into the M.S. program and upon completion, they can then apply for admission into the Ph.D. program. However, exceptional students with experience can apply directly to the Ph.D.

The general requirements of the Nutritional Sciences degree at the MS level, in addition to those of Graduate College, are:

NUTRS 501 Biochemical and Physiological Basis of Nutrition: 4
Macronutrients and Micronutrients
BBMB 404 Biochemistry I 3
BBMB 405 Biochemistry II 3
or BBMB 420 Physiological Chemistry
STAT 401 Statistical Methods for Research Workers 4
or AN S 501 Survey of Animal Disciplines
AN S 603 Seminar in Animal Nutrition 1
or FS HN 682X Seminary Reflection (experimental course)
FS HN 580 Orientation to Food Science and Nutrition Research 1
or FS HN 581 Seminar (or AN S equivalent) 1
FS HN 681 Seminar (or AN S equivalent) 1
or AN S 590C Teaching 1-3
Successful completion and defense of thesis

Students are expected to complete the course work established by the Program of Study (POS) committee based on specialization with a minimum of 30 graduate-level semester credits, not less than 22 of which must be earned at Iowa State University.

The general requirements of the Nutritional Sciences degree at the PhD level, in addition to those of the Graduate College, are:

- Completion of all requirements of the MS degree in Nutritional Sciences
- 3 additional credits of graduate-level biochemistry (6 credits total including those for the M.S.), graduate-level statistics (STAT 402 Statistical Design and the Analysis of Experiments), and physiology (if not taken for the M.S.)
- Additional graduate-level courses in the field of study as deemed appropriate by the POS Committee and specialization, and additional teaching assistant requirements (FS HN 590C Teaching).

Satisfactory completion of a preliminary examination, a written dissertation, seminar presentation of dissertation research, and defense of the dissertation is also required. Overall a minimum of 72 graduate-level semester credits, no less than 36 of which must be earned at Iowa State University.

Curriculum in Nutritional Science - CALS

Administered by the Department of Food Science and Human Nutrition

Pre-Health Professional and Research Option
Total Degree Requirement: 120.5 cr.

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements. Only 65 cr. from a two-year institution may apply to the degree which may include up to 16 technical cr.; 9 P-NP cr. of electives; 2.00 minimum GPA.

International Perspectives: 3 cr.
U.S. Diversity: 3 cr.
Communications/Library: 12.5 cr.
ENGL 150 Critical Thinking and Communication 3
ENGL 250 Written, Oral, Visual, and Electronic Composition 3
ENGL 314 Technical Communication 3
LIB 160 Library Instruction 0.5
SP CM 212 Fundamentals of Public Speaking 3
or COMST 214 Professional Communication
Total Credits 12.5

Humanities and Social Sciences: 6 cr.
Humanities 3
Social science 3
Total Credits 6

Ethics and Environmental Science: 5-6 cr.
FS HN 342 World Food Issues: Past and Present 3
Select from:
ENV S 120 Introduction to Renewable Resources 2-3
ENV S 201 Introduction to Environmental Issues
Total Credits 5-6

Mathematical Sciences: 6-12 cr.
Select from:
MATH 140 College Algebra 3-8
MATH 142 Trigonometry and Analytic Geometry
MATH 160 Survey of Calculus
MATH 165 Calculus I
MATH 165 Calculus I & MATH 166 Calculus II
MATH 181 Calculus and Mathematical Modeling for the Life Sciences I
MATH 181 & MATH 182 Calculus and Mathematical Modeling for the Life Sciences II
Select from:
STAT 101 Principles of Statistics 3-4
STAT 104 Introduction to Statistics
Total Credits 6-12

Physical Sciences: 17 cr.
CHEM 177 General Chemistry I 4
CHEM 177L Laboratory in General Chemistry I 1
CHEM 178 General Chemistry II 3
CHEM 178L Laboratory in General Chemistry II 1
CHEM 331 Organic Chemistry I 3
CHEM 331L Laboratory in Organic Chemistry I 1
CHEM 332 Organic Chemistry II 3
CHEM 332L Laboratory in Organic Chemistry II 1
Total Credits 17
Biological Sciences: 24-26 cr.

Total Credits 38

Electives: 0-13 cr. Select from any university coursework to earn at least 120.5 total credits.

Students planning to apply to health professional programs should review entrance requirements and select appropriate courses as electives. Many health professional programs also require physics. Concurrent B.S. and M.S. Program: Well-qualified students in Nutritional Science, pre-health professional and research option, who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both a Bachelor of Science (B.S.) degree in Nutritional Science and a Master of Science (M.S.) degree in Nutritional Sciences. For more information, refer to www.fshn.hs.iastate.edu

Electives: 11-20 cr. At least 9 credits of electives must be 300-400 level courses. Select from any university coursework to earn at least 120.5 total credits.

Courses for graduate students

(4-0) Cr. A. F. Prereq: Credit or enrollment in BBMB 404 or BBMB 420 Integration of the molecular, cellular, and physiologic aspects of energy, macronutrient, and micronutrient metabolism in mammalian systems. Survey course that includes interactions among nutrients (dietary carbohydrate, fiber, lipid, protein, vitamins, and minerals) and non-nutrients, metabolic consequences of nutrient deficiencies or excesses, relevant polymorphisms, and major research methodologies.

NUTRS 503. Biology of Adipose Tissue.

(2-0) Cr. 2. Alt. S., offered 2013. Prereq: Undergraduate: consent of instructor; Graduate: NUTRS 501 Principles regarding the development of adipose tissue and its role in energy balance, and will focus considerably on endocrine and immune actions of the adipocyte. Course material will be in lecture format, including handouts and selected journal articles. Students will be asked to lead critical discussions of key research findings as summary material for a given topic. Species differences will be highlighted, particularly as they relate to research models.

NUTRS 504. Nutrition and Epigenetic Regulation of Gene Expression.

(1-0) Cr. 1. Alt. S., offered 2012. Prereq: graduate standing; undergraduate with consent of instructor Discussion of epigenetic regulation of gene expression and the role that nutrition plays in this process. Examination of current research literature to understand how different nutrients and physiological states influence epigenetics, as well as, the research methodology used to address these relations.

NUTRS 505. Short Course.

(1-0) Cr. 1. SS. Prereq: Permission of instructor

NUTRS 506. Diet and cancer prevention.

(Cross-listed with TOX). (1-0) Cr. 1. Alt. F., offered 2012. Prereq: BBMB 404 and 405 or BBMB 420 Principles of cancer biology and cancer etiology will be integrated with the impacts of diet on cancer development and prevention. Contributions of research with humans, animals, cultured cells and cell free systems will be included. The importance of dietary contaminants, macronutrients and micronutrients will be examined with an emphasis on the strength of the evidence and mechanisms of action.

NUTRS 518. Digestive Physiology and Metabolism of Non Ruminants.

(Cross-listed with AN S). (3-0) Cr. 3. Alt. S., offered 2013. Prereq: AN S 419 or NUTRS 501 Digestion and metabolism of nutrients. Nutritional requirements and current research and feeding programs for poultry and swine.

NUTRS 519. Food Toxicology.

(Cross-listed with FS HN, TOX). (3-0) Cr. 3. Alt. F., offered 2012. Prereq: A course in biochemistry Basic principles of toxicology. Toxicants in the food supply: modes of action, toxicant defense systems, toxicant and nutrient interactions, risk assessment. Only one of NutRSc 419 and 519 may count toward graduation.

NUTRS 520. Digestive Physiology and Metabolism of Ruminants.

(Cross-listed with AN S). (2-2) Cr. 3. Alt. S., offered 2012. Prereq: AN S 419 or NUTRS 501 Digestive physiology and nutrient metabolism in ruminant and preruminant animals.

NUTRS 542. Introduction to Molecular Biology Techniques.

A. DNA Techniques. Includes genetic engineering procedures, sequencing, PCR, and genotyping. (F.S.SS.)

B. Protein Techniques. Includes fermentation, protein isolation, protein purification, SDS-PAGE, Western blotting, NMR, confocal microscopy and laser microdissection, immunophenotyping, and monoclonal antibody production. (F.S.SS.)

C. Cell Techniques. Includes immunophenotyping. ELISA, flow cytometry, microscopic techniques, and image analysis. (F.S.)

D. Plant Transformation. Includes Agrobacterium and particle gun-mediated transformation of tobacco, Arabidopsis, and maize, and analysis of transformants. (S.)

E. Proteomics. Includes two-dimensional electrophoresis, laser scanning, mass spectrometry, and database searching. (F)

F. Techniques in Metabolomics. metabolomics and the techniques involved in metabolite profiling. For non-chemistry majoring students who are seeking analytical aspects into their biological research projects.

G. Genomic Techniques

NUTRS 552. Advanced Vertebrate Physiology II.

(Cross-listed with AN S, KIN). (3-0) Cr. 3. S. Prereq: BIOL 335; credit or enrollment in BBMB 404 or 420 Cardiovascular, renal, respiratory, and digestive physiology.

NUTRS 561. Medical Nutrition and Disease I.

(4-0) Cr. 3-4. F. Prereq: FS HN 360, 3 credits in physiology at 300 level or above (Dual listed with FS HN 461) Pathophysiology of selected chronic disease states and their associated medical problems. Specific attention will be directed to medical nutrition needs of patients in the treatment of each disease state. Lecture section (1 cr.) will focus on refinement of assessment skills, diagnosis of nutritional problems, nutrition care, and documentation. Course must be taken for 4 credits if Didactic Program in Dietetics (DPD) verification statement of completion is desired. Graduate students may take the lecture portion without the recitation section.
NUTRS 562. Assessment of Nutritional Status.  
(3-0) Cr. 3. Alt. S., offered 2013. Prereq: FS HN 461/NUTRS 561 or NUTRS 501  
Overview and practical applications of methods for assessing nutritional status, including: theoretical framework of nutritional health and disease, dietary intake, biochemical indices, clinical examination, and body composition.

(3-0) Cr. 3. F. Prereq: FS HN 265 or 360; 366 recommended  
Dual listed with FS HN 463. Survey of current public health nutrition problems among nutritionally vulnerable individuals and groups. Discussion of the multidimensional nature of those problems and of community programs addressing them. Grant writing as a means for funding community nutrition program development. Significant emphasis on written and oral communication at the lay and professional level. Field trip.

NUTRS 564. Medical Nutrition and Disease II.  
(3-0) Cr. 3-4. S. Prereq: FS HN 360, FS HN 461, or NUTRS 561. 3 credits in physiology at 300 level or above  
(Dual listed with FS HN 464.) Pathophysiology of selected acute and chronic disease states and their associated medical problems. Specific attention will be directed to medical nutrition needs of patients in the treatment of each disease state.

NUTRS 619. Advanced Nutrition and Metabolism - Protein.  
(Cross-listed with AN S). (2-0) Cr. 2. Prereq: BBMB 405  
Digestion, absorption, and intermediary metabolism of amino acids and protein. Regulation of protein synthesis and degradation. Integration of cellular biochemistry and physiology of mammalian protein metabolism.

Cr. R. Repeatable. F.  
Current concepts in nutrition and related fields. Required for all graduate students in nutrition.

NUTRS 690. Special Problems.  
Cr. arr. Repeatable. F.S.SS.

NUTRS 695. Grant Proposal Writing.  
(Cross-listed with FS HN). (1-0) Cr. 1. F. Prereq: 3 credits of graduate course work in food science and/or nutrition  
Grant proposal preparation experiences including writing and critiquing of proposals and budget planning. Formation of grant writing teams in food science and/or nutrition. Offered on a satisfactory-fail basis only.

Cr. arr. F.S.SS.  
Offered on a satisfactory-fail basis only.
Plant Pathology

Undergraduate Study
The department participates in the interdepartmental undergraduate Microbiology major.

Graduate Study
The department offers studies for the degrees of master of science and doctor of philosophy with a major in plant pathology, and minor work for students majoring in other departments or programs. A master of science nonthesis option is available. The department also participates in the interdepartmental majors in microbiology; toxicology; genetics; plant physiology; molecular, cellular, and developmental biology; ecology and evolutionary biology; and sustainable agriculture.

Students entering graduate programs in the department need a sound background in the physical, biological, and mathematical sciences as well as adequate preparation in English.

Graduates have a broad understanding of the biology and management of plant pathogenic microorganisms and the interactions of pathogens with their host plants. They understand the relationship between plant pathology and allied disciplines and are able to communicate effectively with scientific colleagues and the general public in both formal and informal settings. Graduates are able to address complex plant disease problems facing agricultural and bioscience professionals, taking into account the related ethical, social, legal, and environmental issues. They are skilled in research procedures, communicating research results, and writing concise and persuasive grant proposals.

Courses primarily for undergraduate students

**PL P 391. Practical Plant Health.**
(0-4) Cr. 2. F. Prereq: 6 credits in biological sciences
Diagnosis of all types of plant health problems caused by diseases, insects, weeds, nutrient deficiencies and toxicities, herbicide injury, and environmental stress. Emphasis is on acquiring practical skills. Students will gain experience in written and oral communication.

**PL P 408. Principles of Plant Pathology.**
(Dual-listed with 508). (2-3) Cr. 3. F.S. Prereq: 8 credits in life sciences, including BIOL 211
Braun. Principles underlying the nature, diagnosis, and management of plant diseases. Laboratory complements lecture topics and provides experience in plant disease diagnosis.

**PL P 416. Forest Insect and Disease Ecology.**
(Cross-listed with FOR). (3-3) Cr. 4. F. Prereq: 8 credits in biological sciences, including BIOL 211
T. Harrington, M. Harris. Nature of insects and pathogens of forest and shade trees; their role in the dynamics of natural and managed forest ecosystems; and the management of indigenous and exotic pests. Nonmajor graduate credit.

**PL P 452. Integrated Management of Diseases and Insect Pests of Turfgrasses.**
(Dual-listed with 552). (Cross-listed with ENT, HORT). (3-0) Cr. 3. Alt. S., offered 2012. Prereq: HORT 351
Gleason, Lewis. Identification and biology of important diseases and insect pests of turfgrasses. Development of integrated pest management programs in various turfgrass environments.

**PL P 477. Bacterial-Plant Interactions.**
(Dual-listed with 577). (Cross-listed with MICRO). (3-0) Cr. 3. Alt. S., offered 2012. Prereq: 3 credits in microbiology or plant pathology
Focuses on plant-associated bacteria in terms of their ecology, diversity, and the physiological and molecular mechanisms involved in their interaction with plants; covers symbiotic nitrogen fixation, plant pathogenesis, plant growth promotion, and biological control.

**PL P 483. Wood Deterioration and Preservation.**
(Cross-listed with FOR). (2-3) Cr. 3. Alt. F. offered 2011. Prereq: FOR 280
Deterioration of wood in use by biological and physical agents. Wood preservation and fire retardant treatments. Environmental impact of wood treating. Nonmajor graduate credit.

**PL P 490. Independent Study.**
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.S. Prereq: Junior or senior classification, 7 credits in biological sciences, permission of instructor
A maximum of 6 credits of PI P 490 may be used toward the total of 128 credits required for graduation.

**PL P 494. Seed Pathology.**
(Dual-listed with 594). (2-3) Cr. 3. Alt. S., offered 2013. Prereq: 408
Munkvold. Significance of diseases on the major phases of seed production; growing, harvesting, conditioning, storing, and planting seed. Pathogens considered include fungi, bacteria, viruses, nematodes, and abiotic agents. Emphasis on epidemiology, management, host-pathogen relationships, seed transmission, and seed health testing. Credit may not be obtained for both PI P 494 and ST/B/PI P 592.

Courses primarily for graduate students, open to qualified undergraduate students

**PL P 506. Plant-Pathogen Interactions.**
(2-0) Cr. 2. S. Prereq: 408 or 416, BIOL 313
Baum, Whitham. Introduction to mechanisms of plant-parasite interaction. Genetics and molecular genetics of plant disease resistance and pathogenicity.

**PL P 508. Principles of Plant Pathology.**
(Dual-listed with 408). (2-3) Cr. 3. F.S. Prereq: 8 credits in life sciences, including BIOL 211
Braun. Principles underlying the nature, diagnosis, and management of plant diseases. Laboratory complements lecture topics and provides experience in plant disease diagnosis.

**PL P 509. Plant Virology.**
(Cross-listed with MICRO). (2-6) Cr. 4. Alt. S., offered 2013. Prereq: 408, BIOL 454, BBMB 405, CHEM 211
Hill. Plant viruses and the diseases they cause. Emphasis on epidemiology and control. Structure, function, and biochemical-biophysical properties of plant viruses.

**PL P 511. Integrated Management of Tropical Crops.**
(Cross-listed with ENT, HORT). (3-0) Cr. 3. Alt. S., offered 2013. Prereq: PL P 408 or 416 or ENT 370 or 376 or HORT 221
Gleason, Lewis. Applications of Integrated Crop Management principles (including plant pathology, entomology, and horticulture) to tropical cropping systems. Familiarization with a variety of tropical agroecosystems and Costa Rican culture is followed by 10-day tour of Costa Rican agriculture during spring break, then writeup of individual projects. Meets International Perspectives Requirement.

**PL P 530. Ecologically Based Pest Management Strategies.**
(Cross-listed with AGRON, ENT, SUSAG). (3-0) Cr. 3. Alt. F. offered 2012. Prereq: SUSAG 509
Durable, least-toxic strategies for managing weeds, pathogens, and insect pests, with emphasis on underlying ecological processes.
Nutter. Theory and practice related to the ecology and epidemiology of plant disease epidemics. Interactions among host and pathogen populations as affected by the environment are quantified with respect to time and space. Analysis of ecological and host and pathogen genetic factors that alter the course of plant disease epidemics. Risk assessment theory, disease forecasting, and modeling the impact of biotic plant stresses on yield and quality are also emphasized.

PL P 552. Integrated Management of Diseases and Insect Pests of Turfgrasses. (Dual-listed with 452). (Cross-listed with ENT, HORT). (3-0) Cr. 3. Alt. S., offered 2012. Prereq: HORT 351
Gleason, D. Lewis. Identification and biology of important diseases and insect pests of turfgrasses. Development of integrated pest management programs in various turfgrass environments.

Professional, ethical and legal issues facing scientists and engineers in academia. Offered in modular format.

A. Responsible Conduct of Research. (Cr. 1.0). F
B. Working with Industry. (Cr. 0.5).
C. Communications in Science. (Cr. 0.5). Alt S., offered 2011. Reading and reviewing manuscripts; publishing papers; oral and poster presentations.
D. Time Management and Mentoring. (Cr. 0.5). Alt F., offered 2012.
E. The Interview Process. (Cr. 0.5). Alt F., offered 2012. Applying and interviewing for academia, industry and government.
F. Grant Writing. (Cr. 1.0). Alt F., offered 2011. Writing a winning proposal.
G. Teaching. (Cr. 0.5). Preparation of a teaching portfolio and course materials; lecturing, technology.
S. Ethical and legal issues in research.
S. Establishing productive collaborations with industry.

PL P 574. Plant Nematology. (2-3) Cr. 3. Alt. F., offered 2012. Prereq: 408 or 416
Baum. Morphology, anatomy, identification, control, and life cycles of common plant-parasitic nematodes; host-parasite interactions; Caenorhabditis elegans.

PL P 577. Bacterial-Plant Interactions. (Dual-listed with 477). (Cross-listed with MICRO). (3-1) Cr. 3. Alt. S., offered 2012. Prereq: 3 credits in microbiology or plant pathology
Focuses on plant-associated bacteria in terms of their ecology, diversity, and the physiological and molecular mechanisms involved in their interaction with plants; covers symbiotic nitrogen fixation, plant pathogenesis, plant growth promotion, and biological control.

PL P 590. Special Topics. Cr. 1-3. Repeatable. F.S.SS. Prereq: 10 credits in biological sciences, permission of instructor

Munkvold. Occurrence and management of diseases during seed production, harvest, conditioning, storage, and planting. Emphasis on epidemiology, disease management in the field, seed treatment, effects of conditioning on seed health, and seed health testing. Credit may not be obtained for both PL P 592 and PL P 594.

Munkvold. Significance of diseases on the major phases of seed production; growing, harvesting, conditioning, storing, and planting seed. Pathogens considered include fungi, bacteria, viruses, nematodes, and abiotic agents. Emphasis on epidemiology, management, host-pathogen relationships, seed transmission, and seed health testing. Credit may not be obtained for both PL P 594 and STB/PI P 592.

Courses for graduate students

PL P 608. Molecular Virology. (Cross-listed with V MPM, MICRO). (3-0) Cr. 3. Alt. F., offered 2012. Prereq: BBMB 405 or GDCB 511
Advanced study of virus host-cell interactions. Molecular mechanisms of viral replication and pathogenesis.

PL P 691. Field Plant Pathology. (0-6) Cr. 2. Repeatable. Alt. SS., offered 2013. Prereq: 408 or 416
Diagnosis of plant diseases, plant disease assessment methods, and the integration of disease management into commercial crop production practices. Objectives are to familiarize students with common diseases of Midwest crops and landscape plants, and to provide experience in disease diagnosis. Field trips include commercial operations, agricultural research facilities, and ornamental plantings.

PL P 692. Molecular Biology of Plant-Pathogen Interactions. (Cross-listed with MICRO). (3-0) Cr. 3. Alt. F., offered 2012. Prereq: 506 or BBMB 405 or Gen 411 or MICRO 402 or strong background in molecular biology
Bogdanove, Whitham. Seminal and current research in molecular and physiological aspects of plant interactions with pathogens, including mechanisms of pathogenesis, host-pathogen recognition and host defense, with an emphasis on critical evaluation of primary literature. Students also complete an interinstitutional research proposal writing and peer review exercise.

PL P 694. Colloquium in Plant Pathology. (2-0) Cr. 2. Repeatable. F.S. Prereq: 408 or 416, permission of instructor
Advanced topics in plant pathology, including biological control, cultural control, resistance gene deployment, genetic engineering for disease resistance, chemical control, integrated pest management, emerging diseases, fungal genetics, insect vector biology, professional communications, etc.

Professional Agriculture

(Interdepartmental Program administered by the Department of Agricultural Education and Studies)

Graduate Study

The Professional Agriculture major is an off-campus non-thesis program leading to the Master of Agriculture (M.Ag.) degree. It is available to students wishing to pursue graduate studies in agriculture, or natural resources through distance education. It is considered to be a professional degree and not preparation for a doctoral program. The program emphasizes agriculture/natural resource information and technology transfer in a variety of settings including education, extension, agencies, and industry training/development.

Graduates have a broad base of knowledge in one or more agriculture disciplines. They have the ability to communicate effectively and make decisions based on knowledge. To earn the 32 credits necessary for graduation, students must complete 28 semester credits of formal coursework, and 4 credits of creative component. Courses are delivered through distance education via the WWW and DVD. On-campus workshops are offered during summer sessions. Specific courses offered in the program are listed on the College of Agriculture’s distance education website: www.agde.iastate.edu/.
Seed Technology and Business

(Interdepartmental Graduate Major)

**On-Line Graduate Study**

The Graduate Program in Seed Technology and Business offers students advanced study in the seed science and technology and business management appropriate for application in the seed sector. The program is offered by nine departments in the Colleges of Business and Agriculture and Life Sciences: Accounting; Agronomy; Finance; Horticulture; Logistics, Operations, and Management Information Systems; Management; Marketing; and Plant Pathology. This multidisciplinary program offers a focused on-line curriculum for a Master of Science in Seed Technology and Business, along with Graduate Certificates in Seed Science and Technology and in Seed Business Management. Courses are available to students in other majors.

The curriculum offers a set of scientific and technical courses that are focused on seed, with a set of basic management courses, similar to those in the core courses of an MBA program. The business courses will use examples drawn from the seed industry. A creative component is required for the Master of Science degree.

Prerequisite for the program is a bachelor’s degree in business, agriculture, other biological discipline, or related degrees. Graduate training in these disciplines will also be considered.

Graduates of the Graduate Program in Seed Technology and Business will be prepared for roles in management and leadership within private and public seed and seed-related organizations.

All of the courses listed below are required for the Master of Science degree, and the students are expected to go through the curriculum in order. The pace of the course sequence is designed to allow the students with work and other commitments to participate. Students will complete the creative component under the guidance of their Program of Study Committee. In many cases, the creative component topic will be associated with the student’s work.

Graduates of the Master of Science curriculum will be prepared for roles in management and leadership within seed-related organizations, private and public.

The program offers two graduate certificates:

**Graduate certificate in Seed Science and Technology**

Graduate certificate courses may be applied to the Master of Science in Seed Technology and Business. Those interested in these graduate certificates should contact the Program for details.

Information on application procedures and specific requirements of the major can be obtained from the following internet addresses: http://www.seedgrad.iastate.edu, or http://www.distance.iastate.edu/ or by writing to seedgrad@iastate.edu.

**Curriculum in Seed Science**

Administered by the Departments of Agricultural and Biosystems Engineering, Agronomy, Horticulture, and Plant Pathology. Must be taken as a secondary major in conjunction with a primary major. The seed science program is designed for students who have completed the core courses of an MBA program. The business courses will be drawn from the seed industry. Areas of study include: seed production, conditioning, pathology, physiology, quality control, and marketing, as well as seed plant designs.

**Total Credits**

21
Economics and Business: 9 cr.

ECON 101 Principles of Microeconomics 3
ECON 235 Introduction to Agricultural Markets 3
Three credit hours from the following: 3
ACCT 284 Financial Accounting
ECON 102 Principles of Macroeconomics
ECON 230 Farm Business Management
ECON 336 Agricultural Selling
MGMT 370 Management of Organizations
MKT 340 Principles of Marketing
Total Credits 9

Seed Science: 10 cr.

AGRON 338 Seed Science and Technology 3
AGRON 421 Introduction to Plant Breeding 3
AGRON 491 Seed Science Internship Experience 1-2
2 credits from 300-400 level from AGRON, PLP, TSM, or HORT 2
Total Credits 9-10

Typical Program for the First Year
Because seed science is a secondary major, the courses taken by the student during the first year will vary, depending on the primary major (see typical program for the primary major).

Courses for graduate students

(Cross-listed with BUSAD). (2-0) Cr. 2. Prereq: Admission to MS in Seed Technology and Business program or by special arrangement with the instructor
Critical analysis of current practice and case studies in strategic management with an emphasis on integrative decision making. Strategy formulation and implementation will be investigated in the context of complex business environments.

STB 503. Information Systems.
(Cross-listed with BUSAD). (2-0) Cr. 2. Prereq: Admission to MS in Seed Technology and Business program or by special arrangement with the instructor
Introduction to a broad variety of information systems (IS) topics, including current and emerging developments in information technology (IT), IT strategy in the context of corporate strategy, and IS planning and development of enterprise architectures. Cases and discussions highlight the techniques and tactics used by managers to cope with strategic issues within an increasingly technical competitive environment.

STB 504. Marketing and Logistics.
(Cross-listed with BUSAD). (3-0) Cr. 3. Prereq: Admission to MS in Seed Technology and Business program or by special arrangement with the instructor
Integration of the business functions concerned with the marketing and movement of goods along the supply chain with the primary goal of creating value for the ultimate customer. Coordination of marketing, production, and logistics activities within the firm and with outside suppliers and customers in the supply chain.

STB 505. Organizational Behavior.
(Cross-listed with BUSAD). (2-0) Cr. 2. Prereq: Admission to MS in Seed Technology and Business program or by special arrangement with the instructor
Understanding human behavior in organizations, and the nature of organizations from a managerial perspective. Special emphasis on how individual differences, such as perceptions, personality, and motivation, influence individual and group behavior in organizations and how behavior can be influenced by job design, leadership, groups, and the structure of organizations.

STB 508. Accounting and Finance.
(Cross-listed with BUSAD). (3-0) Cr. 3. Prereq: Admission to MS in Seed Technology and Business program or by special arrangement with the instructor
Survey of fundamental topics in accounting and finance. Financial statement reporting and analysis for agriculture firms, corporate governance issues related to financial reporting, (e.g., Sarbanes-Oxley). Basic tools and techniques used in financial management, including stock and bond valuation. How to assess and use capital budgeting methods to evaluate proposed firm investments.

STB 509. Seed Trade, Policy and Regulation.
(Cross-listed with BUSAD). (3-0) Cr. 3. Prereq: Admission to MS in Seed Technology and Business program or by special arrangement with the instructor
Cultural, financial, economic, political, legal/regulatory environments shaping an organization’s international business strategy. Topics include entry (and repatriation) of people, firms, goods, services, and capital. Special attention to the institutions of seed regulation and policy. Ethical issues facing managers operating in an international context.

STB 510. Crop Improvement.
(Cross-listed with AGRON). (2-0) Cr. 2. Prereq: Admission to the Seed Technology and Business Master’s Degree Program or approval of the instructor

STB 534. Seed and Variety, Testing and Technology.
(Cross-listed with AGRON). (2-0) Cr. 2. Prereq: Admission to the Seed Technology and Business Master’s Degree Program or approval of the instructor
The components of seed quality and how they are assessed in the laboratory, including traits derived from modern biotechnology. The impact of new technologies on seed quality testing. Variety maintenance procedures and breeder seed. Variety identification: phenotype and grow-out trials, isozyme testing, and DNA marker testing. Procedures for evaluating varieties. The variance tests appropriate for fixed effects analysis of variance. Statistical inference and stratification for yield trials. Use of strip plot testing.

STB 535. Introduction to the Seed Industry.
(Cross-listed with AGRON). Cr. 1. Prereq: Curriculum requires undergraduate specialization in a business or biological science
An analysis of the defining characteristics of the seed industry and introduction to the Master in Seed Technology and Business curriculum. The tasks of crop improvement and seed production will be analytically related to basic management functions and classifications of management activities that are used in the study of business administration. Management tasks and roles will be analyzed in relation to the public policy issues that shape the seed industry, including ethical and economical approaches to biotechnology, intellectual property, and corporate responsibility.

STB 536. Quantitative Methods for Seed.
(Cross-listed with AGRON). (1-0) Cr. 1. F. Prereq: Admission to the Seed Technology and Business Master’s Degree Program or approval of the instructor
Quantitative Methods for analyzing and interpreting agronomic and business information for the seed industry. Principles of experimental design and hypothesis testing, regression, correlation and graphical representation of data. Use of spreadsheets for manipulating, analyzing and presenting data.
STB 539. Seed Conditioning and Storage.  
(Cross-listed with AGRON). (2-0) Cr. 2.  Prereq: Admission to the Seed Technology and Business Master’s Degree Program or approval of the instructor  
The technical operations which may be carried out on a seed lot from harvest until it is ready for marketing and use. The opportunities for quality improvement and the risks of deterioration which are present during that time. Analysis of the costs of and benefits of operations. Evaluation of equipment based on benefits to the customer and producer. Interpretation of the role of the conditioning plant and store as a focal points within the overall operations of a seed company.

STB 543. Seed Physiology.  
(Cross-listed with HORT). (2-0) Cr. 2. Alt. F., offered 2012.  Prereq: Admission to the Graduate Seed Technology and Business Program or approval of the instructor  
Brief introduction to plant physiology. Physiological aspects of seed development, maturation, longevity, dormancy and germination. Links between physiology and seed quality.

STB 547. Seed Production.  
(Cross-listed with AGRON). (2-0) Cr. 2.  Prereq: Admission to the Seed Technology and Business Master’s Degree Program or approval of the instructor  
Survey of crop production; including management of soil fertility, planting dates, populations, weed control, and insect control. Analysis of the principles of seed multiplication and the key practices which are used to ensure high quality in the products. Field inspection procedures and production aspects that differ from other crop production. Foundation seed production. Analysis of the typical organization of field production tasks. Resources and capabilities required. Survey of differences in seed production strategies between crops and impact of differences on management of seed production.

STB 592. Seed Health Management.  
(Cross-listed with PL P). (2-0) Cr. 2. Alt. S., offered 2012.  Prereq: Admission to the Graduate Program in Seed Technology and Business/Consent of instructor  
Occurrence and management of diseases during seed production, harvest, conditioning, storage, and planting. Emphasis on epidemiology, disease management in the field, seed treatment, effects of conditioning on seed health, and seed health testing.

STB 595. Seed Quality, Production, and Research Management.  
(Cross-listed with AGRON). (3-0) Cr. 3.  Prereq: Admission to the Seed Technology and Business Master’s Degree Program or approval of the instructor  
Advanced survey of the organization, staff capabilities and management characteristics typical in seed production and crop improvement in seed enterprises. Analysis of the use of quality information in the management of seed operations and sales. Process management applications for seed. Production planning for existing capacity. Analysis of the manager’s tasks in the annual cycle and how the tasks of these managers relate to the general categories of business management roles. Difference in management strategies used with different situations and groups of employees.

STB 599. Creative Component.  
Cr. 3-4.  Prereq: Admission to the Master’s in Seed Technology and Business degree program and permission of the instructor  
A written report based on research, library readings, or topics related to the student’s area of specialization and approved by the student’s advisory committee.
Sustainable Agriculture

(Interdepartmental Graduate Major)

The graduate program in sustainable agriculture is an interdepartmental major offered through faculty in sixteen participating departments: Agricultural and Biosystems Engineering; Agricultural Education and Studies; Agronomy; Animal Science; Community and Regional Planning; Ecology, Evolution and Organismal Biology; Economics; Entomology; Food Science and Human Nutrition; Horticulture; Landscape Architecture; Natural Resource Ecology and Management; Philosophy and Religious Studies; Plant Pathology; Political Science; and Sociology. Both M.S. and Ph.D. degrees are offered within the major.

Master’s students must have a bachelor’s degree in one of the life, social, or engineering sciences, or a bachelor’s degree plus equivalent experience in these areas. Doctoral students must have a master’s degree and either an undergraduate or master’s degree in one of the majors in the College of Agriculture and Life Sciences or its equivalent. Graduates of the program will be able to design and manage agricultural systems that increase food security, enhance human communities, and protect environmental quality. To acquire these abilities, students learn agroecological principles, study social relations underlying sustainable farming and food systems, and gain experience with practical techniques of sustainable agriculture. The program seeks to balance depth in disciplinary knowledge and perspectives with broader, system-level thinking. It integrates technical and social sciences through a sequence of team-taught interdisciplinary core courses emphasizing higher-order critical thinking skills and active, collaborative approaches to learning.

Graduates of the program are qualified to work in a variety of settings, including university research, education, extension, agribusiness, governmental and nongovernmental organizations, and farming.

Information on applications procedures, research interests of the faculty, and specific requirements of the major may be obtained at http://www.sust.ag.iastate.edu/gpsa/ or by contacting gpsa@iastate.edu.

Courses for graduate students

SUSAG 509. Agroecosystem Analysis. (Cross-listed with AGRON, ANTHR, SOC). (3-4) Cr. 4. F. Prereq: Senior or above classification

Experiential, interdisciplinary examination of Midwestern agricultural and food systems, emphasizing field visits, with some classroom activities. Focus on understanding multiple elements, perspectives (agronomic, economic, ecological, social, etc.), and scales of operation.

Methods to maintain productivity and minimize the negative ecological effects of agricultural systems by understanding nutrient cycles, managing manure and crop residue, and utilizing multispecies interactions. Crop and livestock production within landscapes and watersheds is also considered. Course includes a significant field component, with student teams analyzing Iowa farms.

SUSAG 530. Ecologically Based Pest Management Strategies. (Cross-listed with AGRON, ENT, PL P). (3-0) Cr. 3. Alt. F. Offered 2012.

Durable, least-toxic strategies for managing weeds, pathogens, and insect pests, with emphasis on underlying ecological processes.

Project-focused engagement in food and farming systems using tools and perspectives drawn from multiple disciplines. Includes a field component.

SUSAG 571. Agroforestry Systems. (Cross-listed with NREM). (2-3) Cr. 3. Alt. F. Offered 2011. Prereq: 6 credits in biological science at 300-level or above

SUSAG 584. Organic Agricultural Theory and Practice. (Cross-listed with AGRON, HORT). (3-0) Cr. 3. Alt. S. Offered 2012. Prereq: 9 cr. in biological or physical sciences

Delate & DeWitt. Understanding of the historical origins and ecological theories underpinning the practices involved in organic agriculture. Interdisciplinary examination of crop and livestock production and socioeconomic processes and policies in organic agriculture from researcher and producer perspectives.

SUSAG 590. Special Topics. Cr. 1-3. Repeatable. F.S.SS. Prereq: Graduate classification, permission of instructor

For students wishing to conduct in-depth study of a particular topic in sustainable agriculture.

SUSAG 599. Creative Component. Cr. Arr. F.S.SS.

Pre-enrollment contract required. For MS students pursuing the nonthesis degree option. Final product is a creative component.

SUSAG 600. Sustainable Agriculture Colloquium. (1-0) Cr. 1. Repeatable. F.S.

Weekly seminar for graduate students in the Sustainable Agriculture program.

SUSAG 610. Foundations of Sustainable Agriculture. (Cross-listed with AGRON, A E, ANTHR, SOC). (3-0) Cr. 3. F. Prereq: Graduate classification, permission of instructor

Historical, biophysical, socioeconomic, and ethical dimensions of agricultural sustainability. Strategies for evaluating existing and emerging agricultural systems in terms of the core concepts of sustainability and their theoretical contexts.

MS and PhD thesis and dissertation research.
Undergraduate Study
Technology and social change is a cross-disciplinary program examining the relationships between technologies and the social and cultural environments. The program has a national and international perspective, with courses addressing the interrelationships, policies, and impacts created by the international exchange of technologies. Through T SC, students will better understand the institutional and sociocultural consequences of technological change from differing perspectives and will become sensitive to the issues attending the use of technology to improve people’s lives. Work in the program can also serve as preparation for advanced study in this field.

The program requirement for a minor in technology and social change is a minimum of 15 credits.

- T SC 341 Technology: International, Social, and Human Issues 3
- 3 credits from T SC cross-listed courses 3
- 9 credits selected from T SC cross-listed courses or from the list of T SC approved courses 9
- SC approved courses

Total Credits 15

At least 9 of the 15 credits must be in courses numbered 300 or above. Because technology and social change is an interdisciplinary study, minor programs must include coursework in at least two departments. Students seeking a minor should develop a specific program of courses either with the T SC faculty representative in their department or with the T SC coordinator. The student’s minor program must be approved by the T SC program coordinator.

T SC courses are listed below. The list of T SC approved courses is available from the program coordinators. Through the program coordinator, students may petition for approval of courses not on the approved list that address matters relevant to technology and social change.

Graduate Study
The graduate minor in technology and social change is a cross-disciplinary program that enables students to study the interactions between technologies and their users, on both societal and individual levels. The minor strengthens the ability of students to apply differing perspectives in understanding the effects of the global exchange of technologies and to heighten their sensitivity to the institutional and sociocultural issues attending the use of technology to improve people’s lives.

Students choosing to minor in technology and social change will pursue a degree program in the major department. In consultation with their major professor, students are to identify a T SC Faculty member to serve on the committee guiding their program of study. This T SC Faculty member must be on the Graduate faculty and must be from a discipline outside the major field of study. With the agreement of the POS committee, the student declaring a minor in T SC will select a group of courses from the list of T SC approved courses available through the program coordinators. For the master’s degree, this group should be at least 9 credits; for a doctoral degree, the group should be at least 15 credits. In either case, T SC 543 Technological Innovation, Social Change, and Development is required. Students may not include in their minor any courses from their own major. All programs of study that include a T SC minor must be approved by the T SC Program coordinator.

Courses primarily for undergraduate students

T SC 220. Globalization and Sustainability.
(Cross-listed with ANTHR, ENV S, GLOBE, MAT E, M E, SOC). (3-0) Cr. 3. FS.
An introduction to understanding the key global issues in sustainability. Focuses on interconnected roles of energy, materials, human resources, economics, and technology in building and maintaining sustainable systems. Applications discussed will include challenges in both the developed and developing world and will examine the role of technology in a resource-constrained world. Cannot be used for technical elective credit in any engineering department.

Meets International Perspectives Requirement.

(3-0) Cr. 3. F. Prereq: Junior classification
An interdisciplinary study of the international significance of technology and of the societal and human issues attending its development and adoption.

(Cross-listed with AGRON, ENV S, FS HN). (3-0) Cr. 3. FS. Prereq: Junior classification
Zdorkowski, Ford. Issues in the agricultural and food systems of the developed and developing world. Emphasis on economic, social, historical, ethical and environmental contexts. Causes and consequences of overnutrition/undernutrition, poverty, hunger and access/distribution. Explorations of current issues and ideas for the future. Team projects. Nonmajor graduate credit.

Meets International Perspectives Requirement.

H. Honors Section. (Honors Program students only.)

T SC 343. Philosophy of Technology.
(Cross-listed with PHIL). (3-0) Cr. 3. FS. Prereq: 6 credits of social science or T SC 341 and 3 credits of social science
Moral and other philosophical problems related to developments in technology. Topics may include conditions under which technological innovations contribute to human emancipation, relationship of technology and democracy, utility and limits of technical rationality, and problems of ensuring that benefits of technological advance are communally shared. Topics discussed with reference to such issues as contemporary developments in microelectronics, technology transfer to the Third World, etc. Nonmajor graduate credit.

T SC 474. Communication Technology and Social Change.
(Cross-listed with JL MC). (3-0) Cr. 3. Prereq: Junior classification
Examination of historical and current communication technologies, including how they shape and are shaped by the cultural and social practices into which they are introduced.

Meets International Perspectives Requirement.

T SC 490. Independent Study.
Cr. arr. Repeatable. Prereq: 341, permission of instructor and of T SC coordinator

T SC 543. Technological Innovation, Social Change, and Development.
(3-0) Cr. 3. Alt. F, offered 2012. Prereq: 6 credits in social sciences
Sources, theories and models of technological innovation; social and institutional contexts of technology transfer; appropriate/intermediate technology; issues and methods of impact assessment; planning technology related social change; democratic control of technological innovations and application; local and international case studies.
T SC 574. Communication Technologies and Social Change.
(Cross-listed with JL MC). (3-0) Cr. 3. Prereq: 6 credits in social science
Personal, organizational, and social implications of the use of communication technologies. Includes theories and empirical research across the continuum of perspectives, from techno-utopianism through an anti-technology stance.

Meets International Perspectives Requirement.

Cr. arr. Prereq: 541, permission of instructor and of T SC coordinator
Individual study of topics concerning global and local implications of technological change.
Technology Systems Management

(Administered by the Department of Agricultural and Biosystems Engineering)

Undergraduate Study
The Department of Agricultural and Biosystems Engineering offers work for the bachelor of science degree with majors in agricultural systems technology and industrial technology.

Missions
The mission of the Agricultural Systems Technology program is to prepare women and men for careers that integrate and apply agricultural and biosystems engineering technology to manage human and natural resource systems for producing, processing, and marketing food and other biological products worldwide.

The mission of the Industrial Technology is to prepare women and men for careers that integrate and apply industrial technology to lead and manage human, manufacturing, and safety systems.

Objectives
At two to five years after undergraduate graduation, through the professional practice in technology, graduates should:

1. Have demonstrated competence in methods of analysis involving use of mathematics, fundamental physical and biological sciences, technology, and computation needed for the professional practice in the field of agricultural systems technology or industrial technology.

2. Have developed skills necessary to contribute to the design process; including the abilities to think creatively, to formulate problem statements, to communicate effectively, to synthesize information, and to evaluate and implement problem solutions.

3. Be capable of addressing issues of ethics, safety, professionalism, cultural diversity, globalization, environmental impact, and social and economic impact in professional practice.

4. Have demonstrated continuous professional and technical growth, with practical experience, so as to be licensed in their field or achieve that level of expertise, as applicable.

5. Have demonstrated the ability to:
   a. be a successful leader of multi-disciplinary teams.
   b. efficiently manage multiple simultaneous projects.
   c. work collaboratively.
   d. implement multi-disciplinary systems-based solutions.
   e. to apply innovative solutions to problems through the use of new methods or technologies.
   f. contribute to the business success of their employer, and
   g. build community.

Outcomes
At the time of graduation, students of the Agricultural Systems Technology or Industrial Technology programs should have:

a) an ability to apply knowledge of mathematics, science, technology, and applied sciences;

b) an ability to design and conduct experiments, as well as to analyze and interpret data;

c) an ability to formulate or design a system, process or program to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability;

d) an ability to function on multi-disciplinary teams;

f) an understanding of professional and ethical responsibility;

g) an ability to communicate effectively;

h) the broad education necessary to understand the impact of solutions in a global, economic, environmental, and societal context;

i) a recognition of the need for, and an ability to engage in life-long learning;

j) a knowledge of contemporary issues; and

k) an ability to use the techniques, skills, and modern scientific and technical tools necessary for professional practice.

Graduates have developed and demonstrated workplace competencies, and have completed a professional internship. They are able to communicate effectively, have problem-solving skills and awareness of global, economic, environmental and societal issues.

Agricultural Systems Technology graduates have the ability to apply science and technology to problems related to agriculture; they manage complex agricultural systems for sustainability. They find careers within a variety of agriculturally-related industries, businesses, and organizations, including: agricultural machinery, environment, government, farm builders, grain, feed, seed, fertilizer, chemical, food, biorenewable resources, and production agriculture.

Industrial Technology graduates understand commonly-used manufacturing processes, lean manufacturing principles, continuous improvement, quality management, safety, regulatory issues affecting manufacturing, and the properties of manufacturing materials. They find careers within a variety of agriculturally-related industries, businesses, and organizations focusing in manufacturing (e.g., quality control, production supervision, and process and facility planning) or occupational safety (e.g., development, management, and evaluation of safety programs and systems; and hazard identification and mitigation).

Certificate in occupational safety
The Department of Agricultural and Biosystems Engineering offers a undergraduate certificate in occupational safety which may be earned by completing a minimum of 20 credits of technology systems management courses, which includes:

<table>

For the undergraduate curriculum in agricultural systems technology leading to the degree of bachelor of science or for the undergraduate curriculum in industrial technology leading to the degree of bachelor of science.

The department also offers an undergraduate curricula and courses in agricultural engineering, biological systems engineering.

**Graduate Study**

The department offers work for the degrees master of science, and doctor of philosophy with a major in industrial and agricultural technology. It cooperates in the interdepartmental programs in professional agriculture, sustainable agriculture, environmental sciences, bioenergy, and human computer interaction.

The master’s program prepares advanced practicing professionals for industrial and/or agricultural technology positions in industry, business, and public service; it also provides a sound foundation for further graduate study. The doctoral program prepares exemplary industrial and/or agricultural technology professionals for learning, discovery, engagement, and leadership roles in education, industry, business, and public service organizations.

The department also offers work for the degrees master of science, master of engineering, and doctor of philosophy with a major in agricultural engineering. See College of Engineering, Curricula.

Visit our departmental website at www.abe.iastate.edu

**Curriculum in Agricultural Systems Technology**

Administered by the Department of Agricultural and Biosystems Engineering. A minor in agricultural systems technology is available; the requirements appear under Technology Systems Management, Courses and Programs.

Students majoring in Agricultural Systems Technology choose between two options: Agricultural and Biosystems Management or Machine Systems.

**Total Degree Requirement: 125.5 cr.**

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

**International Perspective: 3 cr.**

**U.S. Diversity: 3 cr.**

**Communications Proficiency:**

6 cr. of English composition with a C or better and 3 cr. of speech fundamentals with a C or better.

**Communication/Library 12.5 cr.**

Courses primarily for undergraduate students.

**TSM 110. Introduction to Technology.**
(1-0) Cr. 1. F. Prereq: AST and I Tec majors only or permission of instructor
Team-oriented introduction to agricultural systems technology and industrial technology. Internships, careers, competencies, academic success strategies, industry visits, transition to academic life.

**TSM 111. Experiencing Technology.**
(0-2) Cr. 1. S. Prereq: AST or I Tec majors only or permission of instructor Laboratory-based, team-oriented experiences in a spectrum of topics common to the practice of technology. Report writing, internships, competencies, portfolios, industry visits.

**TSM 112. Orientation to Learning and Productive Team Membership.**
(Cross-listed with AER E, CON E, FS HN, HORT, NREM). (2-0) Cr. 2. F
Introduction to developing intentional learners and worthy team members. Learning as the foundation of human enterprise; intellectual curiosity; ethics as a personal responsibility; everyday leadership; effective team and community interactions including team learning and the effects on individuals; and growth through understanding self, demonstrating ownership of own learning, and internalizing commitment to helping others. Intentional mental processing as a means of enhancing learning. Interconnectedness of the individual, the community, and the world.

**TSM 114. Developing Responsible Learners and Effective Leaders.**
(Cross-listed with CON E, FS HN, HORT, NREM). (2-0) Cr. 2. S. Prereq: NREM 112
Focus on team and community. Application of fundamentals of human learning: evidence of development as a responsible learner; intentional mental processing as a habit of mind; planning and facilitating learning opportunities for others; responsibility of the individual to the community and the world; leading from within; holding self and others accountable for growth and development as learners and leaders.

**TSM 115. Solving Technology Problems.**
(2-2) Cr. 3. F.S. Prereq: MATH 140 or higher (can be taken concurrently)
Solving technology problems and presenting solutions through technical reports. Unit conversions, unit factor method, SI units, significant digits, graphing and curve fitting. Use of spreadsheet programs to solve and present technology problems. Solution of technology problems using computer programming languages.

**TSM 116. Introduction to Design in Technology.**
(2-2) Cr. 3. F.S.
2D projections and 3D representations of objects, national and international standards for documentation, manufacturing processes, design projects, and teamwork. Free-hand sketching techniques and parametric solid modeling will be covered.

**TSM 201. Preparing for Workplace Seminar.**
(Cross-listed with A E, BSE). (1-0) Cr. 1. F.S. Prereq: Sophomore classification in AE, AST, BSE, or I Tec
8 week course. Professionalism in the context of the engineering/technical workplace. Development and demonstration of key workplace competencies: teamwork, initiative, communication, innovation, and customer focus. Resumes; Professional portfolios: Preparation for internship experiences.

**TSM 210. Fundamentals of Technology.**
(3-0) Cr. 3. F.S. Prereq: 115 (may be taken concurrently) or equivalent, MATH 140 or higher
Introduction to problem solving related to fundamental agricultural and/or industrial technology systems: Basic laws of energy, force, and mass, and their application in simple mechanical systems and thermal systems. Introduction to modern information technology; GPS and Internet, their basic framework and implementations. Introduction to engineering economics: using the time value of money to make economic decisions.

**TSM 216. Advanced Technical Graphics, Interpretation, and CAD.**
(2-2) Cr. 3. F.S. Prereq: 116
Advanced design systems incorporating 2D and 3D design and productivity tools for use in manufacturing settings. Topics include: Geometric Dimensioning and Tolerancing, 3D models, welding symbols, advanced visualization, design modeling of parts and assemblies, feature based design. Use of AutoCAD and parametric modeling software.

**TSM 240. Introduction to Manufacturing Processes.**
(1-4) Cr. 3. F.S.
A study of selected materials and related processes used in manufacturing. Lecture and laboratory activities focus on materials, properties, and processes. This includes plastics and metals.

**TSM 270. Principles of Injury Prevention.**
(3-0) Cr. 3. F.
Basic foundations of injury causation and prevention in home, motor vehicle, public, and work environments.

**TSM 310. Total Quality Improvement.**
(0-2) Cr. 1. S. Prereq: STAT 101 or 104, junior classification
Introduction to the fundamental concepts of TQM - Deming style of management, statistical studies to understand the behavior of products, processes, or services, and how to define and document processes and customer focus. Introduction to continuous improvement tools and methods - DMAIC, SPC, and Lean, Six Sigma, and JIT; emphasis on team work and problem solving skills.

**TSM 322. Preservation of Grain Quality.**
(2-0) Cr. 2. S. Prereq: MATH 140 or higher
Principles and management for grain quality preservation. Quality measurement. Drying and storage. Fans and airflow through grain. Handling methods.

**TSM 322L. Preservation of Grain Quality.**
(0-3) Cr. 1. S. Prereq: Credit or enrollment for credit in 322

**TSM 324. Soil and Water Conservation Management.**
(2-2) Cr. 3. S. Prereq: MATH 140 or 160
Introduction to engineering and conservation principles applied to the planning of erosion control systems, water control structures, water quality management, and drainage and irrigation systems.

**TSM 325. Biorenewable Systems.**
(Cross-listed with A E, AGRON, AN S, BSE, BUSAD, ECON). (3-0) Cr. 3. F. Prereq: ECON 101, CHEM 163 or higher, MATH 140 or higher
Converting biorenewable resources into bioenergy and biobased products. Biorenewable concepts as they relate to drivers of change, feedstock production, processes, products, co-products, economics, and transportation/logistics.

**TSM 327. Animal Production Systems.**
(3-0) Cr. 3. F. Prereq: 210
Confined animal feeding operations. Environmental controls for animal production. Response of animals to the environment. Heat and moisture balance in animal housing. Ventilation, water, feed handling, air pollution, odor and waste management systems.

**TSM 330. Agricultural Machinery and Power Management.**
(2-3) Cr. 3. S. Prereq: 210, MATH 142 or 160
Selection, sizing, and operational principles of tractors and machinery systems. Cost analysis and computer techniques applied to planning and management of agricultural machine systems. Principles, operation, and application of agricultural machinery.
TSM 333. Precision Farming Systems.
(2-2) Cr. 3. F. Prereq: MATH 140 or 160, junior or senior classification

TSM 335. Tractor Power.
(3-3) Cr. 4. F. Prereq: 210, MATH 142
Theory and construction of tractor engines, mechanical power trains and hydraulic systems. Introduction to traction, chassis mechanics, and hydraulic power.

TSM 337. Fluid Power Systems Technology.
(2-2) Cr. 3. S. Prereq: 210
Fundamental fluid power principles. Fluid properties. Function and performance of components such as pumps, valves, actuators, hydrostatic transmission and continuously variable transmissions. Basic analysis of fluid power systems. Introduction to electrohydraulics.

(2-2) Cr. 3. F. Prereq: 216, 240, MATH 142
NC programming operations for CNC mills and lathes. Transfer of part descriptions into detailed process plans, tool selection, and NC codes. Computer assisted CAD/CAM NC programming for 2D/3D machining.

TSM 363. Electric Power and Electronics for Agriculture and Industry.
(3-3) Cr. 4. S. Prereq: 210, Physics 112
Basic electricity. Electrical safety, wiring, 3-phase service, controls, and motors for agricultural and industrial applications. Planning building lighting and electrical systems. Electronics to sense, monitor, and control mechanical processes. Nonmajor graduate credit.

TSM 370. Occupational Safety.
(3-0) Cr. 3. S. Prereq: 270, junior standing
Identifies safety and health risks in industrial work environments. Focus on how managers and supervisors meet their responsibilities for providing a safe workplace for their employees. Includes the identification and remediation of workplace hazards. Nonmajor graduate credit.

(2-0) Cr. 2. S
Introduction to occupational safety and health administration and management. Focus on development and management of safety programs and obtaining employee involvement in occupational safety programs.

TSM 372. Legal Aspects of Occupational Safety and Health.
(2-0) Cr. 2. Alt. F., offered 2011. Prereq: 371
Legal implications of legislation as it applies to health and safety in the workplace. Includes OSHA regulations, worker’s compensation, and workplace liability.

(3-0) Cr. 3. Alt. F., offered 2012
An overview of the current problems and technology in the fields of fire protection and fire prevention, with emphasis on industrial needs, focusing on the individual with industrial safety responsibilities.

TSM 393. Topics in Technology.
Cr. 1-4. F.S.SS.
Offered as demand warrants. Web-based instruction.
A. Agriculture and Biosystems Management
B. Machine Systems
C. Manufacturing
D. Occupational Safety
E. Chemical Application Systems
F. Agricultural Safety and Health
G. Electronic Integration for Agriculture and Production Systems

I. Irrigation Systems Management
J. Machinery Management Using Precision Agriculture Technology

TSM 397. Internship in Technology.
Cr. R. F.S.SS. Prereq: At least 45 credits of coursework, in AST or I Tec major, and approval of internship coordinator
A supervised work experience in an approved learning setting with application to technology practices and principles. Reporting during work experience and self and employer evaluation required. Minimum GPA requirement.

TSM 399. Work Experience in Technology.
Cr. 2. Repeatable, maximum of 4 credits. F.S.SS. Prereq: 397 and approval of instructor
Written reports and reflection on work experience. A maximum of 4 credits of TSM 399 maybe be used toward the total credits required for graduation.

TSM 408. Interdisciplinary Problem Solving.
(Cross-listed with I E). (3-0) Cr. 3. Alt. F., offered 2011.S. Alt. SS., offered 2012. Prereq: Junior or senior classification
Use of the Theory of Constraints as a way of approaching problem solving, win-win negotiation, project planning and effective delegation in the context of engineering/business systems. Team projects aimed at improving design outcomes. Nonmajor graduate credit.

TSM 409. Interdisciplinary Systems Effectiveness.
(Cross-listed with I E). (3-0) Cr. 3. Alt. F., offered 2011.S. Alt. SS., offered 2012. Prereq: Junior or senior classification
Focus on functions that determine the effectiveness of an entire organization. Generic Theory of Constraints solutions to production, distribution, and project management are compared to traditional solutions. Strategy for improvements discovered using simulations. Nonmajor graduate credit.

TSM 415. Technology Capstone I.
(1-2) Cr. 2. F.S. Prereq: senior classification
Team development, communications, and responsibilities. Identification of current technological problems in agricultural and industrial systems. Development of alternate solutions using creativity, critical analysis, and planning techniques.

TSM 416. Technology Capstone II.
(1-2) Cr. 2. F.S. Prereq: 415
Selection of promising potential solutions to technology problems identified in 415 for development and analysis by student teams. Presentation of project through oral presentations, written reports, and working prototypes.

(2-2) Cr. 3. F.S. Prereq: 310, 340
Reviews principles and concepts required for cellular manufacturing system design to meet customer demand in production, quality, on-time delivery, and continuously reducing manufacturing cost. Emphasis on applying lean manufacturing principles, simulation techniques, and Kaizen methodologies with hands-on projects.

TSM 443. Statics and Strength of Materials for Technology.
(2-2) Cr. 3. S. Prereq: AE 271 or 272; PHYS 111
Application of standard analytic and computer based techniques of solving problems related to force and moments. The properties of materials and how to select appropriate materials for a particular design is reviewed.

TSM 444. Facility Planning.
(3-0) Cr. 3. F. Prereq: 216 and 240; STAT 101 or 104
Principles and practices in designing, evaluating, and organizing existing facilities or creating new facilities. Emphasis on AutoCAD-based new facility design project - product design, production flow analysis, activity relationship analysis, layout deployment, materials handling, office and other service requirement design, and the necessary cost analysis for the new facility.
(2-2) Cr. 3. S. Prereq: 363
Theory and applications of automation systems. Emphasizes features, capabilities, design and programming skills of Programmable Logic Controller (PLC) based industrial control systems. Introduction to industrial robots and sensors.

TSM 470. Industrial Hygiene: Physical, Chemical, and Biological Hazards.
(3-0) Cr. 3. Alt. S., offered 2012. Prereq: MATH 160 or higher
A qualitative and quantitative introduction to health effects of chemical, biological, and physical hazards in a workplace. Nonmajor graduate credit.

TSM 471. Safety Laboratory.
(0-2) Cr. 1. Alt. S., offered 2012. Prereq: 470 (can be taken concurrently)
Introduction to equipment, methods, and strategies to measure, evaluate, control, and research hazards and risk in the workplaces.

TSM 477. Risk Analysis and Management.
(Dual-listed with FOR). (3-0) Cr. 3. F. Prereq: FOR 280 or TSM 210 or A E 216 or equivalent
Risk analysis and management focuses on developing a risk oriented pattern of thinking that is appropriate for today’s complex world. The tools that will be gained in this course will be helpful in recognizing, understanding, and analyzing hazards and risks in modern complex systems.

(Cross-listed with FOR). (2-3) Cr. 3. F. Prereq: FOR 280 or TSM 210 or A E 215 or equivalent

TSM 490. Independent Study.
Cr. 1-4. Repeatable. Prereq: Junior or senior classification, permission of instructor, and completion of an independent study contract and approval by department
A maximum of 4 credits of TSM 490 may be used toward the total credits required for graduation.

H. Honors
I. Manufacturing
J. Agriculture and Biosystems Management
M. Machine Systems
O. Occupational Safety

TSM 493. Workshop in Technology.
Cr. 1-4. Repeatable. Offered as demand warrants.
A. Agriculture and Biosystems Management
B. Machine Systems
C. Manufacturing
D. Occupational Safety

TSM 496. Technology Travel Course.
Cr. 1-4. Repeatable. FS.SS. Prereq: Permission of instructor
Limited enrollment. Tour and study of international industrial technology and/or agricultural systems technology industries. Location and duration of tours will vary. Travel expenses paid by students. Course requires completion of options A, B, and C or option D.

A. Pre-departure
B. Travel (R credit)
C. Post-travel
D. Combination (Pre-departure, Travel, and Post-travel)

Courses primarily for graduate students, open to qualified undergraduate students

TSM 540. Advanced Design and Manufacturing.
(3-0) Cr. 3. S. Prereq: Permission of instructor
Application of six sigma philosophy to advance product design and process control. Application of value stream mapping to the existing manufacturing system to develop future continuous improvement plans. Application of Taguchi Parameter design methodologies for optimizing the performance of manufacturing processes. Application of Taguchi Tolerance Design methodologies for product design.

(3-0) Cr. 3. SS. Prereq: Permission of instructor
The study, design, and implementation of PULL manufacturing systems and their integration with functions of the production system for the manufacture of superior quality, low cost products. Topics include lean manufacturing system design, cost estimation/justification, JIT manufacturing, integrated quality and process control, automation, and CAD/CAM.

TSM 545. Manufacturability of Plastics.
(2-2) Cr. 3. Prereq: Graduate classification or Permission of instructor
Fundamental concepts of polymer processing, including mass transfer and heat flow. Fundamental polymer concepts include squeeze flow, screw mechanisms, drag and pressure induced melt removal, molecular diffusion and crystallization. Material properties, including creep and relaxation as well as Newtonian and non-Newtonian fluid flow are detailed and modeled. Models derived from fundamental mass and energy conservation concepts. Multi-physical finite element modeling of fluid flow and heat transfer completed with Ansys and Moldflow. Petrochemical and sustainable polymers, including PLA, plant oil and protein plastics, thermoplastics and thermosets.

(2-0) Cr. 2. Repeatable, maximum of 2 times.
Exploration and analysis of current safety and public health issues impacting society. The focus will be on topics that impact individuals in work, public, and home environments.

TSM 577. Risk Analysis and Management.
(Dual-listed with 477). (3-0) Cr. 3. Alt. F., offered 2012. Prereq: MATH 160, STAT 101 or 104
Risk analysis and management focuses on developing a risk oriented pattern of thinking that is appropriate for today’s complex world. The tools that will be gained in this course will be helpful in recognizing, understanding, and analyzing hazards and risks in modern complex systems.

TSM 590. Special Topics in Technology.
Cr. 1-4. Repeatable, maximum of 4 credits. Prereq: Graduate classification in industrial and agricultural technology, permission of instructor, and completion of an independent study contract approved by major professor
A. Agriculture and Biosystems Management
B. Machine Systems
C. Manufacturing
D. Occupational Safety

TSM 593. Workshop in Technology.
Cr. 1-3. Repeatable. Prereq: Permission of instructor
TSM 598. Technical Communications for a Master’s Degree.
(Cross-listed with A E). Cr. 1. F.S.S.
A technical paper draft based on the M.S. thesis or creative component is required of all master’s students. This paper must be in a form that satisfies the requirements of some specific journal and be ready for submission. A technical presentation based on M.S. thesis or creative component is required of all master’s students. This presentation must be in a form that satisfies the normal presentation requirements of a professional society. The presentation itself (oral or poster) may be made at a professional society meeting or at any international, regional, state, or university conference/event as long as the presentation content and form conforms to normal expectations. Offered on a satisfactory-fail basis only.

TSM 599. Creative Component.
Cr. 1-3. Repeatable, maximum of 6 credits.
A discipline-related problem to be identified and completed under the direction of the program adviser. Three credits required for all nonthesis master’s degree students.

TSM 601. Graduate Seminar.
(Cross-listed with A E). (1-0) Cr. 1. F.
Keys to writing a good MS thesis or PhD dissertation. How to begin formulating research problems. Discussion of research problems, review of literature, research hypothesis, objectives, methods, procedures, and reports. Research grant proposals, patents and intellectual property rights, and international research centers of excellence will be discussed.

TSM 652. Program and Learner Evaluation.
(3-0) Cr. 3. Prereq: STAT 401 or equivalent
Techniques for evaluating learners, facilities, programs, and staff utilizing theories for developing measurement instruments. Outcomes assessment is emphasized.

(3-0) Cr. 3. Prereq: Permission of instructor
A definition of the faculty role in technology and engineering disciplines, including strategies for dealing with programs, personnel, and constituencies are presented. Leadership skills involving team formation, team operation, and conflict resolution are addressed.

(3-0) Cr. 3. Prereq: Permission of instructor
Basic concepts, trends, practices, and factors influencing curriculum development, techniques, organization and procedures. Emphasis will be given to program and course development.

TSM 694. Teaching Practicum.
(Cross-listed with A E). Cr. 1-3. Repeatable, maximum of 6 credits. F.S.S.
Prereq: Graduate classification and permission of instructor
Graduate student experience in the agricultural and biosystems engineering departmental teaching program.

TSM 697. Internship in Technology.
Cr. R.
Prereq: permission of major professor and approval by department chair, graduate classification
One semester and one summer maximum per academic year professional work period. Offered on a satisfactory-fail basis only.

TSM 698. Technical Communications for a Doctoral Degree.
(Cross-listed with A E). Cr. 1. F.S.S.
A technical paper draft based on the dissertation is required of all Ph.D. students. This paper must be in a form that satisfies the requirements of some specific journal and be ready for submission. A technical presentation based on the dissertation is required of all Ph.D. students. This presentation must be in a form that satisfies the normal presentation requirements of a professional society. The presentation itself (oral or poster) may be made at a professional society meeting or at any international, regional, state, or university conference/event as long as the presentation content and form conforms to normal expectations. Offered on a satisfactory-fail basis only.

TSM 699. Research.

College of Business

Labh S. Hira, Dean
Michael R. Crum, Associate Dean
Danny J. Johnson, Interim Associate Dean

www.bus.iastate.edu

Departments of the College
- Accounting
- Finance
- Management
- Marketing
- Supply Chain and Information Systems

Objectives of the Curriculum in Business
The instructional objective of the College of Business is to provide a high quality professional education in business. Such an education should provide the student with: (1) an appreciation of the evolution of the profession and an awareness of the ethical, global, technological, economic, political and social forces shaping its future; (2) an understanding of the major functional areas of business with the opportunity for specialization for a career in business; (3) an ability to recognize and appreciate the affect of diversity in the work place; (4) an opportunity for advanced study.

A comprehensive education in business includes a broad foundation in the liberal arts, courses in the major functional areas of business activity, proficiency in analytical methods, and the ability to identify problems and arrive at logical solutions. In addition, a professional education is designed to inspire students to assume business and community leadership.

The curriculum in business is accredited by AASCB International, the Association to Advance Collegiate Schools of Business, the national business accrediting agency.

Organization of Curriculum
The undergraduate curriculum in business is divided into two phases: a general education (pre-business) program and a professional program. The pre-business requirements provide a broad foundation in the liberal arts. The professional program includes two parts: (1) the business core which provides a common body of knowledge in all the functional areas in business, and (2) a major area of study. The eight majors offered for the degree bachelor of science (B.S.) are accounting; finance; management; management information systems; marketing; supply chain management; and business economics. The college also offers a secondary major in international business. Elective courses are part of the curriculum.

Bachelor of Science
The bachelor of science (B.S.) degree offers a high quality professional education in business. It prepares students for professional careers in specialized functions of business and government. Candidates for this degree must satisfy the requirements established by the College of Business and also the requirements for individual majors specified by the departments of the College. All candidates for the B.S. degree are required to complete one of the following majors: accounting; finance; management; management information systems; marketing; supply chain management; or business economics.

Required High School Preparation
Students entering the pre-business curriculum must present evidence of the following high school preparation:

a. Four (4) years of English/Language Arts, emphasizing writing, speaking, and reading as well as an understanding and appreciation of literature.
b. Three (3) years of mathematics, including one year each of algebra, geometry, and advanced algebra.
c. Three (3) years of science, including one year each of courses from two of the following fields: biology, chemistry, and physics;
d. Two (2) years of social studies.

Primary Majors
Accounting
Business Economics
Finance
International Business (second major only)
Management
Management Information Systems
Marketing
Supply Chain Management

Admission Standards to Professional Programs
All new entering students are enrolled in the pre-business curriculum. To enter the professional program in the College of Business, students must complete any ENGL 101 English for Native Speakers of Other Languages courses, ENGL 150 Critical Thinking and Communication, and the following foundation courses or their approved substitutions:

- MATH 150 Discrete Mathematics for Business and Social Sciences 3
- ECON 101 Principles of Microeconomics 3
- ECON 102 Principles of Macroeconomics 3
- STAT 226 Introduction to Business Statistics I 3
- ACCT 284 Financial Accounting 3
- BUSAD 101 Orientation 0.5
- BUSAD 150 Computer Competencies for Business R
- BUSAD 250 Introduction to Business 3

In addition, all students must achieve an Iowa State University cumulative grade point of 2.5 or a grade-point average of 2.5 in the foundation courses. Admission into the professional program is a prerequisite for pre-business students to gain admission into upper-level business classes.

Students who meet the following requirements qualify for early admission to the professional program. First Semester Freshman: ACT score of 30 or higher, or ranked in the top 5% of high school class, or National Merit/Achievement Finalist, or member of the Freshman Honors Program. All other Students: minimum ISU cumulative GPA of 3.50 in at least 12 credits, or full member of the University Honors Program.

If using the foundation courses for admission to the Professional Program, both transfer grades and Iowa State University grades are used to compute the grade point average. If foundation courses initially taken at Iowa State University need to be repeated, they must be repeated at Iowa State University. With the exception of ACCT 285 Managerial Accounting pre-business students do not have access to business core classes. To facilitate registration, qualified students may be conditionally admitted during the semester in which they complete the admission requirements.

Admission requirements are subject to change. Applications and the current requirements for admission to the College of Business are available on the Web at https://apps.bus.iastate.edu/ProfessionalProgram/ or from the Undergraduate Programs Office in the College of Business.
Academic Standards and Graduation Requirements

Policies for students enrolled in the College of Business may be obtained on the Web at http://www.business.iastate.edu/undergraduate/ or from the Undergraduate Programs Office in the College of Business.

Students are responsible for knowing and adhering to these College of Business policies as well as the university regulations found in this catalog. The following policies are in effect for students graduating from a professional curriculum in business with a B.S. degree under the 2011-2012 catalog:

1. A minimum of 122 semester credits are required.
2. At least 50 percent of the required business credits must be earned at Iowa State. All 300 level and higher business credits must be earned at a four-year college.
3. At least 50% of the 122 credits required for graduation must consist of general education (non-business credits).
4. A minimum of 12 credits of the last 32 credits earned in residence must be applied to the business core and/or the major.
5. The major departments reserve the right to determine the appropriate section of the degree program to which transfer credits will be assigned.
6. Students must achieve communication proficiency by earning a grade of C or better in two of the three required English courses.
7. A student must earn a grade of C or higher in a minimum of 30 credits applied to the business core and the major.
8. A student must earn at least 42 credits of 300 level and higher coursework from a four-year institution.
10. General education courses may not be taken P/NP.
11. No more than 9 elective credits may be taken P/NP.

Curriculum in Business

The college offers programs of study leading to the degree of bachelor of science with a major in accounting; finance; management; management information systems; marketing; supply chain management; or business economics. The college also offers a secondary major in international business. Total credits required: 122

Pre-business Curriculum

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.

U.S. Diversity: 3 cr.

Communication:

Proficiency met with grade of C or better in 2 of 3 English courses

Total Credits: 21

All above core courses must be complete before MGMT 478 Strategic Management.

Electives:

61 cr. must be non-business courses.

1. Acct, Fin, and Bus Econ majors will also take STAT 326 Introduction to Business Statistics II as part of the supporting courses. Bus Econ majors will take MATH 160 Survey of Calculus instead of 150, and ECON 207 Applied Economic Optimization instead of MATH 151 Calculus for Business and Social Sciences. See the Undergraduate Programs Office in the College of Business. Acct majors will take MGMT 4 The Accounting Cycle as part of the Supporting Courses. IS majors will take MIS 207 Fundamentals of Computer Programming as part of the Supporting Courses.

2. Students not adequately prepared in mathematics may have to take remedial courses in addition to courses listed above. Remedial mathematics courses may not be used to satisfy credit requirements for graduation in the business curriculum.

3. Students without adequate computer background may take COM S 103 Computer Applications to satisfy the computer literacy requirement.

4. Students may satisfy the Global Perspectives requirement either by taking six credit hours from the University International Perspectives list, or three credit hours from the International Perspectives list and three credit hours from the College of Business Global Perspectives list. Approved list of courses is available on the web at http://www.business.iastate.edu/undergraduate/ or from the Undergraduate Programs Office in the College of Business.

5. Courses used for the International Perspectives and U.S. Diversity requirements may also be used to fulfill other curriculum requirements or electives and therefore credits are not included in the sum needed.

Professional Programs

The curriculum in accounting is accredited by AACSB International, the Association to Advance Collegiate Schools of Business, the international business accrediting agency.

### Advising System

The Undergraduate Programs staff, under the leadership of the Director for Undergraduate Programs, facilitates student progress toward graduation while supporting the academic standards of the College of Business and Iowa State University. To accomplish this, the Undergraduate Programs staff provides services for all College of Business students, including academic advising, learning opportunities, and teaching and developmental activities.

Students in the College of Business have advisers located in the Undergraduate Programs Office. The adviser assists students with developing an academic program; accessing pertinent university resources; and meeting their educational objectives.

The college offers an orientation program for entering students. All entering students and family members are encouraged to attend orientation. During orientation the adviser and the student prepare an appropriate schedule and the student registers for courses. Placement assessments may be required in Mathematics and English to assist in placing students in the appropriate level of courses if this cannot be determined by ACT/SAT scores, high school preparation classes or transfer courses.

### Honors

Entering freshmen who meet one of the following criteria, and have a minimum English ACT of 24, will be invited to apply for membership in the Freshman Honors Program: earned an ACT composite of 30, or ranked in the top 5% of their high school classes; or selected as a National Merit or National Achievement finalist.
Enrolled students who have completed 12 graded credits at Iowa State University and earned a 3.50 can be admitted as a full member of the Honors Program. To qualify for full membership, students must have declared a major, developed a program of study, and have a minimum of 48 credits remaining before graduation. Special advisers will assist honors students in developing an appropriate program of study.

Internships
Credit and non-credit internships in business may be approved for College of Business students in all majors including pre-business. Credit hours and requirements vary. Arrangements must be made in the college prior to the beginning of the internship. An internship adviser from the Career Services Center will assist students in making these arrangements.

Multiple Majors
Undergraduates pursuing a degree in the College of Business may complete additional majors in the College of Business. Those desiring additional majors outside the college should refer to the catalog section of the appropriate college and department for the additional major requirements. A multiple major in business economics and agricultural business or economics is not permitted. A major in business economics with a minor in economics is not permitted.

Undergraduates with a primary major outside the College of Business who want a second major in business must meet the admission requirements for the professional program as well as complete the following requirements: Foundation, Supporting Courses, Business Core, and major requirements.

All students pursuing multiple majors or multiple degrees within the College of Business are required to have a minimum of 15 credits of coursework in each major that is not used in the other majors.

Students are limited to three business majors/degrees within the College of Business, or a total of three business major/minors within the college. This limit is on business majors/degrees/minors only, and does not apply to multiple majors/degrees/minors taken outside the College of Business.

Curriculum Changes
Iowa State University students who want to change their curriculum to the College of Business must attend a curriculum change meeting. See Changing Curriculum or Major for more details on this process. Students on Academic Probation will not be allowed to change curriculum to the College of Business during enrollment period three. See Making Schedule Changes.

International Business Secondary Major
A student in the College of Business may earn a secondary major in International Business. The requirements for this major include 12 credits in international business courses, one year of the same university-level foreign language (minimum 6 credits) and an approved international experience (minimum 3 months). Students who pursue this secondary major will be required to complete the requirements for a primary major in Business. Fifteen of the 18 credits required for the International Business major may not be used for the primary major.

Minor for Business Students
Students with a major in the College of Business may qualify for a minor specialization in one of the college’s departments by taking at least 15 credit hours in the minor specialization, nine hours of which may not be used to satisfy any other department, college, or university requirement. The minor must include at least 6 credits in courses numbered 300 or above taken at Iowa State University with a grade of C or higher. Students with declared majors have priority over students with declared minors in courses with space constraints.

Students are limited to three business majors/degrees within the College of Business, or a total of three business major/minors within the college. This limit is on business majors/degrees/minors only, and does not apply to multiple majors/degrees/minors taken outside the College of Business.

Minor for Non-Business Students
The College of Business offers a structured minor in general business to students outside the College. The minor requires a minimum of 15 credits, not including pre-requisite courses. Requirements for the minor are:

<table>

</tr>
</tbody>
</table>

The minor must include at least 6 credits in courses numbered 300 or above taken at Iowa State University. A C average or higher is required in all courses used to satisfy the minor requirements. All requirements for the minor must be taken for a grade. Students with a major outside the College of Business are eligible for a general business minor only—not a specialization in a business department.

Non-Business students may not take more than 9 cr. Of 300 or 400 level Business courses.

Entrepreneurial Studies Cross-Disciplinary Minor
The College of Business participates in a cross-disciplinary minor in Entrepreneurial Studies. This minor is available to any undergraduate student. Requirements for the minor include MGMT 310 Entrepreneurship and Innovation, MGMT 313 Feasibility Analysis and Business Planning (6 credits), two business-oriented electives from an approved list (6 credits), and an experiential learning component (3 credits). The approved list of courses is available in the Undergraduate Programs Office in the College of Business and on the web at http://www.business.iastate.edu/undergraduate/minors/entrepreneurship.

Non-degree Seeking Students
Students who wish to take courses in the College of Business, but are not seeking an undergraduate degree, should apply to the college as non-degree seeking students. Non-degree seeking students are eligible to take up to 9 credits in 300-level and above business courses without meeting the college’s admission requirements.

Upper Division Courses for Students Outside the College
Students from outside the College of Business are eligible to take up to 9 credits of 300-level and above business courses without meeting the college’s admission requirements to the professional program, as long as they meet course prerequisites.

Graduate Study
Three programs are offered at the master’s level: a master of business administration (M.B.A.) program, a master of accounting (M.Acc.), and a master of science in information systems (M.S.I.S.). These programs are intended to meet distinct sets of educational objectives.

The master of business administration (M.B.A.) is the professional management education program for those pursuing careers in business. The goal of the M.B.A. program is to educate future business leaders preparing them for the challenges of tomorrow by giving them
the vision, knowledge, skills, and confidence to make the best decisions for all involved stakeholders. The M.B.A. program consists of a 48-credit curriculum leading to a non-thesis, non-creative component master of business administration. Students may pursue a specialization in accounting, finance, marketing, technology and innovation management, or supply chain management. The College of Business also offers a business administration minor to students with majors outside the college.

A concurrent B.S./M.B.A. is available to eligible engineering undergraduate students majoring in agricultural, civil, computer, electrical, industrial, or mechanical engineering. A concurrent B.S. or B.A./M.B.A is available to eligible Chemistry undergraduate students.

Double degree programs are offered with architecture (M.Arch./M.B.A.), community and regional planning (M.B.A./M.C.R.P), information systems (M.B.A./M.S.I.S), and statistics (M.B.A./M.S.-Statistics).

The master of accounting (M.Acc.) is designed to meet the needs of accountants in public or private accounting focusing on interpreting and analyzing accounting information for decision-making. Additionally, the M.Acc. program is designed to help interested candidates meet the 150-hour education requirement for CPA certification in Iowa. The 30 hour program requires 15 hours of graduate accounting courses and 15 hours of non-accounting graduate electives including a communications course and an international topics course.

The master of science in information systems (M.S.I.S.) is designed to provide students with strong technical skills and a broad background in business needed to effectively develop and manage information systems projects. Using the latest software, students will apply information systems theory and concepts to modern information systems development. Program requirements range from 30-42 credits depending upon the student’s background. The M.S.I.S. curriculum includes business foundation courses, information systems core courses and electives, and a research requirement (creative component).

The College of Business participates in the following graduate level interdepartmental programs: Information Assurance, Human Computer Interaction, Seed Technology and Business, and Transportation.

**Ph.D in Business and Technology**

The College of Business offers graduate work leading to the Doctor of Philosophy degree in business and technology, with one of three specializations—customer management (CM), supply chain management (SCM), or management information technology (MIT). Many departments in the college (Supply Chain and Information Systems, Marketing and Management), and the departments of Statistics, Economics, Psychology, and Sociology cooperate in providing coursework toward this degree. The program will prepare individuals for academic careers in research, teaching, and public service at institutions of higher learning in the United States and other countries. The PhD program consists of a 44 credit course curriculum followed by 12 credit thesis or dissertation. Students do not need to have an undergraduate degree or master’s degree in business in order to qualify for enrollment in the PhD program. However, students without a graduate degree in business will be required to complete 18 credit hours of business foundation courses. For more details or application information see the Business Administration Department listing in this catalog.
Undergraduate Study

For undergraduate curriculum in business, major in accounting.

The curriculum in accounting is accredited by AACSB International, the Association to Advance Collegiate Schools of Business, the international business accrediting agency.

The primary purpose of accounting is to provide relevant information to both internal users (management) and external users such as investors, creditors, government, and the general public. Accounting is an integral part of the management of business and public organizations. Accountants, therefore, participate in planning, evaluating, controlling, and reporting the activities of the firm. Accounting is needed by external users in order to make investment decisions, grant or withhold credit, and, in the case of government, to collect revenue and gather statistical information. In order to provide useful information, accountants collect, analyze, synthesize, and report data in an understandable manner.

The instructional objective of the Accounting Program is to provide a well-rounded professional education in accounting. Such an education should provide the student with:

1. a mastery of basic accounting concepts
2. an ability to think critically and creatively about accounting problems
3. an ability to communicate effectively and work with others as a member of a team
4. an awareness and sensitivity for dealing with ethical concerns.

The major in accounting is designed to give students a conceptual foundation as well as to provide a wide range of basic skills and analytical tools for use in reporting for both public and private concerns. Students who complete the accounting major are well prepared to accept positions in industry, government, and the public accounting profession.

The requirements for the accounting major are met by successful completion of the following courses:

<table>

See the CPA note below for the 150-hour education requirement for CPA certification in Iowa.

In addition, it is highly recommended that an accounting major include ACCT 316 Business Law. The Department of Accounting should be consulted for information on specific alternative plans of study.

The department also offers a minor for College of Business students with a different major. They are required to take 15 credits from a list of approved courses, of which 9 credits need to stand alone.

CPA Note: The accounting major requires 22 credits of accounting. Candidates for the CPA exam must complete at least two additional credit hours for a total of 24 hours of accounting beyond principles. Students may use the electives shown above or petition to take graduate courses to fulfill the additional two hours. ACCT 316 Business Law is also highly recommended; please note this class does not count towards the aforementioned 24 hours required to sit for the exam. While students may sit for the CPA exam after completing the required accounting course work and earning a bachelors degree, in order to be certified or licensed to practice in Iowa, students must complete a total of 150 credits. Qualified students should consider taking the masters of accounting to satisfy the 150-credit requirement. Juniors and seniors in accounting who are interested in graduate study should contact the Coordinator of the M.Acc. Program so you may complete your graduate degree in an efficient manner. For states outside Iowa, be sure to check local rules, as each state determines its own licensing requirements.

Graduate Study

The department offers a graduate degree, the masters of accounting (M.Acc.). This is a 30-hour degree. The program requires 15 hours of graduate accounting courses, at least 9 hours of non-accounting graduate electives, a communications course and an international course from an approved list. Included in the 15 required hours of graduate accounting courses is a 3-credit required course, ACCT 598 Financial Accounting: Theory and Contemporary Issues.

The M.Acc. is appropriate for accounting undergraduate student wanting to pursue a variety of accounting careers. The M.Acc. program is an efficient way for qualified candidates to meet the 150-hour education requirement for CPA certification in Iowa. Students without an accounting degree will be required to complete a substantial amount of accounting coursework prior to being considered for admission to the M.Acc. Contact the coordinator of M.Acc. program for details.

The department participates in the full-time and part-time Master of Business Administration (M.B.A.) program. The M.B.A. is a 48-credit, non-thesis, non-creative component curriculum. Thirty of the 48 credits are core courses and the remaining 18 are graduate electives. Within the M.B.A. program, students may develop an area of specialization in accounting. The specialization is designed to help meet the education requirement for CPA certification in Iowa.

Courses primarily for undergraduate students

ACCT 215. Legal Environment of Business.
(3-0) Cr. 3. F.S.SS. Prereq: Sophomore classification
General history, structure, and principles of law. The legal system, as an agency of social control; good business practices, and tool for change. The court systems, Constitution, torts, contracts, administrative agencies, and agency law.

(3-0) Cr. 3. F.S.SS. Prereq: 15 hours of credit at ISU or sophomore standing
Introduction to the basic concepts and procedures of financial accounting from a user perspective. The course examines the accounting cycle, business terminology, basic control procedures, and the preparation and evaluation of financial reports, with an emphasis on financial statement analysis.

ACCT 285. Managerial Accounting.
(3-0) Cr. 3. F.S.SS. Prereq: 284
Understanding of fixed and variable costs and their role in planning, control and performance evaluation. Examination of alternative costing methods. Making decisions by identifying and developing relevant information. Development of spreadsheet skills.

ACCT 301. The Accounting Cycle.
(1-0) Cr. 1. F.S.SS. Prereq: 284
Interactive computer-based analysis of the accounting cycle including transactions and financial statements. Preparation of journal entries and adjusting entries and completion of the closing process. Nonmajor graduate credit.
ACCT 316. Business Law.
(3-0) Cr. 3. F.S. Prereq: 215
Continuation of 215. Sales under the Uniform Commercial Code, negotiable instruments, secured transactions, property transactions, partnerships, and wills and estates.

ACCT 383. Intermediate Managerial Accounting.
(3-0) Cr. 3. F.S. Prereq: 285 or 501 and 301
Generation, communication and use of information to assist management with planning, control, and decision making in manufacturing and service organizations. Includes cost concepts and relevance to decision situations, operational and capital budgeting, and performance evaluation. Emphasis on developing effective teamwork skills as well as spreadsheet capabilities.

ACCT 384. Accounting Information Systems.
(3-0) Cr. 3. Prereq: ACCT 285 or ACCT 501; and ACCT 301
Analysis of concepts and procedures underlying the automated accumulation and processing of accounting data. EDP internal control and audit techniques. Trends in accounting information systems.

ACCT 386. Intermediate Accounting I.
(3-0) Cr. 3. F.S. Prereq: 285 or 501 and 301

ACCT 387. Intermediate Accounting II.
(3-0) Cr. 3. F.S. Prereq: 386

ACCT 483. Advanced Managerial Accounting.
(Dual-listed with 583). (3-0) Cr. 3. Prereq: 383 or 581
Business simulation focusing on generation and communication of information to assist management with financial decision-making. Emphasis on developing teamwork, written communication, and oral presentation skills.

ACCT 484. Advanced Accounting Information Systems.
(Dual-listed with 584). (3-0) Cr. 3. Prereq: 384
Advanced accounting information systems concepts; database design and information retrieval, internal controls within computerized accounting information systems, financial reporting in electronic environment. Nonmajor graduate credit.

(3-0) Cr. 3. F.S. Prereq: 285 or 501 and 301
Introduction to the fundamentals of federal income taxation and concepts applicable to all tax entities. Addresses issues related to the measurement and recognition of income, deductions, gains, and losses, taxation of property transactions, and basis/cost recovery concepts. Includes coverage of tax law policy objectives, tax implications of business and investment decisions, tax versus financial reporting treatment of common business transactions, and ethical issues related to tax compliance and planning. Nonmajor graduate credit.

(Dual-listed with 587). (0-2) Cr. 1. Repeatable, maximum of 3 credits. S. Prereq: ACCT 285 or ACCT 501; and ACCT 301
Introduction to and field work in the preparation of individual income tax returns (state and federal). Basic coverage of filing and residency status, taxable income, exemptions, deductions, and credits. Tax software usage and online filing.

ACCT 488. Governmental and Non-profit Institution Accounting.
(Dual-listed with 588). (3-0) Cr. 3. Prereq: 387
Accounting and financial reporting principles of local and state governments, including universities, schools, and hospitals. In addition, accounting and financial reporting of non-profit organizations will be addressed. Financial statements of local governmental units and the university are explored. Nonmajor graduate credit.

ACCT 490. Independent Study.
Cr. 1-3. Repeatable. F.S.S. Prereq: 285; senior classification; permission of instructor

ACCT 495. Advanced Accounting Problems.
(Dual-listed with 595). (3-0) Cr. 3. Prereq: 387
Accounting for business combinations and affiliated companies, intercompany transactions, and consolidated financial statements; Partnership accounting; Segment and Interim Reporting; Multinational accounting. Nonmajor graduate credit.

ACCT 496. International Accounting.
(Dual-listed with 596). (3-0) Cr. 3. Prereq: 386 or 501
Financial reporting issues in a global environment, including introduction to International Financial Reporting Standards (IFRS) and the potential for the use of IFRS in the U.S. Accounting and managerial issues faced by multinational corporations. Technical issues such as transfer pricing, inflation accounting and taxation will be discussed. Nonmajor graduate credit.

ACCT 497. Introduction to Auditing.
(3-0) Cr. 3. F.S. Prereq: 384, 387 and STAT 326
The conceptual framework of auditing. Professional ethics. External reporting concepts. Audit methodology including risk analysis, internal control, procedures for gathering evidence and the role of statistical sampling in auditing. Nonmajor graduate credit.

Courses primarily for graduate students, open to qualified undergraduate students

(3-0) Cr. 3. Prereq: Enrollment in MBA program or departmental permission
A general introduction to financial accounting information. Topics covered include the use and analysis of financial information, the regulatory environment, the role of International Financial Reporting Standards (IFRS), and the use of the internet and electronic spreadsheets as a means of accessing and analyzing financial data.

ACCT 581. Accounting for Decision Making.
(3-0) Cr. 3. Prereq: 501 or equivalent

ACCT 582. Corporate Governance and Top Management.
(Cross-listed with MGMT). (3-0) Cr. 3. Prereq: MGMT 502 or permission
Duties, structure, and functioning of top management teams and corporate boards of directors. CEO/board tenure and succession planning, top management compensation, board committee composition, assessment of CEO and board performance, theories of corporate governance, management of the corporate strategic agenda, governance codes, international governance, and chairman/CEO duality. Case studies and contemporary issues discussed.

ACCT 583. Advanced Managerial Accounting.
(Dual-listed with 483). (3-0) Cr. 3. Prereq: 383 or 581
Business simulation focusing on generation and communication of information to assist management with financial decision-making. Emphasis on developing teamwork, written communication, and oral presentation skills.
(Dual-listed with 484). (3-0) Cr. 3. Prereq: 384  
Advanced accounting information systems concepts; database design and information retrieval, internal controls within computerized accounting information systems, financial reporting in electronic environment.

(3-0) Cr. 3. Prereq: 485  
Integration of concepts from accounting, finance, and economics to determine how taxes affect business decisions. Provides students with a conceptual framework for thinking about business tax planning and applies it to various common business decisions.

(3-0) Cr. 3. Prereq: 485  
Advanced coverage of federal taxation including issues related to the taxation of corporations, partnerships, estates and trusts, and their owners. Includes coverage of rules, concepts, background, and planning opportunities related to a number of common transactions involving these entities.

(Dual-listed with 487). (0-2) Cr. 1. Repeatable, maximum of 3 credits. Prereq: 285 or 501  
Introduction to and field work in the preparation of individual income tax returns (state and federal). Basic coverage of filing and residency status, taxable income, exemptions, deductions, and credits. Tax software usage and online filing.

ACCT 588. Governmental and Non-profit Institution Accounting.  
(Dual-listed with 488). (3-0) Cr. 3. Prereq: 387  
Accounting and financial reporting principles of local and state governments, including universities, schools, and hospitals. In addition, accounting and financial reporting of non-profit organizations will be addressed. Financial statements of local governmental units and the university are explored.

ACCT 590. Special Topics.  
Cr. 1-3. Repeatable. F.S.SS. Prereq: Permission of instructor  
For students wishing to do individual research in a particular area of accounting.

ACCT 591. Fraud Examination and Prevention.  
(3-0) Cr. 3. Prereq: 497 or 501  
Principles and methodology of fraud detection and deterrence. Addresses the following: Causes and elements of fraud, costs to society, asset theft, financial statement representation, internal controls for fraud prevention, evidence gathering, and legal aspects of fraud.

ACCT 592. Financial Statement Analysis.  
(3-0) Cr. 3. Prereq: 284 or 501  
The presentation and analysis of financial statement information from the point of view of the primary users of such data: owners and creditors. Topics covered will include the financial reporting system, the primary financial statements, and effects of accounting method choice on reported financial data, and firm valuation.

(3-0) Cr. 3. Prereq: 387 or 592  
Using financial statement analysis to value the firm. Topics covered include assessing how well a firm’s financial statements reflect the economic effects of its resource management strategies and constructing pro forma financial information that will serve as inputs to valuation models.

ACCT 595. Advanced Accounting Problems.  
(Dual-listed with 495). (3-0) Cr. 3. Prereq: 387  
Accounting for business combinations and affiliated companies, intercompany transactions, and consolidated financial statements; Partnership accounting; Segment and Interim Reporting; Multinational accounting.

ACCT 596. International Accounting.  
(Dual-listed with 496). (3-0) Cr. 3. Prereq: 386 or 501  
Financial reporting issues in a global environment, including introduction to International Financial Reporting Standards (IFRS) and the potential for the use of IFRS in the U.S. Accounting and managerial issues faced by multinational corporations. Technical issues such as transfer pricing, inflation accounting and taxation will be discussed.

ACCT 597. Advanced Auditing and Assurance Services.  
(3-0) Cr. 3. Prereq: 497  
A study of advanced auditing and assurance issues. Topics include risk analysis, internal control, fraud detection, analytical procedures, evaluating operational and strategic objectives, and reporting and implementing audit findings.

(3-0) Cr. 3. F. Prereq: 386 or 501  

ACCT 599. Creative Component.  
Cr. 2. Prereq: Admission to the Master of Accounting Program  
This course prepares students to complete their creative component project option in the Master of Accounting degree.
### Graduate Study

The College of Business offers a professional graduate degree program in business administration, the master of business administration (MBA), which is described below. The college also has two specialized master degree programs: the master of accounting (M.Acc.), which is described under the Department of Accounting and the master of science in information systems (M.S.I.S.) which is described under Management Information Systems. The college also offers a Ph.D. in business and technology, with specialization in customer management, supply chain management, and management of information technology. Finally, the College of Business is a participating member of the following interdepartmental programs: master of science in transportation, master of science in seed technology and business, master of science and Ph.D. in human computer interaction, and master of science in information assurance.

### Master of Business Administration (M.B.A.)

The College of Business offers a 48 credit program leading to a nonthesis master of business administration degree with a specialization in accounting, finance, technology and innovation management, marketing, or supply chain management. The coursework is designed to provide the knowledge, skills, and abilities for managerial success and leadership in organizations. The M.B.A. is the professional management education program for those pursuing careers in business.

Students may enroll in the M.B.A. on either a full-time or part-time basis. The part-time M.B.A. is designed for employed professionals. Part-time MBA classes are held in the evenings in downtown Des Moines.

Students working toward the M.B.A. are required to complete a series of core courses in the basic functional areas of business (accounting, economics, quantitative analysis, finance, supply chain management, organizational behavior, management information systems, marketing, ethical leadership and governance, strategic management, and advanced elective coursework. Two courses on professional skills development are also required for full-time M.B.A. students.

Courses for the M.B.A. are provided by the departments of Accounting, Economics, Finance, Management, Marketing, and Supply Chain and Information Systems. Courses from other departments may also be chosen to meet specific student interests.

A concurrent B.S./M.B.A. is available to eligible engineering undergraduates majoring in agricultural, civil, computer, electrical, industrial, or mechanical engineering. The College of Business and the College of Veterinary Medicine offer a concurrent M.B.A./D.V.M. degree.

Double master’s degree programs are offered with architecture (M.Arch./M.B.A.), community and regional planning (M.B.A./M.C.R.P.), information systems (M.B.A./M.S.I.S.) and Statistics (M.B.A./M.S.-Statistics).

The College of Business also offers a business administration minor to students with majors outside the college.

The M.B.A. program is open to all individuals with a baccalaureate degree. Undergraduates from arts and humanities, science, and technical programs are especially encouraged to apply. Academic potential and promise for a productive career in business and for managerial success and leadership in organizations are important criteria for admission. Applicants must submit official transcripts of previous academic work, Graduate Management Admission Test (GMAT) scores, personal essays, a resume, and three letters of reference. International students whose native language is not English and who did not graduate from a U.S. college or university are required to submit the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) scores.

Applicants are considered for fall semester entry only into the full-time M.B.A. Although applications will be considered after this date, candidates are encouraged to submit their application materials by June 1 (March 1 for international students). Part-time M.B.A. applications are considered for fall, spring, or summer entry.

### Ph.D. in Business and Technology

The College of Business offers graduate work leading to the doctor of philosophy degree in business and technology, with one of three specializations—customer management (CM), supply chain management (SCM), or management of information technology (MIT). Many departments in the college (Supply Chain and Information Systems, Marketing and Management), and the departments of Statistics, Economics, Psychology and Sociology cooperate in providing coursework toward this degree. The program will prepare individuals for academic careers in research, teaching, and public service at institutions of higher learning in the United States and other countries. The PhD program consists of a 44-credit course curriculum followed by a 12-credit thesis or dissertation.

Students do not need to have an undergraduate or master’s degree in business in order to qualify for enrollment in the PhD program. However, students without a graduate degree in business will be required to complete 18 hours of business foundation requirements. These include:

- Financial and managerial accounting (min. 2 Cr)
- Corporate finance (min. 2 Cr)
- Strategic management (min. 2 Cr)
- Management information systems (min. 2 Cr)
- Marketing (min. 2 Cr)
- Supply chain management (min. 2 Cr)
- Economics – micro and macro (min. 6 Cr)

Students can choose one of three areas of specialization—CM, SCM or MIT. The customer management (CM) area will focus on identification and delivery of solutions that help improve the ways in which businesses attract, capture, service and maintain customers. To do these activities well, organizations will need to integrate process goals and activities across different functional areas and across multiple organizational partners. This area of study will examine issues relating to inter-functional and inter-organizational relationships and their management in pursuit of maximizing the lifetime value of a businesses’ customer base.

The supply chain management (SCM) specialization will focus on the design, development, and control of business processes for conversion of inputs into outputs and distribution of those outputs. The traditional focus of SCM was on integration of processes across multiple functions within the firm—operations management, logistics, and purchasing primarily, with elements of marketing and information systems included as well. However, in today’s world, where competition is across supply chain networks, SCM, just like CM, will involve integrating business processes across firms.

The management of information technology (MIT) specialization examines issues related to the development, building, management, and use of information and knowledge-based technologies. Such technologies enable users to collect organizational data, provide a platform for organizing and disseminating the data, and offer operational, decision support, and knowledge management tools through which users can leverage data and information for making better organizational decisions. Students in the MIT specialization will study areas such as information technology analysis and development, database and knowledge manage-
ment systems, decision support and data mining, human computer interaction, system security and integrity, and project management and collaborative teamwork.

Programs of study for the doctoral study are designed for each student in consultation with the major professor and the student’s PhD committee. Each student must complete advanced courses in their area of specialization, a minor area that supports the major area, and research methods. Students must demonstrate competence in theory and research methods by passing qualifying examinations.

Application deadline for the Ph.D. program is February 1 for fall admission. Applicants must submit official transcripts of previous educational coursework and degrees, the Graduate Management Admission Test (GMAT) scores, personal essays, resume, and three letters of reference. International students whose native language is not English and who did not graduate from a U.S. college or university are required to submit TOEFL (Test of English as a Foreign Language) scores.

Courses primarily for undergraduate students

BUSAD 101. Orientation.
(1-0) Cr. 0.5. F.S.
First 8 weeks. A required orientation for all College of Business students. Review of college and university requirements, transfer credits, academic planning, university policies and deadlines, and registration procedures. Includes group advising for course selection and registration. Offered on a satisfactory-fail basis only. Either BusAd 101 or 102 may be counted towards graduation.

H. Orientation

BUSAD 101H. Orientation.
(1-0) Cr. 0.5. F. Prereq: Membership in the Freshman Honors Program. Designed to supplement the Freshman Honors orientation (HON 121) with college specific information, to facilitate the development of Honors programs of study in business, and to acquaint students with university policies and procedures. Offered on a satisfactory-fail basis only. Either BusAd 101 or 102 may be counted towards graduation.

BUSAD 102. Expanded Orientation.
(1-0) Cr. 1. F.S.
A required orientation for all College of Business Students involved with a Business Learning Team. Review of college and university requirements, transfer credits, academic planning, university policies and deadlines and registration procedures. Includes a consideration of various business majors and careers, tools for success in college including writing skills and presentations from employers, alumni and current students. Offered on a satisfactory-fail basis only. Either BusAd 101 or 102 may be counted towards graduation.

BUSAD 150. Computer Competencies for Business.
Cr. R.
Students will demonstrate proficiency in MS Word, Excel, and PowerPoint, as well as the ability to conduct research using the Internet, use WebCT, and communicate via e-mail. Self-paced instruction available for students who are unable to demonstrate appropriate proficiency. Offered on a satisfactory-fail basis only.

(1-0) Cr. 0.5. F.S. Prereq: 101
Eight-week course designed to provide students with knowledge of careers in business and issues relevant to any workplace. Presentations by business professionals, current students who have previously interned, and faculty and staff with knowledge of careers in the various majors. Includes coverage of diversity and ethics issues in the workplace. Offered on a satisfactory-fail basis only.

BUSAD 202. Professional Employment Preparation.
(1-0) Cr. 0.5. Prereq: 201
Eight-week course designed to provide students with the skills to develop and implement a professional job search and to function professionally in a workplace setting. Topics include resume and professional correspondence, interviewing, working a career fair, the comprehensive job search, evaluating offers, business etiquette, networking, and transitioning to employee. Offered on a satisfactory-fail basis only.

BUSAD 250. Introduction to Business.
(3-0) Cr. 3. Prereq: 101; 150 or COM S 103
Introduction to the functional areas of business and how the functional areas are integrated for the purpose of implementing business strategy. Introduces students to decision making tools (spreadsheets and databases) that are integral to business decision making. Includes application exercises to all functional areas of business.

BUSAD 291. Experiential Learning.
Cr. 1-3. Repeatable. Prereq: Written approval of supervising instructor and department chair on required form prior to the learning experience. Supervised travel and/or work experience in a business related discipline. Offered on a satisfactory-fail basis only.

A. Domestic Internship.
B. International Internship.
C. Domestic Travel and Study.
D. International Travel and Study.

BUSAD 292. Entrepreneurship & Innovation Learning Community (EILC) Seminar.
(1-0) Cr. 1. Prereq: Current member of or have applied to be a member of Entrepreneurship and Innovation Learning Community (see www.isupcenter.org/EILC for more information).
Topics related to entrepreneurship and entrepreneurial thinking. Presentations by entrepreneurs and faculty, field trips, business concept development.

(Cross-listed with A E, AGRON, AN S, BSE, ECON, TSMI. (3-0) Cr. 3. F. Prereq: ECON 101, CHEM 163 or higher, MATH 140 or higher.
Converting biorenewable resources into bioenergy and biobased products. Biorenewable concepts as they relate to drivers of change, feedstock production, processes, products, co-products, economics, and transportation/logistics.

BUSAD 398. Cooperative Education.
Cr. R. Repeatable, maximum of 3 times. Prereq: Permission of department.
Required of all cooperative students. Students must register for this course prior to commencing each work period. No more than three credits may be taken in addition to BUSAD 398 during any given semester. Offered on a satisfactory-fail basis only.

BUSAD 490. Independent Study.
Cr. 1-3. Repeatable. Prereq: 490A: MGMT 414, MKT 448, LSCM 466 or FIN 380; senior classification, permission of instructor; for 490H: Admission to the Business Honors Program.
A. International Business.
E. Entrepreneurship.
H. Honors.

BUSAD 491. Professional Experiential Learning.
Cr. 1-3. Repeatable. Prereq: Professional program, 12 credits from College of Business; written approval of supervising instructor and department chair on required form prior to the learning experience. Supervised travel and/or work experiences in a business related discipline. Offered on a satisfactory-fail basis only.

A. Domestic Internship.
B. International Internship.
C. Domestic Travel and Study.
D. International Travel and Study.
E. Other Experiential Learning Experience.(S-F or graded basis)
BUSAD 492. The Washington Center Experience.
Cr. 6-12. Prereq: Professional program, written approval of supervising instructor and department chair on required form prior to the learning experience
Participation in The Washington Center seminar/internship program. Includes seminars/forums, work experience, and a portfolio of experiences.

Courses primarily for graduate students, open to qualified undergraduate students

(Cross-listed with STB). (2-0) Cr. 2. Prereq: Admission to MS in Seed Technology and Business program or by special arrangement with the instructor
Critical analysis of current practice and case studies in strategic management with an emphasis on integrative decision making. Strategy formulation and implementation will be investigated in the context of complex business environments.

(3-0) Cr. 3. Prereq: Enrollment in MBA program or departmental permission
Introduction to the sources and statistical analysis of data as well as optimization models for use in making business decisions. Data collection, descriptive and inferential statistics including hypothesis testing, analysis of variance, multiple regression, linear programming and simulation.

BUSAD 503. Information Systems.
(Cross-listed with STB). (2-0) Cr. 2. Prereq: Admission to MS in Seed Technology and Business program or by special arrangement with the instructor
Introduction to a broad variety of information systems (IS) topics, including current and emerging developments in information technology (IT), IT strategy in the context of corporate strategy, and IS planning and development of enterprise architectures. Cases and discussions highlight the techniques and tactics used by managers to cope with strategic issues within an increasingly technical competitive environment.

BUSAD 504. Marketing and Logistics.
(Cross-listed with STB). (3-0) Cr. 2. Prereq: Admission to MS in Seed Technology and Business program or by special arrangement with the instructor
Integration of the business functions concerned with the marketing and movement of goods along the supply chain with the primary goal of creating value for the ultimate customer. Coordination of marketing, production, and logistics activities within the firm and with outside suppliers and customers in the supply chain.

BUSAD 507. Organizational Behavior.
(Cross-listed with STB). (2-0) Cr. 2. Prereq: Admission to MS in Seed Technology and Business program or by special arrangement with the instructor
Understanding human behavior in organizations, and the nature of organizations from a managerial perspective. Special emphasis on how individual differences, such as perceptions, personality, and motivation, influence individual and group behavior in organizations and on how behavior can be influenced by job design, leadership, groups, and the structure of organizations.

BUSAD 508. Accounting and Finance.
(Cross-listed with STB). (3-0) Cr. 3. Prereq: Admission to MS in Seed Technology and Business program or by special arrangement with the instructor
Survey of fundamental topics in accounting and finance. Financial statement reporting and analysis for agriculture firms, corporate governance issues related to financial reporting, (e.g., Sarbanes-Oxley). Basic tools and techniques used in financial management, including stock and bond valuation. How to assess and use capital budgeting methods to evaluate proposed firm investments.

BUSAD 509. Seed Trade, Policy and Regulation.
(Cross-listed with STB). (3-0) Cr. 3. Prereq: Admission to MS in Seed Technology and Business program or by special arrangement with the instructor
Cultural, financial, economic, political, legal/regulatory environments shaping an organization’s international business strategy. Topics include entry (and repatriation) of people, firms, goods, services, and capital. Special attention to the institutions of seed regulation and policy. Ethical issues facing managers operating in an international context.

BUSAD 591. Professional Experiential Learning.
Cr. 1-3. Repeatable. Prereq: Graduate standing; written approval of supervising instructor and department chair on required form prior to the learning experience
Academically supervised travel and/or work experiences in a business related discipline.

BUSAD 592. MBA Professional Skills Development.
Cr. R. Prereq: Admission to Full-time MBA Program
Provides first-year MBA students with tools necessary to develop and implement a successful internship and career search, and to develop professional skills critical for success in the competitive business environment. Topics include career search strategy, resume and cover letter development, interviewing, strategic networking, salary negotiation, impression management, team skills development, presentation skills development, and business etiquette. Required for all full-time MBA students. Offered on a satisfactory-fail basis only.

BUSAD 594. MBA Professional Skills Development II.
Cr. R. Prereq: BUSAD 592
A second course designed to improve the professional skills of first-year MBA students. Emphasis on building effective communications and networking skills. Students will participate in professional workshops, company visits, executive speaker seminars, service learning projects, business case competitions, and related activities. Offered on a satisfactory-fail basis only.

BUSAD 598. Cooperative Education.
Cr. R. Prereq: Permission of instructor
Professional work experience. Students must register for this course prior to commencing work. Offered on a satisfactory-fail basis only.

BUSAD 599. Creative Component.
Cr. 3. Prereq: Graduate classification, permission of supervisory committee chair
Preparation and writing of creative component.
A. Accounting
C. Finance
E. Management
F. Marketing
I. Agribusiness
J. General Business
K. Management Information Systems
M. Supply Chain Management

Courses primarily for graduate students

BUSAD 699. Research.
Cr. 3-6. Repeatable. F.S.SS. Prereq: Graduate classification, permission of major professor
Research.
**Interdepartmental Undergraduate Minor**

Entrepreneurial Studies is an interdisciplinary program that provides opportunities to students to learn about entrepreneurship—the process of creating value through recognizing and developing opportunities. It serves to complement the student’s major area of study, in any college, by offering a means of putting theory and science into practice. The goal of the Entrepreneurial Studies program is to provide the knowledge and skills needed to create value through recognizing and developing opportunities. In addition to feasibility analysis and business planning, the program deals with the topics of innovation, opportunity recognition, technology transfer, industry analysis, and competitive strategy. Although the program introduces some fundamental concepts from accounting, finance, marketing, and management, it does not attempt to substitute for any business courses in these areas.

A minor in entrepreneurial studies is available to all undergraduate students at ISU. Students must follow college specific rules in selecting courses. The college representatives to the supervisory committee will be responsible for advising students in their college, and will inform students about the details of the college rules.

**Minor**

Entrepreneurial Studies is an interdisciplinary program that provides opportunities to students to learn about entrepreneurship—the process of creating value through recognizing and developing opportunities. It serves to complement the student’s major area of study, in any college, by offering a means of putting theory and science into practice. The goal of the Entrepreneurial Studies program is to provide the knowledge and skills needed to create value through recognizing and developing opportunities. In addition to feasibility analysis and business planning, the program deals with the topics of innovation, opportunity recognition, technology transfer, industry analysis, and competitive strategy. Although the program introduces some fundamental concepts from accounting, finance, marketing, and management, it does not attempt to substitute for any business courses in these areas.

A minor in entrepreneurial studies is available to all undergraduate students at ISU. Students must follow any college-specific rules in selecting courses. The college representatives to the supervisory committee will be responsible for advising students in their college, and will inform students about the details of any relevant college rules.

A student seeking a minor in entrepreneurial studies must successfully complete a minimum of 15 credits in courses approved for use in the entrepreneurial studies program, including:

- **MGMT 310**  
  Entrepreneurship and Innovation  
  3
- **MGMT 313**  
  Feasibility Analysis and Business Planning  
  3
- Or **MGMT 410X**  
  Social Entrepreneurship (Experimental Course)

**MGMT 310** Entrepreneurship and Innovation is the introductory course and provides an overview of the entire field.

**MGMT 313** Feasibility Analysis and Business Planning emphasizes developing an idea for a new venture, conducting a feasibility study, researching the potential market, analyzing the competition, and preparing a formal business plan.

Students take two entrepreneurship-oriented electives (6 cr.) from an approved course list and must also take 3 cr. of experiential learning. Up to six of the 15 credits required for the minor may also be used in the student’s required program of study. Detailed information about the minor and the list of approved electives is available online at [http://www.business.iastate.edu/undergraduate/minors/entrepreneurship](http://www.business.iastate.edu/undergraduate/minors/entrepreneurship).

**Graduate Certificate**

An interdisciplinary graduate certificate in entrepreneurship and innovation is available to post-graduate students from any discipline. The program provides students an opportunity to learn about entrepreneurship, innovation, and the new venture creation process and to develop business skills that can be used to start a business. The program is flexible so that students can design a program that provides core entrepreneurship education through one required business management course as well as discipline-specific training from entrepreneurship courses in other colleges. The certificate program is taught at a distance using computer-based instructional media.

Students seeking this Graduate Certificate must meet minimum university criteria for admission to graduate programs. Students interested in the Entrepreneurship and Innovation Certificate must successfully complete a minimum of 12 credits in courses approved for use in the certificate program, including one required course, MGMT 566 Entrepreneurship and New Business Creation and three entrepreneurship-oriented electives (9 cr.) chosen from an approved course list. MGMT 566 Entrepreneurship and New Business Creation focuses on the essentials of starting and operating a new business. Additional information as well as the list of approved electives can be found on the certificate website.
Finance

Undergraduate Study

For undergraduate curriculum in business, major in finance.

In addition to the basic business requirements, finance majors must also complete:

FIN 310  Corporate Finance  3
FIN 320  Investments  3
Select four from the following (two must be 400-level):
FIN 327  Fixed Income Securities
FIN 330  Financial Markets and Institutions
FIN 361  Personal Risk Management and Insurance
FIN 371  Real Estate Principles
FIN 415  Business Financing Decisions
FIN 424  Financial Futures and Options
FIN 425  Security Analysis and Portfolio Management
FIN 445  Bank Management Decisions
FIN 462  Corporate Risk Management and Insurance
FIN 472  Real Estate Finance
Select one from the following:
ACCT 383  Intermediate Managerial Accounting
ACCT 386  Intermediate Accounting I
ACCT 387  Intermediate Accounting II
or any 400-level course listed above
FIN 480  International Finance

* STAT 326 Introduction to Business Statistics II is highly recommended to be taken as a prerequisite
** FIN 320 Investments is prerequisite for FIN 380 and 400 level finance courses

The courses in finance constitute a broad program of study designed to provide a descriptive, behavioral, and analytical background of financial management to enable students to qualify for opportunities in financial services, insurance, brokerage, government, real estate, and financial management of business enterprises. Finance is also an excellent area for those who wish to become more knowledgeable as consumers, particularly in the fields of investments, insurance, and real estate.

Areas of study in the field of finance include financial management, investments, insurance, real estate, and financial services. Upper-level courses include a review of contemporary literature in the field, case studies, and financial problem analysis integrating finance courses previously taken.

The instructional objective of the Finance program is to provide a well-rounded professional education in finance. Such an education should provide the student with:

1. a mastery of basic financial concepts and methods of analysis
2. an understanding of financial operations in a global setting and of the role of financial institutions in the economics system
3. an ability to effectively communicate and work with others as the finance member of a team
4. an ability to demonstrate leadership capabilities in financial analysis and portfolio management.

The department also offers a minor for non-Finance majors in the College of Business. The minor requires 15 credits from an approved list of courses, of which 9 credits must stand-alone. Students with declared majors have priority over students with declared minors in courses with space constraints.

Graduate Study

The department participates in the full-time and part-time Master of Business Administration (M.B.A.) program. The M.B.A. is a 48-credit, non-thesis, non-creative component curriculum. Thirty of the 48 credits are core courses and the remaining 18 are graduate electives. Within the M.B.A. program, students may develop an area of specialization in finance.

Courses primarily for undergraduate students

FIN 301. Principles of Finance.
(3-0) Cr. 3. F.S.SS. Prereq: ACCT 101, STAT 226
Introduction to financial management with emphasis on corporate financing and investment decision making, time value of money, asset valuation, capital budgeting decision methods, cash budgeting, and financial markets.

FIN 310. Corporate Finance.
(3-0) Cr. 3. F.S.SS. Prereq: 301
Theory used in a firm's investment and financing decisions. Analysis of environment in which financial decisions are made; applications of analytical techniques to financial management problems.

FIN 320. Investments.
(3-0) Cr. 3. F.S.SS. Prereq: 301
Introduction to various investment media and markets from the viewpoint of the individual investor. Emphasis on mechanics of trading, behavior of security prices, corporate stocks and bonds, mutual funds, individual asset and portfolio selection techniques, and performance evaluation.

FIN 327. Fixed Income Securities.
(3-0) Cr. 3. Prereq: 301
Valuation of fixed income securities, including pricing conventions, term structure of interest rates, default, duration, and hedging of interest rate risk. Analysis of active and passive investment strategies for managing fixed income portfolios. Nonmajor graduate credit.

(3-0) Cr. 3. F.S. Prereq: 301
Introduction to the structure and operations of the United States financial system and its markets and institutions. Emphasis on developing and integrated understanding of markets and financial service providers including global linkages.

FIN 361. Personal Risk Management and Insurance.
(3-0) Cr. 3. F.S. Prereq: ECON 101
Risk concepts and the use of insurance by individuals and families. Emphasis on the insurance mechanism and methods of dealing with income, property, and liability risks.

FIN 371. Real Estate Principles.
(3-0) Cr. 3. SS. Prereq: ECON 101
Legal, economic, social and financial aspects of real estate, including property rights, contracts, mortgage instruments, tax factors, brokerage, valuation, risk and return analysis, financing techniques, and investments.

(3-0) Cr. 3. Prereq: 301 and STAT 326
In depth study of the firm’s external financing decision. Emphasis on the development of cash flow statements, projected financing needs and the selection of the appropriate financing instrument. Focus on case studies and application of developed techniques on actual field project. Nonmajor graduate credit.

FIN 424. Financial Futures and Options.
(3-0) Cr. 3. Prereq: 320 and STAT 326
Advanced study of the pricing and use of derivative market instruments, current topics and issues. Nonmajor graduate credit.
(3-0) Cr. 3. F.S. Prereq: 320, STAT 326 and permission of instructor
Advanced study of security analysis, security selection techniques and portfolio management. Emphasis on the applications of methods learned via the selection and evaluation of a portfolio of actual securities purchased in securities markets in the U.S. or abroad. Tracking and periodic reporting of the portfolio’s performance relative to standard benchmarks is also required.

(3-0) Cr. 3. Prereq: 327, 320, STAT 326 and permission of the instructor
Advanced analysis of fixed income markets and securities, including valuation and trading of treasury securities, corporate bonds, mortgage backed securities. Students are also required to manage a fixed income portfolio for an institutional investor. A top-down approach to portfolio management is assumed, with active bets taken on market direction, duration, yield curve, and credit spreads. Nonmajor graduate credit.

(3-0) Cr. 3. F.S. Prereq: STAT 326 and FIN 330 or ECON 353
Analysis of operations of depository financial institutions from management viewpoint. Emphasis on evaluating performance, policy formation, asset and liability management, the role of capital, and the operating environment. Nonmajor graduate credit.

FIN 462. Corporate Risk Management and Insurance.
(3-0) Cr. 3. F. Prereq: 301 and STAT 326
Analysis of an organization’s approaches to the management of price, credit, and pure risk. Emphasis on the consideration and selection of risk control and financing treatments and the decision making framework underlying the alternatives selected. Covers commercial insurance, self-insurance, and alternative financing arrangements. Nonmajor graduate credit.

FIN 472. Real Estate Finance.
(3-0) Cr. 3. Prereq: 301 and STAT 326
Introduction to the techniques of assessing the value of real estate and real estate financing instruments. Nonmajor graduate credit.

FIN 480. International Finance.
(3-0) Cr. 3. F.S. Prereq: 301 and STAT 326
Advanced study of contemporary topics and issues in international finance.

FIN 490. Independent Study.
Cr. 1-3. Repeatable. Prereq: 301, STAT 326 and permission of instructor

FIN 499. Finance Internship.
(3-0) Cr. 1-3. F.S.S.S. Prereq: GPA 2.5; permission of internship coordinator; STAT 326; 499A: 330; 499B: 361; 499C: 301 plus 3 additional credits in finance; 499D: 320; 499E: 310
Supervised experience in a private sector banking, insurance, real estate, investments or corporate organization or in a governmental agency that regulates such organizations. Offered on a satisfactory-fail basis only.

Courses primarily for graduate students, open to qualified undergraduate students

(3-0) Cr. 3. Prereq: Enrollment in MBA program or departmental permission.
Shareholder wealth maximization as the goal of the firm within a social responsibility context, financial Math, valuation of securities, the global financial market place as the test of value, estimation of cost of capital, global capital investment decisions, capital structure policy, working capital management.

(3-0) Cr. 3. Prereq: 505
Modern theory of corporate finance and its application to financial management problems. Advanced treatment of firm’s investment, financing, and dividend decisions and survey of related research. Examples of potential topics are the investment banking process, convertible securities and warrants, financial derivatives, asset leasing, mergers and divestitures, leveraged buyouts, international financial management, executive compensation, and pension fund strategy.

(3-0) Cr. 3. Prereq: 505
This course focuses on case studies to develop an integrated set of financial decisions. Topic areas include fixed asset, working capital, capital structure, dividend and merger/acquisition decisions. The objective of the course is to examine different firm settings and establish a framework within which to apply financial tools.

FIN 520. Investments.
(3-0) Cr. 3. Prereq: 505
A comprehensive survey of the classical and contemporary theories of optimum portfolio construction; determinants of risk-return trade-off in selection of securities; emphasis on the theory and evidence of efficient capital markets and implications for security selection and portfolio management.

FIN 534. Financial Derivatives.
(3-0) Cr. 3. Prereq: Graduate classification
An applied course in derivative markets. Topics covered include futures and options markets, option pricing, swaps, use and rating of insurance products, and alternative forms of reinsurance. Emphasis will be placed on agricultural commodity markets, but energy, interest, currency and stock index contracts will also be covered.

FIN 572. Real Estate Finance.
(3-0) Cr. 3. Prereq: MBA Core
Survey of techniques for assessing the value of real estate assets. Introduction to real estate financing instruments, their use and appropriateness.

FIN 590. Special Topics.
Cr. 1-3. Repeatable. F.S.S. Prereq: Permission of instructor
For students wishing to do individual research in a particular area of finance.
International Business

Interdepartmental Undergraduate Secondary Major

The international business program is designed to provide students with information that will enable them to work for companies that are involved with international business. Students are expected to develop an understanding of international business issues applied to the different functional areas of business. They will also develop skills to prepare themselves for business positions with international responsibilities. The program is designed to prepare students for employment in multinational companies and for business assignments beyond the United States.

International business is an undergraduate secondary major that may be taken only in conjunction with a primary major in business. Technical knowledge of international business will strengthen the expertise acquired with the primary major. Business students pursuing this program should strengthen their placement opportunities with multinational corporations.

A student in the College of Business may earn a secondary major in International Business. The requirements for this major include 12 credits in international business courses, one year of the same university-level foreign language (minimum of 6 credits) and an approved international experience (minimum 3 months). Students who pursue this secondary major will be required to complete the requirements for a primary major in Business. Fifteen of the 18 credits required for the International Business major must not be used for the primary major.
Undergraduate Study

For undergraduate curriculum in business, major in management information systems (MIS).

The MIS Program is designed to provide students with a strong educational foundation that prepares them as information system (IS) or information technology (IT) professionals. The academic program consists of a specially designed curriculum that emphasizes conceptual, analytical, technical, and interpersonal, and managerial skills necessary for envisioning, designing, implementing, and supporting information systems for organizations in the globally networked environment. The program offers students with comprehensive technical and managerial training on using and managing information systems and information technology to provide effective information services to organizations of various sizes and types.

The program will: impart knowledge of existing and emerging information technologies and their impact on information systems functions; train to critically analyze business processes, identify inefficiencies and problems, assess information requirements, create business solutions and technical specifications; provide expertise to design and develop business applications using the latest technologies; provide expertise in the latest networking and Internet-based technologies; train in interpersonal and communication skills to effectively interact with various business and technical clients; and provide managerial skills to manage information systems related projects.

The MIS major requires students to take 21 credit hours in information systems area. The required courses are:

- MIS 331 Intermediate Business Programming 3
- MIS 432 Information Systems Analysis 3
- MIS 433 Database Management Systems 3
- MIS 435 Information Systems Infrastructure 3
- MIS 438 Information Systems Development 3

In addition two more courses are required from an approved list. These courses are designed to provide the stated objectives of this degree program.

The department also offers a minor for non-Management information Systems majors in the College of Business. The minor requires 15 credits from an approved list of courses, of which 9 credits must stand alone.

The 15 credits must include MIS 330 Management Information Systems. Students with declared majors have priority over students with declared minors in courses with space constraints.

Graduate Study

The Department of Supply Chain and Information Systems participates in the M.S. in Information Systems (M.S.I.S), the full-time and part-time Master of Business Administration (M.B.A.) and the Ph.D. in Business and Technology programs. The department also participates in an inter-departmental M.S. in Information Assurance as well as in a master’s and Ph.D. program in Human Computer Interaction.

The M.B.A. is a 48-credit, non-thesis, non-creative component curriculum. Thirty of the 48 credits are core business courses and the remaining 18 credits are graduate electives. Students may obtain a specialization in technology and innovation management within the M.B.A. program.

The M.S.I.S. is a 203-credit (minimum) curriculum designed around three interrelated areas – business foundation, IS core, and electives. All students are expected to be familiar with basic computing skills before entering the program. The M.S.I.S. program will educate students on applying IS theory and concepts to modern IS development through classes that enable them to learn and use the latest software in application projects. Students graduating from the program will have advanced technical and managerial skills to develop and manage information systems projects.

The Ph.D. in Business and Technology is a 56-credit curriculum (minimum) which includes a 12-credit dissertation designed around four interrelated areas—core, specialization, minor, and research methods—and the dissertation. The Management of Information Technology (MIT) specialization examines issues related to the development, building, management, and use of information and knowledge-based technologies. Such technologies enable users to collect organizational data, provide a platform for organizing and disseminating the data, and offer operational, decision support, and knowledge management tools through which users can leverage data and information for making better organizational decisions. Students in the MIT specialization will study areas such as information technology analysis and development, database and knowledge management systems, decision support and data mining, human computer interaction, system security and integrity, and project management and collaborative teamwork.

Courses primarily for undergraduate students

(Cross-listed with COM S). (3-1) Cr. 3. F.S.
Prereq: MATH 150 or placement into MATH 140/141/142 or higher
An introduction to computer programming using an object-oriented programming language. Emphasis on the basics of good programming techniques and style. Extensive practice in designing, implementing, and debugging small programs. Use of abstract data types. Interactive and file I/O. Exceptions/error-handling. This course is not designed for computer science, software engineering, and computer engineering majors.

(3-0) Cr. 3. Prereq: COM S 103, BUSAD 150
The role of information technology in organizations. Overview of methodologies for design and development of systems including decision support systems, expert systems, data bases, end-user computing, etc. Computer applications relate concepts to practice. Lecture and laboratory work emphasizes the enabling role of IT in contemporary organizations.

(3-0) Cr. 3. Prereq: MIS 207/COM S 207 or COM S 227
Introduction to the concepts and use of data structures, file accesses and object oriented programming methodologies in contemporary business environments. Application development environments will be covered.

(3-0) Cr. 3. Prereq: 331
Advanced software development and topics in contemporary programming languages. Topics include basic syntax, advanced programming techniques, file structures and management, database access, algorithm design, web forms and graphical user interfaces.

MIS 432. Information Systems Analysis.
(3-0) Cr. 3. Prereq: 330
Critical analysis of business processes, data and process modeling, feasibility studies, CASE tools, and developing system design specifications. Nonmajor graduate credit.

MIS 433. Database Management Systems.
(3-0) Cr. 3. Prereq: Credit or enrollment in 331
Database design, development, and implementation. Focus on data models, both classical and object oriented. Uses relational and/or object oriented database management systems. Nonmajor graduate credit. Only one of MIS 423 and 433 may count towards graduation.
(3-0) Cr. 3. Prereq: 330, MKT 340, SCM 301
Overview of business strategies and technologies used for electronic commerce. Emphasis is on the strategic, operational, and technical issues associated with global electronic commerce using class lecture/discussion and case studies. Nonmajor graduate credit.

MIS 435. Information Systems Infrastructure.
(3-0) Cr. 3. Prereq: 330
Overview of Internet and telecommunications technology used in business applications. Understand Internet and network protocols, network and application architectures, design, and implementation. Nonmajor graduate credit.

MIS 437. Project Management.
(Cross-listed with SCM). (3-0) Cr. 3.
Equips students to support team activities in the general project management environment and better manage their careers. Practical experience using project management techniques and tools. Course topics include project initiation and execution, risk assessment, estimating and contracts, planning, human factors, and standard methods. Nonmajor graduate credit.

MIS 438. Information Systems Development.
(3-0) Cr. 3. Prereq: 432, 433, credit or enrollment in 435
Design of business systems using contemporary tools and methods such as SQL, CASE tools, OOD tools, etc. Focuses on synthesizing concepts from earlier MIS courses. Nonmajor graduate credit.

MIS 439. Topics in Management of Information Systems.
(3-0) Cr. 3. Repeatable. Prereq: 330, permission of instructor
A variety of topics will be covered and topics may vary between semesters. Some of the topics are information resources management, electronic commerce, decision support systems, and expert systems.

MIS 440. Supply Chain Information Systems.
(Cross-listed with SCM). (3-0) Cr. 3. Prereq: 330, SCM 301
Internal and inter-organizational information systems necessary for a supply chain to achieve competitive advantage. Topics include: design, development, implementation, and maintenance of supply chain information systems; enterprise resource planning; advanced planning and scheduling, manufacturing execution systems; and the interface between manufacturing planning and control processes, logistics processes, and the information system.

(3-0) Cr. 3. Prereq: 435
Contemporary theories, concepts, and practices in network infrastructure, network design, and information security. Design, install, and administer a complex network infrastructure. Study security threats and attacks and countermeasures. Investigate exposure to attacks, firewalls, and development of intrusion detection systems. Other security topics such as risk management, IT audit, and security regulations will also be addressed.

MIS 490. Independent Study.
Cr. 1-3. Repeatable. Prereq: 330, senior classification, permission of instructor

Courses primarily for graduate students, open to qualified undergraduate students

(2-0) Cr. 2. Prereq: Enrollment in MBA program or departmental permission
This course exposes the student to current theories and practices appropriate for understanding the role and application of information systems for individuals, organizations, and society within a globally competitive context. The course focuses on information technology and its uses in improving work practices, products, and tools for individuals and organizations. The course also addresses issues pertaining to current and emerging topics in the development and use of technology, the role of technology in and its alignment with organizational strategy and sustainable business practices, information system planning and the development of enterprise architectures, and human interface and personal characteristics in the design and use of technology.

(3-0) Cr. 3. Prereq: 531 or equivalent
A survey of business-oriented programming languages with emphasis on state-of-the-art development techniques for business software. Topics include object-oriented and Internet programming issues and methods.

MIS 533. Data Management for Decision Makers.
(3-0) Cr. 3. Prereq: 503
Addresses data needs of functions such as marketing, finance, and production. Advanced skills needed to design, develop and use database, data warehousing and data mining systems for effective decision support. Emphasis on importance of contemporary technologies.

MIS 534. Electronic Commerce.
(3-0) Cr. 3. Prereq: 503
Overview of how modern communication technologies including the Internet and world wide web have revolutionized the way we do business. Provides an understanding of various Internet technologies and how companies are using the Internet for commercial purposes. Explores future scenarios on the use of these technologies and their impact on various industries and the society.

MIS 535. Telecommunications Management.
(3-0) Cr. 3. Prereq: 503
Issues involved in the management of telecommunications functions. Overview of communications technology used in various business applications, local area network, wide area network, broadband network, wireless and voice networks. Internet technologies and protocols. Analyzing the strategic impact of these technologies on organizations. Strategic planning for telecommunications, including network planning and analysis.

MIS 537. Project Management.
(3-0) Cr. 3. Prereq: 503
Prepares students to support team activities in the general project management environment and provides them with a working understanding of the full scope of project management activities. Students will also have practical experience using project management techniques and tools. Course topics include project initiation and execution, risk assessment, estimating and contracts, planning, human factors, and standard methods. The course follows the recommended content areas of the Project Management Institute, and provides students with a recognized foundational training in project management.

(3-0) Cr. 3. Prereq: 503
Examine current and historical perspectives on business process management. Topics include process identification, mapping, and improvement. Additional topics will address business process automation and integration, business process outsourcing. Investigate current and potential tools and methods for business process management. Include process management projects.
MIS 539. Topics in Management of Information Systems.  
(3-0) Cr. 3. Repeatable. Prereq: 503  
A variety of topics may be offered in different semesters. Topics may include electronic commerce, information resources management, decision support systems, and expert systems.

MIS 590. Special Topics.  
Cr. 1-3. Repeatable. Prereq: Permission of instructor  
For students wishing to do individual research in a particular area of MIS.

MIS 598. Research Seminar in Management Information Systems.  
(3-0) Cr. 3. Prereq: Graduate classification  
Examines issues such as the nature and content of information systems research; aspects of starting and pursuing research topics in information systems; exploring and understanding relevant research methods and tools. Develop preliminary research proposals.

MIS 599. Creative Component.  
Cr. 3. Prereq: Graduate classification, permission of supervisory committee chair  
Preparation and writing of creative component.

Courses for graduate students

(3-0) Cr. 3. Prereq: 503 or equivalent, enrollment in PhD program  
The state of behavioral research in the IS function. MIS activities in an organization span the following three major areas: design and implementation of the MIS, use of the MIS, and management of the MIS function. Each of these processes is carried out at several levels: individual, group, organizational and inter-organizational. Identify behavioral issues of relevance for the cells defined by the process and level dimensions. Reading and discussion of the research literature surrounding the development, use, and implications of information technology.

(3-0) Cr. 3. Prereq: MIS 503 or equivalent, enrollment in PhD program  
Three fundamental areas of Information Systems, namely, infrastructure, management, and processes. Infrastructure studies examine the IT architecture including computing, communication, data, and application. Management focuses on addressing the value added notion of IT. Finally processing addresses topics related to enabling role of IT in myriad of areas.

MIS 603. Seminar on IT Strategy and Structure.  
(3-0) Cr. 3. Prereq: MIS 601  
Strategic issues in IT management. Address issues such as aligning IT strategy with corporate strategy and functional strategies, IT structure, valuation, governance and control, and related topics. Provide students with research skills related to the boundary between IT and the firm's external environment.

MIS 604. Collaboration, Knowledge, and Intelligence in Organizations.  
(3-0) Cr. 3. Prereq: MIS 601  
Research issues in the emerging areas of collaboration, knowledge management, and enterprise intelligence. Topics will include emerging and contemporary technologies of Data Mining, Knowledge Discovery from Databases, Web Mining, organizational memory, and knowledge management.

MIS 650. Research Practicum I.  
(1-0) Cr. 1. Prereq: enrollment in the PhD program  
Preparation of a research manuscript to be submitted to a peer-reviewed academic journal. Although students work under the supervision of a faculty mentor, the students will take independent responsibility for the research project.

MIS 651. Research Practicum II.  
(1-0) Cr. 1. Prereq: enrollment in the PhD program  
Preparation of a second research manuscript to be submitted to a peer-reviewed academic journal. Although students work under the supervision of a faculty mentor, the students will take independent responsibility for the research project.

(Cross-listed with HCI). (3-0) Cr. 3. Prereq: Graduate classification  
Examine opportunities and implications of information technologies and human computer interaction on social and organizational systems. Explore ethical and social issues appurtenant to human computer interaction, both from a prescriptive and descriptive perspective. Develop informed perspective on human computer interaction. Implications on research and development programs.

MIS 699. Research.  
Cr. 3-6. Repeatable. Prereq: Graduate classification, permission of dissertation supervisor  
Research.
Management

Undergraduate Study

For undergraduate curriculum in business, major in management.

The Department of Management offers a major in management. Students will complete the general education requirements (including business foundation courses), and business core requirements for the bachelor of science (B.S.) degree and 18 credits in the major. The instructional objective of the Department of Management is to provide students with knowledge of organizations and management functions within organizations. Management majors will demonstrate an understanding of (1) employee work-related attitudes and behaviors, (2) competitive strategy and advantage, (3) challenges and strategies in international business, and (4) human resource management practices in firms. Students will demonstrate an awareness of the role of diversity, ethics, and technology in business decisions, the impact of external forces and global issues on organizations, and an ability to think critically, to communicate effectively, and to work effectively as a member of a team.

Management is a broadly defined discipline and activity, which is neither industry nor function specific. Management concepts, theories, techniques, and skills are applicable to all business functional areas and are essential components for successful organizations. Management requires sound conceptual, technical, and human skills for the effective utilization of organizational resources. In addition to the basic business foundation and core courses, management majors are required to complete 18 credits of management or department approved courses. Included in these 18 credits are four required courses:

- MGMT 371 Organizational Behavior 3
- MGMT 377 Competitive Strategy 3
- MGMT 414 International Management 3
- MGMT 471 Personnel and Human Resource Management 3

The department also offers a minor for non-Management majors in the College of Business. The minor requires 15 credits from an approved list of courses, with 9 credits from the management core requirements, with management majors having priority over students with declared minors in courses with space constraints.

Graduate Study

The Department of Management participates in the full-time and part-time Master of Business Administration (M.B.A.) and in the Ph.D. in Business and Technology. The M.B.A. is a 48-credit, non-thesis, non-creative component curriculum. Thirty of the 48 credits are core courses and the remaining 18 are graduate electives. The Ph.D. program is a 56-credit curriculum (minimum) that culminates in a dissertation.

Courses primarily for undergraduate students

- MGMT 310. Entrepreneurship and Innovation. (3-0) Cr. 3. Prereq: Sophomore classification
  Review of the entrepreneurial process with emphasis on starting a new business. How to analyze opportunities, develop an innovative product, organize, finance, market, launch, and manage a new venture. Deals with the role of the entrepreneur and the importance of a business plan. Speakers and field project.

- MGMT 313. Feasibility Analysis and Business Planning. (3-0) Cr. 3. F.S. Prereq: 310
  Developing an idea for a new business venture, conducting a feasibility study, researching the potential market, analyzing the competition, and writing a formal business plan. Basic business functions are discussed in terms of their application to conducting feasibility analysis and writing a business plan for an entrepreneurial venture.

- MGMT 367. International Entrepreneurship. (3-0) Cr. 3. Prereq: Enrollment in study abroad program and permission of instructor
  The essentials of operating an entrepreneurial firm in an international environment. Topics include understanding the role of entrepreneurship in economic development, starting and developing a business in an international market, financing international ventures, international management issues and exchange rates.

- MGMT 370. Management of Organizations. (3-0) Cr. 3. F.S.SS. Prereq: ECON 101 or 102 or equivalent
  A management functions approach is used to explain what managers do in organizations; how they deal with external constituents, how they structure their companies, and how they deal with employees. A contingency approach is used as a framework for understanding how to increase the effectiveness and efficiency of organizations in today’s dynamic, highly competitive business environment.

- MGMT 371. Organizational Behavior. (3-0) Cr. 3. F.S. Prereq: 370
  The study of individual attributes, interpersonal relations, and employee attitudes in organizations. Instructional emphasis is placed on how management concepts such as reward systems, job design, leadership, teams, etc., can be used to manage employee attitudes and behavior.

- MGMT 377. Competitive Strategy. (3-0) Cr. 3. F. Prereq: 370
  Developing competitive strategy and achieving competitive advantage in firms, including: industry analysis, generic strategies, hypercompetition, competing against time, and building distinctive capabilities.

- MGMT 414. International Management. (3-0) Cr. 3. F.S.
  The nature and economic role of the multinational firm and entrepreneurial ventures, including the impact of legal, political, and cultural variables upon firm performance and managerial activity; case studies illustrate interdependent nature of functional areas of business projected across national boundaries. Nonmajor graduate credit.

- MGMT 415. Managing New Ventures. (3-0) Cr. 3. F.S. Prereq: 370; MKT 340; FIN 301; SCM 301
  Examination of business problems and issues in new and growing firms. Emphasis is on analyzing existing businesses. Includes a field project. Nonmajor graduate credit.

- MGMT 419. Social Responsibility of Business. (3-0) Cr. 3. S.
  A consideration of the role of business in society. Critical analysis of ethical, managerial, and public issues as they affect the corporation.

- MGMT 471. Personnel and Human Resource Management. (3-0) Cr. 3. F.S. Prereq: Junior standing
  Recruitment and selection, utilization, and development of people in organizations. Examination of each personnel function; interrelationships among the functions.

- MGMT 472. Management of Diversity. (3-0) Cr. 3. F.S. Prereq: Junior classification
  One of the most crucial problems in organizations today is the management of diversity. Attempts to define the difference between equal employment opportunity/affirmative action, which has a legal basis, and diversity which has an educational basis. Organized around the concepts of: (1) cultural diversity and cultural unity; (2) development of skills and tools to manage diversity; and (3) structure of diversity development programs in organizations. Nonmajor graduate credit. Meets U.S. Diversity Requirement
Courses primarily for graduate students, open to qualified undergraduate students

**MGMT 502. Organizational Behavior.**
(3-0) Cr. 3. F.
Prereq: Enrollment in MBA program or departmental permission

Understanding human behavior in organizations and the nature of sustainable organizations from a managerial perspective. Special emphasis is placed on how individual differences, such as perceptions, personality, and motivation, influence individual and group behavior in organizations and on how behavior can be influenced by job design, leadership, groups, and the structure of organizations.

**MGMT 503. Ethical leadership and Governance in Business.**
(3-0) Cr. 3.
Prereq: Enrollment in MBA program or department permission, ACCT 501, FIN 501, MKT 501

Ethical and social responsibilities of top managers in corporations. Topics include stakeholder management, corporate social responsibilities, strategies for sustainable development, pursuit of societal and corporate goals, board and chief executive leadership roles, governance reform and ethics, and executive leadership style and values. The presentation of course concepts is facilitated by the use of cases, discussion scenarios, and ethical dilemmas.

**MGMT 504. Strategic Management.**
(3-0) Cr. 3.
Prereq: Enrollment in MBA program or department permission, ACCT 501, FIN 501, MKT 501

Critical analysis of case studies in strategic management with an emphasis on integrative decision making. Strategy implementation in light of the global, legal, economic, cultural, and political contexts of business.

**MGMT 565. Early Stage Entrepreneurship - Mind to Market.**
(3-0) Cr. 3.
Prereq: Graduate classification

Commercialization of new technology. Topics covered include market analysis, intellectual property, product development, feasibility analysis, and new business evaluation.

**MGMT 566. Entrepreneurship and New Business Creation.**
(3-0) Cr. 3.
Prereq: Graduate classification or permission of instructor.

The essentials of starting and operating a new business. Topics include current research on entrepreneurial perspective, starting and developing a new business, financing the venture, managing the growing firm, and special issues.

**MGMT 567. International Entrepreneurship.**
(3-0) Cr. 3.

Essentials of operating an entrepreneurial firm in an international environment. Topics include international entrepreneurship, starting and developing a business in an international market, financing international ventures, international management issues, exchange rates, and culture.

**MGMT 569. Technology Entrepreneurship.**
(3-0) Cr. 3.
Prereq: Graduate standing or instructor’s permission

Identification of high-potential, technology-intensive commercial opportunities, resources? gathering, and risk management under environmental uncertainty. Focus on technology ventures and firms that use technology strategically across several industries. Topics include key success factors and forecasting analysis across main value-chain activities.

**MGMT 570. Managing Employee Attitudes and Behaviors.**
(3-0) Cr. 3.
Prereq: 371 or 507 or PSYCH 450

Advanced topics germane to the management of individuals and groups over their work lives; sustained work commitment, motivation and job/ career satisfaction, absenteeism, turnover, stress, leadership and career development (e.g., career ladders, mentoring).

**MGMT 571. Seminar in Personnel and Human Resources Management.**
(3-0) Cr. 3.
Prereq: 371 or 507 or SOC 420

Topics and issues in personnel management with a focus on the management of human resources in organizations. Current personnel practices, philosophies, and behavioral science research.

**MGMT 572. Personality and Management.**
(3-0) Cr. 3.
Prereq: Graduate standing or permission of instructor

Personality and individual differences have significant implications for human resource management, organizational behavior and strategic management. Research has shown that these characteristics affect many core management topics including motivation, leadership, and decision making. Surveys of literature relating personality and individual differences to management and organizations. Students will complete a wide variety of personality assessments and get their results, and reflect on how personality and individual differences can be practically relevant in the modern work environment.

**MGMT 581. Contemporary Topics in Strategy.**
(3-0) Cr. 3.
Prereq: Enrollment in MBA program or permission of instructor

Discussion of concepts and techniques used in long range strategic planning. Examination of planning practices in business and not-for-profit organizations. Topics include environmental scanning, industry analysis, forecasting, corporate and competitive strategies, and tactics.

**MGMT 582. Corporate Governance and Top Management.**
(Cross-listed with ACCT) (3-0) Cr. 3.
Prereq: 501 or permission of instructor

Duties, structure, and functioning of top management teams and corporate boards of directors. CEO/board tenure and succession planning, top management compensation, board committee composition, assessment of CEO and board performance, theories of corporate governance, management of the corporate strategic agenda, governance codes, international governance, and chairman/CEO duality. Case studies and contemporary issues discussed.

**MGMT 583. Strategic Management of Innovation.**
(3-0) Cr. 3.
Prereq: 501 or permission of instructor

Critical analysis and discussion of cases focused on strategic management of innovation. Assessment of a firm’s innovative capabilities and competitive dynamics to manage innovative processes. Practical applications through emphasis on implementation including internal corporate venturing, management of the corporate R&D function, and institutionalization of innovation.

**MGMT 584. Management Consulting.**
(3-0) Cr. 3.
Prereq: 501 or permission of instructor

Provides the opportunity for students to understand the role of the professional consultant, the issues facing the management consulting industry, the competencies of various management consulting firms, the nature and form of strategic consulting engagement, and the nature and scope of strategic change in business firms. Students will learn about management consulting functions and will practice the consultant role through cases and field studies.

**MGMT 590. Special Topics.**
Cr. 1-3. Repeatable.
F.S.S.
Prereq: Permission of instructor

For students wishing to do individual research in a particular area of management.
Courses for graduate students

MGMT 601. Philosophy of Science.
(3-0) Cr. 3. Prereq: enrollment in the PhD program
This course provides a philosophical introduction to the theoretical and empirical development of scientific knowledge. It focuses on a variety of basic problems common to the social sciences: the nature of explanation, the structure of theories, forms of knowledge, scientific laws, nature of theory and ethics. The purpose of the course is to help doctoral students define a research context by addressing the purposes, assumptions and primary components of scientific inquiry.

MGMT 602. Organizational Theory.
(3-0) Cr. 3. Prereq: enrollment in the PhD program
This seminar involves the examination of the core theories and perspectives in organizational theory, as well as their applications and extensions. This material addresses the fundamental rationale for organizations in modern society, basic processes of organizing and organizational structure, a consideration of inter-organizational relationships and the external environment, and a variety of factors that help determine organizational effectiveness.

MGMT 603. Strategic Management of Technology and Innovation.
(3-0) Cr. 3. Prereq: MGMT 601
This course will offer a critical review of organizational decision making with respect to technology and innovation. Students will learn how technological change can alter the basis of competition; how competitive strategy drives technology investment decisions; how market-orientation should be the other backbone of technological innovation; and best practices of organizing and managing the new product development process to achieve strategic goals.

MGMT 604. Seminar in Organizational Behavior.
(3-0) Cr. 3. Prereq: enrollment in the PhD program
The purpose of this seminar is to introduce behavioral science literature relevant to the study of behavior in organizational settings. The course will focus on the individual’s role within organizations and cover topics such as individual differences, motivation, leadership, decision-making, learning, risk taking, interpersonal relations, etc. Both theoretical and empirical contributions will be examined, with emphasis on integration of diverse theoretical perspectives.

MGMT 650. Research Practicum I.
(1-0) Cr. 1. Prereq: enrollment in the PhD program
Preparation of a research manuscript to be submitted to a peer-reviewed academic journal. Students will work with a faculty mentor on a research project.

MGMT 651. Research Practicum.
(1-0) Cr. 1. Prereq: enrollment in the PhD program
Preparation of a second research manuscript to be submitted to a peer-reviewed academic journal. Although students work under the supervision of a faculty mentor, the students will take independent responsibility for the research project.

Cr. 1-12. Prereq: Graduate classification, permission of dissertation supervisor
Research.
Undergraduate Study
For undergraduate curriculum in business, major in marketing.

The Department of Marketing offers a major in marketing. Students will complete the general education requirements (including business foundation courses), and business core requirements for the bachelor of science (B.S.) degree and 18 credits in the major.

Marketing is concerned with management decisions that deal with the satisfaction of customer needs and wants in the purchase and use of goods and services. The primary decision areas in marketing involve the identification of market segments and decisions dealing with product design, pricing, promotion (including personal selling and marketing communications), and distribution. A major in marketing prepares the student for careers in selling and sales management, marketing research, marketing management, retail management, marketing communications, promotion management, and/or international marketing. Each area of study may be applied to consumer, business-to-business, and/or services marketing environments in business and nonprofit organizations.

The instructional objective of the Marketing department is to provide knowledge of the marketing process and an understanding of its functions. The students are expected to develop decision-making skills, computational skills, and communication skills with appreciation for global marketplace and ethical concerns. In addition to the basic business foundation and core courses, marketing majors are required to complete 18 credits of marketing or department approved courses. Included in these 18 credits are three required courses:

- **MKT 443** Strategic Marketing Management 3
- **MKT 444** Fundamentals of Marketing Research 3
- **MKT 447** Fundamentals of Consumer Behavior 3

The department also offers a minor for non-Marketing majors in the College of Business. The minor required 15 credits from an approved list of courses, of which 9 credits must stand alone. Students with declared majors have priority over students with declared minors in courses with space constraints.

Graduate Study
The Department of Marketing participates in the full-time and part-time Master of Business Administration (M.B.A.) and the Ph.D. in Business and Technology. The M.B.A. program is a 48-credit, nonthesis, noncreative-component curriculum. Thirty of the 48 credits are core courses and the remaining 18 are graduate electives. Within the M.B.A. program, students may develop an area of specialization in marketing.

The Ph.D. in Business and Technology with a Customer Management (CM) specialization is a 56 credit (minimum) curriculum designed around four interrelated areas—core, specialization, minor, and research methods—and dissertation. The focus of the CM specialization is on customer management issues—selection of target customers, design of individualized customer programs, maximizing satisfaction, loyalty and retention and getting the maximum ROI out of customer investments.

Courses primarily for undergraduate students
(3-0) Cr. 3. F.S.S. Prereq: credit or current enrollment in ECON 101
The role of marketing in society. Markets, marketing institutions, and marketing functions with emphases on product, price, marketing communication, and marketing channel decisions.

MKT 343. Personal Sales.
(3-0) Cr. 3. Prereq: 340
Analysis of the theory and practice of personal selling with the context of relationship marketing and salesforce automation. Topics include: goal setting, prospecting, time/territory management, questioning, presentations, objections, commitment and customer service; simulations of selling situations.

(3-0) Cr. 3. F.S. Prereq: Credit or enrollment in 447
Principles, concepts, and problems involved in the development and implementation of promotional strategies. Coordination of a variety of promotional elements: advertising, sales promotion, direct marketing, public relations and publicity of web communications, and personal selling. Nonmajor graduate credit.

MKT 442. Sales Management.
(3-0) Cr. 3. F.S. Prereq: 340
Functional aspects of sales force management; personal selling methods; procedures for recruiting, selecting, and training new salespeople; compensation and expense control systems; problems of sales force motivation and supervision; methods of territorial and quota assignment; sales department budgets; distributor-dealer relations; other selected topics. Nonmajor graduate credit.

MKT 443. Strategic Marketing Management.
(3-0) Cr. 3. F.S. Prereq: 444, 447
Analysis of major elements of strategic marketing management. May include case studies or business simulations involving decision making using marketing tools from previous courses. (For marketing majors only).

MKT 444. Fundamentals of Marketing Research.
(3-0) Cr. 3. F.S. Prereq: 444, 226
Marketing research techniques: problem formulation, research design, data collection methods, and analysis and interpretation of data related to marketing decisions. Nonmajor graduate credit.

(3-0) Cr. 3. F.S. Prereq: 340
Examines how customer data can be used to enhance decisions relating to acquisition, development and retention. Topics include customer lifetime value, customer as assets, customer loyalty programs and customization.

MKT 446. Retailing.
(3-0) Cr. 3. F.S. Prereq: 340
Basic areas of retail management: buying, merchandising, retail promotion, store location, store layout, credit management, and inventory control. Emphasis on practical application of retail management principles.

(3-0) Cr. 3. F.S. Prereq: 340
Study of how consumers select, purchase, use, and dispose of goods and services. Includes analyses of how markets and others influence these processes. Application of concepts and methods of the behavioral sciences to marketing management decision making. Nonmajor graduate credit.

MKT 448. Fundamentals of International Marketing.
(3-0) Cr. 3. F.S. Prereq: 340
Introduction to terms used in international marketing and sources of information on international markets. Development of sensitivity toward foreign business environment and familiarity with operations of multinational corporations. Nonmajor graduate credit.
Planning; models and techniques of new product evaluation used by concept evaluation, test marketing, launch tracking, and global product decision areas include market definition and structure, idea generation, principles and concepts of new product development and introduction; (3-0) Cr. 3. S.

MKT 452. Comparative Marketing.
(3-0) Cr. 3. SS. Prereq: 340
Provides experience to students in culture, social, economic, and political environment of marketing in a foreign country. Students complete a term project (e.g., a marketing plan) based on information collected in the foreign country. Students attend briefings by experts/officials of private and public organizations. Nonmajor graduate credit.

Courses primarily for graduate students, open to qualified undergraduate students

MKT 501. Marketing.
(3-0) Cr. 3. Prereq: Enrollment in MBA program or departmental permission
An analytical approach to the study of marketing issues and challenges of business firms and nonprofit organizations. Emphasis on the influence of the global marketplace and the marketing environment on marketing decision making; the determination of the organization’s products, prices, channels and communication strategies; an orientation that ensures sustainability of marketing operations; and the organization’s system for planning and controlling its marketing effort.

MKT 540. Advanced Marketing Management.
(3-0) Cr. 3. F. Prereq: 504
Strategic marketing and decision making, with emphasis on cases utilizing qualitative and quantitative techniques and marketing models.

MKT 541. International Marketing.
(3-0) Cr. 3. F. Prereq: 504, 509
Scope and nature of global marketing operation; the context of international environment in which firms operate. Recent developments of international business activities, and a framework for better understanding of the basic forces driving international business and marketing operations. Development of market entry strategies and global marketing mix policies, as well as export operations. Organizational issues related to the globalization of the firm.

(3-0) Cr. 3. S. Prereq: 504
Principles and concepts of new product development and introduction; decision areas include market definition and structure, idea generation, concept evaluation, test marketing, launch tracking, and global product planning; models and techniques of new product evaluation used by consumer product companies.

MKT 543. Services Marketing.
(3-0) Cr. 3. Prereq: 504 and instructor permission
In-depth appreciation and understanding of the unique challenges inherent in managing and delivering quality services. Students will be introduced to and have the opportunity to work with tools and strategies that address these challenges.

MKT 544. Marketing Research.
(3-0) Cr. 3. S. Prereq: 504, Stat 328 or 401
Marketing research methods are examined with emphasis on the use of advanced research methods in business research. Application of advanced sampling, measurement, and data analysis methods in research on market segmentation, market structure, consumers’ perceptions and decision processes, marketing communication, new product development, and pricing.

MKT 545. Integrated Marketing Communication.
(3-0) Cr. 3. Prereq: 504
Introduces the student to the field of marketing communications. Covers a number of topics and areas essential for understanding how to design and evaluate communication strategies necessary for the successful marketing of products and services. An integrated marketing communications (IMC) perspective is employed in covering material, with a corresponding focus on various elements of an IMC strategy, including advertising, promotions, point-of-purchase communications, direct marketing techniques, and other topics.

MKT 546. Customer Relationship and Business-To-Business Marketing.
(3-0) Cr. 3. Prereq: 504
Core concepts and issues involved in customer relationship strategy and management in consumer and business-to-business markets. Emphasis on customer opportunity analyses, customer relationship management tools and strategies.

MKT 547. Consumer Behavior.
(3-0) Cr. 3. S. Prereq: 504
The behavior of consumers. Intensive review of literature from relevant disciplines. Applications of concepts and methods of the behavioral sciences to marketing management decision making.

MKT 549. Global Marketing Planning and Execution.
(3-0) Cr. 3. Prereq: 501, 504, 509
Allows students to develop the ability to plan and execute a B2B business by integrating aspects of marketing with other business functions in the international context. Product strategy, innovation, foreign market entry, supply strategies for foreign markets, pricing strategy, market research, customer service, international payments, managing international subsidiaries, licensing, distribution strategy, and responding to changing international environmental conditions. Involves a simulation-based instruction in planning and managing an international B2B business.

MKT 551. Marketing Channels.
(3-0) Cr. 3. Prereq: 504
Design of marketing channels, developing and managing relationships with resellers, and evaluating channel performance. Emphasis on international and technological aspects of marketing channels.

MKT 590. Special Topics.
Cr. 1-3. Repeatable. Prereq: Permission of instructor
For students wishing to do individual research in a particular area of marketing.

Courses for graduate students

MKT 601. Seminar in Consumer Behavior.
(3-0) Cr. 3. Prereq: MGMT 601
A rigorous foundation of the major conceptual and methodological paradigms in the consumer-behavior literature. Seeks to aid students in understanding the psychological, sociological, and anthropological roots of consumer behavior research. Read the latest research in the area reported in leading consumer behavior/psychology journals.
(3-0) Cr. 3. Prereq: MGMT 601
Review major contributions and recent developments in marketing strategy research and practice. Review commonly used modeling approaches and research methods to study strategic interaction between firms seeking to build competitive advantages. Provide an overview of empirical research regarding measurement, level and persistence of business success and implications of findings for theory and strategy development.

(3-0) Cr. 3. Prereq: MKT 601
Addresses key strategy and implementation issues behind customer management. Topics such as typology of CM strategies, antecedents and outcomes; environmental and managerial influences on strategy formation; technology and impact on CM strategy; and value of CM strategy. Examine theories and concepts behind important CM issues such as customer satisfaction, customer loyalty and customer profitability.

MKT 604. Marketing Issues in Inter-Organizational Relations.
(3-0) Cr. 3. Prereq: MGMT 602
Inter-firm and network competition; relationship among suppliers, distributors, alliance partners, external employees, and internal employees. Theories including agency theory, network theory, relationship marketing, channels of distribution theories on cooperation versus competition, IOS theories.

(3-0) Cr. 3. Prereq: Knowledge of introductory statistics, STAT 401, enrollment in the PhD program
Introduction to methodological issues that arise when addressing a wide variety of research questions in organizational and consumer studies. Address measurement issues (scales, reliability and construct validity), design (for experiments, surveys, or qualitative studies), sampling, and analysis (univariate and multivariate statistical procedures). Measurement issues in cross-cultural and international research will also be covered. It is assumed that students entering the course have knowledge of introductory statistics.

MKT 650. Research Practicum I.
(1-0) Cr. 1. Prereq: enrollment in the PhD program
Preparation of a research manuscript to be submitted to a peer-reviewed academic journal. Students will work with a faculty mentor on a research project.

MKT 651. Research Practicum II.
(1-0) Cr. 1. Prereq: enrollment in the PhD program
Preparation of a second research manuscript to be submitted to a peer-reviewed academic journal. Although students work under the supervision of a faculty mentor, the students will take independent responsibility for the research project.

Cr. 12. Prereq: Graduate classification, permission of dissertation supervisor
Research.
Supply Chain Management

Undergraduate Study

For undergraduate curriculum in business, major in Supply Chain Management.

Supply Chain Management is an integrated program of study concerned with the efficient flow of materials, products, and information within and among organizations. Supply chain management involves the integration of business processes across organizations, from material sources and suppliers through manufacturing and processing to the final customer. The program provides students with the core knowledge related to a wide variety of supply chain activities, including demand planning, purchasing, inventory control, material handling, product and service support, information technology, and strategic supply chain management. In addition, the program offers two concentrations: logistics and operations. The logistics concentration focuses on transportation, distribution, warehousing, facility location analysis, and packaging. The operations concentration focuses on the analysis, design, implementation, planning, control, and improvement of manufacturing and service processes.

The study of Supply Chain Management prepares students for professional careers with manufacturers, distributors, transportation carriers, logistics service providers, and consulting firms. The curriculum provides the required theoretical/conceptual base and analytical methods for making sound operational and strategic business decisions.

The requirements for the Supply Chain Management major requires students to take 18 credit hours in the supply chain management area. This requirement arises by completion of the following common core courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>SCM 485</td>
<td>Demand Planning and Management</td>
<td>3</td>
</tr>
<tr>
<td>SCM 486</td>
<td>Principles of Purchasing and Supply Management</td>
<td>3</td>
</tr>
<tr>
<td>SCM 487</td>
<td>Strategic Supply Chain Management</td>
<td>3</td>
</tr>
<tr>
<td>Two core courses in the concentration area</td>
<td></td>
<td>6</td>
</tr>
<tr>
<td>SCM 460</td>
<td>Decision Tools for Logistics and Operations and Principles of Transportation</td>
<td>3</td>
</tr>
<tr>
<td>SCM 422</td>
<td>Manufacturing Planning and Control and Process Management, Analysis, and Improvement</td>
<td>3</td>
</tr>
</tbody>
</table>

One course from an approved list of electives

Total Credits 18

Students are encouraged to consider meeting the requirement for both concentrations to establish a broader foundation for a successful career in supply chain management.

The department also offers a minor for non-Supply Chain Management majors in the College of Business. The minor requires 15 credits from an approved list of courses, of which 9 credits must stand alone. Students with declared majors have priority over students with declared minors in courses with space constraints.

Graduate Study

The Department of Supply Chain and Information Systems participates in the full-time and part-time Master of Business Administration (M.B.A.) and in the Ph.D. in Business and Technology programs. The department also participates in the interdisciplinary M.S. in Transportation program.

The M.B.A. program is a 48-credit, non-thesis, non-creative component curriculum. Thirty of the 48 credits are core courses and the remaining 18 are graduate electives. Students can obtain a specialization in Supply Chain Management within the M.B.A. program.

The Ph.D. in Business and Technology is a 56-credit curriculum (minimum) that culminates in a dissertation. Students may select Supply Chain Management as their major area of specialization.

Courses primarily for undergraduate students

SCM 301. Supply Chain Management.

(3-0) Cr. 3. Prereq: ECON 101 and STAT 226
Various supply chain activities and integration of supply chain management with supply and demand, both within and between firms. Exposure to a wide range of supply chain management terminology, analytical tools, and theories related to four key elements of supply chain management: purchasing, operations, distribution, and integration. Specific topics include strategic sourcing, supply management, demand forecasting, resource planning, inventory management, process management, logistics, location analysis, process integration, and performance measurement.

SCM 422. Manufacturing Planning and Control.

(3-0) Cr. 3. Prereq: SCM 301
Advanced treatment of manufacturing planning and control procedures. Master production scheduling, material requirements planning, enterprise resource planning, capacity planning, shop floor control, just-in-time, and competitive analyses of modern manufacturing systems. Nonmajor graduate credit.

(3-0) Cr. 3. Prereq: SCM 301
The design, analysis, and management of production processes to improve performance. Performance measures and their relationships; process design and evaluation; and managerial levers for improving and controlling process performance. Nonmajor graduate credit.

SCM 428. Special Topics in Operations Management.

(3-0) Cr. 3. Prereq: SCM 301
In-depth analysis of current issues, problems, and systems in operations management with emphasis on new theoretical and methodological developments. Topics may include in different semesters, supply chain management, productivity and quality improvement, management of technology and innovation, information technology in operations management, quick response manufacturing, and service operations management. Nonmajor graduate credit.

SCM 437. Project Management.

(Cross-listed with MIS). (3-0) Cr. 3.
Equips students to support team activities in the general project management environment and better manage their careers. Practical experience using project management techniques and tools. Course topics include project initiation and execution, risk assessment, estimating and contracts, planning, human factors, and standard methods. Nonmajor graduate credit.
SCM 440. Supply Chain Information Systems.
(Cross-listed with MIS). (3-0) Cr. 3. Prereq: 301, MIS 330
Internal and inter-organizational information systems necessary for a supply chain to achieve competitive advantage. Topics include: design, development, implementation, and maintenance of supply chain information systems; enterprise resource planning: advanced planning and scheduling, manufacturing execution systems; and the interface between manufacturing planning and control processes, logistics processes, and the information system.

(3-0) Cr. 3. Prereq: 301
Technical tools and skills required for problem solving and decision making in logistics and operations management. Transportation and network planning, inventory decision making, facility location planning, vehicle routing, scheduling, and production planning. Quantitative tools include linear and integer programming, non-linear programming, and simulation. Emphasis on the use of PC-based spreadsheet programs. Nonmajor graduate credit.

SCM 461. Principles of Transportation.
(3-0) Cr. 3. Prereq: 301
Economic, operating, and service characteristics of the various modes of transportation, with a special emphasis on freight transportation. Factors that influence transport demand, costs, market structures, carrier pricing, and carrier operating and service characteristics and their influence on other supply chain costs and supply chain performance. Nonmajor graduate credit.

SCM 462. Transportation Carrier Management.
(3-0) Cr. 3. Prereq: Credit or enrollment in 461
Analysis of transport users' requirements. Carrier management problems involving ownership and mergers, routes, competition, labor, and other decision areas. Nonmajor graduate credit.

SCM 466. International Transportation and Logistics.
(3-0) Cr. 3. Prereq: 301
Logistics systems and legal framework for the international movement of goods. Operational characteristics of providers of exporting and importing services. The effects of government trade policies on global logistics. Nonmajor graduate credit.

SCM 485. Demand Planning and Management.
(3-0) Cr. 3. Prereq: 301
Demand planning process which synchronizes demand with manufacturing and distribution. Addresses linking business plans and demand forecasts both horizontally and vertically within the organization and collaboratively among supply chain partners. Forecasting, customer relationship management, sales and operations planning, customer service, distribution channels, e-fulfillment, and information systems requirements. Nonmajor graduate credit.

(3-0) Cr. 3. Prereq: 301
Sourcing strategies, concepts, tools and dynamics in the context of the integrated supply chain. Make or buy decision, supplier evaluation and selection, global sourcing, the total cost of ownership, contracts and legal terms, negotiation, purchasing ethics, and information systems requirements. Nonmajor graduate credit.

SCM 487. Strategic Supply Chain Management.
(3-0) Cr. 3. Prereq: 460 or 422 or 424; 485 or 486
Capstone course in supply chain management. Integrating and applying the theories, concepts, and methods covered in the prerequisite courses through the use of readings, case studies, projects, and industry speakers. Nonmajor graduate credit.

SCM 490. Independent Study.
Cr. 1-3. Repeatable. Prereq: SCM 301, senior classification, permission of instructor

SCM 501. Supply Chain Management.
(3-0) Cr. 3. Prereq: Enrollment in MBA program or departmental permission
Introduction to supply chain management including aspects of operations, logistics and global supply chain strategy development. Topic areas include lean manufacturing and value stream mapping; supplier development and measurement; sustainable supply chain operations; process measurement, management and improvement; supply chain risk and uncertainty; visibility and integration in the supply chain; and inventory control.

SCM 520. Decision Models for Supply Chain Management.
(3-0) Cr. 3. Prereq: 502 or permission of instructor
The application of decision models for supply chain management. Topics include business applications of decision theory, inventory theory, business forecasting, optimization models, transportation and network models, routing problems, and project management.

SCM 522. Supply Chain Planning and Control Systems.
(3-0) Cr. 3. Prereq: 502 or permission of instructor
An integrated analysis of planning and control systems for supply chains. Master production scheduling, material requirements planning, enterprise resource planning, capacity planning, shop floor control, competitive analyses of modern supply chain systems, and implementation of information technologies related to these topics.

SCM 524. Strategic Process Analysis and Improvement.
(3-0) Cr. 3. Prereq: 502 or permission of instructor
Analysis, management, and improvement of the business processes used to produce and deliver products and services that satisfy customer needs. Process attributes that managers can control to influence the key operational performance measures of throughput time, inventory, cost, quality, and flexibility are discussed. Topics such as theory of constraints, lean production, and six sigma are included.

SCM 560. Strategic Logistics Management.
(3-0) Cr. 3. Prereq: 502 or permission of instructor
Positions logistics vis-a-vis supply chain management (SCM). Presents different perspectives on SCM vs. logistics. Describes primary logistics functions: transportation, warehousing, facility location, customer service, order processing, inventory management and packaging. Benefits of and obstacles to the integration of these functions.

SCM 561. Transportation Management and Policy.
(3-0) Cr. 3. Prereq: 502 or permission of instructor
Analysis of contemporary issues and strategies in transportation management and policy. Emphasis on evaluation of the impacts of transportation policies, new technologies, and strategic carrier and shipper management practices on the freight transportation industry and logistics systems.

SCM 563. Purchasing and Supply Management.
(3-0) Cr. 3. Prereq: 502 or permission of instructor
Mechanics, procedures and tools used in purchasing. Recruiting, selecting, developing and managing supply chain partners in order to achieve competitive advantage via superior supply chain management. Factors and information needs for making supply management decisions.

SCM 585. Strategic Demand Planning.
(3-0) Cr. 3. Prereq: 502 or permission of instructor
Synchronizes demand with manufacturing and distribution. Emphasis on the strategic advantages of linking business plans and demand forecasts, both vertically within the organization and collaboratively among supply chain partners.

SCM 590. Special Topics.
Cr. 1-3. Repeatable. Prereq: Graduate classification and permission of instructor
For students who wish to do individual research in a particular area of supply chain management.
Courses for graduate students

SCM 601. Theoretical Foundations of Supply Chain Management.
(3-0) Cr. 3. Prereq: MGMT 601 or permission of instructor
An overview of the development of supply chain management (SCM) theory, including review of seminal articles in logistics, operations, and purchasing management and theories from allied disciplines (e.g., economics, marketing, sociology, strategic management). Analysis of trends in SCM research topics and methodologies. Identification of emerging and future areas for research and theory development.

(3-0) Cr. 3. Prereq: 601 or concurrent enrollment
Review of research literature on supply chain strategy, including the impact of technology, global economic and social factors, and intra- and inter-organizational integration on supply chain strategy formation. The role of SCM in overall corporate strategy and the impact of SCM on firm performance will also be addressed.

SCM 603. Seminar in Purchasing.
(3-0) Cr. 3. Prereq: 601 or concurrent enrollment
Review of classic purchasing theories. Discussion of contemporary supply management strategy; the role of supply management and its relationship with other functional areas; its impact on logistics and transportation issues; management of supply uncertainties.

SCM 604. Seminar in Logistics Management.
(3-0) Cr. 3. Prereq: SCM 601 or concurrent enrollment
Integration of network, economic, and systems theory in the design, management, and control of logistics systems in the context of integrated supply chain management. Functional areas addressed include transportation, inventory order fulfillment, distribution, and warehousing. Facility location analysis will also be covered.

SCM 605. Seminar in Operations Management.
(3-0) Cr. 3. Prereq: SCM 601 or concurrent enrollment
Review of the research literature on methods of organizing, planning, controlling, and improving manufacturing systems to achieve the desired performance objectives related to cost, quality, speed, and flexibility. The relationship between the performance of the manufacturing system and the performance of the supply chain system will also be discussed.

SCM 650. Research Practicum I.
(1-0) Cr. 1. Prereq: enrollment in the PhD program
Preparation of a research manuscript to be submitted to a peer-reviewed academic journal. Students will work with a faculty mentor on a research project.

SCM 651. Research Practicum II.
(1-0) Cr. 1. Prereq: enrollment in the PhD program
Preparation of a second research manuscript to be submitted to a peer-reviewed academic journal. Although students work under the supervision of a faculty mentor, the students will take independent responsibility for the research project.

Cr. 12. Prereq: Graduate classification, permission of dissertation supervisor
Research.
Departments of the College

- Architecture
- Art and Design
- Community and Regional Planning
- Landscape Architecture

Objectives of the Curricula in Design

The College of Design is among a small number of comprehensive design schools offering outstanding opportunities for both disciplinary and interdisciplinary education.

The College of Design strives to provide each student with a broad educational background and preparation in a specific design or art discipline. Each program is designed to develop knowledge and appreciation of the physical and cultural environment, to stimulate creative thinking and analysis, and to prepare students for participation in a wide variety of careers.

The college’s programs also encompass many opportunities for individualized study and extracurricular activities such as visiting lectures and symposia, workshops, gallery exhibits, practicum and internship programs, field trips, and international study programs.

Graduates of the college are employed in private firms, government, industry, and education, or are self-employed as designers or artists. Opportunities for graduates include careers as architects, landscape architects, community and regional planners, graphic designers, interior designers, studio artists, arts administrators and environmental designers.

Graduate Curricula

The College of Design offers graduate study in the areas shown below. Graduate study is conducted through the Graduate College. Details are found in the Graduate College section of this catalog.

Majors
- Architecture
- Art and Design
- Community and Regional Planning
- Graphic Design
- Industrial Design
- Interior Design
- Integrated Studio Arts
- Landscape Architecture

Secondary Majors
- Environmental Studies*
- International Studies*

Minors
- Critical Studies in Design
- Design Studies
- Digital Media
- Entrepreneurial Studies*
- Environmental Studies*
- Gerontology*
- International Studies*
- Technology and Social Change*

*The College of Design participates in these interdepartmental secondary majors and minors.

Organization of Curricula

The undergraduate curricula in design are divided into two phases: a preprofessional Core Design Program and a professional program. The Core Design Program grounds the undergraduate degree programs and provides a rich, rigorous inclusive base for all the colleges professional programs. It creates shared language, experience, and community for programs, faculty and students and exposes students to all design disciplines, allowing them to make more informed degree choices, apply to multiple programs, and experiment with interdisciplinary work.

For students entering the Core Design Program, the college highly recommends purchase of a digital camera.

The intense, discipline-specific professional curricula that follow the Core Design Program focus on developing students’ ability and knowledge in their major. Within the major area, students advance creative and professional skills through classroom and studio work, critiques of student projects, discussion with professional practitioners, and field studies.

General education, contained in both the Core Design Program and the professional programs, is composed to ensure that students receive a well-rounded undergraduate education.

High School Preparation

Courses in fine arts and design that develop visualization and freehand drawing abilities are highly recommended through not required for entrance. Students planning to enroll in an academic program in the College of Design must complete the following high school requirements:

- 4 years of English, including coursework in composition and literature and up to 1 year of speech and/or journalism, to develop communication skills and critical reading/writing ability
- 3 years of mathematics to develop problem solving skills, including 1 year each of algebra, geometry, and advanced algebra
- 3 years of science, including at least two of the following:
  - 1 year of Biology, 1 year of chemistry, or 1 year of physics
- 2 years of social studies, including at least 1 year of U.S. history and 1 semester of U.S. government.

Double Degree Programs
- Architecture / Business
- Architecture / Community and Regional Planning
- Community and Regional Planning / Landscape Architecture
- Community and Regional Planning / Public Administration
- Community and Regional Planning / Sustainable Agriculture
- Community and Regional Planning / Business

Minor
- Gerontology*

*The College of Design participates in this interdepartmental graduate program.
Admission Standards to Enrollment Managed Professional Programs

Admission into the enrollment managed professional programs of Architecture, Community and Regional Planning, Graphic Design, Industrial Design, Integrated Studio Arts, Interior Design, and Landscape Architecture requires a separate application after completing the Core Design Program, depends on available resources, and is subject to review by faculty committee. Applicants are reviewed on the basis of a portfolio of original work, academic performance, and a written essay.

Advising

Each student receives personal assistance from an academic advisor within the student’s curriculum area. Students enrolled in the college’s Core Design Program are advised by professional advisors. Once admitted to professional programs, students are assigned to faculty advisors within the student’s curriculum area. Advisors help students develop a program of study, access pertinent university resources and provide information on career choice.

The college’s career services office works with students to develop their career goals as well as prepare and search for employment.

Honors Program

The College of Design participates in the Honors Program which provides opportunities for outstanding students to individualize their programs of study. See Index, Honors Program.

Requirements in the College of Design

All students in the College of Design are expected to meet the following requirements.

Core Design Program

Cr. Fall/Spring

(C- or better grade). Includes courses in the fields of English (composition) and speech communication (interpersonal and rhetorical).

Mathematics, physical sciences, and biological sciences 6 cr.

Includes courses in the fields of agronomy, astronomy and astrophysics, biology, botany, chemistry, civil engineering, computer science, geology, mathematics, physics, statistics, and zoology.

Humanities: 6 cr.

Includes courses in the fields of classical studies, English (literature), foreign languages, history, philosophy, religious studies, as well as history/theory/literature courses in dance, music, theater, journalism, African American studies, American Indian studies, environmental studies, Latino/a studies, women’s studies, and university studies.

Social Sciences: 6 cr.

Includes courses in the fields of African American studies, American Indian studies, anthropology, economics, environmental studies, geography, human development and family studies, Latino/a studies, psychology and sociology, women’s studies, and university studies.

General Education Electives: 9 cr.

9 cr. from any of the above areas, 6 cr. of course level 300-400.

Minor in Critical Studies in Design

The undergraduate minor in Critical Studies in Design offers students opportunities to engage the history, theory and criticism of visual and material culture and the built environment. In lectures and focused seminars, students explore historical and contemporary issues, including cultural production, media and technology, design in everyday life, and models of professional practice. The minor is open to undergraduates in all university majors.

Total minor requirements: 15 cr.

At least six of the 15 credits must be taken at Iowa State University in courses numbered 300 or above. At least nine of the 15 credits must not be used to meet any other college or university requirements except the credit requirement for graduation.

Minor in Design Studies

The undergraduate minor in Design Studies is constructed to facilitate design awareness among interested students and to provide a vehicle for interdisciplinary study within the College of Design. This minor is open to all undergraduate students at Iowa State University.

This minor requires fifteen credits of course work: three credits of history selected form College of Design course offerings and twelve additional credits selected from College of Design course offerings.

At least six of the fifteen credits must be taken at Iowa State University in courses numbered 300 or above. At least nine of the fifteen credits must not be used to meet any other college or university requirements except the credit requirement for graduation.

Students enrolled in the College of Design may not use courses required in their major degree programs or in the Core Design Program to satisfy this minor.

Minor in Digital Media

Manipulation of digital media has emerged as an essential skill for design inquiry alongside traditional methods of building models and drawing sketches. To familiarize students with the use of digital media in the design process, the College of Design offers an undergraduate Minor in Digital Media. This minor is open to all undergraduate students at Iowa State University.

This minor requires fifteen credits of coursework all from the College of Design course offerings. At least six of the fifteen credits must be taken at Iowa State University in courses numbered 300 or above. At least nine of the fifteen credits must not be used to meet any other college or university requirements except the credit requirement for graduation.

Students enrolled in the College of Design may not use courses required in their major degree programs or in the Core Design Program to satisfy this minor.
Undergraduate Study

The undergraduate program in architecture is an accredited five-year curriculum leading to the Bachelor of Architecture degree. The program provides opportunities for general education as well as preparation for professional practice and/or graduate study. An optional one-semester foreign study program is offered to fourth year students.

The undergraduate curriculum includes one year of the college’s Core Design Program followed by a four-year professional program. Admission to the professional degree program is based on the applicant’s performance in the completed pre-professional curriculum; previous high school record (or transfer record where applicable); portfolio and essay evaluations; and on available departmental resources.

Objectives of the Bachelor of Architecture program:

The department is committed to the study of architecture as a cultural discipline in which issues of practice, of the multiplicity of social formations in which buildings exist, and of environmental effect are enfolded with the subject matter of building design - construction, space, material, form and use. Architecture arises from the aspirations that diverse individuals and groups have for their physical environment, and from the social enterprise of designing and fabricating the landscape we inhabit. It involves individual and multiple buildings, the spaces within them, and the exterior landscape.

It is our intent: that our students develop the skills with which to critically assess and research architectural questions and to invent architectural designs that address those questions; that they develop a working method for designing and that they have the communication, graphic, modeling and computational skills to support design exploration and to represent their design ideas to others; that they gain knowledge of architectural technologies through which buildings are given form, of which they are constructed and by which they are environmentally tuned and made sustainable; that they understand architectural history, that they understand the theoretical and diverse cultural underpinnings of the discipline of architecture, that they are able to reference architectural precedents and know how to utilize all of these in the development of their ideas; and that they have grounding in the ethical and practical aspects of the architectural profession in society.

For students entering the professional program, the department highly recommends purchase or lease of a laptop/notebook computer and appropriate software.

For a more complete undergraduate program description.

Graduate Study

The Department of Architecture offers two graduate degrees in architecture: a three-year accredited professional degree (M.Arch.) and a two-semester to three-semester research degree (M.S. in Arch.). Both degrees encourage interdisciplinary work within the College of Design and across related fields within the university. Double-degree programs are currently offered with the Department of Community and Regional Planning (M.Arch. / M.C.R.P.) and the College of Business (M.Arch. / M.B.A.I.). Financial support in the form of teaching and research assistantships is available competitively.

Master in Architecture

M.Arch. is an accredited professional degree in architecture. It is designed for students with undergraduate degrees in disciplines other than architecture as well as for students who hold four-year pre-professional degree in architecture.

The M.Arch. program demands engagement with contemporary issues and a commitment to lifelong learning. We encourage students to examine the relationships between local, regional and global contexts addressing environmental, social and technological issues. We believe that even though the scale of the architect’s action might be limited, the range of information needed to make creative, intelligent and responsible design decisions is vast. We expect our graduates to value the necessity of research, interdisciplinary learning, and teamwork.

M.Arch. is accredited by the National Architectural Accreditation Board (NAAB) and leads to a professional Master of Architecture degree over three years including the first summer term. The curriculum starts with an intensive three-semester course sequence that places equal emphasis on three study areas: architectural design and media, science and technology, and theory and history seminars on the built environment. While this learning framework shapes the whole curriculum, the remaining four semesters have a more open structure that allows students to explore architecture within an interdisciplinary context. These four semesters include a number of options, including study abroad, specialized studios with a variety of faculty, and the opportunity to do an independent project.

Students with undergraduate degrees in architecture or other related design fields may be given advanced standing in the program; advanced standing students may waive up to the whole first year. Students admitted to the program hold undergraduate degrees in a broad range of fields such as art history, history, literature, interior design, economics, mathematics, computer science, anthropology, and medicine. These students must complete the full three years of the curriculum.

Master of Science in Architecture

M.S. in Arch. is a 30-credit research degree with a required graduate thesis. As a research degree, this program is not subject to NAAB accreditation.

M.S. in Arch. is open for applicants who hold a professional degree in architecture or other related design fields. Applicants are required to submit a research proposal that lies within one of the listed study areas. These study areas are: Sustainability and Green Design, Rural and Urban Studies, Representation and Digital Media, Design Inquiry, Advanced Building Design, Architectural and Construction History, and Building Science and Construction. The degree is also open for applicants with non-professional degrees in various fields depending on the study area proposed by the applicant.

Financial support in the form of teaching and research assistantships is available.

Contact the department office for specific curricula.

Curriculum in Architecture

The Department offers undergraduate and graduate degree programs:

A 166-credit undergraduate professional program, including the 30-credit Core Design Program, leading to the Bachelor of Architecture degree. (B. Arch.)

A 100-credit graduate professional program leading to the Master of Architecture. Applicants holding B.S. or B.A. degrees in Architecture or other affiliated design fields may be given advanced standing in this program. (M.Arch.)

A 30-credit interdisciplinary graduate program leading to the Master of Science in Architecture. (M.S. Arch.)

For more complete graduate program descriptions see Graduate Study under Architecture in the Courses and Programs section.

In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A
program may be granted a 6-year, 3-year, or 2-year term of accreditation, depending on the extent of its conformance with established educational standards.

Master’s degree programs may consist of a preprofessional undergraduate degree and a professional graduate degree that, when earned sequentially, constitute an accredited professional education. However, the preprofessional degree is not, by itself, recognized as an accredited degree.

Total B. Arch. Requirement: 166 cr.
Only 65 cr from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.
U.S. Diversity: 3 cr.
Communications: 9.5 cr.
(C- or better grade)

ENGL 150 Critical Thinking and Communication 3
ENGL 250 Written, Oral, Visual, and Electronic Composition 3
LIB 160 Library Instruction 0.5
Plus three credits from approved list. 3
Total Credits 9.5

Humanities: 6 cr.
6 cr. from approved list.

Social Sciences: 6 cr.
6 cr. from approved list.

Math and Physical Sciences:

MATH 142 Trigonometry and Analytic Geometry 3
PHYS 111 General Physics 4
Total Credits 7

Design Core 11.5 cr.

DSN S 102 Design Studio I 4
DSN S 115 Design Collaborative Seminar 0.5
or DSN S 110 Design Exchange Seminar I 0.5
DSN S 131 Design Representation 4
DSN S 183 Design Cultures 3
Total Credits 11.5

Design Communications: 3 cr.

ARCH 230 Design Communications I 3
Total Credits 3

Design: 48 cr.

ARCH 201 Architectural Design I 6
ARCH 202 Architectural Design II 6
ARCH 301 Architectural Design III 6
ARCH 302 Architectural Design IV 6
ARCH 401 Architectural Design V 6
ARCH 402 Architectural Design VI 6
ARCH 403 Architectural Design VII 6
ARCH 404 Architectural Design VIII 6
Total Credits 48

Building Technologies: 21 cr.

ARCH 245 Building Science and Technology I 3
ARCH 341 Building Science and Technology II 5
ARCH 342 Building Science and Technology III 5
ARCH 343 Building Science and Technology IV 5
ARCH 445 Building Science and Technology V 3
Total Credits 21

Studies in Architecture and Culture: 18 cr.

ARCH 221 History of Western Architecture I 3
ARCH 222 History of Western Architecture II 3
Twelve credits from approved SAC Option list. 12
Total Credits 18

Behavioral Studies/Practice: 6 cr.

ARCH 271 Human Behavior and Environmental Theory 3
ARCH 482 Professional Practice 3
Total Credits 6

Professional Options: 9 cr.

6 cr. 300-500 level Arch; 3 cr. from Arch, Art, Art H, ArtID, ArtGr, ArtIS, CRP, or LS allowed; 9 cr. Arch allowed (no P/NP).

Electives: 21 cr.

6 cr. 300-500 level from department list.; 15 cr. from approved list. 2 cr. Kin or Ath allowed; 4 cr. AFAS, M S, or N S allowed; 9 cr. Arch allowed (no P/NP).

Courses primarily for undergraduate students

ARCH 201. Architectural Design I.
(1-15) Cr. 6. F. Prereq: Completion of the preprofessional program and admission into the professional program
Introduction to architectural design. Design introduction to architectural design, including precedent research, drawing conventions, model making, and diagramming. Studio projects focus on investigating the impact of specific site conditions on design, threshold conditions, and small-scale domestic space. Students will learn skills in problem solving, visualization, and written, oral, and graphic communication. Field trips to relevant architectural sites.
H. Honors (6-7 cr.)

ARCH 202. Architectural Design II.
(1-15) Cr. 6. S. Prereq: 201; MATH 142; PHYS 111
Continuation of fundamental architectural design exploration. Studio projects focus on the generation of ideas based on experience and an understanding of urban spaces. Emphasis on systematic analysis of urban culture, scale, materiality, and networks. Students work in groups and individually. Representational methods expand on architectural conventions through experimentation. Fieldtrips to relevant architectural sites.
H. Honors (6-7 cr.)

ARCH 221. History of Western Architecture I.
(Cross-listed with DSN S). (3-0) Cr. 3. F
Introductory survey with emphasis on the cultural, visual, natural, and constructed context. Ancient through Renaissance.
Meets International Perspectives Requirement.

ARCH 222. History of Western Architecture II.
(Cross-listed with DSN S). (3-0) Cr. 3. S
Introductory survey with emphasis on the cultural, visual, natural, and constructed context. Renaissance to present.
Meets International Perspectives Requirement.

ARCH 230. Design Communications I.
(2-2) Cr. 3. F. Prereq: Admission to the professional program
Investigations of various design media—including computer graphics and freehand drawing—and their applications to design, specifically to the course work in 201. Exercises to develop manual skill and perceptual sensitivity.
(3-0) Cr. 3. F. Prereq: Completion of the pre-professional program and admission into the professional program
Exploration of theories that describe social structure and order and the manner in which individuals and societies organize themselves and structure their environment.

ARCH 301. Architectural Design III.
(1-15) Cr. 6. F. Prereq: 202
Continuation of 303, examining housing in the urban situation; diverse scales of use and occupation within the city as shaped by cultural tendencies. Projects examine collective and individual identities related by the condition of adjacency, the ability to consider varieties of scale within a project, and a further development of critical and technical methods.

H. Honors (6-7 cr.)

ARCH 302. Architectural Design IV.
(1-15) Cr. 6. S. Prereq: 301 and minimum 2.0 GPA in previous studio courses
Continuation of 301, examining housing in the urban situation; diverse scales of use and occupation within the city as shaped by cultural tendencies. Projects examine collective and individual identities related by the condition of adjacency, the ability to consider varieties of scale within a project, and a further development of critical and technical methods.

H. Honors (6-7 cr.)

ARCH 310. Practical Experience.
Cr. R. Prereq: Permission of department chair
Students must register for this course prior to commencing each term. Available only to students taking course loads of eleven credits or less.

ARCH 311. History of the American City.
(Cross-listed with DSN S). (3-0) Cr. 3. Prereq: Sophomore classification
Study of the development of the built environment and urban condition in the United States from the colonial period to today. Through the theme of infrastructure, primary attention is given to urban spatial organization, built form, technological change, regulatory and funding patterns, and social categories such as class, race, and gender. Nonmajor graduate credit.

(2-2) Cr. 3. Current and potential applications of digital computers in architecture. Projects employing computer graphics and modeling methods. Awareness of programming languages related to applications.

ARCH 335. Three-Dimensional Studio.
(Cross-listed with ARTIS). (1-4) Cr. 3. Repeatable, maximum of 6 credits.
This course deals with three dimensional problems in visual invention, organization, and expression emphasizing creative manipulation of tools, materials, and techniques as means for three dimensional thinking. Projects cover the additive (modeling), subtractive (carving), substitutional (casting) as well as constructive techniques.

ARCH 341. Building Science and Technology II.
(3-4) Cr. 5. S. Prereq: 245; MATH 142; PHYS 111
Integrated architectural technology with environmental sustainability as an emphasis. A further understanding of the impact of environmental forces on design decisions. Understanding of heat transfer, thermal comfort and energy efficient design. Analytical rules of thumb and calculation methods that contribute to a design synthesis for the whole building that evaluates towards a net zero energy balance. Introduction to complex, composite and innovative building materials and wood frame members and systems. Structural performance and preliminary design of low- to medium-rise steel frame members and systems, long span steel systems, and masonry walls and systems. Principles of equilibrium and material behavior.

ARCH 342. Building Science and Technology III.
(3-4) Cr. 5. F. Prereq: 341
Technical topics which ground architectural design decisions and concepts with environmental sustainability as an emphasis. Examination of a design process that incorporates building climatology and the control of thermal, luminous, and acoustic environments. Investigation of the materials and integrated systems found in complex construction assemblies. Determination and utilization of appropriate forms of material assemblies and structural systems for large-scale construction. Structural performance and preliminary design of low- to medium-rise reinforced concrete and pre-stressed concrete members and systems. Wind and seismic lateral forces, and the principles of equilibrium and material behavior.

ARCH 343. Building Science and Technology IV.
(3-4) Cr. 5. S. Prereq: 342
Technical topics which ground architectural design decisions and concepts in the physical world and the human perception thereof and have environmental sustainability as an emphasis. An overview of architectural environmental control systems in response to occupant comfort, patterns of use, health, and safety regulations. Analytical rules of thumb and calculation methods necessary to provide integrated design synthesis of technical systems within architecture. Use and design of mechanical, electrical, plumbing, fire safety, transportation, and conveying systems and subsystems. Project delivery. Safety related building codes; transportation systems within the building; life cycle cost analysis. Investigation of more complex and/or less common structural forms and systems.

ARCH 351. Solar Home Design.
(Cross-listed with DSN S). (3-0) Cr. 3. S. Prereq: 202
Architectural design and technical analysis of residential structures with emphasis on energy construction and solar energy utilization.

ARCH 401. Architectural Design V.
(1-15) Cr. 6. F. Prereq: 302
A rigorous examination of how buildings participate sustainably in socio-political and environmental systems. Student projects consider in a comprehensive proposal how issues of physical site, socio-economic context, programming, structure, form, materiality, and building systems are interconnected through the design process and within the built environment. Projects typically focus on a smaller scale urban public building that is closely connected to its physical, environmental, and social context.

H. Honors (6-7 cr.)

ARCH 402. Architectural Design VI.
(1-15) Cr. 6. S. Prereq: 401 and minimum 2.0 GPA in previous studio courses
An examination of the relationship between architecture and the city. Studio projects stress analysis and interpretation of the diverse forces and conditions that impact and inform architecture in the urban environment. Urban design project. Study abroad option. Meets International Perspectives Requirement.

H. Honors (6-7 cr.)
ARCH 403. Architectural Design VII.
(1-15) Cr. 6. F. Prereq: 402
A rigorous examination of architecture’s relationship with culture and
technology. Studio projects stress the interpretation and integration of
contextual and historical considerations, as well as structural, envi-
ronmental, and communication systems, in a comprehensive design
proposal.
H. Honors (6-7 cr.)

ARCH 404. Architectural Design VIII.
(1-15) Cr. 6. S. Prereq: 403
Advanced forum for architectural research and/or design. Choice of
themetic studios or student initiated research and design. Experimenta-
tion and innovation are encouraged. DSNJ 446/546, for 6 cr. each
time taken, can be substituted for this class and be taken up to a maximum of
12 credits.
H. Honors (6-7 cr.)

ARCH 420. Topics in American Architecture.
(3-0) Cr. 3. Repeatable, maximum of 6 credits. Prereq: Junior classification
History, theory, and principles of American architecture and urban design
considering relationships to the culture, visual arts, site, and surround-
ings. Credit counts toward fulfillment of Studies in Architecture and
Culture requirements. Nonmajor graduate credit. A maximum of 6 credits
of Arch 420 may be applied to degree program.
Meets U.S. Diversity Requirement

ARCH 422. Topics in Medieval Architecture.
(3-0) Cr. 3. Repeatable, maximum of 6 credits. S. Prereq: Junior classification
History, theory, and principles of medieval architecture and urban design
considering relationships to the culture, visual arts, site, and surround-
ings. Credit counts toward fulfillment of Studies in Architecture and
Culture requirements. Nonmajor graduate credit. A maximum of 6 credits
of Arch 422 may be applied to degree program.
Meets International Perspectives Requirement.

ARCH 423. Topics in Renaissance to Mid-Eighteenth Century
Architecture.
(3-0) Cr. 3. Repeatable, maximum of 6 credits. S. Prereq: Junior classification
History, theory, and principles of renaissance to mid-eighteenth century
architecture and urban design considering relationships to the culture,
visual arts, site, and surroundings. Credit counts toward fulfillment of
Studies in Architecture and Culture requirements. Nonmajor graduate
credit. A maximum of 6 credits of Arch 423 may be applied to degree
program.
Meets International Perspectives Requirement.

ARCH 424. Topics in Nineteenth Century Architecture.
(3-0) Cr. 3. Repeatable, maximum of 6 credits. F. Prereq: Junior classification
History, theory, and principles of nineteenth century architecture and
urban design considering relationships to the culture, visual arts, site, and
surroundings. Credit counts toward fulfillment of Studies in Architecture and
Culture requirements. Nonmajor graduate credit. A maximum of 6 credits
of Arch 424 may be applied to degree program.

(3-0) Cr. 3. Repeatable, maximum of 6 credits. Prereq: Junior classification
History, theory, and principles of twentieth century architecture and
urban design considering relationships to the culture, visual arts, site, and
surroundings. Credit counts toward fulfillment of Studies in Architecture and
Culture requirements. Nonmajor graduate credit. A maximum of 6 credits
of Arch 425 may be applied to degree program.

ARCH 426. Topics in Native American Architecture.
(Cross-listed with AM IN, DSNJ). (3-0) Cr. 3. Repeatable, maximum of 6
credits. Prereq: Junior classification
History, theory, and principles of Native American/Indian architecture,
landscape architecture and planning considering relationships to
the culture, visual arts, site, and surroundings. Credit counts toward
fulfillment of Studies in Architecture and Culture. Nonmajor graduate
credit. A maximum of 6 credits of Arch 426 may be applied to degree
program.
Meets U.S. Diversity Requirement

ARCH 427. History, Theory, and Criticism of Chinese Archi-
tecture.
(Dual-listed with 527). (3-0) Cr. 3. F. Prereq: Junior classification
The history and theoretical concept of Chinese built environment with
emphasis on the morphology of built form and its relationship to art, lands-
cape design, and urban structure. Credit counts toward fulfillment of
Studies in Architecture and Culture. Nonmajor graduate credit.

ARCH 429. Topics in Italian Architecture and Urbanism.
(3-0) Cr. 3. S. History, theory and principles of Italian architecture and urban design
considering relationships to the culture, visual arts, site, and surround-
ings.

ARCH 431. Analytical Drawing.
(1-6) Cr. 3. Repeatable, maximum of 12 credits. F.S. Prereq: 232, 302
Exploration of 2- and 3-dimensional representations. Emphasis on on-site
freehand sketching, perspective and orthographic drawing, rendering of
shadows and textures, and use of diverse media.

ARCH 432. Advanced Computer Lighting and Rendering.
(3-0) Cr. 3. Repeatable, maximum of 6 credits. Prereq: 230, 301
Exploration of the computer as a design and communication tool.
Emphasis on lighting and rendering techniques.

ARCH 433. File to Fabrication.
(3-0) Cr. 3. Repeatable, maximum of 6 credits. F.S. Prereq: 230, 301
Exploration of the computer as a design and manufacturing tool.
Emphasis on fabrication techniques and rapid prototyping including laser-
cutting, 3-D printing and CNC routing.

ARCH 434. Computer-aided Architectural and Environmental
Design.
(1-4) Cr. 3. Prereq: 334
Emphasis on application of the computer as a design tool, topical applica-
tions and computer graphic methods, development of computer software
for architectural and environmental problem solving. Nonmajor graduate
credit.

ARCH 436. Advanced Design Media.
(2-2) Cr. 3. Repeatable. F.SS. Prereq: 230
Special topics in design media applications.

ARCH 437. Architectural Photography.
(3-0) Cr. 3. Prereq: 202
Emphasis on use of the camera and lighting in photographing draw-
ings and interior and exterior building environments. Nonmajor graduate
credit.

ARCH 445. Building Science and Technology V.
(2-2) Cr. 3. F. Prereq: 343
Technical topics which ground architectural design decisions and
concepts in the physical world and the human perception thereof and
have environmental sustainability as an emphasis. Synthesis of mate-
rial, environmental, structural and systems design and related design
modeling and simulation.
**ARCH 482. Professional Practice.**
(Dual-listed with 582). (3-0) Cr. 3. F. Prereq: 202
Emphasis on the circumstances and opportunities of the professional practice of architecture: practice as profession, process, organization, business, and evolving models of practice.

**ARCH 486. Design: Made in Italy.**
(3-0) Cr. 3. S.
An investigation of the history of Italian design in its contemporary form as part of International study abroad program in Rome.

**ARCH 490. Independent Study.**
Cr. 1-9. Repeatable. F.S.SS. Prereq: Written approval of instructor and department chair on required form
Independent investigation.
A. Design Communications.
B. Design
C. Technical Systems.
D. Architectural History
E. Behavioral Studies
F. Practice
H. Honors

Courses primarily for graduate students, open to qualified undergraduate students

**ARCH 505. Architectural Design and Media I: Mapping, Programming, Building.**
(0-10) Cr. 5. F. Prereq: Admission to the M Arch program. Concurrent enrollment in 595; 541
An introduction to comprehensive architectural design projects that focuses on three interrelated design skills: mapping, programming and building. Projects establish a framework for designing buildings that considers multiple factors such as environmental forces, construction methods, building codes, urban regulations, social relationships, and cultural values.

**ARCH 506. Architectural Design and Media II: Materiality and Representation.**
(0-10) Cr. 5. S. Prereq: 505; 583; 541, Coreq: 596; 542
Small-scale architectural design projects that investigate design representation through analogue and digital means. The projects explore different representation strategies to help students develop an understanding of the particular modes of architectural representation that advance the designer’s knowledge of space as a complex interaction between materials with inherent physical characteristics, mobile socializing bodies, and changing environmental cycles.

**ARCH 507. Architectural Design and Media III: Design in Detail.**
(0-10) Cr. 5. SS. Prereq: 506, 596, 542, 581
Design projects that emphasize the multi-faceted role of the architectural detail in the design process through first, understanding the historical specificity of building construction and detailing; second, utilizing working drawing as a mode of communication; and third, designing with details. The term-long project will consider a set of working drawings of past buildings as a site for design intervention.

**ARCH 510. Practical Experience.**
Cr. R. Repeatable. F.S.SS. Prereq: Graduate standing and permission of department DOGE
Students must register for this course prior to commencing each period. Available only to students taking course loads of 8 credits or less.

**ARCH 519. Middle Eastern Cities.**
(Cross-listed with CR Pi). (3-0) Cr. 3. Prereq: Graduate or senior standing
Introduction to basic academic writings on Middle Eastern cities in addition to other contemporary cultural productions of the region. Study of various aspects of Middle Eastern life and the built environments that this life produces.

Meets International Perspectives Requirement.

**ARCH 527. History, Theory, and Criticism of Chinese Architecture.**
(Dual-listed with 427). (3-0) Cr. 3. Prereq: Senior classification or graduate standing
The history and theoretical concept of Chinese built environment with emphasis on the morphology of built form and its relationship to art, landscape design, and urban structure. Credit counts toward fulfillment of Studies in Architecture and Culture requirements.

Meets International Perspectives Requirement.

**ARCH 528. Topical Studies in Architecture.**
(Cross-listed with DSN S). (3-0) Cr. 2-3. Repeatable, maximum of 6 times. Prereq: ARCH 221, 222 or senior classification or graduate standing
A. Studies in Architecture and Culture
B. Technology
C. Communications
D. Design
E. Practice

**ARCH 529. Spatial Dialectics in the American Midwest.**
(3-0) Cr. 3. Prereq: Graduate or senior standing
The American Midwest has witnessed dramatic transformation during the last two centuries which impacted its physical, environmental, economic and social characteristics. This course is an interdisciplinary study of the evolution and sustainability of Midwestern space in relationship to forces of flow shaped by the mobility of bodies, products, meanings, and symbols that are enforced, incorporated, reproduced or destroyed.

Meets U.S. Diversity Requirement

**ARCH 534. Advanced Computer-aided Architectural Design.**
(1-4) Cr. 3. Repeatable, maximum of 6 credits. Prereq: 434, permission of instructor
Emphasis on concepts, algorithms, data structures, advanced modeling, rendering, animation, and virtual reality applications in architectural design.

**ARCH 535. Advanced Three-Dimensional Studio.**
(1-4) Cr. 3. Repeatable, maximum of 6 credits. Prereq: 335 or graduate standing
Advanced investigation of sculptural expression with emphasis on individual projects.

**ARCH 541. Science and Technology for Architects I.**
(4-2) Cr. 5. F. Prereq: Admission to the MArch I program; 505, 595
Introduction to Human Factors, Descriptive Geometry, Basic Building Materials, and Small-Scale Building Envelopes. Theory and case studies, stressing the connectivity of technical issues to broader formal, social, and cultural spheres.

**ARCH 542. Science and Technology for Architects II.**
(4-2) Cr. 5. S. Prereq: 505, 541, 595, 506, 596
Elementary Statics and Beam Theory, Basic Construction Materials, and Site and Building Circulation. Theory and case studies stressing the connectivity of technical issues to broader formal, social, and cultural spheres.

**ARCH 558. Sustainability and Green Architecture.**
(Cross-listed with DSN S). (3-0) Cr. 3. F. Prereq: Graduate standing
Issues of Sustainability as related to living patterns and city design, population, pollution and use and availability of natural resources for the built environment; Issues of Green Architecture as it relates to building material selection, systems of building materials, the environment of the United States and the World, architects and examples of buildings with green or sustainable designations.
ARCH 567. Preservation, Restoration, and Rehabilitation.
(Cross-listed with DSN S). (3-0) Cr. 3. S. Prereq: Senior classification.
Construction standards and procedures for preserving, restoring, reconstructing, and rehabilitating existing buildings following the guidelines of the National Park Service and the National Trust for Historic Preservation. Credit counts toward fulfillment of Studies in Architecture and Culture requirements.

ARCH 571. Design for All People.
(Cross-listed with DSN S, GERON). (3-0) Cr. 3. S. Prereq: Senior classification or graduate standing.
Principles and procedures of universal design in response to the varying ability level of users. Assessment and analysis of existing buildings and sites with respect to standards and details of accessibility for all people, including visually impaired, mentally impaired, and mobility restricted users. Design is neither a prerequisite nor a required part of the course. Enrollment open to students majoring in related disciplines. Credit counts toward fulfillment of Studies in Architecture and Culture requirements.

Meets U.S. Diversity Requirement

(Cross-listed with DSN S). (3-0) Cr. 3. S. Prereq: Senior classification or graduate standing.
Current urban design theory and its application to urban problems. Credit counts toward fulfillment of Studies in Architecture and Culture requirements.

ARCH 576. Study Abroad Options.
(3-0) Cr. 1-12. Repeatable, maximum of 12 credits. SS.
Special topics in environmental design, architectural history and contemporary practice. Travel to relevant countries. General cultural and historical studies, topical projects and individual inquiry. Courses may be taught by departmental faculty or faculty from approved Iowa State Study Abroad programs. See current offerings for detailed syllabus.

Meets International Perspectives Requirement.

ARCH 581. Service Learning.
(1-12) Cr. 5. SS. Prereq: 506, 596, 542
Planning and execution of a project serving a community need. Learning occurs through both theory and active involvement in on-site work. Projects connect previous coursework to practical applications and community involvement.

ARCH 582. Professional Practice.
(Dual-listed with 482). (3-0) Cr. 3. F. Prereq: Graduate standing.
Emphasis on the circumstances and opportunities of the professional practice of architecture: practice as profession, process, organization, business, and evolving models of practice.

ARCH 583. Research in Practice.
(3-0) Cr. 3. S. Prereq: Senior or graduate standing.
Foundational course in the methods and conceptual tools of design research in the context of practice. Through team and individual guided projects, students generate, analyze and represent knowledge in design-related communications and contexts. Alternative models of practice, client groups and communities are addressed within projects that precede, feed, follow, or overlap with architectural contracts.

ARCH 590. Special Topics.
Cr. 1-5. Repeatable. F.S.SS. Prereq: Written approval of instructor and department chair on approved form.
Investigation of architectural issues having a specialized nature.

ARCH 595. Seminar on the Built Environment I: History.
(5-0) Cr. 5. F. Prereq: Admission to the MArch I program. Coreq: 505; 541
Introduction to historical canons and traditions of architecture and urbanism. Discussion of the relationship between historical inquiry and contemporary practice. Students learn skills in critical thinking, visual analysis, and research methods. Course sessions develop thematically with interdisciplinary readings, group discussions, student presentations, and research projects.

ARCH 596. Seminar on the Built Environment II: Landscape and Society.
(5-0) Cr. 5. S. Prereq: 505; 541; 595. Coreq: 506; 542
Introduction to landscape as artifact and multi-disciplinary knowledge-base for design thinking. Literatures and methods of environmental psychology, cultural geography, landscape and architectural history and theory, site and circulation design as intersection of built infrastructural, natural, and social systems. Emphasis on sensory perception, and human movement; investigations of climate, environmental conditions, and values toward consumption and sustainability in everyday experience of the built environment.

(3-0) Cr. 3. F. Prereq: Senior classification or graduate standing.
Multidisciplinary overview of contemporary theories concerned with the production of the built environment. Particular attention to urbanism as a discourse that relates social interactions and power structures to material space.

ARCH 598. Seminar on the Built Environment IV: Topical Study.
(3-0) Cr. 3. S. Prereq: senior or graduate standing.
A research seminar which considers a topic within contemporary discourses on the built environment outside of Europe and North America. The topic will be studied from multiple perspectives highlighting the historical and theoretical relationships between architecture, global cultures, geography, landscape, and urban planning. Credit counts toward fulfillment of Studies in Architecture and Culture requirements.

Courses for graduate students

ARCH 601. Sustainable Building Design.
(0-12) Cr. 6. F. Prereq: 507, 542, 596. Coreq: 643
Design projects that are developed through integrative design strategies that explore the relationship between buildings and environmental forces to maximize non-wasteful, efficient use of resources such as energy, water and building materials. Projects will include investigations of the impact of solar energy, airflow, building materials, passive and active systems and wall sections on spatial quality and form making. Design decisions will be quantitatively validated through energy modeling and performance simulation.

(6-12) Cr. 6. S. Prereq: 601, 643, 597. Coreq: 644
Design projects that explore the relationships between architectural, cultural, and environmental landscapes. Emphasis on regional, socio-economic conditions, and sustainable design and planning practices at multiple scales. Projects stress engagement with local circumstances and stakeholders; systemic interconnections and strategies; and the application of interdisciplinary research.

ARCH 603. Comprehensive Design.
(6-12) Cr. 6. F. Prereq: 601
Rigorous examination of architecture’s relationship with culture and technology. Studio projects stress the interpretation of contextual and historical considerations, as well as structural, environmental, mechanical, electrical and plumbing systems, in a comprehensive design proposal. This course fulfills the Graduate College Creative Component Requirement.

ARCH 604. Design Studio Options.
(0-12) Cr. 6. Repeatable, maximum of 12 credits. S. Prereq: 602
Design studio selected by the students, which may include but is not limited to: independent design study, interdisciplinary design studio, study abroad, and design build. DSN S 546 for 6 cr. may be substituted for this course.

ARCH 643. Science and Technology for Architects III.
(2-2) Cr. 3. F. Prereq: 507, 542, 596, 581 or graduate standing. Coreq: 601
Third in a four-course series in building science and technologies. Structural Elements and Systems, and Building Services. Theory and case studies stressing the connectivity of technical issues to broader formal, social and cultural spheres.
ARCH 644. Science and Technology for Architects IV.
(2-2) Cr. 3. S. Prereq: 643 or graduate standing
Fourth of a four-course series in building science and technologies. Building Enclosures, Interior Construction and Sensory Qualities, Fabrication and Construction. Theory and case studies stressing the connectivity of technical issues to broader formal, social and cultural spheres. Summative Student Project.

ARCH 690. Independent Design Study.
(1-15) Cr. 6. Repeatable. F.S.SS. Prereq: Admission to MSAS or M ARCH 30 credit program
Independent architectural design projects commensurate with student interests requiring approval of Architecture Graduate Advisory Committee.

ARCH 698. Graduate Seminar.
Cr. R. Repeatable. F.S. Prereq: Graduate standing
Special topics and guest speakers.

ARCH 699. Research.
(1-18) Cr. 3-9. Repeatable. F.S.SS.
Art and Design

Undergraduate Study

The department offers the degree Bachelor of Fine Arts (B.F.A.) in three curricular areas: Graphic Design, Integrated Studio Arts, and Interior Design. Graduates are proficient in the design of communication, graphic design, and environmental graphic design.

B.F.A. Graphic Design. Emphasis is on creative problem solving, design process, visual organization of communication media, and interaction design. Graphic design graduates effectively integrate abstract thinking skills such as communication design theory, history, methodology; and technology. Components of visual communication including typography, symbology, time-based media, information design, branding, image creation, and other communication systems are integrated with an understanding of professional practice.

B.F.A. Integrated Studio Arts. Students select from studio options in order to develop a portfolio and to prepare for a professional practice in the visual arts. This concentration engages aesthetics, visual problem solving, critical thinking, and skill development in a range of media that draw upon contemporary, historical, and cultural theory and practices.

B.F.A. Interior Design. Emphasis is on the student’s application of design processes to creatively solve problems of the interior environment based on knowledge of human safety, functional utility, physical, psychological, and contextual fit. Graduates in interior design are competent in visual communication (sketching, drafting and computer aided design), design problem solving, space planning, lighting and color specification for interiors, finish and furniture selection, detailing interior construction and application of human factors. The curriculum is accredited by the Council for Interior Design Accreditation (CIDA) as providing professional level education.

B.A. Art and Design. This curriculum offers two concentrations: Art and Culture, and Visual Culture Studies. Art and Culture has a greater emphasis on studio components, and Visual Culture Studies on humanities and liberal arts components.

Both concentrations are combined with an applied career minor or an approved program of study.

Transfer students with studio credits from other colleges and universities must present a portfolio of work done in those courses to determine if these credits can be applied toward specific studio requirements. Students are required to present this portfolio upon admission and prior to registration for classes. Arrangements for this process must be made with department advisers.

The department offers no minor but participates in the undergraduate minors in Critical Studies in Design, Design Studies, and Digital Media.

Graduate Study

The department offers the degrees of Master of Fine Arts (M.F.A.) in Graphic Design, Integrated Visual Arts, and Interior Design, and Master of Arts (M.A.) in Art and Design, with degree specialization in interior design, graphic design, and environmental graphic design.

The M.F.A. curricula in Graphic Design and Interior Design require a minimum of 60 credits. The M.F.A curriculum in Integrated Visual Arts requires a minimum of 61. These programs include an art and design seminar, a studio concentration, history and criticism courses, a teaching seminar, elective courses outside the department or area of study, and the completion of a thesis-exhibition or thesis.

M.F.A. graduates in Graphic Design are skilled in communication design, problem solving, and are adept in the use of visual language, symbology, and interaction. Graduates are proficient in the design of communications and the use of technologies that incorporate human interaction with environments, objects, and electronic and traditional publications. The M.F.A. is recognized as the terminal degree in the graphic design field. The degree requires completion of a written thesis integrating theory, research, and design problem solving.

M.F.A graduates in Interior Design are proficient in visual communication skills, design theory, human factors, and space planning. The M.F.A. degree is considered a terminal degree in the interior design field. The degree requires completion of a written thesis comprised of original research.

M.F.A. graduates in Integrated Visual Arts link traditional studio disciplines with interdisciplinary studies. Graduates are prepared as visual artists to enter studio research, business, higher education or new interdisciplinary fields. The MFA is recognized as the terminal degree. A required thesis-exhibition is composed of two parts, a substantial exhibition and a written statement that describes the development of the work in the exhibition, its objectives, and its historical and cultural points of reference. A thesis may be an appropriate alternative, but some portion of the work should entail an element of design problem-solving in the form of a visual product.

The M.A. in Art and Design with specialization in interior design requires a minimum of 34 credits including a studio concentration and work in research methods and human factors. Candidates focus on research in an area of specialization culminating in a written thesis comprised of original research. Graduates have a broad understanding of current interior design issues and design research, preparing them for special analytical aspects of design practice and further studies leading to the PhD. Applicants without a degree in interior design may be required to complete up to 40 additional credits of coursework.

The M.A. in Art and Design with a specialization in graphic design requires a minimum of 30 credits including seminar courses in art and design, a studio concentration, a history course, a business practice course, courses outside of graphic design, and the completion of a capstone course in graphic design. Graduate students selecting the M.A. in graphic design will focus on a first professional degree. Applicants without a degree in graphic design may be required to complete up to 17 additional credits of coursework.

The M.A. in Art and Design with a specialization in environmental graphic design requires a minimum of 34 credits including seminar courses in art and design, a studio concentration, a history course, courses in design methods, and the completion of a capstone course in environmental graphic design.

Graduate students selecting the M.A. in environmental graphic design will focus on a first professional degree. Applicants without a degree in background in environmental graphic design may be required to complete up to 15 additional credits of coursework.

Credit earned at Iowa State University or other institution for the Master of Arts degree may be applied toward the Master of Fine Arts degree at the discretion of the program of study committee.

Applicants to the graduate program should have an undergraduate major in an art or design area and demonstrate the ability to do technically competent and original work through the presentation of a slide or digital portfolio for faculty review. Past academic performance and the quality of studio work are critical in the admission process. A minimum 3.0 GPA in the student’s undergraduate major is the standard for full admission to the graduate program. Admission is also determined by studio space available within the program area, which changes yearly due to graduate students’ progress in their programs of study.

Graduate students who have not completed an undergraduate program of study substantially equivalent to that required of undergraduates in the department can expect that additional supporting coursework, determined by the graduate faculty, will be required.
Prospective students are advised to contact the graduate coordinator with specific questions about admission procedures and portfolio review. Application and additional program information may be obtained from the Department of Art and Design, College of Design, Iowa State University, Ames, Iowa 50011-3092.

**Curriculum in Art and Design—B.A.**

The Curriculum in Art and Design leads to a 120 credit undergraduate Bachelor of Arts degree including the 30 credit core Design Program.

This curriculum offers two concentrations: Art and Culture, and Visual Culture Studies. Both concentrations are combined with an applied career minor or approved program.

Consideration for admission into the B.A. curriculum is based upon department resources and GPA earned in the Core Design Program.

Transfer students with studio credits from other programs, colleges and universities must present for department review a portfolio of work done in those courses in order to have the credits apply toward studio requirements. Students are required to present this portfolio upon admission and prior to registration for classes. Arrangements for this process must be made with department advisors.

**Total Degree Requirement: 120 cr.**

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

**International Perspective: 3 cr.**

**U.S. Diversity: 3 cr.**

**Communications: 9.5 cr.**

(C- or better grade)

Curriculum in Interior Design

The Curriculum in Interior Design leads to a 128 credit undergraduate Bachelor of Fine Arts in Interior Design including a 30 credit Core Design Program.

Admission into the professional program depends upon available resources and is subject to the approval of a faculty committee at the completion of the Core Design Program. Applicants are reviewed on the basis of academic performance, a portfolio of original work, and a written essay.

A 34 graduate credit program is offered leading to the master of arts, for students planning to undertake professional or design research-oriented pursuits (NOTE: Applicants without a previous undergraduate degree in interior design may be required to complete up to 40 additional credits of deficiency work).

A 60 graduate credit post-professional graduate program is also offered leading to the degree master of fine arts.

For more complete program descriptions see Graduate Study under Interior Design in the Courses and Programs section.

Consideration for admission into the undergraduate Interior Design curriculum requires completion of the 30 credit Core Design Program, including the following courses:

DSN S 102 Design Studio I 4
DSN S 115 Design Collaborative Seminar 0.5
or DSN S 110 Design Exchange Seminar I
DSN S 131 Design Representation 4
DSN S 183 Design Cultures 3
Six credits of Social Science/Humanities 6
Six credits of Math/Science 6
ENGL 150 Critical Thinking and Communication 3
or ENGL 250 Written, Oral, Visual, and Electronic Composition
LIB 160 Library Instruction 0.5

Admission is based on department resources and will be determined by a formal review at the end of the Core Design Program.

Transfer students with studio credits from other programs, colleges, and universities must present for departmental review a portfolio of work done in those courses in order to have the credits apply toward studio requirements. Students are advised to present portfolio upon admission and prior to registration for classes. Arrangements for this process must be made with department advisors.

Total Degree Requirement: 128 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA average; Completion of all requirements listed below.

International Perspective: 3 cr.
U.S. Diversity: 3 cr.
Communication: 9.5 cr.
(C- or better grade)

ENGL 150 Critical Thinking and Communication 3
ENGL 250 Written, Oral, Visual, and Electronic Composition 3
LIB 160 Library Instruction 0.5
One course from the following:

COMST 101 Introduction to Communication Studies
COMST 102 Introduction to Interpersonal Communication
CMDIS 286 Basic Sign Language
SP CM 110 Listening or SP CM 212 Fundamentals of Public Speaking
Total Credits 9.5

Humanities: 6 cr.

6 cr. from program curriculum sheet.

Social Sciences: 6 cr.

6 cr. from program curriculum sheet.

Math/Physics/Biol. Sciences: 6 cr.

One of the following:

MATH 104 Introduction to Probability and Matrices 3
MATH 105 Introduction to Mathematical Ideas
MATH 140 College Algebra or MATH 150 Discrete Mathematics for Business and Social Sciences

Three credit hours from program curriculum sheet.

Total Credits 6

General Education Courses: 9 cr.

9 cr. from program curriculum sheet; 6 cr. of course level 300-400.

College of Design Core: 11.5 cr.

DSN S 102 Design Studio I 4
DSN S 115 Design Collaborative Seminar 0.5
or DSN S 110 Design Exchange Seminar I
DSN S 131 Design Representation 4
DSN S 183 Design Cultures 3
Total Credits 11.5

Art and Design History: 6 cr.

Select 6 cr. from any College of Design history courses.

Interior Design: 62 cr.

**Curriculum in Graphic Design**

The Curriculum in Graphic Design leads to a 123 credit undergraduate Bachelor of Fine Arts in Graphic Design including the 30 credit core Design Program.

Admission into the professional program depends upon available resources and is subject to the approval of a faculty committee at the completion of the Core Design Program. Applicants are reviewed on the basis of academic performance, a portfolio of original work, and a written essay.

Transfer students with studio credits from other programs, colleges, and universities must present for departmental review a portfolio of work done in those courses in order to have the credits apply toward studio requirements. Students are required to present this portfolio upon admission and prior to registration for classes. Arrangements for this process must be made with department advisors.

A 34 graduate credit program is offered leading to the Master of Arts specialized in Environmental Graphic Design for students planning to undertake professional degree. (NOTE: Applicants without a degree in background in environmental graphic design may be required to complete up to 15 additional credits of coursework).

A 30 graduate credit program is offered leading to the Master of Arts specialized in Graphic Design for students planning to undertake professional degree. (NOTE: Applicants without a degree in background in graphic design may be required to complete up to 18 additional credits of coursework).

A 60 graduate credit post-professional graduate program is also offered leading to the degree Master of Fine Arts.

For more complete graduate program descriptions see Graduate Study under Graphic Design in the Courses and Programs section.

Continued exploration of visual order, creative process, and interaction of two- and three-dimensional design and color.
ART 130. Drawing I.  
(1-6) Cr. 3. 
The introductory course in drawing, focusing on the fundamentals of drawing from observation. Subject matter may include working from the still life, architectural settings, landscape and the human figure. Line, shape, perspective and value studies are explored through a variety of drawing media.

ART 494. Art and Design in Europe Seminar.  
(1-0) Cr. 1. Prereq: Permission of instructor and planned enrollment in 495 Cultural and historical aspects of art and design in Western Europe in preparation for study abroad. Area of study varies each time offered. Offered on a satisfactory-fail basis only.

ART 495. Art and Design in Europe.  
(Dual-listed with 595). Cr. 3. F.S.S. Prereq: 494, permission of instructor 
International study abroad program in Western Europe. Visits to design studios, art museums, and educational facilities. Related activities depending on specific area of study which may vary each time offered.

ART 496. Art and Design Field Study.  
Cr. R. Repeatable. Prereq: Enrollment in an art and design studio or art history course, permission of instructor 
Study and tours of museums, galleries, artist and/or designer studios and other areas of interest within art and design. Offered on a satisfactory-fail basis only.

ART 497. Studio Internship.  
Cr. 1-6. Repeatable, maximum of 6 credits. F.S.S. Prereq: Advanced classification in a department curriculum 
Written approval of supervising instructor and department chair on required form in advance of semester of enrollment. Supervised experience with a cooperating artist or studio. Offered on a satisfactory-fail basis only.

ART 498. Museum/Gallery Internship.  
Cr. 1-6. Repeatable, maximum of 6 credits. F.S.S. Prereq: Graduate classification and permission of instructor 
Written approval in advance of semester of enrollment. Supervised experience with a cooperating museum or gallery or art center. Offered on a satisfactory-fail basis only.

(3-0) Cr. 3. Prereq: Permission of instructor 
Issues and debates that pertain to the study of visual objects and material artifacts in their cultural context. Examination of the role of visual and material culture studies as both relate to allied disciplines including, but not limited to: anthropology, art history, design history, design studies, and new media studies.

ART 511. Seminar in Teaching.  
(3-0) Cr. 3. Alt. S., offered 2012. Prereq: Graduate classification 
Readings and discussion of university level design education issues, studio/classroom observation, development of a teaching philosophy, lesson planning and presentation.

ART 595. Art and Design in Europe.  
(Dual-listed with 595). Cr. 3. Prereq: Graduate classification, 494 or equivalent, permission of instructor 
International study abroad program in Western Europe. Visits to design studios, art museums, and educational facilities. Related activities depending on specific area of study which may vary each time offered.

(3-0) Cr. 3. Prereq: Permission of instructor 
Research strategies related to fine art and technology. Application of selected methods to specific issues.

ART 697. Studio Internship.  
Cr. arr. F.S.S. Prereq: Graduate classification and approval of POS committee 
Supervised off-campus learning experience with a prominent artist, designer, or firm.

ART 699. Research.  
Cr. arr. Repeatable.
A. Thesis 
B. Thesis-exhibition

Art Education (ArtEd)  
Courses primarily for undergraduate students
ARTED 211. Introduction to Art Education.  
(0-6) Cr. 3. F.S. 
Design experiences for the K-12 classroom. Hands-on discipline-specific and integrated art activities; emphasis on creativity and thinking skills.

Graphic Design (ArtGr)  
Courses primarily for undergraduate students
ARTGR 270. Graphic Design Studio I.  
(0-6) Cr. 3. F. Prereq: DSN S 102 and DSN S 131, enrollment in ARTGR 275; admission to the graphic design program through department review 
Basic design concepts and color principles used for visual communication.

ARTGR 271. Graphic Design Studio II.  
(0-6) Cr. 3. S. Prereq: Art 230, ARTGR 270, 275, enrollment in 276 
Principles of typographic composition, structure and hierarchy. Formal and conceptual principles of symbolism.

ARTGR 275. Graphic Technology I.  
(0-4) Cr. 2. F. Prereq: enrollment in ARTGR 270 
Basic 2-dimensional computer skills for graphic design.

ARTGR 276. Graphic Technology II.  
(1-2) Cr. 2. S. Prereq: ARTGR 275, enrollment in 271 
Basic 3-dimensional computer skills for graphic design.
(3-0) Cr. 3. F.
Introduction to basic principles of visual communication that contribute to the successful comprehension of intended visual messages; these include promotional messages, such as corporate branding and marketing campaigns, as well as informational messages, such as those used in computer interface design or in the clear presentation of diagrammatic data. Emphasis is placed on sensitivity to the diversity of the intended American or global audience, and to the cross-cultural differences that may affect the ways that visual messages are interpreted. Methods for creating brand experiences are explored as they apply to both small and large enterprises, ranging from personal brand to corporate brand identities.

ARTGR 370. Graphic Design Studio III.
(0-6) Cr. 3. F. Prereq: ARTGR 271, ARTGR 276, credit or enrollment in ARTGR 387
Creation and design of images and symbols for communication. Application and integration of typography with images and symbols.

ARTGR 371. Graphic Design Studio IV.
(0-6) Cr. 3. S. Prereq: ARTGR 370, 387
Development and preparation of design concepts for application to the printing and electronic publishing process. Creative problem-solving skills, introduction to systems design.

ARTGR 372. Graphic Design Materials and Processes.
(3-0) Cr. 3. S. Prereq: Credit or enrollment in ARTGR 371
Lecture about the processes and materials involved in graphic design arts reproduction. Course covers pre-press, paper selection and specification, ink systems, type systems and fonts, output technology, printing presses and bindery operations.

(1-0) Cr. 1. F. Prereq: Credit or enrollment in ARTGR 370 or ARTGR 371
Procedural and ethical concerns related to the graphic design internship. Personal goals, preparation of resume and plans for internship. Study and tours of areas of interest within the graphic design profession.

ARTGR 378. Critical Issues in Graphic Design.
(2-0) Cr. 2. Prereq: Credit or enrollment in ARTGR 370
Lecture, discussion and writing about the critical issues facing the communications field today and in the future.

ARTGR 387. Graphic Design History/Theory/ Criticism I.
(Dual-listed with 587). (3-0) Cr. 3. F. Prereq: ART H 280, 281, DSN S 183
Late nineteenth century to the 1990s. This course will explore the cultural, social, political, industrial, and technological forces that have influenced the practice of graphic design in Britain, Europe, and the United States. Students will study the historical issues and problems facing designers, their clients, and their publics. Nonmajor graduate credit.

ARTGR 388. Graphic Design History/Theory/ Criticism II.
(Dual-listed with 588). (3-0) Cr. 3. S. Prereq: ART H 281, DSN S 183, or ARTGR 387
Critical issues that affect the contemporary practice of graphic design as it relates to the United States. Students will study a variety of issues that include, but are not exclusive to, new media, gender, class, design and the public sphere, design as social action, postmodern design theory, sustainability, and ethical practice. Nonmajor graduate credit.

Meets U.S. Diversity Requirement

ARTGR 391. Graphic Design Field Study.
(0-1) Cr. 1. Repeatable, maximum of 2 credits. Prereq: Enrollment in 300 or 400 level graphic design studio course
Travel, study, and tours of areas of interest within the graphic design profession such as print production companies, design studios, and museums. Offered on a satisfactory-fail basis only.

ARTGR 470. Graphic Design Studio V.
(0-6) Cr. 3. F. Prereq: ARTGR 371
Advanced design systems as applied to corporate identity and environmental graphic design. Symbology as an integrated component of communication systems.

ARTGR 471. Graphic Design Capstone.
(0-6) Cr. 3. S. Prereq: ARTGR 270, 271, enrollment in ARTGR 470, 482, or 400-level graphic design studio course
Experience design and innovation in a multi-disciplinary design studio. Class will use unique research, design, evaluation, creativity, and innovation methodologies to solve human problems on special topics. Designed solutions will be in the form of products, artifacts, interfaces, information, and human environments.

ARTGR 472. Photography and Narrative Message.
(Dual-listed with 572). (0-6) Cr. 3. Prereq: Enrollment in ARTGR 370, 371, 470, or 471
Photography as a tool for creating conceptually-driven images and metaphors. Emphasis is on photography as an evocative storytelling device for a range of audiences and design applications. Compositional and technical aspects are explored to ensure successful interpretation of the photograph’s intended message.

ARTGR 473. Multimedia Design.
(Dual-listed with 573). (0-6) Cr. 3. S. Prereq: Enrollment in ARTGR 370, 371, 470, or 482
The design of visual, aural and textual communication for electronic media.

ARTGR 474. Exhibition Design.
(Dual-listed with 574). (0-6) Cr. 3. F. S. Prereq: Enrollment in ARTGR 370, 371, 470, or 482
Visual communication applied to exhibition design focusing on educational or interactive museum exhibitions, trade show booth design, and modular unit design for traveling exhibitions. Translation of graphic information to a three-dimensional space.

ARTGR 475. Advanced Typography.
(Dual-listed with 575). (0-6) Cr. 3. S. Prereq: Enrollment in ARTGR 370, 371, 470 or 482
Typographic theory exploring traditional and non-traditional forms, both historical and contemporary typographic achievements.

ARTGR 476. Graphic Design Methodology.
(Dual-listed with 576). (0-6) Cr. 3. F. S. Prereq: Enrollment in ARTGR 370, 371, 470 or 482
Analysis and application of scientific, systematic, and non-traditional problem-solving and problem-seeking techniques.

ARTGR 477. Graphic Design Practicum.
(0-6) Cr. 3. F. S. Prereq: Enrollment in ARTGR 370, 371, 470, or 482, portfolio review and permission of instructor
Graphic design outreach and problem solving. Individual and group projects for non-profit clients selected by the instructor.

ARTGR 478. Web Design for E-Commerce/Graphic Applications.
(Dual-listed with 578). (0-6) Cr. 3. F. S. Prereq: Enrollment in ARTGR 370 or 371 or 470 or 482
The development of advanced and experimental web design for the applications of e-commerce, education and the communication of visual information.

ARTGR 479. Wayfinding Design.
(Dual-listed with 579). (0-6) Cr. 3. S. Prereq: Enrollment in ARTGR 370, 371, 470, or 482
Study of the navigational challenges of built environments and outdoor spaces, including site analysis, development of navigational plans, and design of wayfinding sign systems. Issues of function, accessibility, legibility, and fabrication are considered.
ARTGR 480. Graphic Design Internship.  
(3-0) Cr. 3. SS. Prereq: ARTGR 377, 12 credits in graphic design; permission of instructor, registration in advance of enrollment.  
Graphic design experience in an off-campus professional environment.

ARTGR 481. Graphic Design Professional Practices.  
(3-0) Cr. 3. S. Prereq: Credit or enrollment in ARTGR 470  
Professional design management: ethics, setting up a new business, client/designer relationships, contractual options, billing practices, and effective operating procedures.

ARTGR 482. Professional Presentation.  
(0-6) Cr. 3. S. Prereq: ARTGR 470, enrollment in ARTGR 471  
Exploration and development of the graphic design portfolio and resume in electronic, print, and photographic form.

ARTGR 484. Selected Studies in Graphic Design.  
(Dual-listed with 584). Cr. 1-3. Repeatable, maximum of 9 credits. Prereq: Permission of instructor.  
Special issues related to graphic design. Topics vary each time offered.

ARTGR 490. Independent Study.  
Cr. 1-6. Repeatable. Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment.  
Student must have completed related graphic design coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

A. Theory, Criticism, and Methodology  
B. Two-Dimensional Design  
C. Three-Dimensional Design  
H. Honors  
I. Internship/Cooperative (in-depth experience other than ArtGr 480)

ARTGR 491. Publication Design: Magazines.  
(Dual-listed with 591). (0-6) Cr. 3. F. Prereq: Credit or enrollment in ARTGR 370  
The philosophy, concepts and structures of magazine design.

(Dual-listed with 592). (0-6) Cr. 3. S. Prereq: Credit or enrollment in ARTGR 370 or 371  
The philosophy, concepts and structures of book design.

ARTGR 493. Workshop.  
Cr. 1-3. Repeatable. Prereq: Evidence of satisfactory experience in area of specialization  
Intensive 2 to 4 week studio exploration. Topics vary each time offered.

Courses primarily for graduate students, open to qualified undergraduate students

(0-6) Cr. 3. F. Prereq: Graduate classification in College of Design  
Theory and investigation of systems, structures, principles of visual organization, and typography for communication. Studio problems will be influenced by social, cultural, environmental, or technological factors.

ARTGR 571. Signs, Symbols, Images.  
(0-6) Cr. 3. S. Prereq: Graduate Classification in College of Design  
Investigation and application of signs, symbols and semiotic theory for communication. Studio problems influenced by social, cultural, environmental, or technological factors.

ARTGR 572. Photography and Narrative Message.  
(Dual-listed with 472). (0-6) Cr. 3. Prereq: Graduate enrollment in College of Design  
Photography as a tool for creating conceptually-driven images and metaphors. Emphasis is on photography as an evocative storytelling device for a range of audiences and design applications. Compositional and technical aspects are explored to ensure successful interpretation of the photograph’s intended message.

ARTGR 573. Multimedia Design.  
(Dual-listed with 473). (0-6) Cr. 3. Prereq: Graduate enrollment in College of Design  
The design of visual, aural and textual communication for electronic media.

ARTGR 574. Exhibition Design.  
(Dual-listed with 474). (0-6) Cr. 3. Prereq: Graduate enrollment in College of Design  
Visual communication applied to exhibition design focusing on educational or interactive museum exhibitions, trade show booth design, and modular unit design for traveling exhibitions. Translation of graphic information to a three-dimensional space.

ARTGR 575. Advanced Typography.  
(Dual-listed with 475). (0-6) Cr. 3. Prereq: Graduate classification in College of Design  
Typographic theory exploring traditional and non-traditional forms, both historical and contemporary typographic achievements.

ARTGR 576. Graphic Design Methodology.  
(Dual-listed with 476). (0-6) Cr. 3. Prereq: Graduate enrollment in College of Design  
Analysis and application of scientific, systematic, and non-traditional problem-solving and problem-seeking techniques.

ARTGR 578. Design for E-Commerce/Graphic Applications.  
(Dual-listed with 478). (0-6) Cr. 3. Prereq: Graduate enrollment in College of Design  
The development of advanced and experimental web design for the applications of e-commerce, education and the communication of visual information.

ARTGR 579. Wayfinding Design.  
(Dual-listed with 479). (0-6) Cr. 3. Prereq: Graduate enrollment in College of Design  
Study of the navigational challenges of built environments and outdoor spaces, including site analysis, development of navigational plans, and design of wayfinding sign systems. Issues of function, accessibility, legibility, and fabrication are considered.

ARTGR 584. Selected Studies in Graphic Design.  
(Dual-listed with 484). Cr. arr. Repeatable. Prereq: Graduate classification in the College of Design  
Special issues related to graphic design. Topics vary each time offered.

ARTGR 587. Graphic Design History/Theory/ Criticism I.  
(Dual-listed with 387). (3-0) Cr. 3. F. Prereq: Graduate classification  
Late nineteenth century to the 1990’s, this course will explore the cultural social, political, industrial, and technological forces that have influenced the practice of graphic design in Britain, Europe, and the United States. Students will study the historical issues and problems facing designers, their clients, and their publics.

ARTGR 588. Graphic Design History/Theory/ Criticism II.  
(Dual-listed with 388). (3-0) Cr. 3. S. Prereq: Graduate classification  
Critical issues that affect the contemporary practice of graphic design as it relates to the United States. Students will study a variety of issues that include, but are not exclusive to, new media, gender, class, design and the public sphere, design as social action, postmodern design theory, sustainability, and ethical practice.

ARTGR 590. Special Topics.  
Cr. arr. Prereq: Bachelor’s degree in graphic design, or evidence of satisfactory equivalency in specialized area  
Written approval of instructor and department chair on required form in advance of semester of enrollment.

A. Theory, Criticism, and Methodology  
B. Two-Dimensional Design  
C. Three-Dimensional Design
ARTGR 591. Publication Design: Magazines.
(Dual-listed with 491). (0-6) Cr. 3. F. Prereq: Graduate enrollment in College of Design
The philosophy, concepts and structures of magazine design.

(Dual-listed with 492). (0-6) Cr. 3. S. Prereq: Graduate enrollment in College of Design
The philosophy, concepts and structures of book design.

ARTGR 593. Workshop.
Cr. 1-3. Repeatable. Prereq: Graduate classification; evidence of satisfactory experience in area of specialization
Intensive 2 to 4 week studio exploration. Topics vary each time offered.

ARTGR 599. Creative Component.
Cr. arr. Repeatable.

Courses for graduate students

ARTGR 672. Graphic Design and Human Interaction.
(0-6) Cr. 3. F.S. Prereq: ARTGR 570, 571, and graduate enrollment in College of Design or permission of instructor
The theory and investigation of experience design as it applies to human interactions in contemporary society and culture. Studio problems may involve such areas as: exhibition design, electronic interface design, wayfinding, package design, and publication design.

A. Usability. The exploration and design of interface/interaction with products, systems, and technologies.
B. Design for Behavioral Change. The exploration and design of educational experiences and artifacts as they relate to the social, emotional, and behavioral aspects of society.
C. Consumer Experience Design and Branding. The exploration and design of identity systems and consumer brand experiences.

ARTGR 690. Advanced Topics.
Cr. arr. Repeatable.

ARTGR 698. Current Issues in Graphic Design.
Cr. 1-3. Repeatable, maximum of 9 credits. Prereq: Graduate enrollment in College of Design or permission of instructor
Selected issues in contemporary graphic design. Topics and readings vary each time offered.

Cr. arr. Repeatable.

Art History (Art H)

Courses primarily for undergraduate students

(Cross-listed with DSN S). (3-0) Cr. 3. F.S.
History of designed artifacts, their creators, and their cultural environments in Western Europe and America from the beginning of the Industrial Revolution to the present.

ART H 280. History of Art I.
(Cross-listed with DSN S). (3-0) Cr. 3. F.
Development of the visual arts of western civilization including painting, sculpture, architecture, and crafts; from prehistoric through Gothic.

Meets International Perspectives Requirement.
H. Honors. Cr. 4.

ART H 281. History of Art II.
(Cross-listed with DSN S). (3-0) Cr. 3. S.
Development of the visual arts of western civilization including painting, sculpture, architecture, and crafts; from the Renaissance to the twentieth century.

Meets International Perspectives Requirement.

ART H 292. Introduction to Visual Culture Studies.
(Cross-listed with DSN S). (3-0) Cr. 3. F.S.
An introduction to various topics in visual culture studies. The lecture course will provide students with a creative and intellectual context in which to study historical and contemporary instances of the visual in culture. Individual lectures examine significant trends in the visual arts, mass media, scientific imagery, visual communications, and other areas related to visual literacy and visual representation in local and global contexts. Cross cultural viewpoints and issues of diversity will be presented in relation to visual culture and related fields.

Meets U.S. Diversity Requirement

(3-0) Cr. 3. Prereq: Permission of instructor
Survey of Italian art and architecture from the Etruscans to Bernini, including lectures and tours of museums and historical sites. Study abroad course taught in Rome, with travel to other Italian cities.

(Dual-listed with 582). (Cross-listed with DSN S). (3-0) Cr. 3.
Introduction to the history of art and architecture in Asia. Countries may include China, Korea, Japan, and India before the modern-era. Visual materials selected based on important themes that are critical in understanding Asian culture and art tradition. Nonmajor graduate credit.

Meets International Perspectives Requirement.

ART H 383. Greek and Roman Art.
(Dual-listed with 583). (Cross-listed with DSN S, CL ST). (3-0) Cr. 3.
Greek art from Neolithic and Hellenistic periods. Roman art from the traditional founding to the end of the empire in the West. Nonmajor graduate credit.

H. Honors (3-4 cr.)

ART H 384. Art of Islam.
(3-0) Cr. 3.
Historical survey of the painting, sculpture, crafts, and architecture of the various civilizations of the Islamic world.

Meets International Perspectives Requirement.

ART H 385. Renaissance Art.
(Dual-listed with 585). (Cross-listed with DSN S). (3-0) Cr. 3.
European art including painting, sculpture, architecture, and crafts; thirteenth through sixteenth centuries. Nonmajor graduate credit.

H. Honors Cr. 3-4

ART H 394. Women/Gender in Art.
(Dual-listed with 594). (Cross-listed with DSN S, W S). (3-0) Cr. 3.
Issues of gender related to cultural environments from the Middle Ages to contemporary times in Europe and America. Feminist movement beginning in the 1970s and specifically gender issues in art that are becoming widespread in the artistic culture. Nonmajor graduate credit.

Meets U.S. Diversity Requirement
ART H 481. Art and Architecture of India.
(Dual-listed with 581). (Cross-listed with DSN S). (3-0) Cr. 3.
Survey of Indian-style art and architecture through history. Examine how art and architecture developed in the Indian world has come to define the Indian identity religiously, culturally, socially, and politically. Nonmajor graduate credit.

Meets International Perspectives Requirement.

(Dual-listed with 587). (Cross-listed with DSN S). (3-0) Cr. 3.
European and American art and architecture from 1780 to 1900 focusing on the major movements of western Europe, including: Neo-Classicism, Romanticism, Realism, Impressionism, and Post-Impressionism. Nonmajor graduate credit.

ART H 488. Modern Art and Theory I.
(Dual-listed with 588). (Cross-listed with DSN S). (3-0) Cr. 3.
Visual arts and critical theory of the early 20th century, including Expressionism, Cubism, Futurism, Suprematism, Dada, and Surrealism. Nonmajor graduate credit.

ART H 489. Sequential Art.
(Dual-listed with 589). (Cross-listed with DSN S). Cr. 3.
An art-historical survey of comic strips, comic books, and graphic novels from their origins in the 19th century to present. Nonmajor graduate credit.

H. Honors Cr. 3-4

ART H 490. Independent Study.
Cr. 1-6. Repeatable. Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment. Student must have completed art history coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

H. Honors

ART H 495. Art and Theory Since 1945.
(Dual-listed with 595). (Cross-listed with DSN S). (3-0) Cr. 3.
Visual arts and critical theory from Abstract Expressionism to the present. Nonmajor graduate credit.

Meets U.S. Diversity Requirement

ART H 496. History of Photography.
(Dual-listed with 596). (Cross-listed with DSN S). (3-0) Cr. 3.
Survey of the evolution of photography and photojournalism from the 1830s to the present, seen from an art historical perspective, emphasizing causative factors, cultural influences, and major masters and schools. Nonmajor graduate credit.

ART H 498. Selected Topics in Art History.
(Dual-listed with 598). (Cross-listed with DSN S). (3-0) Cr. 3. Repeatable, maximum of 9 credits.
Specialized study in the history or criticism of art and design. Course primarily for graduate students open to qualified undergraduate students.

Courses primarily for graduate students, open to qualified undergraduate students

ART H 581. Art and Architecture of India.
(Dual-listed with 481). (Cross-listed with DSN S). (3-0) Cr. 3. Prereq: Graduate classification, permission of instructor.
Survey of Indian-style art and architecture through history. Examine how art and architecture developed in the Indian world has come to define the Indian identity religiously, culturally, socially, and politically.

Meets International Perspectives Requirement.

ART H 582. Art and Architecture of Asia.
(Dual-listed with 382). (Cross-listed with DSN S). (3-0) Cr. 3. Prereq: Graduate classification, permission of instructor.
Introduction to the history of art and architecture in Asia. Countries may include China, Korea, Japan, and India before the modern era. Visual materials selected based on important themes that are critical in understanding Asian culture and art tradition.

Meets International Perspectives Requirement.

ART H 583. Greek and Roman Art.
(Dual-listed with 383). (Cross-listed with DSN S). (3-0) Cr. 3. Prereq: Graduate classification, permission of instructor.
Greek art from Neolithic and Hellenistic periods. Roman art from the traditional founding to the end of the empire in the West.

ART H 585. Renaissance Art.
(Dual-listed with 385). (Cross-listed with DSN S). (3-0) Cr. 3. Prereq: Graduate classification, permission of instructor.
European art including painting, sculpture, architecture, and crafts; thirteenth through sixteenth centuries.

(Dual-listed with 487). (Cross-listed with DSN S). (3-0) Cr. 3. Prereq: Graduate classification, permission of instructor.
European and American art and architecture from 1780 to 1900, focusing on the major movements of western Europe including: Neo-Classicism, Romanticism, Realism, Impressionism, and Post-Impressionism.

ART H 588. Modern Art and Theory I.
(Dual-listed with 488). (Cross-listed with DSN S). (3-0) Cr. 3. Prereq: Graduate classification, permission of instructor.
Visual arts and critical theory of the early 20th century, including: Expressionism, Cubism, Futurism, Suprematism, Dada, and Surrealism.

ART H 589. Sequential Art.
(Dual-listed with 489). (Cross-listed with DSN S). (3-0) Cr. 3. Prereq: Graduate classification, permission of instructor.
An art history survey of comic strips, comic books, and graphic novels from their origins in the 19th century to the present.

ART H 590. Special Topics.
Cr. arr. Prereq: Bachelor degree in art and/or design, or evidence of satisfactory equivalency in specialized area.
Written approval of instructor and department chair on required form in advance of semester of enrollment.

ART H 594. Women/Gender in Art.
(Dual-listed with 394). (Cross-listed with DSN S, W S). (3-0) Cr. 3. Prereq: Graduate classification, permission of instructor.
Issues of gender related to cultural environments from the Middle Ages to contemporary times in Europe and America. Feminist movement beginning in the 1970s and specifically gender issues in art that are becoming widespread in the artistic culture.

Meets U.S. Diversity Requirement

(Dual-listed with 495). (Cross-listed with DSN S). (3-0) Cr. 3. Prereq: Graduate classification, permission of instructor.
Visual arts and critical theory from Abstract Expressionism to the present.

Meets U.S. Diversity Requirement

ART H 596. History of Photography.
(Dual-listed with 496). (Cross-listed with DSN S). (3-0) Cr. 3. Prereq: Graduate classification, permission of instructor.
Survey of the evolution of photography and photojournalism from the 1830s to the present, seen from an art historical perspective, emphasizing causative factors, cultural influences, and major masters and schools.
ART H 598. Selected Topics in Art History.
(Dual-listed with 498). (Cross-listed with DSN 598) (3-0) Cr. 3. Repeatable, maximum of 9 credits. Prereq: Graduate classification, permission of instructor
Specialized study in the history or criticism of art and/or design.

**Interior Design (ArtID)**

**Courses primarily for undergraduate students**

**ARTID 250. Fundamentals of Interior Design.**
(2-0) Cr. 2. F.
The profession, issues, and the role of interior design.

**ARTID 251. Human Factors in Design.**
(2-0) Cr. 2. F.

**ARTID 255. Forces That Shape Interior Space.**
(3-0) Cr. 3. F.S.
A survey of variables influencing the nature and function of "interior" environments. Review of professional, geo-political, utilitarian, social-cultural, economic, humanistic, historical, technological, and other factors as generators of form and space.

**ARTID 259. Sophomore Field Study.**
Cr. R. Prereq: Enrollment in interior design studio course
Study and tours of areas of interest within the interior design profession such as manufacturers, design studios, showrooms and museums. Offered on a satisfactory-fail basis only.

**ARTID 261. Graphic Communication for Interior Design I.**
(2-2) Cr. 3. F. Prereq: Admission to the interior design program through program review and enrollment in 266
Perspective drawing, design sketching, and presentation drawings. Introduction to technical drawing conventions, and design drawings. Emphasis on drawing layout, line quality, and lettering. Use of various rendering media and techniques on 2D and 3D drawings. Overview of presentation techniques, both visual and verbal.

**ARTID 263. Graphic Communication for Interior Design II.**
(2-2) Cr. 3. S. Prereq: 261; enrollment in 267
Computer visualization techniques and applications; projects employing computer graphic methods.

**ARTID 265. Interior Design Studio I.**
(1-6) Cr. 4. F. Prereq: Credit or enrollment in 250 and 261; admission to the interior design program through program review
Enhanced creative interior design problem solving. Emphasis on research, spatial composition theories and graphic ideation and communication as applied to the interior design of small scale environments. Modeling and manual visualization techniques.

**ARTID 267. Interior Design Studio II.**
(1-6) Cr. 4. S. Prereq: 265
Human factors issues including ergonomics, human behavior and the requirements of special groups. Color theories related to interior spaces. Residential interior design and medium scale projects. Detail drawings, and expansion of visualization techniques.

**ARTID 350. Interior Finish Materials and Systems.**
(3-0) Cr. 3. F. Prereq: Admission to the interior design program through program review
Exploration of concepts, materials, and assemblies associated with development of planar interior elements including floors, walls, ceiling, windows, and finishes. Fiber, plastic, sheet metal, and other surfacing materials. Attention to related human factors, testing, detailing, specifications, writing and end-use application.

**ARTID 351. Interior Health and Safety Systems.**
(3-0) Cr. 3. S.
Exploration of interior design concepts, materials, and assemblies as they contribute to the user, health, safety and general well-being. Emphasis on human factors, testing, codes, detailing, specifications, and other issues related to design and end use. Wood, steel, masonry, and glass assemblies. Attention to related human factors, testing, codes, detailing, specifications writing and end-use application.

**ARTID 352. Interior Environmental Control Systems.**
(3-0) Cr. 3. S.
Exploration of concepts, materials, assemblies associated with building service systems. Overview of electrical, lighting, acoustical, HVAC, plumbing and other non-structural building features. Attention to related human factors, testing, codes, detailing, specifications writing and end-use application.

**ARTID 353. Interior Building Systems and Details.**
(2-0) Cr. 3. F.
Exploration of building construction concepts, materials, and assemblies and their influence on interior design. Attention to human factors, codes, detailing, and other interior design issues related to buildings.

**ARTID 355. Interior Design History/Theory/Criticism I.**
(3-0) Cr. 3. S.
Theoretical approaches to evaluation of interior finishes, furnishings, and decorative arts in relation to parallel developments in art and architecture, from a critical, historical and multicultural perspective. Focus on pre-1850. Nonmajor graduate credit.

**ARTID 356. Interior Design History/Theory/Criticism II.**
(3-0) Cr. 3. F. Prereq: Credit or enrollment in 355 or permission of instructor
Advanced theoretical approaches to evaluation of interior finishes, furnishings, and decorative arts in relation to parallel developments in art and architecture from a critical, historical, and multicultural perspective. Focus on mid-nineteenth and twentieth century. Nonmajor graduate credit.

**ARTID 357. Made in Italy.**
(2-0) Cr. 2. F. Prereq: Participation in Study Abroad Rome program
An investigation of the 20th century roots of modern Italian design and its contemporary form. Lectures and seminar presentations highlight major Italian designers and internationally significant design in the 20th century. Focus is on innovative design that exhibits a synthesis of formal and social functions. Meets International Perspectives Requirement.

**ARTID 359. Junior Field Study.**
Cr. R. F. Prereq: Enrollment in third year interior design studio course
Study and tours of areas of interest within the interior design profession such as manufacturers, design studios, showrooms, and museums. Offered on a satisfactory-fail basis only.

**ARTID 360. Interior Design Internship Seminar.**
(0-1) Cr. 0.5. Repeatable, maximum of 1 credits. Prereq: Enrollment in interior design program
Procedural and ethical concerns relating to interior design internship. Preparation of placement credentials and formulation of personal goals. Internship plans and agreements. Offered on a satisfactory-fail basis only.
ARTID 365. Interior Design Studio III.
(1-6) Cr. 4. A. F. Prereq: 263, 267 and enrollment in 359

ARTID 367. Interior Design Studio IV.
(1-6) Cr. 4. S. Prereq: ARTID 365
Emphasis on three-dimensional spatial development in large scale, multiple scale unit institutional projects. Inclusion of extensive design documentation. Expansion of alternative manual and computer-based visualization methods. Teamwork.

H. Honors Cr. 4-5

ARTID 368. International Study Orientation Seminar.
(1-0) Cr. 1. Prereq: 267
Historic and traditions of Rome and related travel itinerary locations. Required of students participating in the interior design international study option.

ARTID 459. Senior Field Study.
Cr. R. Prereq: Enrollment in fourth year interior design studio course
Study and tours of areas of interest within the interior design profession such as manufacturers, design studios, showrooms and museums. Offered on a satisfactory-fail basis only.

ARTID 460. Interior Design Internship.
Cr. 3. SS. Prereq: ARTID 350, 360, and 365
Professional interior design off-campus experience.

(3-0) Cr. 3. S. Prereq: 460
Organization and general management of the interior design office: agreements, business procedures, and professional ethics. Professional interior design issues and concerns.

H. Honors Cr. 3-4

ARTID 463. Environments for the Aging.
(Cross-listed with HD FS, GERON). (3-0) Cr. 3. S. Prereq: HD FS 360 or 3 credits in housing, architecture, interior design, rehabilitation, psychology, or human development and family studies
Emphasis on independent living within residential settings including specialized shelter, supportive services, and housing management. Application of criteria appropriate for accessibility and functional performance of activities; universal design principles. Creative project provides service learning opportunities.

Meets U.S. Diversity Requirement

ARTID 465. Interior Design Studio V.
(Dual-listed with 565). (1-6) Cr. 4. F. Prereq: 460, or permission of instructor, and enrollment in 459
Design research and refined problem solving methods including functional analysis, programming and detailing. Nonmajor graduate credit.

ARTID 467. Interior Design Studio VI.
(Dual-listed with 567). (1-6) Cr. 4. S. Prereq: 465
Refinement of technical, analytical and theoretical problem-solving methods and comprehensive design documentation. In-depth development of interior design projects. Current issues in interior design. Nonmajor graduate credit.

(1-4) Cr. 3. S. Prereq: Enrollment or credit in third year studio courses
Study of selected interior design projects and designers practicing in an urban setting. Studio project examining issues related to interior design in an urban context.

H. Honors Cr. 3-4

(Dual-listed with 569). Cr. 3. Repeatable, maximum of 6 credits. Prereq: 12 credits in interior design related courses or permission of instructor
Examination of special issues with emphasis on their translation into design application. Nonmajor graduate credit.

A. Design Theory;
B. Advanced Color;
C. Sustainable Design;
D. Variable Topics

ARTID 490. Independent Study.
Cr. 1-6. Repeatable. Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment
Student must have completed related interior design coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

H. Honors

ARTID 493. Workshop.
Cr. 1-3. Repeatable. F.S.SS. Prereq: Evidence of satisfactory experience in area of specialization
Intensive 2 to 4 week studio exploration. Topics vary each time offered.

Courses primarily for graduate students, open to qualified undergraduate students

ARTID 550. Creative Integration.
(1-2) Cr. 2. Repeatable, maximum of 10 credits. F. Prereq: Permission of instructor
Analysis and expansion of technical, theoretical and procedural sources of design insight and their application to design problem-solving. Emphasis on the refinement and communication of clear, logical bases for design decisions.

ARTID 551. Design Humanics.
(3-0) Cr. 3. Repeatable. F.S. Prereq: Instructor permission
An exploration of human nature as broadly defined and as applied to design of the built environment. Consideration of human characteristics, responses and performance, at varying scales, as sources of design insight. Topics vary each time offered.

A. Micro-Scale Humanics- Issues related to the nature, performance and accommodation of the individual organism, including sensation and perception, physical requirement, individual anthropometrics, personal safety and other issues connecting human needs and built environmental responses.
B. Meso-Scale Humanics- Issues related to human performance in small to moderate scale settings, including psychological and behavioral dimensions, social factors, interpersonal safety, etc.
C. Macro-Scale Humanics- Cultural and societal influences on human performance and well being in the moderate to large scale built environment, including the impact of political, economic, cultural, geographic, design cultural and other societal factors.

ARTID 552. Design Methods.
(2-0) Cr. 2. Repeatable, maximum of 10 credits. F.S. Prereq: Permission of instructor
Survey of methodologies and methodological tools for varied end uses and drawn from wide ranging sources. Emphasis on their organization and application to design of the human environment. Topics vary each time offered.

A. Investigation & Analysis - Methods of design research, analysis, programming and theory formulation.
B. Synthesis - Methods of synthesizing design concepts and solutions
C. Communication - Methods of managing, translating, communicating and otherwise utilizing text, image, abstract and other forms of information.
D. Procedural Alternatives - New and specialized methodological trends, including subject or setting-specific methods.
ARTID 554. Interior Design Teaching Practicum.
Cr. 1-3. Repeatable. F.S.S.S. Prereq: ARTID 667 and permission of instructor
Supervised practical application of interior design theory, materials, and practice to the educational process.

ARTID 559. Graduate Interior Design Field Study.
Cr. R. Repeatable. Prereq: Graduate enrollment or permission of instructor
Study and tours of places of interior design-related interest such as manufacturers, design studios, related professional offices, showrooms, museums, and historical sites.

ARTID 560. Interior Design Internship.
(3-0) Cr. 3. Prereq: Completion of a graduate interior design studio or permission of instructor
Applied, off campus, professional interior design-related experience.

ARTID 565. Interior Design Studio V.
(Dual-listed with 465). (1-6) Cr. 4. F. Prereq: Graduate classification and permission of instructor
Design research and refined problem-solving methods including functional analysis, programming and detailing.

ARTID 567. Interior Design Studio VI.
(Dual-listed with 467). (1-6) Cr. 4. S. Prereq: Graduate classification and permission of instructor
Refinement of technical, analytical and theoretical problem-solving methods and comprehensive design documentation. In-depth development of interior design projects. Current issues in interior design. Open to non-majors.

ARTID 569. Advanced Studies in Interior Design.
(Dual-listed with 469). Cr. 3. Repeatable, maximum of 6 credits. Prereq: Graduate classification; or permission of instructor
Examination of special issues with emphasis on their translation into design application.
A. Design Theory;
B. Advanced Color;
C. Sustainable Design;
D. Variable Topics

ARTID 590. Special Topics.
Cr. arr. Prereq: Bachelor’s degree in interior design, or evidence of satisfactory equivalency in specialized area. Written approval of instructor and department chair on required form in advance of semester of enrollment

ARTID 593. Workshop.
Cr. 1-3. Repeatable. F.S.S.S. Prereq: Graduate classification; evidence of satisfactory experience in area of specialization
Intensive 2 to 4 week studio exploration. Topics vary each time offered.

ARTID 598. Research Forum.
(1-0) Cr. 1-3. Repeatable, maximum of 9 times. F.S. Prereq: Concurrent enrollment in 665, 567, 665, or 667, and permission of instructor
Presentation and discussion of cross-disciplinary design research theory, methods, and application. Focus on the investigation, application, and communication of types of design research.

ARTID 599. Creative Component.
Cr. arr. Repeatable.

Courses for graduate students

ARTID 660. Research Methods.
(3-0) Cr. 3. S. Prereq: Permission of instructor
Research strategies related to design. Application of selected methods to specific issues. Open to non-majors.

ARTID 665. Advanced Interior Design Studio.
(0-8) Cr. 4. Repeatable, maximum of 15 credits. F.S. Prereq: Graduate classification and permission of instructor
Interior design problem-solving with emphasis on special issues. Project types will include but not be restricted to hospitality, health care, institutional, industrial, residential, historic preservation, sustainability and global environments.

ARTID 667. Experimental Interior Design.
(0-8) Cr. 4. Repeatable, maximum of 15 credits. F.S. Prereq: Graduate classification and permission of instructor
Application of alternative design methods and sources of insight to the solution of human environmental design problems. Focus on the identification, formulation, refinement and application of theory to the design process. Emphasis on the pursuit of new discovery and innovative problem solving. Approaches, settings and scales vary each time offered.

ARTID 690. Advanced Topics.
Cr. arr. Repeatable. Prereq: M.F.A classification, permission of instructor

ARTID 697. Design Practicum.
Cr. arr. Repeatable, maximum of 9 credits. F.S.S.S. Prereq: Approval of POS committee
Supervised off-campus learning experience with a prominent designer or firm. Credit not to be applied to MA degree program of study.

Cr. 1-3. Repeatable, maximum of 9 credits. Prereq: Graduate classification
Selected issues in contemporary design. Topics and readings vary each time offered.

ARTID 699. Research.
Cr. arr. Repeatable.
A. Thesis
B. Thesis-Exhibition

Integrated Studio Arts (ArtIS)

Courses primarily for undergraduate students

ARTIS 201. Creative Visual Thinking.
(0-6) Cr. 3.
Exploration of the nature of visual perception in relation to issues of visual communication, problem solving, envisioning information, and visual thinking. Studio assignments to be digitized and sent to instructor electronically for evaluation and critique.

(0-8) Cr. 2. F.S. Prereq: Open to all students; sophomore level and above. Required of all ISA BFA majors
Half-semester course. Introduction to wood’s physical properties, its potential as an expressive medium, and basic hand tools and techniques used for working with wood.

ARTIS 203. Studio Fundamentals: Jewelry/Metalsmithing.
(0-8) Cr. 2. F.S. Prereq: Open to all students; sophomore level and above. Required of all ISA BFA majors
Half-semester course. Introduction to basic jewelry/metal design and fabrication. Forming, texturing, and joining techniques will be explored. Additional work required outside of class.

ARTIS 204. Studio Fundamentals: Ceramics.
(0-8) Cr. 2. F.S. Prereq: Open to all students; sophomore level and above. Required of all ISA BFA majors
Half-semester course. Exploration of clay, glazes, and approaches to creating expressive ceramic forms.
(0-8) Cr. 2. F.S. Prereq: Open to all students; sophomore level and above. Required of all ISA BFA majors.
Introduction to relief, monoprint, lithographic and intaglio printing as methods for visual communication and expression.

ARTIS 208. Color.
(0-6) Cr. 3. F.S. Prereq: DSN S 102, 131, and 183
Required of all ISA BFA students. The impact of changing visual relationships emphasizing physical and psychological color concepts. Additive and subtractive mixing and color interaction exercises using various color media.

(0-8) Cr. 2. F.S. Prereq: Open to all students; sophomore level and above. Required of all ISA BFA majors.
Introduction to camera operation and traditional black and white darkroom methods as means of visual communication and creative expression.

(0-8) Cr. 2. F.S. Prereq: Open to all students; sophomore level and above. Required of all ISA BFA majors.
Half-semester course. Introduction to image acquisition, Adobe Photoshop and Illustrator.

(0-8) Cr. 2. F.S. Prereq: Open to all students; sophomore level and above. Required of all ISA BFA majors.
Half-semester course. Introduction to preparation of painting grounds, color mixing, manipulation of paint and pictorial space as methods for visual communication and expression. Additional work required outside of class.

(0-8) Cr. 2. F.S. Prereq: Open to all students; sophomore level and above. Required of all ISA BFA majors.
Half semester course. Introduction to two-dimensional and three-dimensional textile techniques used for visual communication and expression. Additional work required outside of class.

ARTIS 227. Introduction to Creative Digital Photography.
(0-6) Cr. 3. Prereq: DSN S 102, 131, and 183
This course will include the functions and operations of the digital camera, scanning and other image input devices, digital image manipulation, software usage and support, color management and printing, presentation of images, compositional dynamics and the development of "seeing" as a medium of design, expression, and communication. Students should have access to a good or high quality digital camera with the ability to separately adjust shutter speed, f/stop and exposure, a laptop with updated Adobe Photoshop software, and enough digital storage for all class assignments.

ARTIS 229. Introduction to Darkroom Photography.
(0-6) Cr. 3. Prereq: DSN S 102, 131 and 183
Photography as a creative medium of design, expression and communication. Camera techniques and black and white wet lab processing taught. Alternative processes explored as time permits. 35 mm camera with manual exposure controls is required.

ARTIS 230. Drawing II.
(0-6) Cr. 3. F.S. Prereq: DSN S 102, 183, and 131
A continuation of DSN S 131 (Design Representation). Further development of perceptual drawing skills from a variety of subject matter. Continued practice with drawing materials and techniques with emphasis on tonal and color media.

ARTIS 233. Watercolor Painting.
(0-6) Cr. 3. Prereq: 230
Fundamentals of painting using water-based media applied to observation-based painting. Subject matter may include working from actual or two-dimensional references of still life, landscape, architectural space, and the human form.

ARTIS 238. Painting I.
(0-6) Cr. 3. F.S. Prereq: 230
Fundamentals of painting using acrylic and oil media applied to observation-based painting. Subject matter may include working from actual or two-dimensional references of still life, landscape, and the human form.

ARTIS 305. Integrated Media.
(Dual-listed with 505). (0-6) Cr. 3. Repeatable. Prereq: DSN S 102, 131 and 183 and 6 credits of additional ISA studio.
Integration and exploration of materials and methods that combine traditional and innovative approaches. Emphasis on conceptual development.

(0-6) Cr. 3. Prereq: 230 or permission of instructor
Introduction to 3D modeling using computer and available software. Modeling, texturing, lighting, and rendering with respect to 3D object and still scene creation.

ARTIS 310. Sources of Visual Design.
(1-4) Cr. 3.
Generate ideas for new work by studying selected artists, themes, images and through personal reflection. Increase understanding of the ways contemporary artists work through talks, readings and videos.

Cr. 3.
Exploration of issues and directions in current art. Readings, discussions, and studio research projects to build an experimental and applied knowledge base for understanding each student's place in the contemporary art world.

ARTIS 320. Introduction to Furniture Design.
(0-6) Cr. 3. Prereq: 202
Design and creation of basic furniture forms in wood. Introduction to power tools. Develop an individual design process including an understanding of scale and proportion. Develop sensitivity to wood and the social and environmental implications of materials used for furniture design and production.

ARTIS 322. Intermediate Ceramics Studio.
(0-6) Cr. 3. Prereq: 204 or permission of instructor
Investigation of concepts, techniques, and some of the history of ceramics. Introduction to wheel throwing, further hand-building, glaze research and electric kiln firing.

ARTIS 323. Scientific Illustration Principles and Techniques.
(Cross-listed with BPM 1). (0-6) Cr. 3. Repeatable. Prereq: 6 credits in art and design and 3 credits in biological sciences
Studio basics and professional techniques in black & white, continuous tone, and color. Emphasis on tools, materials, and rendering.
ARTIS 324. Jewelry/Metalsmithing II.
(0-6) Cr. 3. Prereq: 203 or permission of instructor
Continued study of traditional and contemporary metal fabrication tech-
niques applicable to jewelry and object construction, including container
forms. Emphasis on design, modeling and rendering techniques and
progressive skill development. Basic stone setting and lost wax casting
introduced.
H. Honors Cr. 3-4

ARTIS 325. Integrated Studio Arts Seminar.
(2-0) Cr. 2. Repeatable, maximum of 6 credits. Prereq: Open to ISA BFA majors
Contemporary issues in studio arts explored through lectures, presenta-
tions and critiques.

ARTIS 326. Illustration and Illustration Software.
(Cross-listed with BPM II). (0-6) Cr. 3. Repeatable. Prereq: 323
Application of painting, drawing, and image making techniques to
communication. Development of technical abilities using illustration soft-
ware. Digital and print production techniques.

ARTIS 327. Illustration as Communication.
(Cross-listed with BPM II). (0-6) Cr. 3. Prereq: 326
Studio problems in illustration emphasizing composition and communica-
tion. Problem solving methodologies.

ARTIS 329. Creative Photography.
(0-6) Cr. 3. Repeatable, maximum of 6 credits. Prereq: 210 or 229
Continuation and expansion of concepts and processes from introduc-
tory photography. Individual thematic work is enriched by connection to
photographic history and pluralist perspectives.
H. Honors Cr. 3-4

(0-6) Cr. 3. Repeatable. Prereq: 230
Drawing from the human figure.
H. Honors Cr. 3-4

ARTIS 335. Three-Dimensional Studio.
(Cross-listed with ARCH). (1-4) Cr. 3. Repeatable, maximum of 6 credits.
This course deals with three dimensional problems in visual invention,
organization, and expression emphasizing creative manipulation of tools,
materials, and techniques as means for three dimensional thinking.
Projects cover the additive (modeling), subtractive (carving), substitutional
(casting) as well as constructive techniques.

(Cross-listed with BPM II). (0-6) Cr. 3. Prereq: 323
Rendering techniques applied to different types of biological and sci-
entific subjects emphasizing communication. The use of traditional and
digital media. Term project required.

ARTIS 338. Painting II.
(0-6) Cr. 3. Repeatable. Prereq: 202-I or 213 and 230
Painting using acrylic and oil media; composition and expression.
H. Honors Cr. 3-4

(0-6) Cr. 3. Repeatable. Prereq: 214 or permission of instructor
This course introduces weaving as fine art and applied design through a
variety of techniques that utilize traditional and non-traditional materials
and approaches. May include tapestry weaving, 4-harness weaving, warp
dyeing and resist techniques. Knowledge of historical and contemporary
precedents technical development, weave structure and presentation
strategies will be emphasized.
H. Honors Cr. 3-4

ARTIS 346. Textile Surface Design.
(0-6) Cr. 3. Repeatable. Prereq: 214
Surface design using dyes and discharge agents, as well as mechanical
and liquid resists to create complex surfaces. Other surface embellish-
ment techniques such as direct application of pigments and stitching will
be explored. Emphasis on technical skill development and research, as
well as conceptual exploration and visual problem solving.
H. Honors Cr. 3-4

ARTIS 347. Printed Textile Design.
(0-6) Cr. 3. Repeatable. Prereq: 214 or permission of instructor
Exploration of textile printing methods; block, stencil, photo emul-
sion-printing using dyes, discharging agents, and pigments. Digital ink jet
printing on fabric will be introduced. Experimental printing methods on
fabric will also be introduced. Experimental printing methods will also be
explored. Knowledge of historical and contemporary precedents, concep-
tual and technical development will be emphasized.
H. Honors Cr. 3-4

ARTIS 356. Relief Printmaking.
(Dual-listed with 556). (0-6) Cr. 3. Repeatable, maximum of 6 credits.
Prereq: 206 and 230
Examine the techniques and aesthetic qualities of black and white and
color relief printmaking primarily through woodcuts and photopolymer
plates. Emphasis is on experimental and creative use of printmaking for
artistic expression.
H. Honors Cr. 3-4

ARTIS 357. Intaglio and Monotype Printmaking.
(Dual-listed with 557). (0-6) Cr. 3. Repeatable, maximum of 9 credits.
Prereq: 206 and 230
Examine the techniques and aesthetic qualities of black and white and
color intaglio printmaking primarily through etching, aquatint, photo-
graphic intaglio and collagraph processes. Unique, one-of-a-kind black and
white and color prints from Plexiglas will also be introduced. Emphasis is
on experimental and creative use of printmaking for artistic expression.
H. Honors Cr. 3-4

ARTIS 358. Lithography.
(Dual-listed with 558). (0-6) Cr. 3. Repeatable. Prereq: 206 and credit or enrollment in 230
Examine the techniques and aesthetic qualities of lithography primarily
through hand-drawn and photographic plates. Emphasis is on experi-
mental and creative use of printmaking for artistic expression. For those
taking the course for a second semester, focus is on stone lithography
and increased work with color.
H. Honors Cr. 3-4

ARTIS 399. BFA Professional Practice.
(2-0) Cr. 2. S.
Prereq: Junior classification in Art and Design BFA curriculum. Required of all ISA majors
Introduction to professional practices including development of portfolio
(visual and written components). Lecture and presentation topics include
applying to graduate school, grants/funding opportunities, professional
networking, exhibition opportunities, and best practices for studio artists.
Half-semester course.

(Dual-listed with 507). (Cross-listed with HCI). (0-6) Cr. 3. Repeatable, maximum of 9 credits. Prereq: 308
Animation techniques using the computer and available software. Prin-
ciples of character animation. Prior knowledge of modeling, lighting,
texturing and rendering with available software is assumed. Nonmajor
graduate credit.
H. Honors (3-4 cr.)
ARTIS 408. Principles of 3D Animation.
(0-6) Cr. 3. Repeatable. *Prereq: 308*
Animation techniques using the computer and available software. Principles of animation. Prior knowledge of modeling, lighting, texturing, animation and rendering with computer and available software is assumed. Nonmajor graduate credit.

H. Honors Cr. 3-4

ARTIS 409. Computer/Video Game Design and Development.
(Dual-listed with 509). (Cross-listed with HCI). (0-6) Cr. 3. Repeatable, maximum of 12 credits. *Prereq: Permission of instructor. Programming emphasis: COM S 227, 228, 229 or equivalent in engineering; art or graphics emphasis: ARTIS 230 and 308; writing emphasis: an English course in creative writing or writing screen plays; business or marketing students: junior classification*
Independent project based creation and development of "frivolous and non-frivolous" computer games in a cross-disciplinary team. Projects require cross-disciplinary teams. Aspects of Indie development and computer/video game history will be discussed. Nonmajor graduate credit.

H. Honors Cr. 3-4

ARTIS 420. Advanced Furniture Design.
(Dual-listed with 520). (0-6) Cr. 3. Repeatable, maximum of 12 credits. *Prereq: 320*
Design and creation of advanced furniture forms in wood with consideration of precedents and innovative approaches. Develop a unique personal approach to the design and making of furniture. Refine sensitivity to wood and the social and environmental implications of materials used for furniture design and production. Nonmajor graduate credit.

H. Honors Cr. 3-4

ARTIS 422. Ceramics Studio.
(Dual-listed with 522). (0-6) Cr. 3. Repeatable, maximum of 12 credits. *Prereq: 322*
In-depth investigation of ceramic forms and surfaces with an emphasis on personal art expression. Kiln firings, research into contemporary ceramic artists and development of increasingly competent work are emphasized. Nonmajor graduate credit.

H. Honors Cr. 3-4

ARTIS 424. Jewelry/Metalsmithing III.
(Dual-listed with 524). (0-6) Cr. 3. Repeatable, maximum of 12 credits. *Prereq: 324 or permission of instructor*
Emphasis on metal fabrication and hollow construction techniques applicable to jewelry, functional objects and sculptural art forms. As students advance, they learn sheet metal processes including raising, forming, and anticlastic shell forming techniques. Introduction to mechanisms and tool making. Advanced students are encouraged to integrate these topics with alternative materials and technologies. A focus is placed on independent research, professional engagement and portfolio development. Nonmajor graduate credit.

H. Honors

ARTIS 429. Advanced Photography.
(Dual-listed with 529). (0-6) Cr. 3. Repeatable. *Prereq: 329*
Independent, advanced work in traditional alternative and/or digital photographic processes. Emphasis is on development of a unified body of work and research into contemporary photographers and aesthetic concern. Nonmajor graduate credit.

H. Honors Cr. 3-4

ARTIS 430. Drawing IV.
(Dual-listed with 530). (0-6) Cr. 3. Repeatable, maximum of 9 credits. *Prereq: 330*
Figurative and/or non-figurative drawing with advanced work in media, composition, and theory. Nonmajor graduate credit.

H. Honors Cr. 3-4

ARTIS 438. Painting III.
(Dual-listed with 538). (0-6) Cr. 3. Repeatable, maximum of 9 credits. *Prereq: 338*
Figurative and non-figurative painting with advanced work in media, composition, and theory. Nonmajor graduate credit.

H. Honors Cr. 3-4

ARTIS 458. Advanced Printmaking.
(0-6) Cr. 3. Repeatable. *Prereq: 356, 357, or 358, and permission of instructor*
Independent, advanced work in printmaking processes. Emphasis is on development of a unified body of work and research into contemporary artists.

H. Honors Cr. 3-4

ARTIS 482. Selected Topics in Studio Art.
(Dual-listed with 582). Cr. 1-3. Repeatable. *Prereq: Permission of instructor*
Special issues related to studio art. Topics vary each time offered.

ARTIS 490. Independent Study.
Cr. 1-6. Repeatable. *Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment*
Student must have completed craft design coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

B. Ceramics
C. Computer Art and Design
D. Drawing
E. Textiles
F. Illustration
G. Metals
H. Honors
I. Painting
J. Photography
K. Printmaking
L. Furniture
M. Mixed Media

ARTIS 493. Workshop.

M. Mixed Media

ARTIS 499. BFA Exhibition.
(1-0) Cr. 1. S. *Prereq: 399 and senior classification in the Art and Design BFA Curriculum. Required of all ISA majors*
Capstone experience for the BFA degree, including the refinement of a final portfolio (visual and written components). Guest lecturers cover range of topics relevant to the professional practice of art and design. Course culminates in the planning, design and installation of the BFA group exhibition in a formal gallery setting. Half-semester course.
Courses primarily for graduate students, open to qualified undergraduate students

ARTIS 505. Integrated Media.
(Dual-listed with 355). (0-6) Cr. 3. Repeatable. Prereq: Graduate classification. Integration and exploration of materials and methods that combine traditional and innovative approaches. Emphasis on conceptual development.

(Dual-listed with 407). (Cross-listed with HCI). (0-6) Cr. 3. Prereq: 308 Animation techniques using the computer and available software. Principles of character animation. Prior knowledge of modeling, lighting, texturing and rendering with available software is assumed.

ARTIS 508. Computer Aided Animation and Visualization.
(0-6) Cr. 3. Repeatable, maximum of 6 credits. Prereq: 408 or graduate classification and permission of instructor. Further investigations begun in ARTIS 408. Attention given to the workflow and management of creating animation and visualizations.

ARTIS 509. Computer/Video Game Design and Development.
(Dual-listed with 409). (Cross-listed with HCI). (0-6) Cr. 3. Repeatable, maximum of 12 credits. Prereq: Permission of instructor. Independent project based creation and development of "frivolous and non-frivolous" computer games in a cross-disciplinary team. Projects require cross-disciplinary teams. Aspects of Indie development and computer/video game history will be discussed.

ARTIS 520. Advanced Furniture Design.
(Dual-listed with 420). (0-6) Cr. 3. Repeatable, maximum of 12 credits. Prereq: Graduate classification and permission of instructor. Design and creation of advanced furniture forms in wood with consideration of precedents and innovative approaches. Develop a unique personal approach to the design and making of furniture. Refine sensitivity to wood and the social and environmental implications of materials used for furniture design and production.

ARTIS 522. Ceramics Studio.
(Dual-listed with 422). (0-6) Cr. 3. Repeatable, maximum of 12 credits. Prereq: Graduate classification and permission of instructor. In-depth investigation of ceramic forms and surfaces with an emphasis on personal art expression. Kiln firings, research into contemporary ceramic artists and development of increasingly competent work are emphasized.

ARTIS 524. Jewelry and Decorative Metalsmithing III.
(Dual-listed with 424). (0-6) Cr. 3. Repeatable, maximum of 12 credits. Prereq: Graduate classification and permission of instructor. Emphasis on metal fabrication and hollow construction techniques applicable to jewelry, functional objects and sculptural art forms. As students advance, they learn sheet metal processes including raising, forming, and anticlastic shell forming techniques. Introduction to mechanisms and tool making. Advanced students are encouraged to integrate these topics with alternative materials and technologies. A focus is placed on independent research, professional engagement and portfolio development.

ARTIS 529. Advanced Photography.
(Dual-listed with 429). (0-6) Cr. 3. Repeatable, maximum of 12 credits. Prereq: Graduate classification and permission of instructor. Independent, advanced work in traditional, alternative and/or digital photographic processes. Emphasis is on development of a unified body of work and research into contemporary photographers and aesthetic concerns.

ARTIS 530. Drawing.
(Dual-listed with 430). (0-6) Cr. 3. Repeatable, maximum of 9 credits. Prereq: Graduate classification and permission of instructor. Figurative and non-figurative drawing with advanced work in media, composition, and theory.

ARTIS 538. Advanced Painting.
(Dual-listed with 438). (0-6) Cr. 3. Repeatable, maximum of 9 credits. F.S. Prereq: Graduate classification and permission of instructor. Figurative and non-figurative painting with advanced work in media, composition, and theory.

ARTIS 556. Relief Printmaking.
(Dual-listed with 356). (0-6) Cr. 3. Repeatable. Prereq: Graduate classification and permission of instructor. Examine the techniques and aesthetic qualities of black and white and color relief printmaking primarily through woodcuts and photopolymer plates. Emphasis is on experimental and creative use of printmaking for artistic expression.

ARTIS 557. Intaglio and Monotype Printmaking.
(Dual-listed with 357). (0-6) Cr. 3. Repeatable. Prereq: Graduate classification and permission of instructor. Examine the techniques and aesthetic qualities of black and white and color intaglio printmaking primarily through etching, aquatint, photographic intaglio and collagraph processes. Unique, one-of-a-kind black and white and color prints from Plexiglas will also be introduced. Emphasis is on experimental and creative use of printmaking for artistic expression.

ARTIS 558. Lithography.
(Dual-listed with 358). (0-6) Cr. 3. Repeatable. Prereq: Graduate classification and permission of instructor. Examine the techniques and aesthetic qualities of lithography primarily through hand-drawn and photographic plates. Emphasis is on experimental and creative use of printmaking for artistic expression. Experienced lithography students may focus on stone lithography and increased work with color.

ARTIS 582. Selected Topics in Studio Art.
(Dual-listed with 482). Cr. 1-3. Repeatable, maximum of 9 credits. Prereq: Permission of instructor. Special issues related to studio art. Topics vary each time offered.

ARTIS 590. Special Topics.
Cr. arr. Prereq: Bachelor degree in art and/or design, or evidence of satisfactory equivalency in specialized area. Written approval of instructor and department chair on required form in advance of semester of enrollment.

Courses for graduate students

**ARTIS 607. Intermedia.**
(0-6) Cr. 3.
Exploration and application of media with various materials, methods and ideas.

**ARTIS 698. Current Issues in Studio Arts.**
Cr. 1-3. Repeatable, maximum of 9 credits. Prereq: Graduate classification
Selected issues in contemporary studio arts. Topics and readings vary each time offered.

**Astronomy and Astrophysics**
See Physics.
Community and Regional Planning

Community and regional planning is a professional field of study aimed at assessing the ever-changing socioeconomic and physical environments of our communities and planning for their future. Planners evaluate and seize opportunities to understand and solve problems. Most planners work at the local level, but they are concerned with issues that affect the world: the preservation and enhancement of the quality of life in a community, the protection of the environment, the promotion of equitable economic opportunity; and the management of growth and change of all kinds.

Undergraduate Study

www.design.iastate.edu/communityplanning

Graduates of the Community and Regional Planning department will be capable of performing in entry level positions in public planning agencies or with planning consulting firms. Graduates are able to integrate planning knowledge and skills in practical applications to current planning issues, and to communicate in written and oral form.

Graduates of the Community and Regional Planning Department are expected to have knowledge of the structure and functions of urban settlements, the history of planning, and aspects of plan and policy making. Graduates should have skills in problem formulation, quantitative analysis, written/oral and graphic communications, collaborative approaches to these, and in synthesizing and applying knowledge to practice. Graduates are expected to assess the impact of plans and alternatives on equity and social justice, economic welfare and efficiency, environmental sustainability, and cultural heritage in the context of citizen involvement in decision making.

The curriculum is accredited by the Planning Accreditation Board of the American Institute of Certified Planners and the Association of Collegiate Schools of Planning. Our students earn an education that, when combined with experience, supports the individual’s eligibility for membership in the American Institute of Certified Planners.

The department cooperates in the undergraduate minors in Design Studies, Digital Media, Critical Studies in Design, and Environmental Studies and Sustainability.

A student can apply for admission to the Community and Regional Planning Program after completion of the college’s Core Design Program, or by transfer from another program or institution. If applying through the Core Design Program, admission is based on a student’s cumulative GPA for all courses during the first year, portfolio work submitted, and an essay. If applying by transfer from another program or institution, admission is based on the student’s cumulative GPA and a departmental review of course work. We encourage transfer applications from students in programs in sociology, political science, geography, engineering, and other related disciplines.

For undergraduate curriculum in community and regional planning leading to the degree bachelor of science, see College of Design, Curricula.

Graduate Study

The Department offers the Master of Community and Regional Planning degree with areas of concentration in land use and transportation, community design and development, and rural and environmental planning. Students may design their own area of concentration with the assistance of their major professor. The primary focus of the M.C.R.P. degree is to prepare students with the education and practical skills to be leaders in the practice of planning. The program of graduate study is accredited by the Planning Accreditation Board of the American Institute of Certified Planners and the Association of Collegiate Schools of Planning.

Degree requirements include completion of a 2-year, 48-credit program, including a required core (21 credits), electives (21-23 credits) and one of the following: capstone studio (4 credits), professional report (4 credits), or thesis (6 credits). The required core consists of C R P 532, 561, 563, 564, 565, 566 and 592. Students select electives in consultation with their Program of Study (POS) committee.

C R P 532 Community Planning Studio 3
C R P 561 Planning Theory for Practice 3
C R P 563 Planning the American Metropolis 3
C R P 564 Introduction to Analytical Methods for Planning 3
C R P 566 Values and Decision Making 3
C R P 592 Land Use and Development Regulation Law 3

Admission to the M.C.R.P. program is by application to the department and to the Graduate College. Students with a Bachelors degree in planning or students who have taken highly relevant coursework may be able to waive up to 9 credits of course requirements. Students must petition the department’s Director of Graduate Education (DOGE) in writing prior to the first day class of the student’s first semester in the program to have credits waived. Students are encouraged to complete an internship in a planning office. No foreign language is required for the degree master of community and regional planning.

Double degree programs are offered with architecture (M.C.R.P./M.Arch.), business (M.C.R.P./M.B.A.), public administration (M.C.R.P./M.P.A.), landscape architecture (M.C.R.P./M.L.A.) and sustainable agriculture (M.C.R.P./M.S.). The department also participates in the interdepartmental major in transportation (see Transportation). Information about our programs and how to apply can be obtained from the department’s web page: www.design.iastate.edu/CRP or send an email to crp@iastate.edu.

The department also offers a 13-credit graduate certificate in Geographic Information Systems (GIS) in spatial analysis, GIS applications and program management. The program is open to graduate students in all disciplines of the University. Information about the graduate certificate may be obtained from the department office and from the department’s web page at: www.design.iastate.edu/GIS/CertificateProgram.php.

CRP currently offers several courses via distance learning to graduates and planning professionals interested in expanding their knowledge of planning. Further details of current distance course offerings may be found on the CRP website and on the ISU Continuing Education website. For more information, send an e-mail to crp@iastate.edu

Curriculum in Community and Regional Planning

The Department of Community and Regional Planning administers the 129 credit undergraduate program leading to the Bachelor of Science. The curriculum is designed to prepare students to enter the profession of planning ready to work in a variety of professional settings. Students have the opportunity to work with their faculty advisers to define their own areas of interest, which may include a minor.

A student can apply for admission to the Community and Regional Planning Program after completion of the Core Design Program, or by transfer from another program or institution. If applying through the Core Design Program, admission is based on a student’s cumulative GPA for all courses during the first year, portfolio work submitted, and an essay. If applying by transfer from another program or institution, admission is based on the student’s cumulative GPA and a departmental review of course work. Transfer applications from students in programs in sociology, political science, geography, engineering, and other related disciplines are encouraged. Community and Regional Planning emphasizes responsibility and citizenship, writing and analytical ability, and critical thinking.

Total Degree Requirement: 129 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA average; Completion of all requirements listed below.
International Perspective: 3 cr.
U.S. Diversity: 3 cr.
Communication: 12.5 cr.
(C- or better grade)

ENGL 150 Critical Thinking and Communication 3
ENGL 250 Written, Oral, Visual, and Electronic Composition 3
ENGL 309 Report and Proposal Writing 3
or ENGL 314 Technical Communication
SP CM 212 Fundamentals of Public Speaking 3
LIB 160 Library Instruction 0.5
Total Credits 12.5

Humanities: 9 cr. 300 level or above
9 cr. from program curriculum sheet.

Social Sciences: 18 cr. 300 level or above
ECON 101 Principles of Microeconomics 3
or ECON 102 Principles of Macroeconomics
POL S 215 Introduction to American Government 3
SOC 134 Introduction to Sociology 3
Nine credits from program curriculum sheet. 9
Total Credits 18

Math/Physics/Biol. Sciences: 13 cr.
STAT 101 Principles of Statistics, 6 cr. in Natural Sciences, 3 cr. in Math.

Design Core: 11.5 cr.
DSN S 102 Design Studio I 4
DSN S 115 Design Collaborative Seminar 0.5
or DSN S 110 Design Exchange Seminar I
DSN S 131 Design Representation 4
DSN S 183 Design Cultures 3
Total Credits 11.5

Community and Regional Planning: 28 cr.
C R P 253 Survey of Community and Regional Planning 3
C R P 272 Planning Analysis and Techniques I 3
C R P 274 Planning Analysis and Techniques II 3
C R P 332 Community Planning Studio I 4
C R P 383 Theory of the Planning Process 3
C R P 391 Field Travel 1-2
C R P 432 Community Planning Studio II 4
C R P 492 Planning Law, Administration and Implementation 3
C R P 494 Senior Seminar in Planning 1-3
C R P 498 Portfolio Development and Review 1
Total Credits 26-29

Core Planning Elective: 12 cr.
12 cr. from:
C R P 416 Urban Design and Practice 6
C R P 417 Urban Revitalization 3
C R P 425 Growth Management 3
C R P 429 International Planning 3
C R P 435 Planning in Small Towns 3
C R P 442 Site Development 3
C R P 445 Transportation Policy Planning 3
C R P 451 Introduction to Geographic Information Systems 3
C R P 455 Community Economic Development 3
C R P 481 Regional and State Planning 3
C R P 484 Sustainable Communities 3
C R P 491 Environmental Law and Planning 3
or C E 350 Introduction to Transportation Planning

Planning Related Electives: 11 cr.
11 cr. from program curriculum sheet.

General Electives: 14 cr.

Courses primarily for undergraduate students

C R P 253. Survey of Community and Regional Planning.
(3-0) Cr. 3. F.
A historical survey of planning, the nature and problems of urban areas, and the goals, procedures, and results of urban planning.

C R P 270. Forces Shaping Our Metropolitan Environment.
(Cross-listed with DSN S. (3-0) Cr. 3. S. 2011-2012
Must be taken prior to completing 9 credits in C R P. Introduction to the social, political, physical, and economic forces as they shape metropolitan areas. A comprehensive picture of metropolitan development showing important roles other urban disciplines play in the planning process and the interrelationships of the disciplines.

Meets U.S. Diversity Requirement

C R P 272. Planning Analysis and Techniques I.
(2-2) Cr. 3. F.
Existing and emerging techniques for preparation of community planning studies. Sources of planning information and data. Survey techniques including survey instruments, sampling methods, sample size for demographic studies. Land use surveys for comprehensive and transportation planning. Student’s oral and graphic presentation of analytical results. Laboratory emphasizes practical uses and computer applications for data analysis.

C R P 274. Planning Analysis and Techniques II.
(2-2) Cr. 3. S. Prereq: 272
Use of quantitative methods for analysis of population, land use, economic and transportation make-up of a community; activities and location, intensity, and timing of land uses and public services. Student’s oral and graphic presentation of analytical results. Laboratory emphasizes practical uses and computer applications for data analysis.

C R P 291. World Cities and Globalization.
(Cross-listed with DSN S. (3-0) Cr. 3. F. Prereq: Sophomore classification
World cities and globalization in developed and developing countries. Topics include globalization, world cities and regions, uneven economic development, the international division of labor, multinational corporations, international environmentalism, tourism, popular culture and place-based identity.

Meets International Perspectives Requirement

C R P 293. Environmental Planning.
(Cross-listed with DSN S, ENV S. (3-0) Cr. 3. F. Prereq: Sophomore classification
Comprehensive overview of the field of environmental relationships and the efforts being made to organize, control, and coordinate environmental, aesthetic, and cultural characteristics of land, air, and water.

C R P 320. Urban Form.
(Cross-listed with DSN S. (3-0) Cr. 3. F. Prereq: Sophomore classification
Examines how urban form is shaped, what constitutes good urban form, and what are the trends in emerging urban forms. Descriptive, explanatory and normative theories of urban form, and the relationships between urban form and social, economic, political, cultural, and institutional forms.

C R P 330. Practicum.
Cr. 1-3. Repeatable. F.S.S. Prereq: Major in community and regional planning
Structured work experience under close supervision of a professional planner. Practical planning experience; relationships between theory and practice, professional responsibilities, and the scope of various planning roles.
C R P 331. Professional Practice Seminar.
(Dual-listed with 531). (1-0) Cr. 1. S. Prereq: Major in community and regional planning
Preparation for working in a planning office; discussion of expectation of employer; presentations from planning professionals, and discussion of differences/similarities between public and private planning offices. Offered on a satisfactory-fail basis only.

C R P 332. Community Planning Studio I.
(2-4) Cr. 4. F. Prereq: 253, 274
Application of planning methods and skills to issue identification and investigation. Introduction to problem formulation, study, and analysis in a community setting.

C R P 376. Rural, Urban and Regional Economics.
(Cross-listed with ECON). (3-0) Cr. 3. Prereq: ECON 101
Firm location with respect to regional resources, transport, scale economies, externalities, and policies. Measures of local comparative advantage and specialization. Spatial markets. Population location considering jobs, wages, commuting, and local amenities. Business, residential, and farm land use and value. Migration. Other topics may include market failure, regulation, the product cycle, theories of rural and urban development, developmental policy, firm recruiting, local public goods and public finance, schools, poverty, segregation, and crime. Nonmajor graduate credit.

(3-0) Cr. 3. S. Prereq: 253, junior status
The nature of planning and its relation to social and economic planning: levels of planning, place of planning in decision making; steps in the planning process, uses and limitation of knowledge in planning, relation of facts and values.

C R P 391. Field Travel.
Cr. 1-2. Repeatable. F.S.SS. Prereq: CRP major and permission of instructor
Observation of professional practice and community or regional problems and issues. Offered on a satisfactory-fail basis only.

C R P 410. Professional Work Experience.
Cr. R. F.S.SS. Prereq: Permission of department chair
Approved professional work experience.

C R P 416. Urban Design and Practice.
(Dual-listed with 516). (3-6) Cr. 6. S. Prereq: 253 or 270
Principles of urban design and their application to residential and commercial development in studio projects.

C R P 417. Urban Revitalization.
(Dual-listed with 517). (Cross-listed with DSN S). (3-0) Cr. 3. Alt. S., offered 2012. Prereq: 253 or 270
Planning methods available to further revitalization and preservation efforts, with particular attention to housing and neighborhoods. Relationship between neighborhood change and urban development process; public policy implications.

C R P 425. Growth Management.
(Dual-listed with 525). (Cross-listed with DSN S). (3-0) Cr. 3. Alt. F., offered 2011. Prereq: Junior classification
Review of techniques used to manage growth-related change and to implement plans. Capital investment strategies; public land acquisition and protection; development impact analysis; impact mitigation, including impact fees; phased growth systems; urban, suburban and rural relationships; and land preservation.

(Dual-listed with 529). (Cross-listed with DSN S). (3-0) Cr. 3. S. Prereq: Junior classification
Introduction to issues in planning and governance in an international setting. Problems and strategies may include population movement and change, economic globalization, urban growth, rural development, and housing.

C R P 432. Community Planning Studio II.
(1-6) Cr. 4. F.S.SS. Prereq: 332, 383

(Dual-listed with 535). (3-0) Cr. 3. Alt. F., offered 2012. Prereq: 253, 270, or junior classification
Contemporary planning problems in small towns and the design of viable strategies to enhance their social and economic position in today’s society.

C R P 442. Site Development.
(Dual-listed with 542). (Cross-listed with DSN S). (3-0) Cr. 3. Alt. S., offered 2012. Prereq: 253, 272
Introduction to site analysis using landscape architecture and environmental principles, drawing also on basic engineering concepts. Work will evolve from analysis to land development design.

(Dual-listed with 545). (3-0) Cr. 3. F. Prereq: E C 350 or equivalent
Comprehensive overview of key policy issues related to transportation planning and investment in the United States and abroad. Policy issues explored include safety, environmental impact, sustainable communities, and economic development. Policy analysis and planning are studied in conjunction with each policy issue explored. Issues of concern to state, metropolitan, and local governments.

(Dual-listed with 551). (2-2) Cr. 3. F.S.SS.
Introduction to geographic information systems, including discussions of GIS hardware, software, data structures, data acquisition, data conversion, data presentation, analytical techniques, and implementation procedures. Laboratory emphasizes practical applications and uses of GIS.

C R P 452. Geographic Data Management and Planning Analysis.
(Dual-listed with 552). (2-2) Cr. 3. F.S.SS. Prereq: C R P 451 or equivalent
Extensive coverage of geo-relational database concept and design, GIS database creation and maintenance, geographic data manipulation and analysis. GIS output generation and geographic data presentation. Laboratory emphasizes practical applications and uses of GIS.

C R P 455. Community Economic Development.
(Dual-listed with 555). (3-0) Cr. 3. Alt. F., offered 2011. Prereq: Sophomore classification
The nature and process of economic development in the context of community development. Recent changes and trends and their implications for local and regional development. Selected case studies and applications. Contemporary community economic development issues.

C R P 475. Grant Writing.
(Dual-listed with 575). (1-0) Cr. 1. F. Prereq: 253 or 270 and junior classification
A short introduction to effective grant writing for the public and non-profit sectors. Includes identifying appropriate funding sources for an organization, identifying goals and objectives, and budgeting.

C R P 481. Regional and State Planning.
(Dual-listed with 581). (3-0) Cr. 3. Alt. S., offered 2012. Prereq: 253 or 270
Analysis of theories, policies, and functions at the metropolitan, regional, and state levels with emphasis on area-wide governance structures and strategies for guiding development.

C R P 484. Sustainable Communities.
(Dual-listed with 584). (Cross-listed with DSN S, ENV S). (3-0) Cr. 3. Alt. S., offered 2013. Prereq: Junior classification
C R P 490. Independent Study.
Cr. 1-3. Repeatable. F.S.S. Prereq: Written approval of instructor and department chair on required form
Investigation of an approved topic commensurate with student’s interest and ability. Offered on a satisfactory-fail basis only.

H. Honors

(Dual-listed with 591). (Cross-listed with DSN S, ENV S, L Al). (3-0) Cr. 3. S. Prereq: 6 credits in natural sciences
Environmental law and policy as applied in planning at the local and state levels. Brownfields, environmental justice, water quality, air quality, wetland and floodplain management, and local government involvement in ecological protection through land use planning and other programs.

C R P 492. Planning Law, Administration and Implementation.
(3-0) Cr. 3. F. Prereq: 383
The basis in constitutional, common, and statutory law for the powers of plan effectuation. Problems of balancing public and private interests as revealed in the study of leading court cases. Administration of planning agencies and programs.

C R P 494. Senior Seminar in Planning.
Cr. 1-3. Repeatable, maximum of 2 times. F.S.S. Prereq: Senior classification. 332 should be taken prior to or concurrently.
An advanced forum for seniors that focuses upon recent trends and important issues affecting planning today. Topics addressed will vary. A demonstration of understanding of current issues and their effects upon planning applications is expected.

C R P 498. Portfolio Development and Review.
(1-0) Cr. 1. F.S.
Should be taken in the final semester of the planning program. Preparation of a portfolio of student work that represents student learning throughout the entire planning program.

C R P 510. Professional Work Experience.
Cr. R. F.S.S. Prereq: Permission of department chair
Approved professional work experience.

C R P 516. Urban Design Practice.
(Dual-listed with 416). (3-6) Cr. 6. S. Prereq: Graduate classification
Principles of urban design and their application to residential and commercial development in studio project.

C R P 517. Urban Revitalization.
(Dual-listed with 417). (Cross-listed with DSN S). (3-0) Cr. 3. Alt. S., offered 2012. Prereq: Graduate classification
Planning methods available to further revitalization and preservation efforts, with particular attention to housing and neighborhoods. Relationship between neighborhood change and urban development process; public policy implications.

C R P 519. Middle Eastern Cities.
(Cross-listed with ARCH). (3-0) Cr. 3. F. Prereq: Graduate or senior standing
Introduction to basic academic writings on Middle Eastern cities in addition to other contemporary cultural productions of the region. Study of various aspects of Middle Eastern life and the built environments that this life produces.

C R P 525. Growth Management.
(Dual-listed with 425). (Cross-listed with DSN S). (3-0) Cr. 3. Alt. F., offered 2011. Prereq: Graduate classification
Review of techniques used to manage growth-related change and to implement plans. Capital investment strategies; public land acquisition and protection; development impact analysis; impact mitigation, including impact fees; phased growth systems; urban, suburban, rural relationships; and land preservation.

C R P 529. International Planning.
(Dual-listed with 429). (Cross-listed with DSN S). (3-0) Cr. 3. S. Prereq: Graduate classification
Introduction to issues in planning and governance in an international setting. Problems and strategies may include population movement and change, economic globalization, urban growth, rural development, and housing.

C R P 530. Practicum.
Cr. 1-3. Repeatable. F.S.S. Prereq: Graduate classification in community and regional planning
Practical planning experience. Structured work in range of tasks under close supervision of a professional planner. Relationships between theory and practice, exposure to variety of roles in functioning specialties. Offered on a satisfactory-fail basis only.

C R P 531. Professional Practice Seminar.
(Dual-listed with 331). (1-0) Cr. 1. S. Prereq: Graduate classification
Preparation for working in a planning office; discussion of expectations of employer; presentations from planning professionals, and discussion of differences and similarities between public and private planning offices. Offered on a satisfactory-fail basis only.

C R P 532. Community Planning Studio.
(1-4) Cr. 3. F.S. Prereq: 564 or equivalent
Comprehension and analysis of various geographic contexts pertinent to community planning and the use of planning theory, tools and techniques in an applied setting. Process of making a community plan: historical patterns, current conditions and strategies for planning.

(Dual-listed with 435). (3-0) Cr. 3. Alt. F., offered 2012. Prereq: Graduate classification
Contemporary planning problems in small towns and the design of viable strategies to enhance their social and economic position in today’s society.

C R P 542. Site Development.
(Dual-listed with 442). (Cross-listed with DSN S). (3-0) Cr. 3. Alt. S., offered 2012. Prereq: Graduate classification
Introduction to site analysis using landscape architecture and environmental principles, but drawing also on basic engineering concepts. Work will evolve from analysis to land development design based on that analysis.

C R P 545. Transportation Policy Planning.
(Dual-listed with 445). (3-0) Cr. 3. F. Prereq: Graduate classification
Comprehensive overview of key policy issues related to transportation planning and investment in the United States and abroad. Policy issues explored include safety, environmental impact, sustainable communities, and economic development. Tools like policy analysis and planning are studied in conjunction with each policy issue explored. Issues of concern to state, metropolitan, and local governments.

C R P 551. Introduction to Geographic Information Systems.
(Dual-listed with 451). (2-2) Cr. 3. F.S.SS.
Introduction to geographic information systems, including discussions of GIS hardware, software, data structures, data acquisition, data conversion, data presentation, analytical techniques, and implementation procedures. Laboratory emphasizes practical applications and uses of GIS.

C R P 552. Geographic Data Management and Planning Analysis.
(Dual-listed with 452). (2-2) Cr. 3. S. Prereq: 561
Extensive coverage of geo-relational database concept and design, GIS database creation and maintenance, geographic data manipulation and analysis. GIS output generation and geographic data presentation. Laboratory emphasizes practical applications and uses of GIS.
C R P 553. Analytical Planning/GIS.  
(2-2) Cr. 3. F. Prereq: 451/551  
Integration of exploratory, participatory and predictive spatial analyses and 3D visualization into the planning process. GIS tools and techniques are used to automate decision analysis and facilitate future planning in analyzing and visualizing planning actions. Laboratory emphasizes practical uses of GIS tools and techniques.

(Dual-listed with 455). (3-0) Cr. 3. Alt. F., offered 2011. Prereq: Graduate classification  
The nature and process of economic development in the context of community development. Recent changes and trends and their implications for local and regional development. Selected case studies and applications. Contemporary community economic development issues.

C R P 561. Planning Theory for Practice.  
(3-0) Cr. 3. S.  
Use and development of theory/fact relationship in planning practice. Competing normative theories of planning and their evolution, key components and fundamental critiques. Exploration of planning frameworks and approaches, including comprehensive planning; incrementism; advocacy; communicative rationality; and others.

C R P 563. Planning the American Metropolis.  
(3-0) Cr. 3. F.  
Focus on the historical role of planning in the shaping of American cities and regions, from the beginning of the Republic to the present. Examine the legacy of planning by exploring the intersection of design, politics and policy. Investigate the factors and the processes that produce the built environment.

C R P 564. Introduction to Analytical Methods for Planning.  
(3-0) Cr. 3. F.  
Applications of analytical methods in planning with emphasis on the collection, description, analysis, presentation, and interpretation of planning data. Introduction to descriptive statistics. Sources of planning information and data including primary and secondary data types and sources. Demographic analysis, population projection techniques for planning at local and regional levels.

C R P 566. Values and Decision Making.  
(3-0) Cr. 3. F.  
Principles and methods for analyzing communities and regions as social political, economic, and ecological systems. Exploration of relationships between individuals and institutions, the economy and governance. Examination of social values and their manifestation in decision making methods used in planning. Application of decision making tools for planning problems involving economic analysis, power relations, environmental impacts and social impacts. Project evaluation methods.

C R P 568. Planning and Development.  
(3-0) Cr. 3. S. Prereq: 564 or equivalent  
Exploration and evaluation of the techniques, processes, and professional skills required to effectively manage land use change at various scales. Land classification systems; land supply and needs inventory for residential uses and commercial and employment centers; capacity and needs analysis for public infrastructure. Includes land use planning project(s) designed to apply the methods explored in this and other courses.

C R P 575. Grant Writing.  
(Dual-listed with 475). (1-0) Cr. 1. F. Prereq: Graduate classification  
A short introduction to effective grant writing for the public and non-profit sectors. Includes identifying appropriate funding sources for an organization, identifying goals and objectives, and budgeting.

C R P 581. Regional and State Planning.  
(Dual-listed with 481). (3-0) Cr. 3. Alt. S., offered 2012. Prereq: Graduate classification  
Analysis of theories, policies, and functions at the metropolitan, regional, and state levels with emphasis on area-wide governance structures and strategies for guiding development.

C R P 584. Sustainable Communities.  
(Dual-listed with 484). (Cross-listed with DSN S). (3-0) Cr. 3. Alt. S., offered 2013. Prereq: Graduate classification  

C R P 590. Special Topics.  
Cr. 1-3. Repeatable. F.S.SS. Prereq: Graduate classification and written approval of instructor and department chair on required form  
A. Planning Law, Administration and Implementation  
B. Economic Development  
C. Urban Design  
D. Housing and Urban Revitalization  
H. Environmental Planning  
I. Land Use and Transportation Planning  
N. International Planning  
O. Spatial Analytical Methods  
P. Planning in Small Towns  
Q. Diversity and Equity in Planning  
R. Geographic Information Systems

(Dual-listed with 491). (Cross-listed with DSN S, L A). (3-0) Cr. 3. S. Prereq: Graduate classification  
Environmental law and policy as applied in planning at the local and state levels. Brownfields, environmental justice, water quality, air quality, wetland and floodplain management, and local government involvement in ecological protection through land use planning and other programs.

C R P 592. Land Use and Development Regulation Law.  
(3-0) Cr. 3. F.  
An in-depth analysis of the legal constructs that shape the practice of planning and plan implementation in the United States. An exploration of how land use regulations are applied to reconcile the competing needs and diverse uses of land. The positive and negative consequences of developing and implementing regulatory controls will be addressed.

C R P 595. Seminar in GIS Applications/Research.  
(1-0) Cr. 1. F. S. Prereq: 9 credits in GIS Certificate program  
Discussion and demonstration of current GIS applications and research in multiple disciplines. Offered on a satisfactory-fail basis only.

Cr. arr. Repeatable. F.S.SS.  
Independent student research on planning topic. The course will serve as a capstone experience for the student, demonstrating ability to integrate planning knowledge and skills in the practical application of the student’s abilities on a current planning issue. The completed report must be submitted to and approved by the POS committee as evidence of the mastery of the principles of community and regional planning.

C R P 698. Capstone Studio.  
(1-6) Cr. 4. S. Prereq: Permission of instructor.  
Synthesis and integration of core planning knowledge into professional work in a team setting.

C R P 699. Research.  
Cr. arr. Repeatable. F.S.SS.
**Complex Adaptive Systems**

**Interdepartmental Graduate Minor**

The Complex Adaptive Systems (CAS) minor provides graduate students with an understanding of the interrelationships among the various methodologies often collectively referred to as Artificial Life. Of special importance in the program is the interplay of biological principles and computer simulations in various fields including Economics, Engineering, Mathematics, and Biology.

Graduates understand the ways in which artificial life techniques may be applied to their major field of study. They have an appreciation and understanding of the cross-disciplinary aspects of artificial life techniques. Students who complete a minor in this graduate program are able to describe and report on various artificial life techniques as applied to many fields, even outside their own field of application.

Work in the CAS minor is offered for students pursuing any graduate degree. The primary cooperating departments are Economics; Computer Science; Electrical and Computer Engineering; Mechanical Engineering; Mathematics; Psychology; Ecology, Evolution, and Organismal Biology; and Genetics, Development and Cell Biology.

Each student’s Masters Program of Study (POS) must include at least 9 CAS relevant course credits chosen in consultation with the student’s POS committee and the CAS program, plus two credits (one credit each time taken) of the CAS seminar and three credits of CAS 503 Complex Adaptive Systems Concepts and Techniques. Each student’s Ph.D. POS must include at least 12 CAS relevant courses credits chosen in consultation with the student’s POS committee and the CAS program, plus two credits (one credit each time taken) of the CAS seminar and three credits of CAS 503 Complex Adaptive Systems Concepts and Techniques. Ph.D. students who also minored in CAS at the master’s level must take one additional CAS relevant course (3 cr.) and two additional credits of CAS seminar. Courses that satisfy CAS requirements may also be used to satisfy major requirements if such “double counting” is acceptable to the major program.

Interested students may contact the chairperson of the advisory committee for complete lists of courses and of CAS faculty members.

**Courses primarily for graduate students, open to qualified undergraduate students**

**CAS 502. Complex Adaptive Systems Seminar.**
(Cross-listed with COM S) (1-0) Cr. 1. F.S. Prereq: Admission to CAS minor
Understanding core techniques in artificial life is based on basic readings in complex adaptive systems. Techniques of complex system analysis methods including: evolutionary computation, neural nets, agent based simulations (agent based computational economics). Large-scale simulations are to be emphasized, e.g. power grids, whole ecosystems.

**CAS 503. Complex Adaptive Systems Concepts and Techniques.**
(Cross-listed with COM S) (3-0) Cr. 3. S. Prereq: Admission to CAS minor or related field
Survey of complex systems and their analysis. Examples are drawn from engineering, computer science, biology, economics and physics.
Interdepartmental Undergraduate Program
http://www.design.iastate.edu

The Design Studies program brings together courses that deal with the integrated study of the conceptualization, production, visible form, uses, and history of artifacts, buildings, and environments as well as the common qualities and connections among the design fields. Students in any college may elect to take any of the minors offered by then Design Studies.

Core Design Program

Three Design Studies courses -- Design Studio 1 (DsnS 102), Design Representation (DsnS 131), and Design Cultures (DsnS 183) are part of the Core Design Program, which is required for all undergraduate students in the College of Design.

Minor—Critical Studies in Design

The undergraduate minor in Critical Studies in Design offers students opportunities to engage the history, theory and criticism of visual and material culture. In lectures and focused seminars, students explore historical and contemporary issues, including cultural production, the built environment, media and technology, design in everyday life, and models of professional practice. The minor is open to all undergraduates at Iowa State University.

Minor—Design Studies

The undergraduate minor in Design Studies is constructed to facilitate design awareness among interested students and to provide a vehicle for multi-disciplinary study within the College of Design. This minor is open to all undergraduate students at Iowa State University.

Minor—Digital Media

The undergraduate minor in Digital Media covers the knowledge and techniques for applying digital representations to generate designs and art. The body of knowledge specializes in the fields of art, design, and planning. This minor is open to all undergraduate students at Iowa State University.

Additional information about minors is available in the Student Programs and Services Office, 297 College of Design.

Courses primarily for undergraduate students

DSN S 102. Design Studio I.
(1-6) Cr. 4.
A core design studio course exploring the interaction of two-and three-dimensional design. Emphasis on fundamental skills and ideas shared across design disciplines. Investigation of creative process, visual order and materials, and development of critical thinking through studio projects and lectures. Includes study of precedents, contemporary design practices and disciplines in their cultural contexts.

DSN S 110. Design Exchange Seminar I.
(0-2) Cr. 1. F. Prereq: Member of Design Exchange Learning Community Orientation to the College of Design. Introduction to the design disciplines and studio pedagogy. Offered on a satisfactory-fail basis only.

DSN S 111. Design Exchange Seminar II.
(0-2) Cr. 1. S. Prereq: Member of the Design Exchange Learning Community Development and clarification of career and academic plans. Offered on a satisfactory-fail basis only.

DSN S 115. Design Collaborative Seminar.
(1-0) Cr. 0.5. Prereq: Member of Design Collaborative Learning Community Orientation to the College of Design. Introduction to the design disciplines and studio pedagogy. Offered on a satisfactory-fail basis only.

DSN S 131. Design Representation.
(1-6) Cr. 4.
An introduction to drawing through lecture and studio experiences. Focus on creative problem solving and communication in order to give visual form to ideas. Emphasis on perceptual, conceptual, and evaluative abilities through experiences that build eye, brain, and hand coordination. Explorations include drawing from observation and memory, working at various scales and duration, and using a variety of media and processes.

(Cross-listed with ART H). (3-0) Cr. 3. F.
History of designed artifacts, their creators, and their cultural environments in Western Europe and America from the beginning of the Industrial Revolution to the present.

DSN S 183. Design Cultures.
(3-0) Cr. 3.
A broad-based exploration of the dynamic relationship between design and culture, employing case study method to investigate particular examples of cultural production in contemporary society. Design processes and design works are presented as culturally, economically, environmentally, historically, ideologically, politically, and socially grounded events and artifacts.

DSN S 221. History of Western Architecture I.
(Cross-listed with ARCH). (3-0) Cr. 3. F.
Introductory survey with emphasis on the cultural, visual, natural, and constructed context. Ancient through Renaissance.
Meets International Perspectives Requirement.

DSN S 222. History of Western Architecture II.
(Cross-listed with ARCH). (3-0) Cr. 3. S.
Introductory survey with emphasis on the cultural, visual, natural, and constructed context. Renaissance to present.
Meets International Perspectives Requirement.

(3-0) Cr. 3.
Open to all university majors. Introductory investigations of various digital design media to develop multi-dimensional problem solving, digital communication skills and perceptual sensitivity.

DSN S 270. Forces Shaping Our Metropolitan Environment.
(Cross-listed with C R P). (3-0) Cr. 3. S.
Must be taken prior to completing 9 credits in C R P. Introduction to the social, political, physical, and economic forces as they shape metropolitan areas. A comprehensive picture of metropolitan development showing important roles other urban disciplines play in the planning process and the interrelationships of the disciplines.
Meets U.S. Diversity Requirement

DSN S 274. The Social and Behavioral Landscape.
(Cross-listed with L A). (3-0) Cr. 3. S.
Exploration of social and behavioral factors pertinent to design of the domestic, civic, and commercial landscape. Focus on working familiarity with design principles as they relate to the behavior and activities of people across a broad demographic and cultural spectrum; application of these principles to design of outdoor environments. Lectures and discussions, including group exercises and field trips.
Meets U.S. Diversity Requirement
DSN S 280. History of Art I.  
(Cross-listed with ART H). (3-0) Cr. 3. F.  
Development of the visual arts of western civilization including painting, sculpture, architecture, and crafts; from prehistoric through Gothic.  
Meets International Perspectives Requirement.  
H. Honors. Cr. 4.

DSN S 281. History of Art II.  
(Cross-listed with ART H). (3-0) Cr. 3. S.  
Development of the visual arts of western civilization including painting, sculpture, architecture, and crafts; from the Renaissance to the twentieth century.  
Meets International Perspectives Requirement.  
H. Honors. Cr. 4.

DSN S 291. World Cities and Globalization.  
(Cross-listed with C R P). (3-0) Cr. 3. Alt. F., offered 2012. Prereq: Sophomore classification  
World cities and globalization in developed and developing countries. Topics include globalization, world cities and regions, uneven economic development, the international division of labor, multinational corporations, international environmentalism, tourism, popular culture and place-based identity.  
Meets International Perspectives Requirement.

DSN S 292. Introduction to Visual Culture Studies.  
(Cross-listed with ART H). (3-0) Cr. 3. F.S.  
An introduction to various topics in visual culture studies. The lecture course will provide students with a creative and intellectual context in which to study historical and contemporary instances of the visual in culture. Individual lectures examine significant trends in the visual arts, mass media, scientific imagery, visual communications, and other areas related to visual literacy and visual representation in local and global contexts. Cross cultural viewpoints and issues of diversity will be presented in relation to visual culture and related fields.  
Meets U.S. Diversity Requirement

DSN S 293. Environmental Planning.  
(Cross-listed with C R P, ENV S). (3-0) Cr. 3. F. Prereq: Sophomore classification  
Comprehensive overview of the field of environmental relationships and the efforts being made to organize, control, and coordinate environmental, aesthetic, and cultural characteristics of land, air, and water.

DSN S 301. Study Abroad Preparation Seminar.  
(1-0) Cr. 1. Repeatable.  
Cultural introduction to host country, introduction to faculty sponsor and program of study, the particulars of traveling and living abroad, and financial and logistical preparations. Guest lectures. Required of all students planning to participate in a College of Design study abroad program for 9 or more credits. Offered on a satisfactory-fail basis only.

(1-2) Cr. 2. Repeatable, maximum of 4 credits. Prereq: Selection as a peer mentor for the Core Design program.  
For students serving as peer mentors for the Core Design Program, under faculty supervision. Development of teaching and leadership skills within the context of design education experiences. Offered on a satisfactory-fail basis only.

DSN S 303. Design Ambassadors.  
(1-2) Cr. 1-2. Repeatable, maximum of 4 credits. Prereq: Admittance into one of the professional programs in the College of Design  
Opportunity to strengthen leadership, communication and presentation skills. Introduction to student development theory. Students participate in collaborative projects focused on prospective design students. Offered on a satisfactory-fail basis only.

DSN S 310. Practical Experience.  
Cr. R. Prereq: Permission of adviser or Coordinator of Design Studies  
Independent educational enrichment through practical experience. Students must register for this course prior to commencing each term. Available only to students taking course loads of eleven credits or less.

DSN S 320. Urban Form.  
(Cross-listed with C R P). (3-0) Cr. 3. Alt. S., offered 2013. Prereq: C R P 253 or 270, or permission of instructor  
Examines how urban form is shaped, what constitutes good urban form, and what are the trends in emerging urban forms. Descriptive, explanatory and normative theories of urban form, and the relationships between urban form and social, economic, political, cultural, and institutional forms.

DSN S 321. History of the American City.  
(Cross-listed with ARCH). (3-0) Cr. 3. Prereq: Sophomore classification  
Study of the development of the built environment and urban condition in the United States from the colonial period to today. Through the theme of infrastructure, primary attention is given to urban spatial organization, built form, technological change, regulatory and funding patterns, and social categories such as class, race, and gender.

(Cross-listed with ARCH). (3-0) Cr. 3. S. Prereq: ARCH 202  
Architectural design and technical analysis of residential structures with emphasis on energy construction and solar energy utilization.

DSN S 371. History of Modern Landscapes, 1750 to Present.  
(Cross-listed with L A). (3-0) Cr. 3. S.  
Investigation of landscape design concepts and trends as observed over time, from approximately 1750 to the present, with emphasis on the United States and Europe. Examination of significant figures and outstanding works (sites, gardens, landscapes, monuments, subdivisions, city plans, etc.) of varied geographic regions. Analysis of the social, economic, and technical forces contributing to the development of landscape design styles, vocabulary, and literature. Lectures, readings, projects, research papers.

DSN S 373. Gardens and Landscapes, Antiquity to 1750.  
(Cross-listed with L A). (3-0) Cr. 3. F.  
Investigation of international landscape design concepts and trends as observed over time, from pre-history to the mid 18th century. Examination of significant figures and outstanding works (sites, gardens, landscapes, monuments, subdivisions, city plans, etc.) of varied geographic regions. Analysis of the social, economic, political, and technical forces contributing to the development of landscape design styles, vocabulary, and literature. Lectures, readings, projects, research papers.

(Dual-listed with 582). (Cross-listed with ART H). (3-0) Cr. 3.  
Introduction to the history of art and architecture in Asia. Countries may include China, Korea, Japan and India before the modern era. Visual materials selected based on important themes that are critical in understanding East Asian culture and art tradition. Nonmajor graduate credit.

DSN S 383. Greek and Roman Art.  
(Dual-listed with 583). (Cross-listed with ART H, CL ST). (3-0) Cr. 3.  
Greek art from Neolithic and Hellenistic periods. Roman art from the traditional founding to the end of the empire in the West. Nonmajor graduate credit.

H. Honors (3-4 cr.)

DSN S 385. Renaissance Art.  
(Dual-listed with 585). (Cross-listed with ART H). (3-0) Cr. 3.  
European art including painting, sculpture, architecture, and crafts; thirteenth through sixteenth centuries. Nonmajor graduate credit.

H. Honors Cr. 3-4
evolve from analysis to land development design.

**Introduction to site analysis using landscape architecture and environmental principles, drawing also on basic engineering concepts. Work will evolve from analysis to land development design.**

Meets U.S. Diversity Requirement

**DSN S 397. Internship Search Seminar.**

(1-0) Cr. 1. F. Prereq: Sophomore classification or above in one of the College of Design degree programs

A structured environment to set realistic learning goals, research potential sites, develop a strategy, develop essential job search materials and skills for finding an internship. Successfully obtaining an internship either for credit or non credit is encouraged but not required. Offered on a satisfactory-fail basis only.

**DSN S 404. Advanced Landscape Architectural Design.**

(Cross-listed with L A). (1-15) Cr. 6. Repeatable, maximum of 2 times. S. Prereq: L A 401

Advanced forum for the demonstration of sophistication in landscape architectural design. Experimentation and innovation are encouraged.

H. Honors Cr. 6-7

**DSN S 417. Urban Revitalization.**

(Dual-listed with 517). (Cross-listed with C R P). (3-0) Cr. 3. Alt. S., offered 2012. Prereq: C R P 253 or 270

Planning methods available to further revitalization and preservation efforts, with particular attention to housing and neighborhoods. Relationship between neighborhood change and urban development process; public policy implications.

**DSN S 425. Growth Management.**

(Dual-listed with 525). (Cross-listed with C R P). (3-0) Cr. 3. F. Prereq: Junior classification

Review of techniques used to manage growth-related change and to implement plans. Capital investment strategies; public land acquisition and protection; development impact analysis; impact mitigation, including impact fees; phased growth systems; urban, suburban and rural relationships; and land preservation.

**DSN S 426. Topics in Native American Architecture.**

(Cross-listed with AM IN, ARCH). (3-0) Cr. 3. Repeatable, maximum of 6 credits. Prereq: Junior classification

History, theory, and principles of Native American/Indian architecture, landscape architecture and planning considering relationships to the culture, visual arts, sites, and surroundings. Credit counts toward fulfillment of Studies in Architecture and Culture, and non-Western history requirements. Nonmajor graduate credit. A maximum of 6 credits of Arch 426 may be applied to degree program.

Meets U.S. Diversity Requirement

**DSN S 429. International Planning.**

(Dual-listed with 529). (Cross-listed with C R P). (3-0) Cr. 3. S. Prereq: Junior classification

Introduction to issues in planning and governance in an international setting. Problems and strategies may include population movement and change, economic globalization, urban growth, rural development, and housing.

**DSN S 442. Site Development.**

(Dual-listed with 542). (Cross-listed with C R P). (3-0) Cr. 3. Alt. S., offered 2012. Prereq: C R P 253, 272

Introduction to site analysis using landscape architecture and environmental principles, drawing also on basic engineering concepts. Work will evolve from analysis to land development design.

**DSN S 446. Interdisciplinary Design Studio.**

(Dual-listed with 546). (0-12) Cr. 4-6. Repeatable, maximum of 18 credits. Prereq: Junior classification in a curriculum in the College of Design and permission of instructor

Advanced interdisciplinary design projects.

H. Honors. Cr. 5-7

**DSN S 478. Topical Studies in Landscape Architecture.**

(Dual-listed with 578). (Cross-listed with L A). Cr. 2-3. Repeatable, maximum of 3 times. F.S.S. Prereq: L A 371 or senior classification or graduate standing

Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

A. Landscape Design
B. Planting Design
C. Construction
D. History, Theory, Criticism
E. Landscape Planning
F. Urban Design
G. Graphics
H. Honors
I. Interdisciplinary Studies
J. International Studies
K. Computer Applications
L. Ecological Design
M. Social, Behavioral
N. Natural Resources

**DSN S 481. Art and Architecture of India.**

(Dual-listed with 581). (Cross-listed with ART H). (3-0) Cr. 3. Survey of Indian-style art and architecture through history. Examine how art and architecture developed in the Indian world has come to define the Indian identity religiously, culturally, socially, and politically. Nonmajor graduate credit.

Meets International Perspectives Requirement.

**DSN S 484. Sustainable Communities.**

(Dual-listed with 584). (Cross-listed with C R P, ENV S). (3-0) Cr. 3. Alt. S., offered 2013. Prereq: Junior classification

**DSN S 486. Design: Made in Italy.**

(Cross-listed with ARCH). (3-0) Cr. 3

An investigation of the history of Italian design in its contemporary form as part of International Study Abroad Program in Rome.

**DSN S 487. Nineteenth Century Art.**

(Dual-listed with 587). (Cross-listed with ART H). (3-0) Cr. 3. European and American art and architecture from 1780 to 1900 focusing on the major movements of western Europe, including Neo-Classicism, Romanticism, Realism, Impressionism, and Post-Impressionism. Nonmajor graduate credit.

**DSN S 488. Modern Art and Theory I.**

(Dual-listed with 588). (Cross-listed with ART H). (3-0) Cr. 3. Visual arts and critical theory of the early 20th century, including Expressionism, Cubism, Futurism, Suprematism, Dada, and Surrealism. Nonmajor graduate credit.

**DSN S 489. Sequential Art.**

(Dual-listed with 589). (Cross-listed with ART H). (3-0) Cr. 3. F.S.S

An art-historical survey of comic strips, comic books, and graphic novels from their origins in the 19th century to the present. Nonmajor graduate credit.

H. Honors Cr. 3-4
DSN S 490. Independent Study.
Cr. 1-4. Repeatable, maximum of 9 credits. Prereq: Written approval of instructor and department chair on required form prior to semester of enrollment
Independent investigation of a topic of special interest to the student.
A. History
B. Technology
C. Communications
D. Design
E. Entrepreneurship
F. Social/Behavioral
H. Honors

(Dual-listed with 591). (Cross-listed with C R P, ENV S, L A). (3-0) Cr. 3. S. Prereq: 6 credits in natural sciences
Environmental law and policy as applied in planning at the local and state levels. Brownfields, environmental justice, water quality, air quality, wetland and floodplain management, and local government involvement in ecological protection through land use planning and other programs.

DSN S 492. Special Topics: Italian Culture.
Cr. 1. Repeatable, maximum of 3 credits. Prereq: Enrollment in the College of Design Rome Study Abroad Program or in DSN S 301
Introduction to Italian contemporary culture, including language, fashion, politics, media, and social mores. Taught the semester prior and during study in Rome for students in the College of Design Rome program.

DSN S 495. Art and Theory Since 1945.
(Dual-listed with 595). (Cross-listed with ART H). (3-0) Cr. 3.
Visual arts and critical theory from Abstract Expressionism to the present. Nonmajor graduate credit.
Meets U.S. Diversity Requirement

DSN S 496. History of Photography.
(Dual-listed with 596). (Cross-listed with ART H). (3-0) Cr. 3.
Survey of the evolution of photography and photojournalism from the 1830s to the present, seen from an art historical perspective, emphasizing causative factors, cultural influences, and major masters and schools. Nonmajor graduate credit.

DSN S 498. Selected Topics in Art History.
(Dual-listed with 598). (Cross-listed with ART H). (3-0) Cr. 3. Repeatable, maximum of 9 credits.
Specialized study in the history or criticism of art and design. Course primarily for graduate students open to qualified undergraduate students.

Courses primarily for graduate students, open to qualified undergraduate students

DSN S 517. Urban Revitalization.
(Dual-listed with 417). (Cross-listed with C R P). (3-0) Cr. 3. Alt. S., offered 2012. Prereq: Graduate Classification
Planning methods available to further revitalization and preservation efforts, with particular attention to housing and neighborhoods. Relationship between neighborhood change and urban development process; public policy implications.

DSN S 525. Growth Management.
(Dual-listed with 425). (Cross-listed with C R P). (3-0) Cr. 3. Alt. F., offered 2011. Prereq: Graduate classification
Review of techniques used to manage growth-related change and to implement plans. Capital investment strategies; public land acquisition and protection; development impact analysis; impact mitigation, including impact fees; phased growth systems; urban, suburban, rural relationships; and land preservation.

(Cross-listed with ARCH). (3-0) Cr. 2-3. Repeatable, maximum of 6 times. F.S.S. Prereq: ARCH 221, 222 or senior classification or graduate standing
A. Studies in Architecture and Culture
B. Technology
C. Communications
D. Design
E. Practice

DSN S 529. International Planning.
(Dual-listed with 429). (Cross-listed with C R P). (3-0) Cr. 3. S. Prereq: Graduate classification
Introduction to issues in planning and governance in an international setting. Problems and strategies may include population movement and change, economic globalization, urban growth, rural development, and housing.

DSN S 532. Community Planning Studio.
(Cross-listed with C R P). (1-4) Cr. 3. F. Prereq: C R P 564 or equivalent.
Comprehension and analysis of various geographic contexts pertinent to community planning and the use of planning theory, tools and techniques in an applied setting. Process of making a community plan: historical patterns, current conditions and strategies for planning.

DSN S 542. Site Development.
(Dual-listed with 442). (Cross-listed with C R P). (3-0) Cr. 3. S. Prereq: Graduate classification
Introduction to site analysis using landscape architecture and environmental principles, but drawing also on basic engineering concepts. Work will evolve from analysis to land development design based on that analysis.

DSN S 546. Interdisciplinary Design Studio.
(Dual-listed with 446). (0-12) Cr. 4-6. Repeatable, maximum of 18 credits. Prereq: Admission to a graduate program in the College of Design and permission of instructor
Advanced interdisciplinary design projects.

DSN S 558. Sustainability and Green Architecture.
(Cross-listed with ARCH). (3-0) Cr. 3. F. Prereq: Graduate standing
Issues of Sustainability as related to living patterns and city design, population, pollution and use and availability of natural resources for the built environment; Issues of Green Architecture as it relates to building material selection, systems of building materials, the environment of the United States and the World, architects and examples of buildings with green or sustainable designations.

DSN S 563. Planning and the American Metropolis.
(Cross-listed with C R P). (3-0) Cr. 3. F. Focus on the historical role of planning in the shaping of American cities and regions, from the beginning of the Republic to the present. Examine the legacy of planning by exploring the intersection of design, politics and policy. Investigate the factors and the processes that produce the built environment.

DSN S 566. Values and Decision Making.
(Cross-listed with C R P). (3-0) Cr. 3. F. Principles and methods for analyzing communities and regions as social political, economic, and ecological systems. Exploration of relationships between individuals and institutions, the economy and governance. Examination of social values and their manifestation in decision making methods used in planning. Application of decision making tools for planning problems involving economic analysis, power relations, environmental impacts and social impacts. Project evaluation methods.
DSN S 567. Preservation, Restoration, and Rehabilitation.
(Cross-listed with ARCH). (3-0) Cr. 3. S. Prereq: Senior classification
Construction standards and procedures for preserving, restoring, reconstructing, and rehabilitating existing buildings following the guidelines of the National Park Service and the National Trust for Historic Preservation. Credit counts toward fulfillment of Studies in Architecture and Culture requirements.

DSN S 571. Design for All People.
(Cross-listed with ARCH, GERON). (3-0) Cr. 3. S. Prereq: Senior classification or graduate standing
Principles and procedures of universal design in response to the varying ability level of users. Assessment and analysis of existing buildings and sites with respect to standards and details for accessibility for all people, including visually impaired, mentally impaired, and mobility restricted users. Design is neither a prerequisite nor a required part of the course. Enrollment open to students majoring in related disciplines. Credit counts toward fulfillment of Studies in Architecture and Culture requirements.

DSN S 575. Contemporary Urban Design Theory.
(Cross-listed with ARCH). (3-0) Cr. 3. S. Prereq: Senior classification or graduate standing
Current urban design theory and its application to urban problems. Credit counts toward fulfillment of Studies in Architecture and Culture requirements.

DSN S 578. Topical Studies in Landscape Architecture.
(Dual-listed with 478). (Cross-listed with L A). (3-0) Cr. 2-3. Repeatable. F.S.S. Prereq: Senior Classification or graduate standing
Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

A. Landscape Design
B. Planting Design
C. Construction
D. History, Theory, Criticism
E. Landscape Planning
F. Urban Design
G. Graphics

N. Natural Resources

DSN S 581. Art and Architecture of India.
(Dual-listed with 481). (Cross-listed with ART H). (3-0) Cr. 3. Prereq: Graduate classification, permission of instructor
Survey of Indian-style art and architecture through history. Examine how art and architecture developed in the Indian world has come to define the Indian identity religiously, culturally, socially, and politically.

Meets International Perspectives Requirement.

DSN S 582. Art and Architecture of Asia.
(Dual-listed with 382). (Cross-listed with ART H). (3-0) Cr. 3. Prereq: Graduate classification, permission of instructor
Introduction to the history of art and architecture in Asia. Countries may include China, Korea, Japan and India before the modern era. Visual materials selected based on important themes that are critical in understanding East Asian culture and art tradition.

Meets International Perspectives Requirement.

DSN S 583. Greek and Roman Art.
(Dual-listed with 383). (Cross-listed with ART H). (3-0) Cr. 3. Prereq: Graduate classification, permission of instructor
Greek art from Neolithic and Hellenistic periods. Roman art from the traditional founding to the end of the empire in the West.
DSN S 598. Selected Topics in Art History.
(Dual-listed with 498). (Cross-listed with ART H). (3-0) Cr. 3. Repeatable, maximum of 9 credits. **Prereq:** Graduate classification, permission of instructor
Specialized study in the history or criticism of art and/or design.
Undergraduate Study

Landscape architecture is an environmental design discipline. Landscape architects actively shape the human environment: they map, interpret, imagine, draw, build, conceptualize, synthesize, and project ideas that transform landscapes. The design process involves creative expression that derives from an understanding of the context of site (or landscape) ecosystems, cultural frameworks, functional systems, and social dynamics. Students in our program learn to change the world around them by re-imagining and re-shaping the landscape to enhance its aesthetic and functional dimensions, ecological health, cultural significance, and social relevance. The profession addresses a broad range of landscapes in urban, suburban, rural, and wilderness settings. The scale of landscape architecture projects varies from broad, regional landscape analysis and planning to detailed, individual site-scale designs. The curriculum at Iowa State prepares students for this challenge as they develop their abilities to design and communicate ideas through a sequence of foundational courses and studios. The program seeks to produce graduates who understand the ethical, social, and environmental/ecological dimensions of issues involving changes in the landscape.

Graduates are active in a broad range of careers, such as sustainable site design, land development, park management, environmental advocacy, community planning, urban design, and others. In their professional lives, graduates apply their creative and technical skills in the planned arrangement of natural and constructed elements on the land with a concern for the stewardship and conservation of natural, constructed, and human resources. The resulting environments serve useful, aesthetic, safe, and enjoyable purposes. Graduates are able to communicate effectively with colleagues in the sciences and humanities as well as in the allied professions, and are prepared to work individually and in multidisciplinary teams to address complex problems dealing with the cultural/ecological environment.

The undergraduate curriculum includes one year of the college’s Core Design Program followed by a four-year professional program. Admission to the professional program is subject to the approval of a faculty committee at the completion of the Core Design Program. Scholastic performance, aptitude, and personal development are the qualifications considered. The department also cooperates in the undergraduate minor in Design Studies, Critical Studies in Design, and Digital Media.

Following admission to the professional program, students embark on the traveling studio during the fall semester of their second year. This studio is a full semester’s credit of integrated departmental courses and involves extensive travel within and beyond the great Midwest region of North America, to study regional natural systems and the cultural response to those systems.

To enhance the study of landscape architecture in off-campus settings, the department recommends that each student participate in optional college or department-led international study opportunities such as the Rome summer offering. In addition, the department requires students to choose from among the following three options during the spring and summer of their fourth year: a professional internship, an independent study abroad experience, or National Student Exchange. The department assists students with placement, and additional information is provided through the department and the College of Design’s Career Services Office.

Personal laptop/notebook computers and appropriate software are regularly used in classes starting with the second year.

The undergraduate curriculum is fully accredited by the Landscape Architecture Accreditation Board (LAAB) and provides the education which, combined with experience, is necessary for professional licensure.

For undergraduate curriculum in landscape architecture leading to the degree bachelor of landscape architecture.

Graduate Study

The department offers two primary opportunities for professional and post-professional study: the M.L.A. degree, which provides the skills and knowledge for professional practice and the M.S.L.A. degree, which focuses on graduate-level research on the built environment. Minor work is offered to students taking major work in other departments.

The M.L.A. degree is a first professional degree in landscape architecture, for students with undergraduate degrees other than landscape architecture. Students enroll in a six-semester full-time program of coursework, some of which overlaps with the bachelor’s degree curriculum. However, graduate-level work is accomplished by a minimum of 30 credits of advanced courses, both required and elective, completed at the 500-level. This coursework also provides a chance to concentrate study in a topical area of practice, through elective courses and/or an optional thesis. Students’ concentrations—in areas such as history-theory; design-art; ecological design; or community design, etcetera—will be determined by the student in conjunction with his/her major professor and will be designated in a program of study, to be completed by the end of his/her first year. Electives may be selected from within the department and college as well as from other departments across campus.

The M.L.A. program has recently been granted candidacy status by LAAB and is undergoing a required 3-year review for initial accreditation. Full accreditation status is expected in 2013. Students who graduate before 2013 will be considered by LAAB to have graduated from an accredited program.

The M.S.L.A. is an unaccredited, research degree addressing landscape architecture as a scholarly endeavor. The degree is primarily intended as an advanced professional degree targeted at students already possessing an accredited first professional degree (B.L.A., B.Arch, M.Arch, etc.) and wishing to pursue in-depth, independent research. The M.S.L.A. is granted upon completion of 36 credits (at least 30 of which are completed at the 500-level) and the acceptance of a thesis or creative component. Periodically, students without accredited, first professional design degrees wish to complete an unaccredited master’s degree in landscape architecture. Such students may, in special cases, be allowed to pursue an M.S.L.A., provided they take an additional 12 credits of coursework, at least 6 of which must be an approved design studio, for a total of 48 hours of coursework.

Students may also enter a special program to earn both the M.L.A. and the master of community and regional planning (M.C.R.P.) degrees. Students interested in the double degree M.L.A./M.C.R.P. program should contact the departments to receive a detailed description of requirements. The department also teaches in the Graduate Certificate Program in Geographical Information Systems (GIS), administered by the Department of Community and Regional Planning.

Curriculum in Landscape Architecture

The department offers graduate and undergraduate degree programs.

The undergraduate program consists of a five year curriculum, requiring 149 credits, leading to the degree Bachelor of Landscape Architecture. These credits are distributed between a one-year Core Program of 30 credits and a four-year professional program of 119 credits.

Admission into the professional program depends upon available resources and is subject to the approval of a faculty committee at the completion of the Core Design Program. Applicants are reviewed on the basis of academic performance, a portfolio of original work, and a written essay.

The BLA from Iowa State University is an LAAB (Landscape Architecture Accreditation Board)-accredited professional degree program. In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for professional
licensure. The LAAB is the sole entity recognized by the Council for Higher Education Accreditation to accredit U.S. first professional degree programs in landscape architecture at the Bachelor’s and Master’s levels.

The department also offers a graduate program leading to the degrees of Master of Landscape Architecture or Master of Science in Landscape Architecture. For more complete graduate program descriptions, see Graduate Study under Landscape Architecture in the Courses and Programs section.

Total Degree Requirement: 149 cr.
Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.
U.S. Diversity: 3 cr.
Communications: 9.5 cr.
(C- or better grade)

Electives: 10 cr.
Complete electives sufficient to complete graduation requirements.

Courses primarily for undergraduate students

L A 201. Studio: Landscape Interpretation and Representation.
(1-15) Cr. F.
Prereq: Enrollment in the professional program
Reading and representing varied landscapes; development of aesthetic sensitivity to the geomorphology, vegetation, and cultural influences on these landscapes. Small-scale interventions and exploration of landscape phenomena and change. Emphasis on a variety of documentation and drawing techniques.

L A 202. Studio: Site Design I.
(1-15) Cr. F.
Prereq: 201
Fundamental issues of landscape planning and design at a site scale. Projects introduce a variety of (objective and subjective) site inquiry methods, space and place making, and sensitive integration of architecture and landscape for specific land uses. User needs, precedent study, programming, site engineering, planting design, and outdoor space design expressed through a variety of three-dimensional modeling, graphic, and written media.

L A 221. Native Plants of the Savanna Ecotone.
(2-3) Cr. F.
Prereq: Enrollment in the professional program
Observation and study of the wetland, prairie, and woodland vegetation native to the savanna ecotone. Emphasis on plant communities, their distribution, structure, habitat and aesthetics. Plant identification and use in landscape design. Precedent and case studies of vegetation preservation, restoration and use in built works.

L A 222. Introduced Plants of the Midwest.
(2-3) Cr. S.
Prereq: 221
Identification, observation, and study of plants introduced to cultivation in the Midwest region. Plant cultural requirements, including adaptations to climate changes, solar exposure, and soil conditions. Investigation of history of plant introduction and use in designed landscape, including consequent impacts of plant introduction such as plant invasion. Introduction to planting design at the site scale, including matching plant cultural requirements to site conditions, functional uses of plants and expressive composition using plant form, texture and color.

(1-0) Cr. F.
Prereq: Enrollment in the professional program
Development of life skills for conflict resolution, effective interpersonal communication, and CPR/First Aid. Examination of personal values as they relate to the backgrounds, abilities, attitudes, and values of others; exploration of how these influence personal decision-making and group interaction. Reading, discussion, class activities, journal-keeping, writing. Offered on a satisfactory-fail basis only.

(Cross-listed with NREM, ENV S).
(3-0) Cr. S.
Prereq: offered 2012.
The development of natural resource conservation philosophy and policy from the Colonial Era to the present. North American wildlife, forestry, and environmental policy; national parks and other protected lands; federal and state administrative agencies, influence of science. Relationship to cultural contexts, including urban reform and American planning movement. Discussion of common pool resources, public and private lands.
(3-0) Cr. 3. F. Prereq: Enrollment in the professional program  
Exploration of cultural landscapes, from broad settlement patterns to  
individual sites, with an emphasis on the origins and evolution of land-  
scapes. Investigation of relationships between vernacular and designed  
landscapes. Landscapes considered as modes of cultural production that  
shape and are shaped by social, political, and economic processes. Explo-  
ration of landscapes as persistent (yet ephemeral) repositories of culture.  
Lectures, reading, field studies, and writing.  
Meets U.S. Diversity Requirement

L A 274. The Social and Behavioral Landscape.  
(Cross-listed with DSN S). (3-0) Cr. 3. S.  
Exploration of social and behavioral factors pertinent to design of the  
domestic, civic, and commercial landscape. Focus on working familiarity  
with design principles as they relate to the behavior and activities of  
people across a broad demographic and cultural spectrum; application of  
these principles to design of outdoor environments. Lectures and discus- 
sions, including group exercises and field trips.  
Meets U.S. Diversity Requirement

L A 281. Investigating Landscape Form, Process, and Detail.  
(1-6) Cr. 3. F. Prereq: Enrollment in professional program  
Exploration of the poetics and principles of landscape construction. Inves- 
tigation and interpretation of landform and geomorphic processes such  
as the hydrologic cycle, erosion, and sedimentation. Close observation  
and representation of detail design, with an emphasis on material types,  
their connections, and weathering. Readings, field studies, and drawings  
in analog and digital media.

L A 301. Site Design II.  
(1-15) Cr. 6. F. Prereq: 202  
Development of half-acre to hundred-acre landscape design and planning  
proposals, potentially in collaboration with students in other programs.  
Apply critical methodological frameworks to shape site systems while  
providing appropriate support for diverse user groups and creating cultur- 
ally meaningful places. Assess and interpret a program of use, organize  
subjective and objective site inventory and analysis, develop functional  
and poetic design strategies for infrastructure and natural systems, and  
craft artistic and functionally explicit landscape architectural proposals.  
Development of appropriate technique and high level of craft in represen- 
tations to support design thinking process and final scheme presentation.

L A 302. Ecological Design at the Regional Scale.  
(1-15) Cr. 6. S. Prereq: 301, 381, 465 and Agronomy 156  
Application of ecological theories and processes in design and planning  
at the hundred plus-acre scale specifically focusing on urban and urban  
fringe landscapes. Apply advanced landscape analysis of soil, water, and  
vegetation utilizing geographic information systems. Particular focus on  
stream and wetland restoration, mitigation, and regulations and devel- 
opping design representations for public use.

L A 309. Field Travel.  
Cr. 1. Repeatable, maximum of 2 times. F.S.S. Prereq: Enrollment in the  
professional program and permission of instructor  
Observation of and reflection on professional practice and landscapes in  
urban, rural, and wilderness areas. Offered on a satisfactory-fail basis  
only. Offered on a satisfactory-fail basis only.

L A 322. Fundamentals of Planting Design.  
(2-3) Cr. 3. Alt. F., offered 2011. Prereq: 221  
The art and techniques of creating plant compositions in the landscape  
that respond to cultural and biophysical contexts. Investigation of soil  
properties and plant/soil relationships relevant to the built environ- 
ment. Methods of site inventory and analysis, developing plant palettes  
and composing plant assemblages that address expressive and func- 
tional needs. Introduction to the techniques of preparing planting plans,  
including standards for plant selection, plant lists and plant specification.

L A 341. Contemporary Landscape Architecture.  
(1-0) Cr. 1. S. Prereq: 301  
Exploration of contemporary landscape architectural practice through  
individualized research into practicing firms. Preparation of paper and  
presentation outlining broad framework and specific parameters of a  
selected area of contemporary practice using specific projects as exam- 
pies. Work may result in invitation of current practitioner(s) as a lecture  
series or event. Resume and portfolio preparation in advance of required  
off-campus semester (L A 451 A, B or C).

(Cross-listed with DSN Sl). (3-0) Cr. 3. F.  
Investigation of landscape design concepts and trends as observed  
over time, from approximately 1750 to the present, with emphasis on  
the United States and Europe. Examination of significant figures and  
outstanding works (sites, gardens, landscapes, monuments, subdivi- 
sions, city plans, etc.) of varied geographic regions. Analysis of the social,  
economic, political, and technical forces contributing to the development  

of landscape design styles, vocabulary, and literature. Lectures, readings,  
projects, research papers.

L A 373. Gardens and Landscapes from Antiquity to 1750.  
(Cross-listed with DSN Sl). (3-0) Cr. 3. F.  
Investigation of international landscape design concepts and trends as  
observed over time, from pre-history to the mid 18th century. Examination  
of significant figures and outstanding works (sites, gardens, land- 
scapes, monuments, subdivisions, city plans, etc.) of varied geographic  
regions. Analysis of the social, economic, political, and technical forces  
contribute to the development of landscape design styles, vocabulary,  
and literature. Lectures, readings, projects, research papers.

Meets International Perspectives Requirement.

L A 381. Shaping the Land.  
(3-0) Cr. 3. F. Prereq: 281, MATH 141  
Design of landforms to achieve aesthetic, functional, and safety goals.  
Landform changes to accommodate human uses and activities. Impacts  
and implications of landform transformation on the surrounding envi- 
ronment. Surface and subsurface drainage design, storm water runoff  
best management practices, contour manipulation to incorporate slopes,  
swales, culverts, pads, retaining walls, walks, steps, terraces, build- 
ings, and other structures in the landscape. Road layout and alignment,  
parking lot design, and earthwork volume estimations. Design communi- 
cation using CAD, perspectives, cross-sections, contour maps, landform  
models, and narratives. Class exercises, case study precedents, and  
preliminary construction documents.

L A 401. Community Design.  
(1-15) Cr. 6. F. Prereq: 402  
Physical planning and design of places utilizing community-based  
methods. Projects address social and cultural dimensions of placemaking  
such as reuse of abandoned sites, in-fill development, and community  
visioning. Emphasis on development of user-client relationship skills and  
design research. Integrated seminar component.

H. Honors Cr. 7

(1-15) Cr. 6. F. Prereq: 302  
Comprehensive planning and design for urban sites or for sites within  
urban contexts. Projects typically include planning for a variety of inte- 
grated land uses, and cover the full range of design scales from master  
planning to proposals for site details. Emphasis on written and verbal as  
well as graphic communications. Integrated seminar component.

H. Honors Cr. 7

L A 403H. Senior Thesis Preparation Tutorial.  
Cr. 2. F. Prereq: 402, permission of thesis advisor, enrollment in Honors  
program  
Preparation for senior thesis.
L A 404. Advanced Landscape Architectural Design.
(Cross-listed with DSN S). (1-15) Cr. 6. Repeatable, maximum of 2 times. S. Prereq: L A 401
Advanced forum for the demonstration of sophistication in landscape architectural design. Experimentation and innovation are encouraged.
H. Honors Cr. 6-7
L A 405H. Senior Thesis.
(0-15) Cr. 6. S. Prereq: 401, 402, 403, and enrollment in Honors program; permission of adviser, chair and thesis adviser
Individual advanced forum for the demonstration of sophistication in landscape architectural design. Experimentation and innovation are expected.
(Dual-listed with 517). (Cross-listed with ENV S). (2-3) Cr. 3. Prereq: Junior standing. 6 credits of natural science
Assessment and reduction of impacts in urban and peri-urban watershed areas. Course prepares students to work with various analysis methods for vegetation, topography, stormwater and stream condition as well as work with data from other disciplines. Emphasis on communicating with the public. Introductory GIS and GPS technologies are utilized. Learning is largely field-based.
L A 421. Advanced Planting Design.
(Dual-listed with 521). (2-3) Cr. 3. S. Prereq: 322 or graduate standing
Theory and practice of planting design, with emphasis on the ecological, cultural, and aesthetic factors affecting planting design and vegetation management in the built environment. Three venues for collaborative learning form the basis of the course: topical research inquiry, case history investigation, and completion of one comprehensive project design.
L A 441. Professional Practice.
(2-0) Cr. 2. S. Prereq: 481
Studies of conventional and developing forms of public and private practice. Explore relationships between professional life and the culture of the professional design firm; investigate firm identities and structures; understand design projects, their delivery process, and contractual agreements. Lecture and class discussion.
L A 444. Landscape Architecture Professional Internship, Study Abroad, or National Student Exchange.
Cr. R. Repeatable, maximum of 3 times. F.S.S.S. Prereq: L A 341, permission of adviser and chair
Independent educational enrichment through exploration of landscape architectural practice in a professional internship, international studies, or out-of-region national study experience.
A. Professional Internship.
B. Study Abroad.
C. National Student Exchange.
L A 461. Introduction to GIS.
(Cross-listed with IA LL, ENSCI, ENV S). Cr. 4. SS.
Descriptive and predictive GIS modeling techniques, spatial statistics, and map algebra. Application of GIS modeling techniques to environmental planning and resource management. Nonmajor graduate credit.
(Dual-listed with 578). (Cross-listed with DSN S). Cr. 2-3. Repeatable, maximum of 3 times. F.S.S.S. Prereq: L A 371 or senior classification or graduate standing
Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.
A. Landscape Design
B. Planting Design
C. Construction
D. History/Theory/Criticism
E. Landscape Planning
F. Urban Design
G. Graphics
H. Honors
I. Interdisciplinary Studies
J. International Studies
K. Computer Applications
L. Ecological Design
M. Social/Behavioral
N. Natural Resources
L A 481. Landscape Construction.
(1-4) Cr. 3. F. Prereq: 381
Development of construction details with emphasis on materials and their aesthetic and functional uses as building materials. Explore characteristics and uses of construction materials and application of wood systems, paving systems, retaining walls, masonry and concrete systems, and metals; investigate structural theory of wood systems. Preliminary preparation of construction documents.
L A 482. Advanced Landscape Construction.
(1-4) Cr. 3. S. Prereq: 481
Advanced site construction issues, with emphasis on water and irrigation systems, mechanical and electrical systems, site lighting, proposal preparation, project scheduling, project costing and estimating, and master specification editing.
L A 490. Independent Study.
Cr. 1-6. Repeatable, maximum of 3 times. F.S.S.S. Prereq: Written approval of instructor and department chair on required form
Investigation of a topic of special interest to the student.
A. Landscape Design
B. Planting Design
C. Construction
D. History
E. Landscape Planning
F. Urban Design
G. Graphics
H. Honors
I. Interdisciplinary Studies
J. International Studies
K. Computer Applications
L. Ecological Design
M. Social/Behavioral
N. Natural Resources
(Dual-listed with 591). (Cross-listed with C R P, DSN S, ENV S). (3-0) Cr. 3.
Prereq: Graduate classification
Environmental law and policy as applied in planning at the local and state levels. Brownfields, environmental justice, water quality, air quality, wetland and floodplain management, and local government involvement in ecological protection through land use planning and other programs.
Courses primarily for graduate students, open to qualified undergraduate students
L A 517. Urban and Peri-urban Watershed Assessment.
(Dual-listed with 417). (2-3) Cr. 3. Prereq: graduate standing
Assessment and reduction of impacts in urban and peri-urban watershed areas. Course prepares students to work with various analysis methods for vegetation, topography, stormwater, and stream condition as well as work with data from other disciplines. Emphasis on communicating with the public. Introductory GIS and GPS technologies are utilized. Learning is largely field-based.
L A 521. Advanced Planting Design.
(Dual-listed with 421). (2-3) Cr. 3. S. Prereq: 322 or graduate standing
Theory and practice of planting design, with emphasis on the ecological, cultural, and aesthetic factors affecting planting design and vegetation management in the built environment. Three venues for collaborative learning form the basis of the course: topical research inquiry, case history investigation, and completion of one comprehensive project design.
L A 541. Principles of Research for Landscape Architects.
(3-0) Cr. 3. F. Prereq: Graduate standing
Examination of design inquiry and research methods appropriate to landscape architectural projects, including bibliographical, historical, numerical, statistical, survey, and geographical methods. Readings, discussions, and application problems. Preparation of a research proposal.

L A 567. Advanced GIS Landscape Modeling.
(0-6) Cr. 3. Prereq: 302 or C R P 451/551
Application of Geographic Information Systems (GIS) modeling techniques to landscape planning and management issues. Selection, acquisition, and conversion of digital landscape data. Modeling applications for studio projects, outreach projects, and research projects.

L A 571. Landscape Architectural Theory.
(3-0) Cr. 3. S. Prereq: graduate standing
Exploration of major theories of landscape architectural design and their relationships to broader cultural and theoretical practices. Examination of key texts and projects in landscape architecture, architecture, art, and related fields. Emphasis on developing critical ways of analyzing ideas. Lectures, readings, discussion, and writings.

L A 578. Topical Studies in Landscape Architecture.
F.S.S. Prereq: Senior classification or graduate standing
Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.
A. Landscape Design
B. Planting Design
C. Construction
D. History/Theory/Criticism
E. Landscape Planning
F. Urban Design
G. Graphics
H. Honors
I. Interdisciplinary Studies
J. International Studies
K. Computer Applications
L. Ecological Design
M. Social/Behavioral
N. Natural Resources

Cr. 1-4. Repeatable, maximum of 4 credits. F.S.S. Prereq: Permission of major professor
Hands-on participation in a creative or research activity in the student’s area of specialization. Development of a detailed prospectus that defines the thesis or creative component.

L A 582. Graduate Seminar.
(3-0) Cr. 3. F. Prereq: Admission to graduate program or permission of instructor
Examination and discussion of professional practice, research in landscape architecture, and environmental planning.

L A 590. Special Topics.
Cr. 1-6. Repeatable, maximum of 3 times. F.S.S. Prereq: graduate standing.
A. Landscape Design
B. Planting Design
C. Construction
D. History
E. Landscape Planning
F. Urban Design
G. Graphics
I. Interdisciplinary Studies
J. International Studies
K. Computer Applications
L. Ecological Design
M. Social/Behavioral
N. Natural Resources

(Dual-listed with 491). (Cross-listed with C R P, DSN S). (3-0) Cr. 3. S. Prereq: Graduate classification
Environmental law and policy as applied in planning at the local and state levels. Brownfields, environmental justice, water quality, air quality, wetland and floodplain management, and local government involvement in ecological protection through land use planning and other programs.

L A 599. Creative Component.
Cr. 1-8. Repeatable, maximum of 8 credits. F.S.S. Prereq: Permission of major professor
Comprehensive study and original development of a project selected by the student and approved by the major professor. Completed project must be submitted to and approved by a graduate faculty committee as evidence of mastery of the principles of landscape architecture.

Course for graduate students, major or minor

Cr. 1-8. Repeatable, maximum of 8 credits. F.S.S. Prereq: Permission of major professor

Aligning Education in Engineering with the University Mission
The mission of Iowa State University is to create, share, and apply knowledge to make Iowa and the world a better place. Students will become broadly educated, global citizens who are culturally informed, technologically adept, and ready to lead. The College of Engineering echoes this philosophy and emphasizes preparing its graduates to meet the challenges of the 21st century.

Engineering education seeks to develop a capacity for objective analysis, synthesis, and design to obtain a practical solution. The engineering programs at Iowa State University are designed to develop the professional competence of a diverse student body and, by breadth of study, to prepare students to solve the technical problems of society while considering the ethical, social, and economic implications of their work at state, national and global levels.

The focus of each curriculum is to strengthen students’ critical thinking, creative abilities, and communication skills. Students in engineering will have the opportunity for interdisciplinary and experiential learning through learning communities, service learning, internships and cooperative education, as well as research, capstone, and study abroad experiences.

The problem-solving skills learned from an engineering education at Iowa State University also provide an excellent launching pad for careers not only in engineering, but also medicine, law, business, and many other fields.

Each program is guided by the criteria developed by ABET, a non-governmental organization of peer reviewers which assure the quality of post secondary engineering education. The outcomes and objectives of the accredited engineering programs can be found in the Courses and Programs section of the catalog.

Registration as a professional engineer, which is granted by each individual state, is required for many types of positions. The professional curricula in engineering at Iowa State University are designed to prepare a graduate for subsequent registration in all states.

Seniors in accredited curricula of the College of Engineering are encouraged to take the Fundamentals of Engineering Examination toward professional registration during their final academic year. Seniors in engineering curricula who have obtained at least 6 semester credits in surveying may take the Fundamentals Examination for professional registration as land surveyors.

Concurrent Graduate/ Undergraduate Programs
Several engineering programs offer the opportunity for well-qualified undergraduate juniors and seniors to pursue a graduate degree in their program while finishing the undergraduate requirements. The programs offering concurrent undergraduate/graduate degrees are: agricultural engineering, chemical engineering, civil engineering, computer engineering, construction engineering, electrical engineering, industrial engineering, materials engineering, and mechanical engineering.

Programs offering concurrent bachelor of science/master of business administration degrees are: agricultural engineering, civil engineering, computer engineering, electrical engineering, industrial engineering, materials engineering, and mechanical engineering.

For more information, refer to the graduate study sections for each engineering program. Advanced work in engineering is offered in the post-graduate programs. See the Graduate College section of this catalog.

Joint Undergraduate Programs
A bachelor of science degree in software engineering is offered in the College of Engineering and the College of Liberal Arts and Sciences. This program is jointly administered by the Department of Electrical and Computer Engineering and the Department of Computer Science.

Accreditation

These ten programs are: aerospace, agricultural, chemical, civil, computer, construction, electrical, industrial, materials, and mechanical engineering. Accreditation status is indicated in the Courses and Programs section for each engineering program. Two new programs are seeking ABET accreditation: biological systems and software engineering.
Organization of Curricula

All curricula in engineering are designed as four-year programs. They are structured in two phases: a basic program and a professional program. The basic program consists primarily of subjects fundamental and common to all branches of engineering and includes chemistry, physics, mathematics, engineering computations, and English. The professional phase of a curriculum includes intensive study in a particular branch of engineering, as well as a continuation of supporting work in mathematics, basic sciences, humanities, and social sciences.

Students should complete the requirements of the basic program before proceeding to a professional program.

Preparation for the Engineering Curricula

In addition to the standard university admission requirements, the college also requires 2 years of a foreign language. Other high school credits particularly important to students wishing to study engineering include:

- 2 years of algebra,
- 1 year of geometry
- 1/2 year of trigonometry
- 1/2 year of pre-calculus
- 1 year each of chemistry, Biology, and physics
- 3 years of social science
- 4 years of English

See Index for specific admission requirements.

Placement in mathematics, English, and chemistry will generally be based on high school preparation and test scores. Advanced placement is possible for exceptionally well-prepared students. Students who are not adequately prepared may be encouraged or required to take additional preparatory coursework and should expect to spend more than the customary time to complete the engineering program. Any coursework which is preparatory or remedial in nature cannot be used to satisfy credit requirements for graduation in any of the engineering curricula.

Basic Program for Professional Engineering Curricula

The first year program is much the same for all professional curricula in the College of Engineering. Students normally enroll in the majority of the basic program courses during their first year. The basic program is a set of courses common to all engineering curricula. Since students may also begin curriculum designated requirements during their first year, they will want to select a curriculum as soon as possible. This will enable them to receive the bachelor’s degree in a minimum time.

Entering undergraduates must demonstrate proficiency in trigonometry based on test scores, or by having transfer credits from a college trigonometry course, or by passing either MATH 141 Trigonometry or MATH 142 Trigonometry and Analytic Geometry before enrolling in MATH 166 Calculus II or C E 160 Engineering Problems with Computational Laboratory.

The Department of English may recommend placement in one or more sections of ENGL 101 English for Native Speakers of Other Languages if the placement test administered to students whose first language is not English indicates a deficiency in reading or writing. Satisfactory completion of the recommended course(s) will be required of students in the College of Engineering.

26.5 Total credits

ENGL 250 Written, Oral, Visual, and Electronic Composition is normally taken in the second year. However, students who advance place into this course may be able to enroll during their first year. Credit for ENGL 150 Critical Thinking and Communication is earned upon successful completion of ENGL 250 Written, Oral, Visual, and Electronic Composition, but only when ENGL 250 Written, Oral, Visual, and Electronic Composition is completed at Iowa State. In addition to the basic program courses listed above, curriculum designated courses normally taken the first year of each engineering curriculum are listed below.

Credit hours for graduation will be given for any one of the following without increasing a curriculum’s minimum number of credits required for graduation:

- AER E 160 | Aerospace Engineering Problems With Computer Applications Laboratory | 3 |
- C E 160   | Engineering Problems with Computational Laboratory | 3 |
- ENGR 160  | Engineering Problems with Computer Applications Laboratory | 3 |
- I E 148   | Information Engineering                            | 3 |
- CPR E 185 | Introduction to Computer Engineering and Problem Solving I | 3 |
- E E 185   | Introduction to Electrical Engineering and Problem Solving I | 3 |
- S E 185   | Problem Solving in Software Engineering            | 3 |

***Students enrolled in the joint software engineering degree program will take S E 101 Software Engineering Orientation, Honors students in Aer E enroll in AER E 101H Engineering Honors Orientation

Students in the general emphasis in C E have two chemistry/physics sequence options. The environmental emphasis requires Option 1.

Option 1

* Students who opt for PHYS 222 Introduction to Classical Physics II rather than CHEM 178 General Chemistry II, CHEM 178L Laboratory in College Chemistry II will increase the total number of credits required by 1.

**Recommended choices by program:

Aerospace Engineering
- AER E 160 | Aerospace Engineering Problems With Computer Applications Laboratory | 3 |

Civil Engineering
- C E 160 | Engineering Problems with Computational Laboratory | 3 |
- Computer Engineering
- CPR E 185 | Introduction to Computer Engineering and Problem Solving I | 3 |

Electrical Engineering
- E E 185 | Introduction to Electrical Engineering and Problem Solving I | 3 |

Industrial Engineering
- I E 148 | Information Engineering                            | 3 |

Software Engineering
- S E 185 | Problem Solving in Software Engineering            | 3 |

**Requirement for Entry into Professional Program**

Students enrolled in the College of Engineering must satisfy both of the following requirements before enrolling in the professional courses (200-level and above) offered by departments in the Engineering College:

1. Completion of the basic program with a grade point average of 2.00 or better in the basic program courses.
2. A cumulative grade point average of 2.00 or better for all courses taken at Iowa State University.

The following are the only exceptions to this rule:

a. Students who have completed all of their coursework while enrolled in the College of Engineering, but have not met the two basic program requirements, may enroll for not more than two semesters in 200-level or above courses offered by departments in the College of Engineering.

b. Students transferring to the College of Engineering from another college or university, or from a program outside this college, who have not met the two basic program requirements may also enroll for not more than two semesters in 200-level or above courses offered by departments in the College of Engineering. However, they may be granted an additional semester upon review by the college.

c. Iowa State students not pursuing an engineering degree may generally take engineering courses without restrictions provided they meet the prerequisites and space is available.

d. Only the first two semesters of 200-level and above engineering courses, taken at ISU while a student is not enrolled in the College of Engineering, can be applied toward an engineering degree.

Requirement for Graduation

In order to graduate in a professional engineering curriculum, students must have a minimum GPA of 2.00 in a department-designated group of 200-level and above courses known as the Core. These courses will total no fewer than 24 semester credits.

Engineering Minors

The College of Engineering offers four undergraduate minors which are open only to students in the College of Engineering. These are minors in bioengineering, nondestructive evaluation, nuclear engineering, and engineering sales. These minors must include at least nine credits which are beyond the total used to meet curriculum requirements.

The bioengineering minor is a 15 credit interdisciplinary program that complements a student’s major discipline by providing additional insight into the interactions between various engineering disciplines and Biological systems. The minor is administered by a supervisory faculty committee. For minor course requirements, refer to Bioengineering in Courses and Programs.

The nondestructive evaluation minor (16 credit minimum) open to engineering students who have met the basic program requirements and are not on academic warning or probation. The minor is supervised by an inter-disciplinary Engineering faculty committee. For minor course requirements, refer to Nondestructive Evaluation Engineering in Courses and Programs.

The nuclear engineering minor is a 15 credit minor which enables engineering students to acquire a basic and fundamental knowledge of nuclear sciences and engineering. Courses are provided at Iowa State University and also through an inter-institutional distance education program offered through the Web by four of the Big 12 Engineering Consortium Schools. For minor course requirements, refer to Nuclear Engineering in Courses and Programs.

The engineering sales minor is a 15 credit minor that complements the technical training in the student’s major discipline by providing the tools and knowledge required for technical (i.e. business-to-business) sales careers. The minor is administered by a supervisory faculty committee. For minor course requirements, refer to Engineering Sales in Courses and Programs.

Minor for Non-Engineers

The College of Engineering also offers an undergraduate minor in engineering studies which is open only to students outside of the College of Engineering.

The engineering studies minor is a 21 credit interdepartmental minor. A student’s minor program in engineering studies must include at least nine credits which are beyond the total used to meet minimum degree requirements. The minor is supervised by an interdepartmental faculty committee. Refer to Engineering Studies in Courses and Programs for minor course requirements.

Undergraduate Majors and Minors Outside the College of Engineering

In addition to the engineering degree program, students may earn majors or minors in other colleges of the university. A major or minor program must meet all requirements of the offering department or program and its college and contain credits beyond the requirements for a B.S. degree in engineering. A minimum of 15 additional credits is required for each major area of study and an additional 9 credits for each minor.

Advising System

The purpose of the advising system in the College of Engineering is to work constructively with students in developing their individual academic programs and to maintain close contact with students during their college careers.

The college offers an orientation program during the spring and summer for students planning to enter in the fall, and during the fall for students planning to enter in the spring. All entering students are encouraged to attend an orientation session. Placement assessments given during the orientation program help determine the student’s level of achievement and enable the advisor to prepare an appropriate course schedule for the student.

Special Programs

All engineering students are strongly encouraged to participate in either the cooperative education or internship programs. Students who are qualified to participate in the engineering honors program are also urged to do so. These programs are integrated into the professional engineering curricula and may require additional work. However, both these professional and academic programs offer opportunities that will enrich the standard academic experience. Engineering students are also encouraged to take advantage of study abroad opportunities available through the College of Engineering’s International Programs Office.

a. Cooperative Education Program. The College of Engineering offers, through its curricula, an experiential education program. Enrollment in the program allows students to gain practical work experience in their career field while attending college. In general, students enrolled in the co-op program will require an additional year to complete curriculum requirements. These programs are arranged so that the student alternates academic work with employment periods. The student has the opportunity to assess career paths within her/his chosen curriculum and the employer evaluates the student’s potential as a future full-time employee. Both domestic and international co-op programs are available. Cooperative education students pay no tuition or fees to the university during their work periods and do not receive credit hours for their work experience. Students register for a non-credit cooperative education course (298, 398, or 498) for each work period and are considered full-time students while enrolled in these courses. For additional information contact your academic adviser and the Office of Engineering Career Services.

b. Internship Program. The College of Engineering offers, through its curricula, an experiential education program. Internships are a mechanism by which a student may work full-time for one semester per academic year while maintaining her/his status as a full-time student. Enrollment in the program allows students to gain practical work experience in their career field while attending college. In general, students enrolled in the internship program will require an additional semester to complete curriculum requirements. Internship students pay no tuition or fees to the university during their work periods and do not receive credit hours for their work experience. Students who register for the internship course (397) for a fall or spring...
semester work period or (396) for the summer term are considered to be full-time students. For additional information contact your academic adviser and the Office of Engineering Career Services.

c. Honors Program. The College of Engineering participates in the University Honors Program (see Index). The honors program is designed for students with above average ability who wish to individualize their programs of study. For further details consult the chair of the Engineering College Honors Program Committee or your departmental honors program adviser.

d. Engineering International Programs. In a world where the sun never sets, engineers must be prepared to understand other cultures and other ways of doing business. Engineers must expand their exportable skills, language and cross-cultural skills.

Engineering International Programs (EIP) has formed worldwide partnerships to create opportunities for students to work and study with leading universities in other countries and multinational corporations. With careful planning, students may earn credit in courses that fulfill their degree requirements. To learn more about work and study with leading universities in other countries and multinational corporations, visit the EIP home page at www.eng.iastate.edu/intlprogs/.
Undergraduate Study
For undergraduate curriculum in aerospace engineering leading to the degree bachelor of science. This curriculum is accredited by the Engineering Accreditation Commission of ABET.

The aerospace engineer is primarily concerned with the design, analysis, testing, and overall operation of vehicles which operate in air, water, and space. The curriculum is designed to provide the student with an education in the fundamental principles of aerodynamics, flight dynamics, propulsion, structural mechanics, flight control, design, testing, and space technologies. A wide variety of opportunities awaits the aerospace engineering graduate in research, development, design, production, sales, and management in the aerospace industry, and in many related industries in which fluid flow, control, and transportation problems play major roles.

A cooperative education program in aerospace engineering is available in cooperation with government agencies and industry. The usual four-year curriculum is extended over a five-year span to permit alternating industrial experience periods and academic periods. This arrangement offers valuable practical experience and financial assistance during the college years.

Undergraduate Mission and Educational Objectives
The Department of Aerospace Engineering maintains an internationally recognized academic program in aerospace engineering via ongoing consultation with students, faculty, industry, and aerospace professionals. Results of these consultations are used in a process of continuous academic improvement to provide the best possible education for our students.

Mission statement:
The mission of the aerospace engineering program is to prepare the aerospace engineering student for a career with wide-ranging opportunities in research, development, design, production, sales, and management in the aerospace industry and in the many related industries which are involved with the solution of multi-disciplinary, advanced technology problems.

Program Educational Objectives:
Graduates should be actively contributing, valued members in their chosen profession showing continued professional growth.

Graduates should use their strong foundation in science, mathematics, and engineering to create innovative practices and/or technologies.

Graduates should demonstrate teamwork, leadership, planning, and initiative in advancing organizational goals.

Graduates should act with integrity, based on an awareness of the impact of their work – economic, environmental, and societal impact - and work to maintain high levels of cultural adaptability.

Graduates should demonstrate critical thinking and effective, multi-modal communication skills.

Graduates should strive to learn continuously through professional improvement opportunities and self study.

Graduates should work to ensure superior quality, customer satisfaction, and safety outcomes in their work.

Nondestructive Evaluation (NDE)
The NDE minor is multidisciplinary and open to undergraduates in the College of Engineering.

Graduate Study
The department offers work for the degrees of master of engineering, master of science, and doctor of philosophy with major in aerospace engineering, and minor work to students taking major work in other departments. For all graduate degrees it is possible to establish a co-

major program with another graduate degree granting department. Within the aerospace program, work is available in the following areas: aerospace systems design, atmospheric and space flight dynamics, computational fluid dynamics, control systems, wind engineering, fluid mechanics, optimization, structural analysis, and non-destructive evaluation.

The degrees master of science and doctor of philosophy require an acceptable thesis in addition to the coursework. For the degree master of engineering, a creative component or suitable project is required. Appropriate credit is allotted for this requirement.

Minor work for aerospace engineering majors is usually selected from mathematics, physics, electrical engineering, engineering mechanics, mechanical engineering, materials science, meteorology, computer science, and computer engineering.

The normal prerequisite to major graduate work in aerospace engineering is the completion of a curriculum substantially equivalent to that required of aerospace engineering students at this university. However, because of the diversity of interests within the graduate programs in aerospace engineering, a student whose prior undergraduate or graduate education has been in allied engineering and/or scientific fields may also qualify. In such cases, it may be necessary for the student to take additional work to provide the requisite background. A prospective graduate student is urged to specify the degree program and the specific field(s) of interest on the application for admission.

Courses normally will be offered at the times stated in the course description. Where no specific time of offering is stated, the course may be offered during any semester provided there is sufficient demand.

Curriculum in Aerospace Engineering
Leading to the degree bachelor of science.

Total credits required: 127.5. See also Basic Program and Special Programs.

International Perspectives 1: 3 cr.

U.S. Diversity 1: 3 cr.

Communication Proficiency and Library requirements: ENGL 150 Critical Thinking and Communication and ENGL 250 Written, Oral, Visual, and Electronic Composition with minimum grade of C in each course; LIB 160 Library Instruction. Department approval. (See Basic Program for credit requirements.)

General Education Electives: 15.0 cr

Complete 15 cr. including a series. A series of at least two courses must be taken to fulfill this requirement.

Basic Program: 26.5 cr

Complete with 2.00 GPA including transfer courses:

CHEM 167 General Chemistry for Engineering Students 4
or CHEM 177 General Chemistry I 4
ENGL 150 Critical Thinking and Communication 3
ENGL 250 Written, Oral, Visual, and Electronic Composition * 3
ENGR 101 Engineering Orientation R
or AER E 101H Engineering Honors Orientation
AER E 160 Aerospace Engineering Problems With Computer Applications Laboratory 3
LIB 160 Library Instruction 0.5
MATH 165 Calculus I 4
MATH 166 Calculus II 4
PHYS 221 Introduction to Classical Physics I ** 5

Total Credits 26.5

* see above for grade requirements
** see Basic Program rule
4.2.00 required including transfer courses.

3. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

2. Choose from department approved list.

AER E 243 Aerodynamics I 3
AER E 261 Introduction to Performance and Design 4
AER E 311 Gas Dynamics 3
AER E 321 Flight Structures Analysis 3
AER E 321L Aerospace Structures Laboratory 2
AER E 331 Flight Control Systems I 3
AER E 344 Aerodynamics and Propulsion Laboratory 3
AER E 351 Astrodynamics I 3
AER E 355 Aircraft Flight Dynamics and Control 3
AER E 411 Aerospace Vehicle Propulsion I 3
AER E 421 Advanced Flight Structures 3
AER E 461 Computational Techniques for Aerospace Design 3
AER E 461 Modern Design Methodology with Aerospace Applications 3
AER E 462 Design of Aerospace Systems 3
E M 324 Mechanics of Materials 3
M E 231 Engineering Thermodynamics I 3
Total Credits 48

Other Remaining Courses: 25 cr.
E M 274 Statics of Engineering 3
E M 345 Dynamics 3
MAT E 273 Principles of Materials Science and Engineering 3
AER E 161 Numerical, Graphical and Laboratory Techniques for Aerospace Engineering 4
3 credits from the following 3
AER E 412 Aerospace Vehicle Propulsion II 3
AER E 422 Aeroelasticity 3
AER E 423 Composite Flight Structures 3
AER E 426 Design of Aerospace Structures 3
AER E 432 Flight Control Systems II 3
AER E 442 V/STOL Aerodynamics and Performance 3
AER E 446 Computational Fluid Mechanics and Heat Transfer I 3
AER E 464 Spacecraft Systems 3
Technical Electives (see below) 3
Career Electives (see below) 3
Total Credits 25

Technical Electives, 3 cr. and Career Electives, 6 cr. selected from preceding Aer E list or departmental-approved 300-level or above courses relevant to technical and career areas.

Seminar/Co-op/Internships/Flight Experience:
AER E 192 Aerospace Seminar R
AER E 291 Aerospace Advising Seminar R
AER E 292 Aerospace Advising Seminar R
AER E 301 Flight Experience R
AER E 391 Aerospace Advising Seminar R
AER E 392 Aerospace Advising Seminar R
AER E 491 Aerospace Advising Seminar R
Co-op and internships are optional

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also allowed by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.

2. Choose from department approved list.

3. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

4. 2.00 required including transfer courses.

Courses primarily for undergraduate students

AER E 101H. Engineering Honors Orientation.
Cr. R. F. Prereq: Membership in the Freshman Honors Program
Introduction to the College of Engineering and the Aerospace Engineering profession. Information concerning university, college, and department policies, procedures and resources with emphasis on the Freshman Honors Program. Topics include experiential education study abroad opportunities, and department mentorships.

AER E 112. Orientation to Learning and Productive Team Membership.
(Cross-listed with CON E, FS HN, HORT, NREM, TSM). (2-0) Cr. 2. F.
Introduction to developing intentional learners and worthy team members. Learning as the foundation of human enterprise; intellectual curiosity; ethics as a personal responsibility; everyday leadership; effective team and community interactions including team learning and the effects on individuals; and growth through understanding self, demonstrating ownership of own learning, and internalizing commitment to helping others. Intentional mental processing as a means of enhancing learning. Interconnectedness of the individual, the community, and the world.

AER E 160. Aerospace Engineering Problems With Computer Applications Laboratory.
(2-2) Cr. 3. F. S. Prereq: Satisfactory scores on mathematics placement assessments; credit or enrollment in MATH 142, 165
Solving aerospace engineering problems and presenting solutions through technical reports. Significant figures. SI units. Graphing and curve fitting. Flowcharting. Introduction to material balances, mechanics, electrical circuits, statistics engineering economics, and design. Spreadsheet programs. Introduction to UNIX/LINUX computing environments, and programming in FORTRAN. Team projects.

H. Honors. F.

(3-2) Cr. 4. F. S. Prereq: 160 or equivalent course
Computer solutions to aerospace engineering problems using the FORTRAN language and Matlab(R), with emphasis on numerical methods. Introduction to computing environments including UNIX/LINUX. Graphical description of geometrical objects with emphasis on aerospace design. Solid modeling using computer graphics software. Develop proficiency with basic instrumentation utilized in subsequent Aerospace Engineering laboratory courses. Computational and statistical analysis of lab results. Written and oral technical reports, team projects.

H. Honors. S.

AER E 192. Aerospace Seminar.
Cr. R. S.
Experimental lab set-up, graphical skills. Academic program planning.

H. Honors.

AER E 243. Aerodynamics I.
(3-0) Cr. 3. F. S. Prereq: Grade of C- or better in 261, MATH 265

AER E 261. Introduction to Performance and Design.
(4-0) Cr. 4. F. S. Prereq: 161, MATH 166, PHYS 221
Introduction to aerospace disciplinary topics, including: aerodynamics, structures, propulsion, and flight dynamics with emphasis on performance. Technical report writing.
AER E 265. Scientific Balloon Engineering and Operations.
(Cross-listed with MTEOR) (0-2) Cr. 1. Repeatable. F.
Engineering aspects of scientific balloon flights. Integration of science mission objectives with engineering requirements. Operations team certification. FAA and FCC regulations, communications, and command systems. Flight path prediction and control.

AER E 290. Independent Study.
Cr. 1-2. Repeatable. Prereq: Sophomore classification, approval of the department
A. Flight ground instruction
B. In-flight training I
C. Other

Cr. R. F.
Academic program planning. Offered on a satisfactory-fail basis only.

AER E 292. Aerospace Advising Seminar.
Cr. R. S.
Academic program planning. Offered on a satisfactory-fail basis only.

AER E 298. Cooperative Education.
Cr. R. F.S.S. Prereq: Permission of department and Engineering Career Services
First professional work period in the cooperative education program. Students must register for this course prior to commencing work. Offered on a satisfactory-fail basis only.

AER E 301. Flight Experience.
Cr. R. F. Prereq: Credit or enrollment in 355
Two hours of in-flight training and necessary ground instruction. Course content prescribed by the Aerospace Engineering Department. Ten hours of flight training certified in a pilot log book can be considered by the course instructor as evidence of satisfactory performance in the course. Offered on a satisfactory-fail basis only.

AER E 311. Gas Dynamics.
(3-0) Cr. 3. S. Prereq: 243, M E 231, credit or enrollment in 344
Subsonic, transonic, supersonic flows over airfoils and wings. Introduction to compressible viscous flows. Properties of liquids and gases, review of thermodynamic processes and relations, energy equation, compressible flow, shock and expansion waves, isentropic flow, Fanno and Rayleigh flow. Nonmajor graduate credit.

(3-0) Cr. 3. F. Prereq: E M 324
3 hours of lecture weekly and laboratory alternating weeks. Determination of flight loads. Materials selection for flight applications. Analysis of flight structures including trusses, beams, frames, and shear panels employing classical and finite element methods. Nonmajor graduate credit.

L. Aerospace Structures Laboratory

AER E 321L. Aerospace Structures Laboratory.
(1-2) Cr. 2. S. Prereq: Credit or enrollment in AerE 321

AER E 331. Flight Control Systems I.
(3-0) Cr. 3. S. Prereq: 355
Linear system analysis. Control system designs using root-locus and frequency response methods. Applications in flight control systems. Nonmajor graduate credit.

AER E 344. Aerodynamics and Propulsion Laboratory.
(2-2) Cr. 3. S. Prereq: 243, Credit or enrollment in 311

AER E 351. Astrodynamics I.
(3-0) Cr. 3. F. Prereq: E M 345, AER E 261, Credit or enrollment in AER E 243
Introduction to astrodynamics. Two-body motion. Geocentric, lunar and interplanetary trajectories and applications. Launch and atmospheric re-entry trajectories. Nonmajor graduate credit.

AER E 355. Aircraft Flight Dynamics and Control.
(3-0) Cr. 3. F. Prereq: 261, MATH 267, E M 345
Aircraft rigid body equations of motion, linearization, and modal analysis. Longitudinal and lateral-directional static and dynamic stability analysis. Flight handling characteristics analysis. Longitudinal and lateral-directional open loop response to aircraft control inputs. Aircraft flight handling qualities. Nonmajor graduate credit.

AER E 361. Computational Techniques for Aerospace Design.
(2-2) Cr. 3. F.S. Prereq: 243, MATH 267, E M 324, E M 345
Advanced programming, workstation environment, and development of computational tools for aerospace analysis and design. Technical report writing. Nonmajor graduate credit.

AER E 381. Introduction to Wind Energy.
(3-0) Cr. 3. S. Prereq: MATH 166, Physics 221
Basic introduction to the fundamentals of Wind and Wind Energy conversion systems. Topics include but not limited to various types of wind energy conversion systems and the aerodynamics, blade and tower structural loads, kinematics of the blades and meteorology. Nonmajor graduate credit.

Cr. R. F.S.
Academic program planning. Offered on a satisfactory-fail basis only.

Cr. R. S.
Academic program planning. Offered on a satisfactory-fail basis only.

AER E 396. Summer Internship.
Cr. R. Repeatable. SS. Prereq: Permission of department and Engineering Career Services
Summer professional work period. Students must register for this course prior to commencing work. Offered on a satisfactory-fail basis only.

AER E 397. Engineering Internship.
Cr. R. Repeatable. F.S. Prereq: Permission of department and Engineering Career Services
Students must register for this course prior to commencing work. Offered on a satisfactory-fail basis only.

AER E 398. Cooperative Education.
Cr. R. F.S.S. Prereq: 298, permission of department and Engineering Career Services
Second professional work period in the cooperative education program. Students must register for this course prior to commencing work. Offered on a satisfactory-fail basis only.

AER E 411. Aerospace Vehicle Propulsion I.
(3-0) Cr. 3. F. Prereq: 311
AER E 412. Aerospace Vehicle Propulsion II.
(3-0) Cr. 3. Prereq: 411
Introduction to advanced electromagnetic propulsion systems. Energy
sources and nuclear propulsion. Low thrust mission analysis. Space
mission requirements. Nonmajor graduate credit.

(Cross-listed with E M). (2-2) Cr. 3. Alt. F., offered 2012. Prereq: E M 324
Introduction of different aspects of measuring deformation, strains, and
stress for practical engineering problems. Strain gage theory and applica-
tion. Selected laboratory experiments. Nonmajor graduate credit.

(2.5-1) Cr. 3. S. Prereq: 321, MATH 266 or 267
Analysis of indeterminate flight structures including finite element labo-
ralory. Static analysis of complex structural components subject to
thermal and aerodynamic loads. Analytical and finite element solutions
for stresses and displacements of membrane, plane stress, plate struc-
tures. Buckling of beams, frames, and plate structures. Introduction
to vibration of flight structures. Steady state and transient structural
response using normal modal analysis. Nonmajor graduate credit.

AER E 422. Aeroelasticity.
(3-0) Cr. 3. Alt. F., offered 2012. Prereq: 421 or E M 450 or M E 450
Vibration theory. Steady and unsteady flows. Mathematical foundations
of aeroelasticity, static and dynamic aeroelasticity. Linear unsteady aero-
dynamics, non-steady aerodynamics of lifting surfaces. Stall flutter. Aero-
elastic problems in civil engineering structures. Aeroelastic problems of
rotorcraft. Experimental aeroelasticity. Selected wind tunnel laboratory
experiments. Nonmajor graduate credit.

(2-2) Cr. 3. Prereq: E M 324; Mat E 272
Fabrication, testing and analysis of composite materials used in flight
structures. Basic laminate theory of beams, plates and shells. Manu-
facturing and machining considerations of various types of composites.
Testing of composites for material properties, strength and defects.
Student projects required. Nonmajor graduate credit.

(1-6) Cr. 3. Prereq: E M 324
Detailed design and analysis of aerospace vehicle structures. Mate-
rial selection, strength, durability and damage tolerance, and validation
analysis. Design for manufacturability. Nonmajor graduate credit.

AER E 432. Flight Control Systems II.
(3-0) Cr. 3. Prereq: 331
Aircraft lateral directional stability augmentation. Launch vehicle pitch
control system design. Control of flexible vehicles. Satellite attitude
control. Flight control designs based on state-space methods. Introduc-
tion to sample-data systems. Nonmajor graduate credit.

AER E 442. V/STOL Aerodynamics and Performance.
(3-0) Cr. 3. Prereq: 365
Introduction to the aerodynamics, performance, stability, control and
critical maneuvering characteristics of V/STOL vehicles. Topics include
hovercrafts, jet flaps, ducted fans and thrust vectored engines. Nonmajor
graduate credit.

AER E 446. Computational Fluid Mechanics and Heat
Transfer I.
(Dual-listed with 546). (3-0) Cr. 3. Prereq: 161, 243
Basic concepts of discretization, consistency, and stability. Explicit and
implicit methods for ordinary differential equations. Methods for each type
of partial differential equation. Iterative solution methods; curvilinear
grids. Examples of basic algorithms. Nonmajor graduate credit.

AER E 448. Fluid Dynamics of Turbomachinery.
(Cross-listed with M E). (3-0) Cr. 3. S. Prereq: M E 335 or equivalent
Applications of principles of fluid mechanics and thermodynamics in
performance analysis and design of turbomachines and related fluid
system components. Nonmajor graduate credit.

AER E 451. Astrodynamics II.
(3-0) Cr. 3. Prereq: 351
Simple orbit determination and prediction. Advanced orbit maneuvers,
single-, double-, and triple-impulse; fixed-impulse, finite-duration. 3-D
rigid-body dynamics, Euler’s equations, satellite stabilization and attitude
control. Earth gravity field models and gravity harmonics, orbit perturba-
tions, variational methods, relative orbital mechanics, Clohessy-Wiltshire
equations. Nonmajor graduate credit.

AER E 461. Modern Design Methodology with Aerospace
Applications.
(2-2) Cr. 3. F. Prereq: 361, 311, 321, 351, 355
Introduction to modern engineering design methodology. Computational
constrained optimal design approach including selection of objective
function, characterization of constraint system, materials and strength
considerations, and sensitivity analyses. Nonmajor graduate credit.

(1-4) Cr. 3. F. Prereq: 461
Fundamental principles used in engineering design of aircraft, missile,
and space systems. Preliminary design of aerospace vehicles. Engi-
neering Ethics.

(3-0) Cr. 3. Prereq: 351
An examination of spacecraft systems including attitude determination
and control, power, thermal control, communications, propulsion, guid-
ance, navigation, command and data handling, and mechanisms. Expla-
nation of space and operational environments as they impact spacecraft
design. Includes discussion of safety, reliability, quality, maintainability,
testing, cost, legal, and logistics issues. Nonmajor graduate credit.

AER E 466. Multidisciplinary Engineering Design.
(Cross-listed with A E, CPR E, E E, ENGR, I E, M E, MAT E). (1-4) Cr. 3.
Repeatable. F.S. Prereq: Student must be within two semesters of gradu-
ation and receive permission of instructor
Application of team design concepts to projects of a multidisciplinary
nature. Concurrent treatment of design, manufacturing, and life cycle
considerations. Application of design tools such as CAD, CAM, and
FEM. Design methodologies, project scheduling, cost estimating, quality
control, manufacturing processes. Development of a prototype and
appropriate documentation in the form of written reports, oral presenta-
tions and computer models and engineering drawings.

(3-0) Cr. 3. F. Prereq: 381 or senior classification in engineering or junior in
engineering with a course in fluid mechanics
Advanced topics in wind energy, emphasis on current practices. Theo-
retical foundations for horizontal and vertical axis wind turbine. Design
codes for energy conversion systems design, aerodynamic an structural
load estimation, wind resource characterization wind farm design, opti-
mization. Nonmajor graduate credit.

AER E 490. Independent Study.
Cr. 1-6. Repeatable. Prereq: Junior or senior classification, approval of the
department
A. Aero and/or Gas Dynamics
B. Propulsion
C. Aerospace Structures
D. Flight Dynamics
E. Spacecraft Systems
F. Flight Control Systems
G. Aeroelasticity
H. Honors
I. Design
J. Non-destructive Evaluation
K. Wind Engineering
L. Multi-functional Ultra-light Structures
O. Other
AER E 491. Aerospace Advising Seminar.
Cr. R. F.S.
Academic program planning.

AER E 498. Cooperative Education.
Cr. R. Repeatable. F.S.SS. Prereq: 388, permission of department and Engineering Career Services
Third and subsequent professional work periods in the cooperative education program. Students must register for this course before commencing work. Offered on a satisfactory-fail basis only.

AER E 499. Senior Project.
Cr. 1-2. Repeatable. F.S. Prereq: Senior classification, credit or enrollment in 491
Development of aerospace principles and concepts through individual research and projects. Written report.

Courses primarily for graduate students, open to qualified undergraduate students

(Cross-listed with E M). (3-0) Cr. 3. F. Prereq: E M 324

(Cross-listed with E M). (3-2) Cr. 4. Alt. S., offered 2012. Prereq: E M 510 or 514 or 516
Fundamental concepts for force, displacement, stress, and strain measurements. Strain gages. Full field deformation measurements with laser interferometry and digital image processing. Advanced experimental concepts at the micro and nano scale regimes.

AER E 521. Airframe Analysis.
(3-0) Cr. 3. F. Prereq: 421 or E M 424
Analysis of static stresses and deformation in continuous aircraft structures. Various analytical and approximate methods of analysis of isotropic and anisotropic plates and shells.

AER E 522. Design and Analysis of Composite Materials.
(3-0) Cr. 3. F. Prereq: E M 324
Composite constituent materials, micro-mechanics, laminate analysis, hygro-thermal analysis, composite failure, joining of composites, design of composite beams and plates, honeycomb core, manufacturing of composites, short fiber composites, and demonstration laboratory.

(3-0) Cr. 3. Prereq: MATH 385, proficiency in programming
Introduction to modern mesh generation techniques. Structured and unstructured mesh methods, algebraic and PDE methods, elliptic and hyperbolic methods, variational methods, error analysis, Delaunay triangulation, data structures, geometric modeling with B-spline and NURBS surfaces, surface meshing.

AER E 525. Finite Element Analysis.
(Cross-listed with E M). (3-0) Cr. 3. S. Prereq: E M 425, MATH 385
Variational and weighted residual approach to finite element equations. Emphasis on two- and three-dimensional problems in solid mechanics. Isoparametric element formulation, higher order elements, numerical integration, imposition of constraints and penalty, convergence, and other more advanced topics. Use of two- and three-dimensional computer programs. Dynamic and vibrational problems, eigenvalues, and time integration. Introduction to geometric and material nonlinearities.

AER E 531. Automatic Control of Flight Vehicles.
(3-0) Cr. 3. S. Prereq: 331
Applications of classical and modern linear control theory to automatic control of flight vehicles. Spacecraft attitude control. Control of flexible vehicles. Linear-quadratic regulator design applications.

(Cross-listed with M E). (3-0) Cr. 3. S. Prereq: 311 or M E 335
Thermodynamics of compressible flow. Viscous and inviscid compressible flow equations. One dimensional steady flow; isentropic flow, normal shock waves oblique and curved shocks, constant area flow with friction and heat transfer. Linear theory and Prandtl-Glauert similarity. Method of characteristics. Subsonic, transonic, supersonic and hypersonic flows.

AER E 541. Incompressible Flow Aerodynamics.
(3-0) Cr. 3. F. Prereq: 311 or M E 335

AER E 543. Viscous Flow Aerodynamics.
(3-0) Cr. 3. S. Prereq: 541
Navier-Stokes equations. Incompressible and compressible boundary layers. Similarity solutions. Computational and general solution methods. Introduction to stability of laminar flows, transition and turbulent flow.

AER E 545. Advance Experimental Technique for Thermal-Fluid Studies.
(3-0) Cr. 3. S. Prereq: 311 or M E 335 or E M 378
Introduction of various experimental techniques widely used for fluid mechanics, aerodynamics, heat transfer, and combustion studies. Pressure gauge and transducers; Pitot tube; hot wire anemometry; shad-ovgraph and Schlieren Photography; laser Doppler velocimetry; particle image velocimetry (PIV); advanced PIV techniques (stereo PIV, 3-D PIV, Holograph PIV, microscopic PIV); laser induced fluorescence; pressure sensitive painting, temperature sensitive painting; molecular tagging velocimetry; molecular tagging thermometry. Extensive application and demonstration laboratory experiments will be included.

AER E 546. Computational Fluid Mechanics and Heat Transfer I.
(Dual-listed with 446). (Cross-listed with M E). (3-0) Cr. 3. F. Prereq: Credit or enrollment in 541 or ME 538

AER E 547. Computational Fluid Mechanics and Heat Transfer II.
(Cross-listed with M E). (3-0) Cr. 3. S. Prereq: 546 or M E 546
Application of computational methods to current problems in fluid mechanics and heat transfer. Methods for solving the Navier-Stokes and reduced equation sets such as the Euler, boundary layer, and parabolized forms of the conservation equations. Introduction to relevant aspects of grid generation and turbulence modeling.

(3-0) Cr. 3. F. Prereq: 351

(3-0) Cr. 3. F. Prereq: 331
AER E 565. Systems Engineering and Analysis.
(Cross-listed with E E, I E). (3-0) Cr. 3. Prereq: Coursework in basic statistics
Introduction to organized multidisciplinary approach to designing and developing systems. Concepts, principles, and practice of systems engineering as applied to large integrated systems. Life-cycle costing, scheduling, risk management, functional analysis, conceptual and detail design, test evaluation, and systems engineering planning and organization. Not available for degrees in industrial engineering

AER E 566. Avionics Systems Engineering.
(Cross-listed with E E). (3-0) Cr. 3, S. Prereq: E E 565
Avionics functions. Applications of systems engineering principles to avionics. Top-down design of avionics systems. Automated design tools.

AER E 570. Wind Engineering.
(Cross-listed with E M). (3-0) F. Prereq: E M 378, 345
Atmospheric circulations, atmospheric boundary layer wind, bluff-body aerodynamics, aeroelastic phenomena, wind-tunnel and full-scale testing, wind-load code and standards, effect of tornado and thunderstorm winds, design applications.

AER E 572. Turbulence.
(Cross-listed with CH E). (3-0) Cr. 3. Alt. S., offered 2012. Prereq: 543 or E M 538
Qualitative features of turbulence. Statistical and spectral representation of turbulent velocity fields: averages, moments, correlations, length and time scales and the energy cascade. Averaged equations of motion, closure requirements, Reynolds average models. Homogeneous shear flows, free shear flows, bounded flows. Numerical simulation of turbulence: DNS, LES, DES.

(Cross-listed with E E, MATH, M E). (3-0) Cr. 3, F. Prereq: E E 324 or AER E 331 or E M 370 or 411 or MATH 341 or 395

AER E 574. Optimal Control.
(Cross-listed with E E, MATH, M E). (3-0) Cr. 3, S. Prereq: E E 577

AER E 575. Introduction to Robust Control.
(Cross-listed with E E, MATH, M E). (3-0) Cr. 3, Prereq: E E 577

(Cross-listed with E E, MATH, M E). (3-0) Cr. 3, F. Prereq: E E 475 or AER E 432 or M E 411 or 414 or MATH 415; and MATH 267

AER E 577. Linear Systems.
(Cross-listed with E E, MATH, M E). (3-0) Cr. 3. F. Prereq: E E 324 or AER E 331 or M E 414 or MATH 415; and MATH 307

AER E 578. Nonlinear Systems.
(Cross-listed with E E, MATH, M E). (3-0) Cr. 3, S. Prereq: E E 577

(Cross-listed with E E, MATH). (3-0) Cr. 3, S. Prereq: MATH 267

AER E 590. Special Topics.
Cr. 1-5. Repeatable, maximum of 3 times.
A. Aero and/or Gas Dynamics
B. Propulsion
C. Aerospace Structures
D. Flight Dynamics
E. Spacecraft Systems
F. Flight Control Systems
G. Aerelasticity
H. Viscous Aerodynamics
I. Design
J. Hypersonics
K. Computational Aerodynamics
L. Optimization
M. Non Destructive Evaluation
N. Wind Engineering

AER E 591. Graduate Student Seminar Series.
Cr. R. Repeatable.
Presentation of professional topics by department graduate students. Development of presentation skills used in a professional conference setting involving question and answer format.

AER E 599. Creative Component.
Cr. 1-5. Repeatable.

Courses for graduate students
AER E 647. Advanced High Speed Computational Fluid Dynamics.
(Cross-listed with M E). (3-0) Cr. 3. Alt. F., offered 2012. Prereq: 547

AER E 690. Advanced Topics.
Cr. 1-5. Repeatable.
A. Aero and/or Gas Dynamics
B. Propulsion
C. Aerospace Structures
D. Flight Dynamics
E. Spacecraft Systems
F. Flight Control Systems
G. Aerelasticity
H. Viscous Aerodynamics
I. Design
J. Hypersonics
K. Computational Aerodynamics
L. Non Destructive Evaluation
M. Wind Engineering

**AER E 697. Engineering Internship.**
Cr. R. Repeatable. Prereq: Permission of DOGE (Director of Graduate Education), graduate classification
One semester and one summer maximum per academic year professional work period. Offered on a satisfactory-fail basis only.

**AER E 699. Research.**
Cr. arr. Repeatable.
Agricultural Engineering

Administered by the Department of Agricultural and Biosystems Engineering

Undergraduate Study

For the undergraduate curriculum in agricultural engineering leading to the degree of bachelor of science, this curriculum is accredited under the General Criteria and Program Criteria for Agricultural Engineering Programs by the Engineering Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21201, telephone (410) 347-7700, http://www.abet.org/.

Curriculum Educational Goal, Objectives, and Learning Outcomes:

Goal: To educate students in the analysis and design of machinery, animal housing, and environmental systems for the production, processing, storage, handling, distribution, and use of food, feed, fiber and other biomaterials, and the management of related natural resources, by integrating basic physical and biological sciences with engineering design principles.

Program Educational Objectives: Graduates are prepared to achieve the following career and professional accomplishments:

1. Competence in methods of analysis involving engineering sciences, fundamental physical and biological sciences, mathematics, and computation needed for the practice of agricultural engineering in food, fiber, energy and environmental companies and agencies.
2. Skills necessary to the design process; including the abilities to think creatively, to formulate problem statements, to communicate effectively, to synthesize information, and to evaluate and implement problem solutions.
3. Ability to address issues of ethics, safety, professionalism, cultural diversity, globalization, environmental impact, and social and economic impact in engineering practice.
4. Continuous professional and technical growth, with practical experience, to be licensed as a professional engineer or achieve that level of expertise.
5. The ability to:
   1. be a successful leader of multi-disciplinary teams
   2. efficiently manage multiple simultaneous projects
   3. work collaboratively
   4. implement multi-disciplinary systems-based solutions
   5. apply innovative solutions to problems through the use of new methods or technologies,
   6. contribute to the business success of their employer
   7. build community

Program Educational Outcomes: At graduation, students will have developed and demonstrated:

1. Competence in engineering analysis relevant to the practice of agricultural engineering in machinery, food, feed, fiber, energy, and environmental companies and agencies.
2. Competence in engineering design, including the ability to think creatively, to formulate problem statements, to communicate effectively, to synthesize information, and to evaluate and implement problem solutions.
3. The ability to consider ethics, safety, professionalism, cultural diversity, globalization, environmental, social, and economic issues in engineering practice.
4. The ability to work successfully in multidisciplinary teams, and to manage complex and/or multiple projects.

Graduates find employment in diverse ag- and bio-related industries and government agencies dealing with agricultural machines and buildings, animal and environmental control, grain processing and handling, soil and water resources, food, biorenewables, and biotechnology. Their work involves engineering design, development, testing, research, manufacturing, consulting, sales, and service. Students are highly encouraged to participate in either cooperative education or internship programs.

The department also offers a bachelor of science curriculum in biological systems engineering. Additionally, the department offers bachelor of science curricula in agricultural systems technology and in industrial technology.

Well-qualified juniors and seniors in agricultural engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue a bachelor of science degree in agricultural engineering and a master of science degree in agricultural engineering. Refer to Graduate Study for more information.

Nondestructive Evaluation (NDE)

The NDE minor is multidisciplinary and open to undergraduates in the College of Engineering.

Graduate Study

The department offers master of science, master of engineering, and doctor of philosophy degrees with a major in agricultural engineering. Within the agricultural engineering major the student may specialize in advanced machinery engineering, animal production systems engineering, biological and process engineering, occupational safety engineering, or water and environmental stewardship engineering. Details on current research programs available at http://www.abe.iastate.edu/. Departmental graduate student guidelines can be found at www.iastate.edu/grad_students.asp.

Well-qualified juniors and seniors in agricultural engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue a bachelor of science degree in agricultural engineering and a master of science degree in agricultural engineering. Under concurrent enrollment, students are eligible for assistantships and simultaneously take undergraduate and graduate courses.

For the master of science program, at least 30 credits of acceptable graduate work must be completed with a minimum of 22 credits of course work; corresponding numbers for the master of engineering program are 32 and 27. For the doctor of philosophy degree, at least 72 credits of acceptable graduate work must be completed with a minimum of 42 credits of course work. All Ph.D. students must complete a teaching/extension experience prior to graduation.

A concurrent master of science and master of business administration program is also offered by the department.

The department also offers both master of science and doctor of philosophy degrees in industrial and agricultural technology (see Graduate Majors).

The department also participates in interdepartmental majors in environmental science, sustainable agriculture, biorenewable resources and technology, human and computer interaction, and toxicology (see Index).

Curriculum in Agricultural Engineering

Administered by the Department of Agricultural and Biosystems Engineering.

Leading to the degree bachelor of science.
Total credits required: 127.5 cr. See also Basic Program and Special Programs.
International Perspectives: 3 cr.1
U.S. Diversity: 3 cr.1

Communication Proficiency/Library requirement:

ENGL 150 Critical Thinking and Communication 3
ENGL 250 Written, Oral, Visual, and Electronic Composition 3
LIB 160 Library Instruction 0.5
One of the following 3
AGEDS 311 Presentation and Sales Strategies for Agricultural Audiences
ENGL 309 Report and Proposal Writing
ENGL 314 Technical Communication
SP CM 212 Fundamentals of Public Speaking

Social Sciences and Humanities: 12 cr.2
3 credits from international perspectives 3
3 credits from U.S. diversity university-approved list 3
6 additional credits from Social Sciences and Humanities courses 6

Basic Program: 26.5 cr.4
CHEM 167 General Chemistry for Engineering Students 4
or CHEM 177 General Chemistry I 1
ENGL 150 Critical Thinking and Communication 3
ENGL 250 Written, Oral, Visual, and Electronic Composition * 3
ENGR 101 Engineering Orientation R
ENGR 160 Engineering Problems with Computer Applications Laboratory 3
LIB 160 Library Instruction 0.5
MATH 165 Calculus I 4
MATH 166 Calculus II 4
PHYS 221 Introduction to Classical Physics I ** 5
Total Credits 26.5

* see above for grade requirements
** See Basic Program rule

Math and Physical Science: 9 cr.

CHEM 167L Laboratory in General Chemistry for Engineering Students 1
or CHEM 177L Laboratory in General Chemistry I 1
PHYS 222 Introduction to Classical Physics II 5
STAT 305 Engineering Statistics 3
Total Credits 9

Ag Engineering Core: 24 cr.4

A E 216 Fundamentals of Agricultural and Biosystems Engineering 3
A E 316 Applied Numerical Methods for Agricultural and Biosystems Engineering 3
A E 363 Agri-Industrial Applications of Electric Power and Electronics 4
A E 415 Agricultural Engineering Design I 2
A E 416 Agricultural Engineering Design II 2
E M 274 Statics of Engineering 3
E M 324 Mechanics of Materials 3
E M 327 Mechanics of Materials Laboratory 1
MATH 266 Elementary Differential Equations 3
Total Credits 24

Other Remaining Courses: 16 cr.

A E 110 Experiencing Agricultural and Biosystems Engineering 1
A E 201 Preparing for Workplace Seminar 1
A E 218 Project Management & Design in Agricultural and Biosystems Engineering 2

Agricultural and Environmental Systems Engineering Option: 40 cr.

A E 271 Engineering Applications of Parametric Solid Modeling 1
or A E 272 Parametric Solid Models, Drawings, and Assemblies Using Pro/ENGINEER 1
A E 431 Design and Evaluation of Soil and Water Conservation Systems 3
A E 472 Design of Environmental Modification Systems for Animal Housing 3
BIOL 211 Principles of Biology I 3
C E 332 Structural Analysis I 3
C E 372 Engineering Hydrology and Hydraulics 4
E M 378 Mechanics of Fluids 3
One of the following 3
A E 340 Functional Analysis and Design of Agricultural Field Machinery 3
A E 478 Wood Frame Structural Design or BSE 480 Engineering Analysis of Biological Systems 3
One course from Biological and Natural Resource Sciences list 3
Electives 14
Total Credits 40

Power and Machinery Engineering Option: 40 cr.

A E 271 Engineering Applications of Parametric Solid Modeling 1
or A E 272 Parametric Solid Models, Drawings, and Assemblies Using Pro/ENGINEER 1
A E 340 Functional Analysis and Design of Agricultural Field Machinery 3
A E 342 Agricultural Tractor Power 3
A E 413 Fluid Power Engineering 3
AGRON 154 Fundamentals of Soil Science 3
BIOL 211 Principles of Biology I 3
E M 345 Dynamics 3
EM 378 Mechanics of Fluids 3
M E 324 Manufacturing Engineering 4
M E 325 Machine Design 3
MAT E 273 Principles of Materials Science and Engineering 3
One of the following 3
A E 431 Design and Evaluation of Soil and Water Conservation Systems 3
A E 469 Grain Processing and Handling 3
A E 472 Design of Environmental Modification Systems for Animal Housing 3
A E 478 Wood Frame Structural Design 3
BSE 480 Engineering Analysis of Biological Systems 3
Electives 5
Total Credits 40

Co-op/Internships (Optional)

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.
2. Choose from department approved list.
3. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.
4. 2.00 required including transfer courses.

Courses primarily for undergraduate students

A E 110. Experiencing Agricultural and Biosystems Engineering.
(0-2) Cr. 1. S.
Laboratory-based, team-oriented experiences in a spectrum of topics common to the practice of agricultural and biosystems engineering. Report writing, co-ops, internships, careers, registration planning.

(Cross-listed with BSE). (2-2) Cr. 3. S.
Prereq: Satisfactory scores in math placement assessments; credit or enrollment in MATH 142. Applications of multi-view drawings and dimensioning. Techniques for visualizing, analyzing, and communicating 3-D geometries. Application of the design process including written and oral reports.

A E 201. Preparing for Workplace Seminar.
(Cross-listed with BSE, TSM). (1-0) Cr. 1.
Prereq: Sophomore classification in A E, AST, BSE or TSM. 8 week course. Professionalism in the context of the engineering/technical workplace. Development and demonstration of key workplace competencies: teamwork, initiative, communication, innovation, and customer focus. Resumes; Professional portfolios; Preparation for internship experiences.

A E 216. Fundamentals of Agricultural and Biosystems Engineering.
(Cross-listed with BSE). (2-2) Cr. 3. Prereq: ENGR 160, credit or enrollment in MATH 166. Application of mathematics and engineering sciences to mass and energy balances in agricultural and biological systems. Emphasis is on solving engineering problems in the areas of heat and mass transfer, air and water vapor systems; animal production systems, grain systems; food systems, hydrologic systems, and bioprocessing.

A E 218. Project Management & Design in Agricultural and Biosystems Engineering.
(Cross-listed with BSE). (1-2) Cr. 2. S.
Prereq: Engr 170 or TSM 116 or equivalent. Project management - critical path, Gantt charts, resource allocations, basic project budgeting, and project management software. Engineering design approaches. Open-ended design projects to demonstrate the preceding principles through application of technical concepts taught in prerequisite coursework.

A E 271. Engineering Applications of Parametric Solid Modeling.
(1-2) Cr. 1. Prereq: Engr 170 or TSM 116 or equivalent. 8 week-course. Creating, editing, and documenting part and assembly models using Solidworks.

A E 272. Parametric Solid Models, Drawings, and Assemblies Using Pro/ENGINEER.
(1-2) Cr. 1.
Prereq: Engr 170 or TSM 116 or equivalent. 8 week-course. Applications of Pro/ENGINEER software. Create solid models of parts and assemblies. Utilize the solid models to create design documentation: standard drawings views, dimensions, and notes.

A E 298. Cooperative Education.
Cr. R. F.S.SS.
Prereq: Permission of department and Engineering Career Services
First professional work period in the cooperative education program. Students must register for this course before commencing work.

(Cross-listed with BSE). (2-2) Cr. 3. Prereq: ENGR 160, MATH 266. Computer aided solution of agricultural engineering problems by use of numerical techniques and mathematical models. Systems analysis and optimization applicable to agricultural and biological systems.

(Cross-listed with AGRON, ANS 5, BSE, BUSAD, ECON, TSM). (3-0) Cr. 3.
Prereq: ECON 101, CHEM 163 or higher, MATH 140 or higher. Converting biorenewable resources into bioenergy and biobased products. Biorenewable concepts as they relate to drivers of change, feedstock production, processes, products, co-products, economics, and transportation/logistics.

(2-2) Cr. 3.

A E 342. Agricultural Tractor Power.
(2-3) Cr. 3. Prereq: CHE 381 or M E 231. Thermodynamic principles and construction of tractor engines. Fuels, combustion, and lubrication. Kinematics and dynamics of tractor power applications; drawbar, power take-off and traction mechanisms. Nonmajor graduate credit.

A E 388. Sustainable Engineering and International Development.
(Cross-listed with C.E., E.E., M.E., MATE). (2-2) Cr. 3. Prereq: Junior classification in engineering. Multi-disciplinary approach to sustainable engineering and international development, sustainable development, appropriate design and engineering, feasibility analysis, international aid, business development, philosophy and politics of technology, and ethics in engineering. Engineering-based projects from problem formulation through implementation. Interactions with partner community organizations or international partners such as nongovernment organizations (NGOs). Course readings, final project/design report.
Meets International Perspectives Requirement.

A E 396. Summer Internship.
Cr. R. Repeatable. SS.
Prereq: Permission of department and Engineering Career Services
Summer professional work period.

A E 397. Engineering Internship.
Cr. R. Repeatable. F.S.
Prereq: Permission of department and Engineering Career Services
One semester maximum per academic year professional work period.

A E 398. Cooperative Education.
Cr. R. F.S.SS.
Prereq: 288, permission of department and Engineering Career Services
Second professional work period in the cooperative education program. Students must register for this course before commencing work.

A E 403. Modeling and Controls for Agricultural Systems.
(Dual-listed with 503). (Cross-listed with BSE). (2-2) Cr. 3. Alt. S., offered 2013. Prereq: 363, MATH 267. Modeling dynamic systems with ordinary differential equations. Introduction to state variable methods of system analysis. Analysis of mechanical, electrical, and fluid power systems. Analytical and numerical solutions of differential equations. Introduction to classical control theory. Feedback and stability examined in the s domain. Frequency response as an analytical and experimental tool. MATLAB will be used throughout the course for modeling.
A E 404. Instrumentation for Agricultural and Biosystems Engineering.  
(Dual-listed with 504). (2-2) Cr. 3. F. Prereq: 363 or CPR E 281  
Interfacing techniques for computer-based data acquisition and control systems. Basic interfacing components including A/D and D/A conversion, signal filtering, multiplexing, and process control. Sensors and theory of operation applied to practical monitoring and control problems.

A E 408. GIS and Natural Resources Management.  
(Dual-listed with 508). (Cross-listed with ENSECI). (2-2) Cr. 3. F. Prereq: Working knowledge of computers and Windows environment  
Introduction to fundamental concepts and applications of GIS in natural resources management with specific focus on watersheds. Topics include: basic GIS technology, data structures, database management, spatial analysis, and modeling; visualization and display of natural resource data. Case studies in watershed and natural resource management using ArcView GIS.

(Dual-listed with 510). Cr. 3.  
System architecture and design of electronics used in agricultural machinery and production systems. Emphasis on information technology and systems integration for automated agriculture processes. Design of Controller Area Network (CAN BUS) communication systems and discussion of relevant standards (ISO 11783 and SAE J1939). Application of technologies for sensing, distribution, and control of agricultural machinery will be emphasized. Nonmajor graduate credit.

A E 411. Bioprocessing and Bioproducts.  
(Dual-listed with 511). (Cross-listed with BIOE, BSE, C E). (3-0) Cr. 3. F. Prereq: A E 216 or equivalent, MATH 160 or 165, one of CHEM 167 or higher, BIOL 173 or 211 or higher or BRT 501, senior or graduate classification  

A E 413. Fluid Power Engineering.  
(Cross-listed with M E). (2-2) Cr. 3. F. Prereq: Credit or enrollment in E M 378 or M E 335, A E 216 or M E 270  

A E 415. Agricultural Engineering Design I.  
(Cross-listed with BSE). (1-2) Cr. 2. FS. Prereq: 271 or 272, E M 324  
Identification of current design problems in agricultural engineering. Development of alternate solutions using creativity and engineering analysis and synthesis techniques. Nonmajor graduate credit.

A E 416. Agricultural Engineering Design II.  
(Cross-listed with BSE). (1-2) Cr. 2. FS. Prereq: 415  
Selection of promising solutions to design problems identified in 415 for development by design teams. Presentation of designs through oral and written reports and prototypes. Nonmajor graduate credit.

A E 424. Air Pollution.  
(Dual-listed with 524). (Cross-listed with C E, ENSECI). (1-0) Cr. 1. Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above  
1 cr. per module. Module A prerequisite for all modules; module B prerequisite for D and E.

A. Air quality and effects of pollutants  
B. Climate change and causes  
C. Transportation constraints  
D. Off-gas treatment technology  
E. Agricultural sources of pollution

(Dual-listed with 531). (2-3) Cr. 3. F. Prereq: E M 378 or CH E 356  

A E 432. Nonpoint Source Pollution and Control.  
(Dual-listed with 532). (3-0) Cr. 3. F. Prereq: EM 378 or CH E 356 or ME 335  
Characteristics and courses of non-point source (NPS) pollution in agricultural and urban watersheds, computer modeling and NPS pollution for terrestrial and aquatic systems, strategies to control and manage NPS pollution of water bodies, total maximum daily loads (TMDLs) and integrated watershed management. Graduate students are required to review research papers and develop/deliver lecture models on assigned topics.

(Dual-listed with 536). (2-3) Cr. 3. Alt. S., offered 2013. Prereq: A E 431 or permission of the instructor  
Development of monitoring systems that support effective planning, performance evaluation, modeling, or environmental impact assessment of soil-, water-, and waste-management systems. Typical soil and water pollutants and physical, chemical, and biological characteristics that affect sample location and timing. Sample collection, documentation, chain-of-custody, and quality assurance procedures.

A E 451. Food and Bioprocess Engineering.  
(Dual-listed with 551). (3-0) Cr. 3. F. Prereq: 216 and M E 436 or CH E 357, or FS HN 351 and MATH 266 or 267  
Application of engineering principles and mathematical modeling to the quantitative analysis of food and bioprocessing systems. Physical/chemical characteristics of foods and biological systems, flow processes, thermal processes and separation processes.

A E 466. Multidisciplinary Engineering Design.  
(Cross-listed with AER E, CPR E, ENGR, E E, I E, M E, MAT E). (1-4) Cr. 3. Repeatable. F. S. Prereq: Student must be within two semesters of graduation and receive permission of the instructor  
Application of team design concepts to projects of a multidisciplinary nature. Concurrent treatment of design, manufacturing and life cycle considerations. Application of design tools such as CAD, CAM, and FEM. Design methodologies, project scheduling, cost estimating, quality control, manufacturing processes. Development of a prototype and appropriate documentation in the form of written reports, oral presentations, computer models and engineering drawings.

A E 469. Grain Processing and Handling.  
(Dual-listed with 569). (Cross-listed with BSEI). (2-3) Cr. 3. S. Prereq: 216  
Cereal grain and oilseed properties, quality measurement, processing, and end-use value. Design of drying systems using computer simulation. Corn wet and dry milling. Soybean oil extraction. Grain handling systems.

(Dual-listed with 572). (3-0) Cr. 3. Alt. S., offered 2012. Prereq: 216, M E 231  
Principles and design of animal environmental control systems. Insulation, heat and mass transfer, fans, ventilation, air distribution, heating and cooling equipment, energy use, control strategies.
A E 478. Wood Frame Structural Design.
(Dual-listed with 578). (3-0) Cr. 3. Alt. S., offered 2013. Prereq: 216, E M 324

A E 490. Independent Study.
Cr. 1-4. Repeatable.
B. Biosystems Engineering
C. Computer-aided Design
E. Environmental Systems
F. Food Engineering
H. Honors
O. Occupational Safety
P. Power and Machinery Engineering
Q. Structures
R. Process Engineering
S. Environmental and Natural Resources Systems
U. Waste Management

A E 496. Agricultural and Biosystems Engineering Travel Course.
(Cross-listed with BSE). Cr. 1-4. Repeatable. F.S.SS. Prereq: Permission of instructor
Limited enrollment. Tour and study of international agricultural and biosystems engineering as applied to biorenewable and food systems. Location and duration of tours will vary. Travel expenses paid by students. Course requires completion of options A, B, and C or option D.

A. Pre-departure
B. Travel (R credit)
C. Post-travel
D. Combination (Pre-departure, Travel, and Post-travel)

A E 498. Cooperative Education.
Cr. R. Repeatable. F.S.SS. Prereq: 398, permission of department and Engineering Career Services
Third and subsequent professional work periods in the cooperative education program. Students must register for this course before commencing work.

Courses primarily for graduate students, open to qualified undergraduate students

(Cross-listed with BRT). (3-0) Cr. 3. S. Prereq: Undergraduate training in an engineering or physical or biological discipline or degrees in agriculture or economics
Introduction to the science and engineering of converting biorenewable resources into bioenergy and biobased products. Survey of biorenewable resource base and properties; description of biobased products; methods of biorenewable resource production; processing technologies for fuels, chemicals, materials, and energy; environmental impacts; economics of biobased products and bioenergy.

A E 503. Modeling and Controls for Agricultural Systems.
(Dual-listed with 403). (2-2) Cr. 3. Alt. S., offered 2013. Prereq: 363, MATH 267
Modeling dynamic systems with ordinary differential equations. Introduction to state variable methods of system analysis. Analysis of mechanical, electrical, and fluid power systems. Analytical and numerical solutions of differential equations. Introduction to classical control theory. Feedback and stability examined in the s domain. Frequency response as an analytical and experimental tool. MATLAB will be used throughout the course for modeling. Individual and/or group projects required for graduate credit.

A E 504. Instrumentation for Agricultural and Biosystems Engineering.
(Dual-listed with 404). (2-2) Cr. 3. F. Prereq: 363 or CPR E 281
Interfacing techniques for computer-based data acquisition and control systems. Basic interfacing components including A/D and D/A conversion, signal filtering, multiplexing, and process control. Sensors and theory of operation applied to practical monitoring and control problems. Individual and group projects required for graduate credit.

A E 506. Applied Computational Intelligence.
(2-2) Cr. 3. Alt. F., offered 2012. Prereq: A E 316 or equivalent, MATH 166, STAT 305
Applications of biologically inspired computational intelligence tools for data mining, system modeling, and optimization for agricultural, biological and other engineered systems. Introduction to Artificial Neural Networks, Support Vector Machines, Fuzzy Logic, Genetic Algorithms, Bayesian and Decision Tree learning. Fundamental Machine Vision techniques will be introduced in the first part of course and be integrated into the lab exercises for learning different computational intelligence techniques. MATLAB will be used throughout the course for algorithm implementation.

A E 508. GIS and Natural Resources Management.
(Dual-listed with 408). (Cross-listed with ENSCI). (2-2) Cr. 3. F. Prereq: Working knowledge of computers and Windows environment
Introduction to fundamental concepts and applications of GIS in natural resources management with specific focus on watersheds. Topics include: basic GIS technology, data structures, database management, spatial analysis, and modeling; visualization and display of natural resource data. Case studies in watershed and natural resource management using ArcView GIS. In addition to other assignments, graduate students will prepare research literature reviews on topics covered in class and develop enterprise applications.

(Dual-listed with 410). Cr. 3. Prereq: 363 or equivalent.
System architecture and design of electronics used in agricultural machinery and production systems. Emphasis on information technology and systems integration for automated agriculture processes. Design of Controller Area Network (CAN BUS) communication systems and discussion of relevant standards (ISO 11783 and SAE J1939). Application of technologies for sensing, distribution control, and automation of agricultural machinery will be emphasized.

A E 511. Bioprocessing and Bioproducts.
(Dual-listed with 411). (Cross-listed with BRT, C E). (3-0) Cr. 3. F. Prereq: A E 216 or equivalent, MATH 160 or 165, one of CHEM 167 or higher, BIOL 173 or 211 or higher or BRT 501, senior or graduate classification

(Cross-listed with AGRON, AN S, SUSAG). (3-0) Cr. 3. Alt. F., offered 2011
Prereq: SUSAG 509
Methods to maintain productivity and minimize the negative ecological effects of agricultural systems by understanding nutrient cycles, managing manure and crop residue, and utilizing multispecies interactions. Crop and livestock production within landscapes and watersheds is also considered. Course includes a significant field component, with student teams analyzing Iowa farms.

A E 524. Air Pollution.
(Dual-listed with 424). (Cross-listed with C E, ENSCI). (1-0) Cr. 1. Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics, Senior classification or above or permission of instructor
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

A. Air quality and effects of pollutants
B. Climate change and causes
C. Transportation constraints
D. Off-gas treatment technology.
E. Agricultural sources of pollution

(Dual-listed with 431). (Cross-listed with ENSCI). (2-3) Cr. 3. F. Prereq: E M 378 or CH E 356.
Hydrology and hydraulics in agricultural and urbanizing watersheds.
Design and evaluation of systems for the conservation and quality preservation of soil and water resources. Use and analysis of hydrologic data in engineering design; relationship of topography, soils, crops, climate, and cultural practices in conservation and quality preservation of soil and water for agriculture. Small watershed hydrology, water movement and utilization in the soil-plant-atmosphere system, agricultural water management, best management practices, and agricultural water quality. Graduate students will prepare several research literature reviews on topics covered in the class in addition to the other assignments.

A E 532. Nonpoint Source Pollution and Control.
(Dual-listed with 432). (3-0) Cr. 3. F. Prereq: EM 378 or CH E 356 or ME 335.
Characteristics and courses of non-point source (NPS) pollution in agricultural and urban watersheds, computer modeling and NPS pollution for terrestrial and aquatic systems, strategies to control and manage NPS pollution of water bodies, total maximum daily loads (TMDLs) and integrated watershed management. Graduate students are required to review research papers and develop/deliver lecture models on assigned topics.

(Cross-listed with ENSCI). (3-0) Cr. 3. Alt. F. offered 2012. Prereq: 422 or C E 372, MATH 266.
Soil erosion processes, modified universal soil loss equation and its application to conservation planning, sediment properties, initiation of sediment motion and overland flow, flow in alluvial channels and theory of sediment transport, channel stability, reserves sedimentation, wind erosion, BMPs for controlling erosion.

Development of monitoring systems that support effective planning, performance evaluation, modeling, or environmental impact assessment of soil-, water-, and waste-management systems. Typical soil and water pollutants and physical, chemical, and biological characteristics that affect sample location and timing. Sample collection, documentation, chain-of-custody, and quality assurance procedures. In addition to other assignments, graduate students will prepare several research literature reviews on topics covered in the class and develop monitoring plans.

(2-2) Cr. 3. Alt. F., offered 2011. Prereq: CE 372 or equivalent.
A project-based course to develop a water quality improvement plan. The legislative and judicial basis of the Total Maximum Daily Load (TMDL) program, different approaches for TMDL development, data needs and sources, SWAT modeling, and principles and techniques for implementation of water quality improvement plans.

A E 551. Food and Bioprocess Engineering.
(Dual-listed with 451). (3-0) Cr. 3. F. Prereq: 216 and ME 436 or CH E 357, or FS HN 351 and MATH 266 or 267.
Application of engineering principles and mathematical modeling to the quantitative analysis of food and bioprocessing systems. Physical/chemical characteristics of foods and biological systems, flow processes, thermal processes and separation processes. Term paper required for graduate credit.

A E 568. Pretreatment of Biomass.
(1-2) Cr. 2. S. Prereq: 216 or equivalent.
Review of lignocellulosic chemistry; chemical and physical impacts of pretreatment; impact of pretreatment on downstream processing; pretreatment economics. Lab experiments using current and novel pretreatment methods.

A E 569. Grain Processing and Handling.
(Dual-listed with 469). (2-3) Cr. 3. S. Prereq: 216.
Cereal grain and oilseed preservation, quality measurement, and end-use value. Design of drying systems using computer simulation. Corn wet and dry milling. Soybean oil extraction. Grain handling systems. Individual and group projects required for graduate credit.

(Dual-listed with 472). (3-0) Cr. 3. Alt. S., offered 2012. Prereq: 216, M E 231.
Principles and design of animal environmental control systems. Insulation, heat and mass transfer, fans, ventilation, air distribution, heating and cooling equipment, and controls. Individual and group projects required for graduate credit.

A E 578. Wood Frame Structural Design.
(Dual-listed with 478). (3-0) Cr. 3. Alt. S., offered 2013. Prereq: 216, M E 324.

A E 590. Special Topics.
Cr. 1-3. Repeatable.
B. Biosystems Engineering
F. Food Engineering
O. Occupational Safety
P. Power and Machinery Engineering
Q. Structures and Environment
R. Process Engineering
S. Water and Environment
U. Waste Management

A E 598. Technical Communications for a Master’s Degree.
(Cross-listed with TSM). Cr. 1. F.S.S.S.
A technical paper draft based on the M.S. thesis or creative component is required of all master’s students. This paper must be in a form that satisfies the requirements of some specific journal and be ready for submission. A technical presentation based on M.S. thesis or creative component is required of all master’s students. This presentation must be in a form that satisfies the normal presentation requirements of a professional society. The presentation itself (oral or poster) may be made at a professional society meeting or at any international, regional, state, or university conference/event as long as the presentation content and form conforms to normal expectations. Offered on a satisfactory-fail basis only.

A E 599. Creative Component.
Cr. arr. Repeatable.

Courses for graduate students
A E 601. Graduate Seminar.
(Cross-listed with TSM). (1-0) Cr. 1. F.
Keys to writing a good M.S thesis or PhD dissertation. How to begin formulating research problems. Discussion of research problems, review of literature, research hypothesis, objectives, methods, procedures, and reports. Research grant proposals, patents and intellectual property rights, and international research centers of excellence will be discussed.
A E 610. Foundations of Sustainable Agriculture.
(Cross-listed with ANTHR, SOC, SUSAG, AGRON). (3-0) Cr. 3. F.
Prereq: Graduate classification, permission of instructor
Historical, biophysical, socioeconomic, and ethical dimensions of agricultural sustainability. Strategies for evaluating existing and emerging systems of agriculture in terms of core concepts of sustainability and their theoretical contexts.

A E 690. Advanced Topics.
Cr. arr. Repeatable.

A E 694. Teaching Practicum.
(Cross-listed with TSM). Cr. 1-3. Repeatable. F.S.S.
Prereq: Graduate classification and permission of instructor
Graduate student experience in the agricultural and biosystems engineering departmental teaching program.

A E 697. Engineering Internship.
Cr. R. Repeatable. Prereq: Permission of department chair, graduate classification
One semester and one summer maximum per academic year professional work period.

A E 698. Technical Communications for a Doctoral Degree.
(Cross-listed with TSM). Cr. 1. F.S.S.
A technical paper draft based on the dissertation is required of all Ph.D. students. This paper must be in a form that satisfies the requirements of some specific journal and be ready for submission. A technical presentation based on the dissertation is required of all Ph.D. students. This presentation must be in a form that satisfies the normal presentation requirements of a professional society. The presentation itself (oral or poster) may be made at a professional society meeting or at any international, regional, state, or university conference/event as long as the presentation content and form conforms to normal expectations. Offered on a satisfactory-fail basis only.

Cr. arr. Repeatable.

Minor administered by the College of Engineering

**Undergraduate Study**

The program is open to all undergraduate engineering students at Iowa State University. This minor will provide students with a foundation of core Bioengineering knowledge, on which tracks will be superimposed to provide in-depth exposure to targeted areas of specialization. In addition to the core courses—BIOE 201 Introduction to Bioengineering I and BIOE 202 Introduction to Bioengineering II—students will complete coursework identified in the following tracks:

**Bioinformatics and Systems Biology:**

- BIOE 325 Systems Biology for Engineering 3
- BCBIO 211 Introduction to Bioinformatics and Computational Biology 3
- BCBIO 401 Fundamentals of Bioinformatics and Computational Biology I 3
- BCBIO 402 Fundamentals of Bioinformatics and Computational Biology II 3
- BCBIO 442 Bioinformatics and Computational Biology Techniques 0.5

**Biomaterials and Biomechanics:**

- BIOE 352 Molecular, Cellular and Tissue Biomechanics 3
- KIN 355 Biomechanics 3
- CH E 440 Biomedical Applications of Chemical Engineering 3
- MAT E 456 Biomaterials 3

**Biomicrosystems:**

- BIOE 341 BioMEMs and Nanotechnology 3
- BIOE 341L BioMEMS and Nanotechnology Laboratory 1
- BIOE 429 Image Processing with Biomedical Applications 3
- BIOE 450 Biosensing 3
- BIOE 450L Biosensing Laboratory 1

**Biosystems and Environmental Engineering:**

- A E 216 Fundamentals of Agricultural and Biosystems Engineering 3
- BIOE 411 Bioprocessing and Bioproducts 3
- BSE 480 Engineering Analysis of Biological Systems 3
- CH E 415 Biochemical Engineering 3
- CH E 427 Biological Engineering Laboratory 2
- C E 421 Environmental Biotechnology 3
- or C E 521 Environmental Biotechnology 3

**Courses primarily for undergraduate students**

**BIOE 201. Introduction to Bioengineering I.**

(3-0) Cr. 3. Prereq: CHEM 167

An exploration of cell structure and function, cellular metabolism, types of life forms, energy transport and use, biomolecule structure and function, and enzyme structure, function, and kinetics, with strong mathematical emphasis.

**BIOE 202. Introduction to Bioengineering II.**

(3-0) Cr. 3. Prereq: BIOE 201

Feedback loops in biological systems, cell and microbial growth patterns, fermentation kinetics. Biotechnology in diseases, wastewater treatment, genetic engineering of bacteria, fungi, plants, and animals, and biosensor operation. Strong mathematical emphasis.

**BIOE 325. Systems Biology for Engineering.**

(Cross-listed with E E). (3-0) Cr. 3. Prereq: 202, MATH 267

**BIOE 341. BioMEMs and Nanotechnology.**

(3-0) Cr. 3. Prereq: 202

Overview of Micro-Electro-Mechanical-System (MEMS) technologies for bioengineering, fundamentals of microfluidic device design, fabrication, and characterization, survey of microfluidic functional building blocks for lab-on-a-chip applications including mixers, valves, channels, and chambers. Topics of nanotechnology in bioengineering, nanoscale building block technologies for bioengineering including self-assembling, surface chemical treatment, nano-imprinting, nano-particles, nano-tubes, nanowires, and stimuli-responsive biomaterials.

L. BioMEMS and Nanotechnology Laboratory

**BIOE 341L. BioMEMS and Nanotechnology Laboratory.**

(0-3) Cr. 1. Prereq: 202, concurrent enrollment in 341

**BIOE 352. Molecular, Cellular and Tissue Biomechanics.**

(3-0) Cr. 3. Prereq: 201, E M 324, Mat E 272

Introduction to the anatomy of the musculoskeletal system and connective tissue. Range of movement, joint dislocation, bone deformity and fracture. Application of continuum mechanics to both living and non-living systems. Laws of motion, free-body diagrams and simple force analysis of musculoskeletal system. Biomechanical response of soft and hard tissues with emphasis on microstructure and mechanical properties. Applications to bioengineering design.

**BIOE 411. Bioprocessing and Bioproducts.**

(Cross-listed with A E, BSE, C E). (3-0) Cr. 3. F. Prereq: A 216 or equivalent, MATH 160 or 165, one of CHEM 167 or higher, BIOL 173 or 211 or higher or BRT 501, senior or graduate classification

**BIOE 428. Image Processing with Biomedical Applications.**

(3-0) Cr. 3. Prereq: E E 324

**BIOE 450. Biosensing.**

(3-0) Cr. 3. Prereq: 202

Overview of biosensors and bioanalytical challenges; designing for performance including various analytical problems, ion-selective membranes, characteristics of enzymes and basics of bioaffinity sensing; fundamentals of bioselective layers including depositing films and membranes, surfaces for immobilization and bioselective agents; survey of different biosensing technologies including electroanalytical, biomembrane, optical, and acoustic-wave based sensors.

L. Biosensing Laboratory
BIOE 450L. Biosensing Laboratory.
(0-3) Cr. 1. Prereq: 202, concurrent enrollment in BIOE 450
Laboratory course accompanying BIOE 450. Design, fabrication, and
characterization of various electrical, chemical, polymer, optical and
acoustic sensors. Lab is not a necessary corequisite with BIOE 450.
Undergraduate Study

For the undergraduate curriculum in biological systems engineering leading to the degree bachelor of science. In 2012, this curriculum will undergo initial accreditation under the General Criteria and Program Criteria for Biological Engineering Programs by the Engineering Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21201; telephone (410) 347-7700, http://www.abet.org/

Curriculum Educational Goal, Objectives, and Learning Outcomes

Goal: To train students to solve problems related to biorenewables production and processing, water quality, environmental impacts of the bioeconomy, food processing, and biosensors, and in so doing to prepare students for professional practice and post-graduate educational opportunities.

Program Educational Objectives: Graduates are prepared to achieve the following career and professional accomplishments:

1. Competence in methods of analysis involving engineering sciences, fundamental physical and biological sciences, mathematics, and computation needed for the practice of biological systems engineering in biorenewable, bioenvironmental, and food-related companies and agencies.
2. Skills necessary to the design process; including the abilities to think creatively, to formulate problem statements, to communicate effectively, to synthesize information, and to evaluate and implement problem solutions.
3. Ability to address issues of ethics, safety, professionalism, cultural diversity, globalization, environmental impact, and social and economic impact in engineering practice.
4. Continuous professional and technical growth, with practical experience, so as to be licensed as a professional engineer or achieve that level of expertise.
5. The ability to:
   A. be a successful leader of multi-disciplinary teams,
   B. efficiently manage multiple simultaneous projects,
   C. work collaboratively,
   D. implement multi-disciplinary systems-based solutions,
   E. apply innovative solutions to problems through the use of new methods or technologies,
   F. contribute to the business success of their employer, and
   G. build community

Program Educational Outcomes: At graduation, students will have developed and demonstrated:

1. Competence in engineering analysis relevant to the practice of biological systems engineering in biorenewable, bioenvironmental, and food-related companies and agencies.
2. Competence in engineering design, including the ability to think creatively, to formulate problem statements, to communicate effectively, to synthesize information, and to evaluate and implement problem solutions.
3. The capability to consider ethics, safety, professionalism, cultural diversity, globalization, environmental, social, and economic issues in engineering practice.
4. The ability to work successfully in multidisciplinary teams, and to manage complex and/or multiple projects.

Graduate Study

The department offers master of science, master of engineering, and doctor of philosophy degrees with a major in agricultural engineering. Within the agricultural engineering major the student may specialize in advanced machinery engineering, animal production systems engineering, biological and process engineering, occupational safety engineering, or water and environmental stewardship engineering. Details on current research programs available at http://www.abe.iastate.edu/. Departmental graduate student guidelines can be found at www.iastate.edu/grad_students.asp.

Well-qualified juniors and seniors in biological systems engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue a bachelor of science degree in biological systems engineering and a master of science degree in agricultural engineering. Under concurrent enrollment, students are eligible for assistantships and simultaneously take undergraduate and graduate courses.

For the master of science program, at least 30 credits of acceptable graduate work must be completed with a minimum of 22 credits of course work; corresponding numbers for the master of engineering program are 32 and 22. For the doctor of philosophy degree, at least 72 credits of acceptable graduate work must be completed with a minimum of 42 credits of course work. All Ph.D. students must complete a teaching/extension experience prior to graduation.

A concurrent master of science and master of business administration program is also offered by the department.

The department also offers both master of science and doctor of philosophy degrees in industrial and agricultural technology (see Graduate Majors).

The department also participates in interdepartmental majors in environmental science, sustainable agriculture, biorenewable resources and technology, human and computer interaction, and toxicology (see Index).

Biological Systems Engineering integrates life sciences with engineering to solve problems related to, or using, biological systems. These biological systems may include microbes, plants, animals, humans and/or ecosystems. Biological systems engineers have a worldview shaped by an understanding of fundamental principles of engineering and life science. They use their understanding of engineering to analyze organisms or ecosystems, and their knowledge of biological systems to inspire and inform their designs. They approach engineering design from a biological systems perspective, appreciating the complexity of biological systems and developing solutions that accommodate and anticipate the adaptability of biological systems.

The department also offers a bachelor of science curriculum in agricultural engineering. See College of Engineering, Curricula. Additionally, the department offers bachelor of science curricula in agricultural systems technology, human and computer interaction, and toxicology (see Index).

Well-qualified juniors and seniors in agricultural engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue a bachelor of science degree in biological systems engineering and a master of science degree in agricultural engineering. Refer to Graduate Study for more information.

Curriculum in Biological Systems Engineering

Administered by the Department of Agricultural and Biosystems Engineering.

Leading to the degree bachelor of science.
Total credits required: 127.5 cr. See also Basic Program and Special Programs.
International Perspectives: 3 cr.1
U.S. Diversity: 3 cr.1

Co-op/Internships (Optional)
1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program.
2. Choose from department approved list.

Curriculum in Industrial Technology
Administered by the Department of Agricultural and Biosystems Engineering.

An undergraduate certificate in occupational safety is available; the requirements appear under Technology Systems Management courses and programs. A minor in Industrial Technology is available; the requirements appear under Technology Systems Management courses and programs.

Students majoring in Industrial Technology choose between two options: Manufacturing or Occupational Safety.

Total Degree Requirement: 128.5 cr.
Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.
U.S. Diversity: 3 cr.

Communication/Library: 12.5 cr.

Courses primarily for undergraduate students

BSE 110. Experiencing Biological Systems Engineering.
(0-2) Cr. 1. S.
Laboratory-based, team-oriented experiences in a spectrum of topics common to the practice of biological systems engineering. Report writing, co-ops, internships, careers, registration planning.

(Cross-listed with A E.) (2-2) Cr. 3. Prereq: Satisfactory scores in math placement assessments; credit or enrollment in MATH 142. Applications of multi-view drawings and dimensioning. Techniques for visualizing, analyzing, and communicating 3-D geometries. Application of the design process including written and oral reports.

BSE 201. Preparing for Workplace Seminar.
(Cross-listed with TSM, A E.) (1-0) Cr. 1. F.S. Prereq: Sophomore classification in AE, AST, BSE, or I Tec 8 week course. Professionalism in the context of the engineering/technical workplace. Development and demonstration of key workplace competencies: teamwork, initiative, communication, innovation, and customer focus. Resumes; Professional portfolios; Preparation for internship experiences.

BSE 216. Fundamentals of Agricultural and Biosystems Engineering.
(Cross-listed with A E.) (2-2) Cr. 3. F. Prereq: A E 110, ENGR 160, credit or enrollment in MATH 166 Application of mathematics and engineering sciences to mass and energy balances in agricultural and biological systems. Emphasis is on solving engineering problems in the areas of heat and mass transfer, air and water vapor systems; animal production systems, grain systems; food systems, hydrologic systems, and bioprocessing.

BSE 218. Project Management & Design in Agricultural and Biosystems Engineering.
(Cross-listed with A E.) (1-2) Cr. 2. S. Prereq: 216 Project management - critical path, Gantt charts, resource allocations, basic project budgeting, and project management software. Engineering design approaches. Open-ended design projects to demonstrate the preceding principles through application of technical concepts taught in prerequisite coursework.

BSE 298. Cooperative Education.
Cr. R. F.S.S.S. Prereq: Permission of department and Engineering Career Services First professional work period in the cooperative education program. Students must register for this course before commencing work. Offered on a satisfactory-fail basis only.

BSE 316. Applied Numerical Methods for Agricultural and Biosystems Engineering.
(Cross-listed with A E.) (2-2) Cr. 3. F. Prereq: ENGR 160, MATH 266 Computer aided solution of agricultural engineering problems by use of numerical techniques and mathematical models. Systems analysis and optimization applicable to agricultural and biological systems.

BSE 325. Biorenewable Systems.
(Cross-listed with AGRON, A E, AN S, BUSAD, ECON, TSM). (3-0) Cr. 3. F. Prereq: ECON 101, CHEM 163 or higher, MATH 140 or higher Converting biorenewable resources into bioenergy and biobased products. Biorenewable concepts as they relate to drivers of change, feedstock production, processes, products, co-products, economics, and transportation/logistics.

(3-0) Cr. 3. S. Prereq: 216, CH E 357 or ME 436 Unit-operation analysis of biological systems, through the study of mass, energy, and information transport in bioresource production and conversion systems. Quantification and modeling of biomass production, ecological interactions, and bioreactor operations.

BSE 396. Summer Internship.
Cr. R. Repeatable. SS. Prereq: Permission of department and Engineering Career Services Summer professional work period. Offered on a satisfactory-fail basis only.

BSE 397. Engineering Internship.
Cr. R. Repeatable. F.S. Prereq: Permission of department and Engineering Career Services One semester maximum per academic year professional work period. Offered on a satisfactory-fail basis only.

BSE 398. Cooperative Education.
Cr. R. F.S.S.S. Prereq: 298, permission of department and Engineering Career Services Second professional work period in the cooperative education program. Students must register for this course before commencing work. Offered on a satisfactory-fail basis only.

BSE 403. Modeling and Controls for Agricultural Systems.
(Dual-listed with 503). (Cross-listed with A E.) (2-2) Cr. 3. Alt. S., offered 2013. Prereq: 363, MATH 267 Modeling dynamic systems with ordinary differential equations. Introduction to state variable methods of system analysis. Analysis of mechanical, electrical, and fluid power systems. Analytical and numerical solutions of differential equations. Introduction to classical control theory. Feedback and stability examined in the s domain. Frequency response as an analytical and experimental tool. MATLAB will be used throughout the course for modeling.

BSE 411. Bioprocessing and Bioproducts.
(Dual-listed with 511). (Cross-listed with A E, BIOE, C E.) (3-0) Cr. 3. F. Prereq: A E 216 or equivalent, MATH 160 or 165, one of CHEM 167 or higher, BIOL 173 or 211 or higher or BRT 501, senior or graduate classification Sustainability, cleaner production. Taxonomy, kinetics, metabolism, aerobic and anaerobic fermentation. Biofuels, bioenergy and coproducts. Mass/energy balances, process integration, pretreatment, separation. Membrane reactors, bioelectrolysis, microbial fuel cells, nanotechnology, genetic engineering, mutagenesis.

BSE 415. Agricultural Engineering Design I.
(Cross-listed with A E.) (1-2) Cr. 2. F.S. Prereq: A E 271 or 272, E M 324 Identification of current design problems in agricultural engineering. Development of alternate solutions using creativity and engineering analysis and synthesis techniques. Nonmajor graduate credit.

BSE 416. Agricultural Engineering Design II.
(Cross-listed with A E.) (1-2) Cr. 2. F.S. Prereq: 415 Selection of promising solutions to design problems identified in 415 for development by design teams. Presentation of designs through oral and written reports and prototypes. Nonmajor graduate credit.

BSE 469. Grain Processing and Handling.
(Cross-listed with A E.) (2-3) Cr. 3. S. Prereq: A E 216 Cereal grain and oilseed properties, quality measurement, processing, and end-use value. Design of drying systems using computer simulation. Corn wet and dry milling. Soybean oil extraction. Grain handling systems.
BSE 480. Engineering Analysis of Biological Systems.
(Cross-listed with ENSCI). (2-2) Cr. 3. F. Prereq: 216; MATH 266; BIOL 211 or 212; M E 231
Systems-level engineering analysis of biological systems. Economic and life-cycle analysis of bioresource production and conversion systems. Global energy and resource issues and the role of biologically derived materials in addressing these issues. Nonmajor graduate credit.

BSE 496. Agricultural and Biosystems Engineering Travel Course.
(Cross-listed with AE). Cr. 1-4. Repeatable. F.S.SS. Prereq: Permission of instructor
Limited enrollment. Tour and study of international agricultural and biosystems engineering as applied to biorenewable and food systems. Location and duration of tours will vary. Travel expenses paid by students. Course requires completion of options A, B, and C or option D.

A. Pre-departure
B. Travel (R credit)
C. Post-travel
D. Combination (Pre-departure, Travel, and Post-travel)

BSE 498. Cooperative Education.
Cr. R. Repeatable. F.S.SS. Prereq: 398, permission of department and Engineering Career Services
Third and subsequent professional work periods in the cooperative education program. Students must register for this course before commencing work. Offered on a satisfactory-fail basis only.
Chemical Engineering

Administered by the Department of Chemical and Biological Engineering

Undergraduate Study

For undergraduate curriculm in chemical engineering leading to the degree bachelor of science. This curriculum is accredited under the General Criteria and the Chemical Engineering Program Criteria by the Engineering Accreditation Committee of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012 – telephone: (410) 347-7700, http://www.abet.org.

Chemical engineering is a profession, which provides a link between scientific knowledge and manufactured products. The chemical engineer relies on science, experience, creativity, and ingenuity to produce these materials economically. Almost everything of a material nature used by society today has at some point felt the influence of the chemical engineer. From raw materials such as minerals, coal, petroleum, and agricultural products, chemical engineers create versatile intermediate and commodity chemicals, high performance fuels, new materials for construction, pharmaceuticals, high performance foodstuffs, synthetic textiles, plastics, solid state electronic components, and dozens of other engineered materials. The chemical engineer’s influence has been important in the development of catalysts, fuel cells, automated controls, biochemical processes, artificial kidneys, tissue engineering, nuclear energy, medical instruments and devices, as well as in the development of air and water pollution control systems. Many new and equally exciting challenges await the practicing chemical engineer of the future.

The profession of chemical engineering embraces a wide variety of activities including research, process development, product development, design, manufacturing supervision, technical sales, consulting, and teaching. The engineer can be behind a desk, in a laboratory, in a manufacturing plant, or engaged in nationwide and worldwide travel. Successful chemical engineers find chemistry, mathematics, and physics to be interesting and exciting. Many chemical engineers also have interest in the biological sciences. The curriculum in chemical engineering includes continued study of chemistry, biochemistry, mathematics, and physics as well as intensive study in the engineering sciences such as chemical reaction engineering, thermodynamics, mass transfer, fluid mechanics, heat transfer, system analysis and process synthesis, and design.

The curriculum in chemical engineering is designed to produce graduates that have the ability to apply knowledge of mathematics, science, and engineering; the ability to design, conduct and interpret experiments; and the ability to design a chemical engineering system, component, or process. Graduates should also have the ability to function on multidisciplinary teams; the ability to identify, formulate, and solve chemical engineering problems; and the ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

The curriculum should also assure that graduates have the ability to communicate effectively, the broad education necessary to understand the impact of chemical engineering solutions in a global and societal context, and recognition of the need for, and an ability to engage in lifelong learning, as well as a knowledge of contemporary issues and an understanding of professional and ethical responsibility.

The curriculum assures that graduates have a thorough grounding in chemistry, along with a working knowledge of advanced chemistry such as organic, inorganic, physical, analytical, materials chemistry, or biochemistry. In addition, a working knowledge, including safety and environmental aspects, of material and energy balances applied to chemical processes; thermodynamics of physical and chemical equilibria; heat, mass, and momentum transfer; chemical reaction engineering; continuous and stage-wise separation operations; process dynamics and control; process design; and appropriate modern experimental and computing techniques is assured.

A significant number of chemical engineering graduates should have an ability to function as engineers in an international setting and an ability to pursue research and advanced studies in chemical engineering or in related fields such as medicine, law, and business.

Biological Engineering Option

Students may enhance their academic preparation for the growing opportunities in the biologically-related industries by pursuing a selection of courses with a biological emphasis.

A cooperative education program is available to students in chemical engineering.

Graduate Study

The department offers work for the degrees master of science, master of engineering, and doctor of philosophy with major in chemical engineering, and minor work to students taking major work in other departments. Prerequisite to major graduate work is a bachelor’s degree in chemical engineering, chemistry, or other related field. Students with undergraduate background other than chemical engineering should contact the department for further details. A thesis is required for the master of science degree. The master of science degree also requires a minimum of 30 graduate credits (minimum of 15 for coursework, 12 within Ch E and 3 outside). The master of engineering requirements are the same for total credits but include a special project or coursework rather than research thesis. The doctor of philosophy degree requires a minimum of 72 graduate credits (minimum of 30 for coursework, at least 16 inside Ch E and a minimum of 8 credits taken outside of Ch E). Candidates for the doctor of philosophy degree can refer to the department’s homepage and/or the department’s Graduate Student Handbook for degree options and credit requirements.

Curriculum in Chemical Engineering

Administered by the Department of Chemical and Biological Engineering

Leading to the degree bachelor of science.

Total credits required: 125.5 cr. See also Basic Program and Special Programs.

International Perspectives: 3 cr.1

U.S. Diversity: 3 cr.1

Communication Proficiency/Library requirement:

ENGL 150 Critical Thinking and Communication 3
ENGL 250 Written, Oral, Visual, and Electronic Composition 3
LIB 160 Library Instruction (See Basic Program for credit requirements) 0.5

One of the following 3
ENGL 312 Biological Communication
ENGL 314 Technical Communication
JL MC 347 Science Communication
ENGL 309 Report and Proposal Writing

Social Sciences and Humanities: 15 cr.2

Complete a total of 15 cr. with at least 6 cr. but not more than 9 cr. from the same department.

Basic Program: 26.5 cr.3, 4

Complete with 2.00 GPA including transfer courses:

CHEM 167 General Chemistry for Engineering Students 4
or CHEM 177 General Chemistry I
ENGL 150 Critical Thinking and Communication 3
ENGL 250 Written, Oral, Visual, and Electronic Composition (see above for grade requirements) 3
ENGR 101 Engineering Orientation R
ENGR 160 Engineering Problems with Computer Applications 3
LIB 160 Library Instruction 0.5
MATH 165 Calculus I 4
MATH 166 Calculus II 4
PHYS 221 Introduction to Classical Physics I (See Basic Program rule) 5

**Total Credits: 26.5**

### Math and Physical Science: 30 cr.

### Biological Engineering Option

The standard Chemical Engineering program may be modified to meet the option requirements for Biological Engineering:

Math and Physical Science – BBMB 404 Biochemistry I or BIOL 313 Principles of Genetics, 3 cr., may be substituted for BBMB 301 Survey of Biochemistry from list above when taken with BBMB 405 Biochemistry II or BIOL 314 Principles of Molecular Cell Biology, respectively.

Chemical Engineering Core – Replace CH E 426 Chemical Engineering Laboratory II, 2 cr. with CH E 427 Biological Engineering Laboratory, 2 cr. in required core.

### Other Remaining Courses:

#### Chemistry Electives, 3 cr.

### Not BBMB 301 Survey of Biochemistry

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.
2. Choose from department-approved list.
3. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum-designated courses in the Basic Program.
4. 2.00 required including transfer courses.

Note: Transfer students with transfer credits in chemical engineering core courses must earn at least 15 semester credits in ISU courses in this category at the 300-level or above to qualify for the B.S. degree in chemical engineering.

### Courses primarily for undergraduate students

#### CH E 104. Chemical Engineering Learning Community.

Cr. R. F. S. Prereq: Enrollment in Chemical Engineering Learning Team (1-0) Curriculum in career planning and academic course support for Freshmen learning team.

#### CH E 204. Chemical Engineering Continuing Learning Community.

Cr. R. F. S. Prereq: Corequisite-enrollment in Chemical Engineering Learning Team (1-0) Curriculum and career planning, academic course support for learning community.

#### CH E 210. Material and Energy Balances.

Cr. 3.00. Prereq: CHEM 178, MATH 166 Introduction to chemical processes. Physical behavior of gases, liquids, and solids. Application of material and energy balances to chemical engineering equipment and processes.

#### CH E 298. Cooperative Education.

Cr. R. F.S.S. Prereq: Permission of department and Engineering Career Services First professional work period in the cooperative education program. Students must register for this course before commencing work.

#### CH E 302. Seminar.

(1-0) Cr. 1. F. Prereq: Junior classification in chemical engineering
CH E 310. Computational Methods in Chemical Engineering.
(3-0) Cr. 3. F.S. Prereq: 210 and ENGR 160
Numerical methods for solving systems of linear and nonlinear equations, ordinary differential equations, numerical differentiation and integration, and nonlinear regression using chemical engineering examples. Nonmajor graduate credit.

CH E 325. Chemical Engineering Laboratory I.
(0-4) Cr. 2. F.S. Prereq: 357, credit or enrollment in 381
Experiments covering fundamental material and energy balances, momentum and energy transport operations, and thermodynamics. Computer applications. Nonmajor graduate credit.

CH E 356. Transport Phenomena I.
(3-0) Cr. 3. F.S. Prereq: 210, PHYS 221, credit or enrollment in MATH 267
Momentum and mechanical energy balances. Incompressible and compressible fluid flow. Applications to fluid drag, piping system design, filtration, packed beds and settling. Nonmajor graduate credit.

CH E 357. Transport Phenomena II.
(3-0) Cr. 3. F.S. Prereq: Credit or enrollment in 310; 356
Conduction and diffusion, convective heat and mass transfer, boiling and condensation, radiation, and design of heat exchange equipment. Introduction to diffusion. Nonmajor graduate credit.

CH E 358. Separations.
(3-0) Cr. 3. F.S. Prereq: 310, 357
Diffusion and mass transfer in fluids. Analysis and design of continuous contacting and multistage separation processes. Binary and multi-component distillation, absorption, extraction, evaporation, membrane processes, and simultaneous heat and mass transfer. Nonmajor graduate credit.

CH E 381. Chemical Engineering Thermodynamics.
(3-0) Cr. 3. F.S. Prereq: Credit or enrollment in 310; MATH 267, PHYS 222, CHEM 325
Application of thermodynamic principles to chemical engineering problems. Thermodynamic properties of fluids, phase equilibria, and chemical reaction equilibria. Nonmajor graduate credit.

CH E 382. Chemical Reaction Engineering.
(3-0) Cr. 3. F.S. Prereq: Credit in 310; 381, or credit or enrollment in 357
Kinetics of chemical reactions. Design of homogeneous and heterogeneous chemical reactors. Nonmajor graduate credit.

CH E 391. Foreign Study Orientation.
(3-0) Cr. 3. F.S. Prereq: Credit in 357 and 381 or permission of instructor
Offered on a satisfactory-fail basis only. Credit for graduation allowable only upon completion of CH E 392.

Meets International Perspectives Requirement.

CH E 392. Foreign Study Program.
Cr. 4. SS. Prereq: 391
Study of chemical engineering including laboratories and lectures at University College London or other collaborating international universities. Comparative study of U.S. and international manufacturing facilities. Expenses required.

Meets International Perspectives Requirement.

CH E 396. Summer Internship.
Cr. R. Repeatable. SS. Prereq: Permission of department and Engineering Career Services
Summer professional work period. Students must register for this course prior to commencing work.

CH E 397. Engineering Internship.
Cr. R. Repeatable. F.S. Prereq: Permission of department and Engineering Career Services
One semester maximum per academic year professional work period. Students must register for this course prior to commencing work.

CH E 398. Cooperative Education.
Cr. R. F.S.SS. Prereq: 298, permission of department and Engineering Career Services
Second professional work period in the cooperative education program. Students must register for this course before commencing work.

(Dual-listed with 506). (3-0) Cr. 3. F. Prereq: 381, credit or enrollment in 358
Examines the mechanisms and rates of chemical transport across air, water, and soil interfaces. Applications of transport and thermodynamic fundamentals to movement of chemicals in the environment. Nonmajor graduate credit.

CH E 408. Surface and Colloid Chemistry.
(Dual-listed with 508). (3-0) Cr. 3. F. Prereq: 381 or equivalent
Examines the factors underlying interfacial phenomena, with an emphasis on the thermodynamics of surfaces, structural aspects, and electrical phenomena. Application areas include emulsification, foaming, detergency, sedimentation, fluidization, nucleation, wetting, adhesion, flotation, and electrophoresis. Nonmajor graduate credit.

CH E 415. Biochemical Engineering.
(Dual-listed with 515). (3-0) Cr. 3. S. Prereq: 357, 382 recommended, CHEM 331
Application of basic chemical engineering principles in biochemical and biological process industries such as enzyme technology and fermentation. Nonmajor graduate credit.

CH E 421. Process Control.
(3-0) Cr. 3. F.S. Prereq: Credit or enrollment in 358, 382, MATH 267
Control of industrial chemical processes. Device applications and limitations. Dynamics of chemical process components and process control systems. Nonmajor graduate credit.

CH E 426. Chemical Engineering Laboratory II.
(0-4) Cr. 2. F.S. Prereq: 325, 358, 382
Experiments in heat and mass transfer, staged operations, chemical reactor performance, unit processes. Computer applications. Nonmajor graduate credit. Only one of CH E 426 or 427 may count toward graduation.

CH E 427. Biological Engineering Laboratory.
(0-4) Cr. 2. S. Prereq: Credit in 325, 358, 382 and BBMB 301
Experiments on biological applications in chemical engineering. Nonmajor graduate credit. Only one of CH E 426 or 427 may count toward graduation.

(2-6) Cr. 4. F.S. Prereq: 358, 382
Synthesis of chemical engineering processes, equipment and plants. Cost estimation and feasibility analysis. Nonmajor graduate credit.

CH E 440. Biomedical Applications of Chemical Engineering.
(Dual-listed with 540). (3-0) Cr. 3. Prereq: 210, MATH 266, PHYS 222
Applications of material and energy balances, transport phenomena, chemical reaction engineering, and thermodynamics to problems in biomedical engineering and applied physiology; survey of biomedical engineering; biomaterials; biomedical imaging. Nonmajor graduate credit.

CH E 447. Polymers and Polymer Engineering.
(Dual-listed with 547). (3-0) Cr. 3. S. Prereq: 382 and CHEM 331 or MAT E 391
Chemistry of polymers, addition and condensation polymerization. Physical and mechanical properties, polymer rheology, production methods. Applications of polymers in the chemical industry. Nonmajor graduate credit.
Applications of polymers in the chemical industry. Chemical and mechanical properties, polymer rheology, production methods. Chemistry of polymers, addition and condensation polymerization. Materials of such polymers as biomaterials, specific bioapplications of polymers. Term project required for graduate credit.

Courses primarily for graduate students, open to qualified undergraduate students

CH E 506. Environmental Chemodynamics. (Dual-listed with 406). (3-0) Cr. 3. F. Prereq: 381, credit or enrollment in 388. Examinations the mechanisms and rates of chemical transport across air, water, and soil interfaces. Applications of transport and thermodynamic fundamentals to movement of chemicals in the environment.

CH E 508. Surface and Colloid Chemistry. (Dual-listed with 408). (3-0) Cr. 3. F. Prereq: 381. Examinations the factors underlying interfacial phenomena, with an emphasis on the thermodynamics of surfaces, structural aspects, and electrical phenomena. Application areas include emulsification, foaming, detergency, sedimentation, fluidization, nucleation, wetting, adhesion, flotation, and electrophoresis. Term project required for graduate credit.

CH E 515. Biochemical Engineering. (Dual-listed with 415). (3-0) Cr. 3. S. Prereq: 357, 382, CHEM 331. Application of basic chemical engineering principles in biochemical and biological process industries such as enzyme technology and fermentation. Term project required for graduate credit.

CH E 540. Biomedical Applications of Chemical Engineering. (Dual-listed with 440). (3-0) Cr. 3. Prereq: 210, MATH 266, PHYS 222. Applications of material and energy balances, transport phenomena, chemical reaction engineering, and thermodynamics to problems in biomedical engineering and applied physiology; survey of biomedical engineering; biomaterials; biomedical imaging. Term project required for graduate credit.

CH E 542. Polymeric Biomaterials. (3-0) Cr. 3. Prereq: CHEM 331 or a polymers class. Polymeric biomaterials, overview of biomaterial requirements, different classes of polymers used as biomaterials, specific bioapplications of polymers.

CH E 547. Polymers and Polymer Engineering. (Dual-listed with 447). (3-0) Cr. 3. S. Prereq: 382 and CHEM 331 or MAT E 351. Chemistry of polymers, addition and condensation polymerization. Physical and mechanical properties, polymer rheology, production methods. Applications of polymers in the chemical industry.

CH E 554. Integrated Transport Phenomena. (4-0) Cr. 4. F. Prereq: 357, 381, MATH 267. Conservation equations governing diffusive and convective transport of momentum, thermal energy and chemical species. Transport during laminar flow in conduits, boundary layer flow, creeping flow. Heat and mass transport coupled with chemical reactions and phase change. Scaling and approximation methods for mathematical solution of transport models. Diffusive fluxes; conservation equations for heat and mass transfer; scaling and approximation techniques; fundamentals of fluid mechanics; unidirectional flow; creeping flow; laminar flow at high Reynolds number; forced-convective heat and mass transfer in confined and unconfined laminar flows.

A. Responsible Conduct of Research. (Cr. 1.0). F.
B. Working with Industry. (Cr. 0.5).
C. Communications in Science. (Cr. 0.5). Alt S., offered 2011. Reading and reviewing manuscripts; publishing papers; oral and poster presentations.
D. Time Management and Mentoring. (Cr. 0.5). Alt F., offered 2012.
E. The Interview Process. (Cr. 0.5). Alt S., offered 2012. Applying and interviewing for academia, industry and government.
F. Grant Writing. (Cr. 1.0). Alt F., offered 2011.
G. Teaching. (Cr. 0.5). Preparation of a teaching portfolio and course materials; lecturing, technology.
H. Ethical and legal issues in research.
I. Establishing productive collaborations with industry.

CH E 583. Advanced Thermodynamics. (3-0) Cr. 3. F. Prereq: 381. Application of thermodynamic principles to chemical engineering problems. Thermodynamic properties of non-ideal fluids and solutions; phase and chemical-reaction equilibria/stability.

CH E 590. Independent Study. Cr. 2-6. Repeatable. Investigation of an approved topic on an individual basis.

A. Separations
B. Advanced Control Theory
C. Crystallization
Courses for graduate students

CH E 601. Seminar.
Cr. R. Repeatable. F.S.
Offered on a satisfactory-fail basis only.

CH E 625. Metabolic Engineering.
(3-0) Cr. 3. Prereq: 382, CHEM 331
Principles of metabolic engineering. Emphasis on emerging examples in biorenewables and plant metabolic engineering. Overview of biochemical pathways, determination of flux distributions by stoichiometric and labeling techniques; kinetics and thermodynamics of metabolic networks; metabolic control analysis; genetic engineering for overexpression, deregulation, or inhibition of enzymes; directed evolution; application of bioinformatics, genomics, and proteomics.

CH E 632. Multiphase Flow.
(Cross-listed with M E). (3-0) Cr. 3. Alt. S., offered 2013. Prereq: M E 538
Single particle, multiparticle and two-phase fluid flow phenomena (gas-solid, liquid-solid and gas-liquid mixtures); particle interactions, transport phenomena, wall effects; bubbles, equations of multiphase flow. Dense phase (fluidized and packed beds) and ducted flows; momentum, heat and mass transfer. Computer solutions.

CH E 642. Principles and Applications of Molecular Simulation.
(3-0) Cr. 3. Prereq: 545

CH E 652. Advanced Transport.
(3-0) Cr. 3. Prereq: 552 and 553
Advanced topics in momentum transport, fluid mechanics, and mass transport including study of recent literature.

CH E 688. Catalysis and Catalytic Processes.
(Cross-listed with BR C). (3-0) Cr. 3. Prereq: 382
Principles and applications of heterogeneous and homogeneous catalysis. Adsorption. Reaction kinetics and mass transfer effects. Catalyst characterization. Industrial catalytic processes.

CH E 692. Independent Study.
Cr. 2-6. Repeatable.
Investigation of an approved topic on an individual basis. Election of course and topic must be approved in advance by Program of Study Committee.

CH E 695. Advanced Topics.
Cr. arr. Repeatable.
A. Separations
B. Advanced Statistical Modeling and Control
C. Crystallization
D. Thermodynamics
E. Protein Engineering/Bioseparations
F. Biological Engineering
G. Materials and Biomaterials
H. Surfaces
I. Combinatorial Design

CH E 697. Engineering Internship.
Cr. R. Repeatable. F.S.SS. Prereq: Permission of major professor, graduate classification
One semester and one summer maximum per academic year professional work period.

CH E 699. Research.
Cr. arr. Repeatable.
Administered by the Department of Civil, Construction and Environmental Engineering

Undergraduate Study
For undergraduate curriculum in civil engineering leading to the degree bachelor of science. This curriculum is accredited under the General Criteria and Civil Engineering Program Criteria by the Engineering Accreditation Commission of ABET, 111 Market Place, Suite 1040, Baltimore, MD 21202-4012 – telephone: (410) 347-7700, http://www.abet.org.

Civil engineering consists of the application of the laws, forces, and materials of nature to the planning, design, construction, maintenance, and operation of public and private facilities, subject to economic, social, and environmental constraints. Commonly included are transportation systems; bridges and buildings; water supply, pollution control, irrigation, and drainage systems; river and harbor improvements; dams and reservoirs. Civil engineering also includes the planning, design, and responsible execution of surveying operations, and the location, delimitation, and delineation of physical and cultural features on the surface of the earth. Research, testing, sales, management, and related functions are also a part of civil engineering. Work on the campus is supplemented by inspection trips which furnish an opportunity for firsthand study of engineering systems in operation, as well as projects under construction.

Environmental engineering, as a specialty area in civil engineering, is concerned with protecting the public and natural health; providing safe, palatable and ample water supply; management of solid and hazardous waste; proper treatment and disposal of domestic and industrial waste; waste waters and waste; resource recovery; providing adequate drainage of urban and rural areas for sanitation; and the control of water quality, soil contamination, and air pollution. At the undergraduate level, the study of various environmental and water resource engineering topics is part of the course of study leading to the Bachelor’s degree in civil engineering.

Program Goal
Consultation with an industrial advisory board of employers of civil engineers, with a broad base of civil engineering educators, and with students and alumni has yielded a continuous process of program planning, program assessment, curriculum development, and instructional development to produce an integrated, learning-based curriculum. The curriculum listed in this catalog has the academic program goal of developing an effective program that fulfills student educational needs and that equips and empowers qualified students for a successful career in civil or environmental engineering.

Program Objectives
To achieve the program goal, the Department has developed objectives intended to result in the following outcomes such that graduates:

1. have a comprehensive education in the fundamentals of civil engineering,
2. are prepared to undertake civil engineering design tasks,
3. demonstrate effective communication skills and teamwork in multidisciplinary projects,
4. play a constructive role to address the needs of society and the environment, and
5. are motivated to continue their professional development.

The faculty encourages the development of the student’s professional skills through participation in cooperative education, internships, or progressive summer engineering employment. Qualified juniors and seniors interested in graduate studies may apply to the Graduate College to concurrently pursue the bachelor degree and a master of science in Civil Engineering or a master of business administration in the College of Business Administration.

Graduate Study
The Department of Civil, Construction and Environmental Engineering offers work for the master of engineering, master of science, and doctor of philosophy degrees with a major in civil engineering with areas of specialization in structural engineering, environmental engineering, construction engineering and management, geotechnical engineering, civil engineering materials, and transportation engineering. The department also offers minor work to students from other engineering departments.

Candidates for the degrees of master of engineering and master of science are required to satisfactorily complete a total of 30 credits of acceptable graduate work. The master of engineering degree involves all course work. The master of science degree requires the preparation of a thesis or creative component.

Candidates for the doctor of philosophy degree refer to the department’s home page and/or the department’s Graduate Student Handbook for degree options and credit requirements. The normal prerequisite to major graduate work is the completion of a curriculum substantially equivalent to that required of engineering students at this university. However, because of the diversity of interests within the graduate programs in civil engineering, a student may qualify for graduate study even though undergraduate or prior graduate training has been in a discipline other than engineering. Supporting work will be required depending upon the student’s background and area of interest. A prospective graduate student is urged to specify the degree program and area of specialization in which he or she is interested on the application for admission. The department participates in the interdepartmental majors in transportation (master of science only), environmental science, and biorenewable resources and technology (see Index).

The Department of Civil, Construction and Environmental Engineering (CCEE Department) offers graduate certificates in construction management, environmental engineering, and environmental systems. The construction management certificate requires 12 credits, including nine credits of “core courses” and three credits of “elective courses” from approved CCEE Department lists.

For the environmental engineering and environmental systems certificates, each certificate requires the completion of four courses of three credits each and at least two of these courses shall be from an approved “core course” CCEE Department list and the remaining courses may be selected from an approved “elective courses” CCEE Department list. These courses are offered by different departments at Iowa State University. These two certificates also require the completion of a seminar course, C E 591 Seminar in Environmental Engineering, or any equivalent to be approved by the Environmental Engineering graduate faculty.

For additional requirements for these three certificates, refer to the document that describes each graduate certificate. These documents are available from the Department of Civil, Construction, and Environmental Engineering.

Curriculum in Civil Engineering (General)
Administered by the Department of Civil, Construction and Environmental Engineering.

Leading to the degree bachelor of science.

Total credits required: 130.5* See also Basic Program and Special Programs.

International Perspectives: 3 cr.1
U.S. Diversity: 3 cr.1

Communication Proficiency/Library requirement (minimum grade of C)

Social Sciences and Humanities: 12 cr.2

Complete 12 cr. with 6 cr. at 200-level or above.
Basic Program: 26.5 cr.4

Complete with 2.00 GPA including transfer courses:

- CHEM 177 General Chemistry I 4
- ENGL 150 Critical Thinking and Communication 3
- ENGL 250 Written, Oral, Visual, and Electronic Composition (see above for grade requirements) 3
- ENGR 101 Engineering Orientation R
- C E 160 Engineering Problems with Computational Laboratory 3
- LIB 160 Library Instruction 0.5
- MATH 165 Calculus I 4
- MATH 166 Calculus II 4
- PHYS 221 Introduction to Classical Physics I (See Basic Program rule) 3

Total Credits 26.5

Math and Physical Science: 17 cr. (18 cr.)*

- CHEM 177L Laboratory in General Chemistry I 1
- CHEM 178 General Chemistry II 4
- & CHEM 178L and Laboratory in College Chemistry II 3
- or PHYS 222 Introduction to Classical Physics II 3
- GEOG 201 Geology for Engineers and Environmental Scientists 3
- MATH 266 Elementary Differential Equations 3
- Statistical Elective 3
- Numerical Analysis Elective 3

Total Credits 17

C E Engineering Core: 31 cr.4

- E M 274 Statics of Engineering 3
- E M 324 Mechanics of Materials 3
- E M 345 Dynamics 3
- E M 379 Mechanics of Fluids 3
- C E 206 Engineering Economic Analysis and Professional Issues in Civil Engineering 3
- C E 326 Principles of Environmental Engineering 3
- C E 332 Structural Analysis I 3
- C E 355 Principles of Transportation Engineering 3
- C E 360 Geotechnical Engineering 3
- C E 372 Engineering Hydrology and Hydraulics 4

Total Credits 31

Other Remaining Courses: 44 cr.

- C E 105 Introduction to the Civil Engineering Profession 1
- C E 111 Fundamentals of Surveying I 3
- C E 170 Graphics for Civil Engineering 2
- C E 306 Project Management for Civil Engineers 3
- C E 333 Structural Steel Design I 3
- C E 334 Reinforced Concrete Design I 3
- C E 382 Design of Concretes 3
- C E 483 Highway Design 3
- C E 485 Civil Engineering Design I 3
- C E 486 Civil Engineering Design II 3
- E M 327 Mechanics of Materials Laboratory 1
- SP CM 212 Fundamentals of Public Speaking 3
- Technical Communication Elective 3
- Engineering Topics Electives 11

Total Credits 45

Seminar/Co-op/Internships: R cr.

- C E 403 Program and Outcome Assessment R

Co-op/Internship optional.

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.
2. Choose from department approved list.

3. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.
4. 2.00 required including transfer courses.
5. Students who transfer in with CHEM 167/CHEM 167L will be able to take CHEM 178/CHEM 178L to complete the program’s Chemistry requirement.

* Note: Students who opt for PHYS 222 Introduction to Classical Physics II rather than CHEM 178 General Chemistry II, CHEM 178L Laboratory in College Chemistry II will complete 18 cr. here which will increase the total number of credits required by 1.

Curriculum in Civil Engineering with Environmental Option

Administered by the Department of Civil, Construction and Environmental Engineering.

Leading to the degree Bachelor of Science.

Total credits required: 131.5. See also Basic Program and Special Programs.

International Perspectives: 3 cr.1
U.S. Diversity: 3 cr.1

Communication Proficiency/Library requirement (minimum grade of C):

- ENGL 150 Critical Thinking and Communication 3
- ENGL 250 Written, Oral, Visual, and Electronic Composition 3
- LIB 160 Library Instruction 0.5

Social Sciences and Humanities: 12 cr.2

Complete 12 cr. with 6 cr. at 200-level or above.

Basic Program: 26.5 cr.4

- CHEM 177 General Chemistry I 4
- ENGL 150 Critical Thinking and Communication 3
- ENGL 250 Written, Oral, Visual, and Electronic Composition (see above for grade requirements) 3
- ENGR 101 Engineering Orientation R

**Co-op/Internship optional.**

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.

2. Choose from department approved list.

3. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

4. 2.00 required including transfer courses.

5. Students who transfer in with CHEM 167 General Chemistry for Engineering Students/CHEM 167L Laboratory in General Chemistry for Engineering will be able to take CHEM 178 General Chemistry II/CHEM 178L Laboratory in College Chemistry II to complete the program's Chemistry requirement.

### Courses primarily for undergraduate students

**C E 101. Technical Lecture.**

Cr. R. F.S.

(1-0) Discussion of various phases of civil engineering. For transfer students only. Evaluation of transfer credits and discussion of graduation requirements. Offered on a satisfactory-fail basis only.

**C E 105. Introduction to the Civil Engineering Profession.**

(1-0) Cr. 1. F.S.

Overview of the nature and scope of the civil engineering profession. Exploration of the various specialty areas within civil engineering. Bloom’s Taxonomy and creativity. Departmental rules, student services operations, degree requirements, educational objectives, program of study planning, career options, and student organizations.

**C E 111. Fundamentals of Surveying I.**

(2-3) Cr. 3. F.S. Prereq: 160, credit or enrollment in Engr 170 or C E 170, MATH 165, credit or enrollment in C E 105 for C E majors

**C E 120. Civil Engineering Learning Community.**

Cr. R. Repeatable.

Integration of first-year students into the Civil Engineering program. Assignments and activities involving teamwork, academic preparation, study skills, and preparation for entry into the Civil Engineering profession. Completed both individually and in learning teams under the direction of faculty and peer mentors. Offered on a satisfactory-fail basis only.

**C E 160. Engineering Problems with Computational Laboratory.**

(2-2) Cr. 3. F.S. Prereq: MATH 141, 142 or satisfactory scores on mathematics placement assessments; credit or enrollment in MATH 165

Formulation of engineering problems using spreadsheets and Visual Basic for Application for solution. Presenting results using word processing, tables, and graphs. Introduction to engineering economics and statics. Civil engineering examples.

**C E 170. Graphics for Civil Engineering.**

(0-4) Cr. 2. F.S. Prereq: MATH 165, credit or enrollment in C E 105

Fundamental graphics. Introduction to computer aided drafting and modeling. Civil engineering applications.

**C E 206. Engineering Economic Analysis and Professional Issues in Civil Engineering.**

(3-0) Cr. 3. F.S. Prereq: MATH 166, ENGL 250; ECON 101 recommended

Engineering/managerial analysis of the economic aspects of project proposals. Alternative sources of funds; time value of money; expenditure of capital funds and methods of evaluating alternative projects. Professionalism, licensure, liability, ethics, leadership, social responsibility, creative and critical thinking, and applications/impacts of regulations in civil engineering.

**C E 298. Cooperative Education.**

Cr. R. F.S.SS. Prereq: Permission of department and Engineering Career Services

First professional work period in the cooperative education program. Students must register for this course before commencing work. Offered on a satisfactory-fail basis only.

**C E 306. Project Management for Civil Engineers.**

(2-3) Cr. 3. F.S. Prereq: 206, Credit or enrollment in a technical communication elective from the approved department list

Project management, including work breakdown structures, cost estimating, scheduling, and project control. Civil engineering project life cycle, including planning, design, construction, and maintenance processes. Techniques in interpretation of contract documents and in estimating quantities.

**C E 326. Principles of Environmental Engineering.**

(2-2) Cr. 3. F.S. Prereq: CHEM 177 or 178, MATH 166, credit or enrollment in E M 378

Introduction to environmental problems, water quality indicators and requirements, potable water quality and quantity objectives, water sources and treatment methods; water pollution control objectives and treatment methods; survey of solid and hazardous waste management and air pollution control. Nonmajor graduate credit.

**C E 332. Structural Analysis I.**

(2-2) Cr. 3. F.S. Prereq: E M 324

C E 333. Structural Steel Design I.
(2-2) Cr. 3. F.S. Prereq: 332, E M 327

C E 334. Reinforced Concrete Design I.
(2-2) Cr. 3. F.S. Prereq: 332, E M 327
Analysis and design of beams, one-way slabs, and columns. Preliminary design of building frames using pattern loading and moment coefficients. Nonmajor graduate credit.

C E 350. Introduction to Transportation Planning.
(3-0) Cr. 3. S. Prereq: 3 credits in statistics, junior classification
An introductory course for planning urban and regional transportation systems within government. Applications and impacts of legislation, financing, four-step planning process, population trends, land use, societal impacts, public transportation, master plans and traffic impact studies. Organization and coordination of the transportation planning function. Nonmajor graduate credit. Not available for graduation credit for students in civil engineering.

(3-0) Cr. 3. F.S. Prereq: 111, 206, PHYS 221, a course in statistics from the approved departmental list
Introduction to planning and operations of transportation facilities. Vehicle/operation/infrastructure characteristics. Technological, economic and environmental factors. Travel demand modeling and capacity analysis. Nonmajor graduate credit.

C E 360. Geotechnical Engineering.
(2-3) Cr. 3. F.S. Prereq: E M 324, credit or enrollment in GEOL 201
Introduction to soil engineering and testing. Identification and classification tests, soil water systems, principles of settlement, stresses in soils, and shear strength testing; slope stability, retaining walls, bearing capacity. Nonmajor graduate credit.

(3-2) Cr. 4. F.S. Prereq: E M 378, a course in statistics from the approved departmental list
The hydrologic cycle: precipitation, infiltration, runoff, evapotranspiration, groundwater, and streamflow. Hydrograph analysis, flood routing, frequency analysis and urban hydrology. Applied hydraulics including pipe and channel flow with design applications in culverts, pumping, water distribution, storm and sanitary sewer systems. Design project required. Nonmajor graduate credit.

C E 382. Design of Concretes.
(2-3) Cr. 3. F.S. Prereq: Credit or enrollment in 360
Physical and chemical properties of bituminous, portland, and other cements; aggregate properties and blending; mix design and testing of concretes; admixtures, mixing, handling, placing and curing; principles of pavement thickness design. Nonmajor graduate credit.

C E 383. Design of Portland Cement Concrete.
(0-2) Cr. 1. F.S. Prereq: Credit or enrollment in 360
For Con E students only. Physical and chemical properties of portland cement and p.c. concrete. Mix design and testing of p.c. concrete.

C E 388. Sustainable Engineering and International Development.
(Cross-listed with A E, E E, M E, MAT E). (2-2) Cr. 3. F. Prereq: Junior classification
Multi-disciplinary approach to sustainable engineering and international development, sustainable development, appropriate design and engineering, feasibility analysis, international aid, business development, philosophy and politics of technology, and ethics in engineering. Engineering-based projects from problem formulation through implementation. Interactions with partner community organizations or international partners such as nongovernment organizations (NGOs). Course readings, final project/design report. Meets International Perspectives Requirement.

C E 396. Summer Internship.
Cr. R. Repeatable. SS. Prereq: Permission of department and Engineering Career Services, completion of two terms in residence in civil engineering, employment in civil engineering or related field
Summer professional work period. Students must register for this course prior to commencing work. Offered on a satisfactory-fail basis only.

C E 397. Engineering Internship.
Cr. R. Repeatable. F.S. Prereq: Permission of department and Engineering Career Services
One semester maximum per academic year professional work period. Students must register for this course prior to commencing work. Offered on a satisfactory-fail basis only.

C E 398. Cooperative Education.
Cr. R. F.S.SS. Prereq: 298, permission of department and Engineering Career Services
Second professional work period in the cooperative education program. Students must register for this course before commencing work. Offered on a satisfactory-fail basis only.

C E 403. Program and Outcome Assessment.
Cr. R. F.S. Prereq: Verification of undergraduate application for graduation by the end of the first week of class. Permission of instructor for students who are scheduled for summer graduation
Assessment of C E Curriculum and educational objectives. Assessments to be reviewed by the CE Department to incorporate potential improvements. Offered on a satisfactory-fail basis only.

C E 411. Bioprocessing and Bioproducts.
(Dual-listed with 511). (Cross-listed with A E, BIOE, BSEI. (3-0) Cr. 3. F. Prereq: A E 216 or equivalent, MATH 160 or 165, one of CHEM 167 or higher, BIOL 173 or 211 or higher or BRT 501, senior or graduate classification

C E 417. Land Surveying.
(2-3) Cr. 3. S. Prereq: 111
Legal principles affecting the determination of land boundaries, public domain survey systems. Locating sequential and simultaneous conveyances. Record research, plat preparation, and land description. Study of selected court cases. Nonmajor graduate credit.

(Dual-listed with 520). (2-3) Cr. 3. F. Prereq: 326, CHEM 177 and 178, MATH 166
Principles of chemical and physical phenomena applicable to the treatment of water and wastewater and natural waters; including chemical equilibria, reaction kinetics, acid-base equilibria, chemical precipitation, redox reactions, and mass transfer principles. Individual laboratory practices and group projects required.
C E 421. Environmental Biotechnology.
(Dual-listed with 521). (2-2) Cr. 3. F. Prereq: 326
Fundamentals of biochemical and microbial processes applied to envi-
ronmental engineering processes, role of microorganisms in wastewater

treatment and bioremediation, bioenergetics and kinetics, metabolism of

xenobiotic compounds, waterborne pathogens, parasites, and disinfec-

tion.

C E 424. Air Pollution.
(Dual-listed with 524). (Cross-listed with ENSCI, A E). (1-0) Cr. 1. Prereq:
Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statis-
tics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D
and E.

A. Air quality and effects of pollutants
B. Climate change and causes
C. Transportation constraints
D. Off-gas treatment technology
E. Agricultural sources of pollution

C E 428. Water and Wastewater Treatment Plant Design.
(2-2) Cr. 3. S. Prereq: 326
Physical, chemical and biological processes for the treatment of water
and wastewater including coagulation and flocculation, sedimentation,
filtration, adsorption, chemical oxidation/disinfection, fixed film and
suspended growth biological processes and sludge management.

C E 436. Masonry and Timber Design.
(Dual-listed with 536). (2-2) Cr. 3. Alt. F., offered 2011. Prereq: 334
Behavior and design of clay and concrete masonry beams, columns,
walls, and structural systems. Behavior and design of timber and lami-
nated timber beams, columns, connections, and structural systems.
Nonmajor graduate credit.

C E 446. Bridge Design.
(Dual-listed with 546). (2-2) Cr. 3. Alt. S., offered 2013. Prereq: 333, 334
Bridge design in structural steel and reinforced concrete. Application of
AASHTO Bridge Design Specifications. Analysis techniques for complex
structures. Preliminary designs include investigating alternative structural
systems and materials. Final designs include preparation of design calcu-
lations and sketches. Nonmajor graduate credit.

C E 448. Building Design.
(Dual-listed with 548). (2-2) Cr. 3. Alt. S., offered 2012. Prereq: 333, 334
Building design in structural steel and reinforced concrete. Investiga-
tion of structural behavior of frameworks. Lateral load resisting systems.
Application of current building codes and design specifications. Review of
building designs. Preliminary designs include investigating alternative structural
systems. Final designs include preparation of design calculations
and sketches. Nonmajor graduate credit.

(Dual-listed with 551). (2-2) Cr. 3. F. Prereq: 350 or 355
Urban transportation planning context and process. Project planning
and programming. Congestion, mitigation, and air quality issues. Transpor-
tation data sources. Travel demand and network modeling. Use of
popular travel demand software and applications of geographic informa-
tion systems. Nonmajor graduate credit.

C E 453. Highway Design.
(2-2) Cr. 3. F.S. Prereq: 306, 355, 372, 382
Introduction to traffic engineering and highway planning. Design,
construction, and maintenance of highway facilities; earthwork, drainage
structures; pavements. Preparation of environmental impact state-
ment. A complete design project is required. Oral and written reports.
Computer applications. Nonmajor graduate credit.

C E 460. Foundation Engineering.
(3-0) Cr. 3. F.S. Prereq: 360
Fundamentals of foundation engineering. Exploration, sampling, and
in-situ tests. Shallow and deep foundations. Settlement and bearing
capacity analyses. Stability of excavations and earth retaining structures.
Nonmajor graduate credit.

C E 467. Geomaterials Stabilization.
(Dual-listed with 567). (2-2) Cr. 3. F. Prereq: 360
Soil and aggregate physical and chemical stabilization procedures. Soil
stabilization analysis and design. Ground modification methods. Geosyn-
thetics application and design. Nonmajor graduate credit.

(Dual-listed with 573). (3-0) Cr. 3. F. Prereq: 372
Principles of groundwater flow, hydraulics of wells, super-position, slug
and pumping tests, streamlines and flownets, and regional groundwater
credit.

C E 483. Pavement Analysis and Design.
(Dual-listed with 583). (3-0) Cr. 3. Prereq: 360 and 382
Analysis, behavior, performance, and structural design of pavement
systems. Topics include climate factors, rehabilitation, life cycle design

economics, material and system response, pavement foundations and

traffic loadings. Development of models for and analysis of pavement

ystems. Use of transfer functions relating pavement response to pave-

ment performance. Evaluation and application of current and evolving

pavement design practices and procedures. Mechanistic-based pavement
design techniques and concepts. Analysis of the effects of maintenance

activities on pavement performance and economic evaluation of pave-

ment systems. Nonmajor graduate credit.

C E 484. Advanced Design of Concretes.
(Dual-listed with 584). (2-2) Cr. 3. F. Prereq: 382
Asphalt binder characterization, fundamentals of asphalt rheology, asphalt
materials behavior under loading and temperature effects. Portland
cement concrete admixtures, cements and admixture compatibility, envi-
nronmental effects on concrete performance, advanced performance
testing. Nonmajor graduate credit.

C E 485. Civil Engineering Design I.
(2-2) Cr. 3. F. Prereq: 306, 326, 333 or 334, 355, SP CM 212
The civil engineering design process, interacting with the client, identifi-
cation of the engineering problems, development of a technical proposal,
identification of design criteria, cost estimating, planning and scheduling,
codes and standards, development of feasible alternatives, selection of
best alternative, oral presentation and poster.

C E 486. Civil Engineering Design II.
(1-4) Cr. 3. F. Prereq: 326, 333 or 334, 382; credit or enrollment in 428
or 453, and 485
The engineering design computations, case histories of design inade-
quacies, environmental impact, safety and health in the work place,
ethics, contract documents, design plans and specifications, teamwork,
synthesis of previous coursework in a group project, oral presentations.

C E 490. Independent Study.
Cr. 1-3. Repeatable. F.S.SS. Prereq: Permission of instructor
Independent study in any phase of civil engineering. Pre-enrollment
contract required.

H. Honors

C E 498. Cooperative Education.
Cr. R. Repeatable. F.S.SS. Prereq: 398, permission of department and
Engineering Career Services
Third and subsequent professional work periods in the cooperative
education program. Students must register for this course before
commencing work. Offered on a satisfactory-fail basis only.
Courses primarily for graduate students, open to qualified undergraduate students

C E 501. Preconstruction Project Engineering and Management.
(3-0) Cr. 3. Prereq: Con E 221 and 421
Application of engineering and management control techniques to construction project development from conceptualization to notice to proceed. Determinants of construction project success, conceptual estimating, design and engineering planning for automated construction techniques, constructability review procedures, planning for safety, value engineering.

C E 502. Construction Project Engineering and Management.
(3-0) Cr. 3. Prereq: Con E 221 and 421
Application of engineering and management control techniques to construction projects. Construction project control techniques, equipment selection and utilization, project administration, construction process simulation, Quality Management, and productivity improvement programs.

C E 503. Construction Management Functions and Processes.
(3-0) Cr. 3. Prereq: Con E 421
Analysis of critical construction management skills. Analysis of organizational systems related to construction management. Case studies. Analysis of theories of motivation, planning, leadership, organizational change, etc., as they relate to field construction operations.

(3-0) Cr. 3. Prereq: 334, 360, Con E 322 and 340
Advanced design of concrete formwork and falsework systems. Design for excavation and marine construction including temporary retaining structures and cofferdams. Aggregate production operations, including blasting, crushing, and conveying systems. Rigging system design.

(3-0) Cr. 3. Prereq: Con E 221, credit or enrollment in Con E 421
Study of cases involving disputes, claims, and responsibilities encountered by management in construction contract documents. Analysis of methods of resolving differences among the owner, architect, engineer, and construction contractor for a project.

C E 510. Information Technologies for Construction.
(3-0) Cr. 3. Prereq: Con E 421, ENGR 160 or C E 160 or equivalent
Information technologies including microcomputer based systems, management information systems, automation technologies, computer-aided design, and expert systems and their application in the construction industry. Overview of systems acquisition, communications, and networking.

C E 511. Bioprocessing and Bioproducts.
(Dual-listed with 411). (Cross-listed with A E, BRT). (3-0) Cr. 3. F. Prereq: A E 216 or equivalent, MATH 160 or 165, one of CHEM 167 or higher, BIOL 172 or 211 or higher or BRT 501, senior or graduate classification

C E 515. Railroad Engineering.
(3-0) Cr. 3. Alt. S., offered 2012. Prereq: 355

(Dual-listed with 420). (Cross-listed with ENSCI). (2-3) Cr. 3. Prereq: CHEM 177 and 178, MATH 166
Principles of chemical and physical phenomena applicable to the treatment of water and wastewater and natural waters; including chemical equilibria, reaction kinetics, acid-base equilibria, chemical precipitation, redox reactions and mass transfer principles. Individual laboratory practices and group projects required. Term paper and oral presentation for graduate level only.

(Dual-listed with 421). (Cross-listed with ENSCI). (2-3) Cr. 3. Prereq: 326
Fundamentals of biochemical and microbial processes applied to environmental engineering processes, role of microorganisms in wastewater treatment and bioremediation, bioenergetics and kinetics, metabolism of xenobiotic compounds, waterborne pathogens and parasites, and disinfection. Term paper and oral presentation.

C E 522. Water Pollution Control Processes.
(Cross-listed with ENSCI). (2-3) Cr. 3. Prereq: 521
Fundamentals of biochemical processes, aerobic growth in a single CSTR, multiple events in complex systems, and techniques for evaluating kinetic parameters; unit processes of activated sludge system, attached growth systems, stabilization and aerated lagoon systems, biosolids digestion and disposal, nutrient removal, and anaerobic treatment systems.

C E 523. Physical-Chemical Treatment Process.
(Cross-listed with ENSCI). (2-2) Cr. 3. Prereq: 520
Material and energy balances. Principles and design of physical-chemical unit processes; including screening, coagulation, flocculation, chemical precipitation, sedimentation, filtration, lime softening and stabilization, oxidation, adsorption, membrane processes, ion exchange and disinfection; recovery of resources from residuals and sludges; laboratory exercises and demonstrations; case studies in mineral processing and secondary industries.

C E 524. Air Pollution.
(Dual-listed with 424). (Cross-listed with A E, ENSCI). (1-0) Cr. 1. Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.
A. Air quality and effects of pollutants
B. Climate change and causes
C. Transportation constraints
D. Off-gas treatment technology
E. Agricultural sources of pollution

C E 527. Solid Waste Management.
(Cross-listed with ENSCI). (3-0) Cr. 3. Prereq: 326
Planning and design of solid waste management systems; includes characterization and collection of domestic, commercial, and industrial solid wastes, waste minimization and recycling, energy and materials recovery, composting, incineration, and landfill design.

C E 529. Hazardous Waste Management.
(Cross-listed with ENSCI). (3-0) Cr. 3. Prereq: 326
Regulatory requirements for the classification, transport, storage and treatment of hazardous wastes. Analysis and design of alternatives for treatment and disposal technologies, including physical, chemical, and biological treatment, solidification, incineration, and secure landfill design. Regulatory requirements and procedures for hazardous waste contaminated site investigations and risk analysis. Analysis and design of remedial action alternatives for site restoration.

C E 532. Structural Analysis II.
(3-0) Cr. 3. F. Prereq: 332
Analysis of indeterminate structural problems by the force and generalized direct displacement methods. Direct stiffness method for 2-D frames, grids, 3-D frames. Additional topics for the stiffness method.
C E 533. Structural Steel Design II.
(3-0) Cr. 3. Prereq: 333

C E 534. Reinforced Concrete Design II.
(2-2) Cr. 3. Prereq: 334
Every third semester, offered S 2012. Design of reinforced concrete long columns, floor slabs, building frames, isolated footings and combined footings. Design and behavior considerations for torsion, biaxial bending, structural joints and shear friction. Introduction to cold-formed composite steel and composite floor slab design.

C E 535. Prestressed Concrete Structures.
(3-0) Cr. 3. Prereq: 334
Every third semester, offered F 2012. Design of prestressed concrete structures, review of hardware, stress calculations, prestress losses, section proportioning, flexural design, shear design, deflections, statically indeterminate structures.

C E 536. Masonry and Timber Design.
(Dual-listed with 436). (2-2) Cr. 3. Alt. F., offered 2011. Prereq: 334
Every third semester, offered S 2010. Behavior and design of clay and concrete masonry beams, columns, walls, and structural systems. Behavior and design of timber and laminated timber beams, columns, connections, and structural systems. Two additional design problems.

C E 541. Dynamic Analysis of Structures.
(3-0) Cr. 3. Prereq: E M 345 and credit or enrollment in 532

C E 542. Structural Analysis by Finite Elements.
(3-0) Cr. 3. S. Prereq: 532

C E 545. Seismic Design.
(3-0) Cr. 3. Prereq: 333, 334

C E 546. Bridge Design.
(Dual-listed with 446). (2-2) Cr. 3. Alt. S., offered 2013. Prereq: 333, 334
Bridge design in structural steel and reinforced concrete. Application of AASHO Bridge Design Specifications. Analysis techniques for complex structures. Preliminary designs include investigating alternative structural systems and materials. Final designs include preparation of design calculations and sketches. Supervisory role to assist students in 446. An additional design project or more in-depth analysis and design.

C E 547. Analysis and Design of Plate and Slab Structures.
(3-0) Cr. 3. Prereq: 334, E M 514, MATH 266

C E 548. Building Design.
(Dual-listed with 448). (2-2) Cr. 3. Alt. S., offered 2012. Prereq: 333, 334
Building design in structural steel and reinforced concrete. Investigation of structural behavior of frameworks. Lateral load resisting systems. Application of current building codes and design specifications. Review of building designs. Preliminary designs include investigating alternative structural systems. Final designs include preparation of design calculations and sketches. Supervisory role to assist students in 448. An additional design project or more in-depth analysis and design.

(Dual-listed with 451). (2-2) Cr. 3. F. Prereq: 350 or 355
Urban transportation planning context and process. Project planning and programming. Congestion, mitigation, and air quality issues. Transportation data sources. Travel demand and network modeling. Use of popular travel demand software and applications of geographic information systems. Term project required for graduate credit.

(2-2) Cr. 3. Prereq: 365
Engineering aspects of highway traffic safety. Reduction of accident incidence and severity through highway design and traffic control. Accident analysis. Legal implications. Safety in highway design, maintenance, and operation.

C E 553. Traffic Engineering.
(2-2) Cr. 3. Prereq: 355
Driver, pedestrian, and vehicular characteristics. Traffic characteristics; highway capacity; traffic studies and analyses. Principles of traffic control for improved highway traffic service. Application of intersection, corridor or network analysis computer evaluation and optimization tools.

C E 556. Transportation Data Analysis.
(3-0) Cr. 3. Prereq: 355, STAT 101 or 105
Analysis of transportation data, identification of data sources and limitations. Static and dynamic data elements such as infrastructure characteristics, flow and operations-related data elements. Spatial and temporal extents data for planning, design, operations, and management of transportation systems. Summarizing, analyzing, modeling, and interpreting data. Use of information technologies for highways, transit, and aviation systems.

C E 557. Transportation Systems Analysis.
(3-0) Cr. 3. Prereq: 355, 3 credits in statistics or probability
Travel studies and analysis of data. Travel projections. Public transportation forecasts and analyses. Statewide, regional, and local transportation system planning. Corridor travel planning. Optimization of systems.

C E 558. Transportation Systems Development and Management Laboratory.
(2-2) Cr. 3. Prereq: 350 or 355
Study of designated problems in traffic engineering, urban transportation planning, and urban development. Forecasting and evaluation of social, economic, and environmental impact of proposed solutions; consideration of alternatives. Formulation of recommendations and publication of a report. Presentation of recommendations in the host community.

C E 559. Transportation Infrastructure/Asset Management.
(3-0) Cr. 3. Prereq: 355 or 453, 382
Engineering management techniques for maintaining and managing infrastructure assets. Systematic approach to management through value engineering, engineering economics, and life cycle cost analysis. Selection and scheduling of maintenance activities. Analysis of network-wide resource needs. Project level analysis.

(3-0) Cr. 3. Prereq: 360
Limiting stress analysis, stress paths, introduction to critical state soil mechanics, constitutive models, soil strength under various drainage conditions, seepage, pore pressure parameters, consolidation, slope stability and retaining wall applications.
(2-3) Cr. 3. Prereq: 460
Lateral earth pressure theories and retaining structures. Field investigations, in-situ testing, foundations on expansive soils, and analysis and design of shallow and deep foundations. Foundation engineering reports.

C E 562. Site Evaluations for Civil Engineering Projects.
(2-2) Cr. 3. Prereq: 360
Identification and mapping of engineering soils from airphotos. Use of remote sensing and GIS, planning subsurface investigations, geomatics prospecting, water resource applications.

(1-4) Cr. 3. Prereq: 360
Principles of geo-engineering laboratory testing including the conduct, analysis, and interpretation of soil classification tests, compaction tests, permeability tests, consolidation, triaxial, direct and ring shear tests. Issues regarding laboratory testing versus field testing and acquisition, transport, storage, and preparation of samples for geotechnical testing. Field and laboratory geotechnical monitoring techniques, including the measurements of deformation, strain, total stress and pore water pressure.

C E 564. Application of Numerical Methods to Geotechnical Design.
(3-0) Cr. 3. Prereq: 560
Application of numerical methods to analysis and design of foundations, underground structures, and soil-structure interaction. Application of slope stability software. Layered soils, bearing capacity and settlement for complex geometries, wave equation for piles, and foundation vibrations.

(2-3) Cr. 3. Prereq: 382
Atoms and molecules, crystal chemistry, clay minerals, structure of solids, phase transformations and phase equilibria. Surfaces and interfacial phenomena, colloid chemistry, mechanical properties. Applications to soils and civil engineering materials. Overview of state-of-the-art instrumental techniques for analysis of the physicochemical properties of soils and civil engineering materials.

C E 567. Geomaterials Stabilization.
(Dual-listed with 467). (2-2) Cr. 3. Prereq: 565
Soil and aggregate physical and chemical stabilization procedures. Soil stabilization analysis and design. Ground modification methods. Geosynthetics application and design. A term project is required.

C E 568. Dynamics of Soils and Foundations.
(3-0) Cr. 3. F. Prereq: 360, EM 345

C E 570. Applied Hydraulic Design.
(2-2) Cr. 3. Prereq: 372
Flow characteristics in natural and constructed channels; principles of hydraulic design of culverts, bridge weirway openings, spillways, hydraulic gates and gated structures, pumping stations, and miscellaneous water control structures; pipe networks, mathematical modeling. Design project.

C E 571. Surface Water Hydrology.
(Cross-listed with ENESCI). (3-0) Cr. 3. Prereq: 372
Analysis of hydrologic data including precipitation, infiltration, evapotranspiration, direct runoff and streamflow; theory and use of frequency analysis; theory of streamflow and reservoir routing; use of deterministic and statistical hydrologic models. Fundamentals of surface water quality modeling, point and non-point sources of contamination. Design project.

C E 572. Analysis and Modeling Aquatic Environments.
(Cross-listed with ENESCI). (3-0) Cr. 3. Prereq: 372
Principles of surface water flows and mixing. Introduction to hydrologic transport and water quality simulation in natural water systems. Advection, diffusion and dispersion, chemical and biologic kinetics, and water quality dynamics. Applications to temperature, dissolved oxygen, primary productivity, and other water quality problems in rivers, lakes and reservoirs. Deterministic vs. stochastic models.

(Dual-listed with 473). (Cross-listed with ENESCI). (3-0) Cr. 3. Prereq: 372

(3-0) Cr. 3. Prereq: EM 378 or equivalent
Analysis and applications of flows in civil engineering, environmental engineering, and water resources. Primary topics include conservation laws, laminar flow, turbulence, mixing, diffusion, dispersion, water waves, and boundary layers. Associated applications include particle settling, transfer at air-water and water-sediment boundaries, flow and friction in pipes and open channels, contaminant transport, waves in lakes, jets, plumes, and salt wedges.

Cr. R. Repeatable. Prereq: Graduate classification
(1-0) Students and outside/invited speakers give weekly presentations about the ongoing research work and Geotechnical and Materials Engineering issues. Offered on a satisfactory-fail basis only.

C E 583. Pavement Analysis and Design.
(Dual-listed with 483). (3-0) Cr. 3. Prereq: 360 and 382
Analysis, behavior, performance, and structural design of pavement systems. Topics include climate factors, rehabilitation, life cycle design economics, material and system response, pavement foundations and traffic loadings. Development of models for and analysis of pavement systems. Use of transfer functions relating pavement response to pavement performance. Evaluation and application of current and evolving pavement design practices and procedures. Mechanistic-based pavement design techniques and concepts. Analysis of the effects of maintenance activities on pavement performance and economic evaluation of pavement systems.

C E 584. Advanced Design of Concretes.
(Dual-listed with 484). (2-3) Cr. 3. F. Prereq: 382
Asphalt binder characterization, fundamentals of asphalt rheology, asphalt materials behavior under loading and temperature effects. Portland cement concrete admixtures, cements and admixture compatibility, environmental effects on concrete performance, advanced performance testing. A term project is required.

(2-3) Cr. 3. Prereq: 382

(2-3) Cr. 3. Prereq: 382 or 383
Hydraulic cements, aggregates, admixtures, and mix design; concrete production, quality control, early-age properties and durability. Concrete distress examination, identification, prevention, and nondestructive testing; advanced concrete technology, high-strength and high performance concrete.

C E 590. Special Topics.
Cr. 1-5. Repeatable. F.S.S.
Pre-enrollment contract required.
C E 591. Seminar in Environmental Engineering.
Cr. R. Repeatable. F.S. 
Prereq: Graduate classification
(1-0) Contemporary environmental engineering issues. Outside speakers. Review of ongoing research in environmental engineering. Offered on a satisfactory-fail basis only.

C E 594. Special Topics in Construction Engineering and Management.
Cr. 1-3. Repeatable. 
Prereq: CON E 322, CON E 340 or C E 306, and permission of instructor
Some topics have a set number of credits and some topics have the number of credits vary. Emphasis for a particular offering will be selected from the following topics:
A. Planning and Scheduling
B. Computer Applications for Planning and Scheduling
C. Cost Estimating
D. Computer Applications for Cost Estimating
E. Project Controls
F. Computer Applications for Project Controls
G. Integration of Planning, Scheduling and Project Controls
J. Trenchless Technologies
K. Electrical and Mechanical Construction
L. Advanced Building Construction Topics
M. Design Build Construction
N. Industrial Construction
O. Highway and Heavy Construction
P. Advanced Technologies
Q. Construction Quality Control
R. Risk Management
S. Building Information Modeling

(0-1) Cr. 1. 
Prereq: Credit or enrollment in 501, 502, 503, or 505
Assigned readings and reports on research methods to solve construction engineering and management problems such as robotics, project controls, automation, etc. Identification of research methods and priorities, selection and development of research design, and critique of research in construction engineering and management.

C E 596. Special Topics in Transportation Engineering.
Cr. arr. Repeatable. 
Prereq: 355
A. Intelligent Transportation Systems
B. Geographic Information Systems in Transportation
C. Hazardous Materials Transportation
D. Transportation and Public Works
E. Sustainable Transportation
F. Freight Transportation

C E 599. Creative Component.
Cr. 1-3. Repeatable.
Pre-enrollment contract required. Advanced topic for creative component report in lieu of thesis.

Courses for graduate students

C E 622. Advanced Topics in Environmental Engineering.
(2-0) Cr. 2. Repeatable. 
Prereq: Permission of environmental engineering graduate faculty
Advanced concepts in environmental engineering. Emphasis for a particular offering will be selected from the following topics:
A. Water Pollution Control
B. Water Treatment
C. Solid and Hazardous Waste
D. Water Resources

C E 650. Advanced Topics in Transportation Engineering.
(3-0) Cr. 3. Repeatable. 
Prereq: Permission of Transportation Engineering graduate faculty
A. Highway Design

EC 690. Advanced Topics.
Cr. 1-3. Repeatable. F.S.S.
Pre-enrollment contract required.

C E 697. Engineering Internship.
Cr. R. Repeatable. 
Prereq: Permission of coop advisor, graduate classification
One semester and one summer maximum per academic year professional work period. Offered on a satisfactory-fail basis only.

C E 699. Research.
Cr. 1-30. Repeatable. 
Prereq: Pre-enrollment contract required
Undergraduate Study
For the undergraduate curriculum in computer engineering leading to
the degree Bachelor of Science. This curriculum is accredited by the
Engineering Accreditation Commission of ABET, 111 Market Place, Suite
1050, Baltimore, MD 21202-4012 - telephone: (419) 347-7700.

The Department of Electrical and Computer Engineering (ECoE) Depart-
ment at Iowa State University provides undergraduate students with the
opportunity to learn electrical and computer engineering fundamentals, study applications of the most recent advances in state-of-the-art tech-
nologies, and to prepare for the practice of computer engineering. The
student-faculty interaction necessary to realize this opportunity occurs
within an environment that is motivated by the principle that excellence in
undergraduate education is enhanced by an integrated commitment to
successful, long-term research and outreach programs.

The computer engineering curriculum offers focus areas in software
systems, embedded systems, networking, information security, computer architecture, and VLSI.

Students also may take elective courses in control systems, electromag-
netics, microelectronics, VLSI, power systems, and communications and
signal processing.

The objective of the computer engineering program at ISU is that its
graduates should demonstrate expertise, engagement, learning, leadership,
and teamwork within five years after graduation.

Expertise: Graduates should establish peer-recognized expertise together
with the ability to articulate that expertise and use it for problem
solving in the analysis, design, and evaluation of computer and soft-
ware systems, including system integration and implementation, using
contemporary practices.

Engagement: Graduates should be engaged in the engineering profes-
sion, locally and globally, contributing through the ethical, competent, and
creative practice of computer engineering in industry, academia, or the
public sector, or graduates may use the program as a foundation for inter-
disciplinary careers in business, law, medicine, or public service.

Learning: Graduates should demonstrate sustained learning through
graduate work or professional improvement opportunities and through
self study, and they should demonstrate the ability to adapt in a
constantly changing field.

Leadership: Graduates should exhibit leadership and initiative to advance
professional and organizational goals, facilitate the achievements of
others, and obtain results.

Teamwork: Graduates should demonstrate effective teaming and
commitment to working with others of diverse cultural and interdiscipli-
nary backgrounds by applying engineering abilities, communication skills,
and knowledge of contemporary and global issues.

As a complement to the instructional activity, the ECoE Department
provides opportunities for each student to have experience with broad-
ening activities. Through the cooperative education and internship
program, students have the opportunity to gain practical industry experi-
ence. Students have the opportunity to participate in advanced research
activities; and through international exchange programs, students learn
about engineering practices in other parts of the world. Well-qualified
juniors and seniors in computer engineering who are interested in grad-
uate study may apply for concurrent enrollment in the Graduate College
to simultaneously pursue both the Bachelor of Science and Master of
Science, the Bachelor of Science and Master of Business Administration,
or Bachelor of Science and Master of Engineering degrees.

Students are required to prepare and to maintain a portfolio of their
technical and non-technical skills. This portfolio is evaluated for student
preparation during the student’s curriculum planning process. Results of
the evaluation are used to advise students of core strengths and weak-
nesses.

Graduate Study
The department offers work for the degrees Master of Engineering,
Master of Science and Doctor of Philosophy with a major in computer
engineering and minor work to students with other majors. Minor work
for computer engineering majors is usually selected from a wide range of
courses outside computer engineering.

The Master of Engineering degree is course-work only. It is recom-
mended for off-campus students.

The Master of Science degree with thesis is recommended for students
who intend to continue toward the Doctor of Philosophy degree or to
undertake a career in research and development. The non-thesis Master
of Science degree requires a creative component.

The department also offers three graduate certificate programs in
embedded systems, computer networking, and software systems.

The normal prerequisite to graduate major work in computer engi-
neering is the completion of undergraduate work substantially equiva-
lent to that required of computer engineering students at this university.
It is possible for a student to qualify for graduate study in computer
engineering even though the student’s undergraduate or prior gradu-
ate training has been in a discipline other than computer engineering.
Supporting work, if required, will depend on the student’s background
and area of research interest. Prospective students from a discipline
other than computer engineering are required to submit, with the applica-
dation for admission, a statement of the proposed area of graduate study.

The department requires submission of GRE General test scores by
applicants. All students whose first language is not English and who
have no U.S. degree must submit TOEFL examination scores. Students
pursuing the Doctor of Philosophy must complete the department quali-
fying process.

The Department of Electrical and Computer Engineering is a participating
department in the interdepartmental Master of Science and Doctor of
Philosophy degree programs in bioinformatics and computational biology.
Students interested in these programs may earn their degrees while
working under an adviser in electrical and computer engineering.

The Department of Electrical and Computer Engineering is also a partic-
ipating department in the interdepartmental certificate, Master of Engi-
neering, and Master of Science in Information Assurance programs.
Students interested in studying information assurance topics may earn a
degree in computer engineering or in information assurance. (See catalog
section on Information Assurance.)

Well-qualified juniors and seniors in computer engineering who are
interested in graduate study may apply for concurrent enrollment in
the Graduate College to simultaneously pursue both Bachelor of
Science and Master of Science, or Bachelor of Science and Master of
Business Administration, or Bachelor of Science and Master of Engi-
neering degrees. Under concurrent enrollment, students are eligible for
assistantships and simultaneously take undergraduate and graduate
courses. Details are available in the Student Services Office and on the
department’s web site.

Curriculum in Computer Engineering
Administered by the Department of Electrical and Computer Engineering.

Leading to the degree bachelor of science.
Total credits required: 126.5 See also Basic Program and Special Programs.

Co-op or internship is optional.

Outcomes Assessment - Students are required to prepare and to maintain a portfolio of their technical and non-technical skills. This portfolio is evaluated for student preparation during the student’s curriculum planning process. Results of the evaluation are used to advise students of core strengths and weaknesses.

Transfer Credit Requirements

The degree program must include a minimum of 30 credits at the 300-level or above in professional and technical courses earned at ISU in order to receive a B.S. in computer engineering. These 30 credits must include CPR E 491 Senior Design Project I and Professionalism, CPR E 492 Senior Design Project II, and credits in the core professional curriculum and/or in technical electives. The Electrical and Computer Engineering Department requires a grade of C or better for any transfer credit course that is applied to the degree program.

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass, but are used to meet the general education electives.
2. Complete minimum of 6 cr. from Approved General Education Component at 300- or higher level. Complete additional 9 cr. from Approved General Education Component.
3. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.
4. 2.00 required including transfer courses.
5. From department approved lists.

Courses primarily for undergraduate students

(Cross-listed with INFAS). (1-0) Cr. 1.
Basic concepts of practical computer and Internet security: passwords, firewalls, antivirus software, malware, social networking, surfing the Internet, phishing, and wireless networks. This class is intended for students with little or no background in information technology or security. Basic knowledge of word processing required. Offered on a satisfactory-fail basis only.

CPR E 166. Professional Programs Orientation.
(Cross-listed with E E). Cr. R. F.S.
(1-0) Overview of the nature and scope of electrical engineering and computer engineering professions. Overview of portfolios. Departmental rules, student services operations, degree requirements, program of study planning, career options, and student organizations.

CPR E 185. Introduction to Computer Engineering and Problem Solving I.
(2-2) Cr. 3. Prereq: Credit or enrollment in MATH 141
CPR E 186. Introduction to Computer Engineering and Problem Solving II.
(0-2) Cr. 1. S Prereq: 185
Project based examples from computer engineering. Group skills needed to work effectively in teams. Group problem solving. Computer based projects. Technical reports and presentations. Students will work on 2 or 3 self-directed team based projects that are representative of problems faced by computer engineers.

CPR E 261. Transfer Orientation.
(Cross-listed with E E). Cr. R.
Introduction to the College of Engineering and the engineering profession specifically for transfer students. Information concerning university and college policies, procedures, and resources. Offered on a satisfactory-fail basis only.

CPR E 281. Digital Logic.
(3-2) Cr. 4. F.S. Prereq: sophomore classification
Number systems and representation. Boolean algebra and logic minimization. Combinational and sequential logic design. Arithmetic circuits and finite state machines. Use of programmable logic devices. Introduction to computer-aided schematic capture systems, simulation tools, and hardware description languages. Design of simple digital systems.

(3-2) Cr. 4. F.S. Prereq: 281, COM S 207 or COM S 227
Embedded C programming. Interrupt handling. Memory mapped I/O in the context of an application. Elementary embedded design flow/methodology. Timers, scheduling, resource allocation, optimization, state machine based controllers, real time constraints within the context of an application. Applications laboratory exercises with embedded devices.

CPR E 294. Program Discovery.
(Cross-listed with E E). Cr. R. Prereq: 166 or E E 166
The roles of professionals in computer and electrical engineering. Relationship of coursework to industry and academic careers. Issues relevant to today’s world. Offered on a satisfactory-fail basis only.

CPR E 298. Cooperative Education.
Cr. R. F.S.SS. Prereq: Permission of department and Engineering Career Services
First professional work period in the cooperative education program. Students must register for this course before commencing work.

(3-3) Cr. 4. F.S. Prereq: 281, 310
Operating system concepts, processes, threads, synchronization between threads, process and thread scheduling, deadlocks, memory management, file systems, I/O systems, security, Linux-based lab experiments. Nonmajor graduate credit.

(3-0) Cr. 3. F.S. Prereq: Credit or enrollment in CPR E 288, COM S 228
Propositional logic and methods of proof; set theory and its applications; mathematical induction and recurrence relations; functions and relations; and counting; trees and graphs; applications in computer engineering.

CPR E 329. Software Project Management.
(Cross-listed with S E). (3-0) Cr. 3. Prereq: COM S 309

CPR E 330. Integrated Electronics.
(Cross-listed with E E). (3-3) Cr. 4. Prereq: E E 201, credit or enrollment in E E 230, CPR E 281

(Cross-listed with S E). (3-0) Cr. Prereq: S E 319

CPR E 370. Tooting with Technology.
(Cross-listed with MAT E). (2-2) Cr. 3. F.S. Prereq: C I 201
A project-based, hands-on learning course. Technology literacy, appreciation for technological innovations, principles behind many technological innovations, hands-on laboratory experiences based upon simple systems constructed out of LEGO’s and controlled by small microcomputers. Future K-12 teachers will leave the course with complete lesson plans for use in their upcoming careers.

(3-2) Cr. 4. F.S. Prereq: 281
Introduction to computer organization, evaluating performance of computer systems, instruction set design. Assembly level programming: arithmetic operations, control flow instructions, procedure calls, stack management. Processor design. Datapath and control, scalar pipelines, introduction to memory and I/O systems.

(3-2) Cr. 4. Prereq: 288
Contemporary programming techniques for event driven systems - Xcode and COCOA for objective-C. Location and motion sensors based user interfaces. Threading and scheduling. Resource management - measurement and control techniques - for memory and energy. Client-server application design. Distributed applications. Laboratory includes exercises based on a mobile platform such as iPhone.

CPR E 394. Program Exploration.
(Cross-listed with E E). Cr. R. Prereq: 294 or E E 294
Exploration of academic and career fields for electrical and computer engineers. Examination of professionalism in the context of engineering and technology with competencies based skills. Introduction to professional portfolio development and construction. Offered on a satisfactory-fail basis only.

CPR E 396. Summer Internship.
Cr. R. Repeatable. SS. Prereq: Permission of department and Engineering Career Services
Summer professional work period.

CPR E 397. Engineering Internship.
Cr. R. Repeatable. F.S.S.S. Prereq: Permission of department and Engineering Career Services
One semester maximum per academic year professional work period.

CPR E 398. Cooperative Education.
Cr. R. F.S.SS. Prereq: 298, permission of department and Engineering Career Services
Second professional work period in the cooperative education program. Students must register for this course before commencing work.

CPR E 416. Software Evolution and Maintenance. (Cross-listed with S E). (3-0) Cr. 3. Prereq: COM S 309. Practical importance of software evolution and maintenance, systematic defect analysis and debugging techniques, tracing and understanding large software, impact analysis, program migration and transformation, refactoring, tools for software evolution and maintenance, experimental studies and quantitative measurements of software evolution. Written reports and oral presentation. Nonmajor graduate credit.

CPR E 425. High Performance Computing for Scientific and Engineering Applications. (Cross-listed with COM S). (3-1) Cr. 3. S. Prereq: COM S 311, COM S 330, ENGL 250, SP CM 212. Introduction to high performance computing platforms including parallel computers and workstation clusters. Discussion of parallel architectures, performance, programming models, and software development issues. Sample applications from science and engineering. Practical issues in high performance computing will be emphasized via a number of programming projects using a variety of programming models and case studies. Oral and written reports. Nonmajor graduate credit.

CPR E 431. Basics of Information System Security. (3-0) Cr. 3. S. Prereq: credit or enrollment in CPR E 489 or COM S 454. Introduction to and application of basic mechanisms for protecting information systems from accidental and intentional threats. Basic cryptography use and practice. Computer security issues including authentication, access control, and malicious code. Network security mechanisms such as intrusion detection, firewalls, IPSEC, and related protocols. Ethics and legal issues in information security. Other selected topics. Programming and system configuration assignments. Nonmajor graduate credit.

CPR E 435. Analog VLSI Circuit Design. (Cross-listed with E E). (3-3) Cr. 4. S. Prereq: 330, E E 332, 324, and either E E 322 or STAT 330. Basic analog integrated circuit and system design including design space exploration, performance enhancement strategies, operational amplifiers, references, integrated filters, and data converters. Nonmajor graduate credit.

CPR E 444. Introduction to Bioinformatics. (Dual-listed with 544). (Cross-listed with BCB, BCBIO, BIOL, COM S, GEN). (4-0) Cr. 4. F. Prereq: MATH 165 or STAT 401 or equivalent. Broad overview of bioinformatics with a significant problem-solving component, including hands-on practice using computational tools to solve a variety of biological problems. Topics include: database searching, sequence alignment, gene prediction, RNA and protein structure prediction, construction of phylogenetic tree, comparative and functional genomics, systems biology. Nonmajor graduate credit.

CPR E 450. Distributed Systems and Middleware. (Dual-listed with 550). (3-0) Cr. 3. Prereq: 308 or COM S 352. Fundamentals of distributed computing, software agents, naming services, distributed transactions, security management, distributed object-based systems, web-based systems, middleware-based application design and development, case studies of middleware and internet applications. Nonmajor graduate credit.

CPR E 454. Distributed and Network Operating Systems. (Dual-listed with 554). (Cross-listed with COM S). (3-1) Cr. 3. Alt. S., offered 2013. Prereq: COM S 311, COM S 352, ENGL 250, SP CM 212. Laboratory course dealing with practical issues of design and implementation of distributed and network operating systems and distributed computing environments (DCE). The client server paradigm, interprocess communications, layered communication protocols, synchronization and concurrency control, and distributed file systems. Graduate credit requires additional in-depth study of advanced operating systems. Written reports. Nonmajor graduate credit.

CPR E 465. Digital VLSI Design. (Cross-listed with E E). (3-3) Cr. 4. S. Prereq: E E 330. Digital design of integrated circuits employing very large scale integration (VLSI) methodologies. Technology considerations in design. High level hardware design languages, CMOS logic design styles, area-energy-delay design space characterization, datapath blocks: arithmetic and memory, architectures and systems on a chip (SOC) considerations. VLSI chip hardware design project. Nonmajor graduate credit.

CPR E 466. Multidisciplinary Engineering Design. (Cross-listed with A E, AER E, E E, ENGR, I E, M E, MAT E). (1-4) Cr. 3. Repeatable. F.S. Prereq: Student must be within two semesters of graduation and receive permission of instructor. Application of team design concepts to projects of a multidisciplinary nature. Concurrent treatment of design, manufacturing and life cycle considerations. Application of design tools such as CAD, CAM, and FEM. Design methodologies, project scheduling, cost estimating, quality control, manufacturing processes. Development of a prototype and appropriate documentation in the form of written reports, oral presentations and computer models and engineering drawings.

CPR E 483. Hardware Software Integration. (3-3) Cr. 4. S. Prereq: 381. Embedded system design using hardware description language (HDL) and field programmable gate array (FPGA). HDL modeling concepts and styles are introduced; focus on synthesizability, optimality, reusability and portability in hardware design description. Introduction to complex hardware cores for data buffering, data input/output interfacing, data processing. System design with HDL cores and implementation in FPGA. Laboratory-oriented design projects. Nonmajor graduate credit.
(3-3) Cr. 4. Prereq: 381 or COM S 321  
Embedded microprocessors, embedded memory and I/O devices, component interfaces, embedded software, program development, basic compiler techniques, platform-based FPGA technology, hardware synthesis, design methodology, real-time operating system concepts, performance analysis and optimizations. Nonmajor graduate credit.

CPR E 489. Computer Networking and Data Communications.  
(3-2) Cr. 4. F.S. Prereq: 381 or E E 324  
Modern computer networking and data communications concepts. TCP/IP, OSI protocols, client server programming, data link protocols, local area networks, and routing protocols. Nonmajor graduate credit.

CPR E 490. Independent Study.  
Cr. arr. Repeatable. Prereq: Senior classification in computer engineering investigation of an approved topic.

H. Honors

CPR E 491. Senior Design Project I and Professionalism.  
(Cross-listed with E E). (2-3) Cr. 3. F.S. Prereq: 308 or E E 322, completion of 24 credits in the E E core professional program or 28 credits in the Cpr E core professional program, ENSL 314  
Preparing for entry to the workplace. Selected professional topics. Use of technical writing skills in developing project plan and design report; design review presentation. First of two-semester team-oriented, project design and implementation experience.

CPR E 492. Senior Design Project II.  
(Cross-listed with E E). (1-3) Cr. 2. F.S. Prereq: 491 or E E 491  
Second semester of a team design project experience. Emphasis on the successful implementation and demonstration of the design completed in E E 491 or CPR E 491 and the evaluation of project results. Technical writing of final project report; oral presentation of project achievements; project poster.

CPR E 494. Portfolio Assessment.  
(Cross-listed with E E). Cr. R. Prereq: Credit or enrollment in 491  
Portfolio update and evaluation. Portfolios as a tool to enhance career opportunities.

CPR E 498. Cooperative Education.  
Cr. R. Repeatable. F.S.SS. Prereq: 398, permission of department and Engineering Career Services  
Third and subsequent professional work periods in the cooperative education program. Students must register for this course before commencing work.

Courses primarily for graduate students, open to qualified undergraduate students

(Cross-listed with E E). (3-3) Cr. 4. F. Prereq: 435  

(Cross-listed with E E). (3-3) Cr. 4. Prereq: EE435, credit or registration for EE501 (can be waived by instructor)  
Theory, design and applications of power management and regulation circuits (linear and switching regulators, battery chargers, and reference circuits) including: architectures, performance metrics and characterization, noise and stability analysis, practical implementation and on-chip integration issues, design considerations for portable, wireless, and RF SoCs.

CPR E 505. CMOS and BiCMOS Data Conversion Circuits.  
Theory, design and applications of data conversion circuits (A/D and D/A converters) including: architectures, characterization, quantization effects, conversion algorithms, spectral performance, element matching, design for yield, and practical comparators, implementation issues.

CPR E 506. Design of CMOS Phase-Locked Loops.  
(Cross-listed with E E). (3-3) Cr. 4. Prereq: EE 435 or 501 or instructor approval  
Analysis and design of phase-locked loops implemented in modern CMOS processes including: architectures, performance metrics, and characterization; noise and stability analysis; and design issues of phase-frequency detectors, charge pumps, loop filters (passive and active), voltage controlled oscillators, and frequency dividers.

CPR E 507. VLSI Communication Circuits.  
(Cross-listed with E E). (3-3) Cr. 4. Alt. S., offered 2013. Prereq: 330 or 501  
Phase-locked loops, frequency synthesizers, clock and data recovery circuits, theory and implementation of adaptive filters, low-noise amplifiers, mixers, power amplifiers, transmitter and receiver architectures.

CPR E 511. Design and Analysis of Algorithms.  
(Cross-listed with COM S). (3-0) Cr. 3. F. Prereq: COM S 311  
A study of basic algorithm design and analysis techniques. Advanced data structures, amortized analysis and randomized algorithms. Applications to sorting, graphs, and geometry. NP-completeness and approximation algorithms.

(Cross-listed with COM S, MATH). (3-0) Cr. 3. Alt. S., offered 2013. Prereq: 308, or one of Math 471, 481; experience in scientific programming; knowledge of FORTRAN or C  
Development, analysis, and testing of efficient numerical methods for use on current state-of-the-art high performance computers. Applications of the methods to the student’s area of research.

(Dual-listed with 426). (Cross-listed with COM S). (3-2) Cr. 4. F. Prereq: 308 or COM S 321, COM S 311  
Models of parallel computation, performance measures, basic parallel constructs and communication primitives, parallel programming using MPI, parallel algorithms for selected problems including sorting, matrix, tree and graph problems, fast Fourier transforms.

(3-0) Cr. 3. Prereq: COM S 311  
The application of randomization and probabilistic methods in the design of computer algorithms, and their efficient implementation. Discrete random variables in modeling algorithm behavior, with applications to sorting, selection, graph algorithms, hashing, pattern matching, cryptography, distributed systems, and massive data set algorithms.

(Cross-listed with INFAS). (3-0) Cr. 3. Prereq: 381  
Detailed examination of networking standards, protocols, and their implementation. TCP/IP protocol suite, network application protocols, IP routing, network security issues. Emphasis on laboratory experiments.

(Cross-listed with INFAS). (3-0) Cr. 3. Prereq: 489 or 530 or COM S 586 or MIS 525  
Computer and network security: basic cryptography, security policies, multilevel security models, attack and protection mechanisms, legal and ethical issues.
CPR E 532. Information Warfare. 
(Cross-listed with INFAS). (3-0) Cr. 3. S. Prereq: 531 
Computer system and network security: implementation, configuration, 
testing of security software and hardware, network monitoring. Authentication, 
firewalls, vulnerabilities, exploits, countermeasures. Ethics in information assurance. Emphasis on laboratory experiments.

CPR E 533. Cryptography. 
(Cross-listed with MATH, INFAS). (3-0) Cr. 3. S. Prereq: MATH 301 or 
CPR E 310 or COM S 320 
Basic concepts of secure communication, DES and AES, public-key cryptosystems, elliptic curves, hash algorithms, digital signatures, applications. Relevant material on number theory and finite fields.

CPR E 534. Legal and Ethical Issues in Information Assurance. 
(Cross-listed with INFAS, POL S). (3-0) Cr. 3. S. Prereq: Graduate classification, CPR E or INFAS 531 
Legal and ethical issues in computer security. State and local codes and regulations. Privacy issues.

(Cross-listed with INFAS, MATH). (3-0) Cr. 3. S. Prereq: E E 524 or 
MATH 307 or COM S 330 
Basic principles of covert communication, steganalysis, and forensic analysis for digital images. Steganographic security and capacity, matrix embedding, blind attacks, image forensic detection and device identification techniques. Related material on coding theory, statistics, image processing, pattern recognition.

(Cross-listed with INFAS). (3-0) Cr. 3. Prereq: 381 and 489 or 530 
Fundamentals of computer and network forensics, forensic duplication and analysis, network surveillance, intrusion detection and response, incident response, anonymity and pseudonymity, privacy-protection techniques, cyber law, computer security policies and guidelines, court testimony and report writing, and case studies. Emphasis on hands-on experiments.

(3-0) Cr. 3. S. Prereq: Credit or enrollment in 489 or 530 
Introduction to the physical layer and special issues associated with security of the airlink interface. Communication system modeling, wireless networking, base stations, mobile stations, airlink multiple access, jamming, spoofing, signal intercept, wireless LANs and modern cellular, position location, spread spectrum, signal modeling, propagation modeling, wireless security terminology.

CPR E 541. High-Performance Communication Networks. 
(3-0) Cr. 3. Prereq: 489 or 530 
Selected topics from recent advances in high performance networks; next generation internet; asynchronous transfer mode; traffic management, quality of service; high speed switching.

CPR E 542. Optical Communication Networks. 
(3-0) Cr. 3. S. Prereq: 489 
Optical components and interfaces; optical transmission and reception techniques; wavelength division multiplexing; network architectures and protocol for first generation, single and multihop optical network; routing and wavelength assignment in second generation wavelength routing networks; traffic grooming, optical network control; survivability; access networks; metro networks.

(3-0) Cr. 3. Prereq: Credit or enrollment in 489 or 530 
Introduction to the protocol architecture of the data link layer, network layer and transport layer for wireless networking. Operation and management of Medium Access Control in Wireless Local Area Networks (WLAN) and Wireless Metropolitan Area Networks (WMAN); recent developments in IEEE 802.11 & 802.16 and Bluetooth; Mobile IP; Mobile TCP.

CPR E 544. Introduction to Bioinformatics. 
(Dual-listed with 444). (Cross-listed with BCB, COM S, GDCB). (4-0) Cr. 4. 
F. Prereq: MATH 165 or STAT 401 or equivalent 
Broad overview of bioinformatics with a significant problem-solving component, including hands-on practice using computational tools to solve a variety of biological problems. Topics include: database searching, sequence alignment, gene prediction, RNA and protein structure prediction, construction of phylogenetic trees, comparative and functional genomics, systems biology.

CPR E 545. Fault-Tolerant Systems. 
(3-0) Cr. 3. Prereq: 381 
Faults and their manifestations, errors, and failures; fault detection, location and reconfiguration techniques; time, space, and information (coding) redundancy management; design for testability; self-checking and fail-safe circuits; system-level fault diagnosis; Byzantine agreement; stable storage and RAID; clock synchronization; fault-tolerant networks; fault tolerance in real-time systems; reliable software design; checkpointing and rollback recovery; atomic actions; replica management protocols; and reliability evaluation techniques and tools.

(3-0) Cr. 3. Prereq: CPR E 489 or 530 
Fundamental and well-known protocols for wireless ad hoc and sensor networks at various layers, including physical layer issues, MAC (medium access control) layer protocols, routing protocols for wireless ad hoc and sensor networks, data management in sensor networks, coverage and connectivity, localization and tracking, security and privacy issues. Introduction to TinyOS and the nesC language. Hands-on experiments with Crossbow Mote sensor devices.

(3-0) Cr. 3. 
Analytical approach to resource allocation on communication networks (e.g. the Internet, multihop wireless networks, etc.). Network utility maximization and the Internet congestion control algorithm. Layering as optimization decomposition: a cross-layer design approach in multihop wireless networks. Capacity of ad hoc wireless networks.

(Cross-listed with COM S). (3-0) Cr. 3. Alt., offered 2012. Prereq: 
COM S 311 and either COM S 228 or COM S 208 
Design and analysis of algorithms for applications in computational biology, pairwise and multiple sequence alignments, approximation algorithms, string algorithms including in-depth coverage of suffix trees, semi-numerical string algorithms, algorithms for selected problems in fragment assembly, phylogenetic trees and protein folding. No background in biology is assumed. Also useful as an advanced algorithms course in string processing.

CPR E 550. Distributed Systems and Middleware. 
(Dual-listed with 450). (3-0) Cr. 3. Prereq: 308 or COM S 352 
Fundamentals of distributed computing, software agents, naming services, distributed transactions, security management, distributed object-based systems, web-based systems, middleware-based application design and development, case studies of middleware and Internet applications.

CPR E 554. Distributed and Network Operating Systems. 
(Dual-listed with 454). (Cross-listed with COM S). (3-1) Cr. 3. Alt., offered 2013. Prereq: 
COM S 311, COM S 352 
Laboratory course dealing with practical issues of design and implementation of distributed and network operating systems and distributed computing environments (DCE). The client server paradigm, inter-process communications, layered communication protocols, synchronization and concurrency control, and distributed file systems. Graduate credit requires additional in-depth study of advanced operating systems. Written reports.
CPR E 556. Scalable Software Engineering.
(3-0) Cr. 3. Prereq: COM S 309
Design and analysis techniques scalable to large software, project-based learning of problem solving techniques, automation tools for high productivity and reliability of software, analysis-based measurement and estimation techniques for predictable software engineering.

(Cross-listed with COM S, M E): (3-0) Cr. 3. F.S. Prereq: M E 421, programming experience in C

(Dual-listed with 458). (3-0) Cr. 3. Prereq: 308 or COM S 352

(3-0) Cr. 3. S. Prereq: 381
Algorithms and techniques to generate application-specific VLSI circuits from high-level behavioral modeling in hardware description languages. Boolean logic representation, two-level and multi-level logic synthesis, sequential logic optimization, hardware models, architectural-level synthesis and optimization, scheduling algorithms, resource sharing and binding.

(Cross-listed with AGRON, AN S, BCB, CH E, EEB, HORT, M E, MICRO, PL P, V MPM). Cr. arr. Prereq: Graduate classification
Professional, ethical and legal issues facing scientists and engineers in academia. Offered in modular format.
A. Responsible Conduct of Research. (Cr. 1.0): F
B. Working with Industry. (Cr. 0.5).
C. Communications in Science. (Cr. 0.5). Alt S., offered 2011. Reading and reviewing manuscripts; publishing papers; oral and poster presentations.
D. Time Management and Mentoring. (Cr. 0.5). Alt F, offered 2012.
E. The Interview Process. (Cr. 0.5). Alt S., offered 2012. Applying and interviewing for academia, industry and government.
F. Grant Writing. (Cr. 1.0). Alt F, offered 2011. Writing a winning proposal.
G. Teaching. (Cr. 0.5). Preparation of a teaching portfolio and course materials; lecturing, technology.
H. Ethical and legal issues in research.
I. Establishing productive collaborations with industry.

(3-0) Cr. 3. Prereq: 465

CPR E 567. Bioinformatics I (Fundamentals of Genome Informatics).
(Cross-listed with COM S, BCB). (3-0) Cr. 3. F. Prereq: COM S 208; COM S 330; STAT 341; credit or enrollment in BIOL 315; STAT 430

CPR E 569. Bioinformatics III (Structural Genome Informatics).
(Cross-listed with BBMB, BCB, COM S). (3-0) Cr. 3. F. Prereq: BCB 567, Gen 411, STAT 430

CPR E 570. Bioinformatics IV (Computational Functional Genomics and Systems Biology).
(Cross-listed with BCB, COM S, GDCB, STAT). (3-0) Cr. 3. S. Prereq: BCB 567, BIOL 315, COM S 311 and either 208 or 228, Gen 411, STAT 430

CPR E 575. Computational Perception.
(Cross-listed with COM S, HCI). (3-0) Cr. 3. S. Prereq: Graduate standing or permission of instructor
Statistical and algorithmic methods for sensing, recognizing, and interpreting the activities of people by a computer. Focuses on machine perception techniques that facilitate and augment human-computer interaction. Introduce computational perception on both theoretical and practical levels. Participation in small groups to design, implement, and evaluate a prototype of a human-computer interaction system that uses one or more of the techniques covered in the lectures.

(Cross-listed with COM S). (3-0) Cr. 3. F. Prereq: 381
Quantitative principles of computer architecture design, instruction set design, processor architecture: pipelining and superscalar design, instruction level parallelism, memory organization: cache and virtual memory systems, multiprocessor architecture, cache coherency, interconnection networks and message routing, I/O devices and peripherals.

CPR E 582. Computer Systems Performance.
(3-0) Cr. 3. Prereq: 381, 310 and STAT 330
Review of probability and stochastic processes concepts; Markovian processes; Markovian queues; renewal theory; semi-Markovian queues; queueing networks, applications to multiprocessor architectures, computer networks, and switching systems.

(Cross-listed with COM S). (3-0) Cr. 3. Prereq: Background in computer architecture, design, and organization
Introduction to reconfigurable computing, FPGA technology and architectures, spatial computing architectures such as systolic and bit serial adaptive network architectures, static and dynamic rearrangeable interconnection architectures, processor architectures incorporating reconfigurability.

(3-0) Cr. 3. Prereq: enrollment in 588
Industry-standard tools and optimization strategies; practical embedded platforms and technology (reconfigurable platforms, multi-core platforms, low-power platforms); instruction augmentation, memory-mapped accelerator design, embedded software optimization. Students will be encouraged to compete as teams in an embedded system design competition.
(3-0) Cr. 3. Prereq: CPR E 489 or 530
Fundamentals of pervasive computing, including location and context awareness, mobile and location services, ubiquitous data access, low power computing and energy management, middleware, security and privacy issues.

(3-0) Cr. 3. Prereq: 388

CPR E 590. Special Topics.
Cr. 1-6. Repeatable.
Formulation and solution of theoretical or practical problems in computer engineering.

CPR E 592. Seminar in Computer Engineering.
Cr. 1-4. Repeatable. Prereq: Permission of instructor
Projects or seminar in Computer Engineering.

CPR E 594. Selected Topics in Computer Engineering.
(3-0) Cr. 3. Repeatable.

CPR E 599. Creative Component.
Cr. arr. Repeatable.

Courses for graduate students
(Cross-listed with COM S) (3-0) Cr. 3. Prereq: 526
Algorithm design for high-performance computing. Parallel algorithms for multidimensional tree data structures, space-filling curves, random number generation, graph partitioning and load balancing. Applications to grid and particle-based methods and computational biology.

CPR E 632. Information Assurance Capstone Design.
(Cross-listed with INFAS) (3-0) Cr. 3. Prereq: 531, 532, 534
Capstone design course which integrates the security design process. Design of a security policy. Creation of a security plan. Implementation of the security plan. The students will attach each other’s secure environments in an effort to defeat the security systems. Students evaluate the security plans and the performance of the plans. Social, political and ethics issues. Student self-evaluation, journaling, final written report, and an oral report.

(Cross-listed with COM S) (3-0) Cr. 3. Alt. S., offered 2013. Prereq: 581. Repeatable with Instructor permission
Current topics in computer architecture design and implementation. Advanced pipelining, cache and memory design techniques. Interaction of algorithms with architecture models and implementations. Tradeoffs in architecture models and implementations.

CPR E 697. Engineering Internship.
(Cross-listed with E E). Cr. R. Repeatable.
One semester and one summer maximum per academic year professional work period. Offered on a satisfactory-fail basis only.

CPR E 699. Research.
Cr. arr. Repeatable.
Construction Engineering

Administered by the Department of Civil, Construction and Environmental Engineering

Study

For curriculum in construction engineering leading to the degree bachelor of science. This curriculum is accredited under the General Criteria and Construction Engineering Program Criteria by the Engineering Accreditation Commission of ABET, 111 Market Place, Suite 1040, Baltimore, MD 21202-4012 – telephone: (410) 347-7700, http://www.abet.org.

Construction engineering is a curriculum administered by the Department of Civil, Construction and Environmental Engineering. For details of the curriculum in construction engineering leading to the degree bachelor of science. General objectives, which are common to all departments in engineering, are stated in the College of Engineering, Objectives of Curricula in Engineering. The curriculum in construction engineering is designed to meet the following objectives:

1. Graduates will grasp the full range of construction project engineering and management responsibilities.
2. Graduates will demonstrate leadership qualities.
3. Graduates will participate in business development, networking and continued learning functions as appropriate for their employer.

Construction engineers need to possess strong fundamental knowledge of engineering design and management principles, including knowledge of business procedures, economics, and human behavior. Graduates of this curriculum may expect to engage in design of temporary structures, coordination of project design, systems design, cost estimating, planning and scheduling, company and project management, materials procurement, equipment selection, and cost control. With the emergence of integrated project delivery methods such as design-build construction, the role of the construction engineer is expanding the need for trained professionals that understand both aspects of the project delivery environment. The curriculum offers opportunities to study emphases concerned with building, heavy, mechanical or electrical construction. The process of construction involves the organization, administration, and coordination of labor resource requirements, temporary and permanent materials, equipment, supplies and utilities, money, technology and methods. These must be integrated in the most efficient manner possible to complete construction projects on schedule, within the budget, and according to the standards of quality and performance specified by the project owner or designer. The curriculum blends engineering, management and business sciences into a study of the processes of construction whereby designer’s plans and specifications are converted into physical structures and facilities.

The curriculum develops the ability of students to be team workers, creative thinkers, and effective communicators. This is achieved by providing students with opportunities to:

- interact with practicing professionals.
- gain work experience during summer jobs, internship, and cooperative education assignments that emphasize the knowledge required of construction engineers.
- develop leadership skills by participating in student organizations.
- develop, analyze, and interpret alternative solutions to open-ended problems.
- study abroad.

The construction industry is becoming increasingly global. Courses in humanities, social sciences, U.S. diversity, and international perspectives are included in the curriculum to broaden the student’s perspective of the work environment. In addition, the department has several exchange program opportunities for students to participate in study-abroad programs. Interested and qualified students have the opportunity to participate in the cooperative education program or internship program to supplement academic work with work experience.

Construction engineering students are encouraged to participate in lifelong learning, continuous professional development, and to achieve professional engineer registration and/or registration as a certified professional constructor. Qualified construction engineering students within 30 credits of completing their degree may apply for concurrent enrollment in the Graduate College. See Civil Engineering Graduate Study for more information.

Graduate Study

An area of specialization in construction engineering and management is offered within the graduate program of the Department of Civil, Construction and Environmental Engineering. See Civil Engineering, Courses and Programs.

A graduate certificate is also available which requires 12 credits:

Total Credits 12

Basic Program: 26.5 cr.
Complete with 2.00 GPA including transfer courses (see above for grade requirements):

CHEM 167  General Chemistry for Engineering Students 4
or CHEM 177  General Chemistry I 4
ENG 150  Critical Thinking and Communication 3
ENG 250  Written, Oral, Visual, and Electronic Composition 3
ENGR 101  Engineering Orientation 1
C E 160  Engineering Problems with Computational Laboratory 3
LIB 160  Library Instruction 0.5
MATH 165  Calculus I 4
MATH 166  Calculus II 4
PHYS 221  Introduction to Classical Physics I (See Basic Program rule) 5
Total Credits 26.5

Math and Physical Science: 11 cr. (B, H); 12 cr. (E, M).

STAT 105  Introduction to Statistics for Engineers 3
MATH 266  Elementary Differential Equations 3
MATH 267  Elementary Differential Equations and Laplace Transforms 4
PHYS 222  Introduction to Classical Physics II 5

Construction Engineering Core: 27 cr. (B, H, E); 28 cr. (M4).

E E 234  Statics of Engineering 3
E E 324  Mechanics of Materials 3
CON E 421  Construction Estimating 3
CON E 441  Construction Planning, Scheduling, and Control 3
E M 378  Mechanics of Fluids 3
C E 332  Structural Analysis I 3
See options for remaining option core courses 9-10
Total Credits 27-28

Additional Required Courses: 32 cr. (B, H), 33 cr. (E, M)

CON E 121  Cornerstone Learning Community: Orientation to Academic Life 1
CON E 122  Cornerstone Learning Community: Orientation to Professional Life 1
C E 170  Graphics for Civil Engineering 2
C E 111  Fundamentals of Surveying I 3
ACCT 284  Financial Accounting 3
CON E 222  Contractor Organization and Management of Construction 3
CON E 241  Construction Materials and Methods 3
CON E 251  Mechanical/Electrical Materials and Methods 1
Law Elective 3
CON E 487  Construction Engineering Design I 3
CON E 488  Construction Engineering Design II 3
Business Communication Elective 3
ENG 302  Business Communication 3
ENG 309  Report and Proposal Writing 3
ENG 314  Technical Communication 3
Complete one course from Math or Stat Elective, 3 cr. (B, H); 4 cr. (E, I); 3-4 M12
Total Credits 32-33

Select remaining courses from one of the following options:

Building Option: Remaining Core courses (9 cr.)

C E 360  Geotechnical Engineering 3
CON E 322  Construction Equipment and Heavy Construction Methods 3
CON E 340  Concrete and Steel Construction 3
Total Credits 9

Remaining option courses 15 cr.

C E 333  Structural Steel Design I 3
C E 334  Reinforced Concrete Design I 3
C E 383  Design of Portland Cement Concrete 1
CON E 352  Mechanical Systems in Buildings 3
CON E 353  Electrical Systems in Buildings 2
E M 327  Mechanics of Materials Laboratory 1
Engineering Topics Elective 2
Total Credits 15

Heavy Option: Remaining Core courses (9 cr.)

C E 360  Geotechnical Engineering 3
CON E 322  Construction Equipment and Heavy Construction Methods 3
CON E 340  Concrete and Steel Construction 3
Total Credits 9

Remaining option courses 15 cr.

C E 333  Structural Steel Design I 3
C E 334  Reinforced Concrete Design I 3
C E 383  Design of Portland Cement Concrete 1
E M 327  Mechanics of Materials Laboratory 1
Engineering Topics Electives 5
Total Credits 15

Electrical Option: Remaining Core courses (9 cr.)

M E 231  Engineering Thermodynamics I 3
E E 303  Energy Systems and Power Electronics 3
E E 456  Power System Analysis I 3
Total Credits 9

Remaining option courses – 16 cr.

CON E 352  Mechanical Systems in Buildings 3
CON E 353  Electrical Systems in Buildings 2
E E 201  Electric Circuits 4
E E 230  Electronic Circuits and Systems 4
E E 457  Power System Analysis II 3
Total Credits 16

Mechanical Option: Remaining Core courses (10 cr.)

M E 231  Engineering Thermodynamics I 3
M E 436  Heat Transfer 4
M E 441  Fundamentals of Heating, Ventilating, and Air Conditioning 3
Total Credits 10

Remaining option courses – 14 cr.

CON E 352  Mechanical Systems in Buildings 3
CON E 353  Electrical Systems in Buildings 2
E E 442  Introduction to Circuits and Instruments 2
E E 448  Introduction to AC Circuits and Motors 2
M E 442  Heating and Air Conditioning Design 3
Engineering Topics Elective 2
Total Credits 14

Co-op/Internships - Optional

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program.
U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.
2. Choose from department approved list.
3. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.
4. 2.00 required including transfer courses

Courses primarily for students

CON E 112. Orientation to Learning and Productive Team Membership.
(Cross-listed with AER E, FS HN, HORT, NREM, TSM). (2-0) Cr. 2. F.
Introduction to developing intentional learners and worthy team members. Learning as the foundation of human enterprise; intellectual curiosity; ethics as a personal responsibility; everyday leadership; effective team and community interactions including team learning and the effects on individuals; and growth through understanding self, demonstrating ownership of own learning, and internalizing commitment to helping others. Intentional mental processing as a means of enhancing learning. Interconnectedness of the individual, the community, and the world.

CON E 114. Developing Responsible Learners and Effective Leaders.
(Cross-listed with FS HN, HORT, NREM, TSM). (2-0) Cr. 2. S. Prereq: NREM 112
Focus on team and community. Application of fundamentals of human learning; evidence of development as a responsible learner; intentional mental processing as a habit of mind; planning and facilitating learning opportunities for others; responsibility of the individual to the community and the world; leading from within; holding self and others accountable for growth and development as learners and leaders.

CON E 121. Cornerstone Learning Community: Orientation to Academic Life.
(0-2) Cr. 1. F.
Integration of first-year and transfer students into the engineering profession and the Construction Engineering program. Assignments and activities completed both individually and in learning teams involving teamwork, academic preparation, and study skills. Introduction to construction industry professionals. Teamwork topics include interdisciplinary teamwork, skills for academic success, diversity issues and leadership. Introduction to organization of program, department, college, and university. Overview of faculty, staff, policies, procedures and resources.

CON E 122. Cornerstone Learning Community: Orientation to Professional Life.
(0-2) Cr. 1. S.
Continuation of CON E 121. Integration of first-year and transfer students into the engineering profession. Career preparation, professional ethics, construction research, leadership. Introduction to construction industry professionals including how they interact with engineers in other disciplines. Continued introduction to program, department, college, and university organization. Overview of faculty, staff, policies, procedures and resources.

CON E 222. Contractor Organization and Management of Construction.
(3-0) Cr. 3. S. Prereq: Completion of basic program
Entry level course for construction engineering: integration of significant engineering and management issues related to construction company operations. Company organization and operations; construction and project administration; construction contracts; delivery systems; insurance and bonding; construction safety; construction labor relations; contract documents.

(2-3) Cr. 3. S. Prereq: 222
Introduction to materials and methods of building construction and to construction drawings. Foundation, structural framing, floor, roof, and wall systems. Blueprint reading and quantity takeoff techniques.

CON E 251. Mechanical/Electrical Materials and Methods.
(0-3) Cr. 1. F. Prereq: Credit or enrollment in 241
Introduction to the materials and methods for mechanical and electrical construction systems and drawings. HVAC, water and waste water, power distribution, lighting, and fire protection. Blueprint reading and quantity takeoff techniques.

CON E 298. Cooperative Education.
Cr. R. F.S.SS. Prereq: Permission of department and Engineering Career Services
First professional work period in the cooperative education program. Students must register for this course before commencing work.

CON E 322. Construction Equipment and Heavy Construction Methods.
(2-2) Cr. 3. S. Prereq: 241
Selection and acquisition of construction equipment. Application of engineering fundamentals and economics to performance characteristics and production of equipment. Heavy construction methods and economic applications. Nonmajor graduate credit.

CON E 340. Concrete and Steel Construction.
(2-2) Cr. 3. F. Prereq: E M 324, credit or enrollment in CON E 322

(2-2) Cr. 3. S. Prereq: 251, PHYS 222
Comprehensive coverage of mechanical systems, plumbing, fire protection. Analysis techniques and design principles for each system. Required comprehensive design project for a major building project. Nonmajor graduate credit.

(2-0) Cr. 2. S. Prereq: PHYS 222 and credit or enrollment in 352
Comprehensive coverage of building electrical systems including power, lighting, fire alarm, security and communications. Analysis techniques and design principles for each system. Required comprehensive design project for a major building project. Nonmajor graduate credit.

(3-0) Cr. 3. S. Prereq: Junior classification
Introduction to law and judicial procedure as they relate to the practicing engineer. Contracts, professional liability, professional ethics, licensing, bidding procedures, intellectual property, products liability, risk analysis. Emphasis on development of critical thinking process, abstract problem analysis and evaluation. Nonmajor graduate credit.

CON E 381. Bidding Construction Projects I.
(0-3) Cr. 1. F. Prereq: Permission from the instructor
Team development of construction process designs and cost estimates for transportation construction projects under closely simulated conditions. Examine project sites, consult with construction industry mentors, obtain subcontractor and supplier quotations, and submit bids. Offered in the following specialties:
A. Heavy and Highway
B. Building
C. Mechanical
D. Electrical
E. Mechanical and Electrical
F. Miscellaneous

CON E 396. Summer Internship.
Cr. R. Repeatable. SS. Prereq: Permission of department and Engineering Career Services
Summer professional work period. Students must register for this course before commencing work.
CON E 397. Engineering Internship.
Cr. R. Repeatable. F.S. Prereq: Permission of department and Engineering Career Services
Professional work period, one semester maximum per academic year. Students must register for this course before commencing work.

CON E 398. Cooperative Education.
Cr. R. F.S.S. Prereq: 298, permission of department and Engineering Career Services
Second professional work period in the cooperative education program. Students must register for this course before commencing work.

(2-3) Cr. 3. F.S. Prereq: 241, Junior classification

CON E 441. Construction Planning, Scheduling, and Control.
(2-2) Cr. 3. F.S. Prereq: Credit or enrollment in 421
Integration of previous construction coursework into the planning, scheduling, and management of time, costs, and other resources. Emphasis on preparation and analysis of network schedules. Comprehensive planning and scheduling project. Computer project management applications. Nonmajor graduate credit.

CON E 481. Bidding Construction Projects II.
(0-3) Cr. 1. F. Prereq: Permission from the instructor
Similar to CON E 381, except students with previous experience attempt projects with larger scope or lead students with less experience.
A. Heavy and Highway
B. Building
C. Mechanical
D. Electrical
E. Mechanical and Electrical
F. Miscellaneous

CON E 487. Construction Engineering Design I.
(2-2) Cr. 3. F.S. Prereq: CON E 340 (B, H), 352 (B, E, M), 353 (B, E, M), 421, 441. Student must be within two semesters of graduation
The integrated delivery of project services as a team, including preliminary engineering design process, constructability review, interaction with the client, identification of engineering problems, developments of a proposal, identification of design criteria, cost estimating, planning and scheduling, application of codes and standards, development of feasible alternatives, selection of best alternative, and delivery of oral presentations.

CON E 488. Construction Engineering Design II.
(1-5) Cr. 3. F.S. Prereq: CON E 380. Coreq: 487
Application of team design concepts to a construction engineering project. Project planning. Advanced construction and project management.

CON E 490. Independent Study.
Cr. 1-5. Repeatable. F.S.SS. Prereq: Permission of instructor
Individual study in any phase of construction engineering. Pre-enrollment contract required.

CON E 498. Cooperative Education.
Cr. R. Repeatable. F.S.SS. Prereq: 398, permission of department and Engineering Career Services
Third and subsequent professional work periods in the cooperative education program. Students must register for this course before commencing work.
Electrical Engineering

Undergraduate Study

For the undergraduate curriculum in electrical engineering leading to the degree Bachelor of Science. This curriculum is accredited by the Engineering Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012 - telephone: (419) 347-7700.

The Department of Electrical and Computer Engineering (ECPe) at Iowa State University provides undergraduate students with the opportunity to learn electrical and computer engineering fundamentals, study applications of the most recent advances in state-of-the-art technologies, and prepare for the practice of electrical engineering. The student-faculty interaction necessary to realize this opportunity occurs within an environment that is motivated by the principle that excellence in undergraduate education is enhanced by an integrated commitment to successful, long-term research and outreach programs.

The electrical engineering curriculum offers a number of emphasis areas at the undergraduate level, including control systems, electromagnetics and nondestructive evaluation, microelectronics and photonics, VLSI, electric power and energy systems, and computer communications and signal processing. Students are required to choose at least one course sequence that focuses on one of these areas; therefore graduates have substantial depth in specific areas to complement the breadth obtained in the required curriculum. Students also may take elective courses in computer networking, security, computer architecture, digital systems, and software.

The objective of the electrical engineering program at ISU is that its graduates should demonstrate expertise, engagement, learning, leadership, and teamwork within five years after graduation.

Expertise: Graduates should establish peer-recognized expertise together with the ability to articulate that expertise and use it for problem solving in at least one of the following domains of communications and signal processing, controls, electromagnetics, power and energy, electronic devices, semiconductor materials, and analog and digital circuits.

Engagement: Graduates should be engaged in the engineering profession, locally and globally, contributing through the ethical, competent, and creative practice of electrical engineering in industry, academia, or the public sector, or graduates may use the program as a foundation for interdisciplinary careers in business, law, medicine, or public service.

Learning: Graduates should demonstrate sustained learning through graduate work or professional improvement opportunities and through self-study, and they should demonstrate the ability to adapt in a constantly changing field.

Leadership: Graduates should exhibit leadership and initiative to advance professional and organizational goals, facilitate the achievements of others, and obtain results.

Teamwork: Graduates should demonstrate effective teaming and commitment to working with others of diverse cultural and disciplinary backgrounds by applying engineering abilities, communication skills, and knowledge of contemporary and global issues.

As a complement to the instructional activity, the ECPe department provides opportunities for each student to have experience with broadening activities. Through the cooperative education and internship program, students have the opportunity to gain practical industry experience.

Students have the opportunity to participate in advanced research activities, and through international exchange programs, students learn about engineering practices in other parts of the world. Well-qualified juniors and seniors in electrical engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both the Bachelor of Science and Master of Science, the Bachelor of Science and Master of Business Administration, or Bachelor of Science and Master of Engineering degrees.

Students are required to prepare and to maintain a portfolio of their technical and non-technical skills. This portfolio is evaluated for student preparation during the student’s curriculum planning process. Results of the evaluation are used to advise students of core strengths and weaknesses.

Courses for students who are not in the electrical engineering program: E E 442 Introduction to Circuits and Instruments, E E 448 Introduction to AC Circuits and Motors. Credit in these courses may not be counted toward a degree in either electrical engineering or computer engineering.

Graduate Study

The department offers work for the degrees Master of Engineering, Master of Science, and Doctor of Philosophy with a major in electrical engineering and minor work to students with other majors. Minor work for electrical engineering majors is usually selected from a wide range of courses outside electrical engineering.

Master of Engineering degree is coursework only. It is recommended for off-campus students.

The degree Master of Science with thesis is recommended for students who intend to continue toward the Doctor of Philosophy degree or to undertake a career in research and development. The non-thesis Master of Science degree requires a creative component.

The department also offers a graduate certificate program in power systems engineering. Completion of the certificate requires at least 12 credits selected from:

- E E 553 Advanced Topics in Electric Power System Engineering 3
- E E 554 Power System Dynamics 3
- E E 555 Advanced Energy Distribution Systems 3
- E E 556 Power Electronic Systems 3
- E E 653 Advanced Topics in Electric Power System Engineering 3
- E E 654 Advanced Topics in Electric Power System Engineering 3

The normal prerequisite to major in graduate work in electrical engineering is the completion of undergraduate work substantially equivalent to that required of electrical engineering students at this university. Because of the diversification in the electrical engineering graduate program, however, it is possible for a student to qualify for graduate study in certain areas of electrical engineering even though the student’s undergraduate or prior graduate training has been in a discipline other than electrical engineering. Supporting work, if required, will depend on the student’s background and area of research interest. Prospective students should have a discipline other than electrical engineering are required to submit, with the application for admission, a statement of the proposed area of graduate study.

The department requires submission of GRE General test scores by applicants. All students whose first language is not English and who have no U.S. degree must submit TOEFL examination scores. Students pursuing the Doctor of Philosophy must complete the department qualifying process.

The Department of Electrical and Computer Engineering is a participating department in the interdepartmental graduate minor in complex adaptive systems. Students interested in this program should see the Complex Adaptive Systems section of the catalog for requirements.

The Department of Electrical and Computer Engineering is a participating department in the interdepartmental Master of Science and Doctor of Philosophy degree programs in bioinformatics and computational biology. Students interested in these programs may earn their degrees while working under an adviser in electrical and computer engineering.
Well-qualified juniors or seniors in electrical engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both the Bachelor of Science and Master of Science degrees, the Bachelor of Science and Master of Business Administration, or the Bachelor of Science and Master of Engineering degrees. Under concurrent enrollment, students are eligible for assistantships and simultaneously take undergraduate and graduate courses. Details are available in the Student Services Office and on the department’s website.

Curriculum in Electrical Engineering
Administered by the Department of Electrical and Computer Engineering.

Leading to the degree bachelor of science.

Total credits required: 127.5 See also Basic Program and Special Programs.

International Perspectives: 3 cr.
U.S. Diversity: 3 cr.

Communication Proficiency/Library requirement:

Co-op or internship is optional

Outcomes Assessment - Students are required to prepare and to maintain a portfolio of their technical and non-technical skills. This portfolio is evaluated for student preparation during the student’s curriculum planning process. Results of the evaluation are used to advise students of core strengths and weaknesses.

Transfer Credit Requirements

The degree program must include a minimum of 30 credits at the 300-level or above in professional and technical courses earned at ISU in order to receive a B.S. in electrical engineering. These 30 credits must include E E 491 Senior Design Project I and Professionalism, E E 492 Senior Design Project II, and credits in the core professional curriculum and/or in technical electives. The Electrical and Computer Engineering Department requires a grade of C or better for any transfer credit course that is applied to the degree program.

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.

2. Complete minimum of 6 cr. from Approved General Education Component at 300 or higher level. Complete additional 9 cr. from Approved General Education Component.

3. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

4. 2.00 required including transfer courses.

5. From department approved lists

Note: International perspectives and U.S. diversity courses are used to meet the general education electives.

Courses primarily for undergraduate students

E E 166. Professional Programs Orientation.
(Cross-listed with CPR E). Cr. R. F.S.
(1-0) Overview of the nature and scope of electrical engineering and computer engineering professions. Overview of portfolios. Departmental rules, advising center operations, degree requirements, program of study planning, career options, and student organizations.
E E 185. Introduction to Electrical Engineering and Problem-Solving I.  
(2-2) Cr. 3. F.S. Prereq: Credit or enrollment in MATH 142  
Project based examples from electrical engineering. Systematic thinking  
process for engineering problem solving. Group problem solving. Math-  
ematical, conceptual and computer based projects. Solving engineering  
problems and presenting solutions through technical reports and oral  
presentations. Solutions of engineering problems using computation  
tools and basic programming.

E E 186. Introduction to Electrical Engineering and Problem  
Solving II. (0-2) Cr. 1. S. Prereq: 185  
Project based and hands on continuation of 185. Group skills needed to  
work effectively in teams. Individual interactive skills for small and large  
groups. Learning to use tools and methods for solving electrical engi-  
nering problems.

E E 188. Bio-Electrical Engineering Fundamentals Laboratory.  
(1-3) Cr. 2. Prereq: 185 or equivalent  
Fundamental laboratory based course in bio-electrical engineering with  
an emphasis on acquiring and analyzing biomedical signals to obtain rele-  
vant information. Topics covered include an overview of basic medical  
terminology and anatomy, labs illustrating data acquisition from different  
body systems, and an introduction to statistical significance and its rela-

tionship to biological variability.

E E 201. Electric Circuits.  
(3-2) Cr. 4. F.S. Prereq: Credit or registration in MATH 267 and PHYS 222  
Emphasis on mathematical tools. Circuit elements (resistors, inductors,  
capacitors) and analysis methods including power and energy relation-  
ships. Network theorems. DC, sinusoidal steady-state, and transient  
analysis. AC power. Frequency response. Two port models. Diodes,  
PSPICE. Laboratory instrumentation and experimentation. Credit for only  
E E 201 or 442 may be used towards graduation.

E E 224. Signals and Systems I.  
(3-3) Cr. 4. F.S. Prereq: 201, MATH 267, PHYS 222  
Mathematical preliminaries. Introduction to signals and systems. Signal  
manipulations. System properties. LTI systems, impulse response and  
convolution. Fourier Series representation and properties. Continuous  
and discrete-time Fourier Transforms and properties. Sampling and recon-

struction. Modulation and demodulation. Applications and demonstra-
tions using Matlab.

(3-3) Cr. 4. F.S. Prereq: 201, MATH 267, PHYS 222  
Frequency domain characterization of electronic circuits and systems,  
transfer functions, sinusoidal steady state response. Time domain  
models of linear and nonlinear electronic circuits, linearization, small  
signal analysis. Stability and feedback circuits. Operational amplifiers,  
device models, linear and nonlinear applications, transfer function realiza-
tions. A/D and D/A converters, sources of distortions, converter linearity  
and spectral characterization, applications. Design and laboratory instru-
mentation and measurements.

E E 261. Transfer Orientation.  
(Cross-listed with CPR E). Cr. R.  
Introduction to the College of Engineering and the engineering profession  
specifically for transfer students. Information concerning university and  
college policies, procedures, and resources. Offered on a satisfactory-fail  
basis only.

E E 285. Problem Solving Methods and Tools for Electrical  
Engineering. (3-3) Cr. 4.  
Integration of field-specific computational tools for practically solving  
electrical engineering problems. Methods for systematically reducing  
problems into sequential steps compatible with computer based tools.  
Structuring computer programs for efficiency and maintainability. Inte-

gration of multi-platform operating systems and multi-vendor tools for  
solving engineering problems. Hands-on laboratory experiences using  
Matlab, C, and other computational tools.

E E 294. Program Discovery.  
(Cross-listed with CPR E). Cr. R. Prereq: 166 or CPR E 166  
The roles of professionals in computer and electrical engineering. Rela-
tionship of coursework to industry and academic careers. Issues relevant  
to today’s world. Offered on a satisfactory-fail basis only.

E E 298. Cooperative Education.  
Cr. R. F.S.S. Prereq: Permission of department and Engineering Career  
Services  
First professional work period in the cooperative education program.  
Students must register for this course before commencing work.

(3-0) Cr. 3. F.S. Prereq: MATH 267, PHYS 222. Credit or registration in  
224 and 230  
Structure of competitive electric energy systems. System operation and  
economic optimization. Mutual inductance, transformers. Synchronous  
generators. Balanced three-phase circuit analysis and power calcula-
tions. Network calculations and associated numerical algorithms. Two-
port circuits. Voltage regulation. Resonance and power factor correction.  
DC and induction motors. Power electronic circuit applications to power  
supplies and motor drives. Nonmajor graduate credit.

(4-0) Cr. 4. F.S. Prereq: 201, MATH 265, PHYS 222, credit or registration in  
MATH 267  
Fundamentals and applications of electric and magnetic fields and mate-

rials. Electrostatics and magnetostatics, potentials, capacitance and  
inductance, energy, force, torque. Uniform plane electromagnetic waves,  
Poynting vector. Transmission lines: transient and sinusoidal steady-state  
conditions, reflection coefficient. Nonmajor graduate credit.

E E 314. Electromagnetics for non Electrical Engineers.  
(3-0) Cr. 3. Prereq: Physics 222, 112, or equivalent  
Conceptual study of electromagnetics and its application in engineering  
and related fields. EM fundamentals, EM spectrum, radiation, radiating  
systems, wireless, modern concepts of physics, quantum computing,  
transmission lines, high speed effects, waveguides, GPS and other  
related phenomena will be discussed and explained with the application  
in mind. Nonmajor graduate credit.

E E 322. Probabilistic Methods for Electrical Engineers.  
(Cross-listed with STAT). (3-0) Cr. 3. F.S. Prereq: E E 224  
Introduction to probability with applications to electrical engineers. Sets  
and events, probability space, conditional probability, total probability  
and Bayes’ rule. Discrete and continuous random variables, cumulative  
distribution function, probability mass and density functions, expecta-
tion, moments, moment generating function, multiple random variables,  
functions of random variables. Elements of statistics, hypothesis testing,  
confidence intervals, least squares. Introduction to random processes.

E E 324. Signals and Systems II.  
(3-3) Cr. 4. F.S. Prereq: 224  
Laplace and z-Transforms, properties and inverses. Applications to LTI  
systems and analog/digital filters. Feedback systems and stability. State-

space representation and analysis. Nonmajor graduate credit.

E E 325. Systems Biology for Engineering.  
(Cross-listed with BIOE). (3-0) Cr. 3. Prereq: BIOE 202, MATH 267  
Review of systems approaches for modeling. Introduction or review of  
methods for gene regulation in cells and how to model them. Auto regu-
Feedback mechanisms. Kinetic and rate-limiting steps.

E E 330. Integrated Electronics.  
(Cross-listed with CPR E). (3-3) Cr. 4. Prereq: 201, credit or enrollment in  
230, CPR E 281  
Semiconductor technology for integrated circuits. Modeling of integrated  
deVICES including diodes, BJTs, and MOSFETs. Physical layout. Circuit  
simulation. Digital building blocks and digital circuit synthesis. Analysis  
and design of analog building blocks. Laboratory exercises and design  
projects with CAD tools and standard cells. Nonmajor graduate credit.  
Credit for only one of E E 330 or 331 may be counted toward graduation.
E E 331. Electronics II.
(3-3) Cr. 4. Prereq: 230, CPR E 288, E E 224 recommended
I-V characteristics of diodes, BJTs, and MOSFETs. Diode and transistor
circuits. Small-signal analysis and biasing techniques for amplifier circuits.
CMOS digital circuit building blocks. Noise and distortion in electronic
systems. Various types of sensors and their use in electronic systems.
Active filters. Power Amplifiers. DC motor control circuits. Interfacing
electronic circuits with programmable microcontrollers. Laboratory exer-
cises and design projects, including a board-level system layout. Credit
for only one of E E 330 or 331 may be counted toward graduation.

E E 332. Semiconductor Materials and Devices.
(Cross-listed with MAT E). (3-0) Cr. 3. S. Prereq: PHYS 222; Mat E majors:
MAT E 334; Cpr E and E E majors: E E 230
Introduction to semiconductor material and device physics. Quantum
mechanics and band theory of semiconductors. Charge carrier distri-
butions, generation/recombination, transport properties. Physical and
electrical properties and fabrication of semiconductor devices such as
MOSFETs, bipolar transistors, laser diodes and LED’s. Nonmajor grad-
uate credit.

(2-2) Cr. 3. Prereq: 188, 224, 230
Principles and practices of biomedical instrumentation. Topics include:
the physics and measurement of biopotentials including electrocardiog-
raphy (EKG), electromyohgraphy (EMG) and electro-occulography (EOG),
chemical and mechanical sensors, amplifiers and filters, recording and
processing biological signals from nerve cells, muscles and human body,
electrode polarization, surface electrodes, power line interference, heart
sound sensors, respiratory gas concentration, blood-gas sensors, nonin-
vasive blood-gas sensors.

(3-0) Cr. 3. Prereq: MATH 165
Energy-scientific, engineering and economic foundations. Energy utiliza-
tion-global and national. Sectoral analysis of energy consumption. Rela-
tionship of energy consumption and production to economic growth and
environment. Technology for energy production. Economic evaluation
of energy utilization and production. Scientific basis for global warming.
Environmental impact of energy production and utilization. Renewable
energy.

Meets International Perspectives Requirement.

E E 388. Sustainable Engineering and International Develop-
ment.
(Cross-listed with A E, C E, M E, MAT E). (2-2) Cr. 3. F. Prereq: Junior clas-
sification in engineering
Multi-disciplinary approach to sustainable engineering and international
development, sustainable development, appropriate design and engi-
eering, feasibility analysis, international aid, business development,
philosophy and politics of technology, and ethics in engineering. Engi-
eering-based projects from problem formulation through implementa-
tion. Interactions with partner community organizations or international
partners such as nongovernment organizations (NGOs). Course readings,
final project/design report.

Meets International Perspectives Requirement.

E E 394. Program Exploration.
(Cross-listed with CPR E). Cr. R. Prereq: 294 or CPR E 294
Exploration of academic and career fields for electrical and computer
engineers. Examination of professionalism in the context of engineering and
technology with competencies based skills. Introduction to profes-
sional portfolio development and construction. Offered on a satisfac-
tory-fail basis only.

E E 396. Summer Internship.
Cr. R. Repeatable. SS. Prereq: Permission of department and Engineering
Career Services
Summer professional work period. Students must register for this course
before commencing work.

E E 397. Engineering Internship.
Cr. R. Repeatable. F.S. Prereq: Permission of department and Engineering
Career Services
One semester maximum per academic year professional work period.
Students must register for this course before commencing work.

E E 398. Cooperative Education.
Cr. R. F.S.SS. Prereq: 298, permission of department and Engineering
Career Services
Second professional work period in the cooperative education program.
Students must register for this course before commencing work.

E E 414. Microwave Engineering.
(Dual-listed with 514). (3-3) Cr. 4. F. Prereq: 230, 311
Principles, analyses, and instrumentation used in the microwave portion
of the electromagnetic spectrum. Wave theory in relation to circuit para-
meters. S parameters, couplers, discontinuities, and microwave device
equivalent circuits. RF amplifier design, microwave sources, optimum
noise figure and maximum power designs. Microwave filters and oscilla-
tors. Nonmajor graduate credit.

E E 417. Electromagnetic Radiation, Antennas, and Propaga-
tion.
(Dual-listed with 517). (3-3) Cr. 4. S. Prereq: 311
Fundamental antenna concepts. Radiation from wire-and aperture-type
sources. Radio transmission formulas. Wave and antenna polariza-
tion. Antenna arrays. Modern antenna topics. Practical antenna design.
Antenna noise. Radiowave propagation in the presence of the earth and
its atmosphere. Antenna measurements and computer aided analysis.
Nonmajor graduate credit.

E E 418. High Speed System Engineering Measurement and Test-
ing.
(Cross-listed with CPR E). (3-2) Cr. 4. F. Prereq: 230 and 311
Measurement of high speed systems and mixed signal systems.
Measurement accuracy and error. Network analysis and spectrum
analysis used in high speed measurement and testing. Test specifica-
tion process and parametric measurement. Sampling and digital signal
processing concepts. Design for testability. Testing equipment. Applica-
tions. Nonmajor graduate credit.

E E 421. Communication Systems I.
(3-0) Cr. 3. F. Prereq: 224, credit or registration in 322
Frequency domain analysis, spectral filtering, bandwidth. Linear modu-
lation systems. Angle modulation systems. Phase locked loop, super-
heterodyne receiver. Sampling and pulse code modulation. Digital data
transmission, line coding, pulse shaping, multiplexing. Nonmajor grad-
uate credit.

E E 422. Communication Systems II.
(3-0) Cr. 3. Prereq: 421 and enrollment in 423
Introduction to probability and random processes; Performance of analog
systems with noise; Performance of digital communication with noise;
opimum receivers, transmission impairments, and error rates; Introduc-
tion to information theory and coding; source coding, channel coding,
channel capacity. Nonmajor graduate credit.

E E 423. Communication Systems Laboratory.
(0-3) Cr. 1. Prereq: 421, enrollment in 422
Construction and evaluation of modulators, demodulators and other
components for analog and digital communications. Design, simulate,and
evaluate wireless communication systems and their key components.
Noise measurement. Nonmajor graduate credit.
E E 424. Introduction to Digital Signal Processing.  
(3-3) Cr. 4. Prereq: 224  

E E 432. Microelectronics Fabrication Techniques.  
(Dual-listed with 532). (Cross-listed with MAT E). (2-4) Cr. 4. Prereq: PHYS 222, MATH 267 E E 332 or MAT E 334 recommended  
Techniques used in modern integrated circuit fabrication, including diffusion, oxidation, ion implantation, lithography, evaporation, sputtering, chemical-vapor deposition, and etching. Process integration. Process evaluation and final device testing. Extensive laboratory exercises utilizing fabrication methods to build electronic devices. Use of computer simulation tools for predicting processing outcomes. Recent advances in processing CMOS ICs and micro-electro-mechanical systems (MEMS). Nonmajor graduate credit.

(Cross-listed with CPR E). (3-3) Cr. 4. S. Prereq: 324, 330, 332, and either E E 322 or STAT 330  
Basic analog integrated circuit and system design including design space exploration, performance enhancement strategies, operational amplifiers, references, integrated filters, and data converters. Nonmajor graduate credit.

(Dual-listed with 538). (3-0) Cr. 3. Prereq: 311, 332  

(3-0) Cr. 3. S. Prereq: E E 332/MAT E 332 or Mat E 331  
Concepts of quantum mechanics relevant to nanoelectronic devices, including quantization, tunneling, and transport; overview of some of the leading technologies for nanoelectronics, including carbon nanotubes, quantum dots, and molecular transistors; fabrication methods for building nanoelectronic devices. Nonmajor graduate credit.

E E 442. Introduction to Circuits and Instruments.  
(3-2) Cr. 2. F.S. Prereq: PHYS 222, MATH 267  
Half-semester course. Basic circuit analysis using network theorems with time domain and Laplace transform techniques for resistive, resistive-inductive, resistive-capacitive, and resistive-inductive-capacitive circuits. Transient circuit behavior. Basic operational amplifiers and applications. Familiarization with common E E instrumentation and demonstration of basic principles. Nonmajor graduate credit. Credit for only 201 or 442 may be counted toward graduation; credit for 442 will not count toward graduation for E E or Cpr E majors.

E E 448. Introduction to AC Circuits and Motors.  
(3-2) Cr. 2. F.S. Prereq: 303 or 441 or 442  

E E 452. Electrical Machines and Power Electronic Drives.  
(2-3) Cr. 3. S. Prereq: 303; 330 or 332; credit or registration in E E 324  
Basic concepts of electromagnetic energy conversion. DC motors and three-phase induction motors. Basic introduction to power electronics. Adjustable speed drives used for control of DC, induction, and AC motors. Experiments with converter topologies, DC motors, AC motors and adjustable speed drives. Nonmajor graduate credit.

E E 455. Introduction to Energy Distribution Systems.  
(3-0) Cr. 3. F. Prereq: 303, credit or registration in 324  
Overhead and underground distribution system descriptions and characteristics, load descriptions and characteristics, overhead line and underground cable models, distribution transformers, power flow and fault analysis, overcurrent protection, power factor correction, system planning and automation, and economics in a deregulated environment. Nonmajor graduate credit.

E E 456. Power System Analysis I.  
(3-0) Cr. 3. F. Prereq: 303, credit or registration in 324  
Power transmission lines and transformers, synchronous machine modeling, network analysis, power system representation, load flow. Nonmajor graduate credit.

E E 457. Power System Analysis II.  
(3-0) Cr. 3. S. Prereq: 303, credit or registration in 324  
Power system protection, symmetrical components, faults, stability. Power system operations including the new utility environment. Nonmajor graduate credit.

(Cross-listed with ECON). (3-0) Cr. 3. Prereq: 303 or ECON 301  

(1-10) Cr. 5. SS. Prereq: 322 and completion of 24 credits in the E E core professional program, ENGL 314  
Distance-education students only. Team project design experience. Emphasis on defining, planning, and implementing to achieve project objectives to meet a client’s need with due consideration to professional and technical considerations of engineering design and implementation. Oral and written presentations of project achievements.

(Cross-listed with CPR E). (3-3) Cr. 4. S. Prereq: E E 330  
Digital design of integrated circuits employing very large scale integration (VLSI) methodologies. Technology considerations in design. High level hardware design languages, CMOS logic design styles, area-energy-delay design space characterization, datapath blocks: arithmetic and memory, architectures and systems on a chip (SOC) considerations. VLSI chip hardware design project. Nonmajor graduate credit.

E E 466. Multidisciplinary Engineering Design.  
(Cross-listed with A E, AER E, CPR E, ENGR, I E, M E, MAT E). (1-4) Cr. 3. Repeatable. F.S. Prereq: Student must be within two semesters of graduation and receive permission of instructor  
Application of team design concepts to projects of a multidisciplinary nature. Concurrent treatment of design, manufacturing, and life cycle considerations. Application of design tools such as CAD, CAM, and FEM. Design methodologies, project scheduling, cost estimating, quality control, manufacturing processes. Development of a prototype and appropriate documentation in the form of written reports, oral presentations and computer models and engineering drawings.

(3-0) Cr. 3. F. Prereq: 324  

(2-3) Cr. 3. S. Prereq: 475  
Computer aided techniques for feedback control system design, simulation, and implementation. Nonmajor graduate credit.
(Dual-listed with 588). (Cross-listed with MAT E). (3-0) Cr. 3. F. Offered 2012. Prereq: MATH 265 and (MAT E 216 or 272 or E E 311 or PHYS 364)  

E E 490. Independent Study.  
Cr. arr. Prereq: Senior classification in electrical engineering Investigation of an approved topic commensurate with the student’s prerequisites.

E E 491. Senior Design Project I and Professionalism.  
(Cross-listed with CPR E). (2-3) Cr. 3. F.S. Prereq: 322 or CPR E 308, completion of 24 credits in the E E core professional program or 29 credits in the CPR E core professional program, ENGL 314 Preparing for entry to the workplace. Selected professional topics. Use of technical writing skills in developing project plan and design report; design review presentation. First of two-semester team-oriented, project design and implementation experience.

E E 492. Senior Design Project II.  
(Cross-listed with CPR E). (1-3) Cr. 2. F.S. Prereq: 491 or CPR E 491 Second semester of a team design project experience. Emphasis on the successful implementation and demonstration of the design completed in E E 491 or CPR E 491 and the evaluation of project results. Technical writing of final project report; oral presentation of project achievements; project poster.

E E 494. Portfolio Assessment.  
(Cross-listed with CPR E). Cr. R. Prereq: Credit or enrollment in 491 Portfolio update and evaluation. Portfolios as a tool to enhance career opportunities.

E E 496. Modern Optics.  
(Cross-listed with PHYS). (3-0) Cr. 3. S. Prereq: Credit or enrollment in PHYS 322, 365, and 482 Review of wave and electromagnetic theory; topics selected from: refraction/reflection, interference, geometrical optics, fourier analysis, dispersion, coherence, Fraunhofer and fresnel diffraction, holography, quantum optics, nonlinear optics. Nonmajor graduate credit.

E E 498. Cooperative Education.  
Cr. R. Repeatable. F.S.S. Prereq: 398, permission of department and Engineering Career Services Third and subsequent professional work periods in the cooperative education programs. Students must register for this course before commencing work.

Courses primarily for graduate students, open to qualified undergraduate students

(Cross-listed with CPR E). (3-0) Cr. 4. Prereq: 435, Credit or Registration for 501 Theory, design and applications of power management and regulation circuits (Linear and switching regulators, battery chargers, and reference circuits) including: Architectures, Performance metrics and characterization, Noise and stability analysis, Practical implementation and on-chip integration issues, design considerations for portable, wireless, and RF SoCs.

E E 505. CMOS and BiCMOS Data Conversion Circuits.  

E E 506. Design of CMOS Phase-Locked Loops.  
(Cross-listed with CPR E). (3-3) Cr. 4. Prereq: EE 435 or 501 or instructor approval Analysis and design of phase-locked loops implemented in modern CMOS processes including: architectures, performance metrics, and characterization; noise and stability analysis; and design issues of phase-frequency detectors, charge pumps, loop filters (passive and active), voltage controlled oscillators, and frequency dividers.

E E 507. VLSI Communication Circuits.  
(Cross-listed with CPR E). (3-3) Cr. 4. Alt. S., offered 2013. Prereq: 330 or 501 Phase-locked loops, frequency synthesizers, clock and data recovery circuits, theory and implementation of adaptive filters, low-noise amplifiers, mixers, power amplifiers, transmitter and receiver architectures.

E E 508. Filter Design and Applications.  

E E 510. Topics in Electromagnetics.  
Cr. 1-3. Repeatable. Prereq: 311

E E 511. Modern Optical Communications.  
(3-0) Cr. 3. S. Prereq: 311 Propagation in optical media. Optical fibers. Optical sources and detectors. Fiber optic communications systems. DWDM considerations.

E E 512. Advanced Electromagnetic Field Theory I.  

E E 513. Advanced Electromagnetic Field Theory II.  
(3-0) Cr. 3. S. Prereq: 512 Green’s functions, perturbational and variational techniques. Analysis of microstrip lines and interconnects. Spectral domain approach, waves in layered media. Integral equations and method of moments. Inverse scattering. Electromagnetic applications.

E E 514. Microwave Engineering.  
(Dual-listed with 414). (3-4) Cr. 4. F. Prereq: 230, 311 Principles, analyses, and instrumentation used in the microwave portion of the electromagnetic spectrum. Wave theory in relation to circuit parameters. S parameters, couplers, discontinuities, and microwave device equivalent circuits. RF amplifier design, microwave sources, optimum noise figure and maximum power designs. Microwave filters and oscillators.
(3-0) Cr. 3. S. Prereq: 311  
Maxwell’s equations. Differential equation based methods. Finite differ-
ence and finite difference time domain methods, boundary conditions.  
Finite element method and applications to the analysis of practical 
devices. Integral equation based methods. Electric and magnetic field  

E E 517. Electromagnetic Radiation, Antennas, and Propaga-
tion.  
(Dual-listed with 417). (3-3) Cr. 4. S. Prereq: 311  
Fundamental antenna concepts. Radiation from wire- and aperture-type  
sources. Radio transmission formulas. Wave and antenna polariza-
tion. Antenna arrays. Modern antenna topics. Practical antenna design.  
Antenna noise. Radiowave propagation in the presence of the earth and  
its atmosphere. Antenna measurements and computer-aided analysis.

(Cross-listed with AGRON, MTEOR). (3-0) Cr. 3. Alt. S., offered 2012.  
Prereq: MATH 265 or equivalent  
Microwave remote sensing of Earth’s surface and atmosphere using  
satellite-based or ground-based instruments. Specific examples include  
remote sensing of atmospheric temperature and water vapor, precipita-
tion, ocean salinity, and soil moisture.

(Cross-listed with M S E). (3-0) Cr. 3. Alt. F., offered 2011. Prereq: 311, Mat  
E 211 or 271 or 272 or PHYS 264  
Magnetic fields, flux density and magnetization. Magnetic materials,  
measurement properties of materials. Domains, domain walls, domain  
processes, magnetization curves and hysteresis. Types of magnetic  
order, magnetic phases and critical phenomena. Magnetic moments of  
electrons, theory of electron magnetism. Techno-
nological application, soft magnetic materials for electromagnets, hard  
magnetic materials, permanent magnets, magnetic recording technology,  
magnetic measurements of properties for materials evaluation.

E E 520. Selected Topics in Communications and Signal  
Processing.  
(3-0) Cr. 3. Repeatable.  
Space-time processing. Multiuser communications, Wireless Communi-
Multirate communications and signal processing. Signal processing and  
communications applications.

E E 521. Advanced Communications.  
(3-0) Cr. 3. F. Prereq: 422, Coreq: 523  
Digital communication systems overview. Characterization of communi-
cation channels. Digital modulation and demodulation design and per-
formance analysis. Channel capacity and error-control coding concepts.  
Waveform design for band-limited channels. Equalization. Wireless fading  
channels and performance.

E E 523. Random Processes for Communications and Signal  
Processing.  
(3-0) Cr. 3. Prereq: 322, MATH 317  
Axioms of probability; Repeated trials; Functions of a random variable  
and multiple random variables: covariance matrix, conditional distribu-
tion, joint distribution, moments, and joint moment generating func-
tion; Mean square estimation; stochastic convergence; Some important  
stochastic processes: Random walk, Poisson, Wiener, and shot noise;  
Markov chains; Power spectral analysis; Selected applications.

(3-0) Cr. 3. F. Prereq: 322, 424, MATH 317  
Review: sampling and reconstruction of signals; discrete-time signals,  
systems, and transforms. Multi-rate digital signal processing and intro-
duction to filter banks. Optimal linear filtering and prediction. Introduc-
tions to adaptive filtering and spectral estimation. Applications.
E E 545. Artificial Neural Networks.
(3-0) Cr. 3. F. Prereq: 324

E E 547. Pattern Recognition.
(3-0) Cr. 3. F. Prereq: 324

E E 553. Steady State Analysis.
(3-0) Cr. 3. F. Prereq: 456, 457
Power flow, economic dispatch, unit commitment, electricity markets, automatic generation control, sparse matrix techniques, interconnected operation, voltage control.

E E 554. Power System Dynamics.
(3-0) Cr. 3. S. Prereq: 456, 457, 475
Dynamic performance of power systems with emphasis on stability. Modeling of system components and control equipment. Analysis of the dynamic behavior of the system in response to small and large disturbances.

(3-0) Cr. 3. Prereq: 455
Transient models of distribution components, automated system planning and distribution automation, surge protection, reliability, power quality, power electronics and intelligent systems applications.

(3-0) Cr. 3. Prereq: 452
Converter topologies, AC/DC, DC/DC, DC/AC, AC/AC. Converter applications to do motor drives, power supplies, AC motor drives, power system utility applications (var compensators) and power quality.

(3-0) Cr. 3. F. Prereq: 475 or AER E 432 or M E 414 or 411 or MATH 415; and MATH 267

E E 559. Introduction to Robust Control.
(3-0) Cr. 3. S. Prereq: E E 557

E E 560. Linear Systems.
(3-0) Cr. 3. S. Prereq: 456, 457

(3-0) Cr. 3. S. Prereq: E E 577

(Dual-listed with 488). (Cross-listed with M S E). (3-0) Cr. 3. Alt. F., offered 2012. Prereq: MATH 265 and (MAT E 216 or 272 or E E 311 or PHY S 364)

E E 563. Special Topics.
Cr. 1-6. Repeatable.
Formulation and solution of theoretical or practical problems in electrical engineering.
A. Electromagnetic Theory
B. Control Systems
C. Communication Systems
E. Computer Engineering
F. Electric Power
G. Electrical Materials
H. Electronic Devices and Circuits
I. Signal Processing

E E 591. Seminar in Electronics, Microelectronics, and Photonics.
Cr. 1-3. Repeatable.

Cr. 1. Repeatable. Prereq: Graduate student status
Offered on a satisfactory-fail basis only.

Cr. 1-3. Repeatable.

Cr. 1-3. Repeatable.

Cr. 1. Repeatable.
Offered on a satisfactory-fail basis only.

E E 599. Creative Component.
Cr. arr. Repeatable.

Courses for graduate students

E E 621. Coding Theory.
(3-0) Cr. 3. Prereq: 521
Fundamentals of error-control coding techniques: coding gain, linear
block codes. Galois fields. Cyclic codes: BCH, Reed-Solomon. Convolutional
codes and the Viterbi algorithm. Trellis-coded modulation. Iterative
decoding. Recent developments in coding theory.

E E 622. Information Theory.
(3-0) Cr. 3. Prereq: 521, 523
Information system overview. Entropy and mutual information. Data
Compression and source encoding. Discrete memoryless channel
capacity. Noisy channel coding theorem. Rate distortion theory. Wave-
form channels. Advanced topics in information theory.

E E 653. Advanced Topics in Electric Power System Engineering.
(3-0) Cr. 3. Repeatable. Prereq: Permission of instructor
Advanced topics of current interest in electric power system engineering.

E E 674. Advanced Topics in Systems Engineering.
(3-0) Cr. 3. Repeatable. Prereq: Permission of instructor
Advanced topics of current interest in the areas of control theory,
stochastic processes, digital signal processing, and image processing.

E E 697. Engineering Internship.
(Cross-listed with CPR E). Cr. R. Repeatable.
One semester and one summer maximum per academic year profes-
sional work period. Offered on a satisfactory-fail basis only.

E E 699. Research.
Cr. arr. Repeatable.

Graduate Study

The department offers work for the degrees master of science, master of engineering, and doctor of philosophy with major in engineering mechanics, and minor work to students taking major work in other departments.

The master of science degree requires a thesis and a minimum of 8 research credits. It has strong research emphasis and is recommended for students who anticipate entering a doctoral program later. At least 30 credits of acceptable graduate work are required for the degree.

The master of engineering degree does not require either research credits or a thesis. However, at least two credits of acceptable creative component and at least 26 credits of acceptable graduate coursework are required. A minimum of 30 credits of acceptable graduate work is required for the degree. The program is intended to give students additional instruction at the graduate level to better qualify them for advanced professional engineering work. By careful selection of electives and perhaps additional courses during the senior undergraduate year, students should be able to qualify for the master of engineering degree with an additional year of full-time study after receiving their baccalaureate degree in one of the several engineering curricula.

Credits for creative component will be obtained by registering for E M 599 Creative Component. A written report and an oral presentation will be given to the student’s graduate committee.

The normal prerequisite to major graduate work is the completion of a curriculum substantially equivalent to that required of undergraduate students in engineering at this university. However, because of the diversity of interests in graduate work in engineering mechanics, it is possible for a student to qualify for graduate study even though undergraduate or prior graduate training has been in a discipline other than engineering—e.g., physics or mathematics.

Courses primarily for undergraduate students

**E M 274. Statics of Engineering.**

(3-0) Cr. 3. F.S.S. Prereq: Credit or enrollment in MATH 166; credit or enrollment in PHYS 111 or 211

Vector and scalar treatment of coplanar and noncoplanar force systems. Resultants, equilibrium, friction, centroids, second moments of areas, principal second moments of area, radius of gyration, internal forces, shear and bending moment diagrams.

H. Honors. F.S.

**E M 324. Mechanics of Materials.**

(3-0) Cr. 3. F.S.SS. Prereq: 274

Plane stress, plane strain, stress-strain relationships, and elements of material behavior. Application of stress and deformation analysis to members subject to centric, torsional, flexural, and combined loadings. Elementary considerations of theories of failure, buckling. Nonmajor graduate credit.
E M 425. Introduction to the Finite Element Method.
(3-0) Cr. 3. S. Prereq: 324, MATH 266 or 267
Introduction of finite element analysis through applications to one-dimen- sional, steady-state problems such as elastic deformation, heat and fluid flow, consolidation, beam bending, and mass transport. Transient heat conduction and wave propagation. Two-dimensional triangular and quadrilateral elements. Plane problems of torsion, thermal and potential flow, stress analysis. Simple computer programs for one- and two-dimensional problems. Nonmajor graduate credit.

E M 450. Engineering Vibrations.
(Cross-listed with M E). (3-0) Cr. 3. F. Prereq: 324, 345
Elementary vibration analysis, single and multiple degrees of freedom, energy methods, free and forced vibrations, viscous and other forms of damping transform methods and response to periodic and random force inputs, numerical methods of solution, eigenvalues and modal analysis, energy methods, vibration isolation and suppression, string or cable dynamics, beam bending dynamics, application problems in aerospace and mechanical engineering (as relevant). Nonmajor graduate credit.

(Cross-listed with M E). (2-2) Cr. 3. Alt. S., offered 2012. Prereq: PHYS 221 and MATH 266 or 267
Sound sources and propagation. Noise standards and effects of noise on people. Principles of noise and vibration control used in architectural and engineering design. Characteristics of basic noise measurement equipment. Experience in use of noise measuring equipment, sound power measurements, techniques for performing noise surveys, evaluation of various noise abatement techniques applied to common noise sources. Selected laboratory experiments. Nonmajor graduate credit.

E M 490. Independent Study.
Cr. arr. Repeatable. Prereq: Permission of instructor
H. Honors

Courses primarily for graduate students, open to qualified undergraduate students

(3-0) Cr. 3. F. Prereq: MATH 385

(Cross-listed with AER E). (3-0) Cr. 3. F. Prereq: 324

(3-0) Cr. 3. S. Prereq: E M 510
Fundamental mechanics of linear elasticity, formulation and solution of simple elastostatic boundary value problems. Kinematics of small deformations, constitutive equations for isotropic and anisotropic media. Field equations for elastic solids, plane strain/plane stress and some classic analytical solutions such as Boussinesq, Hertz, Kirsch, Lamé, and Mitchell. Stress functions and potential methods and introduction to finite elements.

(Cross-listed with AER E). (3-2) Cr. 4. Alt. S., offered 2012. Prereq: E M 510 or 514 or 516
Fundamental concepts for force, displacement, stress, and strain measurements. Strain gages. Full field deformation measurements with laser interferometry and digital image processing. Advanced experimental concepts at the micro and nano scale regimes.

(3-0) Cr. 3. F. Prereq: MATH 385

E M 525. Finite Element Analysis.
(Cross-listed with AER E). (3-0) Cr. 3. S. Prereq: 425, MATH 385
Variational and weighted residual approach to finite element equations. Emphasis on two- and three-dimensional problems in solid mechanics. Isoparametric element formulation, higher order elements, numerical integration, imposition of constraints and penalty, convergence, and other more advanced topics. Use of two- and three-dimensional computer programs. Dynamic and vibrational problems, eigenvalues, and time integration. Introduction to geometric and material nonlinearities.

(3-0) Cr. 3. Alt. F., offered 2012. Prereq: 514 or 516

E M 543. Introduction to Random Vibrations and Nonlinear Dynamics.
(Cross-listed with M E). (3-0) Cr. 3. Alt. S., offered 2013. Prereq: 444
Vibrations of continuous systems. Nonlinear vibration phenomena, perturbation expansions; methods of multiple time scales and slowly-varying amplitude and phase. Characteristics of random vibrations; random processes, probability distributions, spectral density and its significance, the normal or Gaussian random process. Transmission of random vibration, response of simple single and two-degree-of-freedom systems to stationary random excitation. Fatigue failure due to random excitation.

E M 548. Advanced Engineering Dynamics.
(3-0) Cr. 3. Alt. S., offered 2012. Prereq: 345, MATH 266 or 267
3-D kinematics and dynamics of particles and rigid bodies. Coordinate systems, calculus of variations. Lagrange’s equations with constraints, modified Euler’s equations, torque-free motion of rigid bodies in 3-D, moment equations with constraints.

(Cross-listed with M S E). (3-2) Cr. 4. S. Prereq: 324, MATH 385
Principles of five basic NDE methods and their application in engineering inspections. Materials behavior and simple failure analysis. NDE reliability, and damage-tolerant design. Advanced methods such as acoustic microscopy, laser ultrasonics, thermal waves, computed tomography, and thermoelectricity are analyzed. Laboratory experiments on all basic methods: ultrasonics, eddy currents, x-ray, liquid penetrants, magnetic testing, and visual inspection are performed.

E M 552. Advanced Acoustics.
(Cross-listed with M E). (3-0) Cr. 3. Alt. F., offered 2011. Prereq: 451
Theoretical acoustics: wave propagation in fluids; acoustic radiation, diffraction and scattering; nonlinear acoustics; radiation force; cavitation; and ray acoustics.
E M 564. Fracture and Fatigue.
(Cross-listed with M S E, M E). (3-0) Cr. 3. F. Prereq: 324 and either MAT E 216 or 272 or 392. Undergraduates: Permission of instructor
Materials and mechanics approach to fracture and fatigue. Fracture mechanics, brittle and ductile fracture, fracture and fatigue characteristics, fracture of thin films and layered structures. Fracture and fatigue tests, mechanics and materials designed to avoid fracture or fatigue.

(Cross-listed with M S E, AER E). (3-0) Cr. 3. Alt. S., offered 2012. Prereq: 324

E M 570. Wind Engineering.
(Cross-listed with AER E). (3-0) Cr. 3. F. Prereq: 378, 345
Atmospheric circulations, atmospheric boundary layer wind, bluff-body aerodynamics, aeroelastic phenomena, wind-tunnel and full-scale testing, wind-load code and standards, effect of tornado and thunderstorm winds, design applications.

E M 590. Special Topics.
Cr. 1-4. Repeatable. Prereq: Permission of instructor
F. Introduction to Dislocation and Plasticity
H. Mechanics of Thin Films and Adhesives
I. Mechanics of Cellular and Porous Media
J. Other

E M 599. Creative Component.
Cr. arr. Repeatable.

Courses for graduate students

E M 690. Special Topics.
Cr. 1-6. Repeatable. Prereq: Permission of instructor
N. Advanced Experimental Methods
O. Advanced Wave Propagation
P. Advanced Materials
Q. Advanced Computational Methods
R. Reliability and Failure
S. Other

E M 697. Engineering Internship.
Cr. R. Repeatable. Prereq: Permission of DOGE (Director of Graduate Education), graduate classification
One semester and one summer maximum per academic year professional work period. Offered on a satisfactory-fail basis only.

E M 699. Research.
Cr. arr. Repeatable.
Engineering Studies

Interdepartmental minor

The College of Engineering offers an undergraduate minor in engineering studies for non-engineering students designed to improve their understanding of engineering. This minor is not intended to train non-engineering students to do the work of practicing, degree-holding engineers. Rather, students who complete the minor in engineering studies will be able to work more effectively in their primary field by better appreciating the nature, capabilities, and limitations of engineering.

The minor in engineering studies is structured so that no student will be excluded due to insufficient preparation in mathematics or the sciences. The required courses in the minor and many of the elective courses are specifically designed to offer a range of prerequisites, so that students from all curricula will find coursework that supports an accessible and intellectually stimulating program of study.

With the exception of E ST 260 Engineering: Getting from Thought to Thing, E ST 265 Survey of the Impacts of Engineering Activity, and E ST 270 Survey of How Things Work, courses offered for the minor in engineering studies are also open to students whose major curriculum is in the College of Engineering. However, the minor in engineering studies will be awarded only to students whose degree program is not in engineering.

To receive a minor in engineering studies, students must complete a total of 21 course credits that satisfy the following:

The following three courses are required for all students in the minor in engineering studies.

E ST 260 Engineering: Getting from Thought to Thing 3
E ST 265 Survey of the Impacts of Engineering Activity 3
E ST 270 Survey of How Things Work 3

Twelve additional credits from an approved list of eligible courses. Some of these approved courses are taught by the College of Engineering; additional courses are taught by other colleges. A minimum of six of those 12 credits must be courses that bear the designation “E St” or are courses offered by engineering departments. Eligible courses will include those 200-level and above courses offered by the departments in the College of Engineering that are expressly designated by that department’s curriculum committee for use in the minor in engineering studies.

A minimum of 6 credits in the minor must be 300-level or above (university requirement)

Courses primarily for undergraduate students

E St 260. Engineering: Getting from Thought to Thing. (3-0) Cr. 3. What is engineering, technology and their roles in society? Investigation of engineering methods through case studies of everyday objects. Explore questions about the impact of technology in society. Apply engineering methods to design and failure analysis.

E St 270. Survey of How Things Work. (3-0) Cr. 3. Removing mysteries surrounding science and technology. Identify key concepts from applied science and technology to obtain better understanding on how things work. Review and explain the principles behind the technologies which define our modern way of life. A survey of broad range of technology could include: cell phones, GPS, radio, television, computers, ultrasound,
Most of the courses with the designator of Engr are broad-based engineering courses applicable to all engineering disciplines. Several of these courses are part of the basic program which is required for engineering students. All courses are administered by the college and with the exception of ENGR 160 Engineering Problems with Computer Applications Laboratory and ENGR 466 Multidisciplinary Engineering Design are coordinated through Engineering Student Services in Engineering Academic and Student Affairs. Course-related questions should be directed to the department or unit with responsibility for that course. The following is a list of those responsibilities:

**Courses primarily for undergraduate students**

**ENGR 101. Engineering Orientation.**
Cr. R. F.S.
Introduction to the College of Engineering and the engineering profession. Information concerning university and college policies, procedures, and resources. Undeclared sections: Considerations in choosing an engineering curriculum. Opportunities to interact with departments. Declared sections: Introduction to major-specific topics. Offered on a satisfactory-fail basis only.

**ENGR 104. LEAD Program Orientation.**
(1-0) Cr. 1. F.
Orientation for LEAD Living/Learning Community participants. Applications of problem solving, engineering design, teamwork, study, and time management techniques and skills. Engineering professional development. Offered on a satisfactory-fail basis only.

**ENGR 105. LEAD Program Seminar.**
(1-0) Cr. 1. S.
Seminar for LEAD Program participants in the residential learning community. Industrial tours and orientation to engineering profession. Offered on a satisfactory-fail basis only.

**ENGR 110. E2020 Scholars Program Seminar.**
(1-0) Cr. 1. F.S. Prereq: E2020 Scholars recipient; freshman, sophomore or junior classification.
There is a vision for the engineer of the future, an engineer who helps create a better world. That vision has been defined nationally by the Engineer of 2020 initiative and by the Iowa State College of Engineering initiative called the 2050 Challenge. The E2020 program brings together these initiatives through National Science Foundation funding to support scholarships and educational program for engineering students. An E2020 Scholar will learn about leadership, become more globally aware, understand innovation and entrepreneurship, and see the bigger picture of interdisciplinary and systems design. Credit will not count toward graduation for any engineering curriculum.

**ENGR 131. Learning Community Seminar.**
Cr. R. F.S.
Peer-mentored review of course topics in engineering undeclared learning communities. Offered on a satisfactory-fail basis only.

**ENGR 150. Foundations of Leadership Development and Learning.**
(1-0) Cr. 1. F.S. Prereq: ELP students only
Leadership development with focus on global context and awareness of events shaping the context. Exposure to theory of leadership with examples. Necessary characteristics of a leader, and strategies for leadership skills development. Exposure to non-traditional career paths for engineers. Outline of personalized leadership development. Offered on a satisfactory-fail basis only.

**ENGR 160. Engineering Problems with Computer Applications Laboratory.**
(2-2) Cr. 3. F.S.S. Prereq: Satisfactory scores on mathematics placement examinations; credit or enrollment in MATH 142, 165
Solving engineering problems and presenting solutions through technical reports. Significant figures. Use of SI units. Graphing and curve-fitting. Flowcharting. Introduction to mechanics, statistics and engineering economics. Use of spreadsheet programs to solve and present engineering problems. Solution of engineering problems using computer programming languages. (The honors section includes application of programming to mobile robotics).
H. Honors. F.

**ENGR 210. E2020 Scholars Program Seminar: Leadership Development.**
(1-0) Cr. 1. Repeatable, maximum of 4 credits. F.S. Prereq: E2020 Scholars recipient; 110
Introduction to and activities in the study of programmatic goals of leadership development. Study of innovation and entrepreneurship concepts that are expected to characterize engineers by year 2020. Credit will not count toward graduation for any engineering curriculum.

**ENGR 320. International Experience Report.**
Cr. 3. F.S. Prereq: Satisfactory completion of international work experience of at least ten weeks or nine credits of approved course work taken abroad. Permission of student’s department prior to departure
Critique of work/study abroad experience as it relates to professional development. Taken the semester after completion of work abroad or study abroad. Written report and presentation. Offered on a satisfactory-fail basis only.
Meets International Perspectives Requirement.

**ENGR 327. Voices of Public Policy.**
(3-0) Cr. 3. F. Prereq: Sophomore classification in engineering
Role and impact of legislative process, partisan politics, government, lobbyists, the media, expert testimony and grassroots activism on public policy. Critical analysis of context; of claims, assumptions, premises, and evidence of both sides; represented and disenfranchised populations; the ethical issues to develop personal position and courses of action to impact public policy process.

**ENGR 396. Summer Internship.**
Cr. R. Repeatable. SS. Prereq: Permission of adviser and Engineering College Classification officer
Summer professional work period.

**ENGR 397. Professional Internship.**
Cr. R. F.S.S. Prereq: Permission of adviser and engineering college classification officer
Professional or interdisciplinary work period in engineering or career-related field. Enrollment limited to one summer and/or one semester per academic year. Offered on a satisfactory-fail basis only.

**ENGR 466. Multidisciplinary Engineering Design.**
(Cross-listed with A E, AER E, CPR E, E E, I E, M E, MATH E). (1-4) Cr. 3.
Repeatable. F.S. Prereq: Student must be within two semesters of graduation and receive permission of instructor
Student must be within two semesters of graduation and receive permission of instructor. Application of team design concepts to projects of a multidisciplinary nature. Concurrent treatment of design, manufacturing, and life cycle considerations. Application of design tools such as CAD, CAM, and FEM. Design methodologies, project scheduling, cost estimating, quality control, manufacturing processes. Development of a prototype and appropriate documentation in the form of written reports, oral presentations and computer models and engineering drawings.
ENGR 490. Independent Study.
Cr. 1-3. Repeatable, maximum of 3 credits. Prereq: Junior or senior classification in engineering, college approval

E. Entrepreneurship
Administered by the Department of Industrial and Manufacturing Systems Engineering

Undergraduate Study

For the undergraduate curriculum in industrial engineering leading to the degree bachelor of science. This curriculum is accredited under the General Criteria and Industrial Engineering Program Criteria by the Engineering Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012 - telephone: (410) 347-7700, http://www.abet.org.

Industrial engineers are employed to design, analyze, and improve systems and processes found in manufacturing, consulting, and service industries. Professional responsibilities are typically in design, management, analysis, optimization, and modeling of industrial systems. An industrial engineer is focused on human factors, operations research, engineering management, manufacturing engineering, and quality. Industrial engineers are typically found in organizations responsible for operations management, process engineering, automation, logistics, supply chain management, scheduling, plant engineering, quality control, and technical sales. The overall goal of the industrial engineering undergraduate curriculum is to produce technically qualified industrial engineers who are capable of successful professional practice in the field. To meet this goal, the curriculum includes in-depth instruction to accomplish the integration of systems using appropriate analytical, computational, and engineering practices. The curriculum also provides graduates with the necessary educational foundation to pursue advanced studies in industrial engineering or related fields.

The industrial engineering curriculum has the following objectives. The industrial engineering curriculum is preparing its graduates during their professional careers to:

1. Make strategic or tactical decisions on systems of people, machines, materials, information, and/or energy with analytical tools and information technology.
2. Formulate and analyze problems in specific application areas including manufacturing, ergonomics, supply chains, production and service industries, public policies, or information systems.
3. Develop and implement engineering project solutions concerning designs, processes, operations, or systems.
4. Prepare and deliver professional communications in written and oral formats.
5. Achieve team goals working with others, and provide leadership in some capacity.
6. Acquire new skills and training for lifelong learning and professional development.

Details on industrial engineering program outcomes that foster the attainment of these objectives are available at appropriate sections of: www.imse.iastate.edu

The industrial engineering undergraduate curriculum provides students with fundamental knowledge in mathematics and science, engineering science, social science, and humanities as well as professional industrial engineering course work. Management electives provide students with an opportunity to become familiar with modern business practices that they will encounter in their career. A senior capstone design course provides students with an opportunity to solve open-ended industrial problems with an industrial partner. The cooperative education program provides students with real world experience in the profession and a good perspective on career choices. Students are encouraged to participate in international experiences through exchange programs and industrial internships.

Qualified juniors and seniors interested in graduate studies may apply to the Graduate College to concurrently pursue both B.S. and M.S. or M.Eng. degrees in Industrial Engineering, or B.S. and M.B.A. degrees.

Engineering Sales

The Engineering Sales Minor is multidisciplinary and open to undergraduates in the College of Engineering. The minor is earned by completing 15 credits including:

- I E 450 Technical Sales for Engineers I
- I E 451 Technical Sales for Engineers II
- MKT 340 Principles of Marketing
- MKT 343 Personal Sales
- And one of the following:
- I E 305 Engineering Economic Analysis
- FIN 301 Principles of Finance

Total Credits 15

The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Graduate Study

The department offers programs for the degrees master of engineering, master of science and doctor of philosophy with a major in industrial engineering. A formal minor is available at the M.S. and Ph.D. levels to graduate students having a major in another department. The M.Eng. degree consists of coursework designed to improve professional expertise in industrial engineering. The M.S. and Ph.D. degrees are designed to improve the student’s capability to conduct research as well as their professional expertise.

The prerequisite to major graduate work is the completion of a curriculum similar to that required of undergraduate students in engineering at this institution.

With the help of a program of study committee, a graduate student develops an educational program in areas within industrial engineering. Typical areas of concentration include ergonomics/human factors, engineering management, human computer interfaces, advanced manufacturing systems, operations research, and information engineering.

Curriculum in Industrial Engineering

Administered by the Department of Industrial and Manufacturing Systems Engineering.

Leading to the degree bachelor of science.

Total credits required: 121.5 cr. See also Basic Program and Special Programs.

International Perspectives: 3 cr.1

U.S. Diversity: 3 cr.1

Cr. R. F.S. (1-0) Introduce students to the industrial engineering profession, its scope, industrial engineering tools, and future trends.

I E 148. Information Engineering.

(2-2) Cr. 3. F. Prereq: Credit or enrollment in I E 271 Introduction to metrology, engineering drawings and specifications. Engineering methods for designing and improving systems. Theory, applications, and quality issues related to machinery processes.

(3-0) Cr. 3. S. Prereq: PHYS 221 Basic concepts of ergonomics and work design. Their impact on worker and work place productivity, and cost. Investigations of work physiology, biomechanics, anthropometry, work methods, and their measurement as they relate to the design of human-machine systems.

I E 298. Cooperative Education.

Cr. R. F.S.S. Prereq: Permission of department and Engineering Career Services First professional work period in the cooperative education program. Students must register for this course before commencing work.

I E 305. Engineering Economic Analysis.

(3-0) Cr. 3. S. Prereq: STAT 231 or 401 Economic analysis of engineering decisions under uncertainty. Financial engineering basics including time value of money, cash flow estimation, and asset evaluation. Make versus buy decisions. Comparison of project alternatives accounting for taxation, depreciation, inflation, and risk. Nonmajor graduate credit. Nonmajor graduate credit.

I E 312. Optimization.

(3-0) Cr. 3. F. Prereq: MATH 267 Concepts, optimization and analysis techniques, and applications of operations research. Formulation of mathematical models for systems, concepts, and methods of improving search, linear programming and sensitivity analysis, network models, and integer programming. Nonmajor graduate credit.

I E 341. Production Systems.

(3-0) Cr. 3. F. Prereq: STAT 231; credit or enrollment in I E 312 Introduction of key concepts in the design and analysis of production systems. Topics include inventory control, forecasting, material requirement planning, project planning and scheduling, operations scheduling, and other production systems such as Just-In-Time (JIT), warehousing, and global supply chains. Nonmajor graduate credit.

I E 348. Solidification Processes.

(2-2) Cr. 3. S. Prereq: 248 Theory and applications related to metal casting, welding, polymer processing, powder metallurgy, electronic assembly, and semi-conductor manufacturing. Nonmajor graduate credit.

I E 396. Summer Internship.

Cr. R. Repeatable. SS. Prereq: Permission of department and Engineering Career Services Summer professional work period.
I E 397. Engineering Internship.
Cr. R. Repeatable. F.S. Prereq: Permission of department and Engineering Career Services
Professional work period for a maximum of one semester per academic year. Offered on a satisfactory-fail basis only.

I E 398. Cooperative Education.
Cr. R. F.S.S. Prereq: 298, permission of department and Engineering Career Services
Second professional work period in the cooperative education program. Students must register for this course before commencing work. Offered on a satisfactory-fail basis only.

I E 403. Introduction to Sustainable Production Systems.
(Dual-listed with 503). (3-0) Cr. 3. Alt. S., offered 2013. Prereq: Credit or enrollment 341
Quantitative introduction of sustainability concepts in production planning and inventory control. Review of material recovery (recycling) and product/component recovery (remanufacturing) from productivity perspectives. Sustainability rubrics ranging from design and process to systems. Application to multi-echelon networks subject to forward/backward flow of material and information. Closed-loop supply chains. Comparative study of sustainable vs. traditional models for local and global production systems.

I E 408. Interdisciplinary Problem Solving.
(Cross-listed with TSM). (3-0) Cr. 3. Alt. F., offered 2012. Prereq: Junior or senior classification
Use of the Theory of Constraints as a way of approaching problem solving, win-win negotiation, project planning and effective delegation in the context of engineering/business systems. Team projects aimed at improving design outcomes. Nonmajor graduate credit.

I E 409. Interdisciplinary Systems Effectiveness.
(Cross-listed with TSM). (3-0) Cr. 3. Alt. F., offered 2011. Alt. S., offered 2012. Prereq: Junior or senior classification
Focus on functions that determine the effectiveness of an entire organization. Generic Theory of Constraints solutions to production, distribution, and project management are compared to traditional solutions. Strategy for improvements discovered using simulations. Nonmajor graduate credit.

I E 413. Stochastic Modeling, Analysis and Simulation.
(4-0) Cr. 4. F. Prereq: MATH 267, STAT 231
Development and analysis of simulation models using a simulation language. Application to various areas of manufacturing and service systems such as assembly, material handling, and customer queues. Utilizing model output to make important business decisions. Fitting of data to statistical distributions. Introduction to Markov processes and other queuing models. Nonmajor graduate credit.

I E 441. Industrial Engineering Design.
(1-6) Cr. 3. F.S. Prereq: 248, 271, 361; credit or enrollment in 341, 413, and 448
A large, open-ended design project related to an enterprise. Application of engineering design principles including problem definition, analysis, synthesis, and evaluation. Nonmajor graduate credit.

I E 446. Geometric Variability in Manufacturing.
(Dual-listed with 546). (3-0) Cr. 3. Alt. S., offered 2013. Prereq: I E 348, or Mat E 341, or M E 324
Assessment, accommodation, and control of geometric variability of manufacturing processes. Use of CMMs, vision and scanning systems, and profilometers. Techniques to successfully accommodate variation through design, process, tooling or process plan including plastic injection molding, metalcasting, welding, machining, powder metallurgy. Methodologies to control geometric variability. Nonmajor graduate credit.

(3-0) Cr. 3. S. Prereq: 248, 305
Fixturing and tooling requirements for manufacturing process planning, geometric dimensioning and tolerancing, computer aided inspection, cellular and flexible manufacturing, and facility layout. Lean manufacturing principles and controlled flow production. Nonmajor graduate credit.

(Dual-listed with 549). (3-0) Cr. 3. Alt. F., offered 2012. Prereq: 248, some experience with theory of matrices
Representation and interpretation of curves, surfaces and solids. Parametric curves and surfaces and solid modeling. Use of CAD software and CAD/CAM integration. Computer numerical control, CNC programming languages, and process planning.

I E 450. Technical Sales for Engineers I.
(3-0) Cr. 3. F. Prereq: 305
Sales process methodology, techniques for building professional relationships, sales automation software, prospecting and account development, market analysis and segmentation, responding to RFO’s and RFP’s in written and verbal form. Developing technical value propositions and competitive positioning, evaluating organizational decision processes and people, technical marketing strategies, sales closing strategies.

I E 451. Technical Sales for Engineers II.
(3-0) Cr. 3. S. Prereq: 450
Case studies and experiential lessons on the development and application of technical sales strategies. Specific topics include developing pricing and distribution strategies, managing a sales staff and channel, developing sales teams and global sales plans, bid and negotiation strategies, time management skills, and implementing sales automation technologies.

I E 466. Multidisciplinary Engineering Design.
(Cross-listed with A E, AER E, CPR E, E E, ENGR, M E, MAT E). (1-4) Cr. 3. Repeatable. F.S.
Prereq: Student must be within two semesters of graduation and receive permission of instructor
Application of team design concepts to projects of a multidisciplinary nature. Concurrent treatment of design, manufacturing, and life cycle considerations. Application of design tools such as CAD, CAM, and FEM. Design methodologies, project scheduling, cost estimating, quality control, manufacturing processes. Development of a prototype and appropriate documentation in the form of written reports, oral presentations and computer models and engineering drawings.

I E 481. e-Commerce Systems Engineering.
(Dual-listed with 581). (3-0) Cr. 3. Alt. F., offered 2011. Prereq: 148
Design, analysis, and implementation of e-commerce systems. Information infrastructure, enterprise models, enterprise processes, enterprise views. Data structures and algorithms used in e-commerce systems, SQL, exchange protocols, client/server model, web-based views.

I E 483. Knowledge Discovery and Data Mining.
(Dual-listed with 583). (3-0) Cr. 3. Alt. F., offered 2012. Prereq: 148, 312, and STAT 231
Introduction to data warehouses and knowledge discovery. Techniques for data mining, including probabilistic and statistical methods, genetic algorithms and neural networks, visualization techniques, and mathematical programming. Advanced topics include web-mining and mining of multimedia data. Case studies from both manufacturing and service industries. A computing project is required. Nonmajor graduate credit.

I E 490. Independent Study.
Cr. 1-5. Repeatable. Prereq: Senior classification, permission of instructor
Independent study and work in the areas of industrial engineering design, practice, or research.

A. Manufacturing
B. Human Factors
C. Operations Research
D. Enterprise Computing and Information Management
E. Engineering Management
H. Honors
Courses primarily for graduate students, open to qualified undergraduate students

Cr. R. Repeatable.
Principles and practices for research tasks at the M.S. level including proposal writing, presentations, paper preparation, and project management.

I E 503. Introduction to Sustainable Production Systems.
(Dual-listed with 403) (3-0) Cr. 3. Alt. S., offered 2013. Prereq: Credit or enrollment in 341
Quantitative introduction of sustainability concepts in production planning and inventory control. Review of material recovery (recycling) and product/component recovery (remanufacturing) from productivity perspectives. Sustainability rubrics ranging from design and process to systems. Application to multi-echelon networks subject to forward/backward flow of material and information. Closed-loop supply chains. Comparative study of sustainable vs. traditional models for local and global production systems. A course project is required for graduate credit.

(3-0) Cr. 3. Prereq: 312 or MATH 307
Market-based allocation mechanisms from quantitative economic systems perspective. Pricing and costing models designed and analyzed with respect to decentralized decision processes, information requirements, and coordination. Case studies and examples from industries such as regulated utilities, semiconductor manufacturers, and financial engineering services.

I E 510. Network Analysis.
(3-0) Cr. 3. Prereq: 312
Formulation and solution of deterministic network flow problems including shortest path, minimum cost flow, and maximum flow. Network and graph formulations of combinatorial problems including assignment, matching, and spanning trees. Introduction to deterministic and stochastic dynamic programming.

(3-0) Cr. 3. Prereq: STAT 231
Introduction to modeling and analysis of manufacturing and service systems subject to uncertainty. Topics include the Poisson process, renewal processes, Markov chains, and Brownian motion. Applications to inventory systems, production system design, production scheduling, reliability, and capacity planning.

I E 514. Production Scheduling.
(3-0) Cr. 3. Prereq: 312, 341
Introduction to the theory of machine shop systems. Complexity results for various systems such as job, flow and open shops. Applications of linear programming, integer programming, network analysis. Enumerative methods for machine sequencing. Introduction to stochastic scheduling.

I E 519. Simulation Modeling and Analysis.
(3-0) Cr. 3. Prereq: COM S 311, STAT 401
Event scheduling, process interaction, and continuous modeling techniques. Probability and statistics related to simulation parameters including run length, inference, design of experiments, variance reduction, and stopping rules. Aspects of simulation languages.

I E 531. Quality Control and Engineering Statistics.
(Cross-listed with STAT) (3-0) Cr. 3. Alt. S., offered 2013. Prereq: STAT 401; STAT 342 or 447
Wu. Statistical methods and theory applicable to problems of industrial process monitoring and improvement. Statistical issues in industrial measurement; Shewhart, CUSUM, and other control charts; feedback control; process characterization studies; estimation of product and process characteristics; acceptance sampling, continuous sampling and sequential sampling; economic and decision theoretic arguments in industrial statistics.

I E 533. Reliability.
(Cross-listed with STAT) (3-0) Cr. 3. Alt. S., offered 2012. Prereq: STAT 424 or 442 or 447
Meeker. Probabilistic modeling and inference in reliability; analysis of systems; Bayesian aspects; product limit estimator, probability plotting, maximum likelihood estimation for censored data, accelerated failure time and proportional hazards regression models with applications to accelerated life testing; repairable system data, planning studies to obtain reliability data.

I E 534. Linear Programming.
(3-0) Cr. 3. Prereq: 312

I E 537. Reliability and Safety Engineering.
(3-0) Cr. 3. Prereq: STAT 231 or STAT 401

I E 541. Inventory Control and Production Planning.
(3-0) Cr. 3. Prereq: 341
Economic Order Quantity, dynamic lot sizing, newsboy, base stock, and (Q,r) models. Material Requirements Planning, Just-In-Time (JIT), variability in production systems, push and pull production systems, aggregate and workforce planning, and capacity management.

I E 545. Rapid Prototyping and Manufacturing.
(3-0) Cr. 3. Prereq: 248 or similar manufacturing experience. Undergraduates: Permission of instructor
Introduction to rapid prototyping processes and other rapid manufacturing methodologies. Operating principles and characteristics of current and developing rapid prototyping processes. Use of rapid prototypes in product design, development, and service. Selection of rapid prototyping systems based on rapid methodologies used in manufacturing processes and rapid tooling approaches.

I E 546. Geometric Variability in Manufacturing.
(Dual-listed with 446) (3-0) Cr. 3. Alt. S., offered 2013. Prereq: I E 348, or Mat 431, or M E 324
Assessment, accommodation, and control of geometric variability of manufacturing processes. Use of CMMs, vision and scanning systems, and profilometers. Techniques to successfully accommodate variation through design of product, tooling or process plan including plastic injection molding, metalcasting, welding, machining, powder metallurgy. Methodologies to control geometric variability.

(Dual-listed with 449) (3-0) Cr. 3. Alt. F., offered 2012. Prereq: 248, some experience with theory of matrices
Representation and interpretation of curves, surfaces and solids. Parametric curves and surfaces and solid modeling. Use of CAD software and CAD/CAM integration. Computer numerical control, CNC programming languages, and process planning.
(3-0) Cr. 3. Prereq: 361  
Methods for continuous quality improvement in process analysis. The systems analysis for process improvement model based on W. Edwards Deming. Quality function deployment methods. Case studies of applications to manufacturing and other heavy industries. Use of process analysis computerized programs and tools for design analysis.

I E 565. Systems Engineering and Analysis.  
(Cross-listed with AER E, E E). (3-0) Cr. 3. Prereq: Coursework in basic statistics  
Introduction to organized multidisciplinary approach to designing and developing systems. Concepts, principles, and practice of systems engineering as applied to large integrated systems. Life cycle costing, scheduling, risk management, functional analysis, conceptual and detail design, test and evaluation, and systems engineering planning and organization. Not available for degrees in industrial engineering.

(3-0) Cr. 3. Prereq: 565  
Design for reliability, maintainability, usability, supportability, producibility, disposability, and life cycle costs in the context of the systems engineering process. Students will be required to apply the principles of systems engineering to a project including proposal, program plan, systems engineering management plan, and test and evaluation plan. Not available for degrees in industrial engineering.

I E 570. Systems Engineering and Project Management.  
(3-0) Cr. 3. Prereq: Coursework in basic statistics  
Systems view of projects and the processes by which they are implemented. Focuses on qualitative and quantitative tools and techniques of project management. Specific systems concepts, methodologies, and tools for effective management of both simple and complex projects. Introduction of important performance parameters for planning, cost control, scheduling, and productivity, including discussions of traditional and state of the art tools and systems.

I E 571. Occupational Biomechanics.  
(3-0) Cr. 3. Prereq: EM 274, STAT 231  

(3-0) Cr. 3. Prereq: 577  
Human factors methods applied to interface design, prototyping, and evaluation. Concepts related to understanding user characteristics, usability analysis, methods and techniques for design and evaluation of the interface. The evaluation and design of the information presentation characteristics of a wide variety of interfaces: web sites (e-commerce), computer games, information presentation systems (cockpits, instrumentation, etc.), and desktop virtual reality.

(3-0) Cr. 3. Prereq: 577  
Investigation of the human interface to consumer and industrial systems and products, providing a basis for their design and evaluation. Discussions of human factors in the product design process: modeling the human during product use; usability; human factors methods in product design evaluation; user-device interface; safety, warnings, and instructions for products; considerations for human factors in the design of products for international use.

I E 577. Human Factors.  
(3-0) Cr. 3. Prereq: 271, STAT 231 or 401  
Physical and psychological factors affecting human performance in systems. Signal detection theory, human reliability modeling, information theory, and performance shaping applied to safety, reliability, productivity, stress reduction, training, and human/equipment interface design. Laboratory assignments related to system design and operation.

I E 581. e-Commerce Systems Engineering.  
(Dual-listed with 481). (3-0) Cr. 3. Prereq: 148  
Design, analysis, and implementation of e-commerce systems. Information infrastructure, enterprise models, enterprise processes, enterprise views. Data structures and algorithms used in e-commerce systems. SQL, exchange protocols, client/server model, web-based views.

I E 582. Enterprise Modeling and Integration.  
(3-0) Cr. 3. Prereq: 3 credits in information technology or information systems  
The design and analysis of enterprise models to support information engineering of enterprise-wide systems. Representation of system behavior and structure including process modeling, information modeling, and conceptual modeling. Applications in enterprise application integration, enterprise resource planning systems, product data management systems, and manufacturing execution systems.

I E 583. Knowledge Discovery and Data Mining.  
(Dual-listed with 483). (3-0) Cr. 3. Alt. F., offered 2012. Prereq: 148, 312, and STAT 231  
Introduction to data warehouses and knowledge discovery. Techniques for data mining, including probabilistic and statistical methods, genetic algorithms and neural networks, visualization techniques, and mathematical programming. Advanced topics include web-mining and mining of multimedia data. Case studies from both manufacturing and service industries. A computing project and an additional project with more theoretical content are required.

I E 585. Requirements Engineering.  
(3-0) Cr. 3. Prereq: 3 credits in information technology or information systems  
Principles and practices for requirements engineering as part of the product development process with emphasis on software systems engineering. Problem definition, problem analysis, requirements analysis, requirements elicitation, validation, specifications. Case studies using requirements engineering methods and techniques.

I E 588. Information Systems for Manufacturing.  
(3-0) Cr. 3. Prereq: 148, 448  
Design and implementation of systems for the collection, maintenance, and usage of information needed for manufacturing operations, such as process control, quality, process definition, production definitions, inventory, and plant maintenance. Topics include interfacing with multiple data sources, methods to utilize the information to improve the process, system architectures, and maintaining adequate and accurate data for entities internal and external to the enterprise to achieve best manufacturing practices.

I E 590. Special Topics.  
Cr. 1-3. Repeatable.  
Advanced study of a research topic in the field of industrial engineering.

I E 599. Creative Component.  
Cr. arr. Repeatable.  
A. Industrial Engineering  
C. Operations Research

Courses for graduate students

Cr. R. Repeatable.  
Principles and practices for conducting research at the Ph.D. level, including problem definition, proposal writing, presentations, conference proceedings, paper preparation, and project management.
(3-0) Cr. 3. **Prereq: 513**
Modeling techniques to evaluate performance and address issues in design, control, and operation of systems. Markov models of single-stage make-to-order and make-to-stock systems. Approximations for non-Markovian systems. Impact of variability on flow lines. Open and closed queuing networks.

(3-0) Cr. 3. **Prereq: 534**
Develop nonlinear models, convex sets and functions, optimality conditions, Lagrangian duality, unconstrained minimization techniques. Constrained minimization techniques covering penalty and barrier functions, sequential quadratic programming, the reduced gradient method.

I E 632. Integer Programming.
(3-0) Cr. 3. **Prereq: 534**
Integer programming including cutting planes, branch and bound, and Lagrangian relaxation. Introduction to complexity issues and search-based heuristics.

I E 642. Simultaneous Engineering in Manufacturing Systems.
(3-0) Cr. 3. **Prereq: 549 or M E 415**
Current engineering methods for the product life cycle process. Feature-based design, computer-aided process planning, and data-driven product engineering.

(3-0) Cr. 3. Repeatable. **Prereq: 571 or 577**
Ergonomics research topic development, literature evaluation, experimental design, use of bioinstrumentation, data collection, basic data interpretation, statistical analysis, manuscript preparation.

I E 690. Advanced Topics.
Cr. 1-3. Repeatable. **Prereq: Permission of the instructor**
Advanced topics related to Ph.D. research in industrial engineering under the direction of the instructor.

I E 697. Engineering Internship.
Cr. R. Repeatable. **F.S.S.S. Prereq: Permission of department**
Professional work period for a maximum of one semester per academic year. Offered on a satisfactory-fail basis only.

I E 699. Research.
Cr. arr. Repeatable.

A. Industrial Engineering
C. Operations Research
Undergraduate Study

For the undergraduate curriculum in materials engineering leading to the degree bachelor of science. This curriculum is accredited under the General Criteria and the Materials Engineering Program Criteria by the Engineering Accreditation Committee of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012 – telephone: (410) 347-7700, http://www.abet.org. Materials engineering is a broadly-based discipline relating the composition, microstructure, and processing of materials to their properties, uses and performance. Materials engineering includes a variety of traditional and modern technologies involving metals, ceramics, polymers, composites, and electronic materials.

Because of its interdisciplinary nature, career opportunities for materials engineers bridge all industrial and government sectors including: materials based technologies (materials production), communication/information technologies (semiconducting materials, fiber optics), medical/environmental technologies (biomedical, energy production, waste containment), nanotechnologies, consumer products (building and construction, durable goods), and transportation industries (automotive, aerospace).

The objectives of the materials engineering program are to produce graduates who:

• practice materials engineering in a broad range of industries including materials production, semiconductors, medical/environmental, consumer products, and transportation products
• respond to environmental, social, political, ethical and economic constraints to improve the quality of life in Iowa and the world
• work independently and in teams and are proficient in written, oral and graphical communication
• engage in lifelong learning in response to the rapidly expanding knowledge base and changing environment of our world
• engage in advanced study in materials and related or complementary fields

Graduates in materials engineering are able to apply scientific and engineering principles to select or design the best materials to solve engineering problems. They are also able to control the microstructure of materials through processing to optimize properties and performance. They are skilled in creative, independent problem solving under time and resource constraints. Graduates will have gained experience in materials engineering practice through cooperative work experience or internships in industry, national laboratories, or other funded research work. They will have hands-on skills with a broad range of modern materials processing and characterization equipment and methods.

A degree in materials engineering relies on a strong foundation of math, chemistry and physics. The core materials courses include fundamentals of materials, kinetics and thermodynamics, mechanical properties, computational methods, design, and professional practice experience. Students tailor their programs to their goals and interests through the selection of two areas of specialization from the four available: ceramic materials, electronic materials, metallic materials and polymeric materials. In lieu of the second specialty from the four listed, a student may propose an individually designed, materials related technical specialty to meet specific career goals. Students must have a 3.00 gpa and a B+ in MAT E 215 Introduction to Materials Science and Engineering I. Students may learn other requirements and procedures for applying in the Undergraduate Handbook or by speaking with their adviser. Approval of this proposal rests with the department’s curriculum committee. Additional technical electives can be taken in other areas of interest. The breadth and depth of the program provide excellent preparation for both immediate entry into industry or further study in graduate school.

The department also offers a cooperative education program that combines classroom learning with work experience.

Materials Engineering

Well qualified juniors in materials engineering who are interested in graduate study may apply for concurrent enrollment during their senior year in the Graduate College to simultaneously pursue both bachelor of science and master of science degrees. See Materials Science and Engineering for more information.

Curriculum in Materials Engineering

Administered by the Department of Materials Science and Engineering.

Leading to the degree bachelor of science.

Total credits required: 127.5 cr. See also Basic Program and Special Programs.

International Perspectives: 3 cr.1
U.S. Diversity: 3 cr.1
Communication Proficiency/Library requirement (minimum grade of C):

ENGL 302 Business Communication 3
ENGL 309 Report and Proposal Writing 3
ENGL 314 Technical Communication 3
JL MC 347 Science Communication 3

General Education Electives: 15 cr.
Complete 12 cr. from a minimum of 6 cr. but no more than 9 cr. from one designator, and a maximum of 9 cr. of 100-level courses2. Complete one course (3 cr.) from the following with a minimum grade of C:

ENGL 302 Business Communication 3
ENGL 309 Report and Proposal Writing 3
ENGL 314 Technical Communication 3
JL MC 347 Science Communication 3

Basic Program: 26.5 cr.
Complete with 2.00 GPA including transfer courses:

CHEM 167 or CHEM 177 General Chemistry for Engineering Students 4
ENG 150 Critical Thinking and Communication 3
ENGR 250 Written, Oral, Visual, and Electronic Communication (see above for grade requirements) 3
ENGR 101 Engineering Orientation R
ENGR 160 Engineering Problems with Computer Applications Laboratory 3
LIB 160 Library Instruction 0.5
MATH 165 Calculus I 4
MATH 166 Calculus II 4
PHYS 221 Introduction to Classical Physics I (See Basic Program) 5

Total Credits 26.5

Math and Physical Science: 18 cr.

CHEM 177L Laboratory in General Chemistry I 1
CHEM 178 General Chemistry II 3
CHEM 178L Laboratory in College Chemistry II 1
MATH 265 Calculus III 4
MATH 267 Elementary Differential Equations and Laplace Transforms 4
PHYS 222 Introduction to Classical Physics II 5

Total Credits 18
Materials/Specialties Engineering Core: 50 cr.

Complete with 2.00 GPA including transfer courses:

Students must choose two from the four areas of specialization (18 cr.): ceramic, electronic, metallic and polymeric materials.

Total Credits: 50

Note: A Mat E student may take up to 9 credit hours from General Education and free electives on a P/NP basis, except for courses used to meet the diversity and international perspectives requirement. S/F courses (different from P/NP) will be considered for these requirements on a course-by-course basis.

Courses primarily for undergraduate students

Cr. R. F. Prereq: Sophomore classification in Mat E
Preparation for a career in materials engineering; experiential learning, resumes, interviewing, Myers-Briggs Type Indicator, leadership, undergraduate research, international opportunities, graduate school preparation and opportunities, and alternative career paths. Offered on a satisfactory-fail basis only.

(2-3) Cr. 3. S. Prereq: 215, credit or enrollment in PHYS 221
Structural characterization of ceramic, electronic, polymeric and metallic materials. Techniques include optical and electron microscopy, x-ray diffraction, and thermal analysis. Identification of materials type, microstructure, and crystal structure.

MAT E 215. Introduction to Materials Science and Engineering I.
(3-0) Cr. 3. F. Prereq: CHEM 177 or 167
Materials Engineering majors only. Structure and properties of ceramic, electronic, polymeric and metallic materials, emphasizing differences based on structure and bonding. Phase equilibria and phase transformations. Only one of Mat E 215, 272, or 392 may count toward graduation.

(0-3) Cr. 1. F. Prereq: Credit or enrollment in 215 or 272 or 392
Materials Engineering majors only. Laboratory exercise in materials.

MAT E 216. Introduction to Materials Science and Engineering II.
(3-2) Cr. 4. S. Prereq: 215, Credit or enrollment in PHYS 222
Materials Engineering majors only. Fundamentals of ceramic, polymeric, and composite materials; degradation, electronic, thermal, magnetic, and optical properties of materials. Materials for energy, biomaterials, and nanomaterials. Laboratory exercises in materials property measurements.

MAT E 220. Globalization and Sustainability.
(Cross-listed with ANTHR, ENV S, GLOBE, M E, SOC, T SC). (3-0) Cr. 3.
FS
An introduction to understanding the key global issues in sustainability. Focuses on interconnected roles of energy, materials, human resources, economics, and technology in building and maintaining sustainable systems. Applications discussed will include challenges in both the developed and developing world and will examine the role of technology in a resource-constrained world. Cannot be used for technical elective credit in any engineering department.

Meets International Perspectives Requirement.
(3-0) Cr. 3. F.S.S.S. Prereq: Sophomore classification; CHEM 167 or 177; MATH 165  

MAT E 298. Cooperative Education.  
Cr. R. F.S.S.S. Prereq: Permission of department and Engineering Career Services  
First professional work period in the cooperative education program. Students must register for this course before commencing work.

MAT E 311. Thermodynamics in Materials Engineering.  
(3-0) Cr. 3. F. Prereq: 216, CHEM 178, PHYS 222, credit or enrollment in MATH 267  

(3-0) Cr. 3. S. Prereq: 216, 311  
Kinetic phenomena and phase equilibria relevant to the origins and stability of microstructure in metallic, ceramic and polymeric systems. Application of thermodynamics to the understanding of stable and metastable phase equilibria, interfaces and their effects on stability; defects and diffusion, empirical rate equations for transformation kinetics, driving forces and kinetics of nucleation, diffusional and diffusionless phase transformations. Nonmajor graduate credit.

(2-2) Cr. 3. S. Prereq: 215  
Use of mathematical and statistical computer tools for materials design and analysis. Applications of statistical principles to problems concerned with materials. Computer-assisted design of experiments. Nonmajor graduate credit.

(3-0) Cr. 3. F. Prereq: 216 and PHYS 222  

MAT E 321. Introduction to Ceramic Science.  
(3-0) Cr. 3. F. Prereq: 216  

MAT E 322. Introduction to Ceramic Processing.  
(2-3) Cr. 3. S. Prereq: 321  

MAT E 332. Semiconductor Materials and Devices.  
(Cross-listed with E E). (3-0) Cr. 3. S. Prereq: PHYS 222; Mat E majors: MAT E 334; Cpr E and E E majors: E E 230  
Introduction to semiconductor material and device physics. Quantum mechanics and band theory of semiconductors. Charge carrier distributions, generation/recombination, transport properties. Physical and electrical properties and fabrication of semiconductor devices such as MOSFETs, bipolar transistors, laser diodes and LED’s. Nonmajor graduate credit.

(2-2) Cr. 3. S. Prereq: 317  

MAT E 351. Introduction to Polymeric Materials.  
(3-0) Cr. 3. F. Prereq: 216  
Introduction to polymeric materials, synthesis, structure and properties. Relationship between polymer composition, processing and properties. Nonmajor graduate credit.

(Cross-listed with E M). (3-0) Cr. 3. S. Prereq: PHYS 112 or 222  
Radiography, ultrasonic testing, magnetic particle inspection, eddy current testing, dye penetrant inspection, and other techniques. Physical bases of tests; materials to which applicable; types of defects detectable; calibration standards, and reliability safety precautions. Nonmajor graduate credit.

L. Nondestructive Testing Laboratory

MAT E 362L. Nondestructive Testing Laboratory.  
(Cross-listed with E M). (0-3) Cr. 1. S. Prereq: Credit or enrollment in 362  
Application of nondestructive testing techniques to the detection and sizing of flaws in materials and to the characterization of material’s microstructure. Included are experiments in hardness, dye penetrant, magnetic particle, x-ray, ultrasonic and eddy current testing. Field trips to industrial laboratories. Nonmajor graduate credit.

MAT E 370. Toting with Technology.  
(Cross-listed with CPR E). (2-2) Cr. 3. F.S. Prereq: C I 201  
A project-based, hands-on learning course. Technology literacy, appreciation for technological innovations, principles behind many technological innovations, hands-on laboratory experiences based upon simple systems constructed out of LEGO’s and controlled by small microcomputers. Future K-12 teachers will leave the course with complete lesson plans for use in their upcoming careers.
MAT E 388. Sustainable Engineering and International Development.
(Cross-listed with A E, C E, E E, M E). (2-2) Cr. 3. F. Prereq: Junior classification in engineering
Multi-disciplinary approach to sustainable engineering and international development, sustainable development, appropriate design and engineering, feasibility analysis, international aid, business development, philosophy and politics of technology, and ethics in engineering. Engineering-based projects from problem formulation through implementation. Interactions with partner community organizations or international partners such as nongovernmental organizations (NGOs). Course readings, final project/design report.

Meets International Perspectives Requirement.

(Cross-listed with M E). (3-0) Cr. 3. Repeatable, maximum of 2 times. SS. Learning how to work in a cross disciplinary engineering team to develop and implement appropriate solutions for cooking, lighting, farming, and sanitation in a rural village in Mali. Engineering principles necessary for the projects to be worked on including lighting solutions in a village without electricity, new construction materials, water, etc. Application of engineering principles from core courses. Design conception, feasibility, production, and implementation within context of local cultures and needs. Emphasis on creating real solutions that can be implemented with the constraints imposed by cost, time, manufacturing capability, and culture.

Meets International Perspectives Requirement.

MAT E 391. Introduction to US Women’s roles in Industry and Preparation for Summer Study.
(3-0) Cr. 3. S. Introduction to the historical role of women as related to US industry, family and community with emphasis on the years 1830 - 1945, but also related to the current climate. Topics completed in 392 with arranged lectures at Brunel University. Orientation for Brunel summer study program. Offered on a satisfactory-fail basis only. Credit for graduation allowable only upon completion of Mat E 392.

Meets U.S. Diversity Requirement

(3-0) Cr. 3. S. Prereq: 216 and credit or enrollment in E M 324 Structure and properties of ceramic, electronic, polymeric and metallic materials, emphasizing differences based on structure and bonding. Phase equilibria and phase transformations. Taught on Brunel University campus. Offered on a satisfactory-fail basis only. Only one of Mat E 215, 272, or 392 may count toward graduation.

Meets International Perspectives Requirement.

MAT E 396. Summer Internship.
Cr. R. Repeatable. SS. Prereq: Permission of department and Engineering Career Services
Summer professional work period.

MAT E 397. Engineering Internship.
Cr. R. Repeatable. F.S. Prereq: Permission of department and Engineering Career Services; junior classification
Professional work period, one semester maximum per academic year.

MAT E 398. Cooperative Education.
Cr. R. F.S.SS. Prereq: 298, permission of department and Engineering Career Services
Second professional work period in the cooperative education program. Students must register for this course before commencing work.

MAT E 413. Materials Design and Professional Practice I.
(2-2) Cr. 3. F. Prereq: Senior status in Mat E
Fundamentals of materials engineering design, information sources, team behavior, professional preparation, quantitative design including finite-element analysis and computer aided design, materials selection, informatics and combinatorial methods. Analysis of design problems, development of solutions, selected case studies. Oral presentation skills. Preparations for spring project.

MAT E 414. Materials Design and Professional Practice II.
(2-2) Cr. 3. S. Prereq: Senior status in Mat E
Integration of materials processing, structure/composition, properties and performance principles in materials engineering problems. Multiscale design of materials, materials processing, case studies including cost analysis, ethics, risk and safety. Team projects specified by either industry or academic partners. Written and oral final project reports.

MAT E 418. Mechanical Behavior of Materials.
(3-0) Cr. S. S. Prereq: 216 and credit or enrollment in E M 324
Mechanical behavior of ceramics, metals, polymers, and composites. Relationships between materials processing and atomic aspects of elasticity, plasticity, fracture, and fatigue. Life prediction, stress-and failure analysis. Nonmajor graduate credit.

MAT E 425. Glasses and Advanced Ceramics.

MAT E 432. Microelectronics Fabrication Techniques.
(Cross-listed with E E). (2-4) Cr. 4. Prereq: PHYS 222, MATH 267, EE 332 or MAT E 334 recommended
Techniques used in modern integrated circuit fabrication, including diffusion, oxidation, ion implantation, lithography, evaporation, sputtering, chemical-vapor deposition, and etching. Process integration. Process evaluation and final device testing. Extensive laboratory exercises utilizing fabrication methods to build electronic devices. Use of computer simulation tools for predicting processing outcomes. Recent advances in processing CMOS, ICs and micro-mechanical systems (MEMS). Nonmajor graduate credit.

(3-0) Cr. 3. S. Prereq: 216 and credit or enrollment in E M 324

MAT E 444. Corrosion and Failure Analysis.
(2-2) Cr. 3. S. Prereq: 216 and credit or enrollment in 418 Corrosion and corrosion control of metallic systems. Corrosion fundamentals, classification of different types of metallic corrosion, corrosion properties of various engineering alloys, corrosion control. Failure analysis. Characteristics of common types of metallic failures, case studies of failures, designing to reduce failure risk. Nonmajor graduate credit.
MAT E 453. Physical and Mechanical Properties of Polymers.  
(Dual-listed with 553). (2-3) Cr. 3. F. Prereq: 351  
Overview of polymer chemical composition, microstructure, thermal  
and mechanical properties, rheology, and principles of polymer materials  
selection. Intensive laboratory experiments include chemical composition  
studies, microstructural characterization, thermal analysis, and mechanical  
testing. Nonmajor graduate credit.

MAT E 454. Polymer Composites and Processing.  
(Dual-listed with 554). (3-0) Cr. 3. S. Prereq: 351  
Basic concepts in polymer composites, blends, and block copoly-  
mers. Phase separation and miscibility, microstructures and mechanical  
behavior. Fiber reinforced and laminated composites. Viscosity, rheology,  
viscoelasticity of polymers. Polymer melt processing methods such as  
injection molding and extrusion; selection of suitable processing methods  
and their applications. Nonmajor graduate credit.

MAT E 456. Biomaterials.  
(Dual-listed with 556). (3-0) Cr. 3. S. Prereq: 216 or 272 or 392  
Presentation of the basic chemical and physical properties of biomate-  
rials, including metals, ceramics, and polymers, as they are related to  
their manipulation by the engineer for incorporation into living systems.  
Role of microstructure properties in the choice of biomaterials and design  
of artificial organs, implants, and prostheses.

MAT E 466. Multidisciplinary Engineering Design.  
(Cross-listed with AE, AER E, CPR E, EE, ENGR, IE, ME). (1-4) Cr. 3.  
Repeatable. F.S. Prereq: Student must be within two semesters of gradu-  
ation and receive permission of the instructor  
Application of team design concepts to projects of a multidisciplinary  
nature. Concurrent treatment of design, manufacturing and life cycle  
considerations. Application of design tools such as CAD, CAM, and  
FEM. Design methodologies, project scheduling, cost estimating, quality  
control, manufacturing processes. Development of a prototype and  
appropriate documentation in the form of written reports, oral presenta-  
tions, computer models and engineering drawings.

(Dual-listed with 588). (Cross-listed with EE). (3-0) Cr. 3. Alt. F. offered  
2012. Prereq: MATH 265 and (MAT E 216 or 272 or EE 311 or PHYS 364)  
Electromagnetic fields of various eddy current probes. Probe field inter-  
action with conductors, cracks and other material defects. Ferromag-  
netic materials. Layered conductors. Elementary inversion of probe  
signals to characterize defects. Special techniques including remote-field,  
transient, potential drop nondestructive evaluation and the use of Hall  
sensors. Practical assignments using a ‘virtual’ eddy current instrument  
will demonstrate key concepts.

MAT E 490. Independent Study.  
Cr. arr. Repeatable.  
Investigation of individual research or special topics.

MAT E 498. Cooperative Education.  
Cr. R. Repeatable. F.S.SS. Prereq: 398, permission of department and  
Engineering Career Services  
Third and subsequent professional work periods in the cooperative  
education program. Students must register for this course before  
commencing work.
Graduate Study

The department offers work toward the following advanced degrees: Master of Engineering in Materials Science and Engineering, Master of Science in Materials Science and Engineering and Doctor of Philosophy in Materials Science and Engineering.

Built on a foundation of thermodynamics, kinetics of phase transformations, mechanical behavior, physical properties, solid state science, and the structure and chemistry of materials, the graduate program offers advanced studies in many areas of materials science and engineering, including the design and control of materials for structural, electronic, photonic, magnetic, optical, and biological functionality. Graduates of the program have a fundamental understanding of the critical aspects of the field and how they are applied to real materials systems. The program is highly flexible and research-oriented, where students work carefully with their major professor in tailoring the various academic and research components to meet their interests.

With the ability to address complex problems in materials science while considering the various constraints inherent to both academic and industrial environments, our graduates are well prepared for a wide range of academic and research-related careers. They are skilled in carrying out independent and collaborative research, able to communicate effectively in formal and informal settings, and are proficient at writing persuasive technical articles and grant proposals.

The department boasts excellent facilities for academic materials research, maintaining a wide range of faculty laboratories across the ISU campus. In addition, departmental research is highly integrated with the operation of several Research Centers, such as the Ames Laboratory, the Center for Nondestructive Evaluation, the Microelectronics Research Center, and the Center for Advanced Technology Development. These laboratories offer excellent resources and opportunities for graduate student research.

Prerequisite to major graduate work is completion of an undergraduate curriculum in physical science, biological science, or engineering discipline. Graduate students from disciplines other than materials science and engineering may expect that supplemental coursework will be needed, in addition to the required graduate coursework. Well qualified students (juniors) enrolled in the undergraduate materials engineering program at Iowa State University can apply to the Graduate College for admission to the concurrent enrollment program, where students may simultaneously pursue both master of science and bachelor of sciences degrees.

The requirements for the M. Eng., M.S. and Ph.D. degrees are established by the student’s program of study committee within the established guidelines of the Graduate College. Minimum requirements include coursework, research (M.S. and Ph.D. only), proposal (M.S. and Ph.D. only), preliminary oral examination (Ph.D. only), dissertation (M.S. and Ph.D. only), and a final oral examination (M.S. and Ph.D. only). Academic coursework requirements include 30 credits for the M.Eng. degree, 20 credits for the M.S. degree and 31 credits for the Ph.D., with additional specific rules for choices available from the department.

There are no foreign language requirements for either any of the graduate degrees administered by the Department of Materials Science and Engineering. Graduate students wishing to declare a formal minor in materials science and engineering will have at least one materials science and engineering faculty member serving on their program of study committee. For the M. Eng., M.S. and Ph.D. degrees, they will take a minimum of 8 materials science and engineering course credits for the M.Eng. or M.S. degrees and a minimum of 12 materials science and engineering course credits for the Ph.D. degree.

Courses primarily for graduate students, open to qualified undergraduate student

(3-0) Cr. 3. F. Prereq: MATH 165, PHYS 221, and CHEM 167

(Cross-listed with E E). (3-0) Cr. 3. Alt. F., offered 2011. Prereq: E E 311, Mat E 211 or 271 or 272 or PHYS 364

(3-0) Cr. 3. F. Prereq: MAT E 311 or Chem 321, MATH 266 or MATH 267
A review of the fundamental principles of heat, work, basic thermodynamic relations, and criteria for equilibrium. Analytical treatments for the thermodynamic description of multicomponent chemical solutions and reacting systems are developed and employed to predict phase equilibria in materials systems. Builds on the thermodynamic construction to treat the kinetics of chemical reactions and phase transformations. Topics include general first order and second order transitions, along with chemical diffusion. Detailed examples involving nucleation and diffusion limited growth, spinodal decomposition, martensitic transformations, magnetic and electric transitions, and glass formation will be considered.

M S E 521. Mechanical Behavior and Manufacturing of Polymers and Composites.
(Cross-listed with M E). (3-0) Cr. 3. Alt. S., offered 2013. Prereq: ME 324 or Mat E 272 and E M 324

(3-0) Cr. 3. S. Prereq: MAT E 334 or E E 332 or PHYS 322

(Cross-listed with E E). (3-0) Cr. 3. Prereq: 332 or Mat E 331 or PHYS 322
Review of classical and quantum mechanical descriptions of electrons in solids, band theory, metallic conduction, lattice vibrations, semiconductors, semiconductor devices, dielectrics, polarization, dielectric relaxation, crystal anisotropy, ferroelectricity, piezoelectricity, superconductivity, magnetism, device applications.
(3-0) Cr. 3. F. Prereq: MAT E 418, MATH 266 or MATH 267
Mechanical behavior of materials with emphasis on micromechanics of deformation in three generic regimes: elasticity, plasticity, and fatigue. A materials science approach is followed to understand and model the mechanical behavior that combines continuum mechanics, thermodynamics, kinetics, and microstructure. Some topics include elastic properties of materials, permanent deformation mechanisms at different temperatures (e.g., via dislocation motion and creep), and fracture in ductile and brittle materials. Specific classes of materials that are studied are: metals, ceramics, polymers, glasses, and composites.

(Cross-listed with E M). (3-2) Cr. 4. S. Prereq: E M 324, MATH 385 Principles of five basic NDE methods and their application in engineering inspections. Materials behavior and simple failure analysis. NDE reliability, and damage-tolerant design. Advanced methods such as acoustic microscopy, laser ultrasonics, thermal waves, computed tomography, and thermoelectrics are analyzed. Laboratory experiments on all basic methods: ultrasonics, eddy currents, x-ray, liquid penetrants, magnetic testing, and visual inspection are performed.

(2-3) Cr. 3. Prereq: MAT E 214 Characterization of ceramic, metal, polymer and glassy materials using modern analytical techniques. Spectroscopic (IR, Raman, UV/VIS/NIR, and NMR), thermal (DSC, DTA/TGA, and DTA methods, mechanical and rheological testing, magnetic and electrical characterization, and powder characterization.

M S E 553. Physical and Mechanical Properties of Polymers.
(Dual-listed with 453). (2-3) Cr. 3. F. Prereq: MAT E 351 Overview of polymer chemical composition, microstructure, thermal and mechanical properties, rheology, and principles of polymer materials selection. Intensive laboratory experiments include chemical composition studies, microstructural characterization, thermal analysis, and mechanical testing.

M S E 554. Polymer Composites and Processing.
(Dual-listed with 454). (3-0) Cr. 3. S. Prereq: MAT E 351 Basic concepts in polymer composites, blends, and block copolymers. Phase separation and miscibility, microstructures and mechanical behavior. Fiber reinforced and laminated composites. Viscosity, rheology, viscoelasticity of polymers. Polymer melt processing methods such as injection molding and extrusion; selection of suitable processing methods and their applications.

M S E 556. Biomaterials.
(Dual-listed with 456). (3-0) Cr. 3. S. Prereq: MAT E 216 or 272 or 392 Presentation of the basic chemical and physical properties of biomaterials, including metals, ceramics, and polymers, as they are related to their manipulation by the engineer for incorporation into living systems. Role of microstructure properties in the choice of biomaterials and design of artificial organs, implants, and prostheses.

M S E 564. Fracture and Fatigue.
(Cross-listed with E M, M E). (3-0) Cr. 3. F. Prereq: E M 324 and either MAT E 216 or 272 or 392. Undergraduates: Permission of instructor. Materials and mechanics approach to fracture and fatigue. Fracture mechanics, brittle and ductile fracture, fracture and fatigue characteristics, fracture of thin films and layered structures. Fracture and fatigue tests, mechanics and materials designed to avoid fracture or fatigue.

M S E 570. Toying With Technology for Practicing Teachers.
(Cross-listed with C I). (2-0) Cr. SS. Prereq: C I 201 A project-based, hands-on learning course. Technology literacy, appreciation for technological innovations, principles behind many technological innovations, hands-on experiences based upon simple systems constructed out of LEGO's and controlled by small microcomputers. Other technological advances with K-12 applications will be explored. K-12 teachers will leave the course with complete lesson plans for use in their classrooms.

(Dual-listed with 488). (Cross-listed with E E). (3-0) Cr. 3. Alt. F., offered 2011. Prereq: MAT E 216 and (MAT E 216 or 272 or E E 311 or PHYS 364) Electromagnetic fields of various eddy current probes. Probe field interaction with conductors, cracks and other material defects. Ferromagnetic materials. Layered conductors. Elementary inversion of probe signals to characterize defects. Special techniques including remote-field, transient, potential drop nondestructive evaluation and the use of Hall sensors. Practical assignments using a ‘virtual’ eddy current instrument will demonstrate key concepts.

M S E 590. Special Topics.
Cr. arr. Repeatable. Prereq: Permission of instructor

M S E 599. Creative Component.
Cr. arr. Repeatable.

Courses primarily for graduate students

(2-0) Cr. 2. Repeatable. F.S. Prereq: Permission of instructor
Provides instruction and directed experience in undergraduate level teaching practices. Students engage in lesson planning, classroom/laboratory teaching, student and course assessment, web-based lessons, and other aspects of academic course delivery.

(3-0) Cr. 3. Alt. S., offered 2012. Prereq: M S E 520 Explores various advanced theoretical treatments of the energetics and kinetics of multicomponent materials. Topics include analytical and computational descriptions of thermodynamic quantities, experimental measurement of essential physical properties, analytical and computational treatments of kinetic processes, and the use of theoretical predictions of phase equilibria and evolution in materials systems.

(3-0) Cr. 3. Alt. F., offered 2012. Prereq: M S E 530 Advanced course in the behavior of solids within the framework of solid state physics and chemistry. Includes magnetic, dielectric, transport, and optical phenomena in solids. Influence of phase transformations and crystal symmetry on the physical properties.
**M S E 651. Powder Diffraction Methods.**

(3-0) Cr. 3. S. Prereq: M S E 510

**M S E 690. Advanced Topics in Materials Science.**

Cr. arr. Repeatable. Prereq: Permission of instructor

**M S E 697. Engineering Internship.**

Cr. R. Repeatable. F.S.SS. Prereq: Permission of department, graduate classification
One semester and one summer maximum per academic year professional work period. Offered on a satisfactory-fail basis only.

**M S E 699. Research.**

Cr. arr. Repeatable.
Mechanical Engineering

Undergraduate Study

For the undergraduate curriculum in mechanical engineering leading to the degree bachelor of science. This curriculum is accredited under the General Criteria and Mechanical Engineering Program Criteria by the Engineering Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012 - telephone: (410) 347-7700, http://www.abet.org.

Mechanical engineers apply the principles of motion, energy, and force to create mechanical solutions to technological problems, thereby realizing devices and systems that make life better. About one-fifth of all engineers practicing today are mechanical engineers. Their skills are used in research, development, design, testing, production, technical sales, technical management, as well as medicine, law, and business. Mechanical engineers are characterized by personal creativity, breadth of knowledge, and versatility. For these reasons they are found to function and thrive as valuable members and leaders of multidisciplinary teams. Mechanical engineers are employed in a wide range of industries; examples include agricultural/heavy equipment, biomedical, consulting, energy and power, manufacturing, product design and transportation.

The mechanical engineering curriculum at Iowa State University is dedicated to preparing students for productive careers in the state, nation, and the world and has the following objectives:

1. Graduates will utilize a foundation in engineering and science to improve lives and livelihoods through a successful career in mechanical engineering or other fields.
2. Graduates will be effective collaborators and innovators, leading or participating in efforts to address social, technical and business challenges.
3. Graduates will engage in life-long learning and professional development through self-study, continuing education or graduate and professional studies in engineering, business, law or medicine.

The mechanical engineering curriculum is organized to provide students with a broad foundation in mathematics, science, engineering, social science and humanities. The mechanical engineering disciplinary areas emphasized are design and optimization, dynamic systems and control, materials processing and mechanics, and thermo-fluid sciences. Elective courses provide additional emphasis in terms of the student’s unique educational goals, whether they include immediate entry into industry or further professional or graduate study.

A major focus throughout the mechanical engineering curriculum is a series of experiences that emphasize engineering design, culminating in a capstone design experience in the senior year. Students will develop engineering judgment through open-ended problems that require establishment of reasonable engineering assumptions and realistic constraints. Development of skills needed to be independent, creative thinkers, effective communicators, and contributing team members is emphasized throughout the curriculum. Students also develop an understanding of the societal context in which they will practice engineering, including environmental, legal, aesthetic, and human aspects.

Students are encouraged to participate in the cooperative education program or to obtain engineering internships, both domestically and abroad. Study abroad is encouraged, and the department has exchange programs with several universities around the world. These experiences help students to round out their education and to better prepare for careers in the increasingly global practice of engineering.

Graduate Study

The department offers programs for the degrees Master of Engineering (M.Eng.), Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) with a major in mechanical engineering. The M.Eng. degree is a coursework-only degree designed to improve professional expertise in mechanical engineering. The M.S. and Ph.D. degrees are designed to improve the student’s capability to conduct research as well as their professional expertise. Although co-major and formal minor programs are not offered in mechanical engineering, courses may be used for minor work by students taking major work in other departments.

The graduate program offers advanced study in a variety of thrust areas, including biological and nanoscale sciences, clean energy technologies, complex fluid systems, design and manufacturing innovation, and simulation and visualization.

The department offers students the opportunity to broaden their education by participating in minor programs in established departments, interdepartmental programs, or other experiences as approved by their program of study committees.

The requirements for advanced degrees are established by the student’s program of study committee within established guidelines of the Graduate College. Graduate students who have not completed an undergraduate program of study substantially equivalent to that required of undergraduate students in the department can expect that additional supporting coursework will be required.

Program requirements can be found on the department webpage (www.me.iastate.edu) and in the Mechanical Engineering Graduate Student Handbook.

Curriculum in Mechanical Engineering

Administered by the Department of Mechanical Engineering. Leading to the degree bachelor of science.

Total credits required: 129.5 cr. See also Basic Program and Special Programs.

International Perspectives: 3 cr.1
U.S. Diversity: 3 cr.1
Communication Proficiency/Library requirement (minimum grade of C):

1. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Nuclear Engineering Minor

The nuclear engineering minor is administered by the mechanical engineering department and is open to all undergraduates in the College of Engineering. The minor may be earned by completing 15 credits from the following courses:

<table>

Co-op/Internship optional

1. 1 These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program.

U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.

2. Choose from department approved list.

3. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

4. 2.00 GPA average required including transfer courses.

Transfer Credit Requirements
The Mechanical Engineering Department requires a grade of a C or better for any transfer credit course that is applied to the degree program.

The degree program must include a minimum of 15 credits taken from courses offered through the Mechanical Engineering Department at Iowa State University. Of these 15 credits, three must be from one of the senior capstone design courses. The remaining 12 credits may be from the core curriculum program (if a student is deficient in these courses) or from 400-level M E technical electives. No more than 3 credits of M E 490 Independent Study (independent study) shall be applied to meet the 12 credit requirement.

Courses primarily for undergraduate students

M E 102. Mechanical Engineering Orientation.
Cr. R. F.S. (1-0) Information concerning university, college, and departmental policies and procedures. Information on cooperative, intern, summer and career placement. Review of degree audit and registration.

(2-2) Cr. 3. F.S. Prereq: Satisfactory scores on mathematics placement assessments; credit or enrollment in MATH 142

Integration of fundamental graphics, computer modeling, and engineering design. Applications of multiview drawings and dimensioning. Techniques for visualizing, analyzing, and communicating 3-D geometries. Application of the design process including written and oral reports. Free-hand and computer methods.

M E 190. Learning Communities.

Prereq: Sophomore classification
Cr. R. F.S. Preparation for a career in mechanical engineering; discussion of opportunities for leadership, undergraduate research, experiential learning.

M E 220. Globalization and Sustainability.
Cr. R. F.S. (3-0) Cross-listed with ANTHR, ENV S, GLOBE, MAT E, SOC, T SC. Meets International Perspectives Requirement.

M E 231. Engineering Thermodynamics I.
(3-0) Cr. 3. F.S. Prereq: MATH 265, CHEM 167, PHYS 222

Fundamental concepts based on zeroth, first and second laws of thermodynamics. Properties and processes for ideal gases and solid-liquid-vapor phases of pure substances. Applications to vapor power cycles. Credit for either M E 231 or 330, but not both, may be applied toward graduation.
**M E 270. Introduction to Mechanical Engineering Design.**

(1-6) Cr. 3. F.S. Prereq: M E 170 or equivalent, PHYS 221
Overview of mechanical engineering design with applications to thermal and mechanical systems. Introduction to current design practices used in industry. Semester-long team project focused on addressing societal needs. Past projects include designing human powered charging systems and products for developing nations.

Meets International Perspectives Requirement.

**M E 298. Cooperative Education.**

Cr. R. F.S.SS. Prereq: Permission of department
First professional work period in the cooperative education program. Students must register for this course before commencing work.

**M E 324. Manufacturing Engineering.**

(3-2) Cr. 4. F.S. Prereq: 270, E M 324, Mat E 272
Plastic deformation and work hardening. Manufacturing processes including forming, machining, casting and welding with emphasis on manufacturing considerations in design. Modern manufacturing practices. Laboratory exercises will be an integral component of the course. Nonmajor graduate credit.

**M E 325. Machine Design.**

(3-0) Cr. 3. F.S. Prereq: Engr 170, E M 324, STAT 305
Philosophy of design and design methodology. Consideration of stresses and failure models useful for static and fatigue loading. Analysis, selection and synthesis of machine elements. Nonmajor graduate credit.

**M E 332. Engineering Thermodynamics II.**

(3-0) Cr. 3. F.S. Prereq: 231
Gas power cycles. Fundamentals of gas mixtures, psychrometry, and thermochemistry. Applications to one-dimensional compressible flow, refrigeration, air conditioning and combustion processes. Nonmajor graduate credit.

**M E 335. Fluid Flow.**

(3-2) Cr. 4. F.S. Prereq: Credit or enrollment in 332 and 370, E M 345, MATH 266 or 267
Incompressible and compressible fluid flow fundamentals. Dimensional analysis and similitude. Internal and external flow applications. Lab experiments emphasizing concepts in thermodynamics and fluid flow. Written reports are required. Nonmajor graduate credit.

**M E 370. Engineering Measurements.**

(2-3) Cr. 3. F.S. Prereq: E E 442, STAT 305

**M E 388. Sustainable Engineering and International Development.**

(Cross-listed with A E, C E, E E, MAT E). (2-2) Cr. 3. F. Prereq: Junior classification in engineering
Multi-disciplinary approach to sustainable engineering and international development, sustainable development, appropriate design and engineering, feasibility analysis, international aid, business development, philosophy and politics of technology, and ethics in engineering. Engineering-based projects from problem formulation through implementation. Interactions with partner community organizations or international partners such as nongovernment organizations (NGOs). Course readings, final project/design report.

Meets International Perspectives Requirement.

**M E 389. Applied Methods in Sustainable Engineering.**

(Cross-listed with MAT E). (3-0) Cr. 3. Repeatable, maximum of 2 times. SS.
Learning how to work in a cross disciplinary engineering team to develop and implement appropriate solutions for cooking, lighting, farming, and sanitation in a rural village in Mali. Engineering principles necessary for the projects to be worked on including lighting solutions in a village without electricity, new construction materials, water, etc. Application of engineering principles from core courses. Design conception, feasibility, production, and implementation within context of local cultures and needs. Emphasis on creating real solutions that can be implemented with the constraints imposed by cost, time, manufacturing capability, and culture.

Meets International Perspectives Requirement.

**M E 396. Summer Internship.**

Cr. R. Repeatable. SS. Prereq: Permission of department and Engineering Career Services
Summer professional work period.

**M E 397. Engineering Internship.**

Cr. R. Repeatable. F.S. Prereq: Permission of department and Engineering Career Services
Professional work period, one semester maximum per academic year.

**M E 398. Cooperative Education.**

Cr. R. F.S.SS. Prereq: 298, permission of department and Engineering Career Services
Second professional work period in the cooperative education program. Students must register for this course before commencing work.

**M E 410. Mechanical Engineering Applications of Mechatronics.**

(2-2) Cr. 3. S. Prereq: E E 442, 448, credit or enrollment in 421
Fundamentals of sensor characterization, signal conditioning and motion control, coupled with concepts of embedded computer control. Digital and analog components used for interfacing with computer controlled systems. Mechanical system analysis combined with various control approaches. Focus on automation of hydraulic actuation processes. Laboratory experiences provide hands-on development of mechanical systems. Nonmajor graduate credit.

**M E 411. Automatic Controls.**

(2-2) Cr. 3. F. Prereq: 421
Methods and principles of automatic control. Pneumatic, hydraulic, and electrical systems. Representative applications of automatic control systems. Mathematical analysis of control systems. Nonmajor graduate credit.

**M E 412. Ethical Responsibilities of a Practicing Engineer.**

(3-0) Cr. 3. F. Prereq: Credit or enrollment in 325
The study of ethics in engineering design and the engineering profession. A comprehensive look at when ethical decisions must be made and an approach to make them. The approach takes into account moral, legal, technical, experiential, and standards to aid in ethical decision making. Each area will be studied through lectures, debates, guest speakers, class discussion, and case studies. Nonmajor graduate credit.

**M E 413. Fluid Power Engineering.**

(Cross-listed with A E). (2-2) Cr. 3. F. Prereq: Credit or enrollment in 335 or E M 378, A E 216 or M E 270

**M E 414. Hydraulic Systems and Control.**

(3-0) Cr. 3. F. Prereq: 421, 335
Characteristics of hydraulic motors and pumps, system components, system analysis, feedback control and stability, control circuits, computer simulation. Nonmajor graduate credit.
M E 415. Mechanical Systems Design.
(0-6) Cr. 3. F.S. Prereq: M E 324, M E 325
Mechanical Engineering Capstone Design course. Team approach to solving design problems involving mechanical systems. Teams will use current design practices they will encounter in industry. Document decisions concerning form and function, material specification, manufacturing methods, safety, cost, and conformance with codes and standards. Solution description includes oral and written reports. Projects often worked with industry sponsors. Nonmajor graduate credit.

(Dual-listed with 517). (3-0) Cr. 3. S. Prereq: 325, Mat E 272
Stress life, strain life, and fracture mechanics approaches to fatigue life and design with metals, polymers and ceramics. Introduction to material selection in design of machine components. Thermal and structural considerations in design of machine components and hybrid materials. Course project and relevant literature review required for graduate credit. Nonmajor graduate credit.

M E 418. Mechanical Considerations in Robotics.
(3-0) Cr. 3. S. Prereq: Credit or enrollment in 421
Three dimensional kinematics, dynamics, and control of robot manipulators, hardware elements and sensors. Laboratory experiments using industrial robots. Nonmajor graduate credit.

(3-0) Cr. 3. F. Prereq: M E 325
The use of high level technical computing software in mechanical systems design. Data analysis, visualization, numerical computation, graphical simulation, optimization, system synthesis and manufacturing integration. Involves case studies. Nonmajor graduate credit. Nonmajor graduate credit.

M E 421. System Dynamics and Control.
(3-2) Cr. 4. F.S. Prereq: E E 442, E E 448, E M 345, MATH 267
Modeling and simulation of mechanical, electrical, fluid, and/or thermal systems. Development of equations of motion and dynamic response characteristics in time and frequency domains. Fundamentals of classical control applications, including mathematical analysis and design for closed loop control systems. Introduction to computer interfacing for simulation, data acquisition, and control. Laboratory exercises for hands-on system investigation and control implementation. Nonmajor graduate credit. Nonmajor graduate credit.

M E 423. Creativity and Imagination for Engineering and Design.
(3-0) Cr. 3. F. Prereq: Permission of instructor required
Provides broad exposure to the study of creativity, both in scientific research and in engineering design practice. Exploration of the subject includes readings from a variety of fields; in-class discussion and activities; and individual and team projects that enable students to develop their creativity. Graduate students will also do independent research on creativity and develop a related teaching module.

(Dual-listed with 525). (3-0) Cr. 3. S. Prereq: ENGR 160, MATH 265
Optimization involves finding the ‘best’ according to specified criteria. Review of a range of optimization methods from traditional nonlinear to modern evolutionary methods such as Genetic algorithms. Examination of how these methods can be used to solve a wide variety of design problems across disciplines, including mechanical systems design, biomedical device design, biomedical imaging, and interaction with digital medical data. Students will gain knowledge of numerical optimization algorithms and sufficient understanding of the strengths and weaknesses of these algorithms to apply them appropriately in engineering design. Experience includes code writing and off-the-shelf routines. Numerous case-studies of real-world situations in which problems were modeled and solved using advanced optimization techniques. Nonmajor graduate credit.

(3-0) Cr. 3. F. Prereq: PHYS 221/222 and CHEM 167
Basic principles, thermodynamics, and performance of practical alternative energy conversion technologies including fuel cells, photovoltaics, wind energy, biomass energy, and non-combustion thermal sources. Performance analysis and operating principles of systems and components, economic analysis for system design and operation. Nonmajor graduate credit. Nonmajor graduate credit.

(3-2) Cr. 4. F.S.SS. Prereq: ME 335

(3-0) Cr. 3. F. Prereq: Credit or enrollment in 436
Space conditioning and moist air processes. Application of thermodynamics, heat transfer, and fluid flow principles to the analysis of heating, ventilating, and air conditioning components and systems. Performance and specification of components and systems. Nonmajor graduate credit.

M E 442. Heating and Air Conditioning Design.
(1-5) Cr. 3. S. Prereq: 441

M E 444. Elements and Performance of Power Plants.
(3-0) Cr. 3. S. Prereq: 332, credit or enrollment in 335
Basic principles, thermodynamics, engineering analysis of power plant systems. Topics include existing power plant technologies, the advanced energyplex systems of the future, societal impacts of power production, and environmental and regulatory concerns. Nonmajor graduate credit.

M E 446. Power Plant Design.
(2-2) Cr. 3. F. Prereq: 332, credit or enrollment in 335
Design of a power plant to meet regulatory, cost, fuel, and output needs. Selection and synthesis of principal components. Oral and written reports required. Nonmajor graduate credit.

M E 448. Fluid Dynamics of Turbomachinery.
(Cross-listed with AER E). (3-0) Cr. 3. Prereq: M E 335 or equivalent
Applications of principles of fluid mechanics and thermodynamics in performance analysis and design of turbomachines and related fluid system components. Nonmajor graduate credit.

(3-1) Cr. 3. F. Prereq: M E 335
Basic principles, thermodynamics, combustion, and exhaust emissions of spark-ignition and compression-ignition engines. Laboratory determination of fuel properties and engine performance. Thermodynamic and mechanical design of engine components to meet specified performance requirements. Oral and written reports required. Nonmajor graduate credit. Nonmajor graduate credit.

M E 450. Engineering Vibrations.
(Cross-listed with E M). (3-0) Cr. 3. F. Prereq: E M 324 and 345
Elementary vibration analysis, single and multiple degrees of freedom, energy methods, free and forced vibrations, viscous and other forms of damping transform methods and response to periodic and random force inputs, numerical methods of solution, eigenvalues and modal analysis, energy methods, vibration isolation and suppression, string or cable dynamics, beam bending dynamics, application problems in aerospace and mechanical engineering (as relevant). Nonmajor graduate credit.
(Cross-listed with E M). (2-2) Cr. 3. Alt. S., offered 2012. Prereq: PHYS 221 and MATH 266 or 267.

M E 466. Multidisciplinary Engineering Design.
(Cross-listed with A E, AER E, CPR E, E E, ENGR, I E, MAT E). (1-4) Cr. 3. Repeatable. F.S. Prereq: Student must be within two semesters of graduation and permission of instructor
Application of team design concepts to projects of a multidisciplinary nature. Concurrent treatment of design, manufacturing and life cycle considerations. Application of design tools such as CAD, CAM and FEM. Design methodologies, project scheduling, cost estimating, quality control, manufacturing processes. Development of a prototype and appropriate documentation in the form of written reports, oral presentations, computer models and engineering drawings.

M E 475. Modeling and Simulation.
(3-0) Cr. 3. S. Prereq: 421, credit or enrollment in 436
Introduction to computer solution techniques required to simulate flow, thermal, and mechanical systems. Methods of solving ordinary and partial differential equations and systems of algebraic equations; interpolation, numerical integration; finite difference and finite element methods. Nonmajor graduate credit.

M E 484. Technology, Globalization and Culture.
(Dual-listed with 584). (Cross-listed with WLC). (3-0) Cr. 3. F. Prereq: senior classification for 484; graduate classification for 584
Cross-disciplinary examination of the present and future impact of globalization with a focus on preparing students for leadership roles in diverse professional, social, and cultural contexts. Facilitate an understanding of the threats and opportunities inherent in the globalization process as they are perceived by practicing professionals and articulated in debates on globalization. Use of a digital forum for presenting and analyzing globalization issues by on-campus and off-campus specialists.

Meets International Perspectives Requirement.

M E 486. Appropriate Technology Design.
(3-0) Cr. 3. F. Prereq: M E 231, M E 270, enrollment in M E 335; or permission of instructor.
Hands-on design experience utilizing knowledge acquired in core mechanical engineering courses. Emphasis with engineering problem formulation and solution, oral and written communication, team decision-making and ethical conduct. Design projects include engineering considerations in appropriate technology which have multidisciplinary components in economics and sociology.

M E 490. Independent Study.
Cr. 1-6. Repeatable. Prereq: Senior classification
Investigation of topics holding special interest of students and faculty. Election of course and topic must be approved in advance by supervising faculty.

C. Engineering Measurements and Instrumentation
D. Heat Transfer
E. Fluid Power and Controls
F. Machines and Systems
G. Materials and Manufacturing Processes
H. Honors
J. Thermodynamics and Energy Utilization
K. Fluid Mechanics
L. Turbomachinery
M. Nuclear Engineering
N. CAD/CAM

M E 498. Cooperative Education.
Cr. R. Repeatable. F.S.S. Prereq: 298, permission of department and Engineering Career Services
Third and subsequent professional work periods in the cooperative education program. Students must register for this course before commencing work.

Courses primarily for graduate students, open to qualified undergraduate students

M E 511. Advanced Control Design.
(3-0) Cr. 3. S. Prereq: 411
Application of control design methods using continuous, discrete, and frequency-based models. Approaches include classical, pole assignment, model reference, internal model, and adaptive control methods. Mechanical design projects.

(Dual-listed with 417). (3-0) Cr. 3. S. Prereq: 325, Mat E 272
Stress life, strain life, and fracture mechanics approaches to fatigue life and design with metals, polymers and ceramics. Introduction to material selection in design of machine components. Thermal and structural considerations in design of machine components and hybrid materials. Course project and relevant literature review required for graduate credit.

M E 520. Material and Manufacturing Considerations in Design.
(3-0) Cr. 3. F. Prereq: 324, 325

M E 521. Mechanical Behavior and Manufacturing of Polymers and Composites.
(Cross-listed with M S E). (3-0) Cr. 3. Alt. S., offered 2013. Prereq: 324 or Mat E 272 and E M 324

(Dual-listed with 425). (Cross-listed with HCl). (3-0) Cr. 3. S. Prereq: ENGR 160, MATH 265
Optimization involves finding the ‘best’ according to specified criteria. Review of a range of optimization methods from traditional nonlinear to modern evolutionary methods such as Genetic algorithms. Examination of how these methods can be used to solve a wide variety of design problems across disciplines, including mechanical systems design, biomedical device design, biomedical imaging, and interaction with digital medical data. Students will gain knowledge of numerical optimization algorithms and sufficient understanding of the strengths and weaknesses of these algorithms to apply them appropriately in engineering design. Experience includes code writing and off-the-shelf routines. Students will also be exposed to numerous case-studies of real-world situations in which problems were modeled and solved using advanced optimization techniques.

(3-0) Cr. 3. Alt. S., offered 2013. Prereq: 324
M E 528. Micro/Nanomanufacturing.  
(3-0) Cr. 3. Alt. S., offered 2012. Prereq: 324  
Concepts and applications of micro/nanotechnology appropriate to the manufacturing field. An overview of micro/nano-fabrication techniques including mechanical, EDM, laser and lithography. MEMS device fabrication. Scaling laws. Top down and bottom up approaches of nanomanufacturing. Experimental or theoretical project leading to potential submission of a manuscript for journal or conference.

M E 530. Advanced Thermodynamics.  
(3-0) Cr. 3. F, Prereq: 332  
Fundamentals of thermodynamics from the classical viewpoint with emphasis on the use of the first and second laws for analysis of thermal systems. Generalized thermodynamic relationships. Computer applications of thermodynamic properties and system analysis. Selected topics.

(Cross-listed with AER E).  
(3-0) Cr. 3. S, Prereq: 311 or M E 335  
Thermodynamics of compressible flow. Viscous and inviscid compressible flow equations. One dimensional steady flow; isentropic flow, normal shock waves oblique and curved shocks, constant area flow with friction and heat transfer. Linear theory and Prandtl-Glauert similarity. Method of characteristics. Subsonic, transonic, supersonic and hypersonic flows.

M E 535. Thermochemical Processing of Biomass.  
(Cross-listed with BRT).  
(3-0) Cr. 3. S. Prereq: Undergraduate course work in thermodynamics and transport phenomena. Introduction to thermal and catalytic processes for the conversion of biomass to biofuels and other biobased products. Topics include gasification, fast pyrolysis, hydrothermal processing, syngas to synfuels, and bio-oil upgrading. Application of thermodynamics, heat transfer, and fluid dynamics to bioenergy and biofuels.

(3-0) Cr. 3. S. Prereq: 436  
Advanced treatment of heat transmission by conduction, convection, and radiation.

(3-0) Cr. 3. F, Prereq: Credit or enrollment in 436  
Detailed analysis of incompressible/compressible, viscous/inviscid, laminar/turbulent, and developing fluid flows on a particle/point control volume basis.

(3-0) Cr. 3. Alt. F, offered 2011. Prereq: 436  
Application of heat transfer, thermodynamics and photovoltaics to the design and analysis of solar energy collectors and systems.

(3-0) Cr. 3. S, Prereq: 332 or CH E 381  

M E 543. Introduction to Random Vibrations and Nonlinear Dynamics.  
(Cross-listed with E M).  
(3-0) Cr. 3. Alt. S., offered 2013. Prereq: E M 444  
Vibrations of continuous systems. Nonlinear vibration phenomena, perturbation expansions; methods of multiple time scales and slowly-varying amplitude and phase. Characteristics of random vibrations; random processes, probability distributions, spectral density and its significance, the normal or Gaussian random process. Transmission of random vibration, response of simple single and two-degree-of-freedom systems to stationary random excitation. Fatigue failure due to random excitation.

M E 545. Thermal Systems Design.  
(3-0) Cr. 3. Alt. F, offered 2012. Prereq: 436  
Integrating thermodynamics, fluid mechanics, and heat transfer to model thermal equipment and to simulate thermal systems. Second law and parametric analysis; cost estimation, life cycle analysis and optimization. Some computer programming required.

(Cross-listed with AER E).  
(3-0) Cr. 3. F, Prereq: Credit or enrollment in 538 or AER E 541, programming language  

M E 547. Computational Fluid Mechanics and Heat Transfer II.  
(Cross-listed with AER E).  
(3-0) Cr. 3. S, Prereq: 546 or AER E 546  
Application of computational methods to current problems in fluid mechanics and heat transfer. Methods for solving the Navier-Stokes and reduced equation sets such as the Euler, boundary layer, and parabolized forms of the conservation equations. Introduction to relevant aspects of grid generation and turbulence modeling.

M E 552. Advanced Acoustics.  
(Cross-listed with E M).  
(3-0) Cr. 3. Alt. F, offered 2011. Prereq: 451  
Theoretical acoustics: wave propagation in fluids; acoustic radiation, diffraction and scattering; nonlinear acoustics; radiation force; cavitation; and ray acoustics.

(Cross-listed with CPR E, COM SI).  
(3-0) Cr. 3. F, Prereq: 421, programming experience in C  

M E 561. Scanning Probe Microscopy.  
(2-1) Cr. 3. Alt. F, offered 2012. Prereq: First year physics, chemistry  
Introduction to the scanning probe microscope (SPM, also known as atomic force microscope or AFM) and associated measurement techniques. Overview or instrumentation system, basic principles of operation, probe-sample interaction and various operational modes to obtain micro/nanoscale structure and force spectroscopy of material surfaces. Examples of SPM significance and applications in science and engineering research, nanotechnology and other industries. Laboratory work involving use of a scanning probe microscope system is an integral part of the course.

(3-0) Cr. 3. Alt. F, offered 2011. Prereq: E M 324 and M E 325  
Review of Fundamentals: (Elasticity, Electromagnetism, Mechanical response), Mechanics of thermally, electrostatically and magnetically actuated microsystems, Mechanics and design of nanostructured materials, mechanics of surface stress engineering and its implications to sensors and thin film structures.

M E 564. Fracture and Fatigue.  
(Cross-listed with E M, M S E).  
(3-0) Cr. 3. F, Prereq: E M 324 and either MAT E 216 or 272 or 392. Undergraduates: Permission of instructor  
Materials and mechanics approach to fracture and fatigue. Fracture mechanics, brittle and ductile fracture, fracture and fatigue characteristics, fracture of thin films and layered structures. Fracture and fatigue tests, mechanics and materials designed to avoid fracture or fatigue.

(Cross-listed with AGRON, AN S, BCB, CH E, CPR E, EEB, HORT, MICRO, PL P V MPM). Cr. art. Prereq: Graduate classification  
Professional, ethical and legal issues facing scientists and engineers in academia. Offered in modular format.

A. Responsible Conduct of Research. (Cr. 1.0).  
B. Working with Industry. (Cr. 0.5).

C. Communications in Science. (Cr. 0.5).  
D. Time Management and Mentoring. (Cr. 0.5).

E. The Interview Process. (Cr. 0.5).  
F. Grant Writing. (Cr. 1.0).  
G. Ethics and Integrity in Research. (Cr. 0.5).
G. Teaching. (Cr. 0.5). Preparation of a teaching portfolio and course materials; lecturing, technology.
S. Ethical and legal issues in research.
S. Establishing productive collaborations with industry.

(Cross-listed with AER E, E E, MATH). (3-0) Cr. 3. F. Prereq: E E 324 or AER E 331 or M E 370 or 411 or MATH 341 or 395

M E 574. Optimal Control.
(Cross-listed with AER E, E E, MATH). (3-0) Cr. 3. S. Prereq: E E 577

M E 575. Introduction to Robust Control.
(Cross-listed with AER E, E E, MATH). (3-0) Cr. 3. F. Prereq: E E 577

(Cross-listed with AER E, E E, MATH). (3-0) Cr. 3. F. Prereq: E E 475 or AER E 432 or M E 411 or 414 or MATH 415; and MATH 267

M E 577. Linear Systems.
(Cross-listed with AER E, E E, MATH). (3-0) Cr. 3. F. Prereq: E E 324 or AER E 331 or M E 411 or MATH 415; and MATH 307

(Cross-listed with AER E, E E, MATH). (3-0) Cr. 3. S. Prereq: E E 577

M E 584. Technology, Globalization and Culture.
(Dual-listed with 484). (Cross-listed with WLCL). (3-0) Cr. 3. F. Prereq: senior classification for 484; graduate classification for 584
Cross-disciplinary examination of the present and future impact of globalization with a focus on preparing students for leadership roles in diverse professional, social, and cultural contexts. Facilitate an understanding of the threats and opportunities inherent in the globalization process as they are perceived by practicing professionals and articulated in debates on globalization. Use of a digital forum for presenting and analyzing globalization issues by on-campus and off-campus specialists.

Meets International Perspectives Requirement.

M E 590. Special Topics.
Cr. 1-8. Repeatable.
A. Experimental Gas Dynamics
B. Fluid Mechanics
C. Heat Transfer

D. Thermodynamics and Energy Utilization
E. Turbomachinery
F. Vehicular Propulsion Systems
G. Advanced Machine Design
H. Automotive Engineering
I. Automatic Controls
J. Operating and Environmental Considerations in Design
K. Mechanical Behavior of Materials
L. Manufacturing Processes
M. Tribology
N. Sensitivity Methods
O. Engineering Computation
P. Engineering Measurements and Instrumentation
Q. Independent Literature Investigation
R. Nuclear Engineering
S. CAD/CAM
I. Automatic Controls
J. Operating and Environmental Considerations in Design
K. Mechanical Behavior of Materials
L. Manufacturing Processes
M. Tribology
N. Sensitivity Methods
O. Engineering Computation
P. Engineering Measurements and Instrumentation
Q. Independent Literature Investigation
R. Nuclear Engineering
S. CAD/CAM

**M E 697. Engineering Internship.**
Cr. R. Repeatable. *Prereq: Permission of Director of Graduate Education, graduate classification*
One semester and one summer maximum per academic year professional work period. Offered on a satisfactory-fail basis only.

**M E 699. Research.**
Cr. arr. Repeatable.
Offered on a satisfactory-fail basis only.
Minor supervised by an interdisciplinary faculty committee, administered by Aerospace Engineering.

The NDE minor is a unique opportunity for engineering students to acquire a multi-disciplinary engineering qualification in the rapidly emerging field of Nondestructive Evaluation.

Undergraduate Study

Students interested in completing the NDE engineering minor must be enrolled in the College of Engineering at Iowa State University. They must submit the “Request for a Minor” form and complete the minimum prescribed 16 credit-hours of course work defined below. Acceptance is based on approval by the administering department, Aerospace Engineering.

The course requirements for the undergraduate minor in NDE are:

A combined average grade of C or higher is required in courses applied to the minor and the minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.
The nuclear engineering undergraduate minor allows engineering students to acquire a formal background in nuclear engineering topics that will not only benefit them, but also fulfill a societal need for future hiring of engineers. Through this program, students can enroll in a formal minor that enables them to acquire a basic and fundamental knowledge of nuclear sciences and engineering, thus enabling them to pursue employment in any one of a number of fields associated with the construction, operation or regulation of nuclear power generation.

Students completing this minor acquire a body of knowledge in the fundamentals of nuclear science and engineering. The required courses selected ensure that all graduates of the nuclear engineering minor obtain a minimum body of knowledge in nuclear science and engineering that would allow them to apply their specialized field of engineering knowledge to nuclear-related applications, such as nuclear plant and site construction, nuclear power plant operations, nuclear safety and radiation protection.

The supporting courses that are listed in this program provide an opportunity for students to build upon the knowledge gained in the required courses by taking either more advanced courses or more specialized courses dealing with specific areas of nuclear engineering.

Undergraduate Study

Students interested in completing the nuclear engineering minor must be enrolled in the College of Engineering at Iowa State University. They should complete and submit the “Request for Minor” form. The selection process is based on approval by the administering department, Mechanical Engineering.

The minor must include at least nine credits which are beyond the total used to meet curriculum requirements for the bachelor's degree in engineering.

Nuclear engineering courses are provided through an inter-institutional distance education program offered through the Web. Some of the courses that comprise this minor are offered at Iowa State University, while others are offered through four of the Big 12 Engineering Consortium universities that have formal nuclear engineering departments or programs. The four universities offering an assortment of nuclear engineering courses via web-based distance education are Texas A & M (TAMU), the University of Missouri Columbia (UJC), Kansas State University (KSU) and the University of Texas at Austin (UTA).

Courses primarily for undergraduate students

(3-0) Cr. 3. F. Prereq: PHYS 222, MATH 266 or 267  
Undergraduate Study

For the undergraduate curriculum in software engineering leading to the degree Bachelor of Science.

This curriculum is jointly administered by the Department of Electrical and Computer Engineering (ECpE) Department and the Department of Computer Science (CS) Department at Iowa State University, and it provides undergraduate students with the opportunity to learn software engineering fundamentals, to study applications of the state-of-the art software technologies, and to prepare for the practice of software engineering. The student-faculty interaction necessary to realize this opportunity occurs within an environment that is motivated by the principle that excellence in undergraduate education is enhanced by an integrated commitment to successful, long-term research and outreach programs.

The software engineering curriculum offers emphasis areas in software engineering principles, process, and practice. Students may also may take elective courses in computer engineering and computer science.

The objective of the software engineering program at Iowa State University is that its graduates should demonstrate expertise, engagement, learning, leadership, and teamwork within five years after graduation.

- **Expertise:** Graduates should establish peer-recognized expertise used for problem solving in specification, abstraction, analysis, design, implementation, testing and validation, evaluation, evolution, and maintenance of software systems following the real-world practices of project management, system integration, and use of tools and their development. Graduates should establish peer-recognized expertise together with the ability to articulate that expertise and use it for problem solving in the planning, design, development, validation, and evolution of software using contemporary practices.

- **Engagement:** Graduates should be engaged in the professional practice, locally and globally, contributing through the ethical, competent, and creative practice of Software software engineering in industry, academia, or the public sector, or graduates may use the program as a foundation for interdisciplinary careers in business, law, medicine, or public service, or higher education.

- **Learning:** Graduates should demonstrate sustained learning through graduate work or professional improvement opportunities and through self study, and they should demonstrate the ability to adapt to rapid technological changes.

- **Leadership:** Graduates should exhibit leadership and initiative to advance professional and organizational goals, facilitate the achievements of others, and obtain results.

- **Teamwork:** Graduates should demonstrate effective teaming and commitment to working with others of diverse cultural and interdisciplinary background by applying software engineering abilities, communication skills, and knowledge of contemporary and global issues.

As a complement to the instructional activity, the Electrical and Computer Engineering and Computer Science (ECpE) and CS Departments provide opportunities for each student to have experience with broadening activities. Through the cooperative education and internship program, students have the opportunity to participate in advanced research activities, and through international exchange programs, students learn about engineering practices in other parts of the world.

Curriculum in Software Engineering

Administered by the Department of Electrical and Computer Engineering and the Department of Computer Science in the College of Liberal Arts and Sciences.

Leading to the degree bachelor of science.

**Total credits required:** 124.5 cr. See also Basic Program and Special Programs.

**International Perspectives:** 3 cr.1

**U.S. Diversity:** 3 cr.1

Transfer Credit Requirements

The degree program must include a minimum of 30 credits at the 300-level or above in professional and technical courses earned at ISU in order to receive a B.S. in software engineering. These 30 credits must include S E 491 Senior Design Project I and Professionalism, S E 492 Senior Design Project II, and credits in the core professional curriculum and/or in technical electives. The software engineering degree program requires a grade of C or better for any transfer credit course that is applied to the degree program.

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.
2. Choose from department approved lists.
3. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.
4. 2.00 required including transfer courses.
5. Credit for only one of the following is allowed:
   - CPR E 381 Computer Organization and Assembly Level Programming (4)
   - or COM S 321 Introduction to Computer Architecture and Machine-Level Programming
6. Credit for only one of the following is allowed:
   - CPR E 308 Operating Systems: Principles and Practice (4)
   - or COM S 352 Introduction to Operating Systems
7. Credit for only one of the following is allowed:
   - CPR E 310 Theoretical Foundations of Computer Engineering (3)
   - or COM S 330 Discrete Computational Structures

Note: International perspectives and U.S. diversity courses are used to meet the general education electives.

Courses primarily for undergraduate students

Cr. R.
Introduction to the procedures, policies, and resources of Iowa State University and the department of Computer Science and Electrical and Computer Engineering. Information on engineering and computer-based professions.

S E 166. Careers in Software Engineering.
Cr. R.
Overview of the nature and scope of the software engineering profession. Relationship of coursework to careers. Departmental rules, student services operations, degree requirements, program of study planning, career options, and student organizations.

(3-1) Cr. 3. Prereq: Credit or enrollment in MATH 142
Introduction to software engineering and computer programming. Systematic thinking process for problem solving in the context of software engineering. Group problem solving. Solving software engineering problems and presenting solutions through computer programs, written documents and oral presentations. Introduction to principles of programming, software design, and extensive practice in design, writing, running, debugging, and reasoning about programs.

S E 298. Cooperative Education.
Cr. R. F.S.SS. Prereq: Permission of department and Career Services
First professional work period in the cooperative education program. Students must register for this course before commencing work.

S E 319. Software Construction and User Interfaces.
(Cross-listed with COM S). (3-0) Cr. 3. F. Prereq: COM S 228

S E 329. Software Project Management.
(Cross-listed with CPR E). (3-0) Cr. 3. Prereq: COM S 309

(Cross-listed with CPR E). (3-0) Cr. 3. Prereq: S E 319

S E 396. Summer Internship.
Cr. R. Repeatable. SS. Prereq: Permission of department and Career Services
Summer professional work period.
SE 397. Software Engineering Internship.
Cr. R. Repeatable. F.S. Prereq: Permission of department and Career Services
One semester maximum per academic year professional work period.

SE 398. Cooperative Education.
Cr. R. F.S.SS. Prereq: 298, permission of department and Career Services
Second professional work period in the cooperative education program.
Students must register for this course before commencing work.

SE 409. Software Requirements Engineering.
(Cross-listed with COM S). (3-0) Cr. 3. Prereq: COM S 309, 319
The requirements engineering process, including identification of stakeholders, requirements elicitation techniques such as interviews and prototyping, analysis fundamentals, requirements specification, and validation. Use of Models: State-oriented, Function-oriented, and Object-oriented. Documentation for Software Requirements. Informal, semi-formal, and formal representations. Structural, informational, and behavioral requirements. Non-functional requirements. Use of requirements repositories to manage and track requirements through the life cycle. Case studies, software projects, written reports, and oral presentations will be required. Nonmajor graduate credit.

(Cross-listed with COM S, CPR E). (3-0) Cr. 3. Prereq: 319, COM S 309
Introduction to prepositional/predicate/temporal logic, program verification using theorem proving, model-based verification using model checking, and tools for verification. Nonmajor graduate credit.

(Cross-listed with CPR E). (3-0) Cr. 3. Prereq: COM S 309
Practical importance of software evolution and maintenance, systematic defect analysis and debugging techniques, tracing and understanding large software, impact analysis, program migration and transformation, refactoring, tools for software evolution and maintenance, experimental studies and quantitative measurements of software evolution. Written reports and oral presentation. Nonmajor graduate credit.

(Cross-listed with COM S). (3-0) Cr. 3. Prereq: COM S 309, 319
Comprehensive study of software testing, principles, methodologies, management strategies and techniques. Test models, test design techniques (black box and white-box testing techniques), integration, regression, system testing methods, and software testing tools. Nonmajor graduate credit.

SE 490. Independent Study.
Cr. arr. Repeatable. Prereq: Senior classification in software engineering
Investigation of an approved topic.

SE 491. Senior Design Project I and Professionalism.
(2-3) Cr. 3. Prereq: 329, completion of 29 credits in the SE core professional program, ENGL 314
Preparing for entry to the workplace. Selected professional topics. Use of technical writing skills in developing project plan and design report; project poster. First of two-semester team-oriented, project design and implementation experience.

SE 492. Senior Design Project II.
(1-3) Cr. 2. Prereq: 491
Second semester of a team design project experience. Emphasis on the successful implementation and demonstration of the design completed in SE 491 and the evaluation of project results. Technical writing of final project report; oral presentation of project achievements.

SE 498. Cooperative Education.
Cr. R. Repeatable. F.S.SS. Prereq: 398, permission of department and Career Services
Third and subsequent professional work periods in the cooperative education program. Students must register for this course before commencing work.
Systems Engineering

Interdepartmental Graduate Major

Supervisory Committee:

Work is offered for the master of engineering with a major in systems engineering. The graduate major in Systems Engineering is primarily an off-campus program. It is an interdisciplinary program that allows students to take courses across a variety of departments. Graduates of the program will possess the analytical abilities needed to design, evaluate, and build complex systems involving many components and demanding specifications. They will have the ability to work across disciplinary boundaries, as the practice of modern engineering often requires. Graduates will have developed management capabilities and extended their disciplinary knowledge.

The program is broadly based and uses courses in the various departments of the College of Engineering and courses in other departments of the university. The 30 credits necessary for graduation includes 27 semester credits of formal coursework and 3 credits for a creative component. Completion of the program requires two courses in systems engineering, two courses in the major discipline of the student, three engineering courses with a systems engineering emphasis, two courses outside of the college, and a creative component. Courses are delivered to off-campus students both with the instructor present and through various distance education systems, including video-streaming, podcasting, ftp downloading and CD-ROMs.

The program of study committee, in consultation with the student, determines the courses to be taken and the acceptability of transfer credits. The major professor should be selected from the discipline where a concentration of coursework will be taken.

Admission to the program requires a baccalaureate degree in engineering and admission to the graduate college. Students with degrees in other areas will be considered on an individual basis. The degree awarded is a Master of Engineering in Systems Engineering.

For additional information students should contact the Chair of the Supervisory Committee, 2019 Black Engineering Building, ISU, Ames, Iowa 50011.
The College of Human Sciences provides an integrative approach to improving the quality of life for individuals, families, schools and communities by linking discovery, science, creativity, and practice; applying the knowledge of learning in all endeavors; and developing leaders for roles in research, education, business and industry, and health and human services.

The College of Human Sciences (CHS) was founded in 2005 and fosters innovative synergies in teaching and learning in addition to the discovery of new knowledge, and in many ways is reinventing how human potential can be enhanced. Members of the college strive to improve the quality of people’s lives - helping them learn better, live longer, and lead lives that are more productive and fulfilling.

**Recommened High School Preparation**
Recommended preparation for students entering most departments of the College of Human Sciences should include 4 years of English (including speech) with emphasis in composition and communication skills; 3 years each of mathematics and natural sciences, and at least 2 years of social science and/or humanities. In addition, students interested in Elementary Education or Early Childhood Education are advised to complete three or more years of high school study in one foreign language.

**Information for Prospective Students**
Each student in the College of Human Sciences works closely with an academic adviser who is associated with the program in which the student is majoring. In some majors, freshmen are advised by a general college adviser. After the freshman year, these students are assigned an adviser in the department of the chosen curriculum. Advisors assist students in developing academic programs and in adjusting to university life. They also provide information and guidance about career choices. Advisors attempt to assist students as they develop their schedule of classes to meet their goals, interests, and capabilities.

The college offers a number of orientation sessions during the summer for students planning to enter in the fall. Incoming students are encouraged to attend an orientation session so that academic assessments can be made and appropriate classes may be scheduled for the following term.

**Open Option Status**
The College of Human Sciences offers an open option for entering students who have not selected a specific area of study. An orientation course helps students explore the opportunities available. Program planning information can be obtained from the open option adviser in the College of Human Sciences Student Services Office.

**Planned Transfer Programs**
By careful planning, students may begin their education at another college and then transfer their courses to a curriculum within the College of Human Sciences with maximum efficiency in meeting the degree requirements. The college works closely with community colleges in Iowa and surrounding states to facilitate a transfer to Iowa State University. For more information, call 1-800-522-0683 or visit the College of Human Sciences Student Services.

---

**Families Extension**
Students may prepare for a career in the Cooperative Extension Service by enrolling in a curriculum in the College of Human Sciences that provides them with a broad subject matter base for conducting educational programs for families. Advice on choice of courses should be sought from the Family and Consumer Sciences Education and Studies program, the associate dean and director of Iowa State University Extension to Families programs, the director of Iowa State University Extension to Youth and 4-H programs, or the Extension Human Resources office.

**Undergraduate Core Curriculum**

**Purpose**
The College of Human Sciences has established core learning outcomes to provide the unifying foundation critical to personal and professional success for all College of Human Sciences undergraduate students. Assessment of College of Human Sciences’ core learning outcomes will measure student competence in four (4) areas. Assessment results will be used by CHS students, faculty and staff to enhance student learning experiences.

**Four components**
The core identifies the expected minimum outcomes that each undergraduate in the college must meet:

- **Communication** - Communicate with clear purpose, workable organization and effective style in written, oral, visual and electronic (WOVE) formats without distracting errors in usage or convention.

- **Self-Assessment/Self Reflection** - Consistently and realistically analyze and evaluate one’s own knowledge, abilities and actions in comparison to professional standards and create action plans to enhance personal and professional efficacy.

- **Critical Thinking** - Generate, acquire and evaluate information based on scientific evidence, creative processes, and logical and ethical reasoning to make decisions and solve problems in one’s personal, professional and community endeavors.

- **Social Justice** - Articulate and demonstrate a clear concept of a just society in which individuals and groups equitably share in societal benefits within a global community.

**Expectations for departments/programs**
Departments/programs are expected to identify courses at three levels where the learning outcomes will be assessed. At least one significant educational activity will be embedded in introductory, intermediate and advanced coursework for each outcome.

**General Education**
Students in the College of Human Sciences are required to complete a program in general education which is integrated in their professional training and extends through the undergraduate curriculum.

The general education program emphasizes intellectual growth and personal development as contrasted with specific career preparation.

The program aims to stimulate a desire for learning and intellectual endeavor, develop understanding and appreciation for the physical and cultural world, encourage independent thinking and analysis, increase competence in all aspects of communication, and create an understanding of individuals as social, psychological, and physical beings.

The student is expected to complete studies in three groups in general education. Areas represented below are not departmental titles. In some cases, courses relating to a given area may be found in several different departments. Credits listed are minimum requirements.

Minimum Group Requirements in the College of Human Sciences
I. Communication Skills (9.5 cr.): ENGL 150, ENGL 250; LIB 160; and 3 credits in oral communication

II. Biological and physical sciences and mathematical disciplines (9 cr.): at least 3 credits in mathematical disciplines

III. Social sciences and humanities (15 cr.): at least 6 credits in social sciences and at least 6 credits in humanities

Accreditation and Licensure

The following program-specific accreditation/licensure/registrations have been attained by departments within the college:

Department of Apparel, Educational Studies, and Hospitality Management:

Family and Consumer Sciences Education Teacher Licensure Program is licensed by the Iowa Department of Education and the Iowa Board of Educational Examiners.

Hospitality Management is accredited by the Accreditation Commission for Programs in Hospitality Administration, the accrediting agency of the International Council on Hotel, Restaurant, and Institutional Education.

Apparel Merchandising, and Design major is endorsed by the American Apparel and Footwear Association.

Department of Food Science and Human Nutrition:

Food Science and Industry, and Food Science and Technology curricula are approved by the Institute of Food Technologists.

Dietetics Internship and the Didactic Program in Dietetics are accredited by the Commission on Accreditation for Dietetics Education, the accrediting agency of the American Dietetic Association.

Department of Kinesiology:

Athletic Training Option is accredited by the Commission on Accreditation of Athletic Training Education.

Department of Human Development and Family Studies:

Child Development Laboratory School is accredited by the National Association for the Education of Young Children (NAEYC), Academy for Early Childhood Programs, and licensed by the Iowa Department of Human Services.

Teacher Education and Licensure

All Iowa State University Teacher Education Programs are accredited by the Iowa Department of Education and the Iowa Board of Educational Examiners.

All students who are recommended by Iowa State University for teacher licensure must meet the requirements of the University Teacher Education Program and be recommended by the CHS Associate Dean for Teacher Education.

Each student will be enrolled in the department in which he or she plans to major and must meet the graduation requirements of that department and the college in which it is located.

For details concerning the professional teacher education requirements and the areas of specialization requirements, see Teacher Education, Courses and Programs.

Majors

For more information about a major, see:

1. the curriculum descriptions in this section of the catalog
2. the department catalog section under Courses and Programs
3. department websites.

Apparel, Merchandising, and Design

Options: Merchandising; Design and Production—Administered by the Department of Apparel, Educational Studies and Hospitality Management. See Curriculum in Apparel, Merchandising, and Design

Child, Adult, and Family Services

Options: Child Programs; Youth Programs; and Adult/Family Programs—Administered by the Department of Human Development and Family Studies. See Curriculum in Child, Adult, and Family Services

Culinary Science

Administered by the Department of Food Science and Human Nutrition. See Curriculum in Culinary Science.

Dietetics

Administered by the Department of Food Science and Human Nutrition. See Curriculum in Dietetics.

Early Childhood Education

Administered jointly by the Department of Curriculum and Instruction and the Department of Human Development and Family Studies. See Curriculum in Early Childhood Education.

Elementary Education

Administered by the Department of Curriculum and Instruction. See Curriculum in Elementary Education.

Event Management

Administered by the Department of Apparel, Educational Studies and Hospitality Management. See Curriculum in Event Management.

Family and Consumer Sciences Education and Studies

Options: Communications; Professional Studies; Teacher Licensure—Administered by the Department of Apparel, Educational Studies and Hospitality Management. See Curriculum in Family and Consumer Sciences Education and Studies

Family Finance, Housing, and Policy

Administered by the Department of Human Development and Family Studies. See Curriculum in Family Finance, Housing, and Policy.

Food Science

Options: Consumer Food Science; Food Science and Industry; Food Science and Technology—Administered by the Department of Food Science and Human Nutrition. See Curriculum in Food Science.

Hospitality Management

Administered by the Department of Apparel, Educational Studies and Hospitality Management. See Curriculum in Hospitality Management.

International Studies (secondary major only)

The International Studies Program is an interdisciplinary program which may be taken only as a second major. Students pursuing a second major in international studies must complete the International Studies Program as described in this catalog (see Index, International Studies).

Kinesiology

Options: Athletic Training; Community and Public Health; Exercise Science; Physical Education Licensure; and Pre-Health Professions—Administered by the Department of Kinesiology

Nutritional Science

Options: Pre-Health Professional and Research; and Nutrition and Wellness—Administered by the Department of Food Science and Human Nutrition

Secondary Education

The College of Human Sciences provides secondary education licensure programs in conjunction with subject matter areas, or majors, offered by various departments across the university campus. These subject matter areas include agriculture, biology, chemistry, earth sciences, English, family and consumer sciences, health, history-social sciences, mathematics, music, physics, physical education, and world languages. See Index, Teacher Education.

Minors

Minors are available to all Iowa State students. Minors consist of at least 15 credits including 6 credits taken at Iowa State University in courses numbered 300 or above. A student may not apply the same course to
Certificates

There are no undergraduate certificates offered by the College of Human Sciences. Graduate certificates provide formal recognition of focused graduate study in an area of specialization that is less comprehensive than required for a master’s degree. At Iowa State University, a graduate certificate may be earned either before, after, or concurrently with the master’s or doctoral degree. The following graduate certificates are available in the College of Human Sciences:

Graduate Certificates

Advanced Medical Nutrition Therapy Certificate (see www.fshn.hs.iastate.edu/grad/program_info.php)

Community College Leadership Certificate (see www.cclp.hs.iastate.edu/)

Community College Teaching (see www.cclp.hs.iastate.edu/)

Dietetics Internship Certificate (see www.dietetics.iastate.edu/intern/homepage.php)

Family Financial Planning Certificate (see www.hs.iastate.edu/rge/education/programs/ffpinfo.asp)

Gerontology Certificate (see www.hs.iastate.edu/rge/education/programs/gerontology.asp)

Instructional Design (see www.ci.hs.iastate.edu/)

Principal Endorsement (Pre-LEAD) (see www.elps.hs.iastate.edu/edadm/edadmhpmpg3-acad.php)

Social Justice Certificate (see www.elps.hs.iastate.edu/sjhe.php)

Special Education Certificate (see www.ci.hs.iastate.edu/prspstud/grad/homepage.php/)

Student Affairs Certificate (see www.elps.hs.iastate.edu/gcertsa.php)

Superintendent Licensure (see www.elps.hs.iastate.edu/edadm/edadmhpmpg3-acad.php)

Double Majors

Students may elect a second major from the departments and program areas listed above, or from a major field offered for the bachelor’s degree in another college of the university. Double majors may be prohibited between majors as determined by the appropriate curriculum committees.

The major departments must approve the degree program, and if those majors involve two colleges, both deans must approve. Such programs must fulfill the general education requirements of the college of the primary major. If one major leads to the B.A. degree and the other to the B.S. degree, the degree awarded will be the one offered by the department of the primary major. If the primary major may lead to either a B.A. or a B.S., a student may choose to receive either degree. In this case, the student must satisfy the requirements of each major and of the degree that is chosen for the primary major.

Students with a primary major in another college who wish to take a second major in the College of Human Sciences are required to meet all requirements for the major, prerequisites and supporting courses.

Two Bachelor’s Degrees

Any degree offered by the College of Human Sciences may be earned together with a degree in this or any other college of the university. For the requirements for two degrees, see Index, Two Bachelor’s Degrees.

International and Cross Cultural Programs

International experience opportunities are available and encouraged through the College of Human Sciences to broaden international and cross-cultural perspectives. Scholarships and other forms of financial assistance are available which provide partial support for students studying abroad. The College has established programs with a variety of colleges and universities around the world including Glasgow Caledonian University, Glasgow, Scotland; University of Otaga, Dunedin, New Zealand; the International College of Hospitality Administration, Brig, Switzerland; the London College of Fashion, London, England; Lorenzo de Medici, Florence, Italy; Academia Italiana, Florence, Italy; and Paris American Academy, Paris, France. Students also have an opportunity to participate in group study abroad programs to Europe, Africa, Central and South America, and Asia.

Other opportunities may be developed through consultation with the college director of international experiences and the student’s adviser; for example, students have acquired internships and studied in such countries as Kenya, Rwanda, Spain, Puerto Rico, Ireland, Guatemala, Switzerland, England, Australia, Germany, and France. Faculty members bring diversity and global perspectives to instruction and research through their work in India, South Korea, Central and South America, Pakistan, Africa, and Europe.

Honors Program

High achieving students, with a grade point average of above 3.50, are invited to apply to the Honors Program. Honors students are encouraged to develop a creative program of study expanding their interests while meeting individual educational objectives. Students in the Honors Program also participate in University Honors Seminars, Honors Courses and complete an honors project. For further information, contact the College Honors Committee or academic adviser. Also see Index, Honors Program.

Preparation for Graduate Study

Students considering graduate studies should gain background knowledge in basic subjects related to their area of interest. Undergraduate mathematics, statistics, and research methods courses are useful as
preparation for advanced study in graduate school. Upon completion of graduate programs, students are qualified for leadership positions in public and private institutions and for teaching, research, and extension positions in colleges and universities.

**Graduate Curricula**

- Apparel, Educational Studies, & Hospitality Management – www.aeshm.hs.iastate.edu
- Curriculum & Instruction – www.ci.hs.iastate.edu
- Educational Leadership & Policy Studies – www.elps.hs.iastate.edu
- Food Science & Human Nutrition – www.fshn.hs.iastate.edu
- Human Development & Family Studies – www.hdfs.hs.iastate.edu
- Kinesiology – www.kin.hs.iastate.edu

Graduate study in the College of Human Sciences is conducted through the Graduate College. Details are found in the Graduate College section of this catalog, (www.grad-college.iastate.edu) and on department websites.
Curriculum in Apparel, Merchandising, and Design

Administered by the department of Apparel, Educational Studies, and Hospitality Management. Leading to the degree bachelor of science.

Total credits required: 123 including a minimum of 18 credits in AMD at Iowa State University for the degree (12 or the 18 credits must be at the 300-400 level). The major in apparel, merchandising, and design provides a broad based program of study with flexibility in creating program options. Courses are required in general education, and textiles and clothing core. To complete the program, a student combines structured clusters of courses to form primary and secondary program options.

A minor in apparel, merchandising, and design is available; see requirements under Textiles and Clothing, Courses and Programs.

Cr. Degree Requirements

Communications Skills
- ENGL 150 Critical Thinking and Communication 3
- ENGL 250 Written, Oral, Visual, and Electronic Composition 3
- LIB 160 Library Instruction 0.5

One of the following 3
- COMST 214 Professional Communication
- COMST 218 Conflict Management
- SP CM 212 Fundamentals of Public Speaking

Total Credits 9.5

Biological and Physical Sciences and Mathematical Disciplines
- Mathematics (see approved list) 3-4
- Natural Sciences 3-5

One of the following 4-5
- STAT 101 Principles of Statistics
- STAT 104 Introduction to Statistics
- STAT 226 Introduction to Business Statistics I

Total Credits 10-14

* including FS HN 167 Introduction to Human Nutrition

Social sciences
- ECON 101 Principles of Microeconomics 3
- T C 165 Dress and Diversity in Society 3

Human Sciences 3-4

Total Credits 9-10

* including T C 362 Cultural Perspectives of Dress

Humans

One of the following:
- T C 257 Museum Studies
- T C 354 History of European and North American Dress
- T C 356 History of Twentieth Century Fashion
- AESHM 342 Aesthetics of Consumer Experience 3
- Human Sciences (foreign language recommended) 3
- History/Art History (Creative Design: ART H required) 3

Total Credits 9

Professional courses

35-39 Textiles and clothing core:
- AESHM 111 Professional Development for AESHM 3
- AESHM 275 Merchandising 3
- AESHM 311 Seminar on Careers and Internships 1
- AESHM 380 U.S. Field Study * or AESHM 381 International Field Study 1-3
- T C 204 Textile Science 4
- T C 210 Computer Applications in Textiles and Clothing 2
- T C 231 Product Development and Manufacturing 4
- T C 245 Aesthetics and Brand Image 3
- T C 372 Sourcing and Global Issues 3

One of the following 3
- T C 354 History of European and North American Dress
- T C 356 History of Twentieth Century Fashion
- T C 362 Cultural Perspectives of Dress
- T C 467 Consumer Behavior

Total Credits 34-41

Primary options

Select one professional primary option from the following two choices:

Design and Production Professional Courses
- T C 221 Apparel Assembly Processes 3
- T C 225 Patternmaking I 4
- T C 278 Fashion Illustration 3
- T C 321 Computer Integrated Textile and Fashion Design 3

Two of the following 6
- ACCT 284 Financial Accounting
- AESHM 340 Hospitality and Apparel Marketing Strategies
- AESHM 470 Supervised Professional Internship
- AESHM 474 Entrepreneurship in Human Sciences
- T C 305 Quality Assurance of Textiles and Apparel
- T C 404 Textile Color Theory
- T C 415 Technical Design Processes
- T C 490 Independent Study
- T C 496 Fashion Forecasting and Product Development
- T C 499 Undergraduate Research

Total Credits 19

Merchandising Professional Courses
- AESHM 377 Brand Management and Promotions 3
- T C 376 Merchandise Planning and Control 4
- T C 475 Retail Information Analysis 3
- ACCT 284 Financial Accounting 3
- AESHM 340 Hospitality and Apparel Marketing Strategies 3
- MKT 340 Principles of Marketing 3

One of the following 3
- T C 221 Apparel Assembly Processes
- T C 305 Quality Assurance of Textiles and Apparel
- T C 404 Textile Color Theory

Total Credits 333

### Secondary Option for Merchandising:

In consultation with your advisor, select 18 credits from the following groups of courses. You must select at least 9 credits from AESHM and TC courses and 9 credits from any other single area. At least 9 of the 18 credits must be at the 300-400 level:

#### AESHM and TC:

- Take the following course for 1 credit:
  - AESHM 271 Public Relations and Event Management 3
  - AESHM 287 Principles of Management in Human Sciences 3
  - AESHM 340 Hospitality and Apparel Marketing Strategies 3
- Take the following course for 2-3 credits:
  - AESHM 381 International Field Study 3
  - AESHM 421 Developing Global Leadership: Maximizing Human Potential 3
  - AESHM 438 Human Resource Management 3
  - AESHM 470 Supervised Professional Internship 3
  - Take the following course for 3 credits:
    - AESHM 471 Special Events Coordination 3
    - AESHM 474 Entrepreneurship in Human Sciences 3
    - AESHM 477 Multi-channel Retailing 3
    - T C 257 Museum Studies 3
    - T C 278 Fashion Illustration 3
    - T C 354 History of European and North American Dress 3
    - T C 356 History of Twentieth Century Fashion 3
    - T C 362 Cultural Perspectives of Dress 3
    - T C 404 Textile Color Theory 3
    - T C 431 Apparel Production Management 3
    - T C 467 Consumer Behavior 3
    - T C 496 Fashion Forecasting and Product Development 3
    - T C 499 Undergraduate Research 1

Curriculum in Event Management

Administered by the Apparel, Educational Studies and Hospitality Management Department.

Leading to the degree bachelor of science.

Total credits required: 123 including a minimum of 18 credits from the AESHM Department at Iowa State University for the degree. The curriculum in event management prepares students for careers in leading event and meeting management businesses. Courses are required in general education, and the professional area.

A minor in event management is available; see requirements under Apparel, Educational Studies, and Hospitality Courses and Programs.
General Electives

Curriculum in Family and Consumer Sciences Education and Studies

Administered by Apparel, Educational Studies and Hospitality Management. Leading to the degree bachelor of science.

Total credits required: 124

This curriculum provides a broad-based program of study focusing on preparation for professional careers related to education or community leadership. Courses are required in general education and the College core. Students select one program option.

There are three choices for this curriculum.

Option 1, teacher licensure, Option 2, communications, or Option 3, professional studies. In all options, students are prepared with a broad based understanding of family and consumer sciences.

Option 1, teacher licensure, is designed for students seeking careers as family and consumer sciences educators in a variety of settings such as middle, junior, and senior high schools. With additional credits students may also be approved to teach in specific occupational areas: child care, fashion merchandising, and foodservice. Further information about licensure programs appears under Teacher Education.

Option 2, communications, is designed for students seeking careers emphasizing communication with diverse populations in extension, business, community agencies, community colleges, and youth and adult education programs in a global community.

Option 3, professional studies, is designed to provide students with the opportunity to pursue an individualized program which is planned with their academic advisers. Opportunities to participate in study abroad, internships, and field study build a solid base for work in a global community. Careers include working with diverse population in extension, business, community agencies, community colleges, and youth and adult education programs.

A minor in Educational Services in Family and Consumer Sciences is available; see requirements under Family and Consumer Sciences Education and Studies, Courses and Programs.

**Courses primarily for undergraduate students**

### AESHM 111. Professional Development for AESHM.

(2-2) Cr. 3. FS.

Career exploration, presentation and professional skills, teamwork and leadership, creativity, critical thinking, technology, and service learning components. Orientation to policies and procedures of university, college, department, and program. Some WWW lectures.

### AESHM 170. Supervised Work Experience I.

Cr. 1. Repeatable, maximum of 2 times. FS.SS. Prereq: Permission by application; freshman classification

Supervised work experience with a cooperating firm or organization. Offered on a satisfactory-fail basis only. No more than 12 credits total from AESHM 170, 270, and 470 may be applied toward graduation.

- D. Hospitality
- F. Event Management
- N. Apparel
- P. ISU Dining

### AESHM 270. Supervised Work Experience II.

Cr. 1.2. Repeatable, maximum of 2 times. FS.SS. Prereq: Minimum 2.0 GPA; permission by application; sophomore classification

Supervised work experience with a cooperating firm or organization. Offered on a satisfactory-fail basis only. No more than 12 credits total from AESHM 170, 270, and 470 may be applied toward graduation.

- D. Hospitality: prereq 6 credits in AESHM or HRI
- F. Event Management: prereq 6 credits in AESHM, HRI, or TC
- N. Apparel: prereq 6 credits in AESHM or TC
- P. ISU Dining: prereq 6 credits in AESHM or HRI

### AESHM 271. Public Relations and Event Management.

(2-2) Cr. 1-3. Repeatable, maximum of 7 credits. FS.SS. Prereq: Application and instructor permission required for spring enrollment, form available from the AESHM Department office

Overview of the public relations and event management industries. Techniques and procedures required for producing successful and sustainable events. Course must be taken for 3 credits first time, can be repeated for 1-3 credits.

### AESHM 275. Merchandising.

(3-0) Cr. 3. FS. Prereq: 3 credits in Math

Principles of merchandising as applied to retailing, service, hospitality, and manufacturing. Study of the planning, development, and presentation of apparel- and hospitality-related products, services, and experiences. Industry and market research, planning of new offerings, and development of promotional and competitive strategies.
AESHM 280. Orientation to U.S. Field Study.
Cr. 1. Repeatable, maximum of 2 times. F.S.
Orientation to the field study location during the semester preceding the trip.

AESHM 281. Orientation to International Field Study.
Cr. 1. Repeatable, maximum of 2 times. F.S.
Orientation to the field study location during the semester preceding the trip.

(3-0) Cr. 3. F.S.
Introduction to management concepts and principles with application to human sciences organizations. Includes service quality management, professionalism, and social responsibility.

AESHM 311. Seminar on Careers and Internships.
(1-0) Cr. 1. F.S. Prereq: Sophomore classification. Good academic standing Internship and career planning, professional expectations and responsibilities. Resume development, cover letters, portfolio planning, interviewing techniques, and business etiquette.

(3-0) Cr. 3. F. Prereq: ECON 101
Application of marketing principles to the hospitality and apparel industries. Emphasis on the role of marketing in an organization’s overall strategic planning. Development and evaluation techniques available to hospitality, apparel, and other businesses, including advertising, sales promotion, packaging, and public relations.

AESHM 342. Aesthetics of Consumer Experience.
(3-0) Cr. 3. F.S.
Design principles, aesthetic concepts, and research applied to the assessment and development of multi-sensory consumer environments. Influence of individual differences and cultural patterns on aesthetic preferences.

Meets U.S. Diversity Requirement

AESHM 371. Conference and Meeting Planning.
(2-2) Cr. 1-3. Repeatable, maximum of 2 times. F. Prereq: AESHM 271
Application of event management principles to conference and meeting planning, trade shows, and conventions focusing on budget development, resource allocation, promotion, hospitality, and professional development. Course must be taken for 3 credits first time, can be repeated for 1-3 credits.

(3-0) Cr. 3. F. Prereq: TC 245; AESHM 340 or MKT 340
Principles of brand development and management; focus on experiential marketing, promotions, visual merchandising components, design/layout of retail spaces using Visual Retailing software.

(3-0) Cr. 3. F.
Study of family and community social issues from diverse perspectives. Application of critical thinking and reflection to issues with a focus on leadership within the community.

Meets U.S. Diversity Requirement

AESHM 380. U.S. Field Study.
(Dual-listed with 580). Cr. 1-3. Repeatable, maximum of 2 times. F.S.S.
Prereq: 9 credits in AESHM, FCEdS, HRI, and/or TC; junior classification; minimum 2.0 GPA. Application and instructor permission required for spring enrollment; form available from the AESHM Department office
Study and tours of areas of interest to majors in the AESHM Department. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 280.

AESHM 381. International Field Study.
(Dual-listed with 581). Cr. 1-3. Repeatable, maximum of 2 times. F.S.S.
Prereq: 9 credits in AESHM, FCEdS, HRI, and/or TC; junior classification; minimum 2.0 GPA. Permission by application
Study and tours of areas of interest to majors in the AESHM Department. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required. May be combined with AESHM 281.

AESHM 398. Cooperative Education.
Cr. R. Repeatable. F.S.S. Prereq: Permission of department chair; junior classification
Required of all cooperative education students. Students must register for this course prior to commencing each work period.

AESHM 411. Seminar on Current Issues.
Cr. 1-3. Repeatable, maximum of 2 times.
Trends, issues, and scholarship in apparel, educational studies, and hospitality management.

(3-0) Cr. 3. S.
Development of leadership in a global environment. Focus on global concerns that impact on the well-being of individuals, families, and communities. Strategies for working with individuals, families and communities in other countries and cultures. Taking local action on global issues. Participation in a service activity.

Meets International Perspectives Requirement

(3-0) Cr. 3. S. Prereq: AESHM 270, 275 or 287; junior classification
Principles and practices of human resource management relevant to human science-related organizations. Emphasis on the entry-level manager’s role.

AESHM 470. Supervised Professional Internship.
Cr. 3-6. Repeatable. F.S.S. Prereq: 311 and minimum 2.0 GPA; permission by application; junior or senior classification
Supervised work experience with a cooperating firm or organization. No more than 12 credits from AESHM 170, 270, and 470 may be applied toward graduation.
A. Food and Beverage: prereq: HRI 380, 380L
B. Lodging: prereq: HRI 352
C. Club Management: prereq: HRI 289
D. Hospitality: prereq 9 credits in HRI
E. Event Management: prereq AESHM 271
I. Textile and Apparel Design: prereq TC 210, 225, 231, 245, 278 (recommended)
K. Product Development: prereq TC 231, 245
L. Public Relations and Publishing: prereq 275, Advrt 230, JLMC 220 or 305
M. Museums: prereq: TC 257
N. Apparel: prereq 9 credits in TC
P. ISU Dining: prereq 9 credits in AESHM or HRI

AESHM 471. Special Events Coordination.
(2-2) Cr. 1-3. Repeatable, maximum of 2 times. F.S. Prereq: 371; Application and instructor permission required for spring enrollment; form available from the AESHM Department office
Advanced application of public relations and event management. Provide leadership and communicate direction for production of an event including developing budgets, publicity, advertising, fund raising, choreography, staging, lighting, and food. Course must be taken for 3 credits first time, can be repeated for 1-3 credits
AESHM 474. Entrepreneurship in Human Sciences.  
(Dual-listed with 574). (3-0) Cr. 3. S. Prereq: junior or senior status  
Comprehensive approach to entrepreneurship including concepts of innovation, creativity, opportunity assessment, and business planning. Focus on human sciences-related businesses: retail, service, hospitality, family, home-based, rural, women and minority-owned businesses. Interaction with entrepreneurs, market research, feasibility analysis, business proposals, and business/community outreach and consulting.

AESHM 477. Multi-channel Retailing.  
(3-0) Cr. 3. F. Prereq: 3 credits in marketing or AESHM 275 or 287  
A customer-centric view of marketing with a focus on the retailer-customer relationship and online strategies. Integration of key characteristics of online and offline marketing including store formats, e-commerce, catalog, TV, mobile, and direct sales.

AESHM 498. Cooperative Education.  
Cr. R. Repeatable. F.S.S. Prereq: Permission of department chair; senior classification  
Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Courses primarily for graduate students, open to qualified undergraduate students

AESHM 510. Research Methods in Apparel and Hospitality.  
Cr. 3. SS. Prereq: Graduate standing in the Department  
Overview of research methods. Methods for collecting and analyzing quantitative and qualitative data. Development of research plan.

AESHM 511. Seminar.  
Cr. 1-3. Repeatable, maximum of 6 times. Prereq: 6 graduate credits in AESHM, HRI, or TC. Permission of instructor  
Discussion of scholarship and current issues. Topics vary.

AESHM 545. Consumer Aesthetics and Retail Branding.  
(3-0) Cr. 3. Alt. S., offered 2012. Prereq: One course in design elements and principles, psychology, consumer behavior, or marketing  
Examination of hedonic nature of consumer experience and its application to experiential design and branding of retail/hospitality establishments. Emphasis on consumer behavior, design, environmental psychology, and marketing literature.

AESHM 570. Practicum.  
Cr. 1-3. Repeatable, maximum of 2 times. F.S.S. Prereq: 6 graduate credits in program area; permission of instructor  
Supervised experience related to career objective. Proposal must be approved semester before placement.

A. Apparel Merchandising and Design
B. Hospitality Management

AESHM 574. Entrepreneurship in Human Sciences.  
(Dual-listed with 474). (3-0) Cr. 3. S. Prereq: One course in marketing or permission of instructor  
Comprehensive approach to entrepreneurship including concepts of innovation, creativity, opportunity assessment, and business planning. Focus on human sciences-related businesses: retail, service, hospitality, family, home-based, rural, women and minority-owned businesses. Interaction with entrepreneurs, market research, feasibility analysis, business proposals, and business/community outreach and consulting.

AESHM 577. E-Commerce for Apparel and Hospitality Companies.  
(3-0) Cr. 3. Alt. SS., offered 2013. Prereq: Course in marketing or permission of instructor  
Analysis of technology and consumer trends, industry practices, and marketing strategies for e-commerce. Evaluation and development of apparel or hospitality company websites. Theory application to the development of multi-channel business strategies.

AESHM 580. U.S. Field Study.  
(Dual-listed with 380). Cr. 1-3. Repeatable, maximum of 2 times. F.S.S. Prereq: 9 credits in AESHM, FCEdS, HRI, and/or TC, graduate classification, minimum 2.0 GPA. Permission by application  
Study and tours of areas of interest to majors in the AESHM Department. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required.

AESHM 581. International Field Study.  
(Dual-listed with 381). Cr. 1-3. Repeatable, maximum of 2 times. F.S.S. Prereq: 9 credits in AESHM, FCEdS, HRI, and/or TC, graduate classification. Permission by application  
Study and tours of areas of interest to majors in the AESHM Department. Trip to location under supervision of faculty member. Locations and lengths of trip vary. Final projects, reports, journal entries, and analysis are required.

Courses for graduate students

AESHM 611. Seminar.  
Cr. 1-3. Repeatable. Prereq: 6 graduate credits in AESHM, HRI, or TC. Permission of instructor  
Discussion of scholarship and current issues. Topics vary.

AESHM 670. Teaching Practicum.  
Cr. 1-3. Repeatable. F.S.S. Prereq: 6 graduate credits in program area; permission of instructor  
Supervised experience in the university classroom. Proposal must be approved semester before placement.

A. Apparel Merchandising and Design
B. Hospitality Management
Curriculum in Culinary Science - CHS

Administered by the Department of Food Science and Human Nutrition

Total Degree Requirement: 122.5 cr.

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements. Only 65 cr. from a two-year institution may apply to the degree which may include up to 16 technical cr.; 9 P-NP cr. of electives; 2.00 minimum GPA.

International Perspectives: 3 cr.
U.S. Diversity: 3 cr.

Communications/Library: 9.5 cr.

**Missions and Goals**

The Department of Curriculum and Instruction aspires to prepare transformative leaders in teaching, learning, and curriculum within diverse pre-K-16 settings through exemplary teaching, research and outreach. In order to reach this vision, we have the following mission. As an engaged community of scholars and teacher educators, we seek to:

- Enhance Iowa’s families, schools, and communities through exemplary education and teacher preparation;
- Provide educators and students with the knowledge, skills, and experience necessary to become transformative leaders in an increasingly changing and interdependent world; and
- Support the advancement of specialized academic disciplines through exemplary research and scholarship.

**Undergraduate Study**

The Department of Curriculum and Instruction provides the professional education coursework that leads to licensure of pre-service teachers. Students major in early childhood education – unified (birth through age 8), an interdepartmental program administered by the Departments of Human Development and Family Studies and Curriculum and Instruction or elementary education (K-6). Students who are interested in teaching at the secondary level (7-12) major in a specific discipline and complete the courses necessary for their teaching license. Early childhood education – unified and elementary education majors must complete a professional course sequence:

**Curriculum and Instruction**

The Department of Curriculum and Instruction offers courses that can lead to a reading endorsement for grades K-8 or grades 5-12. Students seeking a K-8 endorsement should see a Curriculum and Instruction academic advisor. The 5-12 endorsement is offered collaboratively with the English Department. Students seeking this endorsement should see an advisor in the English Department. Inquiries can be sent to the License Analyst in the Student Services Office to receive a list of courses needed for an Iowa State University reading endorsement. Prerequisites for the reading endorsement courses are listed in the catalog course descriptions.

**Early Childhood Education**

The curriculum in early childhood education – unified is planned for students preparing to teach young children and work with their families. This program leads to careers in working with young children who are typically developing and those with special needs from birth through age eight. Graduates in this curriculum may teach in early childhood (preschool and primary) classrooms or home based programs, with emphasis on inclusive services. Graduates may be employed by either public or private agencies or schools. This curriculum has been approved by the Iowa Department of Education and meets requirements for the early childhood education - unified teacher license. The program is an interdepartmental major administered by the Department of Curriculum and Instruction and the Department of Human Development and Family Studies within the College of Human Sciences.

Early childhood education majors must satisfy a world languages requirement for graduation.

Students who enroll in early childhood education – unified must make application to and be accepted into the teacher education program prior to enrolling in advanced courses. All early childhood education students, including those seeking a double major, must meet general education requirements for teacher licensure. Iowa State University is in compliance with the Iowa Department of Education’s mandate for a performance-based system of teacher training. Following this same type of system, the State of Iowa has developed and implemented a competency system to evaluate the performance of all teachers. A detailed list of the twelve Iowa State University Teacher Education Standards and the eight State of Iowa Teaching Standards, along with other information about the University Teacher Education Program, can be found at www.teacher.hs.iastate.edu, the teacher education website. Information is also available from the student’s academic advisor. Students in early childhood education – unified must meet the performance outcome standards for the reading endorsement. Standards are assessed in coursework through artifacts such as assignments, projects, or practicum participation. These standards assessments are based on the early childhood content standards for endorsement 100 in the State of Iowa. These include competencies in (1) child growth, development, and learning, (2) developmentally appropriate learning environment and curriculum implementation, (3) health, safety, and nutrition, (4) family and community collaboration, and (5) professionalism. Pre-student teaching field experiences and student teaching experiences in at least two different settings is required. Students will receive both formative and summative evaluations of their progress toward meeting these outcomes throughout their program at Iowa State University.

**Elementary Education**

For the undergraduate curriculum in elementary education, leading to the degree bachelor of science.
The curriculum in elementary education is planned for students preparing to teach at the elementary school level. This program leads to careers in working with school-aged children, kindergarten through sixth grade. Graduates in this curriculum may teach in elementary classrooms in either public or private school districts.

Endorsements in art, English/language arts, English as a Second Language (ESL), health, history, music, basic science, social studies, mathematics, special education (Instructional Strategist: Mild/Moderate Disabilities K-8), and speech communication/theater are available for elementary education students. An endorsement for teaching world languages in elementary schools is available through the Department of World Languages and Cultures.

Elementary education majors must satisfy a world languages requirement for graduation. For detailed information.

Students who enroll in elementary education must make application to and be accepted into the teacher education program prior to enrolling in advanced elementary education courses. For admission and licensure requirements, every student must meet the performance outcome standards for teacher licensure. These standards will be assessed in each course. Students will receive both formative and summative evaluations of their progress toward meeting these standards throughout their program at Iowa State University. A detailed explanation of the standards and assessment process may be found on the department’s website (www.ci.hs.iastate.edu). The same information is also available from the student’s academic advisor.

Graduates of the elementary education program will be able to demonstrate through professional practice their understanding of academic disciplines, teaching and learning, the nature of the student, and how to adapt instruction for diversity. More specifically, graduates will be able to demonstrate their understanding of concepts and structures of disciplines, tools of inquiry, how students learn and develop, and the effects of individual differences on learning. Graduates will be able to demonstrate a broad range of instructional strategies, including knowledge of technology applicable to instruction. In their teaching, graduates will demonstrate the ability to stimulate active inquiry with collaboration and supportive interaction among their students. In appropriate settings graduates will demonstrate their ability to develop professional relationships with colleagues, parents, and agencies that support students and their learning.

Secondary Education

For specific requirements for each area of specialization, see Teacher Education and curricula for the college in which the chosen degree major is sought.

Students seeking recommendations for a license to teach in the secondary schools must be admitted to the teacher education program and pursue a program that includes the professional core:

</table>

Total Credits: 18

Note: Students seeking licensure in agriculture and science do not take CI 426 Principles of Secondary Education. Students seeking a teaching license in physical education must see an advisor in the Department of Kinesiology in the College of Human Sciences. All students who are recommended by Iowa State University for teacher licensure must meet the requirements of the teacher education program and be recommended by the College of Human Sciences. Each student must meet the performance outcome standards for teacher licensure. Each standard will be assessed in every major. Students will receive both formative and summative evaluations of their progress toward meeting these outcomes throughout their program at Iowa State University. A detailed explanation of the standards and assessment process may be found at www.teacher.hs.iastate.edu. For more information, students should contact the academic advisor in their major. Each student will be enrolled in the department in which he or she plans to major, and must meet the graduation requirements of that department and the college in which it is located.

Graduate Study

The Department of Curriculum and Instruction offers work for the degrees Master of Science, Master of Education, and Doctor of Philosophy with a major in education and minor work to students taking major work in other departments. Within the education major in the Department of Curriculum and Instruction a student may earn an education degree with no area of specialization (master’s and doctorate) or specialize in elementary education (master’s only), historical, philosophical, and comparative studies in education (master’s only), special education (master’s only), or curriculum and instructional technology (master’s and doctorate). The specialization in elementary education (advanced study for licensed teachers) is designed to prepare candidates for teaching and curricular leadership positions in elementary settings. The specialization in historical, philosophical, and comparative studies in education is designed to provide graduate students experiences in analyzing educational problems and issues, critiquing policies that affect education in society, and making connections between educational practice and learning. The special education specialization is designed to prepare candidates as practitioners and researchers in the field of mild/moderate disabilities or behavioral disorders/learning disabilities. The specialization in curriculum and instructional technology is designed to prepare candidates as researchers and practitioners in the fields of curriculum and instructional technology.

Students may also opt not to select an area of specialization. These students are asked to select a focus area for their graduate study. Focus areas include educational psychology, world language education, literacy education, mathematics education, multicultural education and international curriculum studies, and science education. See the Curriculum and Instruction web site at http://www.ci.hs.iastate.edu/ for more information on these focus areas.

A minor is available in curriculum and instructional technology at both the master’s and doctoral level. Information about the minor can be found on the web at http://www.ci.hs.iastate.edu/prspstud/grad/Grad2/ Degrees.php.

A Master of Arts in Teaching degree program leading to teacher licensure (science only) is available to students who currently have a bachelor’s degree in science (or a closely related field). A teacher licensure program in mathematics education is also available to graduate students (Department of Curriculum and Instruction). Teacher licensure at the graduate level is also offered in agricultural education (College of Agriculture and Life Sciences) and family and consumer sciences (College of Human Sciences). The Department of Curriculum and Instruction provides the professional education coursework. Students in a graduate teacher licensure program must complete:

Total Credits: 15

Mathematics licensure students also take C I 526 Principles of Secondary Education.

Graduate level teaching endorsements are offered through the Department of Curriculum and Instruction. Graduate students who seek a teaching endorsement in special education, but do not wish to pursue a master’s degree can incorporate those courses from a professional certificate program. Endorsement programs include Instructional Strate-
gist I: Mild/Moderate Disabilities (K-8 or 5-12), or Instructional Strategist II: Behavior Disorders/Learning Disabilities, and special education consultant. A graduate level reading endorsement is also available.

Prerequisite to major graduate work in education is preparation substantially equivalent to the completion of one of the undergraduate curricula in education offered at Iowa State University, or graduate preparation in a discipline to be used as a teaching field in a community college or university, and adequate proof that the student ranks above average in scholastic ability and promise of professional competence.

The world language requirement, if any, for the Ph.D. degree will be determined by the student’s program of study committee. If no world language is required, the total program must consist of a minimum of 78 semester credits, at least 12 of which must be earned outside the education major, and at least 16 of which must be earned outside the area of specialization. Statistics and research methods may not be included in the 16 credits. Should world language be included, the program of study committee may adjust the minimum program requirement downward, but in no instance may the program of study be less than 72 semester credits. Students whose native language is not English may substitute competence in English. All applicants for the Ph.D. must submit Graduate Record Examination (GRE) scores.

Other graduate programs related to education (including General Graduate Studies) may be planned for students on the basis of previous education and experiences as well as future plans and needs. Students should refer to Agricultural Education and Studies, Family and Consumer Sciences Education, Kinesiology, Educational Leadership and Policy Studies, and General Graduate Studies or to graduate level course offerings within other departments.

**Curriculum in Elementary Education**

The curriculum in Elementary Education is planned for students preparing to teach in grades kindergarten through six. For additional information, see Index, Elementary Education.

Teaching endorsements in areas closely related to elementary education, including a special education endorsement in Instructional Strategist I: Mild/Moderate K-8, are available for elementary education majors. See Teacher Education, Courses and Programs, for information about specific endorsements.

Additional teaching endorsements, available at the graduate level to individuals who hold a valid Iowa teaching license, include the following: K-6 world language, reading, and special education (Instructional Strategist II: Behavior Disorders/Learning Disabilities, ages 5-21).

A minor in educational computing is available; see requirements under Curriculum and Instruction Courses and Programs.

**Communication Proficiency**

In order to meet graduation requirements, all students must have a C (2.0) or better for each of ENGL 150 Critical Thinking and Communication and ENGL 250 Written, Oral, Visual, and Electronic Composition.

**U.S. Diversity and International Perspectives**

In order to meet graduation requirements, all students must complete 3 cr. of course work in U.S. Diversity and 3 cr. in International Perspectives. See department for approved lists of courses.

**World Language and Culture Requirement**

Elementary education majors must satisfy a graduation requirement equivalent to the first year of university-level study in one world language (normally, completion of a two-semester sequence in any one world language). The requirement may be met by completion of three or more years of high school study in one world language.

Students who have completed three or more years of French, German, or Spanish in high school may not receive graded credit for 101/102 in those languages; test-out credit (T credit) may be obtained by passing an appropriate examination or by completing an advanced sequence (200-level or higher) in that language. If these students choose to take 101/102 on a remedial basis, they will be graded S-F. Certification in American Sign Language is recognized by the University and satisfies the world language requirement for the curriculum in elementary education.

**Total credits required: 128.5.**

**General Education**: 45.5

---

**Curriculum and Instruction (C I)**

**Courses primarily for undergraduate students**

**C I 201. Digital Learning in the PK-6 Classroom.**
(2-2) Cr. 3. F.S. Alt. SS., offered 2013.
Overview of ways to use educational technologies to support instruction in PK-6 settings. Focus on pedagogical approaches that integrate technologies to support learning in the content areas. Laboratory experiences include development of activities to use tool software, interactive multimedia, web page development, digital video and other technologies to facilitate learning and teaching.

**C I 202. Digital Learning in the 7-12 Classroom.**
(2-2) Cr. 3. F.S. Alt. SS., offered 2012.
Overview of ways to use educational technologies to support instruction in 7-12 settings. Focus on pedagogical approaches that integrate technologies to support learning in the content areas. Laboratory experiences include development of activities to use tool software, interactive multimedia, web page development, digital video and other technologies to facilitate learning and teaching.

**C I 204. Social Foundations of American Education.**
(3-0) Cr. 3. F.S.SS.
Goals of schooling, including the roles of teachers today; historical development of schools; educational reforms and alternative forms; and current philosophical issues. Human relations aspects of teaching and discussions about teaching as a career.

**C I 208. Early Childhood Education Orientation.**
(Cross-listed with HD FS). Cr. 1. F.S.
Overview of early childhood education (birth-grade 3) teacher licensure requirements. Program planning and university procedures. Required of all students majoring in early childhood education. Offered on a satisfactory-fail basis only.

**C I 215. Sophomore Orientation.**
Cr. 1. F.S.
Review of elementary education requirements. Program planning. Required of all sophomores majoring in elementary education.

**C I 216. Learning Community Orientation to Teacher Education.**
(1-0) Cr. 1. F. Prereq: First semester freshman Elementary Education major or other majors interested in seeking pre-K to grade 12 teacher certification.
Learning community for transition to university community life. Overview of pre-K to grade 12 teacher certification requirements in Iowa and other states. Program and career planning. Field Trip. Offered on a satisfactory-fail basis only.

**C I 219. Orientation to Teacher Education for Mathematics, Science and History/Social Sciences Majors.**
Cr. 1. F.S. Prereq: Students seeking teacher licensure in mathematics, science or history/social sciences in grades 7-12.
Overview of mathematics, science, and history/social sciences secondary education (grades 7-12), teacher licensure requirements in Iowa and other states. Program and career planning.

**C I 245. Strategies in Teaching.**
(2-0) Cr. 2. F.S. Prereq: 204; HD FS 220 or 221 or 226 (or concurrent enrollment in one of these courses); concurrent enrollment in C I 268; eligibility for admission to teacher education program.
Introduction to elementary education teaching strategies, classroom management, and curriculum organization. Open to students in the elementary education curriculum or the early childhood education curriculum.
C I 268. Strategies Practicum.   (0-2) Cr. 1. F.S. Prereq: 204 Clinical experience, to be taken concurrently with 245. Offered on a satisfaction-fail basis only.

C I 280. Pre-Student Teaching Experience.   (1-8) Cr. 0.5-2. Repeatable. F.S.SS. Prereq: 280A may be taken alone. For enrollment in 280B-I: 280A must be either a prerequisite or taken concurrently. Field experience in area educational settings. 2 1/2-hour blocks of time needed for field experience. Offered on a satisfaction-fail basis only. C I 280 may be taken more than once for credit toward graduation.

A. Teacher Aide. Cr. 1 or 2
B. Digital Learning. Cr. 1 or 2 (2 credits by permission only)
C. Native American Tutoring. Cr. 1
D. Museum Education. Cr. 1
E. Multicultural Youth Experience. Cr. 1 or 2
F. International Student. Cr. 1 or 2 (Permission of instructor required)
I. Mild/Moderate Disabilities. Cr. 1 (concurrent with Sp Ed 330).
L. Early Field Experience. Cr. .5
M. Secondary Science. Cr. 1 or 2
N. Cohort Field Experience. Cr. 1 (permission of department required)
O. Art Education Field Experience. Cr. 1 (Permission of department required)

C I 290. Independent Study. Cr. 1-3. Prereq: 6 credits in education, permission of department chair

C I 315. Transfer Orientation. Cr. 1-3. F.S.
Overview of elementary education requirements, curricular opportunities, and university procedures. Program planning. Required of all transfer students majoring in elementary education. Offered on a satisfaction-fail basis only.

C I 332. Educational Psychology of Young Learners.   (3-0) Cr. 3. F.S. Prereq: PSYCH 230 or HD FS 102, open only to majors in Early Childhood Education or Elementary Education Psychological theory relevant to classroom learning, cognition, motivation, classroom management and assessment for children from birth to grade 6. Implications of theory for teaching children and for assessing learning in educational settings with young and grade school aged children.

C I 333. Educational Psychology.   (Cross-listed with PSYCH). (3-0) Cr. 3. F.S. Prereq: PSYCH 230 or HD FS 102, application to the teacher education program or major in psychology Classroom learning with emphasis on theories of learning and cognition, and instructional techniques. Major emphasis on measurement theory and the classroom assessment of learning outcomes.

C I 347. Nature of Science.  (Dual-listed with 547). (3-0) Cr. 3. Prereq: 280M; concurrent enrollment in 418 or instructor permission The intersection of issues in the history, philosophy, sociology, and psychology of science and their application to and impact on science teaching and learning, science teacher education, and science education research.

C I 377. The Teaching of Reading and Language Arts in the Primary Grades (K-3).   (4-0) Cr. 4. F.S.SS. Prereq: admission to teacher education program, C I 245, SP ED 250, HD FS 240, 226 (EI Ed majors) or 221 (ECE majors); concurrent enrollment in 448, 468A, 468C (EI Ed majors) or 438, 468F, 468G, SP ED 368, HD FS 343 (ECE majors) Theories, teaching strategies, and instructional materials pertinent to teaching reading, writing, listening, and speaking to children in kindergarten through third grade.

C I 380. Multicultural Foundations of School and Society: Introduction.   (3-0) Cr. 3. F.S.SS. Prereq: 201 or 202, 323 or 333, junior classification, admission to teacher education program Awareness and nature of cultural pluralism; need for multicultural education; multicultural concepts and theories; cultural groups - their perceptions, needs, and contributions; problems and issues regarding ethnocentrism, prejudice, and discrimination based on race, ethnicity, socioeconomic class, sex/gender, sexual identity, and language in the school environment; curriculum infusion and transformation, multicultural interaction, design and execution of teaching strategies. Meets U.S. Diversity Requirement

C I 401. Middle School Student Growth and Development.   (3-0) Cr. 3. Prereq: HD FS 102 or PSYCH 230 Study of the physical, emotional, mental characteristics, and social development of 10 to 15-year-old middle school students, with emphasis on implications for schools and teachers. Includes strategies for classroom management and working with parents. Issues of risk, resiliency, substance abuse, suicide, and sexuality will also be examined.

C I 402. Middle School Design, Curriculum, Instruction, and Assessment.   (3-0) Cr. 3. Prereq: 401, admission to teacher education Emphasis on the middle school components of interdisciplinary instruction, grade level teaming, differentiated instruction, methods, curriculum frameworks, teacher-based guidance, and assessment.

C I 407. Principles and Practices of Distance Learning.   (Dual-listed with 507). (2-2) Cr. 3. F.S. Prereq: 201 or 202; convenient access to the Web Review of flexible and distance learning (FDL) cases in a variety of contexts and pedagogic styles, identification of underlying principles and frameworks for best practice in this field.

C I 416. Supervised Student Teaching - Elementary. Cr. art. F.S. Prereq: GPA 2.5; full admission to teacher education program; junior classification; 378, 443, 448, 449; reservation required Supervised teaching experience in the elementary grades.

A. Primary grades (K-3).
B. Intermediate grades (4-6).
C I 417. Student Teaching.
(Dual-listed with 517). (Cross-listed with ENGL, WLC, MUSIC). Cr. arr. F.S.
Prereq: GPA 2.5; Admission to teacher education, approval of coordinator
during semester before student teaching
Evaluation of instruction, lesson planning, and teaching in the liberal arts
and sciences.
A. Social Studies-Middle School
B. Physical Sciences
C. Mathematics
D. Biological Sciences
E. English and Literature (Same as Engl 417E)
G. World Languages (Same as WLC 417G)
J. Earth Sciences
M. Social Science-Basic
N. International Student Teaching
P. Social Studies-High School
R. Music-Elementary (Same as Music 417R)
S. Music-Secondary (Same as Music 417S)

(Dual-listed with 518). (2-0) Cr. 2. F. Prereq: 280M; concurrent enrollment in 347 and 468J
Development of a research-based framework for teaching science that
includes student goals, congruent student actions, the character and
role of science inquiry, teaching behaviors and strategies, contemporary
learning theories, and self evaluation.

C I 419. Secondary Science Methods II.
(Dual-listed with 519). (2-0) Cr. 2. S. Prereq: 418 or 518, undergraduate
students must register concurrently for 468K
Advancing a research-based framework for teaching science in a variety
of school settings, emphasizing the teacher’s role, the development and
revision of science curriculum, exceptional learners, content area reading
strategies, management strategies, technology and student assessment.

(Dual-listed with 520). (3-0) Cr. 3. F. Prereq: 406
Introduction to research on bilingualism and examination of the social,
historical, and political contexts of bilingual education in U.S. schools.
Attention to policy environment, school program structure, mode of class-
room instruction, family and community context, and attainment of bilin-
gualism and biculturalism for U.S. Mexican youth.

C I 426. Principles of Secondary Education.
(Dual-listed with 526). (3-0) Cr. 3. F.S.SS. Prereq: 202, senior classifica-
tion, admission to teacher education program
The curriculum, human relations, student evaluation, support services,
classroom management, organization of schools, legal aspects of schools,
professionalism, and career planning.

C I 433. Teaching Social Studies in the Primary Grades.
(2-0) Cr. 2. F.S. Prereq: 377, HD FS 221; concurrent enrollment in 439,
SP ED 355, 455
Study, development, and application of current methods for providing
appropriate social studies learning experiences for primary grade chil-
dren. Instructional strategies, curriculum content, and formal and informal
assessment strategies for diverse learners.

C I 438. Teaching Mathematics in the Primary Grades.
(2-0) Cr. 2. F.S. Prereq: HD FS 221; MATH 195 (minimum grade of C-),
concurrent enrollment in 377, 488F, 488G, SP ED 368
Study, development, and application of current methods for providing
appropriate mathematics learning experiences for primary grade children.
Formal and informal assessment strategies and instructional methods for
diverse learners.

C I 439. Teaching Science in the Primary Grades.
(2-0) Cr. 2. F.S. Prereq: 377, HD FS 221; concurrent enrollment in 433,
438, 468I, SP ED 355, 455
Study, development, and application of current methods for providing
appropriate science learning experiences and processes for primary
grade children. Formal and informal assessment strategies and instruc-
tional methods for diverse learners.

C I 443. The Teaching of Social Studies.
(3-0) Cr. 3. F.S.SS. Prereq: 377
Study, development, and application of current methods, curriculum
materials, and assessment strategies for providing appropriate social
studies learning experiences for primary and intermediate grade children.

C I 444. Teaching Children Mathematics.
(3-0) Cr. 3. F.S. Prereq: MATH 195 (minimum grade of C-), MATH 196
(minimum grade of C-); concurrent enrollment in 377, 488A, 488C
Study, development, and application of current methods for providing
appropriate mathematical learning experiences for primary and inter-
mediate children. Includes critical examination of factors related to the
learning of mathematics.

C I 449. The Teaching of Science.
(3-0) Cr. 3. F.S. Prereq: 377, concurrent enrollment in 378, 468B, 468D,
junior classification
Procedures for teaching science to children. Emphasis on developmental
implications, teaching processes and methods, current programs, and
assessment of learning in science.

C I 450. Ethnicity and Learning.
(Dual-listed with 550). (3-0) Cr. 3. Alt. S., offered 2012. Prereq: 332 or 333,
406
Examination of cultural relevance in education. Development and applica-
tion of strategies and techniques for implementing multicultural goals and
multietnic perspectives in PreK-12 school classroom settings.

Meets U.S. Diversity Requirement

C I 452. Corrective Reading.
(Dual-listed with 552). (3-0) Cr. 3. F.S.SS. Prereq: 378 or equivalent; under-
graduate students must register concurrently for SP ED 365, 436; gradu-
ate students must have a teaching license
Identification, analysis and correction of reading problems in five areas:
print knowledge, integration of print knowledge, oral reading fluency,
vocabulary, and comprehension.

C I 454. Emerging Topics in Digital Learning.
(2-2) Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS. Prereq: 201 or
202
Development and application of emerging technology topics related to
digital learning. Series of 1-3 credit on-line learning modules on topics
such as grant writing, interactive on-line tools, social networking, gaming
technologies, technology leadership in schools, and web/graphic design.
Required for the Digital Learning minor.

C I 456. Integrating Technology into the Reading and
Language Arts Curriculum.
(Dual-listed with 556). (3-0) Cr. 3. F.SS. Prereq: 201 or 202, 377
Methods and strategies used to integrate technology into the reading and
language arts curriculum. Use and evaluation of reading and
language arts software for elementary classrooms.

C I 468. Supervised Practicum in Teaching.
Cr. 1-2. F.S.SS. Prereq: Admission to teacher education program
Observation, application of current methods, and instructional experi-
ences with children in a supervised elementary classroom while engaged
in other elementary methods courses. Offered on a satisfactory-fail basis
only.
A. Primary Grades, Reading & Language Arts. Cr. 1
B. Intermediate Grades, Reading & Language Arts. Cr. 1
C. Mathematics. Cr. 1
D. Science. Cr. 1
E. World Language. Cr. 1
C I 480. Field Experience for Secondary Teaching Preparation.
Cr. 0.5-2. Repeatable, maximum of 2 times. FS. Prereq: Permission of area coordinator required prior to enrollment
Observation and participation in a variety of school settings after admission to the teacher preparation program. (S/F grading may be used in some offerings of some sections.)

C I 486. Methods in Elementary School World Language Instruction.
(Cross-listed with WLC, LING). (3-0) Cr. 3. F. Prereq: 24 credits in a world language at 300 level and above
Planning, implementation, and assessment of standards-based, student-centered, and thematic instruction in the elementary (K-8) classroom. Special emphasis on students' communicative skills, cultural knowledge, and content learning. Nonmajor graduate credit.

(Cross-listed with WLC, LING). (3-0) Cr. 3. F. Prereq: 25 credits in a world language, admission to the teacher education program
Theories and principles of contemporary world language learning and teaching. Special emphasis on designing instruction and assessments for active learning.

C I 490. Independent Study.
Cr. 1-3. F.S.SS. Prereq: GPA of 2.5 or more for preceding semester
A. Music Education. (Same as Music 490A)
C. Curriculum Construction
D. Principles of Education
E. Methods of Teaching
F. Educational Psychology
G. Digital Learning
H. Honors
J. Multicultural Education
K. History/Social Sciences
L. Literacy Education
M. Mathematics Education
N. World Language
O. Foundations of Education

(Cross-listed with ENGL). (3-0) Cr. 3. F. Prereq: ENGL 310, 397; 9 other credits in English beyond 250, PSYCH 333, admission to teacher education program

C I 495B. Teaching Speech.
(Cross-listed with SP CM). (3-0) Cr. 3. F. Prereq: SP CM 313; 9 credits in speech communication; minimum grade point average of 2.5 in speech communication courses
Problems, methods, and materials related to teaching speech, theatre, and media in secondary schools.

(Cross-listed with MATH). (3-0) Cr. 3. F. Prereq: 15 credits in college mathematics; if in a teacher licensure program, concurrent enrollment in C I 426 or 526

C I 498. Methods of Teaching History/Social Sciences.
(Cross-listed with HIST). (3-0) Cr. 3. F. Prereq: Concurrent enrollment in 480A; Admission to teacher education and 30 credits in subject-matter field
Theories and processes of teaching and learning secondary history/social sciences. Emphasis on development and enactment of current methods, assessments, and curriculum materials for providing appropriate learning experiences.

Courses primarily for graduate students, open to qualified undergraduate students

(3-0) Cr. 3. F.S.SS. Prereq: Graduate classification
Educational philosophies and theories of instructional technology. Application of research to the production and use of instructional technology for learning and teaching. Equipment operation.

C I 503. Designing Effective Learning Environments.
(3-0) Cr. 3. F. Prereq: 501
Introduction to theories and models of instructional design. Design decision-making based on the analysis of performance problems and instructional inputs. Practical experience with the design and development of instruction and evaluation principles.

(Cross-listed with HCI). (3-0) Cr. 3. S. Prereq: 501
Principles and procedures for analysis, review, and evaluation of instructional technology interventions and products. Methods for planning, organizing, and conducting evaluative studies are addressed.

C I 505. Using Technology in Learning and Teaching.
(3-0) Cr. 3. F.S.SS. Prereq: Graduate classification

(3-0) Cr. 3. F.S.SS. Prereq: 6 graduate credits in education
Theories, legal bases, and principles of multicultural education. Pluralism and contributing cultures in the United States; presence and contributions of cultural group diversity with implications for educational programs, curriculum development, classroom instruction, materials utilization and development; problems and issues regarding ethnocentrism, prejudice, and discrimination based on race, ethnicity, socioeconomic class, sex/gender, sexual identity, and language in the school environment; curriculum infusion and transformation, multicultural interaction, design and execution of teaching strategies and techniques; inquiry and research on multicultural education issues.

(Dual-listed with 407). (2-2) Cr. 3. F.SS. Prereq: 501, convenient access to the Web
Review of flexible and distance learning (FDL) cases in a variety of contexts and pedagogic styles, identification of underlying principles and frameworks for best practice in this field.
C I 508. Algebra in the K-12 Classrooms.
(3-0) Cr. 3. F. Prereq: 448, 497 or graduate status
Focus on Algebraic concept explorations and associated procedures. Use of research-based strategies and appropriate technologies to apply fundamental ideas of patterning, coordinate graphing, and relationships among variables into K-12 classrooms. Additional topics facilitate critical examination of K-12 curriculum, pedagogy, and assessment.

C I 509. Geometry in the K-12 Classrooms.
(3-0) Cr. 3. S. Prereq: 448, 497 or graduate status
Euclidean and non-Euclidean geometry explorations with a focus on pedagogical issues in the K-12 classroom. Use of research-based strategies and appropriate technologies to teach geometry in K-12 classrooms. Additional topics from discrete mathematics, history and philosophy of geometry and fractal geometries.

C I 511. Technology Diffusion, Leadership and Change.
(3-0) Cr. 3. S. Prereq: Admission to graduate study; 501 or equivalent and 505 or equivalent
Introduction to practices and principles of technology diffusion, leadership and strategic change in education. Frameworks and strategies for professional development and organizational change; current issues such as the digital divide.

(3-0) Cr. 3. F. Prereq: Admission to graduate study and at least two courses in research and foundations of instructional technology
Critical review of current research trends to uncover underlying educational technology. Engagement with current projects' techniques and analyses for qualitative and quantitative approaches, including the application of technology for the dissemination of scholarship. Designed as a capstone course to consolidate graduate students' knowledge of current research in curriculum and instructional technology for students in M.S. and Ph.D. programs.

C I 513. Mathematical Problem Solving in K-12 Classrooms.
(3-0) Cr. 3. F. Prereq: 6 credits of mathematics, 448 or 497 or 597 or permission of instructor
Strategies for improving problem solving skills across all strands of mathematics (e.g., geometry, algebra, number theory) will be emphasized. Issues surrounding the appropriate role of problem solving in K-12 mathematics classrooms will also be discussed, including distinctions among teaching "about," "for," and "through" problem solving.

C I 514. Introduction to the Purposes and Complexities of Science Teaching.
(1-2) Cr. 2. SS. Prereq: Admission to M.A.T program
Introduction to critical issues facing science education, science education goals reflecting contemporary purposes of schooling, and how people learn science.

C I 515. Action Research in Education.
(3-0) Cr. 3. S. Prereq: Admission to graduate study, one course in research methods, educational inquiry, statistics, educational psychology, or instructional design
Philosophy and methods of conducting and communicating action research focused on improving educational practices. Designed specifically for practicing teachers.

C I 516. Antiracist Curriculum Development and Implementation.
(2-2) Cr. 3. Alt. S., offered 2013. Prereq: 9 credits in education
Introduction to historical, sociological, philosophical and pedagogical foundations of antiracist/multicultural education. Examination of causes of racism, other forms of discrimination, and intergroup conflict from different theoretical perspectives and experiential exercises.

C I 517. Student Teaching.
(Dual-listed with 417). Cr. arr. F.S. Prereq: Full admission to teacher education, approval of coordinator during semester before student teaching
Supervised student teaching in the liberal arts at the secondary level.

B. Physical Sciences
C. Mathematics

D. Biological Sciences
J. Earth Sciences
M. Science - Basic

(Dual-listed with 418). (2-0) Cr. 2. F. Prereq: 514; concurrent enrollment in 547 and 591D
Development of a research-based framework for teaching science that includes student goals, congruent student actions, the character and role of science inquiry, teaching behaviors and strategies, contemporary learning theories, and self-evaluation.

C I 519. Secondary Science Methods II.
(Dual-listed with 419). (2-0) Cr. 2. S. Prereq: 418 or 518, concurrent enrollment in 591D
Advancing a research-based framework for teaching science in a variety of school settings; emphasizing the teacher’s role, the development and revision of science curriculum, exceptional learners, content area reading strategies, management strategies, technology, and student assessment.

(Dual-listed with 420). (3-0) Cr. 3. F. Prereq: 506
Introduction to research on bilingualism and examination of the social, historical, and political contexts of bilingual education in U.S. schools. Attention to policy environment, school program structure, mode of classroom instruction, family and community context, and attainment of bilingualism and biculturalism for U.S. Mexican youth.

C I 523. Teaching Mathematics to Struggling Elementary Learners.
(3-0) Cr. 3. SS. Prereq: 438 or 448
Instructional methods and assessment techniques for elementary students struggling to learn mathematics. Emphasis on current research and practices for at-risk students and students with disabilities.

C I 524. Design and Development of Media.
(2-0) Cr. 2. S. Prereq: 501; graduate classification
Principles of the design and production of instructional media; visual development and the creation of various traditional media and emerging technologies. Laboratory experiences in the production of several instructional media.

C I 526. Principles of Secondary Education.
(Dual-listed with 426). (3-0) Cr. 3. F.S.SS. Prereq: 6 credits in education The curriculum, human relations, student evaluation, support services, classroom management, organization of schools, legal aspects of schools, professionalism and career planning.

C I 529. Educational Psychology and the Secondary Classroom.
(3-0) Cr. 3. SS. Prereq: Bachelor's degree; admission into a graduate level teacher licensure program
Analysis of psychological research theory related to learning, cognition, motivation, individual differences, and teaching techniques. Student and classroom assessment to facilitate positive learning outcomes. Adaptation and differentiation of instruction to meet individual learners’ needs. This course can only be used for teacher licensure programs. It is not acceptable for use in meeting the non-licensure M.Ed., M.S. or Ph.D. requirements.

C I 533. Educational Psychology of Learning, Cognition, and Memory.
(Cross-listed with PSYCH). (3-0) Cr. 3. F. Prereq: 333 or teacher licensure
Learning, cognition, and memory in educational/training settings.

(3-0) Cr. 3. Prereq: Bachelor's degree
Current learning theories within science education and their application to science classrooms. Examination of models which assist the implementation of these theories of learning.
C I 546. Advanced Pedagogy in Science Education.
(3-0) Cr. 3. S.SS. Prereq: Bachelor’s degree

C I 547. Nature of Science.
(Dual-listed with 347). (3-0) Cr. 3. F. Prereq: Concurrent enrollment in 518 or permission of instructor
The intersection of issues in the history, philosophy, sociology, and psychology of science and their application to and impact on science teaching and learning, science teacher education, and science education research.

C I 548. Restructuring Science Activities.
(3-0) Cr. 3. S.SS. Prereq: Admission to teacher education or teaching license
Modification of laboratory activities and other everyday science activities so they are more congruent with how students learn, the nature of science, and the National Science Education Standards.

C I 550. Ethnicity and Learning.
(Dual-listed with 450). (3-0) Cr. 3. Alt. S., offered 2012. Prereq: Graduate classification and completion of 506 or permission of instructor
Examination of cultural relevance in education. Development and application of strategies and techniques for implementing multicultural goals and multiethnic perspectives in PreK-12 school classroom settings.

Meets U.S. Diversity Requirement

C I 551. Foundations of Reading and Language Arts.
(3-0) Cr. 3. Alt. F., offered 2011. Prereq: Teaching license
Analyzing, discussing, and researching the theory and practice of current literacy issues.

C I 552. Corrective Reading.
(Dual-listed with 452). (3-0) Cr. 3. F.SS. Prereq: 378 or equivalent; undergraduate students must register concurrently for SP ED 365, 436; graduate students must have a teaching license
Identification, analysis, and correction of reading problems in five areas: print knowledge, integration of print knowledge, oral reading fluency, vocabulary, and comprehension.

C I 553. Reading for Adolescents with Mild/Moderate Disabilities.
(3-0) Cr. 3. SS. Prereq: Teaching license
Instructional strategies for enhancing the comprehension and retention of students with mild/moderate disabilities, in conjunction with content-area reading material.

C I 554. Reading and Responding to Children’s Literature.
(3-0) Cr. 3. Alt. F., offered 2012. Prereq: Senior status or teaching license
Research and discussion of issues surrounding the classroom use of literature for children and young adults including censorship, diversity, selection, and the influences of technology.

C I 555. Literacy, Leadership, and Advocacy.
(3-0) Cr. 3. S. Prereq: Graduate Standing
Examination of the roles of literacy specialists/coaches in diverse pre-K-12 schools and communities. Particular focus placed on current theories, research, standards, and policies relative to literacy processes and instruction, including culturally responsive literacy; processes of successful literacy coaching; and methods of supporting teachers and other school personnel in planning, implementing, and evaluating literacy instruction for all students.

C I 556. Integrating Technology into the Reading and Language Arts Curriculum.
(Dual-listed with 456). (3-0) Cr. 3. F.SS. Prereq: Teaching license
Methods and strategies used to integrate technology into the reading and language arts curriculum. Use and evaluation of reading and language arts software for elementary classrooms.

C I 557. Teaching Mathematics to Struggling Secondary Learners.
(Cross-listed with SP ED). (3-0) Cr. 3. Prereq: Secondary teaching experience
Instructional methods and assessment techniques for secondary students struggling to learn mathematics. Particular emphasis on current research, practices, and trends in mathematics interventions for at-risk students and students with disabilities.

C I 570. Toying with Technology for Practicing Teachers.
(Cross-listed with M S E). (2-0) Cr. 2. SS. Prereq: C I 201
A project-based, hands-on learning course. Technology literacy, appreciation for technological innovations, principles behind psychological innovations, hands-on experiences based upon simple systems constructed out of LEGO and controlled by small microcomputers. Other technological advances with K-12 applications will be explored. K-12 teachers will leave the course with complete lesson plans for use in their classrooms.

(3-0) Cr. 3. Prereq: Graduate or senior level status or permission of instructor
This course takes a nonlinear, reflective view of the historical, social, economic, political, and legal contexts of the education of African Americans in the U.S. Educational theories and philosophies, Critical Race Theory and Black Feminist Thought form the framework for investigating broad-based, multiple issues of education for African Americans in the U.S. as they are situated in the prevailing dominant views.

(2-2) Cr. 3. F.S.SS. Prereq: Graduate status, teaching license and concurrent enrollment in or completion of one course in corrective reading; diagnosis and correction of reading problems
Using formal and informal diagnostic procedures to plan and implement individualized reading instruction. Field experience in tutoring and a related research project.

C I 590. Special Topics.
Cr. 1-3. F.S. Prereq: 9 graduate credits in education
A. Curriculum
B. Digital Learning
C. Science Education
D. Secondary Education
F. Multicultural Education
G. Mathematics Education
I. Elementary Education
J. World Language Education
K. Educational Psychology
L. Social Studies Education
M. Literacy Education

C I 591. Supervised Field Experience.
(0-2) Cr. 1-6. F.S.S. Prereq: 15 graduate credits in special area
Supervised on-the-job field experience in special area.

B. World Language Education
C. Elementary Education
D. Secondary Education
F. Multicultural Education.
G. Mathematics Education.
M. Literacy

C I 593. Workshops.
Cr. 1.3. F.S. Prereq: 9 graduate credits in education
A. Curriculum
B. Digital Learning
C. Science Education
D. Secondary Education
F. Multicultural Education.
G. Mathematics Education.
I. Elementary Education
J. World Language Education
K. Educational Psychology
L. Social Studies Education
M. Literacy Education

(3-0) Cr. 3. F. Prereq: Graduate standing
Theoretical and historical perspectives of contemporary curriculum; social, cultural, and epistemological aspects of curriculum theory; political, critical-race, feminist, economic, and postmodernist approaches to understanding curriculum and schooling in the U.S.

C I 595. Teaching Reading in Middle and Secondary Schools.
(Dual-listed with 395). (3-0) Cr. 3. F. Prereq: Graduate status and teaching license
Analysis and application of strategies to enhance students' literacy development in middle and secondary school settings. Research paper related to a course topic.

C I 596. Curriculum Problems and Inquiry.
(3-0) Cr. 3. S. Prereq: Graduate standing
Analysis of contemporary problems of schooling and curriculum; use of qualitative inquiry to study diverse school policies and social problems influencing public education. Emphasis on strategies for teaching for social justice.

(3-0) Cr. 3. F. Prereq: 15 credits in college mathematics; if in a teacher licensure program, concurrent enrollment in C I 426 or 526

C I 599. Creative Component.
Cr. 1-3. F.S.SS. Prereq: 9 graduate credits in education

A. Curriculum
B. Digital Learning
C. Science Education
D. Secondary Education
F. Multicultural Education
G. Mathematics Education
I. Elementary Education
J. World Language Education
K. Educational Psychology
L. Social Studies Education
M. Literacy Education

Courses for graduate students

C I 603. Advanced Learning Environments Design.
(Cross-listed with HCI). (3-0) Cr. 3. S. Prereq: 503
Exploration of advanced aspects of the instructional design process. Application of analysis, design, development and production, evaluation, implementation, and project management principles. Focus on the production and use of instructional technology with an emphasis on the instructional design consulting process. Theory and research in instructional technology provides the foundation for design decisions.

C I 610. Digital Learning in Teacher Education.
(2-0) Cr. 2. F. Prereq: 505
Research on using technology in teacher education programs. Application examples studied. Field component involving relating material from class to a teacher education situation.

(3-0) Cr. 3. Prereq: 12 graduate credits in curriculum and instruction
Exploration of philosophies of science that serve as foundations for research and practice in instructional technology, including positivism, post-positivism, interpretivism/constructivism, and critical theory. The roles of language, nature of truth and reality, and acceptable ways of knowing are explored in terms of their implications for instructional technology design, delivery, research, and scholarship.

(3-0) Cr. 3. Prereq: 12 graduate credits in curriculum and instruction
Exploration of theories of learning and associated instructional models that are the foundation for research and practice in education and educational technology, including behaviorism, information processing theory, and cognitive science. Emphasis on cognitive and social constructivist paradigms and the creation and use of constructivist learning environments supported by technology.

C I 615. Seminar.
(0-2) Cr. 1. F.S.
Selected topics in curriculum and instruction; an analysis of research potential; evaluation of impact upon the profession; implications for additional research.

A. Curriculum
B. Digital Learning
C. Science Education
D. Secondary Education
F. Multicultural Education
G. Mathematics Education
I. Elementary Education
J. World Language Education
K. Educational Psychology
L. Social Studies Education
M. Literacy Education

C I 671. Discourse in Classrooms.
(Cross-listed with LING). (3-0) Cr. 3. Alt. F., offered 2012. Prereq: graduate classification
Explores both foundational and current literature on discourse in K-12 classrooms; focuses on both discourse as a classroom phenomenon and discourse as an analytic tool for doing research in classrooms; and provides a close look at enacted and hidden curricula through an examination of interactions and communication patterns.

C I 690. Advanced Special Topics.
Cr. arr. Repeatable. Prereq: 9 graduate credits in education

A. Curriculum
B. Digital Learning
C. Science Education
D. Secondary Education
F. Multicultural Education
G. Mathematics Education
I. Elementary Education
J. World Language Education
K. Educational Psychology
L. Social Studies Education
M. Literacy Education

C I 699. Research.
Cr. arr. Repeatable. Prereq: 9 graduate credits in education

A. Curriculum
B. Digital Learning
C. Science Education
D. Secondary Education
F. Multicultural Education
G. Mathematics Education
I. Elementary Education
J. World Language Education
K. Educational Psychology
L. Social Studies Education
M. Literacy Education
Historical, Philosophical, and Comparative Studies in Education (HPCC)

(3-0) Cr. 3. F. Prereq: Admission to graduate licensure program in teacher education or permission of instructor
An exploration of the social, historical, and philosophical context of American education today. Emphasis is given to reflection on the varying perspectives on the goals of schooling, roles of teachers, curricular and pedagogical issues, and educational policy and reform proposals. Note: This course does not meet the requirements of the M.Ed., M.S., or Ph.D. core.

HPCC 581. Philosophy of Education.
(3-0) Cr. 3. SS. Prereq: Graduate classification
The bases of American educational theory and practice. Philosophical analysis of the viewpoints on education of selected individuals and groups.

HPCC 584. Classics of Educational Philosophy.
(3-0) Cr. 3. S. Prereq: Graduate classification
Intensive study of influential statements of educational purpose, organization, curriculum, practice, and problems in the development of Western education.

HPCC 585. Comparative Education: Traditions.
(3-0) Cr. 3. Prereq: Graduate classification
Analysis of the cultural traditions of education outside the United States. Emphasis is given to an examination of the principles upon which selected national educational systems have been built. Special attention given to noneuropean traditions.

HPCC 588. History of American Education.
(3-0) Cr. 3. Prereq: Graduate classification
Historical analysis of selected educational policies, such as equal educational opportunity, governance, discipline, and teacher education. Biographies, school records, and government reports are examined. Antecedents to current issues are stressed.

HPCC 590. Special Topics.
Cr. 1-5. F.S. Prereq: 9 graduate credits in education
A. History of Education
B. Philosophy of Education
C. Comparative Education

HPCC 591. Supervised Field Experience.
Cr. 1-6. Prereq: 6 graduate credits in special area Supervised on-the-job field experience in special areas.

HPCC 599. Creative Component.
Cr. 1-3. F.S.

HPCC 615. Seminar.
(1-3) Cr. 1-3. Repeatable.

B. Philosophy of Education
C. Comparative Education

HPCC 690. Advanced Special Topics.
Cr. 1-3. Repeatable. F.S. Advanced special topics.

HPCC 699. Research.
Cr. arr. Repeatable.

Special Education (Sp Ed)

Courses primarily for undergraduate students

SP ED 250. Education of the Exceptional Learner in a Diverse Society.
(3-0) Cr. 3. FS. Prereq: C I 204
An overview of students with diverse learning needs, including legal foundations. Emphasis on early identification; educational programming, services and strategies; and preparation for community living in a heterogeneous society.

Meets U.S. Diversity Requirement

SP ED 330. Introduction to Instruction for Students with Mild/Moderate Disabilities.
(3-0) Cr. 3. F. Prereq: 250, concurrent enrollment in C I 280I, 377
Educational services and programming for students with mild/moderate disabilities examined from an historical perspective. Current trends, issues, impact of federal and state laws, and identification procedures. Characteristics of students with mild/moderate disabilities.

SP ED 334. Teaching Exceptional Learners in the General Classroom.
(3-0) Cr. 3. F. Prereq: Concurrent enrollment in SP ED 330
Evidence-based teaching strategies and instructional accommodations for inclusive education. Emphasis on managing challenging behavior.

SP ED 355. Classroom Assessment in Inclusive Primary Settings.
(2-0) Cr. 2. FS. Prereq: Concurrent enrollment in 455; C I 433, 438, 439, 468G, 468I
Examination and application of strategies for determining special educational needs, planning and evaluating instructional programs, and monitoring student progress.

SP ED 365. Classroom Assessment for Special Education.
(3-0) Cr. 3. S. Prereq: 330
Formal and informal diagnostic instruments. Determination of special education needs. Planning, adaptation, and formative evaluation of instructional programs for students with mild/moderate disabilities.

SP ED 368. Teaching in Inclusive Primary Settings.
(1-0) Cr. 1. FS. Prereq: Concurrent enrollment in C I 377, 468F Federal and state law. Service delivery models. Issues related to providing instruction that meets the needs of diverse learners in inclusive primary settings.

SP ED 401. Teaching Secondary Students with Exceptionalities in General Education.
(2-2) Cr. 3. FS. Overview of characteristics and needs of exceptional children/youth and appropriate service delivery options. Legal foundations for special education. Emphasis on co-teaching models, differentiated instruction, accommodations for instruction and assessment, and collaboration among professionals and parents.

SP ED 416. Supervised Student Teaching.
Cr. arr. F.S. Prereq: Full admission to teacher education, senior classification, elementary education major; 330, 334, 365, 436, 439; C I 280, 452
Reservation required.

SP ED 436. Instructional Methods for Students with Mild/Moderate Disabilities.
(3-0) Cr. 3. S. Prereq: C I 245, concurrent enrollment in 365
Evidence-based instructional strategies/techniques in academic areas and materials for individual instruction and classroom management for elementary students with mild/moderate disabilities.
SP ED 455. Instructional Methods for Inclusive Primary Settings.  
(2-0) Cr. 2. F.S. Prereq: Concurrent enrollment in 355; C I 433, 438, 439, 468G, 468I  
Evidence-based instructional strategies and techniques in academic areas that support the learning of students with diverse learning needs. Emphasis on accommodations and alternative teaching strategies to meet individual student needs.

SP ED 459. Field Experience - Students with Mild/Moderate Disabilities.  
(0-2) Cr. 1. F. Prereq: 365, 436, concurrent enrollment in 460  
Observation and involvement with students with mild/moderate disabilities in school settings. Offered on a satisfactory-fail basis only.

SP ED 460. Special Education Seminar.  
(1-0) Cr. 1. F. Prereq: 436, concurrent enrollment in 459  
Application of evidence-based instructional strategies/techniques in academic and behavioral areas with students who have mild/moderate disabilities. Discussion of professional practices.

SP ED 464. Collaborative Partnerships in Special Education.  
(3-0) Cr. 3. F. Prereq: SP ED 365, 436  
Collaborative skills used in education of students with mild/moderate disabilities. Includes collaboration between general and special education teachers, parents, paraeducators, and other education professionals and agencies.

SP ED 490. Independent Study.  
Cr. 1-5. F.S. Prereq: 12 credits in elementary education, permission of department chair  

Courses primarily for graduate students, open to qualified undergraduate students

SP ED 501. Teaching Secondary Students with Exceptionalities in General Education.  
(3-0) Cr. 3. SS. Prereq: Baccalaureate degree  
Overview of characteristics and needs of exceptional children/youth and appropriate service delivery options. Legal foundations for special education. Emphasis on co-teaching models, differentiated instruction, accommodations for instruction and assessment, and collaboration among professionals and parents.

SP ED 510. Foundations in Mild/Moderate Disabilities.  
(3-0) Cr. 3. S. Prereq: 501 or equivalent  
Historical and legal foundations for special education. Characteristics, prevalence, and etiology of mild/moderate disabilities. Historical and contemporary models of programming for students with disabilities.

SP ED 511. Foundations of Behavior Disorders and Learning Disabilities.  
(3-0) Cr. 3. S.  
Study of theory, characteristics, and special education service delivery models to students with moderate/severe behavior/learning disabilities in the public schools and residential settings.

SP ED 515. Assessment of Children and Youth with Disabilities.  
(3-0) Cr. 3. F. Prereq: 510 or 511  
Formal and informal methods of assessment for identification/eligibility, IEP development, and progress monitoring. Formative evaluation of academic and behavioral skills, including curriculum-based measurement and functional behavioral assessment.

SP ED 517. Research in Special Education.  
(2-0) Cr. 2. SS. Prereq: RESEV 550, SP ED 515  
Critical review of recent research in education and related behavioral sciences as applied to education of students with disabilities. Examination of multiple research methodologies.

SP ED 520. Evidence-based Practices for Mild/Moderate Disabilities.  
(3-0) Cr. 3. Prereq: 510, 515  
Evidence-based instructional methods for meeting the academic and behavioral needs of students with mild/moderate disabilities. Includes methods, strategies, and behavior management techniques appropriate for students with mild or moderate disabilities.

SP ED 530. Evidence-based Practices in Behavior Disorders.  
(3-0) Cr. 3. S. Prereq: 511, 515  
Current research on evidence-based interventions designed to improve the behavior and social skills of students with moderate/severe behavior disorders. Particular emphasis on positive behavioral supports and behavior change strategies.

(3-0) Cr. 3. S. Prereq: 511, 515  
Current research on evidence-based interventions designed to improve the academic performance of students with moderate/severe learning disabilities. Particular emphasis on methods for improving reading, written expression, and mathematics, as well as performance in content-area instruction.

SP ED 553. Teaching Struggling Adolescent Readers.  
(Cross-listed with C I). (3-0) Cr. 3. SS. Prereq: Teaching license  
Instructional strategies for enhancing the fluency, vocabulary and comprehension of struggling adolescent readers. Attention to content-area reading materials and strategies.

SP ED 555. Career Education and Transition for Youth with Disabilities.  
(2-0) Cr. 2. SS. Prereq: 510 or 511  
Examination of the academic, personal, social, employability, and daily living skills needed for a satisfactory adult life. Exploration of curricula, programs, and services to meet these needs.

SP ED 560. Classroom Management/Behavior Support.  
(3-0) Cr. 3. F. Prereq: Teaching license  
Emphasis on positive behavioral supports and understanding behavior and its context through a functional behavioral approach. Design and development of carefully planned behavioral intervention programs for groups and individual students in general and special education settings.

SP ED 564. Collaborative Consultation.  
(3-0) Cr. 3. F. Prereq: 515, 520 or 530 or 540  
Models of consultation. Characteristics and methods to promote effective collaboration with families, paraprofessionals, other school personnel, and representatives of other agencies. Includes specific attention to IEP development as a collaborative process.

SP ED 565. Role of the Consultant.  
(1-0) Cr. 1. Prereq: 564  
Explore role of the educational consultant in different settings (state department, area education agency, school district, private). Examine roles in relationship to models (mental health, collaborative, organization).

SP ED 567. Teaching Mathematics to Struggling Secondary Learners.  
(Cross-listed with C I). (3-0) Cr. 3. Prereq: Secondary teaching experience  
Instructional methods and assessment techniques for secondary students struggling to learn mathematics. Particular emphasis on current research, practices, and trends in mathematics interventions for at-risk students and students with disabilities.

SP ED 570. Systems-level Supports for Youth with Behavior and Learning Disabilities.  
(3-0) Cr. 3. SS. Prereq: 511  
Overview of support systems (education, juvenile justice, mental health, communities) that serve students with special education needs. Working with and supporting families.
SP ED 590. Special Topics.
Cr. 1-5. F.S. Prereq: 15 credits in education, permission of department chair

SP ED 591. Supervised Field Experience.
(0-2) Cr. 1-6. F.S. Prereq: 15 graduate credits in special area, admission to the graduate program in special education
Supervised on-the-job field experience in special areas.
G. Mild/Moderate Disabilities, K-8;
H. Mild/Moderate Disabilities, 5-12;
K. Behavior Disorders/Learning Disabilities, Ages 5-21

SP ED 599. Creative Component.
Cr. 1-5. F.S.S.S. Prereq: 15 credits in education

Courses for graduate students

SP ED 615. Seminar.
(1-0) Cr. 1. Repeatable, maximum of 2 credits.
Selected topics in special education. Analysis of current special education research. Evaluation of impact upon the profession. Implications for additional research.

SP ED 699. Research.
Cr. arr. Prereq: 15 credits in education
Curriculum in Diet and Exercise B.S./M.S.

Administered by the Department of Food Science and Human Nutrition and Department of Kinesiology

This is an accelerated program with concurrent enrollment in the undergraduate and graduate degree programs. Courses included have been approved by meeting the academic requirements of the Didactic Program in Dietetics (DPD) in preparation for admission to dietetic internship programs; the DPD is accredited by the Commission on Accreditation for Dietetics Education, the accrediting agency of the American Dietetic Association. There is a $30 fee for the verification statement of completion of the accredited didactics program. Courses also are included to meet the ACSM requirements for certification at the level of Health Fitness Instructor.

Total Degree Requirements: 123.5 cr. for bachelor’s degree and 39-40 cr. for master’s degree

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements.

Interpersonal and public communication skills: 9.5 cr.

- ENGL 150 Critical Thinking and Communication 3
- ENGL 250 Written, Oral, Visual, and Electronic Composition 3
- LIB 160 Library Instruction 0.5
- SP CM 212 Fundamentals of Public Speaking 3
- Total Credits 9.5

Mathematical Sciences:

- MATH 140 College Algebra 3
- MATH 142 Trigonometry and Analytic Geometry 3
- MATH 160 Survey of Calculus 4
- MATH 165 Calculus I 4
- or MATH 181 Calculus and Mathematical Modeling for the Life Sciences I 4
- STAT 101 Principles of Statistics 4
- STAT 104 Introduction to Statistics 3
- or STAT 226 Introduction to Business Statistics I 3
- One of the following: 4
- CHEM 163 College Chemistry
- & CHEM 163L and Laboratory in College Chemistry
- CHEM 177 General Chemistry I
- & CHEM 177L and Laboratory in General Chemistry I
- CHEM 178 General Chemistry II
- CHEM 231 Elementary Organic Chemistry
- & CHEM 231L and Laboratory in Elementary Organic Chemistry
- PHYS 106 The Physics of Common Experience 4
- or PHYS 111 General Physics 4
- BBMB 301 Survey of Biochemistry 3
- BIOL 211 Principles of Biology I 3
- BIOL 212 Principles of Biology II 3
- BIOL 255 Fundamentals of Human Anatomy 3
- BIOL 255L Fundamentals of Human Anatomy Laboratory 1
- BIOL 256 Fundamentals of Human Physiology 3
- BIOL 256L Fundamentals of Human Physiology Laboratory 1
- MICRO 201 Introduction to Microbiology 2
- Total Credits 48

Humanities: 6 cr.

Select 3 credits from approved humanities course list; select 3 credits from approved ethics course list (if ethics course selected is not on the humanities list, 3 additional credits of humanities must be taken).

PSYCH 101 Introduction to Psychology

PSYCH 230 Developmental Psychology

Diet and Exercise undergraduate courses: 19-22 cr. Courses must be completed or in progress to apply to the BS/MS program.

one of the following:
- KIN 252 Disciplines and Professions in Kinesiology and Health
- KIN 253 Orientation in Kinesiology and Health
- FS HN 110 Professional and Educational Preparation
- KIN 258 Physical Fitness and Conditioning 2
- FS HN 167 Introduction to Human Nutrition 3
- FS HN 214 Scientific Study of Food 3
- FS HN 115 Food Preparation Laboratory 1
- or FS HN 215 Advanced Food Preparation Laboratory
- FS HN 265 Nutrition for Active and Healthy Lifestyles 3
- FS HN 360 Advanced Human Nutrition and Metabolism 3
- H S 110 Personal and Consumer Health 3
- Total Credits 19

Acceptance into the BS/MS PROGRAM is required BEFORE spring semester of the THIRD year.

Diet and Exercise remaining undergraduate courses to complete the BS requirements: 41 cr.

- H S 380 Worksite Health Promotion 3
- KIN 220 Basic Athletic Training 2
- KIN 259 Leadership Techniques for Fitness Programs 2
- KIN 345 Management of Health-Fitness Programs and Facilities 3
- KIN 358 Physiology of Exercise 3

one of the following:
- KIN 355 Biomechanics
- KIN 360 Sociology of Sport and Exercise
- KIN 366 Exercise Psychology
- KIN 372 Motor Control and Learning Across the Lifespan 3
- KIN 462 Medical Aspects of Exercise 3
- FS HN 361 Nutrition and Health Assessment 2
- FS HN 403 Food Laws, Regulations, and the Regulatory Process 2
- FS HN 411 Food Ingredient Interactions and Formulations 2
- FS HN 466 Nutrition Counseling and Education Methods 3
- HRI 380 Quantity Food Production Management 3
- HRI 380L Quantity Food Production and Service Management Experience 2
- HRI 392 Foodservice Systems Management II 3
- NUTRS 561 Medical Nutrition and Disease I 3-4

Diet and Exercise graduate courses: 37 cr.

- FS HN 581 Seminar 1
- FS HN 590C Teaching 1-3
- NUTRS 501 Biochemical and Physiological Basis of Nutrition: Macronutrients and Micronutrients 4
- NUTRS 561 Medical Nutrition and Disease I 3-4
- NUTRS 563 Community Nutrition 3
- NUTRS 564 Medical Nutrition and Disease II 3-4
- KIN 501 Research Methods in Physical Activity 3
- KIN 505 Research Laboratory Techniques in Exercise Physiology 2
- KIN 551 Advanced Physiology of Exercise II 3
- KIN 550 Advanced Physiology of Exercise I 3
- or KIN 570 Physical Activity Assessment for Health Related Research 3
- KIN 558 Physical Fitness - Principles, Programs and Evaluation 3
- 6 credits from: 6
- NUTRS 699 Research in Nutritional Sciences
- or KIN 699 Research
- STAT 401 Statistical Methods for Research Workers 4
Interinstitution Graduate Program

Participating institutions: Iowa State University; Colorado State University; Kansas State University; Michigan State University; Montana State University; North Dakota State University; Oklahoma State University; South Dakota State University; University of Kansas Medical Center; University of Nebraska.

Dietetics is an interinstitutional distance education program offered through the Web. The student selects a home institution, which grants the degree. After admission at the home institution, the student takes courses from each of the ten institutions: Iowa State University, Colorado State University, Kansas State University, Michigan State University, Montana State University, North Dakota State University, Oklahoma State University, South Dakota State University; Kendra Kattelman, University of Kansas Medical Center, and University of Nebraska.

At Iowa State University, Dietetics is a specialization within the Master of Family and Consumer Sciences degree program (MFCS-Diet) that consists of 36 credits. This is a non-thesis option and a special project or creative component is required. Students typically complete the program in 6-8 semesters while employed full-time. Admission is limited to those who are Registered Dietitians or Registration-eligible Dietitians. A computer with minimum specifications, web access, and an email address are required for completing the program.

Admission procedures: Admission to the MFCS-Diet program requires exactly the same procedures as admission to the Graduate College. See Graduate College section of this catalog.

Registration: Students choosing to receive their degree from Iowa State University complete all the admissions, registration and fee payment processes through ISU.

The department cooperates in the interinstitution Master of Family and Consumer Sciences program to offer a specialization in Dietetics. The Master of Family and Consumer Sciences-Dietetics is designed for the Registered Dietitian or Registration-eligible Dietitian. The 36 credit program is non-thesis and seeks to develop research skills, stimulate independent thought, and provide up-to-date knowledge in foods, nutrition, and foodservice/business management. This program prepares individuals to integrate and apply the principles from the biomedical sciences, human behavior, and management to design and lead effective food and nutrition programs in a variety of settings. Students may build a program of study from offerings of the partner institutions such as human nutrition, nutrient metabolism, biostatistics, health promotion/disease prevention, foodservice systems management, food science, lifespan nutrition, wellness, entrepreneurship, nutrition education, nutritional assessment and food safety. The online program is tailored for credentialed, practicing dietetics professionals who seek to enhance their knowledge in a specific area of dietetics practice or retool for new career opportunities in dietetics practice.

Curriculum in Dietetics - CHS

Administered by the Department of Food Science and Human Nutrition

The dietetics undergraduate curriculum meets the academic requirements as the Didactic Program in Dietetics and is accredited by the Commission on Accreditation for Dietetics Education, the accrediting agency of the American Dietetic Association. Graduates of the program are eligible for admission to accredited/approved supervised practice programs/dietetic internships. There is a $30 fee for the verification statement of completion of the accredited dietetics program.

Total Degree Requirement: 120.5 cr.

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements. Only 65 cr. from a two-year institution may apply to the degree which may include up to 16 technical cr.; 9 P-NP cr. of electives; 2.00 minimum GPA.

International Perspectives: 3 cr.
U.S. Diversity: 3 cr.

Communications/Library: 9.5 cr.

HRI 391 Foodservice Systems Management I 3
HRI 392 Foodservice Systems Management II 3
Total Credits 11

Electives: 0-14 cr. Select from any university coursework to earn at least 120.5 total credits.

Courses primarily for graduate students

DIET 511. Research Methods. (3-0) Cr. 3. F. Prereq: enrollment in GP-IDEA MFCS in Dietetics
An overview of diverse research approaches focusing on methods for collecting and analyzing quantitative and qualitative data. www only. Only one of DIET 511 or FCEdS 511 may count toward graduation.

DIET 530. Nutrition in Wellness. (3-0) Cr. 3. SS. Prereq: enrollment in GP-IDEA MFCS in Dietetics
Addresses wellness promotion through nutrition. Nutritional risk and protective factors will be examined in relation to public health and individual nutrition. www only.

DIET 532. Maternal and Child Nutrition. (3-0) Cr. 3. SS. Prereq: enrollment in GP-IDEA MFCS in Dietetics
Critical examination of behavioral, physiological, and public health issues impacting dietary and nutritional factors that support normal growth and development. Content focuses on early stages of the life cycle: gestation, lactation, infancy, preschool, school age, and adolescence. www only.

DIET 534. Nutrition Education in the Community. (3-0) Cr. 3. SS. Prereq: enrollment in GP-IDEA MFCS in Dietetics
Principles and practices of teaching individuals and groups to translate nutrition knowledge into action. Emphasis on research in and evaluation of nutrition education. www only.

DIET 538. Nutrition: A Focus on Life Stages. (3-0) Cr. 3. SS. Prereq: enrollment in GP-IDEA MFCS in Dietetics
Explores influence of normal physiological stresses on nutritional needs throughout the life span. Evaluates dietary intake and identification of appropriate community nutrition services in on-line discussions. Specific considerations, such as the influence of age and cultural heritage, are incorporated. www only.

WWW only. Basic physiologic changes during aging and their impacts in health and disease. The focus will be on successful aging with special emphasis on physical activity and nutrition. Practical application to community settings is addressed.

DIET 544. Pediatric Clinical Nutrition. (3-0) Cr. 3. F. Prereq: enrollment in GP-IDEA MFCS in Dietetics
Examines the physiological, biochemical and nutritional aspects of disease processes relevant to infants and children up to 18 years of age. Discussion of medical nutrition therapy for a variety of medical conditions in this population including inborn errors of metabolism, food hypersensitivity, obesity, and diseases of the major organ systems. www only.

DIET 546. Phytochemicals. (3-0) Cr. 3. F. Prereq: enrollment in GP-IDEA MFCS in Dietetics
Overview of phytochemicals (non-nutritive biologically active compounds) from fruits, vegetables, cereals and oilsseeds. Covers recent findings of chemistry, physiological functions, and potential health implications of phytochemicals. www only.

DIET 548. Professional Development Assessment. (1-0) Cr. 1. F.S.SS. Prereq: Enrollment in GP IDEA MFCS in Dietetics
Web-based course providing information and practice for student to assess and evaluate own professional development and continuing professional education needs. Completion of professional 5-year plan. Offered on a satisfactory-fail basis only.

DIET 550. Finance and Cost Controls. (3-0) Cr. 3. F. Prereq: enrollment in GP-IDEA MFCS in Dietetics
Overview of the fundamental knowledge of hospitality managerial accounting, cost controls, and financial management. Important topics include financial statement analysis, cost concepts, cost-volume-profit analysis, calculating and controlling food and beverage costs, pricing, and capital budgeting. www only.

DIET 554. Statistics. (3-0) Cr. 3. S.SS. Prereq: enrollment in GP-IDEA MFCS in Dietetics
Tools used to make statistical decisions. Major emphasis on explanation and understanding of important concepts involved; basic theme is understanding of data and methods used to analyze such data. www only. Only one of DIET 554 or Stat 401, 495, 542 may count toward graduation.

DIET 556. Advanced Nutrition: Micronutrients. (3-0) Cr. 3. S. Prereq: BBMB 404 or BBMB 420 or equivalent; enrollment in GP-IDEA MFCS in Dietetics
Integration of the molecular, cellular and physiological aspects of vitamins and minerals in mammalian systems. Interactions among nutrients, metabolic consequences of deficiencies or excesses, relevant polymorphisms, major research methodologies, and current topics related to micronutrients and non-nutrient components. www only. Only one of DIET 556 or NUTRS 502 may count toward graduation.

DIET 558. Advanced Nutrition: Macronutrients. (3-0) Cr. 3. F. Prereq: BBMB 404 or BBMB 420 or equivalent; enrollment in GP-IDEA MFCS in Dietetics
Integration of the molecular, cellular and physiological aspects of macronutrients and energy metabolism in mammalian systems. Dietary energy, carbohydrates, fiber, lipids, proteins, their interactions, metabolic consequences, and major research methodologies. www only. Only one of DIET 558 or NUTRS 501 may count toward graduation.

DIET 560. Medical Nutrition and Disease. (3-0) Cr. 3. F.S.SS. Prereq: enrollment in GP-IDEA MFCS in Dietetics
Pathophysiology of selected acute and chronic disease states and their associated medical problems. Specific attention directed to medical nutrition needs of patients in the treatment of each disease state. www only. Only two of DIET 560 or NUTRS 561, 564 may count toward graduation.

DIET 565. Malnutrition in Low-Income Countries. (3-0) Cr. 3. SS. Prereq: enrollment in GP-IDEA MFCS in Dietetics
Identification and assessment of malnutrition in low-income countries. Social, cultural, political, economic, and geographic determinants of malnutrition. Protein-energy malnutrition, vitamin and mineral deficiencies. Intervention approaches; international efforts and local sustainability. www only.
DIET 566. Nutrition Counseling and Education Methods.  
(Cross-listed with FS HN). (2-2) Cr. 3. F.S.  
Prereq: enrollment in GP-IDEA MFCS in Dietetics  
Dual listed with FS HN 466. Application of counseling and learning theories with individuals and groups in community and clinical settings. Includes discussion and experience in building rapport, assessment, diagnosis, intervention, monitoring, evaluation, and documentation. Literature review of specific counseling and learning theories. www only.

(3-0) Cr. 3. Alt. F, offered 2011. Prereq: 360; BBMB 301, undergraduate course in physiology; enrollment in GP-IDEA MFCS in Dietetics  
Study of the current scientific literature to evaluate current trends and issues in nutrition science and dietetic practice. Emerging areas of research investigating the role of nutrients in health and disease in humans will be explored. Emphasis on the impact of emerging research on nutrition recommendations and interventions designed to promote human health. www only.

DIET 568. Entrepreneurship in Dietetics.  
(3-0) Cr. 3. F. Prereq: enrollment in GP-IDEA MFCS in Dietetics  
Definition and discussion of entrepreneurship and its importance to economic and business environment. www only.

(3-0) Cr. 3. S. Prereq: enrollment in GP-IDEA MFCS in Dietetics  
Develop an understanding of nutrition based on knowledge of the biochemical and physiological process and functions of specific nutrients in meeting nutritional requirements. Emphasis on the relationship of optimal nutrition and physical efficiency and performance. www only.

DIET 572. Environmental Scanning and Analysis of Current Issues in Dietetics.  
(3-0) Cr. 3. S. Prereq: enrollment in GP-IDEA MFCS in Dietetics  
Overview of current topics, issues, and trends in dietetics practice. www only.

DIET 573. Administration of Health Care Organizations.  
(3-0) Cr. 3. SS. Prereq: enrollment in GP-IDEA MFCS in Dietetics  
A comprehensive review of today’s health care institutions and their response to the economics, social, ethical, political, legal, technological, and ecological environments. www only.

DIET 595. Proposal and Grant Writing for the Working Professional.  
(1-0) Cr. 1. Alt. F, offered 2011. Prereq: enrollment in GP-IDEA MFCS in Dietetics  
Grant proposal preparation experiences including writing and critiquing of proposals and budget planning. Designed for the working professional. www only.

DIET 599. Creative Component.  
Cr. arr. Repeatable. F.S.SS. Prereq: Enrollment in GPIDEA MS Dietetics  
For non-thesis option only.
Educational Leadership and Policy Studies

Departmental Mission, Vision and Goals statements

Mission:
The mission of the Department of Educational Leadership and Policy Studies is to advance the quality and effectiveness of educational institutions and individuals engaged in education. The department is guided by the missions of Iowa State University and the College of Human Sciences and embodies the concepts of the land-grant tradition of teaching, research, and service. The department is dedicated to enhancing the intellectual, cultural, social, and ethical potential of students and faculty for the benefit of Iowa, the nation, and the world. Specifically, the Department of Educational Leadership and Policy Studies:

• Provides graduate degree and career preparation programs, coursework, and other learning opportunities for students and practitioners.
• Conducts and disseminates basic and applied research for the advancement of educational theory and practice.
• Provides professional service for institutions, individuals, and organizations at all levels of education.

Vision:
Research: All Educational Leadership and Policy Studies faculty create and disseminate knowledge and promote educational inquiry that enhances educational practices at local, state, national, and international levels.

Teaching: All Educational Leadership and Policy Studies faculty engage in teaching that is consonant with the principles of adult learning and effective teaching that help students develop critical thinking and professionally relevant skills, and that provides a foundation for the application of knowledge to practice.

Service: All Educational Leadership and Policy Studies faculty, using their professional expertise, work with educators, educational institutions, and other constituent groups to solve problems.

Advising: All Educational Leadership and Policy Studies faculty foster students' professional and personal growth by guiding and inspiring them to formulate and complete relevant programs of study and to conduct high quality research.

Curricula/Program: The Educational Leadership and Policy Studies faculty develop and implement futuristic curricula and programs to ensure that students learn to think critically and perform their professional roles in an exemplary fashion.

General Goals:
The general goals of the department, and hence of each of its program areas and affiliated programs, are to:

• Conduct high quality graduate education programs, both on- and off-campus, for students seeking graduate degrees in a major in education and/or seeking professional licensure as school service personnel.
• Establish appropriate conditions, opportunities, and resources with which both faculty and graduate students may engage in scholarly activities.
• Assist the educational enterprise of Iowa in development by utilizing, when appropriate, the talents and expertise of the faculty and graduate student body in such activities as workshops, conferences, and consultation in small groups, both on- and off-campus.

Graduate Study

Degrees: The Department of Educational Leadership and Policy Studies – ELPS – offers work for the degrees master of science, master of education, certificate of advanced studies, and doctor of philosophy with a major in education. ELPS also offers minor work to students majoring in other fields of study. At the master’s level, students may specialize in educational administration; higher education; and research and evaluation. Interested students should consult the specific program area for master’s degree information related to that program.

Students may complete the Ph.D. with a major in education and a specialization in educational leadership with emphasis in either educational administration or higher education. Specific information about the requirements of the Ph.D. degree is available from the departmental office or on the web (www.elps.hs.iastate.edu/elps/elpsdoc.htm).

The following information refers only to the Ph.D. program:

Prerequisites: Prerequisite to major graduate work in educational leadership is completion of an undergraduate degree with coursework appropriate to the planned specialization, and evidence that the student ranks above average in scholastic achievement and promise of professional competence. In addition it is preferred that students complete a master’s degree and 3-5 years of professional experience.

Learning Opportunities: Doctoral students in Educational Leadership and Policy Studies will complete seminars, laboratory experiences, field experiences, independent research, and a capstone experience course. In addition to the common experiences noted above, students will each select an intellectual content area that will prepare them to work in the setting of their choice.

Careers: Graduates of the doctoral program are prepared to serve as leaders in various educational settings, including school administration, community colleges, public and private colleges and universities, and public and private educational agencies.

Outcomes: Graduates of the Ph.D. program, regardless of the emphasis chosen, possess skills and knowledge related to five core domains: leadership, educational research, communication, educational evaluation, and educational foundations. By the time of graduation, students will demonstrate the necessary skills and knowledge to:

• Work effectively with individuals and groups.
• Engage in ethical decision-making and management of resources to accomplish goals.
• Engage in scholarly inquiry.
• Express ideas clearly, both orally and in writing.
• Articulate their values, beliefs, and Philosophy of life.
• Relate sensitively to individuals from diverse backgrounds.
• Use the principles of program evaluation and assessment intelligently.
• Have a clear understanding of the foundations of education, grounding their work in theory and Philosophy.
• Articulate the concepts, theories, and practices related to the educational content area emphasized in their studies.

Other Related Programs: Other graduate programs related to education (including Interdisciplinary Graduate Studies) may be more suited to the interests of potential students on the basis of previous education and experiences as well as future plans and needs. Potential students should refer to programs in the Departments of Agricultural Education and Studies, Curriculum and Instruction, Family and Consumer Sciences Education and Studies, Kinesiology, and Interdisciplinary Graduate Studies, or to graduate level course offerings within the other departments, to determine if these offerings may be more closely matched with their career interests.

The following information refers only to the masters level programs:

Prerequisites: Prerequisite to major graduate work in educational leadership is completion of an undergraduate degree with coursework appropriate to the planned specialization, and evidence that the student ranks above average in scholastic achievement and promise of professional competence.
Educational Administration (EdAdm)

Degrees and Certificates: Several programs are offered: (1) master of science degree, with thesis or creative component, in elementary or secondary school administration; (2) master of education practitioner; (3) advanced study leading to principal’s license; (4) certificate of advanced studies providing post-master’s training for superintendent licensure; and (5) doctor of philosophy with major in education and specialization in educational leadership. Courses are scheduled with consideration for cohort-collegial teams or groups.

Emphasis: The Educational Administration Program places dual emphasis on preparation of professional educational administrators and on the academic/scholarly aspects of educational leadership and management.

Prerequisites: Prerequisite to major graduate work in educational leadership is completion of an undergraduate degree with coursework appropriate to the planned specialization, and evidence that the student ranks above average in scholastic achievement and promise of professional competence.

Learning Opportunities: Students will complete courses, laboratory experiences, field experiences, and independent research so that they can effectively serve in leadership roles.

Careers: Graduates of Master’s Degree and Certificate of Advanced Study Programs in Educational Administration are prepared for leadership roles in Pre K-12 school districts and education agencies, typically as building-level principals, assistant principals, curriculum directors, and central office administrators. Doctoral graduates are prepared for Pre-K-12 leadership roles and academic or leadership positions in higher education.

Outcomes: Graduates of the Certificate of Advanced Studies Program will possess administrative and leadership skills necessary for the superintendent and central office administration. By the time of graduation, students will demonstrate the necessary skills and knowledge to:

- Serve as visionary leaders, with effective skills in curricular and instructional leadership.
- Work effectively with individuals and groups, both within the district and community, to create and sustain a positive learning culture.
- Engage in ethical decision-making and effective management of human, material, and financial resources to accomplish district goals.
- Express ideas clearly to various publics, both orally and in writing.
- Articulate their values, beliefs, and Philosophies of education.
- Relate sensitively to individuals from diverse backgrounds.
- Access and utilize research information and technology to assist with organizational improvement.
- Translate educational administration concepts and theories into sound management and leadership practices.

Graduates of the Master’s Program with a specialization in educational administration and the Principal Licensure Program possess administrative and leadership skills necessary for PreK-12 building-level leadership roles. Upon program completion, each student will possess the knowledge and skills to:

- Work effectively with all members of the school community to create a shared vision of learning, which builds upon the formation of a shared understanding of the purposes of schooling in a pluralistic society.
- Demonstrate effective skills in collaborative instructional leadership, including an understanding of curriculum standards, principles of effective teaching practices, and effective assessment practices that lead to improved student learning.
- Implement a system of shared governance and empower faculty, staff, students, and families in the school improvement process.
- Create and sustain a safe and caring school culture that values diversity and maintains a commitment to equity in school practices.
- Engage in ethical and moral leadership practices and the effective management of human, material, and financial resources to accomplish school goals.

- Work collaboratively with internal and external stakeholders in responding to school needs and providing community resources to support the learning process.
- Access research and use data to inform teaching and learning practices and support the process of continuous improvement.
- Apply various technologies to support and enhance administrative and instructional purposes.
- Use leadership skills to transform the school into a learning community that promotes change and sustains school improvement initiatives.
- Engage all members of the school community in critical inquiry and reflection, to promote the belief that learning is a lifelong endeavor for every individual.

Graduates of the Ph.D. Program with a specialization in educational administration will possess skills and knowledge related to the six core domains: leadership, educational research, communication, educational evaluation, educational foundations, and educational technology. By the time of graduation, students will demonstrate the necessary skills and knowledge for those outcomes as listed under the ELPS Ph.D. program outcomes.

Courses primarily for graduate students, open to qualified undergraduate students

EDADM 541. Principles of Educational Leadership.
(3-0) Cr. 3. F.S.SS. Prereq: Teacher licensure and permission of instructor
Basic principles of educational organizations, including an understanding of organizational behavior and theoretical approaches to administration. Exploration of substantive elements related to school reform, such as leadership, the change process, current issues in education, and developing a shared vision and mission.

EDADM 551. Supervision for Learning Environments.
(3-0) Cr. 3. F.S.SS. Prereq: 541
Study of effective classroom instructional practices that reflect current principles of learning. Understanding and practice of supervisory techniques that support teachers in improving the teaching and learning process, including skills in observational data collection, data analysis, collaboration, and conferencing skills.

EDADM 552. Current Issues in Site-Level Leadership.
(3-0) Cr. 3. F.S.SS. Prereq: 541
Essential tasks of building-level leadership and management in contemporary school settings, including: curriculum and organizational structure, theory and practice of scheduling, financial management, roles and responsibilities of governance, communication and public relations skills, home/parental involvement and relationships, project and crisis management, technology integration, school climate and culture, effective student support programs such as counseling and guidance, attendance and discipline.

EDADM 554. Leading School Reform.
(3-0) Cr. 3. F.S.SS. Prereq: 541
Study of principles of transformational leadership and collaborative decision-making skills. Leadership activities that facilitate the development of a school culture that embraces change and school reforms that result in high quality schools dedicated to improved student achievement.

EDADM 556. School Systems as Learning Cultures.
(3-0) Cr. 3. F.S.SS. Prereq: 541
Practical and theoretical perspectives on school administrative problems from critical pedagogical studies and research. Exploration of related issues such as cultural literacy, forms of authority and control, and other historical problems of schools in dealing with minorities and culturally different persons.
(3-0) Cr. 3. F.S.SS. Prereq: 541
Leadership theory and practice that focuses on the professional develop-
ment of school staff to promote improved student learning. Principles
of school personnel evaluation; legal issues related to hiring, retention,
and dismissal; evaluation models for professional and classified staff; and
effective professional development models to support lifelong learning
and reflective practice.

(3-0) Cr. 3. F.S.SS. Prereq: 541
Learner needs will be examined from major psycho/social perspectives
with stress upon developmental phases of normal growth along with
common problems encountered in schools. Issues of racism, gender
bias, and socio-economic problems that influence learner responsive-
ness to school curricula and administrative regulations, routines, and
legal requirements.

EDADM 559. Curriculum Leadership.
(3-0) Cr. 3. F.S.SS. Prereq: 541
Generic administrative approaches to the design and delivery of element-
ary and secondary school curricula including the study of the organiza-
tions for learning; cognition and learning theories; validation; concepts
of balance; school goals, student assessments and reporting of progress,
alignment, and professional development; development of curriculum
guides; mapping; employing national standards and benchmarks.

EDADM 575. Education Law and Ethics.
(3-0) Cr. 3. F.S.SS. Prereq: 541
Examination of constitutional, statutory, and judicial provisions as a basis
for the legal operation of educational institutions. Rights and ethical
responsibilities of school leaders are examined in relation to their roles
and responsibilities with boards, other school personnel, and students.

EDADM 590. Special Topics.
Cr. 1-4. Repeatable. Prereq: 9 credits in education

EDADM 591. Supervised Field Experience.
Cr. 1-6. Repeatable. Prereq: 541 and admission to program and
instructor's approval
Supervised on-the-job field experience in special areas.

A. Elementary Principal
B. Secondary Principal

EDADM 593. Workshops.
Cr. 1-4. Prereq: 9 credits in education

EDADM 599. Creative Component Development.
Cr. 1-3. Prereq: 9 credits in educational administration

Courses for graduate students

EDADM 615. Seminar.
Cr. 1-3. Repeatable.
In-depth study of administrative topics of contemporary interest and
importance.
A. Client Focus
B. Research
C. Quality Improvement
D. Special Services
E. Assessment
F. Leadership

EDADM 620. Program Induction Leadership Seminar.
(3-0) Cr. 3. SS. Prereq: 541
Assessment of candidate skill areas, including communication, leader-
ship, technology, and team facilitation for the development of an individu-
alized learning plan for the program. Orientation to program expectations
and leadership challenges in the context of schooling for a global society.

EDADM 621. Aligning the System for Student Achievement.
(5-0) Cr. 5. F. Prereq: 541
Alignment of system goals and leadership theory with student achieve-
ment, governance, systems thinking, and communication and collabora-
tion with various publics.

EDADM 622. Maximizing Human and Financial Resources for
Student Achievement.
(3-0) Cr. 3. S. Prereq: 541
Allocation of system resources to enhance student achievement; human
resource development and negotiations; and coaching and evaluating the
administrative team.

EDADM 623. Mid-Program Leadership Seminar.
(1-0) Cr. 1. SS. Prereq: 541
Mid-program assessment of candidate progress and exploration of lead-
ership strategies for working with diverse populations.

EDADM 624. School Finance.
(2-0) Cr. 2. SS. Prereq: 541
General issues of school finance and managing school financial affairs.
Role of the federal, state and local governments in educational finance,
tax issues, and structures; bonding; budget procedures; and non-public
school finance issues. Includes attendance at selected sessions of the
Iowa School Business Management Academy in May and two additional
class sessions.

EDADM 631. Achieving Results Through Accountability
Strategies.
(5-0) Cr. 5. F. Prereq: 541
Accountability strategies for applying leadership theory to student
achievement, governance, systems thinking, change agentry, and
communication and collaboration with various publics.

EDADM 632. Using System Assets to Create a Culture of
Learning.
(3-0) Cr. 3. S. Prereq: 541
Leadership strategies to promote a culture of high student achievement;
effective human capital management, including recruitment and induction
of new personnel; and effective communication with parents and other
patrons.

(1-0) Cr. 1. SS. Prereq: 541
Development of entry plan for creating a culture of collaboration; profes-
sional growth plan for first year in new position; and authentic perfor-
mance assessment of values and beliefs platform.

EDADM 634. School Business Management and Account-
ability.
(2-0) Cr. 2. SS. Prereq: 541
Management of school operations; accountability and ethical business
practices; risk management; school plant operations, food service and
student transportation. Includes attendance at selected sessions of the
Iowa School Business Management Academy in May and two additional
class days.

EDADM 690. Advanced Special Topics.
Cr. 1-3. Repeatable. Prereq: 9 credits in educational administration

EDADM 691. Clinical Dilemmas of Practice.
Cr. 1-3. Repeatable. Prereq: 541, admission to program, and
instructor's approval
Supervised on-the-job field leadership experience in clinical dilemmas of
practice. Offered on a satisfactory-fail basis only.

Cr. arr. Repeatable. Prereq: 9 credits in education
Educational Leadership and Policy Studies (EL PS)

EL PS 591. Social Justice Field Experience.
Cr. 1-3. F.S.SS. Prereq: EL PS 620
Supervised field experience in equity and social justice inside/outside higher education.

EL PS 615. Thematic Seminars.
Cr. 1. F.S.SS. Prereq: Admission to educational leadership doctoral program
A. Communication and Team Building
B. Governance, Politics and Policies
C. Law, Equity, Equality
D. Ethics, Justice, and Caring
E. Problem Solving and Planning
F. Critical and Creative Thinking

EL PS 616. Capstone Experience.
Cr. 3. F.S. Prereq: 4 credits of 615
This experience is designed to explore a topic addressed in one of the thematic seminars. The product of the capstone experience is a written paper of sufficient quality to be submitted to a scholarly journal for review.

EL PS 620. Social Justice Theory, Research, and Practice.
(3-0) Cr. 3. F.
Introduction to social justice theory, research, and practice from a variety of theoretical perspectives in the context of higher education and broader society.

(Cross-listed with W S). (3-0) Cr. 3. S. Prereq: 620
Critical examination of the philosophical foundations of education that seek to challenge the status quo and advance radical educational change. Exploration of macro-level (and some micro-level) issues relevant to educational change, in relation to how they inform practices of dissent and every day social relations.

(3-0) Cr. 3. S. Prereq: EL PS 620
Critically probes the philosophical and historical foundations of anti/post-colonial theory. Examination of policy, social, theoretical and educational issues from a anti/post-colonial perspective.

EL PS 624. Critical Race Theory in Higher Education.
Cr. 1-3. SS.
Exploration of the central tenets of critical race theory. Examination of policy, social and educational issues from a critical race perspective.

EL PS 625. Sexual Orientation Issues in Higher Education.
Cr. 1-3. SS.
Exploration of issues related to sexual orientation in higher education. Examination of individual and environmental factors that influence students’ success in college. Development of intervention strategies to enhance the college experience for lesbian, gay, and bisexual students.

EL PS 626. Social Justice and Social Change in Higher Education.
(3-0) Cr. 3. F. Prereq: EL PS 621
An examination of how changes in the interest of social justice have occurred historically in American higher education. Exploration of social movements and theories of social change.

Higher Education (Hg Ed)

Degrees: Higher Education offers work for the master of science degree with thesis and master of education degree (non-thesis) and a specialization in higher education, as well as postgraduate professional development. A community college leadership certificate program and a community college teaching and learning certificate program are also offered.

The Master’s Program in Higher Education

Emphasis: The Higher Education program provides graduate instruction and leadership development in community college education, student affairs practice, institutional research, post-secondary curriculum, and higher education administration.

Prerequisites: Prerequisite to major graduate work in educational leadership is completion of an undergraduate degree with coursework appropriate to the planned specialization, and evidence that the student ranks above average in scholastic achievement and promise of professional competence.

Learning Opportunities: Master’s students in Higher Education will complete courses, practical experiences, and independent research or a culminating experience that will enable them to serve as leaders in various educational settings.

Careers: Master’s students in Higher Education are prepared for entry level positions in student affairs administration, general institutional administration, teaching positions in community colleges, and support positions in post-secondary settings.

Outcomes: Graduates of the Master’s Program in Higher Education with a specialization in student affairs will demonstrate leadership in student affairs settings. By the time of graduation, students will possess the necessary skills and knowledge to:

- Demonstrate effective oral communication.
- Effectively communicate in writing.
- Work effectively with a diverse student population.
- Employ interventions designed to facilitate the development and learning of college students.
- Create, design, and implement programs and interventions.
- Effectively advise students individually and in groups.
- Organize and administrate student services in post-secondary settings.
- Conduct basic assessment, evaluation, and research.

Graduates of the Master’s Program in Higher Education with a specialization in community college teaching and learning will possess teaching and learning leadership skills. By the time of graduation students will possess the necessary skills and knowledge to:

- Facilitate college student learning.
- Employ pedagogical techniques.
- Demonstrate a clear understanding of the foundations of education, grounding their work in theory and Philosophy.
- Use technology effectively in learning and organizational processes.
- Articulate the concepts, theories and practices related to the content of higher education as emphasized in their course work.
- Develop curriculum.
- Assess student learning.
- Understand the Philosophy, organization, functions, and current issues of community colleges.

Graduates of the Master’s Program in Higher Education with a specialization in community college administration will demonstrate leadership in community college settings. By the time of graduation, students will possess the necessary skills and knowledge to:

- Create positive environments for community college students.
- Perform administrative functions in community college settings.
- Assist community college students with the academic and personal issues they face.
- Develop effective teaching and learning strategies.
- Work effectively with diverse student populations.
- Shape community college curricula.
### The Ph.D. Program in Higher Education

**Emphasis:** The Ph.D. in education with a specialization in educational leadership includes an emphasis on higher education. This program is designed to prepare leaders for post-secondary settings and is concerned with advanced study and independent research on various topics related to post-secondary settings. See departmental overview of the Ph.D. degree in educational leadership.

**Prerequisites:** Prerequisite to doctoral work in educational leadership is completion of an undergraduate degree with coursework appropriate to the planned specialization, and evidence that the student ranks above average in scholastic achievement and promise of professional competence. In addition, students are expected to have completed a master’s degree and 3-5 years of professional work experience in higher education.

**Learning Opportunities:** Doctoral students will complete courses, laboratory experiences, field experiences, independent research, a capstone experience, and a dissertation so that they can serve as leaders in various post-secondary educational settings such as colleges and universities, private and state educational agencies, and other organizations concerned with post-secondary education.

**Careers:** Typical careers available to graduates include leadership positions in post-secondary institutions, agencies, and other organizations concerned with post-secondary education. Special experiences are available to those who are interested in a career as a faculty member in post-secondary settings.

**Outcomes:** Graduates of the doctoral program with an emphasis in higher education will possess knowledge and skills related to five core domains: leadership, educational research, communication, educational evaluation, and educational foundations. By the time of graduation, students will demonstrate the necessary skills and knowledge for these outcomes as listed under ELPS Ph.D. program outcomes.

### Courses for graduate students

**HG ED 504. Higher Education in the United States.**

(3-0) Cr. 3. S. Prereq: Graduate classification

Historical development of higher education; diversity, functions, and philosophies of colleges and universities; federal and state roles; review of general, liberal, technical, graduate, and professional education.

**HG ED 540. Foundations of Leadership: Learning, Ethics, Self and Interaction.**

(2-0) Cr. 2. F. Prereq: permission of instructor

Serving as an introduction to developing practicing leaders, this course will create the foundation upon which enduring understanding of leadership will be built. Specifically explored will be learning as the foundation of human enterprise, everyday leadership, determination of common good, roots of individual’s actions, sensitivity to others, merits of divergent ideas, questioning the status quo, ethics as personal responsibility and choosing to grow.

**HG ED 541. Learning, Leadership, Ethics and Community.**

(2-0) Cr. 2. S. Prereq: permission of instructor

Serving as the second semester in a program to develop practicing leaders, this course will build upon the foundation started first semester to help students embrace the enduring understandings of leadership. Specifically explored will be team learning and the effect on individuals, skills required for a team to move forward, importance of decisions based on the good of the community, reflection as a means of enhancing learning, and interconnectedness of the individual, the community, and the world.

**HG ED 542. Learning, Leadership, Ethics, and Teams; Knowing, Doing and Being.**

(2-0) Cr. 2. F. Prereq: permission of instructor

The overall purpose of this course is to expand the foundation started in Foundations of Leadership: Learning, Ethics, Self and Interactions and Learning, Leadership, Ethics and Community for developing practicing leadership. The focus will shift from a naive understanding of the concepts of self within a team and community to a more sophisticated understanding of knowing, being and doing leadership.

**HG ED 543. Learning, Leadership, Ethics and Teams in Action.**

(2-0) Cr. 2. S. Prereq: permission of instructor

The purpose of this last (in a series of four) course is to allow students to put their knowledge, skills, and abilities related to leadership, learning, Ethics and Teams into practice. In addition to planning and implementing a major service learning project, the focus will be on the next wave of the study of leadership - connecting leadership to the research about the brain and human learning.

**HG ED 544. Foundations of Leadership & Learning.**

(3-0) Cr. 3. F. Prereq: graduate student classification

First of two-course series to help leaders develop the knowledge and skills to engage the collective capacity of a group to think, learn, and achieve important purpose. The foundation for developing deep understanding about leadership, learning, and the relationships therein. Focus on application of recent knowledge about human learning in the professional practice of leadership. Relationship leadership model and relationship to other leadership models, theories, and concepts; current theories of human learning (including expert/novice and transfer of learning), and interrelationships with leadership practice; critical understanding of self; facilitating learning for others; metacognition as a habit of mind; fundamentals of group interaction theories; social interdependence, communication, trusting, trustworthy goals, decision-making, cohesion, controversy, team development; power, resources, and development of community.

**HG ED 545. Connecting Leadership & Learning in Practice.**

(3-0) Cr. 3. F. Prereq: Graduate student classification and completion of HG ED 544

Second of a two-course series designed to help leaders develop the knowledge and skills to best engage the collective capacity of a group to think, learn and achieve important purpose. Builds on foundation course to support students in creating applications of the relationships between leadership and learning. Focus on developing the habits of mind and habits of practice to best use knowledge about human learning in the professional practice of leadership. Applications of relational leadership model; applications of group interaction theories; development and implementation of action plans to achieve measurable goals; application of current theories of human learning as they relate to leadership; exploration of the fundamentals of emotional intelligence and the impacts on leadership; developing critical habits of mind to practice leadership focused on learning.

**HG ED 550. Teaching, Learning and Leadership.**

(3-0) Cr. 3. F. Prereq: Teacher licensure

Current issues and practices in community college teaching and learning, and the roles and responsibilities of teachers as leaders.

**HG ED 561. College Teaching.**

(3-0) Cr. 3. Prereq: 6 graduate credits

Educational theories, methods and strategies for the improvement of college instruction. Assist potential college instructors in developing knowledge of protocol, assessment, and the scholarship and art of teaching. Emphasis on the unique challenge of college teaching in a changing student population environment.

**HG ED 562. Curriculum Development in Colleges.**

(3-0) Cr. 3. Prereq: Graduate classification

Modes of curriculum design, development, and change in colleges. Development of curricular leadership and evaluation strategies.
(3-0) Cr. 3. Prereq: 504  
Assessment of global education policy issues in education. Analysis of policies, implementation strategies, and policy outcomes.

HG ED 570. Current Topics in Student Affairs.  
Cr. 1-3. Prereq: Graduate classification  
Current issues and new directions in student affairs practice. Topics developed to the specific needs of student affairs professionals. Primarily for off-campus.

HG ED 574. Student Affairs Practice in Higher Education.  
(3-0) Cr. 3. F. Prereq: Graduate classification, admission to Higher Education Program  
An introduction to the field of student affairs practice with a consideration of student activities, counseling services, financial aid, admissions, student conduct, academic advising, and residential programs; includes community college programs.

HG ED 575. Organization and Administration of Student Affairs.  
(3-0) Cr. 3. S. Prereq: Admission to Higher Education Program, 574  
Organization structures, role and function of student affairs staff; policies and decision-making for student affairs practice.

HG ED 576. Student Development in Higher Education.  
(3-0) Cr. 3. F. Prereq: Admission to Higher Education Program  
Theories of student development and their applications in student affairs programs, services, and activities are reviewed. Emphasis is placed on psychosocial, cognitive developmental, and learning theories as well as newer integrative theories.

HG ED 577. Campus Environments and Cultures.  
(3-0) Cr. 3. F. Prereq: Admission to Higher Education Program  
Study of the impact of the college environment on students and use of environmental theory to create positive learning situations for students.

HG ED 578. Students in American Higher Education.  
(3-0) Cr. 3. F. Prereq: Admission to Higher Education Program  
The relationship between college students and characteristics from 1950 to the present. Traditional assumptions about the impact of higher education on students will be reviewed and challenged. Campus issues and concerns relative to commuters and residential life. Participants will analyze institutional responses to students through college missions, organizational development, structure, core curriculum and retention.

HG ED 579. Counseling and Group Dynamics in Post-secondary Settings.  
(3-0) Cr. 3. F. Prereq: 574, 576  
Development of effective, basic counseling skills. Understanding of group dynamics. Ability to work effectively in groups.

HG ED 580. Current Topics in Community Colleges.  
(1-3) Cr. 1-3. Prereq: Graduate classification  
Current issues and new directions in community college education. Topics developed to the specific needs of colleges. For off-campus.

HG ED 582. The Comprehensive Community College.  
(3-0) Cr. 3. Prereq: Graduate classification  
The community college as a unique social and educational institution: its history, philosophy, functions, programs, faculty and student characteristics, organization and finance, trends, and issues. Reviews current research and exemplary community college practices internationally, nationally, and in Iowa.

HG ED 590. Special Topics.  
Cr. 1-4. Prereq: 9 credits in education  
Independent study on specific topics arranged with an instructor.

A. Student Services  
B. Community Colleges  
C. Current Issues  
D. International Higher Education  
E. Federal and State Affairs  
F. Law in Higher Education  
G. Institutional Research

HG ED 591. Supervised Field Experience.  
Cr. 1-4. Repeatable. Prereq: 9 credits graduate work  
Supervised on-the-job field experience.

HG ED 593. Workshops.  
Cr. 1-5. Repeatable. Prereq: 15 credits in education

HG ED 598. Capstone Seminar.  
(3-0) Cr. 3. S. Prereq: Completion of 30 credits in EL PS  
This course is designed to integrate the learning experiences of students completing the Master’s Degree Program in higher education. Such issues as ethics, continuing professional development, career planning and leadership will be explored.

HG ED 599. Creative Component.  
Cr. arr. Prereq: 9 credits in education

HG ED 615. Seminars in Higher Education.  
Cr. 1-4.

A. Student Services  
B. Community Colleges  
C. Current Issues  
D. International Higher Education  
E. Federal and State Affairs  
F. Law in Higher Education  
G. Institutional Research  
H. Research Designs in Higher Education

HG ED 664. College Organization and Administration.  
(3-0) Cr. 3. F. Prereq: 504  
Administrative organization and behavior: communications, leadership, finance, strategic planning, and institutional governance.

HG ED 665. Financing Higher Education.  
(3-0) Cr. 3. S. Prereq: 504  
Lectures, discussions, and individual investigation relating to financial administration in colleges and universities. Budgeting, auxiliary enterprises, administration of financial planning, fund raising, examination of theories on expenditures. Designed for persons aspiring to serve as college administrators.

HG ED 666. Academic Issues and Cultures.  
(3-0) Cr. 3. S. Prereq: 504  
Examination of institutional culture and issues in higher education focusing on the roles and responsibilities of faculty and academic administrators.
HG ED 676. Student Development Theory II.
(3-0) Cr. 3. S. Prereq: 576
An examination of social identity theories including those exploring race, ethnicity, gender, class, ability, sexuality, and spirituality. An exploration of how social identity is influenced by the dynamics of power and oppression in education and society and how to enhance the college experiences of students from diverse backgrounds.

HG ED 690. Advanced Special Topics.
Cr. 1-4. Repeatable. Prereq: 9 credits in education

HG ED 699. Research.
Cr. arr. Repeatable. Prereq: 9 credits in education

Organizational Learning and Human Resource Development (OLHRD)

Courses primarily for graduate students, open to qualified undergraduate students

OLHRD 541. Adult Learning.
(3-0) Cr. 3.
Examines how adults acquire and use knowledge, skills, and attitudes within organizational settings; individual differences in learning as well as the principles and elements of the learning organization.

(3-0) Cr. 3. Prereq: OLHRD 541, 542
Examines the characteristics and elements of the performance improvement and change process, with special attention to the roles and responsibilities of employees, managers, and organizations when improving individual and organizational learning.

OLHRD 545. Learning Acquisition, Transfer, and Evaluation.
(3-0) Cr. 3. Prereq: OLHRD 541, 542, 544
Critical examination of learning acquisition, transfer, and evaluation barriers, partnerships, strategies, and activities; and the roles and responsibilities of human resource development professionals, managers, employees, and organizations in the application and evaluation of learning on the job.

Research and Evaluation (ResEv)

Degree Research and Evaluation offers work for the Master of Science degree with a specialization in research and evaluation.

Emphasis: Research and Evaluation students receive a broad foundation in the areas of quantitative and qualitative research methodology, data analysis, assessment, and evaluation. Students select one area for in-depth study.

Prerequisites: Prerequisites to major graduate work in educational leadership are completion of an undergraduate degree with coursework appropriate to the planned specialization, and evidence that the student ranks above average in scholastic achievement and promise of professional competence.

Learning Opportunities: Students in Research and Evaluation will complete courses, laboratory experiences, field experiences, independent research and a thesis.

Careers: Graduates are prepared for professional roles in institutional research, assessment of student learning, and program evaluation in post-secondary settings, school districts, and not-for-profit organizations.

Outcomes: Graduates of the master’s program with a specialization in research and evaluation will be prepared for leadership roles for careers in assessment and evaluation. By the time of graduation, students will demonstrate the necessary skills and knowledge to:

- Articulate current issues and principles in research, program evaluation, and assessment.
- Implement various conceptual approaches to research, program evaluation, and assessment.
- Effectively use the principles and skills of research data analysis.
- Interpret data and prepare accurate and useful reports.

Courses primarily for graduate students, open to qualified undergraduate students

RESEV 550. Introduction to Educational Research.
(3-0) Cr. 3. F.S.SS.
Understanding the nature of quantitative and qualitative research; reviewing the literature; developing research problems and questions; research designs; data collection and analysis issues; evaluating research studies.

RESEV 552. Basic Educational Statistics.
(3-0) Cr. 3. F.
Statistical concepts and procedures for analyzing educational data; descriptive statistics, correlation, t tests, and chi square with computer applications.

RESEV 553. Intermediate Educational Statistics.
(3-0) Cr. 3. SS. Prereq: RESEV 552 or STAT 401
A continuation of statistical concepts and procedures for analyzing educational data, using multiple regression and logistic regression.

(3-0) Cr. 3. S. Prereq: RESEV 552 or equivalent
Examination of survey design and administration in educational research. Designing surveys; developing, evaluating, and asking survey questions; survey sampling; measuring survey reliability and validity; administering mail and web surveys; decreasing survey nonresponse; conducting post-collection survey data processing; conducting survey research with integrity.

RESEV 570. Surveys in Educational Research.
(3-0) Cr. 3. S. Prereq: RESEV 552 or equivalent
Examination of survey design and administration in educational research. Designing surveys; developing, evaluating, and asking survey questions; survey sampling; measuring survey reliability and validity; administering mail and web surveys; decreasing survey nonresponse; conducting post-collection survey data processing; conducting survey research with integrity.

RESEV 580. Introduction to Qualitative Research Methodology.
(3-0) Cr. 3.
Qualitative research in the human sciences, emphasizing education; principles of qualitative inquiry, including theoretical foundations, research design, and fieldwork.

RESEV 590. Special Topics.
Cr. 1-3. Repeatable. F.S.SS. Prereq: Graduate standing
Guided reading and in research and evaluation study on special topic.

RESEV 593. Workshop.
Cr. 1-3. Repeatable. F.S.SS. Prereq: Graduate standing
Intensive, concentrated exposure to a special educational research or evaluation problem.

RESEV 597. Program Assessment and Evaluation.
(3-0) Cr. 3. S. Prereq: RESEV 560
Evaluation models and professional standards. Techniques of evaluating educational programs. Emphasis on both theory and practical applications.

Courses for graduate students

RESEV 615. Current Topics in Research and Evaluation.
Cr. 1-3. Repeatable.

RESEV 620. College Access in Policy, Practice, and Research.
(4-0) Cr. 1-3. SS.
Exploration of the plurality of frameworks used to conceptualize college access as a social problem (for research, policy, and practice). Development of application of understandings of college access frameworks to policy, practice, and research.
(3-0) Cr. 3. S. Prereq: 580
An intensive reading and discussion course focusing on contemporary methodological theory for qualitative inquiry; examines epistemological, ontological, axiological and theoretical assumptions and their consequences for qualitative inquiry in the human sciences; interrogates core concepts of qualitative inquiry such as fieldwork, data, validity and representation.

RESEV 681. Analytical Approaches in Qualitative Inquiry.
(3-0) Cr. 3. F. Prereq: RESEV 580 or equivalent
Conceptions of data and analysis in qualitative methodologies; focus on applied topics in qualitative data analysis, such as narrative analysis, ethnographic analysis, life history analysis, postmodern analyses, discourse analysis, arts-based analytical strategies, constructing data; combination format of reading and discussion seminars and classroom workshops focusing on individual research projects (not for thesis or dissertation).

RESEV 690. Advanced Special Topics.
Cr. 1-3. Repeatable. Prereq: Graduate standing
Guided reading and/or study on special topics of an advanced nature.

RESEV 699. Research.
Cr. arr. Repeatable. F.S.SS.
Event Management

Administered by the Department of Apparel, Educational Studies, and Hospitality Management

The program offers study for the degree of bachelor of science with a major in event management. The program prepares undergraduate students for careers in leading event and meeting management businesses. Through the major, students gain background and experiences in planning, budgeting, and implementing conferences, meetings, and other special events in the public or private sectors. Course work provides students with a general education plus professional preparation focusing on the concepts and principles involved in meeting and event planning; special event management; budgets and finance; site selection; contracts, vendors, and negotiations; marketing and promotions; food and beverage management; meeting technology; and hospitality law. Supporting courses include foodservice, catering, promotion, brand management, trend analysis, fashion, and resource management. Learning experiences are provided through planning such departmental events as the annual fashion show, Textiles and Clothing Museum exhibit openings, VEISHEA Cherry Pie Project, and the HRIM program’s fundraising dinner, as well as other campus and community events.

Graduates from this program are prepared for careers in event planning (political events, celebrations, education, promotions, commemorations, trade shows, and conventions) and small business development (entrepreneurship). Graduates demonstrate leadership characteristics and make decisions based on integrating knowledge of financial, human resources, promotion, and event management principles. Students are required to complete an internship in event management prior to graduation.

The AESHM Department offers a minor in event management. The minor can be earned by successfully completing the following for a total of 15 credits.

For courses of interest, see the listings for Apparel, Educational Studies, and Hospitality Management; Family and Consumer Sciences Education and Studies; Hotel, Restaurant, and Institution Management; and Textiles and Clothing.
Family and Consumer Sciences Education and Studies

Administered by the Department of Apparel, Educational Studies and Hospitality Management.

Undergraduate Study

The program offers study for the bachelor of science degree in family and consumer sciences education and studies (FCEDS). Students choose one of three options: Teacher Licensure, Communications, or Professional Studies. Graduates of the teacher licensure option teach in general and occupational programs of family and consumer sciences in middle, junior, and senior high schools. Graduates of the Communications option have a broad-based knowledge of family and consumer sciences and the ability to communicate in a global and technologically changing society. They are able to plan, develop, creatively present and evaluate information. Graduates of the Professional Studies option pursue individualized career goals in family and consumer sciences that apply integrative knowledge of family and consumer sciences in diverse careers for global settings.

Students in Teacher Licensure follow program and university procedures for admission to the university teacher education program. This program option is approved by the Iowa Department of Education for the preparation of career and technical education family and consumer sciences teachers. Every teacher licensure student must demonstrate achievement of the identified teacher licensure standards. Standards will be assessed in appropriate courses. For additional teacher education requirements, see Teacher Education.

Graduates in Family and Consumer Sciences Education and Studies have a broad understanding of individual and family well-being. Graduates apply knowledge of family and consumer sciences content in global professional settings. They use research findings to improve the well-being of individuals, families and communities. Due to the integrative and synergistic nature of family and consumer sciences, graduates address and act on complex problems confronting individuals, families and communities.

Opportunities are available for obtaining a minor from other programs through careful selection of elective credits and consultation with an adviser. For example, students pursuing the Communications and Professional Studies options are encouraged to consider obtaining a minor in journalism and mass communications or in one of the subject matter areas of family and consumer sciences such as family finance, housing and policy. They also are encouraged to enhance their program by selecting relevant additional courses in their area of interest. Students in the Teacher Licensure option may choose to add an additional endorsement such as Health Education or Coaching Interscholastic Athletics.

The program offers a minor in family and consumer sciences education. The minor is earned by successfully completing 15 credits from an approved list. See program for details.

Communication Proficiency Requirement: C or better in ENGL 150 Critical Thinking and Communication and ENGL 250 Written, Oral, Visual, and Electronic Composition.

Graduate Study

The program offers work for the degrees master of science, master of education, and doctor of philosophy, each with the major, family and consumer sciences education. The M.S. degree requires a thesis; the M.Ed. degree requires a creative component; the Ph.D. requires a dissertation. Minors are available.

Programs for advanced degrees with a major in family and consumer sciences education are tailored to fit the educational background, experience, and professional goals of the student. Areas of study provided by the department include program planning, curriculum, evaluation, research methods, supervision and administration, international education and development, and teacher education. Opportunities are available for strengthening one’s background in subject matter in other programs in the College of Human Sciences.

Students who complete a graduate program are professional family and consumer sciences educators and teacher educators who foster program planning, implementation, and evaluation at state, national, and international levels. They are producers and disseminators of research and scholarship in family and consumer sciences education and are leaders in programs and services for clientele in diverse settings. Currently, the graduate program is not accepting new admissions.

Courses primarily for undergraduate students

FCEDS 102. Learning Community Seminar.
Cr. R. Repeatable. F.S.
Learning Community seminar for Human Sciences entering transfer students. Group social and professional activities. Offered on a satisfactory-fail basis only.

FCEDS 206. Professional Roles in Family and Consumer Sciences.
(1-0) Cr. 1. F.
Overview of various roles in professional settings, e.g., community agencies, secondary schools, business and industry, Cooperative Extension.

(3-2) Cr. 4. F.
Prerequisites: 15 credits in family and consumer sciences subject matter; enrollment in Sp Ed 450
Principles of teaching and learning applied to family and consumer sciences content, including family financial literacy. Instructional methods appropriate for formal and nonformal educational settings. Specific strategies for diverse audiences. May be used for family life certification.

FCEDS 318. Occupational, Career and Technical Programs.
(Dual-listed with 518). (3-0) Cr. 3. S.
Prerequisites: 206 and 400 hours work experience in a family and consumer sciences related job
Historical development of family and consumer sciences. Planning and implementing programs in occupational family and consumer sciences, including FCCLA. Impact of selected legislation on family and consumer sciences programs. Techniques for cooperative education, school-to-work, and work-based education programs. May be used toward Multi-Occupation Cooperative endorsement.

FCEDS 413. Curriculum Planning for Family and Consumer Sciences and Family Life Education.
(2-2) Cr. 4. S.
Prerequisites: 306
Philosophy of career and technical education. Curriculum development in family and consumer sciences programs for school settings. Accommodating exceptional learners. May be used for family life certification.

FCEDS 417. Supervised Teaching in Family and Consumer Sciences.
Cr. 3-8. Repeatable. F.S.
Prerequisites: 413, 24 credits in family and consumer sciences subject matter, cumulative grade point of 2.50, full admission to teacher education
Supervised teaching experience in secondary schools. Examination of ways to implement actions that reflect a professional philosophy of family and consumer sciences for teaching middle and high school level students. Reservation required.

A. Vocational family and consumer sciences. Cr. 8.
B. Family and consumer sciences. Cr. 3 to 8.

FCEDS 490. Independent Study.
Cr. Arr. F.S.S.

A. Adult Education
C. Curriculum
D. Evaluation
E. Cooperative Extension
G. General
Courses primarily for graduate students, open to qualified undergraduate students

**FCEDS 500. Short Course: Current Family and Consumer Sciences Offerings.**
Cr. 1-3. Repeatable. F.S.SS. Prereq: 6 credits in family and consumer sciences or education

A. Adult Education
B. Supervision and Administration
C. Curriculum
D. Evaluation
E. Teacher Education
F. Occupational, Career and Technical Education
G. General
H. Research Methodology
I. International Education
J. Middle Level Education
K. Textile Selection and Apparel Construction Methods

**FCEDS 504. Intellectual Foundations of Family and Consumer Sciences Leadership.**
(3-0) Cr. 3. F. Prereq: Graduate classification
Exposure to a variety of selected readings that provide an intellectual foundation and framework for the family and consumer sciences profession. Connects the historical and philosophical structure of the profession with perspectives leading to innovative professional action.

**FCEDS 507. Program Development in Family and Consumer Sciences.**
(3-0) Cr. 3. SS. Prereq: Professional experience in family and consumer sciences or related area
Application of principles of program development to formal and nonformal educational settings, e.g., secondary school family and consumer sciences programs, training positions in business, Cooperative Extension, human services agencies.

**FCEDS 508. Models for Teaching Family and Consumer Sciences.**
(3-0) Cr. 3. S. Prereq: 6 credits in family and consumer sciences
Selecting teaching strategies and instructional materials based on theories of learning and human development that reflect a professional philosophy of family and consumer sciences. Application to formal and nonformal educational settings with diverse audiences.

**FCEDS 511. Research Methods.**
(3-0) Cr. 3. F. Prereq: Graduate classification
An overview of diverse research approaches focusing on methods for collecting and analyzing quantitative and qualitative data. Critique of research reports and development of research proposals.

**FCEDS 515. Assessment in Family and Consumer Sciences.**
(3-0) Cr. 3. Alt. S., offered 2012. Prereq: Introductory statistical and program development skills
Role of assessment in family and consumer sciences education programs. Planning and constructing test items and other assessments of school and nonschool learning.

**FCEDS 518. Occupational, Career and Technical Programs.**
(Dual-listed with 318). (3-0) Cr. 3. S. Prereq: 206 and 400 hours work experience in a family and consumer sciences related job
Historical development of family and consumer sciences. Planning and implementing programs in occupational family and consumer sciences including FCCLA. Impact of selected legislation on family and consumer sciences programs. Techniques for cooperative education, school-to-work, and work-based education programs. May be used toward Multi-Occupation Cooperative endorsement.

**FCEDS 521. International Perspectives of Family and Consumer Sciences.**
(3-0) Cr. 3. Alt. SS., offered 2012. Prereq: 6 credits in family and consumer sciences
Examination of family and consumer sciences from an international perspective; focus on the roles and responsibilities of women in development. Application and adaptation of content to working with families in other countries and cultures. Student participation in cultural activities and critique of international research articles.

Meets International Perspectives Requirement.

**FCEDS 590. Special Topics.**
Cr. arr. Repeatable. Prereq: 6 credits in family and consumer sciences or education

A. Adult Education
B. Administration
C. Curriculum
D. Evaluation
E. Teacher Education
F. Occupational, Career and Technical Education
G. General
H. Research Methodology
I. International Education
J. Educational Gerontology
K. Leadership and Human Relations
L. Special Needs
M. Family Life Education
N. Human Sexuality
O. Technology
P. Supervision
Q. Family/Individual Health
R. Consumer Education
S. Distance Education
T. Professional Communications

**FCEDS 593. Workshop.**
Cr. 1-3. Repeatable. F.S.SS. Prereq: 6 credits in family and consumer sciences or education
Concentrated group study of new developments in family and consumer sciences education. Sections offered will vary from year to year.

**FCEDS 599. Creative Component.**
Cr. arr. Prereq: 9 graduate credits in Family and Consumer Sciences Education

**Courses for graduate students**

**FCEDS 610. Seminar.**
Cr. 1. Repeatable. F.S.S. Prereq: Graduate classification
Exploration of trends and issues in the profession. Offered on a satisfactory-fail basis only.

**FCEDS 611. Program Evaluation in Family and Consumer Sciences.**
(3-0) Cr. 3. Alt. SS., offered 2012. Prereq: 511, 515
Application of program evaluation approaches and models to family and consumer sciences programs. Standards for program evaluation.
FCEDS 620. Theories of Administration in Family and Consumer Sciences.
(3-0) Cr. 3. Alt. SS., offered 2012. Prereq: Professional Experience
Review of administrative theory; application to family and consumer sciences programs with emphasis on higher education. Administrative leadership roles and their interrelationships. Consideration of current issues.

FCEDS 690. Family and Consumer Sciences Education and Studies Advanced Topics.
Cr. arr. Prereq: Enrollment in doctoral program, permission of instructor; and approval of D.O.G.E
Topics for the independent study will be in any of the following areas:
A. Adult Education
B. Administration
C. Curriculum
D. Evaluation
E. Teacher Education
F. Occupational, Career and Technical Education
G. General
I. International Education
J. Educational Gerontology
K. Leadership and Human Relations
L. Special Needs
M. Family Life Education
N. Human Sexuality
O. Technology
P. Supervision
Q. Family/Individual Health
R. Consumer Education
S. Distance Education
T. Professional Education
U. Research Methodology

FCEDS 699. Research.
Cr. arr. Repeatable.
Family and Consumer Sciences

Master of Family and Consumer Sciences
(M.F.C.S.)

The College of Human Sciences offers a nonthesis master’s degree program that might appeal to individuals with a bachelor’s degree in family and consumer sciences/home economics subject area or related disciplines. This program is considered to be a professional master’s degree. For students interested in further graduate study beyond the MFCS, the nonthesis degree program may mean additional requirements before completion of a Ph.D. or other terminal degree graduate program.

Students select either a comprehensive option or a specialization option. The comprehensive option requires 36 credits covering a variety of family and consumer sciences subject matter. Off-campus courses are offered via the World Wide Web (WWW). Specializations are available in Nutrition; Dietetics; Human Development and Family Studies; Hospitality Management; and Apparel, Merchandising, and Design.

In addition, students may select a 42-credit specialization in Family Financial Planning (FFP), a 36-credit specialization in Gerontology or a 36-credit specialization in Dietetics. The FFP, Gerontology, and Dietetics specializations, offered in collaboration with six to eight other universities in the Great Plains Interactive Distance Education Alliance, are offered exclusively through courses on the Web. The FFP program has been approved by the Board of Examiners of the Certified Financial Planner Board of Standards as a program with the competencies required to permit those completing the degree to sit for the CFP® Certification Examination. CFP® is a certification mark owned by the Certified Financial Planner Board of Standards.

The Program of Study committee, in consultation with the student, establishes the courses to be taken and the acceptability of transfer credits. The major professor is selected from the discipline in which the concentration of coursework will be taken. Written and oral final integrative examinations are required in lieu of a thesis or creative component. A thesis or creative component could be included on mutual agreement of the student and major professor, with approval of the Graduate College.

Admission requirements for the MFCS include a bachelor’s degree in a family and consumer sciences/home economics subject area or related disciplines, Graduate Record Examination (GRE) scores (not required for the FFP and Geron specializations), official transcripts, three letters of recommendation, a goal statement, and graduation in the upper one-half of class from a regionally accredited U.S. institution or graduation in the upper one-half of class from a recognized foreign institution. Non-English speaking international students are required to have a TOEFL score of at least 550 at time of admission.

Graduate Certificates

An 18-credit graduate certificate in Family Financial Planning is offered for students who do not need a master’s degree and want to obtain the educational requirements of the Certified Financial Planner Board of Standards CFP® Certification Examination.

A 21-credit graduate certificate in Gerontology is offered. For additional information, students should contact the Research and Graduate Education Office, E262 Lagomarcino, Ames, Iowa 50011-3191, mfcsinfo@iastate.edu.
The Department of Food Science and Human Nutrition is jointly administered by the College of Agriculture and Life Sciences and the College of Human Sciences. All curricula offered by the department are available to students in either college. These curricula include culinary science, dietetics, diet and exercise, food science, and nutritional science. Visit the department web site at: www.fshn.hs.iastate.edu/.

**Undergraduate Study**

Culinary science is an interdisciplinary degree combining a strong food science foundation with acquisition of culinary skills. The program includes chemistry, organic chemistry, biology, microbiology, and biochemistry as well as quantity food production, fine dining management, and food safety and sanitation. Internships in the food industry and culinary business are required. Culinary science graduates are qualifies to work as managers and specialists in food research, product development, culinary applications, and food marketing and sales.

The Didactic Program in Dietetics (DPD) is accredited by the Commission on Accreditation for Dietetics Education of the American Dietetic Association (ADA). The dietetics undergraduate curriculum meets the academic requirements as the DPD. Additionally, the curriculum for concurrent Bachelor’s and Master’s degrees in diet and exercise meets the academic requirements of the DPD. Graduates of the program are eligible to apply for admission to accredited/approved dietetic internships/supervised practice programs. Upon successful completion of the experience program, graduates are eligible to take the national examination administered by the Commission on Dietetic Registration to become a Registered Dietitian (R.D.) and to practice in the field of dietetics. The dietetic program includes study in basic sciences, nutrition, and food science with applications to medical dietetics, nutrition counseling and education, and community nutrition. Foodservice management is also an important aspect of the program. Graduates work in clinical settings, consulting, food companies, food services, sports or athletic programs, corporate wellness programs, care facilities for patients from neonatal to geriatric, and community or school health programs. There is a $30 fee for a statement of verification of completion of the DPD. For information about verification statements provided to non-ISU students or students with degrees from international universities, see the departmental website: www.dietetics.iastate.edu/.

Food science is a discipline in which the principles of biological and physical sciences are used to study the nature of foods, the causes of their deterioration, and the principles underlying the processing and preparation of food. It is the application of science and technology to the provision of a safe, wholesome, and nutritious food supply. Biotechnology and toxicology interrelate with food science in the area of food safety. In the food industry, food scientists work in research and development of products or processes, production supervision, quality control, marketing and sales, test kitchens and recipe development, product promotion and communication. Food scientists also serve in government regulatory agencies and academic institutions.

Three options are available in food science: food science and technology, food science and industry, and consumer food science. The food science and technology and food science and industry options are approved by the Institute of Food Technologists, the national professional organization of food science. Students interested in quality control/assurance; production supervision; management and sales; or research careers in the food industry, government, or academia should elect either the food science and technology or the food science and industry option. Students who wish to go to graduate or professional schools or who are Scholars of Excellence in Agriculture and Life Sciences should elect the food science and technology option. Students who wish to emphasize business, journalism, or special aspects of food science should elect food science and industry. Students interested in food product formulation and recipe development, food promotion and communication, and consumer services in government and industry should elect the consumer food science option.

Students who wish to combine education in engineering with food science may select additional courses in chemical or agricultural engineering. Double majors are available and may require an additional year.

Nutritional science offers two options: pre-health professional & research and nutrition & wellness. Students in the pre-health professional & research option gain a strong basic science education along with human nutrition expertise that enables them to attain the knowledge and skills necessary to work in research laboratories of colleges and universities, government agencies, industries, and foundations. The pre-health professional & research option can serve as a preprofessional program for medicine, dentistry, veterinary medicine, or for graduate study in nutrition or other biological sciences. Students in the nutrition & wellness option will learn about the role of nutrition and healthy eating for disease prevention and wellness with an emphasis on communication of nutrition messages to the public and community agencies and effective program planning and evaluation. Graduates will be prepared for employment opportunities in community and state agencies, nonprofit organizations and health promotion enterprises, public health and related programs and for graduate study.

Students graduating with degrees in culinary science, dietetics, diet and exercise, food science, or nutritional science will be able to: 1) demonstrate a high level of technical competence in their chosen field, perform successfully in a graduate program, supervised practice program or entry-level professional position; 2) communicate effectively as professionals; 3) successfully solve complex problems on their own and as members of a team; 4) correctly interpret and critically evaluate research literature as well as data from professional practice; 5) critically evaluate information related to food science and nutrition issues appearing in the popular press; 6) prepare and deliver effective presentations, orally and in writing, of technical information to professionals and to the general public; 7) thoughtfully discuss ethical, social, multicultural, and environmental dimensions of issues facing professionals in their chosen field.

Communication Proficiency is certified by a grade of C or better in 6 credits of coursework in composition (ENGL 150 Critical Thinking and Communication and ENGL 250 Written, Oral, Visual, and Electronic Composition or other communication-intensive courses) and a grade of C or better in 3 credits of coursework in oral communication.

A combined Bachelor of Science and Master of Science (B.S./M.S.) degree in diet and exercise is available. The program is jointly administered by the Department of Food Science and Human Nutrition (FSHN), within the College of Agriculture and Life Sciences and College of Human Sciences, and the Department of Kinesiology within the College of Human Sciences. Students interested in this program enroll as freshmen in the pre-diet and exercise program. In the fall of the junior year, students apply for admission to the B.S./M.S. program. Students not accepted into the program complete toward completion of a B.S. degree in dietetics or kinesiology and health. Coursework has been designed to facilitate a 4-year graduation date for those students not accepted into the program and electing to complete a single undergraduate degree. Students accepted into the program will progress toward completion of B.S./M.S. degrees in diet and exercise.

The department offers coursework for minors in food science and in nutrition and participates in the interdepartmental minor in food safety. See department office or web site for requirements: www.fshn.hs.iastate.edu/ugrad/ugminors.php.

**Food Safety Minor**

The Interdepartmental food safety minor is designed to provide undergraduate students with exposure to the principles of food safety to complement their current major and offer new opportunities for their future careers. Depending on the student’s major, the minor enhances the student’s expertise in food safety issues pertinent to the student’s major. Student learning outcomes include: awareness of food safety issues as they appear in each step of the food chain; ability to analyze a situation, identify food safety problems, use resources to gain additional information; develop a procedure or solution to identified problems; examine proposed solutions for viability and effectiveness; and to be
able to speak and write about food safety issues. Graduates with a food safety minor are better prepared for employment in agricultural, medical, and veterinary medical agencies and with state, national and international businesses.

The food safety minor requires 15 credits of coursework with 9 credits from 3 core courses and elective courses to supplement the training in the minor. See approved list for minor courses at www.fshn.hs.iastate.edu/ugrad/ugminors.php.

Postbaccalaureate Program

The dietetic internship program has received continued accreditation from the Commission on Accreditation for Dietetics Education of the American Dietetic Association. For more information, refer to Special Interest Programs listed under the College of Human Sciences or visit the website at www.dietetics.iastate.edu. There is a nonrefundable application fee of $75 and a program fee of $500 payable upon acceptance into the program.

Graduate Study

The department offers work for the degrees master of science and doctor of philosophy with majors in food science and technology and in nutritional sciences, and minors in food science and technology and in nutrition. Graduate work in meat science is offered as a co-major in animal science and food science and technology.

Prerequisite to major work is a baccalaureate degree in food science, nutrition, or other physical or biological sciences or engineering that is substantially equivalent to those at Iowa State University.

Students taking major work for the degree doctor of philosophy either in food science and technology or in nutritional sciences may choose minors from other fields including anthropology, chemistry, biochemistry, economics, education, journalism, microbiology, psychology, physiology, sociology, statistics, toxicology, or other related fields.

The interdepartmental graduate program in nutritional sciences, administered through the Graduate College, under the auspices of the Chairs of FSHN and Animal Science, will provide the structure for coordinating and enhancing interdisciplinary nutrition research and graduate education. Graduate students will be able to select from three specializations: animal nutrition, human nutrition, or molecular/biochemical nutrition. The two main departments are FSHN and Animal Science, whereas other departments (such as Kinesiology; Biochemistry, Biophysics, and Molecular Biology; Agronomy; Sociology; and Statistics) may also be involved. (See Nutritional Sciences interdepartmental graduate major.)

The department offers an online 12-credit Graduate Certificate in Food Safety and Defense, in conjunction with the University of Nebraska, Lincoln, Kansas State University and the University of Missouri through the Great Plains Interactive Distance Education Alliance. Students eligible for admission to the food science master’s degree program may be admitted.

The department participates in an online Masters of Family and Consumer Sciences/Dietetics in conjunction with Colorado State University, Kansas State University, North Dakota State University, Oklahoma State University, South Dakota State University, University of Kansas Medical Center, and University of Nebraska through the Great Plains Interactive Distance Education Alliance. Students who are registered dietitians and are eligible for admission to the FSHN Master’s degree program may be admitted.

The department offers work for concurrent B.S. and M.S. degree programs that allow students to obtain both the B.S. and M.S. degrees in 5 years. The programs are available to students majoring in nutritional science or pre-diet and exercise, and students progress toward M.S. degrees in nutritional sciences or diet and exercise, respectively. Students interested in these programs should contact the department for details. Application for admission to the Graduate College should be made during the junior year. Students begin research for the M.S. thesis during the summer after their junior year and are eligible for research assistantships.

Students graduating with advanced degrees in nutritional sciences and in food science and technology will demonstrate competency in their chosen discipline. Measurable outcomes will include the ability to: 1) design, conduct, and interpret research; 2) apply theoretical information to solve practical problems; 3) prepare and communicate discipline-specific information in written and oral forms to scientific and lay audiences; 4) facilitate learning in the classroom; 5) submit a paper for publication in a peer-reviewed journal; and 6) secure professional-level positions in academia, industry, government, or health care.

Courses primarily for undergraduate students

FS HN 101. Food and the Consumer.
(3-0) Cr. 3. F.S. Prereq: High school biology and chemistry or 3 credits each of biology and chemistry

FS HN 104. Introduction to Professional Skills in Culinary Science.
(0-6) Cr. 1. S.
Introduction to culinary science. Students will develop fundamental culinary skills by arranged on-campus work experience (100 hours). Sessions with instructor arranged.

FS HN 110. Professional and Educational Preparation.
(1-0) Cr. 1. F.S.
Introduction to professional and educational development within the food science and human nutrition disciplines. Focus is on university and career acclimation, enhancement of communication skills, and portfolio development. Offered on a satisfactory-fail basis only.

FS HN 111. Fundamentals of Food Preparation.
(2-0) Cr. 2. F.S. Prereq: 101 or 167; high school chemistry or CHEM 160
Principles involved in preparation of food products of standard quality. In the context of caloric and nutrient retention, and safety.

FS HN 112. Orientation to Learning and Productive Team Membership.
(Cross-listed with AER E, CON E, HORT, NREM, TSM). (2-0) Cr. 2. F.
Introduction to developing intentional learners and worthy team members. Learning as the foundation of human enterprise; intellectual curiosity; ethics as a personal responsibility; everyday leadership; effective team and community interactions including team learning and the effects on individuals; and growth through understanding self, demonstrating ownership of own learning, and internalizing commitment to helping others. Intentional mental processing as a means of enhancing learning. Interconnectedness of the individual, the community, and the world.

FS HN 114. Developing Responsible Learners and Effective Leaders.
(Cross-listed with CON E, HORT, NREM, TSM). (2-0) Cr. 2. S. Prereq: NREM 112
Focus on team and community. Application of fundamentals of human learning; evidence of development as a responsible learner; intentional mental processing as a habit of mind; planning and facilitating learning opportunities for others; responsibility of the individual to the community and the world; leading from within; holding self and others accountable for growth and development as learners and leaders.

FS HN 115. Food Preparation Laboratory.
(0-3) Cr. 1. F.S. Prereq: Credit or enrollment in 111 or 214
Practice standard methods of food preparation with emphasis on quality, nutrient retention, and safety.
FS HN 167. Introduction to Human Nutrition.
(3-0) Cr. 3. F.S.SS. Prereq: High school biology or 3 credits of biology. Understanding and implementing present day knowledge of nutrition. The role of nutrition and food intake in the health and well being of the individual and family.

FS HN 203. Contemporary Issues in Food Science and Human Nutrition.
(1-0) Cr. 1. F.S.
Introduction to published research and discussion of current issues in food science and human nutrition. Emphasis on sources of credible information, ethics, communication and portfolio development.

FS HN 214. Scientific Study of Food.
(3-0) Cr. 3. F.S. Prereq: 167 or 265; CHEM 231 or 331

FS HN 215. Advanced Food Preparation Laboratory.
(0-6) Cr. 2. F.S. Prereq: Credit or enrollment in 214
Practice standard methods of food preparation with emphasis on quality, nutrient retention, and safety. Development of culinary skills and advanced food preparation.

FS HN 242. Societal Impacts on Food Systems.
(3-0) Cr. 3. S.
Description of food systems from farming practices to global marketing. Exploration of the impacts of food system choices on personal health, the environment and global society.

FS HN 262. Special Topics in Health Professions.
(1-0) Cr. 1. F.
Careers and controversies in nutritional science. Discussion of current topics in health professions involving nutrition, such as "low-carb" diets, supplements for athletic performance, "food and mood," interviews with health professionals on how they use nutrition concepts in practice.

FS HN 264. Fundamentals of Nutritional Biochemistry and Metabolism.
(3-0) Cr. 3. F. Prereq: 167; CHEM 163, 163L; BIOL 211
Digestion, absorption, metabolism, and biochemical functions of nutrients. Biochemical aspects of nutrient deficiencies.

FS HN 265. Nutrition for Active and Healthy Lifestyles.
(3-0) Cr. 3. S. Prereq: Credit or enrollment in BBMB 301 or credit in FS HN 264

FS HN 311. Food Chemistry.
(3-0) Cr. 3. F. Prereq: TSM 115, CHEM 231 and 231L or 331 and 331L; credit or enrollment in BBMB 301
The structure, properties, and chemistry of food constituents and animal and plant commodities. Nonmajor graduate credit.

L. Food Chemistry Laboratory

FS HN 311L. Food Chemistry Laboratory.
(0-3) Cr. 1. F.
The laboratory practices of structure, properties, and chemistry of food constituents. Nonmajor graduate credit.

(1-0) Cr. 1. S. Prereq: 214 and junior classification
Introduction to the roles culinary scientists hold within industry including product development, research, and quality assurance. Discussions focused on professional and educational development, enhancement of communication skills, ethics and emerging issues and trends in culinary science.

(1-0) Cr. 1. F. Prereq: Junior classification
Introduction to the profession of dietetics and responsibilities associated with dietetic professional practice. Emphasis on development of a pre-professional portfolio, career options in dietetics and preparation for a dietetic internship. Leadership and professional career development for the dietitian is addressed through self reflection, creation of materials for post-baccalaureate programs and job shadowing experience. Professional issues related to dietetic practice include Code of Ethics, legal credentialing and standards of professional practice, leadership and future trends in the profession. Offered on a satisfactory-fail basis only.

(Cross-listed with AGRON, ENV S, T SC). (3-0) Cr. 3. F.S. Prereq: Junior classification
Issues in the agricultural and food systems of the developed and developing world. Emphasis on economic, social, historical, ethical and environmental contexts. Causes and consequences of overnutrition/undernutrition, poverty, hunger and access/distribution. Explorations of current issues and ideas for the future. Team projects. Nonmajor graduate credit.

Meets International Perspectives Requirement.

H. Honors Section. (Honors Program students only.)

FS HN 351. Unit Operations in Food Processing.
(3-0) Cr. 3. S. Prereq: A course in calculus and PHYS 106
