Econ 334. Entrepreneurship in Agriculture. (3-0) Cr. 3. Prereq: 101. Introduction to the process of entrepreneurship in the agricultural and food sectors. Emphasis on opportunity recognition and assessment, resource acquisition and feasibility analysis for both private and social enterprises. Students will develop a comprehensive feasibility study for a new business or non-profit organization.

Econ 336. Agricultural Selling. (3-0) Cr. 3. F. Prereq: 101. Principles and applications of agricultural sales; communication and computer assistance for solving farm problems. Attributes, value systems, and behavioral patterns that relate to agricultural sales. Electronic marketing, selling strategies, preparing for sales calls, making sales presentations, handling objections, and closing sales. Analysis of the buying or purchasing process. Evaluation of agri-selling as a possible career choice.

Econ 338. Topics in Agricultural Marketing. Cr. arr. 2 credits recommended for topics B and C. A given topic can be taken only once. A hands-on application of economic concepts and principles to agricultural commodity markets, marketing methods, risk management, and related agribusiness decisions. A. Dairy marketing. 2 cr. B. Livestock marketing. 1 cr. C. Grain marketing. 1 cr.

Econ 353. Money, Banking, and Financial Institutions. (3-0) Cr. F.S. SSS. Prereq: 101, 102. Theoretical and applied analysis of money, banking, and financial markets; interest rates and portfolio choice; the banking industry in transition; the money supply process; the Federal Reserve System and the conduct of monetary policy; macro implications of monetary policy; international finance.

Econ 355. International Trade and Finance. (3-0) Cr. 3. S. Prereq: 101, 102. Explanations of causes of international trade and the impact of trade on welfare and employment patterns. Analysis of government policies towards trade, such as tariffs, quotas, and free trade agreements. Theory of balance of payments and exchange rate determination, and the role of government policies. Examination of alternative international monetary systems and the conduct of monetary policy.

Econ 362. Applied Ethics in Agriculture. (Cross-listed with Soc.) (3-0) Cr. 3. F. Prereq: Econ 101 or Soc 130 or Soc 134, junior or senior status in the College of Agriculture and Life Sciences. Identify major ethical issues and dilemmas in the conduct of agricultural and agribusiness management and decision making. Discuss and debate proper ethical behavior in these issues and situations and the relationship between business and personal ethical behavior.}

Econ 370. Comparative Capitalism and Economic Transitions. (3-0) Cr. 3. F. Prereq: 101, 102. Theories of capitalism and the economics of transition from a planned to a market economy; the role and the creation of economic institutions supporting different economic systems. An introduction to the recent experiences of Eastern European countries, the former Soviet Union, China, the European Union, and the United States.

Econ 371. Introductory Econometrics. (4-0) Cr. 4. F.S. Prereq: 301, 302 or 353, Stat 326. Introduction to the models and methods of estimation and test hypotheses pertaining to economic variables. Simple and multiple regression analysis; stochastic regressors; heteroskedasticity; autocorrelation; measurement error; simultaneous equations. Nonmajor graduate credit.

Econ 376. Rural, Urban and Regional Economics. (Cross-listed with C R P). (3-0) Cr. 3. F.S. Prereq: 101. Firm location with respect to regional resources, transport, scale economies, externalities, and policies. Measures of local comparative advantage and specialization. Spatial markets. Population location considering jobs, wages, commuting, and local amenities. Business, residential, and farm land use and value. Migration. Other topics may include market failure, regulation, the product cycle, theories of rural and urban development, developmental policy, firm recruiting, local public goods and public finance, schools, poverty, segregation, and crime. Nonmajor graduate credit.

Econ 378. Economics of Aging. (Cross-listed with HD FS, Gerion). (3-0) Cr. 3. S. Prereq: 3 credits in principles of economics and 3 credits in human development and family studies. Economic status of the aging, retirement planning and the retirement decision, role of Social Security, public transfer programs for the elderly, intrafamily transfers to/from the elderly, private pensions, financing medical care and housing for the elderly, prospects and issues for the future.

Econ 380. Environmental and Resource Economics. (Cross-listed with Env Sl). (3-0) Cr. 3. F. Prereq: 101. Natural resource availability, use, conservation, and government policy, including energy issues. Environmental quality and pollution control policies.

Econ 385. Economic Development. (3-0) Cr. 3. S. Prereq: 101, 102. Current problems of developing countries, theories of economic development, agricultural and economic development, measurement and prediction of economic performance of developing countries, alternative policies and reforms required for satisfying basic needs of Third World countries, interrelationships between industrialized countries and the developing countries, including foreign aid. Nonmajor graduate credit.

Econ 398. Cooperative Education. Cr. R. F.S.SS. Prereq: Permission of the department cooperative education coordinator; junior classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Econ 401. Topics in Microeconomics. (3-0) Cr. 3. F. Prereq: 301, Stat 226. Advanced treatment of selected topics from one or more of the following areas: household production models, factor markets, game theory and imperfect competition, general equilibrium, intertemporal choice, asset markets, income distribution, externalities and public goods, etc. Nonmajor graduate credit.

Econ 402. Topics in Macroeconomics. (3-0) Cr. 3. F. Prereq: 301, 226. Advanced treatment of selected topics from one or more of the following areas: business cycle theory, growth theory, fiscal and monetary policy, coordination issues, open economy macroeconomics, and financial economics. Nonmajor graduate credit.

Econ 415. Firms, Markets and Industry Structure. (2-2) Cr. 3. F. S. Prereq: 301. The theory of the firm; determinants of firm boundaries; firm behavior; perfectly competitive markets; welfare and market efficiency;
Econ 563. Issues in Government Policy Affecting Agriculture. (2-0) Cr. 2. Prereq: 101. Off campus. Offered as demand warrants. Government policy and the policy-making process as it affects food, agriculture, and trade. Description and analysis of government policies and programs designed to address production agriculture problems and consumer food concerns. Evaluation of the interaction of agriculture and world trade as affected by U.S. and foreign government policies. Designed for master of agriculture program only.

Econ 571. Intermediate Econometrics. (3-0) Cr. 3. S. Prereq: 500. Single and multiple regression models; dummy explanatory variables; serial correlation; heteroskedasticity; distributed lags; qualitative dependent variables; simultaneity. Use of econometric models for tests of economic theories and forecasting.

Econ 576. Spatial Economics. (3-0) Cr. 3. Prereq: 501. Analysis of location choice by firms, employees, and households emphasizing the role of spatial variations in agglomeration economies, economies of scale, distance, transport, endowments, amenities, and local government. Models of land use, urban form, spatial competition, central place theory, and migration. Techniques of discrete choice analysis; statistical analysis of categorical data; urban system modeling; and interregional computable general equilibrium.

Econ 590. Special Topics. Cr. arr. Repeatable. Satisfactory-fail only.

Econ 599. Creative Component. Cr. arr. Satisfactory-fail only.

Courses for graduate students

Econ 600. Quantitative Methods in Economic Analysis II. (4-1) Cr. 4. F. Prereq: 500 and linear algebra. Unconstrained and equality- and inequality-constrained optimization; the Kuhn-Tucker formulation; abstract spaces; dynamic programming; dynamical systems.

Econ 601. Microeconomic Analysis I. (4-1) Cr. 4. F. Prereq: 301, previous or concurrent enrollment in 600 and permission of Director of Graduate Education. Economic theory and methodology; theory of consumer behavior, theory of the competitive firm, supply and factor demand; duality relations in consumer and producer theory; welfare change measures; partial equilibrium analysis, perfect competition, monopoly; choice under uncertainty, the expected utility model, risk aversion; insurance, portfolio selection, and production decisions under risk.

Econ 602. Macroeconomic Analysis. (4-1) Cr. 4. S. Prereq: 301, previous or concurrent enrollment in 600 and permission of Director of Graduate Education. Neoclassical aggregate growth models; the overlapping generations model; endogenous growth models; equilibrium expectation theories; equilibrium job search and matching; models of money; fiscal and monetary policy; income and wealth distribution.

Econ 603. Microeconomic Analysis II. (4-1) Cr. 4. S. Prereq: 601, 602 and permission of Director of Graduate Education. General equilibrium analysis, efficiency, and welfare; market failures, externalities, and the theory of the second best; introduction to game theory; adverse selection, signaling, screening and moral hazard.

Econ 604. Advanced Macroeconomic Analysis. (4-1) Cr. 4. F. Prereq: 601, 602 and permission of Director of Graduate Education. Topics will be selected from: new Keynesian approaches to business cycle theory; endogenously generated business cycles; models of credit and financial intermediation; mechanism design and time inconsistency issues; political economy models; heterogeneous-agent models with strategic interaction; path dependence, network effects, and lock-in; economies as evolving self-organizing systems.

Econ 605. Advanced Topics in Microeconomics. (3-0) Cr. 3. Prereq: 603. Selected topics in microeconomic theory of current significance to the profession.

Econ 606. Advanced Topics in Macroeconomics. (3-0) Cr. 3. Prereq: 603, and credit or current enrollment in 604. Selected topics in macroeconomic theory of current significance to the profession.

Econ 618. Game Theory. (3-0) Cr. 3. Prereq: 603, or 501 and permission of instructor. Theoretical analysis and applications of strategic games, extensive form games, and cooperative games. Nash equilibrium, correlated equilibrium, Bayesian games, subgame perfect equilibrium, the core, evolutionary equilibrium, repeated games with finite automata, and common knowledge.

Econ 654. Advanced Topics in Financial Economics. (3-0) Cr. 3. Repeatable. Prereq: 603. Selected topics in financial economics of current significance to the profession.

Econ 655. International Trade. (3-0) Cr. 3. Prereq: 603. Theories of international trade, welfare and distributional aspects of trade and commercial policies. Optimal trade policies in the presence of domestic distortions; strategic trade policy; international trade and economic growth.

Econ 657. International Finance. (3-0) Cr. 3. Prereq: 602. The intertemporal approach to current account determination; non-traded goods and the real exchange rate; fiscal policy in the open economy; monetary approach to balance of payments and exchange rate determination; sticky price models of the open economy; exchange-rate based stabilizations; capital inflows; financial and balance of payments crises; international business cycles.

Econ 671. Econometrics I. (4-1) Cr. 4. F. Prereq: 501 and Stat 447 or 542. Probability and distribution theory for univariate and multivariate normal random variables, introduction to the theory of estimators for linear models, hypothesis testing and inference, introduction to the structure of estimators; derivation of common estimators and their properties for the classical and general multiple regression models, hypothesis testing, forecasting, implications of specification errors - missing data, left-out regressors, measurement error, stochastic regressions.

Econ 672. Econometrics II. (4-1) Cr. 4. S. Prereq: 671. Identification, estimation, and evaluation of systems of simultaneous equations; qualitative choice and limited dependent variable models; introduction to time series models and applications, including alternative variance specifications.

Econ 673. Microeconometrics. (3-0) Cr. 3. Prereq: 672, 601. Econometric technique of models arising in microeconomic applications. Methods are primarily concerned with the analysis of cross-section data. Topics may include: systems of demand equations in panel data settings, random utility models of discrete choices, production possibilities frontier estimation, and discrete/continuous models of participation and consumption.

Econ 674. Macroeconometrics. (3-0) Cr. 3. Prereq: 672, 602. Time-series econometric techniques and their application to macroeconomics and financial markets. Techniques may include ARCH and GARCH models, unit-root tests, nonlinear adjustment models, structural VARs, and cointegration tests.

Econ 675. Advanced Topics in Econometrics. (3-0) Cr. 3. Repeatable. Prereq: 672 or Stat 543. Advanced treatment of issues important in econometrics. Topics chosen from asymptotic theory, nonlinear estimation, Bayesian and robust econometrics, econometric time series, limited dependent variables and censored regression models, nonparametric and semiparametric methods, bootstrapping and Monte Carlo techniques.

Econ 690. Advanced Topics. Cr. arr. Repeatable. Satisfactory-fail only.

Econ 691. Third-Year Paper. Cr. 3. Under the direction of the major professor, Ph.D. students write a formal research paper and present it to the dissertation research process. Satisfactory-fail only.

Econ 693. Workshops. Cr. arr. Repeatable. Prereq: 6 graduate credits in chosen field. Satisfactory-fail only.

Educational Leadership and Policy Studies

(wwwelps.hs.iastate.edu/elps/homepage.htm)
Laura Rendon, Chair of Department
Distinguished Professor: Schuh
Distinguished Professor (Emeritus): Warren
University Professors: Ebbets, Licklider, Robinson
University Professors (Emeritus): Manatt
Professors: Evans, Hagedorn, Rendon, Smith
Professors (Emeritus): Blake, Boyle, Bryan, Engell, Hopper, Huba, Jones, Kizer, Lagomarcino, Lawrence, McCandless, Moore, Pellegrino, Vanast
Professors (Collaborators): Barak, Gardner, Pierce
Associate Professors: Hammrick, Laanan, Mcleod, Porter
Associate Professor (Emeritus): Thielken
Associate Professor (Adjunct): Tesfagiorgis
Assistant Professors: Gildersleeve, Marshall, Osei-Kofi, Patton, Starobin
Assistant Professors (Adjunct): Arthur, Gruenewald, Hill, Jackson, Payne
Senior Clinician: Scharff
Lecturers: Bradley, Cooper, Coppernoll, Drake, Durée, Englin, Forsythe, Gansemer-Topf, Holcomb, Kimpton, Saunders, Shahjahan, Steven
Clinician: Book, Ratigan, Westerman-Beatty

Departmental Mission, Vision and Goals statements

Mission: The mission of the Department of Educational Leadership and Policy Studies is to advance the quality and effectiveness of educational institutions and individuals engaged in education. The department is guided by the missions of Iowa State University and the College of Human Sciences and embodies the concepts of the land-grant tradition of teaching, research, and service. The department is dedicated to enhancing the intellectual, cultural, social, and ethical potential of students and faculty for the benefit of Iowa, the nation, and the world. Specifically, the Department of Educational Leadership and Policy Studies:

• Provides graduate degree and career preparation programs, coursework, and other learning opportunities for students and practitioners. 
• Conducts and disseminates basic and applied research for the advancement of educational theory and practice.
• Provides professional service for institutions, individuals, and organizations at all levels of education.

Vision: Research: All Educational Leadership and Policy Studies faculty create and disseminate knowledge and promote educational inquiry that enhances educational practices at local, state, national, and international levels.

Teaching: All Educational Leadership and Policy Studies faculty engage in teaching that is consonant with the principles of adult learning and effective teaching that help students develop critical thinking and professionally relevant skills, and that provides a foundation for the application of knowledge to practice.

Service: All Educational Leadership and Policy Studies faculty, using their professional expertise, work with educators, educational institutions, and other constituent groups to solve problems.

Advising: All Educational Leadership and Policy Studies faculty foster students' professional and personal growth by guiding and inspiring them to formulate and complete relevant programs of study and to conduct high quality research.

Curricula/Program: The Educational Leadership and Policy Studies faculty develop and implement curricular and programs to ensure that students learn to think critically and perform their professional roles in an exemplary fashion.

General Goals: The general goals of the department, and hence of each of its program areas and affiliated programs, are to:

• Conduct high quality graduate education programs, both on- and off-campus, for students seeking graduate degrees in a major in education and/or seeking professional licensure as school service personnel.
• Establish appropriate conditions, opportunities, and resources with which both faculty and graduate students may engage in scholarly activities.
• Assist the educational enterprise of Iowa in development by utilizing, when appropriate, the talents and expertise of the faculty and graduate student body in such activities as workshops, conferences, and consultation in small groups, both on- and off-campus.

Graduate Study: Degrees: The Department of Educational Leadership and Policy Studies -- ELPS -- offers work for the degrees master of science, master of education, certificate of advanced studies, and doctor of philosophy with a major in education. ELPS also offers minor work to students majoring in other fields of study. At the master’s level, students may specialize in educational administration; higher education; and research and research. Interested students should consult the specific program area for master’s degree information related to that program.

Students may complete the Ph.D. with a major in education and a specialization in educational leadership with emphasis in either educational administration or higher education. Specific information about the requirements of the Ph.D. degree is available from the department office or on the website (wwwelps.hs.iastate.edu/elps/elpsPhd.htm).

The following information refers only to the Ph.D. program:

Prerequisites: Prerequisite to major graduate work in educational leadership is completion of an undergraduate degree with coursework appropriate to the planned specialization, and evidence that the student ranks above average in scholastic achievement.

Outcomes: Graduates of the Ph.D. program, regardless of the emphasis chosen, possess skills and knowledge related to five core domains: leadership, educational research, communication, educational evaluation, and educational foundations. By the time of graduation, students will demonstrate the necessary skills and knowledge to:

• Work effectively with individuals and groups.
• Engage in ethical decision-making and management of resources to accomplish goals.
• Engage in scholarly inquiry.
• Express ideas clearly, both orally and in writing.
• Articulate their values, beliefs, and Philosophy of life.
• Relate sensitively to individuals from diverse backgrounds.
• Use the principles of program evaluation and assessment intelligently.
• Have a clear understanding of the foundations of education, grounding their work in theory and Philosophy.
• Articulate the concepts, theories, and practices related to the educational content area emphasized in their studies.

Other Related Programs: Other graduate programs related to education (including Interdisciplinary Graduate Studies) may be more suited to the interests of potential students on the basis of previous education and experiences as well as future plans and needs. Potential students should refer to programs in the Departments of Agricultural Education and Studies, Curriculum and Instruction, Family and Consumer Sciences Education and Studies, Kinesiology, and Interdisciplinary Graduate Studies, or to graduate level course offerings within the other departments, to determine if these offerings may be more closely matched with their career interests.

The following information refers only to the masters level programs:

Prerequisites: Prerequisite to major graduate work in educational leadership is completion of an undergraduate degree with coursework appropriate to the planned specialization, and evidence that the student ranks above average in scholastic achievement and promise of professional competence.

Educational Administration (EdAdm): Scott McLeod, Program Coordinator

Degrees and Certificates: Several programs are offered: (1) master of science degree, with thesis or creative component, in elementary or secondary school administration; (2) master of education practitioner; (3) advanced study leading to principal's license; (4) certificate of advanced studies providing post-master's training for superintendence licensure; and (5) doctor of philosophy with major in education and specialization in educational leadership. Courses are scheduled with consideration for cohort-collegial teams or groups.

Emphasis: The Educational Administration Program places dual emphasis on preparation of professional educational administrators and on the academic/scholarly aspects of educational leadership and management.

Prerequisites: Prerequisite to major graduate work in educational leadership is completion of an undergraduate degree with coursework appropriate to the planned specialization, and evidence that the student ranks above average in scholastic achievement and promise of professional competence.
Learning Opportunities  Students will complete courses, laboratory experiences, field experiences, and independent research so that they can effectively serve in leadership roles.

Careers  Graduates of Master’s Degree and Certificate of Advanced Study Programs in Educational Administration are prepared for leadership roles in Pre K-12 school districts and education agencies, typically as building-level principals, assistant principals, curriculum coordinators, and central office administrators. Doctoral graduates are prepared for PreK-12 leadership roles and academic or leadership positions in higher education.

Outcomes  Graduates of the Certificate of Advanced Studies Program will possess administrative and leadership skills necessary for the superintendency and central office administration. By the time of graduation, students will demonstrate the necessary skills and knowledge to:

- Serve as leaders, with effective skills in curricular and instructional leadership.
- Work effectively with individuals and groups, both within the district and community, to create and sustain a positive learning culture.
- Engage in ethical decision-making and effective management of human, material, and financial resources to accomplish district goals.
- Express ideas clearly to various publics, both orally and in writing.
- Articulate their values, beliefs, and Philosophies of education.
- Relate sensitively to individuals from diverse backgrounds.
- Access and utilize research information and technology to assist with organizational improvement.
- Translate educational administration concepts and theories into sound management and leadership practices.

Graduates of the Master’s Program with a specialization in educational administration and the Principal Licensure Program possess administrative and leadership skills necessary for PreK-12 building-level leadership roles. Upon program completion, each student will possess the knowledge and skills to:

- Work effectively with all members of the school community to create a shared vision of learning, which builds upon the formation of a shared understanding of the purposes of schooling in a pluralistic Society.
- Demonstrate effective skills in collaborative instructional leadership, including an understanding of curriculum standards, principles of effective teaching practices, and assessment practices that lead to improved student learning.
- Implement a system of shared governance and empower faculty, staff, students, and families in the school improvement process.
- Create and sustain a safe and caring school culture that values diversity and maintains a commitment to equity in school practices.
- Engage in ethical and moral leadership practices and the effective management of human, material, and financial resources to accomplish school goals.
- Work collaboratively with internal and external stakeholders in responding to school needs and providing community resources to support the learning process.
- Access research and use data to inform teaching and learning practices and support the process of continuous improvement.
- Apply various technologies to support and enhance administrative and instructional purposes.
- Use leadership skills to transform the school into a learning community that promotes change and sustains school improvement initiatives.

- Engage all members of the school community in critical inquiry and reflection, to promote the belief that learning is a lifelong endeavor for every individual.

Graduates of the Ph.D. Program with a specialization in educational administration will possess skills and knowledge related to the six core domains: leadership, educational research, communication, educational evaluation, educational foundations, and educational technology. By the time of graduation, students will demonstrate the necessary skills and knowledge for those outcomes as listed under the ELPS Ph.D. program outcomes.

Courses primarily for graduate students, open to qualified undergraduate students

EdAdm 541. Principles of Educational Leadership. (3-0) Cr. 3. F.S.S. Prereq: Teacher licensure and permission of instructor. Basic principles of educational organizations, including an understanding of organizational behavior and theoretical approaches to administration. Exploration of substantive elements related to school reform, such as leadership, the change process, current issues in education, and developing a shared vision and mission.

EdAdm 551. Supervision for Learning Environments. (3-0) Cr. 3. F.S.S. Prereq: 541 Study of effective classroom instructional practices that reflect current principles of learning. Understanding and practice of supervisory techniques that support teachers in improving teaching and learning processes, including skills in observational data collection, data analysis, collaboration, and conferencing skills.

EdAdm 552. Current Issues in Site-Level Leadership. (3-0) Cr. 3. F.S.S. Prereq: 541. Essential tasks of building-level leadership and management in contemporary school settings, including: curriculum and organizational structure, theory and practice of scheduling, financial management, roles and responsibilities of governance, communication and public relations skills, home/parental involvement and relationships, project and crisis management, technology integration, school climate and culture, effective student support programs such as counseling and guidance, attendance and discipline.

EdAdm 554. Leading School Reform. (3-0) Cr. 3. F.S.S. Prereq: 541. Study of principles of transformational leadership and collaborative decision-making skills. Leadership activities that facilitate the development of a school culture that embraces change and school reforms that result in high quality schools dedicated to improved student achievement.

EdAdm 556. School Systems as Learning Cultures. (3-0) Cr. 3. F.S.S. Prereq: 541. Practical and theoretical perspectives on school administrative problems from critical pedagogical studies and research. Exploration of related issues such as cultural literacy, forms of authority and control, and other historical problems of schools in dealing with minorities and culturally different persons.

EdAdm 557. Human Resource Development for Learning. (3-0) Cr. 3. F.S. Prereq: 541. Leadership theory and practice that focuses on the professional development of school staff to promote improved student learning. Principles of school personnel evaluation; legal issues related to hiring, retention, and dismissal; evaluation models for professional and classified staff; and effective professional development models to support lifelong learning and reflective practice.

EdAdm 558. Diverse Learning Needs. (3-0) Cr. 3. F.S.S. Prereq: 541. Learner needs will be examined from major psychological/social perspectives with stress upon developmental phases of normal growth along with common problems encountered in schools. Issues of racism, gender bias, and Socio-economic problems that influence learner responsiveness to school curriculum and administrative regulations, routines, and legal requirements.

Educational Leadership and Policy Studies 209

EdAdm 559. Curriculum Leadership. (3-0) Cr. 3. F.S.S.S. Prereq: 541. Generic administrative approaches to the design and delivery of elementary and secondary school curricula including the study of the organizations for learning; cognition and learning theories; validation; concepts of balance; school goals; student assessments and reporting of progress, alignment, and professional development; development of curriculum guides; mapping; employing national standards and benchmarks.

EdAdm 575. Education Law and Ethics. (3-0) Cr. 3. F.S.S. Prereq: 541 Examinations of constitutional, statutory, and judicial provisions as a basis for the legal operation of educational institutions. Rights and ethical responsibilities of school leaders are examined in relation to their roles and responsibilities with boards, other school personnel, and students.

EdAdm 591. Supervised Field Experience. Cr. arr. Repeatable. Prereq: 541 and admission to program and instructor’s approval. Supervised on-the-job field experience in special areas. A. Elementary Principal B. Secondary Principal

EdAdm 593. Workshops. Cr. arr. Prereq: 9 credits in educational administration.

EdAdm 599. Creative Component Development. Cr. arr. Prereq: 9 credits in educational administration.

Courses for graduate students

EdAdm 601. Planning Systems, Operations and School Environments. (3-0) Cr. 3. F.S.S. Prereq: 541. Planning and management theories, assumptions, strategies, and tactics within belief systems; development of vision and mission positions; strategic goals; objectives and operational tactics to attain them, with emphasis on facility renovation and school construction projects.

EdAdm 602. Human Resource Development and Negotiations. (3-0) Cr. 3. S.S. Prereq: 541. Development and practice of collective negotiations within human resource development concepts and strategies, with emphasis on creating and implementing “win-win” approaches that enhance system productivity and performance. Specific contract language and concepts which enhance system effectiveness will be highlighted.

EdAdm 603. Personnel Evaluation and System Assessment Practices. (3-0) Cr. 3. F.S. Prereq: 541. Theory, strategies, and systems for supervising programs and personnel in school districts and independent schools. Focuses on the principal, cabinet level administrator, e.g., director, headmaster, or assistant superintendent for instruction.

EdAdm 604. Theories of Leadership. (3-0) Cr. 3. F.S.S. Prereq: 541. Specific leadership theories and models will be studied with an emphasis on: organization building and constructivist strategies for teachers; developing and assessing internal and external support groups for schools; and organizational capacity building.

EdAdm 605. Current Practices of the Superintendent. (3-0) Cr. 3. S.S. Prereq: 541. The historical development of the American Superintendency in public education, problems and pitfalls, and politics and tensions separating executive actions from board policy formulation; executive challenges among contemporary educational problems of resource acquisition and allocation; collaborative relationships; union/system issues; system changes and capacity building models.

EdAdm 606. The Administration of Technology Systems. (3-0) Cr. 3. F.S.S. Prereq: 541. The design, acquisition and operations of technology in educational administration; accounting; personnel record keeping and health system interfaces; compensation practices, staff development, and instruction record keeping, maintenance and groups.
EdAdm 607. Advanced Education Law. (3-0) Cr. 3. S.S.S. Prereq: 576. Emerging issues of school case law and litigation as it pertains to school/student safety; student/teacher relationships; administrative authority/oversight; taxation and abatement; home schooling issues; censorship of books and curricula; student clubs and religious practices.

EdAdm 608. Administrative Problems. (3-0) Cr. 3. F.S. Prereq: 541. A case study approach to the resolution of problems in educational administration. Emphasis on decision-making, conflict resolution, and communication using actual situations.

EdAdm 609. Instructional Management. (3-0) Cr. 3. F.S. Prereq: 541. Theories and practices of instructional management including curriculum audits, classroom observations, and analytical models assessing teacher interactions with students. Strategies of improving assessment of teacher interactions with students. Strategies of improving pupil resiliency and achievement will be highlighted. Mapping of curriculum configurations in classrooms will be applied to the use of national/international standards.

EdAdm 611. Superintendent/Board Relations. (3-0) Cr. 3. F.S. Prereq: 541. An historical analysis of the development of governance systems in American public education, and contemporary issues and problems confronting effective school district governance.

EdAdm 612. School Finance and Business Management. (3-0) Cr. 3. S.S.S. Prereq: 541. Contemporaneous business and risk management practices, including financial management and banking, investment of funds; cash flow projections; accounting practices, and school budget development concepts and usage. The functions and duties of school business personnel will be related to specific business and fiduciary tasks.

EdAdm 615. Seminar. Cr. arr. Repeatable. In-depth study of administrative topics of contemporary interest and importance:
- Client Focus
- Research
- Quality Improvement
- Special Services
- Assessment
- F. Leadership

EdAdm 690. Advanced Special Topics. Cr. arr. Repeatable. Prereq: 9 credits in educational administration.

EdAdm 691. Internship. I Cr. 1-3. Repeatable, maximum of 3 credits. Prereq: 541, 575. Internship is part of the preparation for the Ph.D. in Education and serves to provide the student with an experience that will enable them to serve in leadership roles.

Educational Leadership and Policy Studies (EL PS)

Courses for graduate students

EL PS 616. Capstone Experience. Cr. 3. F.S. Prereq: 4 credits of 615. This experience is designed to explore a topic addressed in one of the thematic seminars. The product of the capstone experience is a written paper of sufficient quality to be submitted to a scholarly journal for review.

Higher Education (Hg Ed)

Frankie Laan, Program Coordinators

Degrees
Higher Education offers work for the master of science degree with thesis and master of education degree (non-thesis) and a specialization in higher education, as well as postgraduate professional development. A community college leadership certificate program and a community college teaching and learning certificate program are also offered.

The Master's Program in Higher Education

Emphasis
The Higher Education program provides graduate instruction and leadership development in community college education, student affairs practice, institutional research, post-secondary curriculum, and higher education administration.

Prerequisites
Prerequisite to major graduate work in educational leadership is completion of an undergraduate degree with coursework appropriate to the planned specialization, and evidence that the student ranks above average in scholastic achievement and promise of professional competence.

Learning Opportunities
Master's students in Higher Education will complete courses, practical experiences, and independent research or a culminating experience that will enable them to serve as leaders in various educational settings.

Careers
Master’s students in Higher Education are prepared for entry level positions in student affairs administration, general institutional administration, teaching positions in community colleges, and support positions in post-secondary settings.

Outcomes
Graduates of the Master’s Program in Higher Education with a specialization in student affairs will demonstrate leadership in student affairs settings. By the time of graduation, students will possess the necessary skills and knowledge to:
- Demonstrate effective oral communication.
- Effectively communicate in writing.
- Work effectively with a diverse student population.
- Employ interventions designed to facilitate the development and learning of college students.
- Create, design, and implement programs and interventions.
- Effectively advise students individually and in groups.
- Organize and administrate student services in post-secondary settings.
- Conduct basic assessment, evaluation, and research.

Graduates of the Master’s Program in Higher Education with a specialization in community college teaching and learning will possess teaching and learning leadership skills. By the time of graduation, students will possess the necessary skills and knowledge to:
- Facilitate college student learning.
- Employ pedagogical techniques.
- Demonstrate a clear understanding of the foundations of education, grounding their work in theory and Philosophy.
- Use technology effectively in learning and organizational processes.
- Articulate the concepts, theories, and practices related to the content of higher education as emphasized in their course work.
- Develop curriculum.
- Assess student learning.
- Understand the Philosophy, organization, functions, and current issues of community colleges.

Graduates of the Master’s Program in Higher Education with a specialization in community college administration will demonstrate leadership in community college settings. By the time of graduation, students will possess the necessary skills and knowledge to:
- Create positive environments for community college students.
- Perform administrative functions in community college settings.
- Assist community college students with the academic and personal issues they face.
- Develop effective teaching and learning strategies.
- Work effectively with diverse student populations.
- Shape community college curricula.

The Ph.D. Program in Higher Education

Emphasis
The Ph.D. in education with a specialization in educational leadership includes an emphasis on higher education. This program is designed to prepare leaders for post-secondary settings and is concerned with advanced study and independent research on various topics related to post-secondary settings. See departmental overview of the Ph.D. degree in educational leadership.

Prerequisites
Prerequisite to doctoral work in educational leadership is completion of an undergraduate degree with coursework appropriate to the planned specialization, and evidence that the student ranks above average in scholastic achievement and promise of professional competence. In addition, students are expected to have completed a master’s degree and 3-5 years of professional work experience in higher education.

Learning Opportunities
Doctoral students will complete courses, laboratory experiences, field experiences, independent research, a capstone experience, and a dissertation so that they can serve as leaders in various post-secondary educational settings such as colleges and universities, private and state educational agencies, and other organizations concerned with post-secondary education.

Careers
Typical careers available to graduates include leadership positions in post-secondary institutions, agencies, and other organizations concerned with post-secondary education. Special experiences are available to those who are interested in a career as a faculty member in post-secondary settings.

Outcomes
Graduates of the doctoral program with an emphasis in higher education will possess knowledge and skills related to five core domains: leadership, educational research, communication, educational evaluation, and educational foundations. By the time of graduation, students will demonstrate the necessary skills and knowledge for these outcomes as listed under ELPS Ph.D. program outcomes.

Courses open to community college faculty members only

Hg Ed 420. Introduction to VocationalTechnical Teaching at Community Colleges. (3-0) Cr. 3. F. Examines the competencies for successful teaching in vocational technical programs; a focus on lesson planning, motivating students, teaching methods, time management, and evaluation.

Hg Ed 421. VocationalTechnical Teaching Methods at Community Colleges. (3-0) Cr. 3. S. Prereq: 420. Develops competencies necessary to identify, develop, implement, and evaluate collaborative learning, learning to learn, and other classroom and lab/clinic teaching techniques.

Hg Ed 422. VocationalTechnical Curriculum at Community Colleges. (Dual-listed with 522). (3-0) Cr. 3. F. Prereq: 421. With a focus on alignment and
accountability develops competencies necessary to identify, develop, implement, and evaluate outcome-based vocational technical courses and programs in community colleges.

Hg Ed 423. Vocational Technical Assessment at Community Colleges. (Dual-listed with 523). (3-0) Cr. 3. S. Prereq: 422. With a focus on classroom assessment develops necessary to identify, develop, empower, and evaluate teaching and learning success.

Courses primarily for graduate students, open to qualified undergraduate students

Hg Ed 504. Higher Education in the United States. (3-0) Cr. 3. S. Prereq: Graduate classification. Historical development of higher education; diversity, functions, and Philosophies of colleges and universities; federal and state roles; review of general, liberal, technical, graduate, and professional education.

Hg Ed 522. Vocational Technical Curriculum at Community Colleges. (Dual-listed with 422). (3-0) Cr. 3. S. Prereq: Hg Ed 550. With a focus on alignment and accountability develops competencies necessary to identify, develop, implement, and evaluate outcome-based vocational technical courses and programs in community colleges.

Hg Ed 523. Vocational Technical Assessment at Community College. (Dual-listed with 423). (3-0) Cr. 3. S. Prereq: 522. With a focus on classroom assessment develops competencies necessary to identify, develop, empower, and evaluate teaching and learning success.

Hg Ed 540. Foundations of Leadership: Learning, Ethics, Self and Interaction. (2-0) Cr. 2. F. Prereq: permission of instructor. Serving as an introduction to developing practicing leaders, this course will create the foundation upon which enduring understanding of leadership will be built. Specifically explored will be learning as the foundation of human enterprise, everyday leadership, determination of common good, roots of individual's actions, sensitivity to others, merits of divergent ideas, questioning the Status quo, ethics as personal responsibility and choosing to grow.

Hg Ed 541. Learning, Leadership, Ethics and Community. (2-0) Cr. 2. S. Prereq: permission of instructor. Serving as the second semester in a program to develop practicing leaders, this course will build upon the foundations created in the previous semester to help students embrace the enduring understandings of leadership. Specifically explored will be team learning and the effect on individuals, skills required for a team to move forward, importance of decisions based on the good of the community, and a means of enhancing learning, and interconnectedness of the individual, the community, and the world.

Hg Ed 542. Learning, Leadership, Ethics, and Teams; Knowing, Doing and Being. (2-0) Cr. 2. F. Prereq: permission of instructor. The overall purpose of this course is to expand the foundation started in Foundations of Leadership: Learning, Ethics, Self and Interactions and Learning, Leadership, Ethics and Community for developing practicing leadership. The focus will shift from a naive understanding of the concepts of self within a team and community to a more sophisticated understanding of knowing, being and doing leadership.

Hg Ed 543. Learning, Leadership, Ethics and Teams in Action. (2-0) Cr. 2. S. Prereq: permission of instructor. The purpose of this last (in a series of four) course is to allow students to put their knowledge, skills, and abilities related to leadership, learning, Ethics and Teams into practice. In addition to planning and implementing a major service learning project, the focus will be on the next wave of the study of leadership - connecting leadership to the research about the brain and human learning.

Hg Ed 544. Foundations of Leadership & Learning. (3-0) Cr. 3. F. Prereq: graduate student classification. First of two-course series to help leaders develop the knowledge and skills to engage the collective capacity of a group to think, learn, and achieve important purpose. The foundation for developing deep understanding about leadership, learning, and the relationships therein. Focus on application of recent knowledge about human learning in the professional practice of leadership. Relationship leadership model and relationship to other leadership models, theories, and concepts; current theories of human learning (including expert/in novice and transfer of learning), and interpersonal leadership practice; critical understanding of self; facilitating learning for others; metacognition as a habit of mind; fundamentals of group interaction theories; social interdependence, communication, collaboration, conflict resolution, decision-making, cohesion, controversy, team development; power, resources, and development of community.

Hg Ed 545. Connecting Leadership & Learning in Practice. (3-0) Cr. 3. F. Prereq: Graduate student classification and completion of Hg Ed 544. Second of a two-course series designed to help leaders develop the knowledge and skills to best engage the collective capacity of a group to think, learn and achieve important purpose. Builds on foundation course to support students in creating applications of relational leadership to their professional practice. Focus on developing the habits of mind and habits of practice to best use knowledge about human learning in the professional practice of leadership. Applications of relational leadership model; applications of group interaction theory and implementation of action plans to achieve measurable goals; application of current theories of human learning as they relate to leadership; exploration of the fundamentals of emotional intelligence and the impacts on leadership; developing critical habits of mind to practice leadership focused on learning.

Hg Ed 550. Teaching, Learning and Leadership. (3-0) Cr. 3. F. Prereq: Teacher licensure. Current issues and practices in community college teaching and learning, and the roles and responsibilities of teachers as leaders.

Hg Ed 561. College Teaching. (3-0) Cr. 3. Prereq: 6 graduate credits. Educational theories, methods and strategies for the improvement of college instruction. Assist potential college instructors in developing knowledge of protocol, assessment, and the scholar and art of teaching. Emphasis on the unique challenges of college teaching in a changing student population environment.

Hg Ed 562. Curriculum Development in Colleges. (3-0) Cr. 3. Prereq: Graduate classification. Modes of curriculum design, development, and change in colleges. Development of curricular leadership and evaluation strategies.

Hg Ed 574. Student Affairs Practice in Higher Education. (3-0) Cr. 3. F. Prereq: Graduate classification. An introduction to the field of student affairs practice with a consideration of student activities, counseling services, financial aid, admissions, student conduct, academic advising, and residential programs; includes community college programs.

Hg Ed 575. Organization and Administration of Student Affairs. (3-0) Cr. 3. S. Prereq: Admission to Higher Education Program, 574. Organization structures, role and function of student affairs staff; policies and decision-making for student affairs practice.
Courses for graduate students

Hg Ed 664. College Organization and Administration. (3-0) Cr. 3. F. Prereq: 504. Administrative organization and behavior: communications, leadership, finance, strategic planning, and institutional governance.

Hg Ed 665. Financing Higher Education. (3-0) Cr. 3. S. Prereq: 504. Lectures, discussions, and individual investigation relating to financial administration in colleges and universities. Budgeting, auxiliary enterprises, administration of financial planning, fund raising, examination of theories on expenditures. Designed for persons aspiring to serve as college administrators.

Hg Ed 666. Academic Issues and Cultures. (3-0) Cr. 3. S. Prereq: 504. Examination of institutional culture and issues in higher education focusing on the roles and responsibilities of faculty and academic administrators.

Hg Ed 676. Student Development Theory II. (3-0) Cr. 3. S. Prereq: 676. Life span approaches to student development, social identity development, and spiritual development with emphasis on application of these theories in student affairs practice.

Organizational Learning and Human Resource Development (OLHRD)

Courses primarily for graduate students, open to qualified undergraduate students

OLHRD 541. Adult Learning. (3-0) Cr. 3. Examines how adults acquire and use knowledge, skills, and attitudes within organizational settings; individual differences in learning as well as the principles and elements of the learning organization.

OLHRD 544. Performance Improvement and Change Through Learning Interventions. (3-0) Cr. 3. Prereq: OLHRD 541, 542. Examines the characteristics and elements of the performance improvement and change processes, work with special attention to the roles and responsibilities of employees, managers, and organizations when improving individual and organizational learning.

OLHRD 545. Learning Acquisition, Transfer, and Evaluation. (3-0) Cr. 3. Prereq: OLHRD 541, 542, 544. Critical examination of learning acquisition, transfer, and evaluation barriers, partnerships, strategies, and activities; and the roles and responsibilities of human resource development professionals, managers, employees, and organizations in the application and evaluation of learning on the job.

Research and Evaluation (ResEv)

John Schuh and Linda Serra Hagedorn, Program Co-Coordinators

Degree Research and Evaluation offers work for the Master of Science degree with a thesis with a specialization in research and evaluation.

Emphasis Research and Evaluation students receive a broad foundation in the areas of quantitative and qualitative research methodology, data analysis, assessment, and evaluation. Students select one area for in-depth study.

Prerequisites Prerequisites to major graduate work in educational leadership are completion of an undergraduate degree with coursework appropriate to the planned specialization, and evidence that the student ranks above average in scholastic achievement and promise of professional competence.

Learning Opportunities Students in Research and Evaluation will complete courses, laboratory experiences, field experiences, independent research and a thesis.

Careers Graduates are prepared for professional roles in institutional research, assessment of student learning, and program evaluation in post-secondary settings, school districts, and not-for-profit organizations.

Outcomes Graduates of the master’s program with a specialization in research and evaluation will be prepared for leadership roles for careers in assessment and evaluation. By the time of graduation, students will demonstrate the necessary skills and knowledge to:

- Articulate current issues and principles in research, program evaluation, and assessment.
- Implement various conceptual approaches to research, program evaluation, and assessment.
- Effectively use the principles and skills of research data analysis.
- Interpret data and prepare accurate and useful reports.

Courses primarily for graduate students, open to qualified undergraduate students

ResEv 550. Introduction to Educational Research. (3-0) Cr. 3. F. Prereq: 553. Understanding the nature of quantitative and qualitative research; reviewing the literature; developing research problems and questions; research designs; data collection and analysis issues; evaluating research studies.

ResEv 552. Basic Educational Statistics. (3-0) Cr. 3. F. Statistical concepts and procedures for analyzing educational data; descriptive Statistics, correlation, t tests, and chi square with computer applications.

ResEv 553. Intermediate Educational Statistics. (3-0) Cr. 3. S. Prereq: 552 or equivalent. A continuation of Statistical concepts and procedures for analyzing educational data; inferential techniques including simple and multiple regression, multiple ANOVA, etc., with educational computer applications.

ResEv 554. Intermediate Research Methods. (3-0) Cr. 3. S. SS. Prereq: 580, 553. Intermediate quantitative and qualitative research methodology in preparation for carrying out thesis and dissertation research; problem formulation; design; data collection and analysis; interpreting and summarizing research findings.

ResEv 560. Assessing Student Learning. (3-0) Cr. 3. Prereq: 550 or basic Statistical skills. The purpose and techniques of formal and informal classroom assessment: rubrics, performance assessment, portfolios, paper and pencil tests, communicating assessment findings; emphasis on both theory and practical applications.

ResEv 570. Surveys in Educational Research. (3-0) Cr. 3. S. Prereq: ResEv 552 or equivalent. Examination of survey design and administration in educational research. Designing surveys; developing, evaluating, and asking survey questions; survey sampling; measuring survey reliability and validity; administering mail and web surveys; decreasing survey nonresponse; conducting post-collection survey data processing; conducting survey research with integrity.

ResEv 580. Qualitative Research Methodology. (3-0) Cr. 3. Prereq: 550. Qualitative research procedures in education, particularly historical, philosophical, biographical, ethnographic, and case study; use of sources, principles of qualitative research, methods of data collection and analysis, field techniques, and writing of research results.

Courses for graduate students

ResEv 680. Critical Issues in Interpretive Methodology. (3-0) Cr. 3. S. Prereq: 580. An intensive reading and discussion course focusing on contemporary methodological theory for interpretive inquiry; examines how interpretive field work is conducted, how narrative and ethnographic data are theorized and analyzed, and how interpretive texts are written.

ResEv 690. Advanced Special Topics. Cr. arr. Repeatable. Prereq: Graduate standing. Guided reading and/or study on special topics of an advanced nature.

Electrical Engineering

ecee.ece.iastate.edu

(Administered by the Department of Electrical and Computer Engineering)

Arun Somani, Chair of Department

Distinguished Professors: Somani, Soukoulis

Distinguished Professors (Emeritus): Brown, Fouad, Lord, Nilsson, Pohl

University Professor: Jacobson

University Professor (Emeritus): Jones

Professors: Aijarapu, Arul, J. Bowler, Dalal, Geiger, Kamal, Kothari, Kumar, Kushner, Liu, Luecke, McCalley, Oliver, Rover, Shinar, Weber

Professors (Emeritus): Anderson, Basart, Brearely, Brockman, Comstock, Fanslow, Hale, Horton, Hsieh, Kopplin, Melia, Potter, Read, Sheble, Smay, Stewart, Swift, Townsend, Venkata

Professor (Adjunct): Shinar

Professor (Emeritus Adjunct): Hillesland

Professors (Collaborators): Jiles, Lee

Associate Professors: N. Bowler, Chang, Chen, Chu, Davidson, Davis, Dickson, Dogandzic, Elia, Govindarasu, Guan, S. Kim, Song, Thirhapura, Tuttle, Tyagi, Z. Wang

Associate Professors (Emeritus): Bond, Carlson, Coady, Mericle, Pavlat, Scott, Stephenson

Associate Professors (Adjunct): Biswas, Sosonkina

Associate Professors (Collaborators): Ashlock, Salapaka

Assistant Professors: Aliprantis, Bigelow, Chaudhary, Chung, Daniels, Dong, Fayed, Hornbuckle, Jones, J. Kim, Ma, Nehart, Nguyen, Pandey, Qiao, Rama-moorthy, Stoytchev, Vaidya, Vaswani, L. Wang, Ying, Zambrone, Zhang

Assistant Professors (Adjunct): Amin, Bode

Assistant Professors (Collaborators): Balasubramaniem

Senior Lecturer: Mina, Wiersema

Undergraduate Study

For the undergraduate curriculum in electrical engineering leading to the degree bachelor of science, see College of Engineering, Curricula. This curriculum is accredited by the Engineering Accreditation Commission of ABET.

The Department of Electrical and Computer Engineering at Iowa State University provides undergraduate students with the opportunity to learn electrical and computer engineering fundamentals, to study applications of the most recent
advances in state-of-the-art technologies, and to prepare for the practice of electrical engineering. The student-faculty interaction necessary to realize this opportunity occurs within an environment that is motivated by the principle that excellence in undergraduate education is enhanced by an integrated commitment to successful, long-term research and outreach programs.

The electrical engineering curriculum offers a number of emphasis areas at the undergraduate level, including control systems, electromagnetics, microelectronics, VLSI, power systems, and communications and signal processing. Students are required to choose at least one course sequence which focuses on one of these areas; therefore graduates have substantial depth in specific areas to complement the breadth obtained in the required curriculum. Students may also take elective courses in computer networking, security, computer architecture, digital systems, and software.

The objective of the electrical engineering program at ISU is that its graduates should demonstrate expertise, engagement, learning, leadership, and teamwork within five years after graduation.

Expertise: Graduates should establish peer-recognized expertise together with the ability to articulate that expertise and use it for problem solving in at least one of the following domains of communications and signal processing, controls, electromagnetics, power and energy, electronic devices, semiconductor materials, and analog and digital circuits.

Engagement: Graduates should be engaged in the engineering profession, locally and globally, contributing through the ethical, competent, and creative production of engineering in industry, academia, or the public sector, or graduates may use the program as a foundation for interdisciplinary careers in business, law, medicine, or public service.

Learning: Graduates should demonstrate sustained learning through graduate work or professional improvement opportunities and through self-study, and they should demonstrate the ability to adapt in a constantly changing field.

Leadership: Graduates should exhibit leadership and initiative to advance professional and organizational goals, facilitate the achievements of others, and obtain results.

Teamwork: Graduates should demonstrate effective teaming and commitment to working with others of diverse cultural and interdisciplinary backgrounds by applying engineering abilities, communication skills, and knowledge of contemporary and global issues.

As a complement to the instructional activity, the ECPE Department provides opportunities for each student to have experience with broadening activities. Through the cooperative education and internship program, students have the opportunity to gain practical industry experience. See College of Engineering, Cooperative Programs.

Students have the opportunity to participate in advanced research activities; and through international exchange programs, students learn about engineering practices in other parts of the world. Well-qualified juniors and seniors in electrical engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both the bachelor of science and master of science degrees or the bachelor of science and master of science degrees in engineering. Under concurrent enrollment, students are eligible for assistantships and simultaneously take undergraduate and graduate courses. Details are available in the Student Services Office and on the department’s web site.

Courses primarily for undergraduate students

E E 166, Professional Programs Orientation. (Cross-listed with Cpr E). Cr. R. F.S. (1-0) Overview of the nature and scope of electrical engineering and computer engineering professions. Overview of portfo- los. Departmental rules, advising center operations, degree requirements, program of study planning, career options, and student organizations.

E E 186, Introduction to Electrical Engineering and Problem Solving II. (0-2) Cr. 1. S. Prereq: 185. Project based and hands on continuation of 185. Group skills needed to work effectively in teams. Individual interactive skills for small and large groups. Learning to use tools and methods for solving electrical engineering problems.

E E 201, Electric Circuits. (3-2) Cr. 4. F.S. Prereq: Credit or registration in Math 267 and Phys 222. Emphasis on Mathematical tools. Circuit elements (resistors, inductors, capacitors) and analysis methods including power and energy relationships. Network theorems. DC, sinusoidal steady-state, and transient analysis. AC power. Frequency response. Two port models. Diodes, PSPICE. Laboratory instrumentation and experimentation. Credit for only E E 201 or 442 may be used towards graduation.

E E 294, Program Discovery. (Cross-listed with Cpr E). Cr. R. F.S. 166 or Cpr E 166. The roles of professionals in computer and electrical engineering. Relationship of coursework to industry and academic careers. Issues relevant to today’s world. Satisfaction-fail only.
E E 298. Cooperative Education. Cr. R. F.S.S. 
Prereq: Permission of department and Engineering Career Services. First professional work period in the cooperative education program. Students must register for this course before commencing work.

E E 314. Electromagnetics for non-Engineering Students. (3-0) Cr. 3. F. S. Prereq: Physics 222, 112, or equivalent. Conceptual study of electromagnetism and its application in engineering and related fields. Em fundamentals, Em spectrum, radiation, radiating systems, wireless, Modern concepts of physics, transmission lines, high speed effects, waveguides, GPS and other related phenomena will be discussed and explained with the application in mind. Nonmajor graduate credit.

E E 322. Probabilistic Methods for Electrical Engineers. (Cross-listed with Stat). (3-0) Cr. 3. F. S. Prereq: E E 224. Introduction to probability and random variables, cumulative distribution function, probability mass and density functions, expectation, moments, moment generating function, multiple random variables, functions of random variables. Elements of Statistics, hypothesis testing, confidence intervals, least squares. Introduction to random processes.

E E 330. Integrated Electronics. (Cross-listed with Cpr E). (3-3) Cr. 4. Prereq: 201, credit or enrollment in 230, Cpr E 291. Semiconductor technology for integrated circuits. Modeling of integrated devices including diodes, BJTs, and MOSFETs. Physical layout, Circuit simulation, digital building blocks and digital circuit synthesis and design of analog building blocks. Laboratory exercises and design projects with CAD tools and standard cells. Credit for only one of E E 330 or 331 may be counted toward graduation. Nonmajor graduate credit.

E E 331. Electronics II. (3-3) Cr. 4. Prereq: 230, Cpr E 288, E E 224 recommended. I-V characteristics of diodes, Bipolar Diode circuit analysis, Junction Transistors, Small-signal analysis and biasing techniques for amplifier circuits. CMOS digital circuit building blocks. Noise and distortion in electronic systems. Active filters, Power Amplifiers. DC motor control circuits. Interfacing electronic circuits with programmable microcontrollers. Laboratory exercises and design projects, including a board-level system layout. Credit for only one of E E 330 or 331 may be counted toward graduation.

E E 332. Semiconductors and Materials. (Cross-listed with Mat E). (3-0) Cr. 3. S. Prereq: Phy 222 and, only for Mat E majors, Mat E 334. Introduction to semiconductor material and device physics. Quantum mechanics and band theory of semiconductors. Charge carrier distributions, generation/recombination, transport properties. Physical and electrical properties and fabrication of semiconductor devices such as MOSFETs, bipolar transistors, laser diodes and LED's. Nonmajor graduate credit.

E E 388. Sustainable Engineering and International Development. (Cross-listed with A E, C E, M E, Mat E). (3-2) Cr. 3. F. S. Prereq: Junior classification in engineering. Multi-disciplinary approach to sustainable engineering and international development, sustainable development, appropriate design and engineering, feasibility analysis, and business development. Philosophy and politics of technology, and ethics in engineering. Engineering-based projects from problem formulation through implementation. Interactions with partner community organizations or international partners such as nongovernment organizations (NGOs). Course readings, final project/design report. Nonmajor graduate credit.

E E 394. Program Exploration. (Cross-listed with Cpr E). Cr. R. Prereq: 294 or Cpr E 294. Exploration of academic and career fields for electrical and computer engineers. Examination of professionalism in the context of engineering and technology with competencies based skills. Introduction to professional portfolio development and construction. Satisfactory-Fail only.

E E 396. Summer Internship. Cr. R. Repeatable. SS. Prereq: Permission of department and Engineering Career Services. Summer professional work period. Students must register for this course before commencing work. Nonmajor graduate credit.

E E 397. Engineering Internship. Cr. R. Repeatable. F. S. Prereq: Permission of department and Engineering Career Services. One semester maximum per academic year professional work period. Students must register for this course before commencing work.

E E 408. Interdisciplinary Problem Solving. (Cross-listed with I E, TSM). (3-0) Cr. 3. F. S. Prereq: Junior or senior classification. Use of the Theory of Constraints as a way of approaching problem solving, win-win negotiation, project planning and effective delegation in the context of engineering/business systems. Team projects aimed at improving design outcomes. Nonmajor graduate credit.

E E 422. Communication Systems II. (3-0) Cr. 3. F. Prereq: 421 and enrollment in 423. Introduction to probability and random processes. Performance of analog systems with noise. Performance of digital communication with noise, optimum receivers, transmission impairments, and error rates; Introduc- tion to information theory and coding; source coding, channel coding, channel capacity. Nonmajor graduate credit.

E E 435. Analog VLSI Circuit Design. (Cross-listed with Cpr E). (3-3) Cr. 4. F. Prereq: 324, 330, 332, and either E E 322 or Stat 330. Basic analog integrated circuit and system design including design and exploration, performance enhancement strategies,

E 439. Nanoelectronics. (3-3) Cr. 3. Prereq. E E 332/Mat E 332 or Mat E 331. Concepts of quantum mechanics relevant to nanoelectronic devices, including quantization, tunneling, and transport; overview of some of the leading technologies for nanoelectronics, including carbon nanotubes, quantum dots, and molecular transistors; fabrication methods for building nanoelectronic devices. Nonmajor graduate credit.

E 442. Introduction to Circuits and Instruments. (3-2) Cr. 2. F. Prereq: Phys 222, Math 267. Half-semester course. Basic circuit analysis using network theorems with time domain and Laplace transform techniques for resistive, resistive-inductive, resistive-capacitive, and resistive-inductive-capacitive circuits. Transient circuit behavior. Basic operational amplifiers-ideal amplifier model and common E E instrument demonstration and basic principles. Credit for only 201 or 442 may be counted toward graduation; credit for 442 will not count toward graduation for E E or Cpr E majors. Nonmajor graduate credit.

E 448. Introduction to AC Circuits and Motors. (3-2) Cr. 2. F. Prereq. 303 or 441 or 442. Half-semester course. Magnetic circuits. Power transformers. AC steady state and three-phase circuit analysis. Basic principles of operation and control of induction and single-phase motors. Nonmajor graduate credit.

E 452. Electrical Machines and Power Electronic Drives. (2-3) Cr. 3. Prereq. 303, 330 or 332; credit or registration in E E 324. Basic concepts of electromagnetic energy conversion. DC motors and three-phase induction motors. Basic introduction to power electronics. Adjustable speed drives used for control of DC motors. Experiments with converter topologies, DC motors, and adjustable speed drives. Nonmajor graduate credit.

E 455. Introduction to Energy Distribution Systems. (3-3) Cr. 3. F. Prereq. 303, credit or registration in 324. Overhead and underground distribution systems, fundamentals of system characteristics, load descriptions and characteristics, overhead line and underground cable models, distribution transformers, power flow and fault analysis, overcurrent protection, power factor correction, system planning and automation, and economics in a deregulated environment. Nonmajor graduate credit.

E 456. Power System Analysis I. (3-3) Cr. 3. F. Prereq. 303, credit or registration in 324. Power transmission lines and transformers, synchronous machine modeling, network analysis, power system representation, load flow. Nonmajor graduate credit.

E 457. Power System Analysis II. (3-3) Cr. 3. S. Prereq. 303, credit or registration in 324. Power system protection, symmetrical components, faults, stability. Power system operations including the new utility environment. Nonmajor graduate credit.

E 463. Design of Electrical Systems. (1-10) Cr. 5. SS. Prereq. 322 and completion of 24 credits in the E E core professional program, Engl 314. Distance-education students only. Team project design experience. Emphasis on defining, planning, and implementing to achieve project objectives to meet a client’s need with due consideration to professional and technical considerations of engineering design and implementation. Oral and written presentations of project achievements.

E 465. Digital VLSI Design. (Cross-listed with Cpr E) (3-3) Cr. 4. S. Prereq. E E 330. Digital design of integrated circuits employing very large scale integration (VLSI) design techniques. Understanding of design. High level hardware design languages. CMOS logic design styles; area-energy-delay design space characterization, datapath blocks: arithmetic and memory, architecture design. Engineering considerations on a chip (SoC) considerations. VLSI chip hardware design project. Nonmajor graduate credit.

E 466. Multidisciplinary Engineering Design. (Cross-listed with A A E, E E, Cpr E, Engr I, E M, Mat E, E T) (1-4) Cr. 3. Repeatable. F. Prereq. Student must be within two semesters of graduation and receive permission of instructor. Application of team design concepts to projects of a multidisciplinary nature. Concurrent treatment of design, manufacturing, and life cycle considerations. Application of design tools such as CAD, CAM, and FEM. Design methodologies, project scheduling, cost estimating, quality control, manufacturing processes. Development of a prototype and appropriate documentation in the form of written reports, oral presentations and computer models and engineering drawings.

E 490. Independent Study. Cr. arr. Prereq. Senior classification in engineering as a requirement. Investigation of an approved topic commensurate with the student’s prerequisites. H. Honors

E 491. Senior Design Project I and Professional. (Cross-listed with Cpr E). (2-3) Cr. 3. F. S. Prereq. 322 or Cpr E 388, completion of 24 credits in the E E core professional program. Presentation in the Cpr E core professional program, Engl 314. Preparing for entry to the workplace. Selected professional topics. Use of technical writing skills in developing project plan and report; design review presentation. First of two-semester team-oriented, project design and implementation experience.

E 492. Senior Design Project II. (Cross-listed with Cpr E) (1-3) Cr. 2. S. Prereq. 491 or Cpr E 491. Second semester of a team design project experience. Emphasis on the successful implementation and demonstration of the project completed in E E 491 or Cpr E 491 and the evaluation of project results. Technical writing of final project report; oral presentation of project achievements; project poster.

E 494. Portfolio Assessment. (Cross-listed with Cpr E) Pr. Cr. R. Prereq. Credit or enrollment in 491. Portfolio update and evaluation. Portfolios as a tool to enhance career opportunities.

E 498. Cooperative Education. Cr. R. Repeatable. F.S.S. Prereq. 398; permission of department and Engineering Career Services. Third and subsequent professional work periods in the cooperative education programs. Students must register for this course before commencing work.

Courses primarily for graduate students, open to qualified undergraduate students

E 505. CMOS and BiCMOS Data Conversion Circuits. (Cross-listed with Cpr E) (3-3) Cr. 3. Alt. S., offered 2010. Prereq. 501. Theory, design and applications of data conversion circuits (A/D and D/A converters) including: architectures, characterization, quantization effects, conversion algorithms, spectral performance, element matching, design for yield, and practical comparators, implementation issues.

E 507. VLSI Communication Circuits. (Cross-listed with Cpr E) (3-3) Cr. 3. Alt. S., offered 2011. Prereq. 330 or 601. Phased-array antennas, frequency synthesizers, clock and data recovery circuits, theory and implementation of adaptive filters, low-noise amplifiers, mixers, power amplifiers, transmitter and receiver architectures.

E 514. Microwave Engineering. (Dual-listed with 414). (3-3) Cr. 4. F. Prereq. 230, 311. Principles, analysis, and instrumentation used in the microwave portion of the electromagnetic spectrum. Wave theory in relation to circuit parameters. S parameters, couplers, discontinuities, and microwave device equivalent circuits. RF amplifier design, microwave sources, optimum noise figure and maximum power designs. Microwave filters and oscillators.
and reconstruction algorithms using them) and Magnetic Resonance Imaging (MRI). Basic introduction to image and video compression methods.

E E 530. Selected Topics in Electronics, Microelectronics and Photonics. (3-0) Cr. 3. Repeatable. Prereq: 322.

E E 532. Microelectronics Fabrication Techniques. (Dual-listed with 432), (2-4) Cr. 4. Prereq: Phys 222, Math 267. E 332 or Mat E 331 recommended. Techniques used in integrated circuit fabrication, including diffusion, oxidation, ion implantation, lithography, evaporation, sputtering, chemical-vapor deposition, and etching. Process integration. Process evaluation and final device testing. Extensive laboratory exercises utilizing fabrication methods to build electronic devices. Use of computer simulation tools for predicting processing outcomes. Recent advances in processing CMOS ICs and micro-electro-mechanical systems (MEMS).

E E 535. Physics of Semiconductors. (Cross-listed with Phys) (3-0) Cr. 4. Prereq: 311 and 332. Basic elements of quantum theory. Fermi statistics, motion of electrons in periodic structures, crystal structure, energy bands, equilibrium carrier concentration and doping, excess carrier motion, carrier transport at low and high fields, phonons, optical properties, amorphous semiconductors, heterostructures, and surface effects. Laboratory experiments on optical properties, carrier lifetimes, mobility, defect density, doping density.

E E 523. Random Processes for Communications and Signal Processing. (3-0) Cr. 3. F. Prereq: 322, Math 317 Axioms of probability, Revised trials; Functions of a random variable, discrete random variables: covariance matrix, conditional distribution, joint distribution, moments, and joint moment generating function; Mean Square estimation, stochastic convergence. Stochastic processes: Random walk, Poisson, Wiener, and shot noise; Markov chains; Power spectral analysis; Selected applications.

E E 528. Digital Image Processing. (3-0) Cr. 3. S. Prereq: 322, 424. Review of sampling, linear algebra and probability. Classical image processing topics such as image sampling and quantization, image transforms (2D Fourier, KLT, DCT, etc), image enhancement, restoration and filtering. Image analysis topics including edge detection, segmentation, registration and tracking (uses least squares estimation, EM, Kalman filter). Medical image reconstruction from tomographic projections (Radon transform, Fourier slice theorem.
Engineering

Most of the courses with the designator of Engr are broad-based engineering courses applicable to all engineering disciplines. Several of these courses are part of the basic program which is required for engineering students. All courses are administered by the college and with the exception of Engr 160 and Engr 170 are coordinated through Engineering Student Services in Engineering Academic and Student Affairs. Course-related questions should be directed to the department or unit with responsibility for that course. The following is a list of those responsibilities:

Engr 160 Materials Science and Engineering
Engr 170 Agricultural and Biosystems Engineering

Courses primarily for undergraduate students

Engr 104. LEAD Program Orientation. (1-8) Cr. 1. F. Orientation for LEAD Living/Learning Community participants. Applications of problem solving, engineering design, teamwork, study, and time management techniques and skills. Engineering professional development. Satisfactory-fail only.

Engr 105. LEAD Program Seminar. (1-8) Cr. 1. S. Seminar for LEAD Program participants in the residential learning community. Industrial tours and orientation to engineering profession. Satisfactory-fail only.

Engr 131. Learning Community Seminar. (1-1) Cr. R. FS. Peer-mentored review of course topics in engineering undeclared learning communities. Available to students interested in engineering if in Liberal Arts and Science Open (option) major. Satisfactory-fail only.

Engr 150. Foundations of Leadership Development and Learning. (1-8) Cr. 1. F. Engr 150 is a course for LEAD students only. Leadership development with focus on global context and awareness of events shaping the context. Exposure to theory of leadership with examples. Necessary characteristics of a leader, and strategies for leadership skills development. Exposure to non-traditional career paths for engineers. Outline of personalized leadership development. Satisfactory-fail only.

Engr 160. Engineering Problems with Computer Applications Laboratory. (2-3) Cr. 3. FS.SS. Engr 160 is a course for LEAD students only. Leadership development with focus on global context and awareness of events shaping the context. Exposure to theory of leadership with examples. Necessary characteristics of a leader, and strategies for leadership skills development. Exposure to non-traditional career paths for engineers. Outline of personalized leadership development. Satisfactory-fail only.

Engr 466. Multidisciplinary Engineering Design. (Cross-listed with A E, A E, C P E, E E, E E I, E M, E E, Mat E, I-1) Cr. 3. Repeatable. FS. Engr 466 is a course for LEAD students only. Leadership development with focus on global context and awareness of events shaping the context. Exposure to theory of leadership with examples. Necessary characteristics of a leader, and strategies for leadership skills development. Exposure to non-traditional career paths for engineers. Outline of personalized leadership development. Satisfactory-fail only.

Professors (Adjunct): Hsu, Nakagawa

Associate Professors: Bastawros, Bryden, Dayal, Hilliard, Hindman, Mitra, Sherman, Sturges

Assistant Professors (Collaborator): Flattau

Assistant Professors: Chung, Holland, Hong, Hu, Jacobson

Senior Lecturers: Deam, Haugi, Schafer

Lecturer: Boylan
Graduate Study

The department offers work for the degree master of science, master of engineering, and doctor of philosophy with major in engineering mechanics, and minor work to students taking major work in other departments.

The master of science degree requires a thesis and a minimum of 8 research credits. It has strong research emphasis and is recommended for students who anticipate entering a doctoral program later. At least 30 credits of acceptable graduate work are required for the degree.

The master of engineering degree does not require either research credits or a thesis. However, at least two credits of acceptable creative component and at least 26 credits of acceptable graduate coursework are required. A minimum of 30 credits of acceptable graduate work is required for the degree. The program is intended to give students additional instruction at the graduate level to better qualify them for advanced professional engineering work. By careful selection of electives and perhaps additional courses during the senior undergraduate year, students should be able to qualify for the master of engineering degree with an additional year of full-time study after receiving their baccalaureate degree in one of the several engineering curricula.

Credits for creative component will be obtained by registering for E M 599. A written report and an oral presentation will be given to the student's committee after receiving their baccalaureate degree in one of the several engineering curricula.

The normal prerequisite to major graduate work is the completion of a curriculum substantially equivalent to the required of undergraduate students in engineering at this university. However, because of the diversity of interests in graduate work in engineering mechanics, it is possible for a student to qualify for graduate study even though undergraduate or prior graduate training has been in a discipline other than engineering—e.g., physics or mathematics.

Courses primarily for undergraduate students

E M 274. Statics of Engineering. (3-0) Cr. 3. F.S.SS. Prereq: E M 166; credit or enrollment in Phys 111 or 221. Vector and scalar treatment of coplanar and noncoplanar force systems. Resultants, equilibrium, friction, centroids, second moments of areas, principal second moments of area, radius of gyration. External forces, shear and bending moment diagrams.

E M 327. Mechanics of Materials Laboratory. (0-2) Cr. 1. F.S.SS. Prereq: Credit or enrollment in 274. Experimental determination of mechanical properties of selected engineering materials. Experimental verification of assumptions made in 274. Use of strain measurement techniques. Preparation of reports. Students who are not present for the first laboratory meeting of their own sections may qualify for continuation in the course only by attending the first laboratory meeting of some other section of the course. Nonmajor graduate credit.

E M 345. Dynamics. (3-0) Cr. 3. F.S.SS. Prereq: 274, credit or enrollment in Math 266 or 267. Particle and rigid body kinematics, Newton's laws of motion, kinetics of plane motion, rigid body problems using work-energy, linear, and angular impulse-momentum principles, vibrations. Nonmajor graduate credit.

E M 362L. Nondestructive Testing Laboratory. (Cross-listed with Mat E) (3-0) Cr. 3. S. Prereq: Phys 112 or 222. Radiography, ultrasonic testing, magnetic particle inspection, eddy current testing, dye penetrant inspection, and other techniques. Physical bases of tests; materials to which applicable, types of defects detectable; calibration standards, and reliability safety precautions. Nonmajor graduate credit.

E M 362L. Nondestructive Testing Laboratory. (Cross-listed with Mat E) (3-0) Cr. 3. S. Prereq: Credit or enrollment in 362L. Application of nondestructive testing techniques to the detection and sizing of flaws in materials and determination of material's microstructure. Included are experiments in hardness, dye penetrant, magnetic particle, x-ray, ultrasonic and eddy current testing. Field trips to industrial laboratories. Nonmajor graduate credit.

E M 425. Introduction to the Finite Element Method. (3-0) Cr. 3. S. Prereq: 324, Math 266 or 267. Introduction of finite element analysis through applications to one-dimensional, steady-state problems such as elastic deformation, heat and fluid flow, consolidation, beam bending, and mass transport. Transient heat conduction and wave problems. Isoparametric triangular and quadrilateral elements. Plane problems of torsion, thermal and potential flow, stress analysis. Simple computer programs for one and two-dimensional problems. Nonmajor graduate credit.

E M 450. Engineering Vibrations. (Cross-listed with M E) (3-0) Cr. 3. Elementary vibration analysis, single and multiple degrees of freedom, energy methods, free and forced vibrations, viscous and other forms of damping transform methods and response to periodic and random force inputs, numerical methods of solution, eigenvalues and modal analysis, energy methods, vibration isolation and suppression, string or cable dynamics, beam bending dynamics, application problems in aerospace and mechanical engineering (as relevant). Nonmajor graduate credit.

of two- and three-dimensional computer programs. Dynamic and vibrational problems, eigenvalues, and time integration. Introduction to geometric and mate-
rial nonlinearities.

E M 526. Boundary Element Methods in Engi-
neering. (3-0) Cr. 3. Alt. F, offered 2010. Prereq: 514 or 516. Introductory boundary element methods through plane and polar integral, Cauchy principal values, integral representations and bound-
ary integrals in one dimension. Direct and indirect formulations. Plane potential and elastostatic prob-
lems. Higher order elements, numerical integration. Regularizations. Body forces and infinite regions. Specialized fundamental solutions, half-plane and axi-
symmetric problems. Diffusion and wave problems. Coupling with finite elements.

acteristics of random vibrations; random processes, probability distributions, spectral density and its significance, the normal or Gaussian random process. Transmission of random vibration, response of simple single and two-degree-of-freedom systems to Station-
ary random excitation. Fatigue failure due to random excitation.

E M 548. Advanced Engineering Dynamics. (3-0) Cr. 3. Alt. S, offered 2010. Prereq: 345, Math 266 or 267. 3-D kinematics and dynamics of particles and rigid bodies. Coordinate systems, calculus of varia-
tions. Lagrange's equations with constraints, modified Euler's equations, torque-free motion of rigid bodies in 3-D, moment equations with constraints.

E M 550. Fundamentals of Nondestructive Evalua-
tion. (Cross-listed with M S E). (3-2) Cr. 4. S. Prereq: 324, Math 385. Principles of five basic NDE methods and their application in engineering inspections. Materials behavior and simple failure analysis. NDE reliability, and damage-tolerant design. Advanced methods such as acoustic microscopy, laser ultrasonics, thermal waves, computed tomography, and thermoelectric devices are analyzed. Laboratory experiments on all basic methods: ultrasonics, eddy currents, x-ray, liquid penetrants, magnetic testing, and visual inspec-
tion are performed.

duction to selected numerical methods in acoustics.

E M 564. Fracture and Fatigue. (Cross-listed with M S E, M E). (3-0) Cr. 3. F. Prereq: 324 and either Met E 216 or 272 or 392. Undergraduates: Permission of instructor. Materials and mechanics approach to fracture and fatigue. Fracture mechanics, brittle and ductile fracture, fracture and fatigue characteristics, fracture of thin films and layered structures. Fracture and fatigue tests, mechanics and materials designed to avoid fracture or fatigue.

E M 570. Wind Engineering. (Cross-listed with A E). (3-0) Cr. 3. F. Prereq: 378, 345. Atmospheric circu-
atoms, atmospheric boundary layer wind, bluff-body aerodynamics, aerodynamic phenomena, wind-tunnel and full-scale testing, wind-load code and standards, effect of tornado and thunderstorm winds, design applications.

E M 599. Creative Component. Cr. arr. Repeatable. Courses for graduate students

E M 697. Engineering Internship. Cr. R. Repeatable. Prereq: Permission of DOGE (Director of Graduate Education), graduate classification. One semester and one summer maximum per academic year profes-

tional work period. Satisfactory-fail only.

Engineering Studies

www.eng.iastate.edu/esm/

(Interdepartmental minor)

The College of Engineering offers an undergradu-
ate minor in engineering studies for non-engine-
ing students designed to improve their understanding of engineering. This minor is not intened to train non-engineering students to do the work of practicing, degree-holding engineers. Rather, students who complete the minor in engineering studies will be able to work more effectively in their primary field by better appreci-
ating the nature, capabilities, and limitations of engineering.

The minor in engineering studies is structured so that no student will be excluded due to insuffi-
cient preparation in mathematics or the sciences. The required courses in the minor and many of the elective courses are specifically designed to offer a range of prerequisites, so that students from all curricula will find coursework that sup-
ports an accessible and intellectually stimulating program of study.

With the exception of E St 260, 265, and 270, courses offered for the minor in engineering stud-
ies are also open to students whose major cur-
iculum is in the College of Engineering. However, the minor in engineering studies will be awarded only to students whose degree program is not in engineering.

To receive a minor in engineering studies, stu-
dents must complete a total of 21 course credits that satisfy the following:

• E St 260, 265, and 270 (3 credits each) are

required for all students in the minor in engineer-
ing studies.

• Twelve additional credits from an approved list of eligible courses. Some of these approved cour-
es are taught by the College of Engineering; additional courses are taught by other colleges. A minimum of six of those 12 credits must be courses that bear the designation “E St” or are courses offered by engineering departments. Eligible courses will include those 200-level and above courses offered by the departments in the College of Engineering that are expressly design-
ated by that department’s curriculum commit-
te for use in the minor in engineering studies.

• A minimum of 6 credits in the minor must be

300-level or above (university requirement)

Courses primarily for undergraduate students

E St 260. Engineering: Getting from Thought to Thing. (2-2) Cr. 3. Prereq: Students enrolled in minor in Engineering Studies only. What is engineering, technology and their roles in Society? Investigation of engineering methods through case studies of everyday products. Explore questions about the impact of technology in Society. Apply engineering methods to design and failure analysis.

E St 265. Survey of the Impacts of Engineering Ac-
tivity. (3-0) Cr. 3. Prereq: Students enrolled in minor in Engineering Studies only. Survey of the economic, environmental, societal, and political benefits and problems resulting from engineering activity. Effects of engineering projects on human health, social structures, and the environment. Examination of im-
provements in economic opportunities and quality of life resulting from engineering activity. Case studies of the effects of engineering activity.

E St 270. Survey of How Things Work. (2-2) Cr. 3. Prereq: Students enrolled in minor in Engineering Studies only. Overview of the similarities and differ-
ences of the major engineering disciplines; methods used to manufacture products, build structures, and design systems. Laboratory exercises in measuring properties of basic engineering materials, welding, casting, and machining; case studies in product develop-
ment; student design exercises.

E St 490. Independent Study. Cr. arr. F. Prereq: Permission of instructor.

Assistant Professors: Pendar, Percy, Sauer, Shenk, Swils, Wieand, Wilson, D. Zimmerman

Assistant Professors (Emeritus): Kaufmann, McCully, J. Valler

Assistant Professor (Adjunct): Vrchocha

Instructors (Adjunct): Barratt, Mahoney, Myers, Noland, Schmidt

Senior Lecturers: Aune, Benner, Clarke, Demaray, Dewalt, Gilchrist, Leis, Liebich, Lowery, McGough, Messenger, Ringle, Schabel, Tremmel, Vandervalk

2009-2011
English

Undergraduate Study
The department offers a wide variety of courses for students seeking a degree in English or Technical Communication, as well as for students wishing to broaden their general education. Offerings include classes in introductory college writing, literature, film, creative writing, rhetoric and professional communication, technical communication, English education, linguistics, and teaching English as a second language/applied linguistics. The discipline of English helps to develop students’ understanding of how language functions in literature, mass media, and both personal and professional writing. Students not pursuing an English or Technical Communication major may select English courses to fulfill electives, to pursue a minor, or to complement their training in other majors.

Graduates majoring in English will possess a broad-based knowledge and understanding of the discipline. They will also understand their particular disciplinary specialization whether it be literary studies, rhetorical studies, teacher education, creative writing, or teaching English as a second language/applied linguistics. Graduates in Technical Communication will learn how to communicate scientific and technical information through coursework both in English and in scientific and technical fields. Graduates in either major will be able to write well-organized, well-reasoned essays and demonstrate advanced skills in reading and writing, speaking and argumentation, and research and critical thinking. They will also understand their particular disciplinary specialization whether it be literary, rhetorical, scientific, or design field. Specifically, they will demonstrate scientific and technical communication to a specific discipline. Majors develop advanced skills in multiple aspects of technical communication and apply their knowledge of technical communication to a specific discipline.

Introductory writing courses in the department are designed to improve the skills in communication and reading comprehension necessary for successful university work.

Through the Intensive English and Orientation Program, the department offers special courses in English for both undergraduate and graduate students who are native speakers of other languages. (See catalog entries under English Courses for Native Speakers of Other Languages and English Requirement for International Students.)

Careers for English Majors
Students who graduate with a major in English often enter fields that require special communication skills, such as publishing, public service, research, business and technical writing, or human resources. An undergraduate major in English can be a solid basis for the professional study of law, medicine, theology, or business management. Students in English Education can qualify to teach English in middle or high school. (See Index, Teacher Education.) English majors may also pursue graduate studies in a number of communication-related fields.

Careers for Technical Communication Majors
Students who graduate with a major in Technical Communication will be prepared for careers in scientific and technical writing and editing. They will typically seek positions in companies or nonprofit organizations; in communication-based units of local, state, and federal government; in the documentation units of software developers or publishers; or in such areas as web design and communication consulting. Technical Communication majors may also pursue graduate study in rhetoric and professional communication or other communication-related fields.

English Major Requirements
English majors choose one of three programs of study: Literary Studies, Rhetorical Studies, or English Education. Students interested in creative writing typically choose Literary Studies as a program of study. English majors are required to have, in addition to ISUComm foundation courses, at least 24 credits in English; those in English Education must have 48 credits in English in addition to required teaching-related courses taken in other departments. English majors transferring from other institutions must take at least 18 of their credits in English while in residence at Iowa State.

To graduate with a major in the English Department, a student must earn at least a C (not a C-) in English 150 and 250 as well as in each of the courses taken to fulfill the program of study. Earn- ing at least a C in ISUComm foundation courses and in one advanced communication course also meets the departmental Communication Proficiency requirement.

Finally, all English majors must take at least one pre-1800 literature course and one pre-1900 literature course.

Distributed Requirements
All English majors, no matter what their program of study, must take nine courses for a total of 27 credits from a list of distributed requirements:

- Engl 199: Introduction to the Study of English
- Engl 207, 302-309, 313-316 Advanced Comm
- Engl 220: Descriptive English Grammar
- Engl 225-228: Literature Survey
- Engl 240-249: Rhetorical Studies Elective
- Engl 260: Introduction to Literature
- Engl 300 or above—English Elective
- Engl 340-349, 352, 369: Women’s or Multicultural Literature
- Engl 497: Capstone Assessment

These distributed requirements may not overlap with any advanced study requirements.

Advanced Study Requirements
Each program of study has its own requirements for advanced work:

Literary Studies
Engl 200- or 300-Level—Literary History
- Engl 350: Rhetorical Theories and Issues in Context
- Engl/Sp Cm 300+: Rhetorical Studies Elective
- Engl 418: Seminar in Argumentation
- Engl/Sp Cm 400+: Rhetorical Studies Elective

Rhetorical Studies
Rhetorical Studies Elective

- Engl 350: Rhetorical Theories and Issues in Context
- Engl 418: Seminar in Argumentation

English Education
Engl 219 Intro to Linguistics
- Engl 225-228 Literature Surveys, whichever course not taken for Distributed Requirement
- Engl 353 World Literature: Ancient to Renaissance
- Engl 354 World Literature: Seventeenth Century to the Present
- Engl 396 Teaching the Reading of Young Adult Literature
- Engl 397 Practice & Theory of Teaching Writing in the Secondary Schools
- Engl 420 History of the English Language
- Engl 494Prac & Theory of Teaching Literature in the Secondary School

There are a number of other course requirements outside of English for English Education majors. These requirements may overlap with General Education requirements for the college:

C I 202 Introduction to Instructional Technology for Grades 7-12
C I 204 Social Foundations of American Education
C I 280A Pre-Student-Teaching Experience
C I 395 Teaching Reading in Middle and Secondary Schools
C I 406 Multicultural Gender Fair Education
C I 426 Principles of Secondary Education
Engl 417E Student Teaching
Cl St 353 World Literature
Psych 230 Developmental Psychology
Psych 333 Educational Psychology
Hist or Pol S. American History or Government
Sp Cm 212 or Thtr 358

Technical Communication Major Requirements
Technical Communication majors must take 39 credits within the major as well as 12 credits in a Designated Area of Concentration (DAC) in a technical, scientific, or design field. Majors develop advanced skills in multiple aspects of technical communication and apply their knowledge of technical communication to a specific discipline.

Core Requirements
Engl 310 Rhetorical Analysis
Engl 350 Rhetoric and Issues in Context
Engl 411 Technology, Rhetoric and Professional Communication
Engl 314 Technical Communication
Engl 415 Business and Technical Editing
Engl 416 Visual Aspects of Business and Technical Communication
Engl 477 Seminar in Technical Communication

Complementary courses
Engl 220 Descriptive English Grammar
200- or 300-level literature course
Communication Elective
Engl 487 Internship

Designated Area of Concentration in a Technical, Scientific, or Design Field

The DAC is a student-designed grouping of related courses in a technical, scientific, or design field that will meet the student’s professional or academic interests. All courses for the 12-credit DAC must be taken outside the English Department and approved by the Technical Communication Program Coordinator. A second major or a minor in areas such as computer science, social science, natural science, entrepreneurial studies, design studies, engineering studies, or another technical, scientific, or design field may substitute for the DAC.

Learning Goals
Graduates of the bachelor’s degree programs in the English Department will demonstrate knowledge of the nature, history, current practice and critical issues in their curricular fields. They will employ the terminology, skills, and techniques specific to the field. Specifically, they will demonstrate advanced skills in reading and writing, speaking and argumentation, and research and application of appropriate technology. They will demonstrate the ability to perform professionally as educators, communicators, writers and editors. They will also be able to analyze aspects of culture and society and will become critical thinkers, hav- ing an awareness of ethical and humane issues essential to professional careers and to the prac- tice of lifelong learning. (See department’s URL for learning goals for specific programs.)

Graduates of advanced degree programs in the department will have, in addition to these

2009-2011

Graduate Study

The master of arts degree programs offer various possibilities for the advanced study of writing, language, and literature. Prospective students must first secure admission to the graduate studies program through the English Department. Students can be admitted to the M.A. in English with a specialization in literature which is designed to prepare students for teaching at the secondary, two-year college, or beginning college and university levels; or for further graduate study in language and literature. Students can be admitted to the M.A. in Rhetoric, Composition, and Professional Communication designed to prepare students for technical writing, business communication, editing, and associated professional writing. Students can be admitted to one of the optional specializations for the M.A. in TESL/ Applied Linguistics: Computer-Assisted Language Learning (CALL); Language Assessment; English for Specific Purposes (ESP); Literacy; and Literature in ESL. The master of arts degree requires 30 hours of graduate credits, including a thesis or project (5 credits), an English language requirement (literature specialization) and the M.A. in TESL/Applied Linguistics have language requirements that may be met through a number of options, including previous foreign language study, graduate linguistics courses, or satisfactory performance on a test-out exam. No student may substitute another language instead of English is considered to have met the language requirement after satisfying the Graduate College English requirement.

The master of fine arts program in Creative Writing and Environment is unique in its effort to cultivate in its students an interdisciplinary approach to research and writing, as well as develop a heightened environmental imagination that finds expression in quality, publishable works of fiction, nonfiction, and poetry. The program is designed to prepare students for careers as writers, teachers at the college and university level, and editors. Prospective students must first secure admission to the graduate studies program through the English Department. The master of fine arts degree requires 54 hours of graduate credit: a core of creative writing courses, a book-length thesis (6 credits), a fieldwork experiential component (3 credits), and 18 credits in disciplines other than English (such as Landscape Architecture, Anthropology, Environmental Science, among many others) relevant to an individual student’s research interests and thesis project.

The doctor of philosophy in Applied Linguistics and Technology focuses on English language teaching and assessment with particular emphasis on issues and practices related to technology use in these areas. It prepares students to hold a variety of academic appointments in departments of applied linguistics, and English, and professional opportunities in research and development foundations, international publishing enterprises, and government agencies in the U.S. and around the world where English as a second language is taught and used for specific educational, vocational, and professional purposes. Prospective students must first secure admission to the graduate studies program through the English Department. Candidates are required to complete 72 hours of graduate credit and a dissertation, and to pass a portfolio assessment, a preliminary examination consisting of a dissertation proposal and pilot study and a written response to questions about the proposal or pilot study, and an oral defense of the dissertation.

The doctor of philosophy in Rhetoric and Professional Communication focuses on the theory of rhetoric and the practice of written communication in professional communities such as business, industry, and government. The degree qualifies graduates for academic positions in rhetoric and in business and technical communication, as well as for work in the private sector as professional writing specialists, editors, and communicators. Production managers and humanitarian students must first secure admission to the graduate studies program through the English Department. Candidates are required to complete 72 hours of graduate credit and a dissertation, and to pass a portfolio assessment, a preliminary examination consisting of a comprehensive examination and a special field examination, and an oral defense of the dissertation.

The department offers graduate students an opportunity to gain professional experience through professional writing internships, selected departmental research activities, the Intensive English and Orientation Program (IEOP), the ISUComm foundation courses program, the advanced communication program, and the interpersonal and rhetorical communication program. Teaching and research assistantships are available for qualified students. Teaching assistants are responsible for teaching with faculty supervision, classes in ISUComm foundation courses, courses in public speaking, courses in English as a second language, and courses in business and technical communication. Research assistants are assigned to individual faculty members engaged in projects in writing, language, or literature. One or more Pearl Hogrefe Fellowships in Creative Writing covering stipend and tuition are awarded each year to outstanding graduate students. Grannis Scholarships are awarded to new students in the Applied Linguistics and Technology doctoral program. Several Freda Huncke Endowment Graduate Teaching Fellowships are available to first-year Rhetoric and Professional Communication doctoral students. Miller Fellowships are also available to highly qualified students.

With prior written approval from the College of Human Sciences, students may take English courses to meet part of the requirements for certification to teach English in two-year and community colleges. Selected courses may also be used to meet requirements for ESL endorsement (K-12) for teachers.

A graduate minor in the English Department at the M.A. level requires 9 credits of English at the 500 or 600 level in the respective major (English, RCPC, TESL/AL). A graduate minor in the English Department at the M.F.A. or Ph.D. level requires 12 credits at the 500 or 600 level in the respective major (CWE, ALT, RPC).

A graduate certificate in Teaching English as a Second Language is a 12 credit program that includes two prerequisites, one core requirement (Engl 516), and three graduate courses chosen from a list of accepted graduate courses.

Courses primarily for undergraduate students

L. Strategies for Listening. Available P/NP to graduate students at their department’s option.

R. Strategies for Reading. Available for P/NP to graduate students at their department’s option.
Engl 101. English for Native Speakers of Other Languages. (3-0) Cr. 3. F.S. Prereq: Recommendation of English Department; placement in various sections is determined by examination. (See English Requirement for International Students in Index.) For undergraduates. Completion of English 101 requirement prepares students for English 150. For graduates: Completion of English 101 satisfies the English requirement of the Graduate College. Engl 101 courses are limited to students who are nonnative speakers of English. Credit from Engl 101 does not count toward graduation.

B. Academic English I. Available P/NP to graduate students at their department’s option.

C. Academic English II—Graduates. Available P/NP to graduate students at their department’s option.

Engl 120. Computers and Language. (Cross-listed with Ling). (3-0) Cr. 3. Introduction to the use of linguistic knowledge in computer applications today and the basic computational techniques used in such applications. The development of these techniques throughout the history of computational linguistics. How the study of language has contributed to the advancement of technology and how certain computational problems have influenced the way linguists study language.

Engl 180. Communication Skills for International Teaching Assistants. Cr. arr. Repeatable. F.S. Placement based upon SPEAK/TEACH test results. Persons whose native language is English cannot take 180 for credit. No more than one section of 180 may be taken per semester; up to two sections total. Credit for Engl 180 does not apply toward graduation. Satisfactory-fail only.

A. Speaking Skills. Cr. 3. Emphasis on pronunciation improvement and greater fluency in spoken English for teaching purposes.

B. Intermediate Spoken English. Cr. 3.

C. Advanced Spoken English. Cr. 3. For students who have completed 180A or 180B but have not reached the passing level on the SPEAK/TEACH test.

D. Presentation Skills. Cr. 3. Developing explanations, leading discussions and handling questions in a teaching environment.

E. Supervised Independent Study. Cr. 1. Seminar with individual observation and consultation.

Engl 199. Introduction to the Study of English. (1-0) Cr. F.S. 8 weeks. General introduction to the discipline; discussion of the various fields in English; consideration of career opportunities. Satisfactory-fail only.

Engl 201. Introduction to Literature. (3-0) Cr. 3. F.S. Prereq: Credit in or exemption from 150. Study of selected examples of drama, poetry, short fiction, and the novel drawn from both British and American literature. Recommended for nonmajors.

Engl 205. Popular Culture Analysis. (Cross-listed with Sp Cm). (3-0) Cr. 3. F.S. Prereq: Credit in or exemption from 150. Analysis of how information and entertainment media adapt and manipulate audiences. Study of several forms that may include newspapers, speeches, television, film, advertising, fiction, and magazines. Special attention to verbal and visual devices.

Engl 207. Introduction to Creative Writing. (3-0) Cr. 3. F.S. Prereq: Credit in or exemption from 150. Course introduces students to the fundamentals of writing fiction, poetry, and creative nonfiction. Extensive readings in all three genres. Students learn creative processes through writing exercises, workshops, and conferences.

Engl 219. Introduction to Linguistics. (Cross-listed with Ling). (3-0) Cr. 3. F.S. Prereq: Sophomore classification. Introduction to linguistic concepts and principles of linguistic analysis with English as the primary source of data. Sound and writing systems, sentence structure, vocabulary, and meaning. Issues in the study of usage, regional and social dialects, language acquisition, and language change.

Engl 220. Descriptive English Grammar. (Cross-listed with Ling). (3-0) Cr. 3. F.S. Prereq: 250. Overview of grammatical structures and functions. Parts of speech; phrase, clause, and sentence structure; sentence types and sentence analysis; rhetorical grammar and sentence style; terminology. Not a remedial, English composition, or ESL course.

Engl 225. Survey of British Literature to 1800. (3-0) Cr. 3. Prereq: 250. Representative works of British literature from the origins to 1800 in historical, cultural, and literary contexts. Will include multiple genres.

Engl 226. Survey of British Literature since 1800. (3-0) Cr. 3. Prereq: 250. Representative works from 1800 to the present in historical, cultural, and literary contexts. Will include multiple genres and may include texts that reflect and/or critique the impact and legacy of the British empire on its former colonies, i.e., postcolonial literature.

Engl 227. Survey of American Literature to 1865. (3-0) Cr. 3. Prereq. 250. Representative works of American literature from its origins (including indigenous and conquest literatures) through the end of the Civil War in historical, cultural, and literary contexts. Will include multiple genres.

Engl 228. Survey of American Literature since 1865. (3-0) Cr. 3. Prereq. 250. Representative works written in the United States since the Civil War in historical, cultural, and literary contexts, with attention to the cultural and ethnic diversity of Americans. Will include multiple genres.

Engl 237. Survey of Film History. (3-0) Cr. 3. F. Prereq: Credit in or exemption from 150. A survey of the history of film, both U.S. and international, from the beginnings in the late nineteenth century to the present.

Engl 240. Introduction to American Indian Literature. (Cross-listed with Am In). (3-0) Cr. 3. F.S. Prereq: Credit in or exemption from Engl 150. Appreciation of oral and written forms of American Indian literatures. Tropes and techniques in oral, visual and written texts. Focus on the role of American Indians in interdisciplinary approaches to modern social and environmental issues as expressed in literary works.

Engl 250. Written, Oral, Visual, and Electronic Composition. (3-0) Cr. 3. F.S. Prereq: Credit in or exemption from 150 or exemption from 150. Sophomore classification or exemption from 150; credit for or concurrent enrollment in Lib 160. Analyzing, composing, and reflecting on written, oral, visual, and electronic (WOVE) discourse within academic, civic, and cultural contexts. Emphasis on supporting a claim and using primary and secondary sources. Continued development of student portfolio.

Engl 260H. Written, Oral, Visual, and Electronic Composition, Honors. (3-0) Cr. 3. F. Prereq: Exemption from 150 and admission to Freshman Honors Program. credit for or concurrent enrollment in Lib 160. In-depth analysis, composition, and reflection on written, oral, visual, and electronic (WOVE) discourse within academic, civic, and cultural contexts. Emphasis on argumentation: developing claims, generating reasons, providing evidence. Individual sections organized by special topics. Development of student portfolio.

Engl 260. Introduction to Literary Study. (3-0) Cr. 3. F.S. Prereq: Credit in or exemption from 150. Basic principles of literary study. Emphasis on writing of interpretive and critical essays. Particular attention to poetry. Designed for English majors.

Engl 302. Business Communication. (3-0) Cr. 3. F.S.SS. Prereq. 250, junior classification. Theory, principles and processes of effective written communication typically encountered in business and the professions. Extensive practice in many areas of workplace communication, including letter, memo, and email correspondence; short proposals and reports; policies and procedures; job packet including letters of application and resumes; website analysis; brochures; and individual and team presentations.

H. Honors.

Engl 303. Free-Lance Writing for Popular Magazines. (3-0) Cr. 3. S. Prereq: 250, not open to freshmen. Practical workshop in writing nonfiction articles for popular magazines. Emphasis on writing, market research, preparation of manuscripts, methods of submission. Major goal of the course is production of marketable material.

Engl 304. Creative Writing—Fiction. (Cross-listed with W S). (3-0) Cr. 3. F.S. Prereq: 250, not open to freshmen. Progresses from practice in basic techniques of fiction writing to fully developed short stories. Emphasis on writing, analytical reading, workshop criticism, and individual conferences.

Engl 305. Creative Writing—Nonfiction. (3-0) Cr. 3. F.S. Prereq: 250, not open to freshmen. Workshop in writing imaginative essays, both critical and personal. Analytical reading, development of literary techniques. Individual and small group conferences.

Engl 306. Creative Writing—Poetry. (3-0) Cr. 3. F.S. Prereq: 250, not open to freshmen. Progresses from practice in traditional to contemporary forms. Writing and reading of poetry. Emphasis on writing, analytical reading, workshop criticism, and individual conferences.

Engl 309. Report and Proposal Writing. (3-0) Cr. 3. F.S. Prereq: 250, junior classification. Introduction to the theory and practice of preparing and analyzing reports and proposals intended for businesses, governmental agencies, and/or private and corporate foundations. Individual assignments and group projects include text documents and oral presentations.

Engl 310. Rhetorical Analysis. (3-0) Cr. 3. F.S. Prereq: 250. Fundamental principles of rhetorical criticism. Focus on selected theories for analyzing cultural texts, including essays, speeches, film, technical and scientific documents, and websites. Emphasis on identifying artifacts, formulating research questions, applying methodologies, and understanding and practicing critical analysis through discussion and in writing.

Engl 312. Biological Communication. (3-0) Cr. 3. F.S. Prereq: 250. Emphasis on effective writing and communication methods in the biological sciences, presentation of research data, methods of bibliographic citation, ethical communication, use of oral and visual presentation methods for biological information, manuscript and report preparation. For students in the biological and related life sciences.

Engl 314. Technical Communication. (3-0) Cr. 3. F.S.SS. Prereq. 250, junior classification. Theories, principles, and processes of effective written communication typically encountered in business and the professions. Extensive practice in many areas of workplace communication, including letter, memo, and email correspondence; short proposals and reports; policies and procedures; job packet including letters of application and resumes; website analysis; brochures; and individual and team presentations. H. Honors.
Engl 315. Creative Writing—Screenplays. (3-0) Cr. 3. F. Prereq: 250, not open to freshmen. Stresses master technique of writing fully developed screenplays. Emphasis on movie techniques, writing, workshop criticism, analytical reading and viewing, and individual conferences. Nonmajor graduate credit.

Engl 316. Creative Writing—Playwriting. (Cross-listed with Theatre.) (3-0) Cr. 3. S. Prereq: Engl 260, not open to freshmen. Progresses from production of scenes to fully developed one-act plays. Emphasis on action, staging, writing, analytical reading, workshop criticism, and individual conferences. Nonmajor graduate credit.

Engl 330. Science Fiction. (3-0) Cr. 3. Prereq: 250. Study of science fiction from its origins in nineteenth-century to the present. May include study of specific types of science fiction, such as classic, cyberpunk, feminist, or apocalyptic narratives; and may include consideration of science fiction film and/or theory.

Engl 332. Visual Communication of Quantitative Information. (Cross-listed with Stat.) (3-0) Cr. 3. Alt. S. offered 2010. Prereq: Stat 101, 104 or 226, Engl 260. Communicating quantitative information using visual displays; visualizing data; interactive and dynamic data displays; evaluation of visual examples in the media; color, perception, and representation in graphs; interpreting data displays. Nonmajor graduate credit.

Engl 339. Literary Theory and Criticism. (3-0) Cr. 3. F.S. Prereq: 260 and 3 additional credits in literature. Study of selected texts of literary criticism, with attention to the purposes and practices of criticism.

Engl 344. U.S. Latino/a Literature. (3-0) Cr. 3. S. Prereq: 250. An introduction to the literature of Mexican Americans, Puerto Ricans, Cuban Americans and other Latino/a sub-groups. Special emphasis on themes such as ethnic relations and comparisons with Euro-American forms and traditions.

Engl 345. Women and Literature: Selected Topics. (Cross-listed with W S). (3-0) Cr. 3. S. Prereq: 250. Literature by women and/or dealing with the images of women, e.g., study of individual authors or related schools of authors; exploration of specific themes or genres in a woman's literature; analysis of recurring images of women in literature. Nonmajor graduate credit.

Engl 346. American Indian Literature. (Cross-listed with Am In). (3-0) Cr. 3. S. Prereq: 250. Survey of literature by Native Americans from pre-Columbian tales and songs to contemporary novels and poetry. Nonmajor graduate credit.

Engl 347. African American Literature to 1865. (Cross-listed with Af Am). (3-0) Cr. 3. Prereq: 250. Intensive study of African American writing, possibly including slave narratives, Harlem Renaissance works, literature of social protest, and forerunners of contemporary works that reveal key thematic, stylistic, and historical range of the literature. Nonmajor graduate credit.

Engl 349. Topics in Multicultural Literatures of the United States. (3-0) Cr. 3. Repeatable. Prereq: 250. Literature by writers from U.S. multicultural groups. May include literature of several groups or focus upon one of the following: Asian Americans, African Americans, Latino/a Americans, American Indians. Nonmajor graduate credit.

Engl 350. Rhetorical Theories and Issues in Context. (Cross-listed with Cl St, Sp Cm). (3-0) Cr. 3. S. Prereq: 250. Ideas about the relationship between rhetoric and society in contemporary and historical contexts. An exploration of classical and contemporary rhetorical theories in relation to selected topics that may include politics, gender, race, ethics, education, science, or technology.

Engl 351. Literature and Science. (3-0) Cr. 3. Prereq: 250. Study of texts that may include the following topics: the representation of science in literature; the use of literature by scientists and scientists; reading "scientific" texts as literature; the interactions between literary and scientific ideas. Nonmajor graduate credit.

Engl 352. Gay and Lesbian Literature. (Cross-listed with W S). (3-0) Cr. 3. Prereq: Engl 250. Literary portrayals of gay and lesbian lives and relationships from many different genres. Attention to changing definitions and representations of sexual orientation and gender identity over time. Nonmajor graduate credit.

Engl 353. World Literature: Western Foundations through Renaissance. (Cross-listed with Cl St). (3-0) Cr. 3. F. S. Prereq: 250. Representative works from the drama, epics, poetry, and prose of the Ancient World through the sixteenth century. May include Homer, Aeschyus, Sappho, Catullus, Dante, Marie de France, Boccaccio, Christine de Pizan, Cervantes, and others.

Engl 354. World Literature: Seventeenth Century to the Present. (3-0) Cr. 3. F. S. Prereq: 250. Global literatures in their various cultural and aesthetic contexts. Representative works, oral and written literature, including poetry, fiction, nonfiction, and drama.

Engl 355. Literature and the Environment. (Cross-listed with Env S). (3-0) Cr. 3. Prereq: 250. Study of literary texts that address the following topics, among others: the relationship between people and natural urban environments, and the impact of place in the literary imagination. Nonmajor graduate credit.

Engl 358. Myth and Fairy Tale. (3-0) Cr. 3. Prereq: 250. Study of traditional fairytales, myths, and legends from diverse cultures. Nonmajor graduate credit.

Engl 359. Literature and the Arts. (3-0) Cr. 3. Prereq: 250. Study of texts that may include the following topics: the relationship between literature and other art forms (including painting, sculpture, dance, music, photography, and film); the representation of the arts in literature; the influences of other art forms on literature; the interrelation of art theory and literary theory. Nonmajor graduate credit.

Engl 404. Creative Writing Workshop—Fiction. (3-0) Cr. 3. Repeatable. F. S. Prereq: 304. Individual projects in short fiction on a workshop and conference basis. Readings in short fiction. Discussion of elements of narrative such as plot, point of view, characterization, theme, setting.

Engl 405. Creative Writing Workshop—Nonfiction. (3-0) Cr. 3. Repeatable. F. S. Prereq: 305. Individual projects in memoir, immersion journalism, character studies, and/or the personal essay on a workshop and conference basis. Readings in creative nonfiction.

Engl 406. Creative Writing Workshop—Poetry. (3-0) Cr. 3. Repeatable. F. S. Prereq: 306. Individual projects in poetry on a workshop and conference basis. Readings in poetry. Discussion of poetic elements such as image, sound, internal structure, rhythm, tone, figurative language.
Engl 411. Technology, Rhetoric, and Professional Communication. (3-0) Cr. 3. Sr. Prereq: 310; 302, 309, 313, or 314; junior classification. Study of the implication of technologies, especially computer technology, for the writing and reading of business, technical, and academic texts. Focus on selected technology-related topics.

Engl 415. Business and Technical Editing. (3-0) Cr. 3. Sr. Prereq: 302, 309, or 314; junior classification. Editing journal articles, research reports, technical manuals, newsletters, and proposals. Attention to editorial levels and academic project management, editor-author relationships, and electronic editing. Nonmajor graduate credit.

Engl 417. Student Teaching. (Cross-listed with C I). Cr. arr. F. Sr. Prereq: 494; admission to teacher education, approval of coordinator the semester prior to student teaching. Full-time teaching in secondary English: long-term planning, lesson planning, classroom teaching practice in English language arts, English and Literature (Same as C I 417E.)

Engl 418. Seminar in Argumentation. (3-0) Cr. 3. S. Prereq: 310; junior classification. Advanced seminar in theory and analysis with extensive practice in various modes of argument. Nonmajor graduate credit.

Engl 420. History of the English Language. (Cross-listed with Ling). (3-0) Cr. 3. F. Sr. Prereq: 219, 220. Comparison of English to other languages by family background and by type. Analysis of representative Old, Middle, Early Modern and present-day English texts, including both literary works and non-literary documents. Nonmajor graduate credit.

Engl 422. Women, Men, and the English Language. (Cross-listed with Ling). (3-0) Cr. 3. S. Prereq: 219. The ways men and women differ in using language in varied settings and the ways in which language both creates and reflects gender divisions. Nonmajor graduate credit.

Engl 437. Grammatical Analysis. (Dual-listed with 537). (Cross-listed with Ling). (3-0) Cr. 3. F. Sr. Prereq: 220; junior classification. Theories and methods for analysis of English syntax with emphasis on recent syntactic theory.

Engl 440. Seminar in British Literature. (3-0) Cr. 3. Repeatable. Prereq: Completion of 9 credits of surveys; completion of or concurrent enrollment in 339; junior classification. Selected authors, movements, eras, or genres in British literature. Readings in criticism; required research paper. Nonmajor graduate credit.

Engl 441. Seminar in American Literature. (3-0) Cr. 3. Sr. Prereq: Completion of 9 credits of surveys; completion of or concurrent enrollment in 339; junior classification. Selected authors, movements, eras, or genres in American literature. Readings in criticism; required research paper. Nonmajor graduate credit.

Engl 445. Seminar: Literature Crossing Boundaries. (3-0) Cr. 3. Sr. Prereq: Completion of 9 credits of surveys; completion of or concurrent enrollment in 339; junior classification. Intensive study of selected literature that bridges traditional genre, period, national, or disciplinary boundaries. Readings in criticism; required research paper. Nonmajor graduate credit.

Engl 450. Seminar in Drama and Film. (3-0) Cr. 3. Repeatable. Prereq: Completion of 9 credits of surveys; completion of or concurrent enrollment in 339; junior classification. Selected playwrights, screenwriters, film directors, dramatic or cinematic movements, genres, or national traditions. Readings in criticism; required research paper. Nonmajor graduate credit. A. Drama B. Film C. Other

Engl 451. Seminar in Poetry. (3-0) Cr. 3. Repeatable. Prereq: Completion of 9 credits of surveys; completion of or concurrent enrollment in 339; junior classification. Selected authors, movements, eras, or national literatures. Readings in criticism; required research paper. Nonmajor graduate credit.

Engl 452. Seminar in Prose. (3-0) Cr. 3. Repeatable. Prereq: Completion of 9 credits of surveys; completion of or concurrent enrollment in 339; junior classification. Selected authors, movements, eras, or national literatures. May include the novel, the short story, the essay, or autobiography. Readings in criticism; required research paper. Nonmajor graduate credit.

Engl 460. Seminar in Gender and Ethnicity. (Cross-listed with W St). (3-0) Cr. 3. Repeatable. Prereq: Completion of 9 credits of surveys; completion of or concurrent enrollment in 339; junior classification. Selected readings of various authors, movements, eras, or genres. Readings in criticism; required research paper. Nonmajor graduate credit.

Engl 477. Seminar in Technical Communication. (3-0) Cr. 3. Repeatable. F. Sr. Prereq: 302, 309, or 314 and 6 additional credits in technical communication. Intensive study of a selected topic that bridges theory and practice in technical communication. Required project that contributes to the understanding of an emerging issue in the profession. Nonmajor graduate credit.

Engl 487. Internship in Business, Technical, and Professional Communication. (3-0) Sr. F. S. Prereq: 9 credits in 302, 309, 313, 314, 415 preferred, 416, or 477; second-year permission of coordinator. An opportunity to write, edit, and design business and technical documents in a professional setting. Projects include reports, proposals, manuals, brochures, newsletters.

Engl 488. Undergraduate Seminar. (Cross-listed with Ling). (3-0) Cr. 3. Sr. Prereq: F. Prereq: 9 credits in English beyond 250 may be repeated to the section taken, junior classification, permission of Undergraduate Studies Committee. Designed to meet the needs of students who wish study in areas other than those in which courses are offered, or who desire to integrate a study of literature or language with special problems in major fields. No more than 9 credits of Engl 490 may be used toward graduation.

A. Literature B. Linguistics, Semantics (Ling 490B) C. Rhetoric, Teaching of Composition D. Criticism and Theory of Literature E. Reading: Instructional Methods and Research F. Creative Writing G. Business/Technical Communication H. Honors

Engl 497. Capstone Assessment. Cr. F. Sr. Prereq: 199. Must be taken by all seniors in their last semester of classes.

Courses primarily for graduate students, open to qualified undergraduate students

Open on a priority basis to graduate students admitted to one of the degree programs in English; instructor permission required for other students.

Engl 500. Proseminar: Teaching English Composition. (3-0) Cr. 3. F. Required of all new English teaching assistants. Introduction to the teaching of ISUComm Foundation Courses. Foundational and relevant newer composition theory and pedagogical methods related to ISUComm Foundation Courses objectives and their classroom enactment, including development of assignments and supporting activities, and evaluation of student projects.

Engl 506. Theory and Research in Professional Communication. (3-0) Cr. 3. S. Prereq: 6 credits in English. Introduction to professional communication as a discipline, with emphasis on theories of communication and discourse that inform professional communication research and on trends and developments in that research and the field.

Engl 508. Advanced Workshop in Academic Writing. (3-0) Cr. 3. Repeatable. Alt. S., offered 2011. Prereq: 6 graduate credits. Hands-on practice in writing academic discourse for publication; rhetorical analyses of student-selected academic journals; discussion of current trends in academic writing; professional perspectives on the referee process and on journal editorial decision making. Focus on the writing of selected short pieces (opinion essays, standard reviews, conference-length papers) and of article-length manuscripts.

Engl 509. Writing Proposals and Grant Applications. (3-0) Cr. 3. F. Prereq: 6 credits in English composition. Introduction to the theory and practice of preparing and analyzing proposals and grant applications intended for business, governmental agencies, and/or private and corporate foundations. Individual assignments and group projects include text documents and oral presentations.

Engl 511. Introduction to Linguistic Analysis. (Cross-listed with Ling). (3-0) Cr. 3. F. Prereq: Graduate classification. Principles and methods of linguistic analysis with emphasis on phonology, morphology,
and syntax. Description of linguistic variation and current theoretical approaches to linguistics.

Engl 514. Sociolinguistics. (Cross-listed with Ling). (3-0) Cr. 3. S. Prereq: 511 or an introductory course in linguistics. Theories and methods of examining language in its social setting. Analysis of individual characteristics, age, social class, region, interactional factors (e.g., situation, topic, purpose) and national policies affecting language use.

Engl 515. Statistical Natural Language Processing. (Cross-listed with Ling, HCI). (3-0) Cr. 3. F. Prereq: Stat 330 or equivalent, recommended Ling 219 or Ling 511. Introduction to computational techniques involving human language and speech in applications such as information retrieval and extraction, automatic text categorization, word prediction, intelligent Web searching, spelling and grammar checking, speech recognition and synthesis, statistical machine translation, n-grams, POS-tagging, word-sense disambiguation, on-line lexicons and thesauri, markup languages, corpus analysis, and Python programming language.

Engl 517. Second Language Acquisition. (Cross-listed with Ling). (3-0) Cr. 3. F. Prereq: 511 or an introductory course in linguistics. Introduction to approaches, methods, techniques, materials, curricular design, and assessment for various levels of ESL instruction. Attention to issues related to the teaching of listening, speaking, reading, writing, vocabulary, pronunciation, and culture.

Engl 519. Second Language Assesment. (3-0) Cr. 3. S. Prereq: 517 Principles of second language assessment including reliability, validity, authenticity and practicality. Constructing, scoring, interpreting, and evaluating second language tests for a variety of situations.

Engl 520. Computational Analysis of English. (Cross-listed with Ling, HCI). (3-0) Cr. 3. F. Prereq: Engl 10 or 511. Concepts and practices for analysis of English by computer with emphasis on the applications of computational analysis to problems in applied linguistics. Course covers analysis and recognition of learner language in computer-assisted learning and language assessment.

Engl 521. Teaching of Literature and the Literature Curriculum. (3-0) Cr. 3. Alt. F. offered 2010. Prereq: 6 credits in literature. Examination of the roles of the literary work, reader, and teacher in literary study. Responses to literature. Place of literature in language arts. Study and development of curriculum materials for middle school, high school, and college levels of instruction.

Engl 523. Introduction to Old English Language and Literature. (3-0) Cr. 3. Prereq: Course in medieval literature or history or history of the English language recommended. Introductory study of Old English language and literature in prose and poetry, including extracts from Beowulf. Some attention to Anglo-Saxon culture.

Engl 524. Literacy: Issues and Methods for Non-native Speakers of English. (Cross-listed with Ling). (3-0) Cr. 3. F. Prereq: 511 or an introductory course in linguistics. Theoretical and practical issues and techniques in teaching literacy in a variety of contexts, involving children and adults at basic skill levels and teens and adults in academic and vocational programs.

Engl 525. Methods in Teaching Listening and Speaking Skills to Nonnative Speakers of English. (Cross-listed with Ling). (3-0) Cr. 3. S. Prereq: 511 or an introductory course in linguistics. Theoretical and practical issues and techniques in the teaching of second language listening, and speaking skills. Topics will be relevant to those intending to teach in various contexts involving both K-12 and adult learners.

Engl 527. Discourse Analysis. (Cross-listed with Ling). (3-0) Cr. S. Prereq: 511 or an introductory course in linguistics. Methods and theoretical foundations for linguistic approaches to discourse analysis. Applications of discourse analysis to the study of texts in a variety of settings, including academic and research contexts.

Engl 528. English for Specific Purposes. (3-0) Cr. 3. Alt. F., offered 2010. Prereq: 511 or an introductory course in linguistics. Issues and techniques in analyzing, teaching, and assessing English for specific purposes. Topics include theories of specific purpose language use, analysis of learner needs in target language contexts, and syllabus and materials development for teaching and assessment.

Engl 529. Multimeda Content Management. (3-0) Cr. 3. Alt. S. Prereq: 511. Strategies for developing and delivering multimodal content via digital media. Focus on the principles of database design, interface development, usability testing, and collaborative content management within professional communication settings.

Engl 531. Topics in the Study of Literature. (3-0) Cr. 3. Repeatable. Alt. S., offered 2010. Prereq: 6 credits in literature. Intensive study of literary genres, periods, movements, or themes; e.g., Literature and Historicism, Narrating the Feminine, Allegory.

Engl 532. American Literature to 1865. (3-0) Cr. 3. Repeatable. Alt. F. offered 2010. Prereq: 6 credits in literature. Selected texts in American literature from Beginnings to the Civil War. Study may include Native American literature, the literature of European conquest, Colonial and Revolutionary periods, Early Republic, and Jacksonian Era, in critical and cultural contexts.

Engl 534. American Literature to the Present. (3-0) Cr. 3. Repeatable. Alt. F., offered 2009. Prereq: 6 credits in literature. Selected texts in American literature from the Civil War to the present. Study may include Realism, Naturalism, Modernism, and Post-modernism, with significant attention to race-ethnicity, gender, and identity, and to contemporary critical views. Range of authors and genres.

Engl 537. Grammatical Analysis. (Dual-listed with Ling). (3-0) Cr. 3. F. Prereq: 511 or an introductory course in linguistics. Theory and methods for analysis of English syntactic emphasis on recent syntactic theory.

Engl 538. Fiction. (3-0) Cr. 3. Repeatable. Alt. S., offered 2011. Prereq: 6 credits in literature. Selected fiction writers in English; range of authors and genres. Emphasis on both male and female writers; attention to the relationships between fiction and cultural change.

Engl 540. Drama. (3-0) Cr. 3. Repeatable. Prereq: 6 credits in literature. Primary texts in dramatic genres from various literary periods, in critical and cultural contexts. Frequently concentrates on the English Renaissance and the Shakespearean stage.

Engl 541. Autobiography, Biography, Memoir. (3-0) Cr. 3. Repeatable. Alt. S., offered 2010. Prereq: 6 credits in literature. Study of life-writing, e.g., autobiography, biography, memoir, cross-genre writing, autobiographical criticism. Readings may be arranged by period, nationality, or subgenre (e.g., autobiography of childhood experience, celebrity autobiography).

Engl 542. Production Processes for Technical Documents. (3-0) Cr. 3. Alt. S., offered 2010. Prereq: 302, 309, 313, or 314; junior classification. Review of the principles of desktop publishing and production in the field of technical communication. Focus on theories of print document design and project management, as well as digital prepress techniques needed to produce documents using outside print bureaus. Practice with current desktop publishing software.

Engl 543. Environmental Literature. (3-0) Cr. 3. S. Prereq: Graduate classification. An exploration of the major genres that derive from literary encounters with the environment. Readings may come from various cultures and time periods, but about half of the texts will represent canonical American environmental literature from the 19th and 20th centuries.

Engl 545. Women's Literature. (Cross-listed with W S). (3-0) Cr. 3. Repeatable. Alt. F., offered 2010. Prereq: 6 credits in literature. Primary texts by women writers; historical, thematic, formal, or theoretical approaches; secondary readings, e.g., Nineteenth Century Women Writers; American Women's Personal Narratives; Southern Women Writers of the U.S.

Engl 547. The History of Rhetorical Theory I: From Plato to Bacon. (3-0) Cr. 3. F. Prereq: 6 credits in English. Rhetorical theory from the classical period of ancients to Bacon and Locke to the present; attention to its relation to the nature of knowledge, communication, practice, and pedagogy.

Engl 548. The History of Rhetorical Theory II: From Bacon to the Present. (3-0) Cr. 3. S. Prereq: 6 credits in English. Rhetorical theory from the classical period of ancients to Bacon and Locke to the present; attention to its relation to the nature of knowledge, communication, practice, and pedagogy.

multimedia training programs in both education and industry. Work with interactive hypertext, digital audio, and non-linear video editing.

Engl 550. Creative Writing: Craft and Professional. (3-0) Cr. 3. F. Prereq: Admission into MFA Program in Creative Writing and Environment. A multigener creative craft course required of all incoming students in the MFA Program in Creative Writing and Environment. Students develop an understanding of craft and environmental writing across genres (poetry, fiction, nonfiction) as well as learn about editing and publication practice through the lens of a working literary journal, Flyway: A Journal of Writing and Environment. Other course activities include presentations on the production practices of leading literary journals; individual editing projects; pragmatic tips for finding publication outlets for polished creative work; and a field trip to publishing houses.

Engl 551. Advanced Multi-Genre Creative Writing Workshop. (3-0) Cr. 3. Prereq: Fourth-semester or equivalent standing in the Creative Writing and Environment M.F.A. program. Students develop book-length manuscripts of fiction, creative nonfiction, or poetry.

Engl 553. Graduate Workshop: Writing The Long Project. (3-0) Cr. 3. Repeatable. Prereq: 550 and graduate classification. Open to graduate students outside Creative Writing only with permission of instructor. Individual long creative writing project ideas developed in course. Portions of long creative writing project workedhop, revised, discussed in conferences.

Engl 554. Graduate Fiction Workshop. (3-0) Cr. 3. Repeatable. Prereq: 550 and graduate classification. Open to graduate students outside Creative Writing only with permission of instructor. Individual projects in fiction on a workshop and conference basis. Readings in short fiction. Discussion of elements of narrative such as plot, point of view, characterization, theme, setting.

Engl 555. Graduate Nonfiction Workshop. (3-0) Cr. 3. Repeatable. Prereq: 550 and graduate classification. Open to graduate students outside Creative Writing only with permission of instructor. Individual projects in memoir, immersion journalism, character studies, and/or the personal essay on a workshop and conference basis. Readings in creative nonfiction.

Engl 556. Graduate Poetry Workshop. (3-0) Cr. 3. Repeatable. Prereq: 550 and graduate classification. Open to graduate students outside Creative Writing only with permission of instructor. Individual projects in poetry on a workshop and conference basis. Readings in poetry. Discussion of poetic elements such as image, sound, internal structure, rhythm, tone, figurative language.

Engl 557. Studies in Creative Writing. (3-0) Cr. 3. Repeatable. Prereq: Graduate classification. Special topics course on ideas, issues, and techniques in creative writing. Subject matter may include specific genres, aspects of the creative writing process, or themes of particular interest. Significant readings and written work required; previous workshop experience helpful.

Engl 558. Teaching Creative Writing. (3-0) Cr. 3. Prereq: Graduate classification. Pedagogical approaches that are effective for grade-school through adult-education creative writing teaching. Writing exercises, workshops, text evaluation, and visits from creative writers.

Engl 559. Creative Writing Teaching Internship. Cr. arr. Prereq: Permission of participating instructors. Students assist in an introductory creative writing class. Some supervised teaching includes mainly evaluation of submissions and individual conferences. Requirements and grades determined by participating instructors.

Engl 560. Environmental Field Experience. (3-0) Cr. 3. Repeatable. Prereq: Graduate classification. Students spend a term on a project that requires fieldwork. Projects might include working for a federal, state or private non-profit environmental organization or farm, or living and working in a specified natural area.

Engl 587. Internship in Business, Technical, and Professional Communication. (3-0) Cr. arr. Repeatable. F. S. Prereq: 507 plus 3 additional graduate credits in business and technical writing or composition and rhetoric, permission of instructor. Limited to master’s and doctoral degree candidates in the English Department. An opportunity to write, edit, and design business documents in a professional setting. Projects include reports, proposals, manuals, brochures, newsletters.

Engl 590. Special Topics. Cr. arr. Repeatable. Prereq: Permission of the Graduate Studies Committee according to guidelines available in the department office.

A. Literature
B. Teaching English as a Second Language (TESL/Applied Linguistics). (Cross-listed with Ling 950B)
C. Composition and Rhetoric
E. Rhetoric and Professional Communication
F. Creative Writing
G. Applied Linguistics and Technology

Engl 592. Studies in Rhetoric and Professional Communication. (3-0) Cr. 3. Repeatable. Prereq: 12 hours in rhetoric, linguistics, or literature, excluding 150/250. Seminar on selected topics in rhetoric and professional communication or composition.

Engl 595. Graduate Study and Travel. Cr. R. Prereq: Permission of instructor. Supervised study of an appropriate area of the discipline while traveling in a foreign country or in the U.S. Special fees apply.

A. Literature
B. Creative Writing
C. Linguistics
D. Rhetoric and Professional Communication
E. Teacher Education

Courses for graduate students

Engl 611. Topics in the History of Rhetorical Theory. (3-0) Cr. 3. Repeatable. Alt. F. offered 2009. Prereq: 547 or 548. Rhetorical theory, criticism, and/or practice in relation to a historical period; the historical development of a rhetorical concept.

Engl 621. Topics in Current Rhetorical Theory. (3-0) Cr. 3. Repeatable. S. Prereq: 503 or 506. Advanced study of a specialized topic or problem in rhetorical theory, criticism, or practice.

Engl 623. Research Methods in Applied Linguistics. (Cross-listed with Ling). (3-0) Cr. 3. F. Prereq: 511, 517, 518, 519. Survey of research traditions in applied linguistics. Focus on theoretical and practical aspects of quantitative and qualitative approaches to applied linguistic study, including experimental and quasi-experimental methods, classroom observation and research, introspective methods, elicitation techniques, case studies, interactional analysis, ethnography, and program evaluation. Computational tools and resources for linguistic research will be highlighted.

Engl 630. Seminar in Technology and Applied Linguistics. (Cross-listed with Ling). (3-0) Cr. 3. F.S. Prereq: Engl 510, 511, 512, 518, others depending on the topic. Topics change each semester. Topics include advanced methods in natural language processing, technology and literacy in a global context, feedback in CALL programs, and advances in language assessment.

Entomology

www.ent.iastate.edu

Leslie Lewis, Chair of Department
University Professor (Emeritus): Pedigo
Professors: Bonning, Coats, Courtney, Dewitt, Ju- renka, D. Lewis, L. Lewis, Rice, Tollefson, Wintersteen
Professor (Emeritus): Guthrie, Hart, Krafour, R. Lewis, Mutchmor, Rowley, Showers
Associate Professors: Beetham, Holscher
Assistant Professors: Bartholomay, Gassmann, Oneal
Assistant Professor (Adjunct): Vandyk
Assistant Professors (Collaborators): Hellmich, Sappington, Sumerford
Undergraduate Study

For undergraduate curriculum in Insect Science, see College of Agriculture, Curricula.

A degree in Insect Science will provide students with a strong foundation in the biological sciences with an emphasis on insects. This degree prepares students for positions in industry, government, education, or public health. Chemical and seed companies, pest-management or consulting firms, and Horticultural nurseries employ insect scientists. State and federal agencies employ insect science graduates as consultants, extension directors, mosquito abatement agents, and research aides. A significant number of graduates pursue advanced graduate degrees in academia or professional degrees in the medical or veterinary fields.

Graduates understand the evolutionary and ecological relationships of insects with other life forms, and the impact of insects relative to human and animal health, as well as the relationships between insects and humanity’s food, fiber, structural, and aesthetic needs and expectations. They are skilled in identifying insects and related groups and understand the biology, ecology, behavior, diversity, and evolutionary relationships of the major groups of insects. Graduates understand the principles and methods available to manage beneficial and pest insects. They understand the application of the scientific method in problem solving and the principles of experimental design and analysis. Graduates are able to communicate research and educational materials properly and competently - orally, visually, and in writing - and are able to work effectively with others.

Graduates of the agricultural and Horticultural insect management option are skilled in identifying pests and measuring their impact on plant and animal hosts for the management of these pests. They understand the environmental, legal, and ethical issues involved in insect population management. Graduates of the insect biology option have achieved an understanding of the biochemical and physiological processes governing insect metabolism, growth, and form. They understand the evolutionary and ecological significance of insects. Graduates of this option often enter graduate or professional schools.

The department offers a minor in Insect Science that may be earned by completing Ent 370 and 12 credits in courses selected from an approved list supplied by the department. Entomology administers the Emerging Global Diseases minor (see www.ent.iastate.edu/dept/undergrad/egdl. Core courses address the biology of emerging disease agents (e.g., protozoa, fungi, microbes, and viruses), the clinical manifestations and epidemiology of emerging diseases, and the impact of those diseases on human interactions and Socioeconomics. One course must be taken from each of three core areas: (Pathogens and Disease) Micro 310 or Biol/Micro 353; (Sociology and Economics) Soc 411, Soc 345, FS HN 342, or Anth 439; (Arthropod-borne Diseases) Ent 374 or Ent 574. The remainder of the credits (for a total of 15) may be selected from any of the above-listed courses not selected, and from other appropriate courses as approved by Emerging Global Diseases program advisers.

Graduate Study

The department offers work for the master of science and doctor of philosophy degrees with a major in entomology. Studies at the ecosystem, organismal, and Subcellular levels occur in the following areas: aquatic entomology, biological control, chemical ecology, ecology, host plant resistance, insecticide toxicity, medical/veterinary entomology, pathology, pest management, physiological, population genetics, or systematics.

Graduates have a broad understanding of entomology and related disciplines, and an in-depth command of their area of concentration. They are able to communicate effectively with scientific colleagues and the general public in both formal and informal settings. Graduates are able to address complex problems facing entomology or toxicology professionals, taking into account related ethical, social, legal, economic, and environmental issues. They are skilled in research methods, data analyses, and interpretation of results. They also are skilled in working effectively with their colleagues, and writing concise and persuasive grant proposals. They have an understanding of and can critically evaluate current entomological literature.

Prerequisite to the entomology major and to minor graduate work in the department is completion of at least two years of zoological courses, for part of which credit may be earned with scientific colleagues and the general public in both formal and informal settings. Graduates are able to address complex problems facing entomology or toxicology professionals, taking into account related ethical, social, legal, economic, and environmental issues. They are skilled in research methods, data analyses, and interpretation of results. They also are skilled in working effectively with their colleagues, and writing concise and persuasive grant proposals. They have an understanding of and can critically evaluate current entomological literature.

Courses primarily for undergraduate students

Ent 201. Introduction to Insects. (1-0) Cr. 1. F.S.SS. 5 weeks. S. Classroom section spring only. World Wide Web section of course offered summer and fall semesters. Biological and ecological aspects of insects.

Ent 283. Pesticide Application Certification. (Cross-listed with Agron, For, Hort.) (2-0) Cr. 0. S. Holscher. Core background and specialty topics in agricultural, and Horticultural pesticide applicator certification. Students can Select certification categories and have the opportunity to obtain pesticide applicator certifica- tion at the completion of the course. Commercial pesticide applicator certification is emphasized.

Ent 374. Insects and Our Health. (Cross-listed with Micro). (3-0) Cr. 3. S. Prereq: 3 credits in biological sciences. Bartholomay. Identification, biology, and significance of insects and arthropods that affect the health of humans and animals, particularly those that are vectors of disease. Nonmajor graduate credit.

Ent 374L. Insects and Our Health Laboratory. (Cross-listed with Micro). (0-3) Cr. 1. Alt. S., offered 2010. Prereq. Credit or enrollment in Ent 374. Bartholomay. Laboratory and field techniques for studying medical or public health entomology, including: collection, identification and maintenance of medically significant arthropods and experimental design and execution related to the biology of arthro- pods or arthropod-pathogen interactions.

Entomology participates in the interdepartmental majors in ecology and evolutionary biology; genetics; Microbiology; and molecular, cellular and developmental biology; and in the interdepartmental major and minor in toxicology (see Index). The Federal Corn Insects and Crop Genetics Research Unit and the North Central Plant Introduction Station are available for advanced study in certain phases of entomological research. More information about the department, such as current research, faculty resumes, physical facilities, and graduate student opportunities can be viewed on the department’s website at www.ent.iastate.edu. Curriculum assessment for the department can be viewed here: http://www.ent.iastate.edu/assessment.
Ent 376. Fundamentals of Entomology and Pest Management. (2-3) Cr. 3. S. Prereq: Biol 101 or 211. O’Neal. Introduction to entomology and insect-pest management, including life processes, ecology, economics, tactics of population suppression, and ecological feedback. Credit for either Ent 376 or 386, but not both, may be applied toward graduation. Nonmajor graduate credit.

Ent 386. Management of Insect Pests. (2-0) Cr. 2. Alt. A., offered 2010. Prereq: Biol 101 or 211. Tollefson. Introduction to insects and their lifecycles. Theory and application of pest control practices and examples drawn primarily from field crops. Credit for either Ent 376 or 386, but not both, may be applied for graduation. Nonmajor graduate credit.

Ent 471. Insect Ecology. (Dual-listed with 571). (2-3) Cr. 3. Alt. F., offered 2010. Prereq: 9 credits biological sciences. O’Neal. The contribution of insects to ecosystem function is staggering. This course will focus on insect population ecology, predator-prey interaction and chemical ecology. The role of insects in nutrient cycling, pollination and pest management will be discussed with case studies used to highlight the applied nature of insect ecology and its relationship to agriculture.

Ent 478. Global Protozoology - Molecular Biology of Protozoa. (Dual-listed with 578). (Cross-listed with V Pth). (2-1) Cr. 3. F. Prereq: Permission of instructor. Gleason, D. Lewis. Analysis of cellular systems, molecules, and organisms targeted as targets of disease control. Credit for either Ent 478 or 578, but not both, may be applied toward graduation. Nonmajor graduate credit.

Ent 490. Independent Study. Cr. arr. Repeatable. Prereq: 15 credits in biological sciences, junior or senior classification. A maximum of 6 credits of Ent 490 may be used toward the total of 128 credits required for graduation. E. Research or work experience. U. Laboratory teaching experience. For students registering to be undergraduate laboratory assistants.

Ent 493. Workshop on Insect Management. Cr. 1. SS. Prereq: 370, 372, 376, or 386. Holscher. Insect recognition and sampling will be practiced in agricultural systems. The applications of current pest management techniques will be demonstrated in both crop and livestock systems. Nonmajor graduate credit.

Courses primarily for graduate students, open to qualified undergraduate students

Ent 511. Integrated Management of Tropical Crops. (Cross-listed with PI P Hort). (3-0) Cr. 3. Alt. S., offered 2011. Prereq: PI P Hort 416 or Ent 370 or Hort 221. Gleason, Lewis, Nonnecke. Applications of Integrated Crop Management principles (including plant pathology, entomology, and Horticulture) to tropical cropping systems. Familiarization with a variety of tropical agroecosystems and Costa Rican culture is followed by 10-day tour of Costa Rican agriculture during spring break, then writeup of individual projects. Tour expenses paid by students.

Ent 530. Ecologically Based Pest Management Strategies. (Cross-listed with Agron, PI P SusAg). (3-0) Cr. 3. Alt. F., offered 2010. Prereq: SusAg 509. O’Neal. The contribution of insects to ecosystem function is staggering. This course will focus on insect population ecology, predator-prey interaction and chemical ecology. The role of insects in nutrient cycling, pollination and pest management will be discussed with case studies used to highlight the applied nature of insect ecology and its relationship to agriculture.

Ent 555. Insect Physiology. (3-3) Cr. 4. S. Prereq: Ent 370. Jurek. Life processes of the insects, including reviews of current problems in insect physiology.

Ent 571. Insect Ecology. (Dual-listed with 471). (2-3) Cr. 3. Alt. F., offered 2010. Prereq: 9 credits biological sciences. O’Neal. The contribution of insects to ecosystem function is staggering. This course will focus on insect population ecology, predator-prey interaction and chemical ecology. The role of insects in nutrient cycling, pollination and pest management will be discussed with case studies used to highlight the applied nature of insect ecology and its relationship to agriculture.

Ent 574. Medical Entomology. (3-3) Cr. 4. Alt. S., offered 2010. Prereq: 9 credits in biological sciences. Bartholomay. Identification, biology, and significance of insects and other arthropods that attack people and animals, particularly those that are vectors of disease.

Ent 578. Global Protozoology - Molecular Biology of Protozoa. (Dual-listed with 478). (Cross-listed with V Pth). (2-1) Cr. 3. F. Prereq: Permission of instructor. Analysis of cellular systems, molecules, and organisms targeted as targets of disease control. Credit for either Ent 478 or 578, but not both, may be applied toward graduation. Nonmajor graduate credit.

A. Biological Control and Pathology.
B. Chemical Ecology and Behavior.
C. Ecology and Pest Management.
D. Evolution and Systematics.
E. Special Research Topics.
F. Medical and Veterinary Entomology.
G. Molecular Entomology.
H. Physiology and Biochemistry.
I. Toxicology.
K. Teaching Experience.
L. Extension Internship.
M. Immature Insects.
N. Population Genetics.

Courses for graduate students

Ent 600. Seminar. Cr. 1. F.S.SS. Presentation of research results.

Entrepreneurial Studies

www.isuipc-center.org/education/minor

(Interdepartmental Undergraduate Minor)

Supervisory Committee: Kay Palan (Business), Chair; Lisa Nolan ( Vet Med); David Acker (Ag); Diane Rover (Engineering); Corly Brooke (Human Sciences); Kate Schwennsen (Design); Zora Zimmerman (LAS).

Entrepreneurial Studies is an interdisciplinary program that provides opportunities to students to learn about entrepreneurship—the process of creating value through recognizing and developing opportunities. It serves to complement the student’s major area of study, in any college, by offering a means of putting theory and science into practice. The goal of the Entrepreneurial Studies program is to provide the knowledge and skills needed to create value through recognizing and developing opportunities. In addition to feasibility analysis and business planning, the program deals with the topics of innovation, opportunity recognition, technology evaluation, industry analysis, and competitive strategy. Although the program introduces some fundamental concepts from accounting, finance, marketing, and management, it does not attempt to substitute for any business courses in these areas.

A minor in entrepreneurial studies is available to all undergraduate students at ISU. Students must follow college specific rules in selecting courses. The college representatives to the supervisory committee will be responsible for advising students in their college, and will inform students about the details of the college rules.
Environmental Science provides an integrated, quantitative, and interdisciplinary approach to the study of environmental systems. The magnitude and complexity of environmental problems are creating a growing need for scientists with rigorous, interdisciplinary training in environmental science. The Environmental Science program is designed to prepare students for positions of leadership in this rapidly changing discipline. Environmental Science graduates have a solid foundation in biological and physical natural sciences and the specialized training necessary for integrated analysis of environmental systems.

**Undergraduate Study**

The Environmental Science undergraduate major is offered through both the College of Agriculture and Life Sciences and the College of Liberal Arts and Sciences. Environmental Science majors complete foundation courses in biology, chemistry, earth science, geology, physics and mathematics, plus a major comprising an integrated core of Environmental Science courses and additional advanced coursework in Environmental Science. Scientific rigor is stressed throughout the program, beginning with the foundation courses in the first two years of the curriculum. The upper level core courses emphasize a dynamic systems approach that provides a framework for integrating physical, chemical, and biological aspects of environmental systems.

Students seeking an Environmental Science major complete the following: (1) A foundation of approved supporting courses in science and mathematics including biology, chemistry, earth science, physics, calculus, and Statistics, (2) 29 credits of course work in the major, including the Environmental Science core (EnSci 110, 201, 250, 381, and 382) and 15 additional credits of approved course work in Environmental Science. A combined average grade of C or higher is required in courses applied in the major.

**Graduate Study**

Environmental Science offers an interdisciplinary graduate program leading to the M.S. and Ph.D. degrees with a major in Environmental Science. Faculty from the colleges of Agriculture and Life Sciences, Engineering, and Liberal Arts and Sciences cooperate to offer courses and research opportunities covering a broad array of environmental topics. Applicants should have completed an undergraduate or masters degree in one of the biological, chemical, physical, or engineering sciences or should have equivalent preparation.

The Environmental Science graduate program emphasizes fundamental concepts and research, which at the same time address major environmental issues. The curriculum is designed to provide the interdisciplinary approach needed in Environmental Science education and research. In addition to work in their chosen area of specialization, students are afforded a broad exposure to the biological, chemical and physical aspects of environmental systems and the specialized training necessary for integrated analysis of these systems.

**Courses primarily for undergraduate students**

- EnSci 201. Introduction to Environmental Issues. (Cross-listed with Env Sl) (2-0) Cr. 2. F. Discussion of current and emerging environmental issues such as human population growth, energy use, loss of biodiversity, water resources, and climate change.
- EnSci 250. Environmental Geography. (Cross-listed with Env S). (3-0) Cr. 3. F. The distribution, origins and functions of the earth's physical systems and the spatial relationship between human activity and the natural world.
- EnSci 290. Apprenticeship. Cr. arr. Repeatable. F.S.SS. Prereq: Approval of the Environmental Science Coordinator. Practical experience in an approved setting such as a research laboratory, government office, or private office. Satisfactory-fail only.
- EnSci 301. Natural Resource Ecology and Soils. (Cross-listed with NREM). (3-3) Cr. 4. F. Prereq: Biol 211L, for 201 or a second course in Biology. Effects of environmental factors on ecosystem structure and function using forest, prairie and agricultural ecosystems as models. Special emphasis is given to soil-forming factors and the role of soil in nutrient and water cycling and ecosystem dynamics. Additional emphasis is given to human influences on natural ecosystems and the role of perennial plant communities in agricultural landscapes. Nonmajor graduate credit.
- EnSci 312. Ecology. (Cross-listed with A Ecl, Biol). (3-3) Cr. 4. F. Prereq: Biol 211L and 212L. Fundamental concepts and principles of ecology dealing with organisms, populations, communities and ecosystems. Laboratory and field exercises examine ecological principles and methods as well as illustrate habitats.
- EnSci 312I. Ecology. (Cross-listed with A Ecl, la LL) Cr. 4. S. S. An introduction to the principles of ecology at the population, community and ecosystem level. Field studies of local lakes, wetlands and prairies are used to examine factors controlling distributions, interactions, and roles of plants and animals in native ecosystems.
- EnSci 360. Environmental Soil Science. (Cross-listed with Agron). (2-3) Cr. 3. S. Prereq: Agron 260 or Geol 100 or 201, Burras and Killorn. Application of soil science to contemporary environmental problems; comparison of the impacts that different management strategies have on short- and long-term environmental quality and land development. Emphasis on participatory learning activities.
- EnSci 381. Environmental Systems I: Introduction to Environmental Systems. (Dual-listed with 581). (Cross-listed with Biol, Env S, Micro). (2-4) Cr. 4. F. Prereq: 12 credits of natural and physical sciences, including Biology and chemistry. Introduction to the structure and function of natural environmental systems. Systems approach to the analysis of material and energy flows in natural environmental systems and the primary environmental factors controlling these systems. Nonmajor graduate credit.
- EnSci 402. Watershed Hydrology. (Dual-listed with 502). (Cross-listed with Agron, Geol, Mteor, NREM). (3-3) Cr. 4. F. Prereq: Four courses in physical or Biological sciences or engineering; junior standing. Examination of watersheds as systems, emphasizing the surface components of the hydrologic cycle. Combines qualitative understanding of hydrological processes and uncertainty with quantitative representation. Laboratory emphasizes field investigation and measurement of watershed processes. Nonmajor graduate credit.
- EnSci 402I. Watershed Hydrology and Surficial Processes. (Cross-listed with Agron, la LL). Cr. 4. S. Prereq: Four courses in physical or Biological sciences or engineering. Effects of geomorphology, soils, and land use on transport of water and materials. (Nutrients, contaminants) and in watersheds. Fieldwork will emphasize investigations of the Iowa Great Lakes watershed. Nonmajor graduate credit.
- EnSci 404. Global Change. (Dual-listed with 504). (Cross-listed with Agron, Env S, Mteor). (3-0) Cr. 3. S. Prereq: Four courses in physical or Biological sciences or engineering; junior standing. Recent changes in global biogeochemical cycles and climate; models of future changes in the climate system; impacts of global change on agriculture, water resources and human health; ethical issues of global environmental change. Nonmajor graduate credit.
- EnSci 405. Environmental Biophysics. (Dual-listed with 505). (Cross-listed with Agron, Mteor). (3-0) Cr. 3. Alt. S., offered 2011. Prereq: Math 166 or equivalent. Hornbuckle. The physical microenvironment in which organisms live, with an emphasis on the processes of energy and mass (water) exchange between organisms and their environment and the quantitative models that are used to represent these processes. Temperature, water, and wind, Heat, mass, and radiative transport. Applications to animals, plants, and plant communities. Nonmajor graduate credit.
- EnSci 406. World Climates. (Cross-listed with Agron, Mteor). (3-0) Cr. 3. F. Prereq: Agron/Mteor 206. Arritt. Distribution and causes of different climates around the world. Effects of climate and climate variations on human activities including Society, economy and agriculture. Current issues such as climate change and international efforts to assess and mitigate the consequences of a changing climate. Semester project and in-class presentation required. Nonmajor graduate credit.

EnSci 408. GIS and Natural Resources Management. (Dual-listed with 508). (Cross-listed with A E). (2-2) Cr. 3. F. Prereq: Working knowledge of computers and computer programming. Introduction to fundamental concepts and applications of GIS in natural resource management with specific focus on watersheds. Topics include: basic GIS technology, data structures, database management, spatial analysis, and modeling; visualization and display of natural resource data. Case studies in watershed and natural resource management using ArcView GIS.

EnSci 409. Field Methods in Hydrogeology. (Dual-listed with 509). (Cross-listed with Geol). (4-0) Cr. 2. Alt. SS., offered 2010. Prereq: 402 or 411 or C E 473. Introduction to field methods used in groundwater investigations. In-field implementation of pumping tests, slug tests, monitoring well installation and drilling techniques, geochemical and water quality sampling, seepage meters, minipiezometers, stream gaging, electronics for data collection, and geophysics. Field trips to investigate water resource, water quality, and remediation projects.

EnSci 411. Hydrogeology. (Dual-listed with 511). (Cross-listed with Geol). (3-2) Cr. 4. F. F. Prereq: Geol 100 or 201; Math 165 or 181; Phys 111 or 221. Physical principles of groundwater flow, nature and origin of aquifers and confining units, well hydraulics, groundwater modeling, and contaminant transport. Lab emphasizes applied field and laboratory methods for hydrogeological investigations. Nonmajor graduate credit.

EnSci 415. Paleoclimatology. (Dual-listed with 515). (Cross-listed with Geol). (3-0) Cr. 3. Alt. S., offered 2011. Prereq: Four courses in Biology or physical science. Introduction to mechanisms that drive climate, including the interplay between oceanic and atmospheric circulation and fluctuation in Earth's orbital parameters. Examination and analysis of past climate records ranging from historical documentation to ecological and geochemical proxies (e.g. tree ring analysis, O and C isotopes of skeletal carbonates and stable isotopes of living organisms) used to construct and correlate climatic periods, utility of computer models to reconstruct past climates and predict future climate change. Emphasis placed on paleoclimatology and paleoecology of the last ~1 million years. Nonmajor graduate credit.

EnSci 419. Environmental Geochemistry. (Dual-listed with 519). (Cross-listed with Geol). (2-2) Cr. 3. F. F. Prereq: 402 or 411 or equivalent. Geochemistry of natural waters and water-rock interactions. Acid-base equilibria, carbonates, and buffering systems, mineral dissolution and precipitation, sorption, ion exchange, and redox reactions. Introduction to thermodynamics and kinetics. Laboratory emphasizes chemical analysis of waters and computer modeling. Nonmajor graduate credit.

EnSci 424. Air Pollution. (Dual-listed with 524). (Cross-listed with A E, C E). (1-0) Cr. 1. Prereq: Either Phys 221 or Chem 178 and either Math 166 or 3 credits in statistics. Senior classification or above. 1 cr. per module. Module D and E.
A. Air quality and effects of pollutants
B. Climate change and causes
C. Transportation constraints
D. Off-gas treatment technology
E. Agricultural sources of pollution

EnSci 446. Integrating GPS and GIS for Natural Resource Management. (Dual-listed with 548). (Cross-listed with NREM). (2-3) Cr. 3. S. F. Prereq: 12 credits in student's major at 300 level or above, NREM 345 or equivalent experience with ArcGIS. Emphasis on the use of GPS as a tool for GIS. Basic theory of GPS. Use of Global Positioning System technology for spatial data collection and navigation. Post-processing and real-time correction of GPS data. GPS data transfer to GIS for mapping applications. Use of GIS to construct way points for use in GPS navigation.

EnSci 452. GIS for Geoscientists. (Dual-listed with 552). (Cross-listed with Geol). (2-2) Cr. 3. F. F. Prereq: Geol 100, Geol 201 or equivalent. Introduction to geographic information systems (GIS) with particular emphasis on geoscientific data. Uses ESRI's ArcGIS Desktop version 9.2. Emphasizes typical GIS operations and analyses in the geosciences to prepare students for advanced GIS courses.

EnSci 459. Environmental Soil and Water Chemistry. (Dual-listed with 559). (Cross-listed with Agron). (3-3) Cr. 4. F. F. Prereq: Agron 384 or EnSci 360; Chem 164, 165, or 178; Math 140. Chem 211 or 231 recommended. Thompson. An introduction to the chemical properties of soils, chemical reactions and transformations in soils and surface waters, and their impact on the environment. Topics include solution chemistry in soils and surface waters, solid-phase composition of soils, reactions at the solid-solution interface, and approaches to contemporary environmental issues. Nonmajor graduate credit.

EnSci 479. Surficial Processes. (Dual-listed with 579). (Cross-listed with Geol). (2-2) Cr. 3. F. F. Prereq: Geol 100 or 201 or equivalent experience. Study of surficial processes in modern and ancient geological environments. Topics include weathering, erosion, transport, and landscape evolution. Emphasis on the role of fluvial, glacial, hill slope, eolian, and coastal processes. Applications to environmental and engineering problems. Laboratory emphasizes aerial photo and topographic map interpretation. Nonmajor graduate credit.

EnSci 480. Engineering Analysis of Biological Systems. (Dual-listed with 580). (Cross-listed with BSE). (2-2) Cr. 3. F. F. Prereq: A E 216; Math 266; Biol 211 or 272; M E 330. Systems-level engineering analysis of biological systems. Economic and life-cycle analysis of biological production systems. Topics include water distribution, water, and energy within and among ecosystems. Nonmajor graduate credit.

EnSci 487. Microbial Ecology. (Cross-listed with Biol, Micro). (3-0) Cr. 3. F. Prereq: Six credits in biology and 6 credits in chemistry. Introduction to major functional groups of autotrophic and heterotrophic microorganisms and their roles in natural systems. Nonmajor graduate credit.

EnSci 490. Independent Study. Cr. arr. Repeatable. F.S.S.S. Prereq: Permission of the instructor and approval of the Environmental Science Coordinator.

EnSci 496. Travel Course. Cr. arr. Repeatable. Prereq: Permission of instructor: Extended field trips to study environmental topics in varied locations. Location and duration of trips will vary. Trip expenses paid by students. Check with department for current offerings. A. International Tour. B. Domestic Tour.

EnSci 498. Cooperative Education. Cr. R. Repeatable. F.S.S.S. Prereq: Permission of Environmental Science Coordinator. Required of all cooperative education students. Students must register prior to commencing each work period.

Courses primarily for graduate students, open to qualified undergraduate students

EnSci 502. Watershed Hydrology. (Dual-listed with 402). (Cross-listed with Agron, Mteor). (3-0) Cr. 4. F. Prereq: Four courses in physical or biological sciences or engineering; junior standing. Examination of watersheds as systems, emphasizing the surface components of the hydrologic cycle. Combines qualitative understanding of hydrological processes and uncertainty with quantitative representation. Laboratory emphasizes field investigation and measurement of watershed processes.

EnSci 504. Global Change. (Dual-listed with 404). (Cross-listed with Agron, Mteor). (3-0) Cr. 3. S. Prereq: Four courses in physical or biological sciences or engineering; junior, senior, or graduate standing. Recent changes in global biogeochemical cycles and climate; models of future changes in the climate system; impacts of global change on agriculture, water resources and human health; ethical issues of global environmental change.

EnSci 505. Environmental Biophysics. (Dual-listed with 405). (Cross-listed with Agron, Mteor). (3-0) Cr. 3. Alt. S., offered 2011. Prereq: Math 166 or equivalent. Hornbuckle. The physical microenvironment in which organisms live, with an emphasis on the processes of energy and mass (water and carbon) exchange between organisms and their environment and the quantitative models that are used to represent these processes. Temperature, water, and wind, heat, mass, and radiative transport. Applications to animals, plants, and plant communities. Semester project required.

EnSci 508. GIS and Natural Resource Management. (Dual-listed with 408). (Cross-listed with AE). (2-1) Cr. 3. F. Prereq: Working knowledge of computers and Windows environment. Introduction to fundamental concepts and applications of GIS in natural resources management with specific focus on watersheds. Topics include: basic GIS technology; data sources; data management; spatial analysis; and modeling; visualization and display of natural resource data. Case studies in watershed and natural resource management using ArcView GIS. In addition to other assignments, graduate students will prepare research literature reviews on topics covered in class and develop enterprise applications.

EnSci 508i. Aquatic Ecology. (Cross-listed with la LL, NREM). Cr. 4. S. Prereq: Courses in ecology, chemistry, and biological science; emphasis on basic ecological principles; ecological theories tested in the field; identification of common plants and animals.

EnSci 509. Field Methods in Hydrogeology. (Dual-listed with 409). (Cross-listed with Geol). (4-0) Cr. 2. Alt. S., offered 2010. Prereq: Geol 100 or 201; Math 113. or C 470. Introduction to field methods used in groundwater investigations. In-field implementation of pumping tests, slug tests, monitoring well installation and drilling techniques, geochemical and water quality sampling, seepage meters, minipiezometers, stream gauging, electronic instrumentation for data collection, and geophysics. Field trips to investigate water resource, water quality, and remediation projects.

EnSci 511. Hydrogeology. (Dual-listed with 411). (Cross-listed with Geol). (3-2) Cr. 4. F. Prereq: Geol 100 or 201; Math 113 or C 470. Physical principles of groundwater flow, nature and origin of aquifers and confining units, well hydraulics, groundwater modeling, and contaminant transport. Lab emphasizes applied field and laboratory methods for hydrogeological investigations.

EnSci 515. Paleoclimatology. (Dual-listed with 415). (Cross-listed with Geol). (3-0) Cr. 3. Alt. S., offered 2011. Prereq: Four courses in biological or physical science. Introduction to mechanisms that drive climate, including the interchange between oceanic and atmospheric circulation and fluctuation in Earth’s orbital parameters. Examination and analysis of past climate records ranging from historical documentation to ecological and geochemical proxies (e.g. tree ring analysis) for elucidation of the provenance of physical, chemical, biological, and environmental processes. Effects of plant physiology, photosynthesis, trophic structure, diffusion, evaporation, chemical precipitation, soil and atmospheric processes, and environmental factors on isotopic abundance.

EnSci 519. Environmental Geochemistry. (Dual-listed with 419). (Cross-listed with Geol). (2-2) Cr. 3. F. Prereq: 511 or equivalent. Geochemistry of natural waters and water-rock interactions. Acid-base equilibria, carbonate-dissolution and buffer systems, mineral dissolution and precipitation, sorption, ion exchange, and redox reactions. Introduction to thermodynamics and kinetics. Laboratory emphasizes chemical analysis of waters and computer modeling.

EnSci 520. Environmental Engineering Chemistry. (Cross-listed with AE). (3-0) Cr. 3. F. Prereq: Cross-Listed 171 and 178; Math 166. Principles of chemical and physical phenomena applicable to the treatment of water and wastewater and natural waters; including chemical equilibria, reaction kinetics, acid-base equilibria, chemical precipitation, redox reactions and mass transfer principles. Individual laboratory practices and group projects required. Term paper and oral presentation for graduate level only.

EnSci 523. Physical-Chemical Treatment Process. (Cross-listed with C E). (2-2) Cr. 3. Prereq: C E 520. Material and energy balances. Principles and design of physical-chemical unit processes including screening, coagulation, flocculation, chemical precipitation, sedimentation, filtration, lime softening and stabilization, oxidation, adsorption, membrane processes, ion exchange and disinfection; recovery of resources from residuals and contaminants; design and demonstration; case studies in mineral processing and secondary industries. Individual and group projects required.

EnSci 524. Air Pollution. (Dual-listed with 424). (Cross-listed with A E, C E). (1-0) Cr. 1. Prereq: Either Phys 221 or Chem 175 and either Math 166 or 3 credits in statistics. Senior classification or above. 1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

EnSci 531. Design and Evaluation of Soil and Water Conservation Systems. (Cross-listed with AE). (3-0) Cr. 3. Prereq: C E 326. Planning and design of soil and water conservation systems; includes characterization and collection of domestic, commercial, and industrial solid wastes, waste minimization and recycling, energy and materials recovery, composting, incineration, and landfill design.

EnSci 532. Solid Waste Management. (Cross-listed with C E). (3-0) Cr. 3. Prereq: C E 326. Regulatorv requirements for the classification, transport, storage and treatment of hazardous wastes. Analysis and design of alternatives for treatment and disposal technologies, including physical, chemical, and biologic treatment, solidification, incineration, and secure landfill design. Regulatory requirements and procedures for hazardous waste contaminated site investigations and risk analysis. Analysis and design of remedial action alternatives for restoration.

EnSci 558. Laboratory Methods in Soil Chemistry. (Cross-listed with Agron.) (2-3) Cr. 3. Prereq. Agron 354 and Chem 178 or 211. Tabatabai. Experimental and descriptive inorganic and organic analyses. Operational theory and principles of applicable instruments, including spectrophotometry, atomic absorption and emission spectrosopy, mass spectrometry, X-ray diffraction and fluoroscopy, gas and ion chromatography, and ion-selective electrodes.

EnSci 559. Environmental Soil and Water Chemistry. (Dual-listed with 459.) (Cross-listed with Agron.) (2-4) Cr. 3. Prereq. Agron 361 or Chem 164, 165, or 178; Math 140. Chem 211 or 231 recommended. Thompson. An introduction to the chemical properties of soils, chemical reactions and transformation in soils and surface waters, and their impact on the environment. The chemistry of soils and surface waters, solid-phase composition of soils, reactions at the solid-solution interface, chemical-equilibrium speciation programs, and applications to contemporary environmental issues.

EnSci 563. Soil formation and Landscape Relationships. (Dual-listed with 463.) (Cross-listed with Agron.) (2-4) Cr. 4. S. Prereq. Agron 154 or 260. Sandoran. Relationships between soil formation, geomorphology, and environment. Soil description, classification, geography, mapping, and interpretation for land use. Credit for one of EnSci 563 or 563L may be applied for graduation.

EnSci 566. Wetland Ecology. (Cross-listed with EEOB.) (3-0) Cr. 3. S. Prereq: 15 credits in biological sciences. Ecology, classification, creation, restoration, and management of wetlands. Field studies will examine the compositional, structural and functional bowel of natural wetlands and restored prairie pothole wetlands. Individual or group projects.

EnSci 571. Surface Water Hydrology. (Cross-listed with C E). (3-0) Cr. 3. S. Prereq: C E 372 Analysis of hydrologic data including precipitation, infiltration, evapotranspiration, direct runoff and streamflow; theory and use of flash flood warning systems, weather and reservoir routing; use of deterministic and Statistical hydrologic models. Fundamentals of surface water quality modeling, point and non-point sources of contamination. Design project.

EnSci 574. Environmental Impact Assessment. (Cross-listed with C E). (3-0) Cr. 3. S. Prereq: Four courses in natural dynamics, biological engineering sciences and senior or above classification. Review of federal and state requirements for environmental impact assessment, requirements of the National Environmental Policy Act and Council on Environmental Quality, methods of evaluating the environmental impacts on the physical, biological, socioeconomic, cultural-historical, human health and psychological environments, public participation in EIIS, review and evaluate project environmental impact statements. An environmental impact assessment of a proposed project will be completed in small teams.

EnSci 575. Soil formation and Transformation. (Cross-listed with Agron.) (3-0) Cr. 3. S. Prereq. Agron 354 or 353. 2010. Prereq. 463 or equivalent. Advanced study of soil formation, emphasizing relationships among soils, landscapes, environment, humans, and land use.

EnSci 578. Laboratory Methods in Soil Physics. (Cross-listed with Agron.) (1-3) Cr. 1. S. Prereq. 577 concurrent. Horton. Methods of measuring soil physical properties such as texture, density, and water content, and transport of heat, water, and gases.

EnSci 579. Surficial Processes. (Dual-listed with 479) (Cross-listed with Agron) and Geol. 100 or 201 or equivalent experience. Study of surficial processes in modern and ancient geological environments. Topics include weathering, sediment transport, and landform genesis with emphasis on fluvial, glacial hillside, coastal, and coastal processes. Applications to engineering and environmental problems. Laboratory emphasizes aerial photo and topographic map interpretation.

EnSci 580. Engineering Analysis of Biological Systems. (Dual-listed with 480.) (Cross-listed with BSEI). (2-3) Cr. 3. F. Prereq: Agron 216, Math 266; Biol 211 or 212; ME 330. Systems-level engineering analysis of biological systems. Economic and life-cycle analysis of bioresource production and conversion systems. Global energy and resource issues and the role of biologically derived materials in dispelsing these issues. Students enrolled in EnSci 580 will be required to answer additional exam questions and report on two journal articles.

EnSci 584. Ecosystem Ecology. (Cross-listed with EEOB). (3-0) Cr. 3. S. Prereq: Combined 12 credits in biology and chemistry. Introduction to the structure and function of natural environmental systems. Systems approach to the analysis of material and energy flows in natural environmental systems and the primary environmental factors controlling these systems.

EnSci 585. Soil and Environmental Microbiology. (Cross-listed with 485.) (Cross-listed with Agron, Micro and 312 or 381). (3-0) Cr. 3. F. Prereq: EnSci 301 or 312 or 381 or 402. Structure and function of...
aquatic ecosystems with application to fishery and pollution problems. Emphasis on laustric, riverine and wetland ecology.

EnSci 587. Microbial Ecology. (Dual-listed with 487). (Cross-listed with EEOB, Micro). (3-0) Cr. 3. F. Prereq: Six credits in biology and six credits in chemistry. Introduction to major functional groups of autotrophic and heterotrophic microorganisms and their roles in natural systems.

EnSci 590. Special Topics. Cr. arr. Repeatable. F.S.S.S. Prereq: Permission of major professor in Environmental Science faculty. Literature reviews and conference in accordance with needs and interest of the student.

Courses for graduate students

Environmental Studies

www.envs.iastate.edu

(Interdepartmental Undergraduate Program)

William G. Crompton: Coordinator

Environmental Studies deals with the relationship and interactions between humans and the environment. Students in any college at ISU may elect to take a secondary major or minor in Environmental Studies. The curriculum is designed to give students an understanding of current and emerging environmental issues and an appreciation of different perspectives regarding these issues. Courses are provided for students pursuing careers related to the environment and for others who simply want to know more about environmental issues.

Secondary Major

The Environmental Studies secondary major is taken in addition to one’s first major and provides the breadth of preparation and integrated perspective necessary to understand environmental issues. Students seeking a major in Environmental Studies complete 24 credits of Env S coursework including (1) at least one general survey course chosen from Env S 101, 120, 173, and 201, (2) at least one integrative/issues course chosen from Env S 160, 204, 324, 342, 404, 424, and 450, and (3) at least two human/Societal perspectives courses chosen from Env S 293, 320, 334, 345, 355, 380, 382, 384, 442, 472, 482, 484, and 491. Beyond these three course requirements, any Environmental Studies course and up to six credits of approved departmental coursework may be applied toward the 24 credit total for the major. Regardless of their home college, Environmental Studies majors must complete 10 credits of approved coursework in natural science. Unless prohibited by program or college rules, courses used in the major may also be used to satisfy general education and other requirements of departments and colleges. A combined average grade of C or higher is required in courses applied to the major.

Regardless of their primary major, Environmental Studies graduates have a broad foundation in science and humanities, an understanding of major environmental issues, and an appreciation of the varied and sometimes opposing perspectives regarding these issues.

Minor

Students seeking a minor in Environmental Studies complete 15 credits of approved Environmental Studies coursework including (1) at least one general survey course chosen from Env S 101, 120, 173, and 201, (2) at least one integrative/issues course chosen from Env S 160, 204, 324, 342, 404, 424, and 450, and (3) at least two human/Societal perspectives courses chosen from Env S 293, 320, 334, 345, 355, 380, 382, 384, 442, 472, 482, 484, and 491. A combined average grade of C or higher is required in courses applied to the minor, and the minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Courses primarily for undergraduate students

Env S 101. Environmental Geology: Earth in Crisis. (Cross-listed with Geol). (3-0) Cr. 3. F. S. Prereq: An introduction to geologic processes and the consequences of human activity from local to global scales. Discussion of human population growth, resource depletion, pollution and waste disposal, global warming and ozone depletion, desertification, and geologic hazards such as earthquakes, landslides, flooding, and volcanism.

Env S 120. Introduction to Renewable Resources. (Cross-listed with Agron, NREM). (3-0) Cr. 3. F. S. Prereq: An overview of soil, water, plants, and animals as renewable natural resources in an ecosystem context. History and organization of resource management. Concepts of integrated resource management.

Env S 130. Natural Resources and Agriculture. (Cross-listed with NREM). (3-0) Cr. 3. S. Prereq: An introduction to the ecology and management of fish, forest, and wildlife resources in areas of intensive agriculture, with emphasis on land management practices for private agricultural lands. Designed for nonmajors.

Env S 173. Environmental Biology. (Cross-listed with Biol). (3-0) Cr. 3. S. Prereq: An introduction to the structure and function of biomes as they relate to the individual to the biosphere and the complex interactions between humans and their environment. Discussions of human population growth, biodiversity, sustainability, resource use, and pollution.

Env S 250. Environmental Geography. (Cross-listed with EnSci). (3-0) Cr. 3. F. Prereq: The distribution, origins and functions of the earth’s physical systems and the spatial relationship between human activity and the natural world.

Env S 293. Environmental Planning. (Cross-listed with C R P , Dsn S). (3-0) Cr. 3. F. Prereq: Sophomore classification. Comprehensive review of the field of environmental relationships and the efforts being made to organize, control, and coordinate environmental, aesthetic, and cultural characteristics of land, air, and water.

Env S 320. Ecofeminism. (Cross-listed with W S). (3-0) Cr. 3. F. Prereq: Women’s Studies. Emphasis on women’s roles in the earth’s physical systems and the spatial relationship between human activity and the natural world.

Env S 324. Energy and the Environment. (Cross-listed with Geol, Mteor). (3-0) Cr. 3. S. Prereq: Nonmajors. Thorough study of some of the central moral issues arising in connection with human impact on the environment, e.g., human overpopulation, species extinction, forest and wilderness management, pollution. Several world views of the proper relationship between human beings and nature will be explored. Nonmajor graduate credit.

Env S 342. World Food Issues: Past and Present. (Cross-listed with Agron, FS HN, T SCI). (3-0) Cr. 3. F. S. Prereq: Three credits in Philosophy or junior classification. Thorough study of some of the central moral issues arising in connection with human impact on the environment, e.g., human overpopulation, species extinction, forest and wilderness management, pollution. Several world views of the proper relationship between human beings and nature will be explored. Nonmajor graduate credit.

Env S 355. Literature and the Environment. (Cross-listed with Engli). (3-0) Cr. 3. F. S. Prereq: Literature 260. Study of literary texts that address the following topics, among others: the relationship between people and natural/urban environments, ecocriticism, and the importance of place in the literary imagination. Nonmajor graduate credit.

Env S 381. Environmental Systems: Introduction to Environmental Systems. (Cross-listed with Biol, EnSci). (3-0) Cr. 4. F. Prereq: 12 credits of natural science including Biology and chemistry.
Introduction to the structure and function of natural environmental systems. Systems approach to the analysis of material and energy flows in natural envi-
nronmental systems and the primary environmental factors controlling these systems. Nonmajor graduate credit.

Env S 382. Environmental Sociology. (Cross-listed with Soc.)(3-0) Cr. 3. F.S. Prereq: Soc 120, 134, or 3 credits of Env S. Environment-Society relations; social construction of nature and the environment; social and environmental impacts of resource extraction, production, and consumption; environmental inequality; environmental mobilization and movements; U.S. and international examples.

Env S 384. Religion and Ecology. (Cross-listed with Relig.)(3-0) Cr. 3. Introduction to concepts of religion and ecology as they appear in different religious traditions, from both a Historical and contemporary perspective, with attention to religious response to contemporary environmental issues. Nonmajor graduate credit.

Env S 390. Internship in Environmental Studies. Cr. arr. Repeatable. F.S.SS. Prereq: Approval of the Environmental Studies Coordinator. Practical experience with natural resource agencies, schools, private conservation groups, and other organizations. Satisfaction-fail only.

Env S 404. Global Change. (Cross-listed with Agron, EnSci, Mteor.)(3-0) Cr. 3. S. Prereq: Four courses in physical or biological sciences or engineering; junior standing. Recent changes in global biogeochemi-
cal cycles and climate; models of future changes in the climate system; impacts of global change on agriculture, water resources and human health; ethi-
cultural issues of global environmental change. Nonmajor graduate credit.

Env S 407. Watershed Management. (Cross-listed with EnSci, NREM). (3-0) Cr. 4. S. Prereq: A course in general biology. Managing human impacts on the hydrologic cycle. Field and watershed level best management practices for modifying the impacts on water quality, quantity and timing are discussed. Field project includes developing a management plan using landscape buffers.

Env S 424. Sustainable and Environmental Horticulture Systems. (Cross-listed with Hort). (2-0) Cr. 2. F. Inquiry into ethical issues and environmental consequences of Horticultural cropping systems and production practices. Emphasis on production systems that are resource efficient, environmentally sound, socially acceptable, and profitable.

Env S 442. The Policy and Politics of Coastal Areas. (Cross-listed with Pol Sl). (3-0) Cr. 3. SS. Exploration of political implications of coastal policy. Issues include: “Carrying capacity,” zoning, regulation of human de-
velopement activities, trade-offs between conservation and jobs, the quality of coastal lifestyle, ways in which citizens participate in policy for coastal areas.

Env S 450. Issues in Sustainable Agriculture. (Cross-listed with Agron). (3-0) Cr. 3. F. Zdorkowski. Agricultural science as a human activity; contem-
porary agriculture; agrobusiness; agroecological perspective. Comparative analysis of intended and actual consequences of development of industrial agricultural practices.

Env S 460. Controversies in Natural Resource Management. (Cross-listed with NREM). (3-0) Cr. 3. F.S. Prereq: 120, and A Ecol 312 or NREM 301, and Junior class standing. Focus on controversial natural resource issues using a case approach that considers uncertainty and adequacy of information and scientific understanding. Ecological, social, politi-
cal, economic, and ethical implications of issues will be analyzed. Nonmajor graduate credit.

Env S 461I. Introduction to GIS. (Cross-listed with EnSci, LA, Ia LL). Cr. 4. SS. Descriptive and predictive GIS modeling techniques, Spatial Statistics, and map algebra. Application of GIS modeling techniques to environmental planning and resource management. Nonmajor graduate credit.

Env S 472. U. S. Environmental History. (Cross-listed with Hist.)(3-0) Cr. 3. Prereq: Sophomore classification. Survey of the interactions of human communi-
ties with the North American environment. Focus on the period from prehistory to the present, with a particular concentration on natural resources, disease, settlement patterns, land use, and conservation pol-
cies. Nonmajor graduate credit.

Env S 482. Environmental Politics and Policies. (Cross-listed with Pol Sl). (3-0) Cr. 3. F. Prereq: Three credits in Political Science or 3 credits in Environ-
mental Studies, Junior classification. Major ideological orientations related to conservation and ecology. Processes, par-
ticipants, and institutions involved in state, national, and global environmental policymaking. Case studies of environmental controversies and proposals for policy reform. Nonmajor graduate credit.

Env S 484. Sustainable Communities. (Cross-listed with C R P Din S). (3-0) Cr. 3. Alt. S., offered 2011. Prereq: Senior classification. The History and theory of sustainable community planning. Procedural and substantive dimensions. Case studies of communities engaged in sustainability planning. Use and develop-
ment of indicators.

Env S 490. Independent Study. Cr. arr. Repeatable. F.S.SS. Prereq: Permission of instructor and approval of Environmental Studies coordinator. Satisfaction-fail only.

Env S 491. Environmental Law and Planning. (Cross-listed with C R P Din Sl). (3-0) Cr. 3. Prereq: Six credits in natural sciences. Environmental law and policy as applied in planning at the local and state level-
es. Brownfields, environmental justice, water quality, air quality, wetland and floodplain management, and local government involvement in ecological protection through land use planning and other programs.

Env S 496. Travel Course. Cr. arr. Repeatable. Prereq: Permission of instructor. Extended field trips to study environmental topics in varied locations. Location and duration of trips will vary. Trip expenses paid by stu-
dents. Check with department for current offerings.

A. International Tour
B. Domestic Tour

Family and Consumer Sciences

Master of Family and Consumer Sciences (M.F.C.S.)

The College of Human Sciences offers a nonthesis master's degree program that might appeal to individuals with a bachelor's degree in family and consumer sciences/home economics subject area or related disciplines. This program is considered to be a professional master's degree. For students interested in further graduate study beyond the M.F.C.S., the nonthesis degree program may mean additional requirements before completion of a Ph.D. or other terminal degree graduate program.

Students select either a comprehensive option or a specialization option. The comprehensive option can be followed on or off-campus and requires 36 credits covering a variety of family and consumer sciences subject matter. Off-campus courses are offered via the World Wide Web (WWW). Specializations are available in Nutrition; Dietetics; Human Development and Family Studies; Food-

care and Lodging Management; and Textiles and Clothing.

In addition, students may select a 42-credit specialization in Family Financial Planning (FFP), a 36-credit specialization in Gerontology or a 36-credit specialization in Dietetics. The FFP, Ger-

ontology, and Dietetics specializations, offered in collaboration with six to eight other universities in the Great Plains Interactive Distance Education Al-

lication, are offered exclusively through courses on the Web. The FFP program has been approved by the Board of Examiners of the Certified Financial Planner Board of Standards as a program with the competencies required to permit those complet-
ing the degree to sit for the CFP® Certification Ex-
amination. CFP® is a certification mark owned by the Certified Financial Planner Board of Standards.

The Program of Study committee, in consultation with the student, establishes the courses to be taken and the acceptability of transfer credits. The major professor is selected from the discipline in which the concentration of coursework will be taken. Written and oral final integrative examinations are required in lieu of a thesis or creative component. A thesis or creative component could be included on mutual agreement of the student and major professor, with approval of the Gradu-
ate College.

Admission requirements for the M.F.C.S include a bachelor's degree in a family and consumer sciences/home economics subject area or related disciplines, Graduate Record Examina-
tion (GRE) scores (not required for the FFP and Geron specializations), official transcripts, three letters of recommendation, a goal statement, and graduation in the upper one-half of class with a bachelor's degree from a regionally accredited U.S. institution or graduation in the upper one-half of class from a recognized foreign institution. Non-English speaking international students are required to have a TOEFL score of at least 550 at time of admission.

Graduate Certificates

An 18-credit graduate certificate in Family Finan-
cial Planning is offered for students who do not need a master's degree and want to obtain the educational requirements of the Certified Financial Planner Board of Standards CFP® Certification Examination.

A 21-credit graduate certificate in Gerontology is offered. For additional information, students should contact the Research and Graduate Education Office, E262 Lagomarcino, Ames, Iowa 50011-3191, mfcsinfo@iastate.edu

Family and Consumer Sciences Education and Studies

(Administrated by the Department of Apparel, Educa-
tional Studies and Hospitality Management.)

Robert Bosselman, Interim Chair of Department
Distinguished Professors (Emeritus): Fanslow, Moyer, Winakor

University Professors (Emeritus): Farrell-Beck

Professors: Bosselman, Damhirst, Fiore, Kadolph

Professors (Emeritus): Anderson, Beavers, Brun, Burnet, Cowan, Crabtree, Gilmore, Smith, Stone, Williams

Associate Professors: Baltzer, Hausafus, Niehm, Parsons

Associate Professors (Emeritus): Amos, Brackets-

berg, Brown, Ebert, Hiss, Kundel, Kunz, Walsh

Associate Professor (Adjunct): Stroehbhn

Assistant Professors: Barker, Hurst, Karpova, Keino, Y. Lee, Marchetti, Rajagopal, Woehlendorf-Arendt, Zheng

Assistant Professor (Adjunct): Glock

Instructor (Adjunct): Fratzke

Lecturers: Ackerman, Burger, Christensen, Fihtr, Fitz-

patrick, Kramer, M. Lee, Sanger, Trost, Wirth, Wise
Undergraduate Study
The program offers one curriculum for the bachelor of science degree in Family and Consumer Sciences Education and Studies. Students in the curriculum choose one of three options, Teacher Licensure, Communications, or Professional Studies. Graduates of the teacher licensure option teach in general and occupational programs of family and consumer sciences in middle, junior, and senior high schools. Graduates of the Communications option have a broad-based knowledge of family and consumer sciences and the ability to communicate in a global and technologically changing society. They are able to plan, develop, creatively present and evaluate information. Graduates of the Professional Studies option pursue individualized career goals in family and consumer sciences that apply integrative knowledge of family and consumer sciences in diverse careers for global settings.

Admission to all three options is initiated in the course FCEdS 206. In addition, students in Teacher Licensure follow program and university procedures for admission to the university teacher education program. This program option is approved by the Iowa Department of Education for the preparation of career and technical education family and consumer sciences teachers. Every teacher licensure student must demonstrate achievement of the identified teacher licensure standards. Standards will be assessed in all core courses including FCEdS 206, 214, 280, 306, 318, 403, 413, and 418 for additional teacher education requirements, see Teacher Education.

Graduates in Family and Consumer Sciences Education and Studies have a broad understanding of individual and family well-being. Graduates apply knowledge of family and consumer sciences content in global professional settings. They use research findings to improve the well-being of individuals, families, and communities. Due to the integrative and synergistic nature of family and consumer sciences, graduates address and act on complex problems confronting individuals, families, and communities.

Opportunities are available for obtaining a minor from other programs through careful selection of elective credits and consultation with an adviser. For example, students pursuing the Communications and Professional Studies options are encouraged to consider obtaining a minor in journalism and mass communications or in one of the subject matter areas of family and consumer sciences such as family finance, housing, and policy. They also are encouraged to enhance their program by electing relevant additional courses in their area of interest. Students in the Teacher Licensure option may choose to add an additional endorsement such as Health Education or Coaching Intercollegiate Athletics.

The program offers a minor in family and consumer sciences education. The minor is earned by successfully completing 15 credits including FCEdS 206, 306, 415, and 418. See program for details.

Communication Proficiency Requirement: C or better in Engl 150 and 250.

Graduate Study
The program offers work for the degrees master of science, master of education, and doctor of philosophy, each with the major, family and consumer sciences education. The M.S. degree requires a thesis; the M.Ed. degree requires a creative component; the Ph.D. requires a dissertation. Minors are available. The Family and Consumer Sciences Education Leadership Academy provides opportunity for completion of a graduate degree through condensed summer courses and distance education delivery. For additional information see http://www.aeshm.hs.iastate.edu/academy/.

Programs for advanced degrees with a major in family and consumer sciences education are tailored to fit the educational background, experience, and professional goals of the student. Areas of study provided by the department include program planning, curriculum, evaluation, research methods, supervision and administration, international education and development, and teacher education. Opportunities are available for strengthening one’s background in subject matter in other programs in the College of Human Sciences.

Students who complete a graduate program are professional family and consumer sciences educators and teacher educators who foster program planning, implementation, and evaluation at state, national, and international levels. They are producers and disseminators of research and scholarship in family and consumer sciences education and are leaders in programs and services for clientele in diverse settings.

Courses primarily for undergraduate students

FCEdS 110. Orientation. Cr. 1-0) Cr. arr. F.S. Orientation to the university, the college, and the college curricula. Adjustment to the university; discussion of student responsibilities; interpersonal, critical thinking, and study skills; and management of time and energy. Development of a long-term curriculum plan. Satisfactory-fail only.

FCEdS 206. Professional Roles in Family and Consumer Sciences. (2-3) Cr. 3. F. Historical development of family and consumer sciences. Overview of various roles in professional settings, e.g., community agencies, secondary schools, business and industry, Cooperative Extension. Completion of a 20-hour practicum in an educational setting.

FCEdS 280. Pre-Student Teaching Experience in Family and Consumer Sciences Education. (0-2) Cr. arr. Repeatable. F.S. Prereq: Admission to teacher education. Laboratory experience in foods, textiles and consumer sciences programs for school settings. Procedures for grading, interpreting, and reporting assessment data.

FCEdS 306. Educational Principles for Family and Consumer Sciences. (2-0) Cr. 3. F. Prereq: 15 credits in family and consumer sciences subject matter; enrollment in Sp Ed 450. Principles of teaching and learning applied to family and consumer sciences content. Instructional methods appropriate for formal and nonformal educational settings. Specific strategies for diverse audiences. May be used for family life certification.

FCEdS 318. Occupational, Career and Technical Programs. (Dual-listed with 518). (2-0) Cr. 2. S. Prereq: 206 and 400 hours work experience in a family and consumer sciences related job. Planning and implementing programs in occupational family and consumer sciences including FCSLA, social impact of selected legislation on family and consumer sciences programs. Techniques for cooperative education, school-to-work, and work-based education programs. May be used toward Multi-Occupation Cooperative endorsement.

FCEdS 403. Learner Assessment for Family and Consumer Sciences Programs. (2-2) Cr. 3. S. Prereq: Enrollment in 413. Philosophy of learner assessment. Development and critique of tests and authentic assessment tools to measure cognitive, affective, and psychomotor learning and to evaluate processes, performances, products, and dispositions. Procedures for grading, interpreting, and reporting assessment data.

FCEdS 415. Program Planning and Evaluation in Family and Consumer Sciences. (3-3) Cr. 3. S. Prereq: 15 credits in Family and Consumer Sciences subject matter. Program development principles including needs analysis, planning, instruction, promotion, evaluation, grant writing and reporting. Approaches appropriate for diverse groups. Environmental and cultural conditions affecting programs. Nonmajor graduate credit.

FCEdS 417. Supervised Teaching in Family and Consumer Sciences. Cr. arr. Repeatable. F.S. Prereq: 413, 24 credits in family and consumer sciences subject matter, cumulative grade point of 2.50, full admission to teacher education. Supervised teaching experience in secondary schools. Examination of ways to implement actions that reflect professional philosophy of family and consumer sciences for teaching middle and high school level students. Reservation required.

A. Vocational family and consumer sciences. Cr. B. B. Family and consumer sciences. Cr. 3 to 8.

FCEdS 418. Supervised Experiences in a Professional Setting. Cr. arr. Repeatable. F.S.S.S. Prereq: 24 credits in family and consumer sciences. Supervised professional experience in an approved setting such as Cooperative Extension, business, community, human service, or government agency. Reservation required.

A. Communications. Prereq. 415, 24 credits in family and consumer sciences.

B. Professional Studies. Prereq. 421, 24 credits in family and consumer sciences.

FCEdS 460. Capstone Seminar. (1-0) Cr. 1. S. Prereq: senior classification in Family and Consumer Sciences Education and Studies. Ways professionals work across disciplines to address contemporary social issues that affect individuals and families. Methods to initiate public policy at the local, national, and international levels. Transition from student to professional role.

FCEdS 490. Independent Study. Cr. arr. F.S.S.S.

A. Adult Education

C. Curriculum

D. Evaluation

E. Cooperative Extension

G. General

H. Honors

I. International

K. Occupational Education

N. Leadership and Human Relations

P. Special Needs/Mainstreaming

R. Vocational Education

S. Technology and Distance Education
Courses primarily for graduate students, open to qualified undergraduate students

FCEdS 504. Intellectual Foundations of Family and Consumer Sciences Leadership. (3-0) Cr. 3. F. Prereq: Graduate classification. Exposure to a variety of selected readings that provide an intellectual foundation and framework for the family and consumer sciences profession. Connects the historical and Philosophical structure of the profession with perspectives leading to innovative professional action.

FCEdS 506. Curriculum Development in Family and Consumer Sciences. (3-0) Cr. 3. Alt. SS., offered 2011. Analysis and development of family and consumer sciences curriculum related to Philosophy, design and adaptability within public education programming as influenced by subject matter, professional, national and state educational standards and legislation.

FCEdS 507. Program Development in Family and Consumer Sciences. (3-0) Cr. 3. SS. Prereq: Professional experience in family and consumer sciences or related area. Application of principles of program development to formal and nonformal educational settings, e.g., secondary school family and consumer sciences programs, training positions in business, Cooperative Extension, human Services agencies.

FCEdS 508. Models for Teaching Family and Consumer Sciences. (3-0) Cr. 3. S. Prereq: 6 credits in family and consumer sciences. Selecting teaching strategies and instructional materials based on theories of learning and human development that reflect a professional Philosophy of family and consumer sciences. Application to formal and nonformal educational settings with diverse audiences.

FCEdS 511. Research Methods. (3-0) Cr. 3. F. Prereq: Graduate classification. An overview of diverse research approaches for collecting and analyzing quantitative and qualitative data. Critique of research reports and development of research proposals.

FCEdS 515. Assessment in Family and Consumer Sciences. (3-0) Cr. 3. Alt. SS., offered 2010. Prereq: Introductory Statistical and program development skills. Role of assessment in family and consumer sciences education programs. Planning and constructing test items and other assessments of school and nonschool learning.

FCEdS 518. Occupational, Career and Technical Programs. (Dual-listed with 318) (2-0) Cr. 2. S. Prereq: 400 hours work experience in a family and consumer sciences related job. Planning and implementing programs in occupational family and consumer sciences including FCCLA. Impact of selected legislation on family and consumer sciences programs. Techniques for cooperative education, school-to-work, and work-based education programs. Critique of national occupational competency standards. May be used toward Multi-Occupation Cooperative endorsement.

FCEdS 519. Reflective Human Action Leadership. (2-0) Cr. 2. Alt. SS., offered 2011. Examination of the meaning and qualities of reflective human action. Analysis of the roles that reflective human action plays in Society, the profession, and family life. Critically and imaginatively address social needs, identify meaningful leadership opportunities and engage in worthwhile actions that benefit individuals, families and communities.

FCEdS 520. Supervision in Family and Consumer Sciences Programs. (3-0) Cr. 3. Alt. SS., offered 2011. Prereq: Professional experience or 6 credits in family and consumer sciences. Examination of change, communication and leadership theories as related to supervision. Application of conferencing techniques, observation skills, and performance evaluation to professional leadership positions in educational settings.

FCEdS 521. International Perspectives of Family and Consumer Sciences. (3-0) Cr. 3. Alt. SS., offered 2010. Prereq: 6 credits in family and consumer sciences from an international perspective; focus on the roles and responsibilities of women in development. Application and adaptation of content to working with families in other countries and cultures. Student participation in cultural activities and critique of international research articles.

FCEdS 524. International Study Abroad Seminar. Cr. arr. Repeatable. F.S.S.S. Orientation to study abroad program considering topics related to country and location; travel arrangements and preparation for study abroad; on-site fieldwork and academic experiences in an international setting. Individually-developed research project on a topic related to study abroad.

FCEdS 593. Workshop. Cr. arr. Repeatable. F.S.S.S. Prereq: 6 credits in family and consumer sciences or education. Concentrated group study of new developments in family and consumer sciences education. Sections offered will vary from year to year.

FCEdS 599. Creative Component. Cr. arr. Prereq: 9 graduate credits in Family and Consumer Sciences Education.

Courses for graduate students

FCEdS 618. Coordination of Educational Programs in Family and Consumer Sciences. (2-0) Cr. 2. Alt. SS., offered 2011. Prereq: 520. Approaches to coordination of family and consumer sciences programs in adult education, extension, state department of education, and teacher education. Study of undergraduate programs in family and consumer sciences education, observation and participation in undergraduate courses, and practicum experience.

FCEdS 626. Advanced Research Methods in Family and Consumer Sciences. (3-0) Cr. 3. Alt. SS., offered 2011. Prereq: 511. Examination of various modes of inquiry used to conduct research in educational and social areas culminating in development of a research project. Empirical/analytic, interpretive and critical/post-modern inquiries in relation to human context will be discussed.

Family Financial Planning

www.hs.iastate.edu/online/mfcs/ffp/
(Institutional Graduate Program)

Participating Faculty:
Iowa State University
College of Human Sciences
Pat Swanson, pswanson@iastate.edu

Kansas State University
College of Human Ecology
John Grable, grable@humeck.ksu.edu
Esther Maddux, emaddux@humeck.ksu.edu
Courses primarily for graduate students

- **FFP 520. Family Systems.** (3-0) Cr. 3. FS. Research and theory relating to functions functioning through the life cycle, especially financial decision making during crisis and conflict. Emphasis on factors that shape family values, attitudes, and behaviors from a multicultural perspective. New and emerging issues critical to family functioning are addressed.

- **FFP 525. Family Economics.** (3-0) Cr. 3. SS. Major issues related to the economics of families including household production, and human capital development; the economics of crises, public policy and family life cycle spending, saving and borrowing; and new and emerging issues in the field of family economics; special attention to the role of ethics in family economic issues. A theoretical and research perspective are used to illuminate the concepts in the course.

- **FFP 530. Fundamentals of Family Financial Planning.** (3-0) Cr. 3. F. The nature and functioning of financial systems, including currencies, money, money and fiscal policy, and supply/demand for land, labor, and capital. Focus is on the impact of global financial interdependence on individuals and families in the U.S. Current and emerging issues, as well as current research and theory relative to financial systems.

- **FFP 535. Financial Counseling.** (3-0) Cr. 3. S. Theory and research relating to counseling relationships between the client and the practitioner, including communication techniques, motivation and esteem building, the counseling environment, ethics, and methods of data intake, verification, and analysis. Other topics include legal issues, uses of technology to identify resources, information management, and current or emerging issues.

- **FFP 540. Estate Planning for Families.** (3-0) Cr. 3. S. Fundamentals of the estate planning process, including estate settlement, estate and gift taxes, property ownership and transfer, and powers of appointment. Tools and techniques used in implementing an effective estate plan, ethical considerations used in providing estate planning services, and new and emerging issues in the field. Case studies provide experience in developing estate plans suitable for varied family forms.

- **FFP 541. Housing and Real Estate in Family Financial Planning.** (Cross-listed with HD FS). (3-0) Cr. 3. SS. www only. The role of housing and real estate in the family financial planning process, including taxation, mortgages, financial calculations, legal concerns, and ethical issues related to home ownership and real estate investments. Emphasis on emerging issues in the context of housing and real estate.

- **FFP 545. Retirement Planning, Employee Benefits, and the Family.** (3-0) Cr. 3. F. Study of micro and macro considerations for retirement planning. Survey of various types of retirement plans, ethical consideration in providing retirement planning services, assessing and forecasting financial needs in retirement, and integration of retirement plans with government benefits.

- **FFP 555. Insurance Planning for Families.** (3-0) Cr. 3. S. In-depth study of risk management concepts, tools, and strategies for insurance, including life insurance; property and casualty insurance; liability insurance; accident, disability, health, and long-term care insurance; and government-subsidized programs; and ethical considerations related to risk management. Case studies provide experience in selecting insurance products suitable for individuals and family study of investment options for clients, including common stocks, fixed income securities, mutual funds, real estate, and related issues. Relationships between investment options and employee/employer benefit plan choices. Current and emerging issues and ethics are included.

- **FFP 585. Personal Income Taxation.** (3-0) Cr. 3. F. In-depth information on income tax practices and procedures including tax regulations, tax return preparation, the tax audit processes, the appeals process, preparation for an administrative or judicial forum, and ethical considerations of taxation. New and emerging issues related to taxation. Family/individual case studies provide practice in applying and analyzing tax information and recommending appropriate tax strategies.

- **FFP 570. Professional Practices in Financial Planning.** (3-0) Cr. 3. S. Challenges of managing financial planning practices including, but not limited to: business valuation, personnel, marketing, client services, ethics and technological applications. Relying both on a theoretical as well as an applied approach, students analyze case studies that provide relevant, practical exposure to practice management issues, with a strong emphasis on current research findings.

- **FFP 583. Investing for the Family’s Future.** (Cross-listed with HD FS). (3-0) Cr. 3. F. Prereq: HD FS 483. Evaluation of investment markets for the household. Analysis of how families choose where to put their savings. Emphasis is on using the family’s overall financial and economic goals to help inform investment choices.

- **FFP 591. Practicum.** Cr. arr. F.S.SS. Supervised experience in family financial planning.

- **FFP 595. Financial Planning - Case Studies.** (3-0) Cr. 3. F.S.S. Prereq: FFP 530, 540, 545, 555, 565, 583. Professional issues in financial planning, including ethical considerations, regulation and certification requirements, communication skills, and professional responsibility. Students are expected to utilize skills obtained in other courses and work experiences in the completion of personality finance case studies, the development of a targeted investment policy, and other related financial planning assignments.

### Finance

- **Marvin Bouillon**, Chair of Department
- **University Professor:** Power
- **Professors:** Carter, Cowan, Hayes, Stover
- **Associate Professors:** Campbell, Dark, Sapp
- **Assistant Professors:** Borisova, Flores, Porter, Yunus
- **Lecturers:** Hoff, Mccullough, Nappinnai, Premkumar

#### Undergraduate Study

For undergraduate curriculum in business, major in finance, see **College of Business, Curricula**. In addition to the basic business requirements, finance majors must also complete: (1) Fin 310, 320; (2) select four from Fin 330, 361, 371, 380, 415, 424, 425, 427, 445, 462, and 472 of which two must be at the 400 level; and (3) select one from Acct 393, 398, 397 and 400-level accounting course or Finance courses listed in (2) above. Statistics 326 is highly recommended to be taken prior to Fin 310 and Fin 320. Statistics 326 is required for Fin 380 and 400 level finance courses. The courses in finance constitute a broad program of study designed to provide a descriptive, behavioral, and analytical background of financial management to enable students to qualify for opportunities in financial management, insurance, brokerage, government, real estate, and financial management of business enterprises. Finance is also an excellent area for those who wish to become more knowledgeable as consumers, particularly in the fields of investments, insurance, and real estate.

Areas of study in the field of finance include financial management, corporate financial control, investment banking and analysis, risk management, real estate, and financial services. Upper-level courses include a review of contemporary literature in the field, case studies, and financial problem analysis integrating finance courses previously taken.

The instructional objective of the Finance program is to provide a well-rounded professional education in finance. Such education should provide the student with: (1) a mastery of basic financial concepts and methods of analysis; (2) an
understanding of financial operations in a global setting and of the role of financial institutions in the economics system; (3) an ability to effectively communicate and work with others as the finance member of a team; (4) an ability to demonstrate leadership capabilities in financial analysis and portfolio management.

The department also offers a minor for non-Finance majors in the College of Business. The minor requires 15 credits from an approved list of courses, of which 9 credits must stand-alone. Students with declared majors have priority over students with declared minors in courses with space constraints.

Graduate Study

The department participates in the M.B.A full-time and part-time programs. The M.B.A. program is a 48-credit, nonthesis, noncore component curriculum. Twenty four of the 48 credits are core courses and the remaining 24 are graduate electives. Within the M.B.A. program, students may develop an area of specialization in finance. This specialization requires that 12 of the 24 credits of the graduate electives be from an approved list of graduate finance courses.

Courses primarily for undergraduate students

Fin 301. Principles of Finance. (3-0) Cr. 3. F.S.SS. Prereq: Acc 284, Econ 101, Stat 228. Introduction to financial management with emphasis on corporate financing and investment decision making, time value of money, asset valuation, capital budgeting decision methods, cash budgeting, and financial markets.

Fin 310. Corporate Finance. (3-0) Cr. 3. F.S.SS. Prereq: 301. Theory used in a firm's investment and financing decisions. Analysis of environment in which financial decisions are made, applications of analytical techniques to financial management problems.

Fin 320. Investments. (3-0) Cr. 3. F.S.SS. Prereq: 301. Introduction to various investment media and markets from the viewpoint of the individual investor. Emphasis on mechanics of trading, behavior of security prices, corporate stocks and bonds, mutual funds, individual asset and portfolio selection techniques, and performance evaluation.

Fin 327. Fixed Income Securities. (3-0) Cr. 3. Prereq: 301, Stat 326. Valuation of fixed income securities, including pricing conventions, term structure of interest rates, default, duration, and hedging of interest rate risk. Analysis of active and passive investment strategies for managing fixed income portfolios. Nonmajor graduate credit.

Fin 330. Financial Markets and Institutions. (3-0) Cr. 3. F.S. Prereq: 301. Introduction to the structure and operations of the United States financial system and its markets and institutions. Emphasis on developing and integrated understanding of markets and financial service providers including global linkages.

Fin 361. Personal Risk Management and Insurance. (3-0) Cr. 3. F.S. Prereq: Econ 101. Risk concepts and the use of insurance to protect individuals and families. Emphasis on the insurance mechanism and methods of dealing with insurance, property, and liability risks.

Fin 371. Real Estate Principles. (3-0) Cr. 3. SS. Prereq: Econ 101. Legal, economic, social and financial aspects of real estate, including property rights, contracts, mortgage instruments, tax factors, brokerage, valuation, risk and return analysis, financing techniques, and investments.

Fin 415. Business Financing Decisions. (3-0) Cr. 3. Prereq: 301 and Stat 326. In depth study of the firm's external financing decision. Emphasis on the development of cash flow statements, projected financing needs and the selection of the appropriate financing instrument. Focus on case studies and application of developed techniques on actual field project. Nonmajor graduate credit.

Fin 424. Financial Futures and Options. (3-0) Cr. 3. Prereq: 320 and Stat 326. Advanced study of the pricing and use of derivative market instruments, current topics and issues. Nonmajor graduate credit.

Fin 425. Security Analysis and Portfolio Management. (3-0) Cr. 3. F.S. Prereq: 320, Stat 326 and permission of instructor. Advanced study of security analysis, security structure, selection techniques, and portfolio management. Emphasis on the applications of methods learned via the selection and evaluation of a portfolio of actual securities purchased in securities markets in the U.S. or abroad. Tracking and periodic reporting of the portfolio's performance relative to standard benchmarks is also required.

Fin 428. Advanced Fixed Income Analysis and Portfolio Management. (3-0) Cr. 3. Prereq: 327, 320, Stat 326 and permission of the instructor. Advanced analysis of fixed income markets and securities, including valuation of securities, corporate bonds, mortgage backed securities. Students are also required to manage a fixed income portfolio for an institutional investor. A top-down approach to portfolio management is assumed, with active beta taken on market direction, duration, yield curve, and credit spreads. Nonmajor graduate credit.

Fin 462. Corporate Risk Management and Insur- ance. (3-0) Cr. 3. F. Prereq: 301 and Stat 326. Analysis of an organization's approaches to the management of price risk, and pure risk. Emphasis on the consideration and selection of risk control and financing treatments and the decision making framework underlying the alternatives selected. Covers commercial insurance, self-insurance, and alternative financing arrangements. Nonmajor graduate credit.

Fin 472. Real Estate Finance. (3-0) Cr. 3. Prereq: 301 and Stat 326. Introduction to the techniques of assessing the value of real estate and real estate financing instruments. Nonmajor graduate credit.

Fin 480. International Finance. (3-0) Cr. 3. F.S. Prereq: 301 and Stat 326. Advanced study of contemporary topics and issues in international finance.

Fin 499. Finance Internship. (3-0) Cr. arr. F.S.SS. Prereq: GPA 2.5; permission of internship coordinator; Prereq: 327, 320, Stat 326 and permission of the instructor. Study of the financial and investment environment. Nonmajor graduate credit.

Courses primarily for graduate students, open to qualified undergraduate students

Fin 505. Financial Valuation and Corporate Financial Decisions. (2-0) Cr. 2. Prereq: Graduate classification, capital structure, dividend and merger acquisition decisions. Emphasis on the objective of the course is to examine different firm settings and establish a framework within which to apply financial tools.

Fin 520. Investments. (3-0) Cr. 3. Prereq: 505. A comprehensive survey of the classical and contemporary theories of optimum portfolio construction; determinants of risk-return trade-off in selection of securities; emphasis on the theory and evidence of efficient capital markets and implications for security selection and portfolio management.

Fin 534. Financial Derivatives. (3-0) Cr. 3. F. Prereq: Graduate classification. An applied course in derivative markets. Topics covered include futures and options markets, option pricing, swaps, use and rating of insurance products, and alternative forms of reinsurance. Emphasis will be placed on agricultural commodity markets, but energy, interest, currency and stock index contracts will also be covered.

Fin 572. Real Estate Finance. (3-0) Cr. 3. Prereq: MBA Core. Survey of techniques for assessing the value of real estate assets. Introduction to real estate financing instruments, their use and appropriateness.

Fin 590. Special Topics. Cr. arr. Repeatable. F.S.SS. Prereq: Permission of instructor. For students wishing to do individual research in a particular area of finance.

Food Science and Human Nutrition

www.fshn.hs.iastate.edu

Ruth MacDonald, Chair of Deartment

Distinguished Professors: Birt, Sebranek

Distinguished Professors (Emeritus): N. Jacobson, Roderuck

University Professors: Murphy, P. White, Wilson

University Professors (Emeritus): Glatz, Hammond, Parrish

Professors: Alekli, Hendrich, Hurburgh, Jane, L. Johnson, Macdonald, Nikolai, Prusa, Rimmel, Rob- son, Sharp, Spurlock, Svendsen, Wurtele

Professors (Emeritus): Dupont, Garcia, Kaplan, Kraft, Lagrange, Mcmillan, Runyan, Rust, Schafer, Stremmer, Swan, Topel, Walker

Professor (Collaborator): Pommet

Associate Professors: Boyliston, Campbell, Ford, Love, Mendoza, Reddy, Schalinske, Wang, W. White

Associate Professors (Emeritus): Bohnenkamp, Madden, McComber, Oakland

Associate Professor (Collaborator): Marquis

Assistant Professors: Beatie, Brehm-Stecher, Hollis, Jung, Lamsal, Lanningham-Foster, Litchfield, Rowling

Assistant Professors (Collaborators): Beauvais, Klucinec, Lopes, Parrish, Spurlock, Svendsen, Wurtele

Senior Clinician: Anderson

Clinicians: Barclay, J. Johnson

The Department of Food Science and Human Nutrition is jointly administered by the College of Agriculture and Life Sciences and the College of Human Sciences. All curricula offered by the department are available to students in either college. These curricula include culinary science,
The department offers work for the degrees master of science and doctor of philosophy with majors in food science and technology and in nutritional sciences, and minors in food science and technology and in nutrition. Graduate work in meat science is offered as a co-major in animal sciences. Students who would like to be better prepared for employment in agricultural, medical, and veterinary medical agencies and with state, national and international businesses.

Food Science and Human Nutrition

The department offers work for minors in food science and in nutrition and participates in the interdepartmental minor in food safety. See department office or web site for requirements: www.fshn.hs.iastate.edu/ugrad/ugminors.php.

Food Safety Minor

Patricia A. Murphy (Coordinator)

The Interdepartmental food safety minor is designed to provide undergraduate students with exposure to the principles of food safety to complement their current major and offer new opportunities for their future careers. Depending on the student’s major, the minor enhances the student’s expertise in food safety issues pertinent to the student’s major. Student learning outcomes include: awareness of food safety issues as they appear in each step of the food chain; ability to analyze a situation, identify food safety problems, use resources to gain additional information; develop a procedure or solution to identified problems; examine proposed solutions for viability and effectiveness; and to be able to speak and write about food safety issues. Students with a food safety minor are better prepared for employment in agricultural, medical, and veterinary medical agencies and with state, national and international businesses.

The food safety minor requires 15 credits of coursework with 9 credits from 3 core courses and elective courses to supplement the training in the minor. See approved list for minor courses at www.fshn.hs.iastate.edu/ugrad/ugminors.php.

Postbaccalaureate Program

The dietetic internship program has received initial accreditation from the American Dietetic Association. For more information, refer to Special Interests Programs listed under the College of Human Sciences or visit the website at www.dietetics.iastate.edu. There is a nonrefundable application fee of $75 and a program fee of $500 payable upon acceptance into the program.

Graduate Study

The department offers work for the degrees master of science and doctor of philosophy with majors in food science and technology and in nutritional sciences, and minors in food science and technology and in nutrition. Graduate work in meat science is offered as a co-major in animal sciences. Students who would like to be better prepared for employment in agricultural, medical, and veterinary medical agencies and with state, national and international businesses.

Students taking major work for the degree doctor of philosophy either in food science and technology or in nutritional sciences may choose minors from other fields including anthropology, chemistry, biochemistry, economics, education, journalism, microbiology, psychology, physiology, sociology, statistics, toxicology, or other related fields.

The interdepartmental graduate program in nutritional sciences, administered through the Graduate College, under the auspices of the Chairs of FSHN and Animal Science, will provide the structure for coordinating and enhancing interdisciplinary nutrition research and graduate education. Graduate students will be able to select from three specializations: animal nutrition, human nutrition, or molecular/biochemical nutrition.
The two main departments are FSHN and Animal Science, whereas other departments (such as Kinesiology; Biochemistry, Biophysics, and Molecular Biology; Agronomy; Sociology; and Statistics) may also be involved. (See Nutritional Sciences interdepartmental graduate major.) The department offers an online Graduate Certificate in Food Safety and Defense, in conjunction with the University of Nebraska, Lincoln, Kansas State University, North Dakota State University, Oklahoma State University, South Dakota State University, University of Kansas Medical Center, and University of Nebraska through the Great Plains Interactive Distance Education Alliance. Students eligible for admission to the food science master’s degree program may be admitted. The department participates in an online Masters of Family and Consumer Sciences/Dietetics in conjunction with Colorado State University, Kansas State University, North Dakota State University, Oklahoma State University, South Dakota State University, University of Kansas Medical Center, and University of Nebraska through the Great Plains Interactive Distance Education Alliance. Students who are registered dietitians and are eligible for admission to the FSHN Master’s degree program may be admitted. The department, in conjunction with the Hotel, Restaurant, and Institution Management department, offers three dietetics certificates of 12 credits each and participates in the master of family and consumer sciences with a dietetics specialization. The certificate program meets continuing education requirements of The American Dietetic Association for advanced preparation in communication and counseling, dietetics management, and medical nutrition therapy. The graduate certificate courses may be applied to the master of family and consumer sciences - dietetics specialization. These programs are open only to registered dietitians. A second master of family and consumer sciences specialization, offered in the area of nutrition, does not require certification as a registered dietitian for admittance. Those interested in these programs should contact the department for details. The department offers work for concurrent B.S. and M.S. degree programs that can be completed in 5 years. The programs are open only to registered dietitians. Students interested in these programs should contact the department for details. Application for admission to the Graduate College should be made during the junior year. Students begin research for the M.S. thesis during the summer after their junior year and are eligible for research assistantships. Students graduating with advanced degrees in nutritional sciences and in food science and technology will demonstrate competency in their chosen discipline. Measurable outcomes will include the ability to: 1) design, conduct, and interpret research; 2) apply theoretical information to solve practical problems; 3) prepare and communicate discipline-specific information in written and oral forms to scientific and lay audiences; 4) facilitate learning in the classroom; 5) submit a paper for publication in a peer-reviewed journal; and 6) secure professional-level positions in academia, industry, government, or health care.

Courses primarily for undergraduate students

FS HN 101. Food and the Consumer, (3-0) Cr. 3.
FS. Prereq: High school biology and chemistry, or 3 credits each of biology and chemistry. The food system from point of harvest to the consumption of the food by the consumer. Properties of food constituents. Problems of food against deterioration and microbial contamination. Introduction of foods into the marketplace. Processes for making various foods. Government regulations. Use of food additives. Current and controversial topics. Electronic communication from web emphasized for class reports, notes and assignments.

FS HN 104. Introduction to Professional Skills in Culinary Science, (0-6) Cr. 1. S. Introduction to culinary science. Students will develop fundamental culinary skills by arranged on-campus work experience (100 hours). Sessions with instructor arranged.

FS HN 110. Professional and Educational Preparation, (1-0) Cr. 1. FS. Introduction to professional and educational development within the food science and human nutrition disciplines. Focus is on university and career acclamation, enhancement of communication skills, and portfolio development. Satisfactory-fail only.

FS HN 112. Orientation to Learning and Productive Team Membership, (Cross-listed with NREM, Aer E, Hort, TSM). (2-0) Cr. 2. F. Introduction to developing intentional learners and worthy team members. Learning as the foundation of human enterprise; intellectual curiosity; ethics as a personal responsibility; evaluation of self and others; team learning and the effects on individuals; and growth through understanding self, demonstrating ownership of own learning, and internalizing commitment to helping others. Intentional mental processing as a means of enhancing performance. Interconnectedness of the individual, the community, and the world.

FS HN 114. Developing Responsible Learners and Effective Leaders, (Cross-listed with Hort, NREM, TSM). (2-0) Cr. 2. S. Focus on team and community. Application of human learning; evidence of development as a responsible learner; intentional mental processing as a habit of mind; planning and facilitating learning opportunities for others; responsibility of the individual to the community and the world; learning from within; holding self and others accountable for growth and development as learners and leaders.

FS HN 167. Introduction to Human Nutrition, (3-0) Cr. 3. FS.SS. Prereq: High school biology or 3 credits of biology. Understanding and implementing present day knowledge of nutrition. The role of nutrition and food intake in the health and well being of the individual and family.

FS HN 203. Contemporary Issues in Food Science and Human Nutrition, (1-0) Cr. 1. F. S. Introduction to published research and discussion of current issues in food science and human nutrition. Emphasis on sources of credible information, ethical communication and portfolio development.

FS HN 214. Scientific Study of Food, (3-6) Cr. 5.

FS HN 272. Basic Principles of Food Processing, (1-6) Cr. 3. F. Prereq: Credit or enrollment in Chem 231 & 231L and Bio 212. Biological and physico-chemical principles of food processing as they determine the quality of foods.

FS HN 298. Cooperative Education, Cr. R. FS.SS. Prereq: Permission of the department chair; sophomore classification. Required of all cooperative education students. Students must register for these courses prior to commencing each work period.

FS HN 311. Food Chemistry, (3-3) Cr. 4. Prereq: 203, TSM 118, Chem 231 and 231L or 331, and 331L; credit enrollment in Biology 160. Structure, properties, and chemistry of food constituents and animal and plant commodities. Nonmajor graduate credit.

FS HN 314. Foundations of Culinary Science, (1-0) Cr. 1. S. Prereq: 214 and junior classification. Introduction to the roles culinary scientists hold within industry including product development, research, and quality assurance. Discussions focused on professional and educational development, enhancement of communication skills, ethics and emerging issues and trends in culinary science.

FS HN 342. World Food Issues: Past and Present, (Cross-listed with Agron, Env S, T SCI). (3-0) Cr. 3. FS. Prereq: Junior classification. Issues in the agricultural and food systems of the developed and developing world. Emphasis on economic, social, historical, ethical and environmental contexts. Causes and consequences of overnutrition/undernutrition, poverty, hunger and access/distribution. Explorations of current issues and ideas for the future. Team projects. Nonmajor graduate credit.

H. Honors Section. (Honors Program students only)

FS HN 351. Unit Operations in Food Processing, (3-0) Cr. 3. S. Prereq: A course in calculus and Phys 106. Introduction to material and energy balances. Fluid flow, physical and thermal properties of food materials. Fundamentals of heat and mass transfer. Application of momentum and heat transfer to unit operations in food processing. Calculations and computer applications in food processing. Field trip. Nonmajor graduate credit.

FS HN 360. Advanced Human Nutrition and Metabolism, (3-0) Cr. 3. Prereq: 261, 3 credits in biochemistry, 3 credits in physiology recommended. Physiological and biochemical basis for nutrient needs; assessment of nutrient deficiency and toxicity; examination of nutrient functions and regulation of metabolism; nutrient-gene interactions. Nonmajor graduate credit.

FS HN 361. Nutrition and Health Assessment, (1-3) Cr. 2. FS. Prereq: Credit or enrollment in 360, 3 credits in statistics. The assessment of nutritional status in healthy individuals. Laboratory experiences in food composition and assessment of dietary intake, body composition, and biochemical indices of nutritional status. Nonmajor graduate credit.

FS HN 362. Nutrition in Growth and Development, (3-0) Cr. 3. S. Prereq: 360; credit or enrollment in a course in physiology. Nutrient needs throughout the life cycle. Interrelationships of genes, gene expression and nutrients with physiological outcomes during
human development and aging. Nonmajor graduate credit.

FS HN 398. Cooperative Education. Cr. R. FS.SS. Prereq: Permission of the department chair; junior classification. Required of all cooperative education students. Students must register for these courses prior to commencing each work period.

FS HN 403. Food Laws, Regulations, and the Regulatory Process. (2-0) Cr. 2. S.SS. Prereq: 3 credits in food science coursework at 200 level or above. History of the development of the current federal and state food regulations. Guidelines that govern the practice of regulating the wholesomeness of red meats, poultry, eggs, and their derivatives. Presentation of state and federal food regulations. Nonmajor graduate credit.

FS HN 405. Food Quality Assurance. (2-2) Cr. 3. S. Prereq: 214 or 272 or 471; Stat 101 or 104. Basics of food quality control/assurance programs and establishment of decision-making processes using official (government and industry) instrumental, chemical, and sensory procedures. Statistical process and quality control procedures and their applications to various food systems. Development of hazard analysis procedures, specifications, grades, and standards. Nonmajor graduate credit.

FS HN 406. Sensory Evaluation of Food. (Dual-listed with 506). (2-2) Cr. 3. S. Prereq: 214 or 311 or An S 380. 3 credits in statistics. Sensory test methods and procedures used to evaluate the flavor, color and texture of foods. Relationships between sensory and instrumental measurements of color and texture. Acceptance and preference testing. Sensory test methods, principles of action, metabolism, sources, remediation or detoxification, risk assessment of major foodborne toxicants of current interest. Taught online only.

FS HN 441. Dietetics Management. (1-9) Cr. 5. FSS. For students enrolled in the dietetic internship program. Supervised participation in and analysis of organizational leadership, human resource management, budget and quantity food production management including quality control, menu planning, work methods and other functions related to business management in food service, health care and other institutions. Satisfactory-fail only.

FS HN 442. Medical Dietetics I. (3-0) Cr. 8. S.SS. For students enrolled in the dietetic internship program. Biological basis of medical, drug, and diet therapy for selected pathologies. Consideration of factors in planning and constructing nutritional care of patients. Integration of principles with clinical experience. Satisfactory-fail only.

FS HN 443. Medical Dietetics II. (1-9) Cr. 5. FSS. Prereq: Concurrent enrollment in 442. For students enrolled in the dietetic internship program. Supervised clinical experience in assessing, implementing and evaluating nutritional care of patients in specialized clinical settings. Satisfactory-fail only.

FS HN 445. Experience in Community Dietetics. (1-4) Cr. 3. S.SS. For students enrolled in the dietetic internship program. Supervised experience in planning and providing nutritional care for individuals and groups in a variety of community settings. Satisfactory-fail only.

FS HN 446. Experience in Dietetics. (2-0) Cr. 2. FSS. For students enrolled in dietetic internship. Supervised experience in planning and providing nutrition education for individuals and groups in a variety of dietetic settings. Satisfactory-fail only.

FS HN 448. Professional Development Assessment. (Dual-listed with 548). (1-0) Cr. 1. S.SS. For students enrolled in the dietetic internship program. Web-based course providing information and practice for students to assess and evaluate their own professional development and continuing professional education needs. Satisfactory-fail only.

FS HN 461. Medical Nutrition and Disease I. (4-0) Cr. 4. F. Prereq: 360, 361, 3 credits in physiology at 300 level or above. (Dual-listed with Nutr 561) Pathophysiology of selected chronic disease states and their associated medical problems. Specific attention will be directed to medical nutrition needs of patients in the treatment of each disease state. A section (1 cr.) will focus on refinement of assessment skills, diagnosis of nutritional problem, nutrition care, and documentation.

FS HN 463. Community Nutrition. (3-0) Cr. 3. F. Prereq: 362. Dual-listed with Nutr 563. Survey of current public health nutrition problems among nutritionally vulnerable individuals and groups. Discussion of the multidimensional nature of those problems and of community programs addressing them. Grant writing as a means for funding community nutrition program development. Significance of emphasis written and oral communication at the under and professional level. Field trip. Nonmajor graduate credit.

FS HN 464. Medical Nutrition and Disease II. (3-0) Cr. 3-4. S. Prereq: 360, 461, 3 credits in physiology at 300 level or above. (Dual-listed with Nutr 564) Pathophysiology of selected acute and chronic disease states and their associated medical problems. Specific attention will be directed to medical nutrition needs of patients in the treatment of each disease state. A section (1 credit) will focus on refinement of assessment skills, diagnosis of nutritional problem, nutrition care, and documentation. Course must be taken for 4 credits for dietetics degree, diet and exercise degree, or if Didactic Program in Dietetics (DPD) verification statement of completion is desired. Students in non-dietetics majors may take the (3 credit) lecture portion without the recitation section.

FS HN 471. Food Processing. (3-0) Cr. 3. F. Prereq: Micro 201 or 302; Chem 163; Phys 106. Food preservation, including packaging, fermentation, irradiation, canning, freezing, dehydration, additives. Sanitation and plant design. Applications to food products. Nonmajor graduate credit.

FS HN 472. Food Processing Laboratory. (Dual-listed with 572). (1-3) Cr. 2. F. Prereq: 351; credit or enrollment in 471. Pilot plant experiences such as thermal processing, food fermentations, oil seed processing, high pressure processing, corn wet milling, industrial baking, and waste treatment. Special emphasis on interpreting data, writing project reports, and applying engineering principles from FS HN 351.

FS HN 480. Professional Communication in Food Science and Human Nutrition. (1-0) Cr. 1. F. Prereq: 203, senior classification in the department. Presentation of current topics and issues of public policy. Emphasis on communication in the profession and portfolio assessment.

FS HN 489. Issues in Food Safety. (Cross-listed with An S, HRI, VDPAM). (1-0) Cr. 1. S. Prereq: Credit or enrollment in FS HN 101 or 272 or HRI 233; FS HN 419 or 420; FS HN 403. Capstone seminar for the food safety minor. Case discussions and independent projects about safety issues in the food system from a multidisciplinary perspective.

FS HN 490. Independent Study. Cr. arr. Repeatable. F.S.SS. Prereq: Permission of instructor. Independent work in food science, nutrition, or dietetics. A maximum of 6 credits of FS HN 490 may be used toward graduation.

A. Dietetics
B. Food Science
C. Nutrition
D. International Experience
E. Entrepreneurship
H. Honors

FS HN 491. Supervised Work Experience. Cr. arr. Repeatable. F.S.SS. Prereq: Advance approval of instructor and adviser. Supervised off-campus work experience relevant to the academic major. A maximum of 4 credits of FS HN 491 may be used toward graduation. Satisfactory-fail only.

A. Dietetics
B. Food Science
C. Nutrition
D. Culinary Science

FS HN 492. Research Concepts in Human Nutrition. (1-3) Cr. 2. F. Prereq: junior or senior classification. Students will develop and implement a research project with faculty supervision, based on knowledge gained from nutrition, biology and chemistry courses. Students will prepare a research proposal, conduct research and report results. Students will gain appreciation for independent research and experience creative and innovative aspects of nutrition research.
Courses primarily for graduate students, open to qualified undergraduate students

FS HN 502. Advanced Food Science-Chemistry. (1-0) Cr. 1. S. Prereq: 3 credits each in physics and mathematics. Key principles and applications in the chemistry of food.

FS HN 504. Advanced Food Science-Microbiology. (1-0) Cr. 1. S. Prereq: 3 credits each in microbiology and organic chemistry. Key principles and applications in the microbiology of food.

FS HN 505. Short Course in Food Science. Cr. F.S.SS. Prereq: Permission of instructor.

FS HN 506. Sensory Evaluation of Food. (Dual-listed with 406). (2-3) Cr. 3. F. Prereq: 214 or 311 or An S 380; 3 credits in statistics. Sensory test methods and procedures used to evaluate the flavor, color and texture of foods. Relationships between sensory and instrumental measurements of color and texture. Acceptance and preference testing.

FS HN 507. Microbiological Safety of Foods of Animal Origins. (Dual-listed with 407). (Cross-listed with Micro). (3-0) Cr. 3. S. Prereq: Micro 420. Examination of the various factors in the production of foods of animal origin. Table 1 through processing, distribution and final consumption which contribute to the overall microbiological safety of the food. The two modules of this course will be 1) the procedures and processes which can affect the overall microbiological safety of the food, and 2) the Hazard Analysis Critical Control Point (HACCP) system.

FS HN 512. Food Product Development. (Dual-listed with 412). (2-6) Cr. 4. S. Prereq: 311 or 411, 471. Principles of developing consumer packaged food products. Application of principles learned in food chemistry, formulation, microbiology, and processing. Some pilot plant experiences. Electronic communication from web emphasized for class reports, notes and assignments.

FS HN 519. Food Toxicology. (Cross-listed with Tox, NutrS). (3-0) Cr. 3. Alt. F., offered 2010. Prereq: A course in biochemistry. Basic principles of toxicology. Toxicants in the food supply: modes of action, toxicant defense systems, toxicant and nutrient interactions, risk assessment. Only one of FS HN 419 and 519 may count toward graduation.

FS HN 529. Foodborne Toxictants. (Dual-listed with 429) (2-0) Cr. 2. Alt. F., offered 2009. Prereq: a course in biochemistry: Mechanisms of action, metabolism, sources, remediation or detoxification, risk assessment of major foodborne toxictants of current interest, design of HACCP plans for use in food industries targeting foodborne toxictants. Taught online only.

FS HN 543. Medical Dietetics II. (1-8) Cr. 3. F.S. Prereq: Concurrent enrollment in dietetic internship or MFCS. Discusstion of assessment, diagnosis, intervention, and outcomes of nutritional problems in complex medical conditions.

FS HN 548. Professional Development Assessment. (Dual-listed with 448). (Cross-listed with Diet). (1-0) Cr. 1. F. S. Prereq: RD credential or enrollment in GPIDEA MFCS in Dietetics. Study of the current scientific literature to assess and evaluate own professional development and continuing professional education needs. Completion of professional 5-year plan. Satisfaction-fail only.

FS HN 567. Nutrition for Dietitians. (Cross-listed with Diet). (2-3) Cr. 3. Alt. F., offered 2009. Prereq: 360; BBMB 301, undergraduate course in physiology. RD credential or enrollment in GPIDEA MFCS in Dietetics. Study of the current scientific literature to evaluate current trends and issues in nutrition science and dietetic practice. Emerging areas of research investigating the role of nutrients in health and disease in humans will be explored. Emphasis on the impact of emerging research on nutrition recommendations and interventions designed to promote human health.

FS HN 572. Food Processing Laboratory. (Dual-listed with 472). (3-1) Cr. 2. F. Prereq: 503 or equivalent. Pilot plant experiences such as thermal processing, food fermentation, oil seed processing, high pressure processing, corn wet milling, industrial baking, waste treatment. Special emphasis on interpreting data, writing project reports, applying engineering principles from FS HN 351, and special projects for each exercise.

FS HN 575. Processed Foods. (3-0) Cr. 3. F. Prereq: 214 or 311; a course in nutrition. Survey of the effects of home and commercial food preparation and processing on the nutrients in food.

FS HN 580. Orientation to Food Science and Nutrition Research. (1-0) Cr. 1. F. Orientation to and discussion of research interests in food science and nutrition. Discussion of policy and ethical issues in the conduct of research. Intended for entering students in FS HN and related disciplines. Satisfaction-fail only.

FS HN 581. Seminar. (1-0) Cr. 1. S. Discussion and practice of oral presentation of scientific data in a professional setting. Discussion of issues related to data presentation. Satisfaction-fail only.

FS HN 596. Food Science and Human Nutrition Travel Course. (Dual-listed with 498). Cr. Arr. Repeatable. FS.SS. Prereq: Permission of instructor. (One credit per week traveled.) Limited enrollment. Tour and study of food industry, dietetic and nutritional agencies in different regions of the world. Pre-travel session arranged. Travel expenses paid by students. A. International travel B. Domestic travel

FS HN 599. Creative Component. Cr. F. Nonthesis option only.

Courses for graduate students

FS HN 606. Instrumental Measurement of Food Quality. (2-3) Cr. 3. Alt. F., offered 2011. Prereq: 311 or 411 or BBMB 404. Principles of instrumental measurements of color, aroma, flavor, texture, and rheology. Techniques and instrumentation for measuring the quality of foods; relationship of these methods to food color, taste, flavor, texture, and rheological quality. Application of methods to various foods and biorenewable materials.

FS HN 610. Food Enzymology. (2-3) Cr. 3. Alt. F., offered 2010. Prereq: 311 or 411 or BBMB 404. Properties of enzymes important in food processing and production including flavor, texture and color. Quantitative evaluation of substrates, enzyme, and inhibitors, pH, pressure and temperature on enzyme activity. Experimental determination of specificity and mechanisms important to food biochemistry. Techniques to purify food enzymes.

FS HN 612. Lipid Chemistry and Applications. (3-0) Cr. 3. Alt. S., offered 2010. Prereq: 311 or 411 or BBMB 404. Structure and analysis of lipids; glyceride structure; crystal form and texture; autoxidation and chemical modification; extraction, refining and processing; applications of fats and oils in food, biofuel and biobased products.

FS HN 614. Carbohydrates: Structures, Properties, and Applications. (3-0) Cr. 3. Alt. S., offered 2011. Prereq: 311 or 411 or BBMB 404. Study of chemical structures and physical properties of carbohydrates, applications of carbohydrates in foods and as biomaterial, and changes they undergo during processing and storage.

FS HN 626. Advanced Food Microbiology. (Cross-listed with Micro, Tox). (4-3) Cr. 3. Alt. S., offered 2011. Prereq: 420 or 421 or 504. Topics of current interest in food microbiology, including new foodborne pathogens, rapid identification methods, effect of food properties and new preservation techniques on microbial growth, and modes of action of antimicrobials.

FS HN 627. Rapid Methods in Food Microbiology. (Cross-listed with Micro, Tox). (2-0) Cr. 2. Alt. S., offered 2010. Prereq: 420 or 421 or 504. Provides an overview of rapid microbial detection methods for use in foods. Topics include historical aspects of rapid microbial detection, basic categories of rapid tests
Innovative approaches to learning are emphasized in GDCB's undergraduate seminar and literature-based courses. Graduate training through a variety of activities strive for excellence in teaching and research. On the other hand, education is of paramount importance, GDCB Faculty and individual student's major professor and Program of Study Committee provide requirements and guidelines for study. General information about graduate study requirements can be found at the web site for the Graduate College (www.grad-college.iastate.edu) and requirements for the interdepartmental majors can be found by following the links from the GDCB web site above. Although not a formal requirement, the GDCB faculty recommends that students pursuing the Ph.D. include teaching experience in their graduate training.

Undergraduate Study

The GDCB Department offers undergraduate majors in conjunction with other departments. Students interested in the areas of genetics, development and cell biology should major in Biology, Genetics, Bioinformatics, and Computational Biology (BCCBio). The Bio-Majors are organized and offered jointly by the GDCB and EEB departments. The GDCB faculty, together with those in EEB and BCCBio, administer and offer the Genetics and Molecular Biology (MBio) major. Each of these majors is available through the College of Liberal Arts and Sciences or through the College of Agriculture and Life Sciences. BCBio is administered by the Departments of Computer Science, GDCB, and mathematics and is available through the college of Liberal Arts and Sciences.

The Biology Major and the Genetics Major prepare students for a wide range of careers in biological sciences. Training in Biology or Genetics may lead to employment in teaching, research, or any of a variety of health-related professions. Some of these careers include biotechnology, human and veterinary medicine, agricultural sciences and life science education. Bio-Majors are prepared for careers at the interfaces of biological, informational and computational sciences in the above fields. These majors are also excellent preparation for graduate study in bioinformatics, molecular genetics, cell and developmental biology, neuroscience and related fields. Faculty members in GDCB contribute to the undergraduate courses listed below. The full descriptions of these courses can be found in the Biology, Genetics and BCCBio sections of the catalog.

Courses primarily for graduate students, open to qualified undergraduate students

GDCB 510. Transmission Genetics. (3-0) Cr. 3. F. Prereq: Gen 140 or graduate standing. An in-depth investigation of the modern research practices of transmission genetics. Basic concepts or students interested in genetic research. Topics include Mendelian genetic analysis, analysis of genetic pathways, mutational analysis of gene function, chromosomal mechanics, human genetic analysis.

GDCB 511. Molecular Genetics. (Cross-listed with MCDBB). (3-0) Cr. 3. S. Prereq: Biol 313 and BIBM 405. The principles of molecular genetics: gene structure and function at the molecular level, including regulation of gene expression, genetic rearrangement, and the organization of genetic information in prokaryotes and eukaryotes.

GDCB 512. Plant Growth and Development. (Cross-listed with MCDBB, PBlBio). (2-0) Cr. 2. S. Prereq: Biol 330 or a course in developmental biology; GDCB 545 or BIBM 404, 405 or GDCB 620. Plant growth and development and its molecular genetic regulation. Hormone biosynthesis, metabolism, and action. Signal transduction in plants.

GDCB 513. Plant Metabolism. (Cross-listed with PBlBio). (2-0) Cr. 2. F. Prereq: Biol 330, Phys 111, Chem 331 or one semester of biochemistry recommended. Photosynthesis, respiration, and other aspects of plant metabolism.

GDCB 537. Statistics for Molecular Genetics. (Cross-listed with Stat.) (3-0) Cr. 3. Alt. S., offered 2011. Prereq: 401, 447; Gen 320 or Biol 313. Statistical models, inference, and computational tools for linkage analysis, quantitative trait analysis, and molecular evolution. Include: quantitative trait traits, variance component mapping, interval and composite-interval mapping, and phylogenetic tree reconstruction.

GDCB 538. Computational Genomics and Evolution. (Cross-listed with BCB.) (3-0) Cr. 3. Alt. S., offered 2011. Prereq: BCB 568, BBMB 537, 540. Introduction to evolutionary sequence analysis at the genome level. Topics include sequence alignment, phylogenetic inference, molecular clock analysis, ancestral state inference, sequence/structure relation, functional divergence and prediction, evolutionary development, genome duplication, and comparative genomics. Focus will be on data analysis and biological interpretation.

GDCB 544. Introduction to Bioinformatics. (Cross-listed with BCB, C S, Stat, Com S.) Cr. 4. F. Prereq: Math 165 or Stat 401 or equivalent. Broad overview of bioinformatics with a significant problem-solving component, including hands-on practice using computational tools to solve a variety of biological problems. Topics include: database searching, sequence alignment, gene prediction, RNA and protein structure prediction, construction of phylogenetic trees, comparative and functional genomics.

GDCB 545. Plant Molecular Biology. (Cross-listed with MCDCB, PIBo.) (3-0) Cr. 3. F. Prereq: Biol 314, 330. Organization and function of plant nuclear and organelle DNA; regulation of gene expression; Methods of generating novel genetic variation. Impact of plant biotechnology on agriculture.

GDCB 556. Cellular, Molecular and Developmental Neuroscience. (Cross-listed with Neuro, B M S.) (3-0) Cr. or F. Prereq: Biol 335 or Biol 438; physics recommended. Fundamental principles of neuroscience including cellular and molecular neuroscience, nervous system development, sensory, motor and regulatory systems.

GDCB 557. Advanced Neuroscience Techniques. (Cross-listed with Neuro.) (2-0) Cr. 2. Alt. S., offered 2011. Prereq: Neuro 558 or equivalent course. Research methods and techniques, exercises and/or demonstrations representing individual faculty specialties.

GDCB 590. Special Topics. Cr. arr. Repeatable. Prereq: Permission of instructor.

GDCB 596. Genomic Data Processing. (Cross-listed with Com S, BCB, Stat.) (3-0) Cr. S. F. Prereq: Some basic knowledge of programming. Study the practical aspects of genomic data processing with an emphasis on hands-on projects. Students will carry out common data processing steps using bioinformatics tools. Topics include base-calling, raw sequence cleaning and contaminant removal; shotgun assembly procedures and EST clustering methods; genome closure strategies and practices; sequence homology search and function prediction; annotation and submission of GenBank reports, and data collection and dissemination through the Internet. Important post-genomic topics like microarray design and data analysis will also be covered.

Courses for graduate students

GDCB 632. Current Topics in Signal Transduction. Cr. 2-3. S. Prereq: Permission of instructor. Selected topics in signal transduction events, their molecular mechanisms and their relation to cellular processes. Topics may include cell recognition, second messenger systems, information integration and transfer, cell cycle, cell differentiation, and pattern formation.

Undergraduate Preparation

Undergraduates wishing to prepare for graduate study in Genetics should elect courses in basic biology, chemistry at least through organic chemistry, one year of college-level physics, mathematics at least through calculus, and at least one thorough course in basic transmission and molecular genetics. One year of upper level statistics and a year of biochemistry are strongly encouraged.

See Genetics - Undergraduate for information on a bachelor of science degree in Genetics.

Graduate Study

Work is offered for the master of science and doctor of philosophy degrees with a major in Genetics in thirteen cooperating departments: Agronomy; Animal Science; Biochemistry, Biophysics and Molecular Biology; Biomedical Sciences; Ecology, Evolution and Organismal Biology; Entomology; Food Science and Human Nutrition; Genetics, Development and Cell Biology; Horticulture; Plant Pathology; Natural Resource Ecology and Management; Veterinary Microbiology and Preventive Medicine; and Veterinary Pathology.

The diversity of faculty in the Interdepartmental Genetics major ensures a broad, well-balanced education from the best instructors, while offering flexibility in choice of research area. Genetics faculty have strengths in many areas, from fundamental studies at the molecular, cellular, organismal, and population levels, to research with immediate practical application. Ongoing research projects span all the major areas of theoretical and experimental genetics, including genomics, molecular studies of gene regulation, gene mapping, transposable element studies, developmental genetics, quantitative and mathematical genetics, computational molecular biology, evolutionary genetics, and population genetics.

Students are admitted by the approval of the Chair after review by the Genetics Admissions Committee. Students are admitted either to participate in research rotations with several faculty or by direct admission into a specific lab and department. First year students participating in rotations with Genetics faculty will take Genet 697 (graduate research rotation). All Ph.D. candidates take a core curriculum comprising one course each from the following four categories and attend seminars and workshops as described. Transmission Genetics (GDCB 510), Molecular Genetics (GDCB 511 or BBMB 502), Quantitative, Population, and Evolutionary Genetics (An S/Agron 561 or EEOB 562 or EEOB 563 or EEOB 566 or EEOB 567), Biochemistry (BBMB 404 or BBMB 501). Students will give three research presentations (Genet 690), attend two genetics faculty seminar series (Genet 691), and participate in three Workshops in Genetics (Genet 591) during their training period. First-year graduate students will also take Genet 692 (Seminar in the Conceptual Foundations of Genetics).

Students may elect a computational molecular biology specialty within the genetics major. This requires that the research project be in the field of computational molecular biology. IG majors will be expected to complete all of the courses required for the major, except that one semester of Student Seminar in Bioinformatics and Computational Biology (BCEE 890) is required as an introduction to additional courses in the area of specialization.

M.S. students will take the above core courses and seminars with the following changes: participate in two of the Workshops in Genetics (Genet 591) and present their research once (Genet 690). Additional coursework may be selected to satisfy individual interests or departmental requirements.

The course designator Genet applies to graduate courses taught by the interdepartmental major in Genetics.

Students wishing to minor in genetics must submit a complete application to the graduate program. Requirements for the successful completion of a minor at the Ph.D. or M.S. levels are: completion of three of the four categories of the common core required lecture courses listed above. One semester of seminar in Genetics (Genet 690 or 691 or 692) is recommended. One member of the POS committee must be a Genetics faculty member.

Student Outcomes: Most students awarded doctoral degrees continue their training as postdoctoral associates at major research institutions in the U.S. or abroad in preparation for research and/or teaching positions in academia, industry, or government. A few go directly to permanent research positions in industry. Many students awarded master’s degrees continue their training as doctoral students; however, some choose research support positions in academia, industry, or government. A more thorough list of outcomes is available at our Web site.

Courses for graduate students

Genet 590. Special Topics. Cr. arr. Repeatable. F.S.SS. Contact individual faculty for special projects or topics. Graded.

Genet 591. Workshop in Genetics. (1-0) Cr. 1. Repeatable. S. Prereq: Permission of instructor. Current topics in genetics research. Lectures by off-campus experts. Students read background literature, attend preparatory seminars, attend all lectures, meet with lecturers.

Genet 690. Seminar in Genetics. (1-0) Cr. 1. Repeatable. F. Prereq: Permission of instructor. Research presentations by students to improve their ability to: orally present scientific work in a clear and meaningful way, critically evaluate oral presentations, and give and receive constructive criticism.

Genet 691. Seminar in Genetics. (1-0) Cr. 1. Repeatable. F. Prereq: Permission of instructor. Faculty research seminars that introduce students to the variety of genetics research projects on campus and provide an opportunity for students to become engaged in the scientific presentation of the research at the point where they can think critically and ask meaningful questions.

Genet 692. Conceptual Foundations of Genetics. (1-0) Cr. 1. F. Prereq: Permission of instructor. Landmark papers in the development of concepts. Papers are presented and discussions led by students, guided and mentored by the instructors. Instructors provide a broad overview and history of the development of fundamental concepts in genetics.

Genet 697. Graduate Research Rotation. Cr. arr. Repeatable. F.S.SS. Graduate research projects performed under the supervision of selected faculty members in the graduate Genetics major.

Graduate Study

Graduate study in genetics leading to the Master of Science and doctor of philosophy degrees is offered at ISU. Graduate study is organized as a separate interdepartmental graduate major from the undergraduate program. For more information on graduate study in genetics see: Genetics - Interdisciplinary.

Curriculum in Genetics

In addition to basic degree requirements listed in the Curricula in Agriculture or in Liberal Arts and Sciences, genetics majors must satisfy the following requirements:

2. Gen 110, 409, 410, 491, and either 462 or EEOB 563.
3. Eleven credits of calculus and Statistics including at least one course in each.
4. Three years of chemistry and biochemistry.
   - Eight credits of general college physics.
5. Additional credits of biological science support electives chosen from an approved list. For degrees in the College of Agriculture nine credits are required, for degrees in the College of Liberal Arts and Sciences six credits are required.
6. Majors in the College of Liberal Arts and Sciences must take one course that involves both humanities and biology such as history of science, or bioethics. This course may also count toward a college group requirement. A list of acceptable courses is available from the program office.
7. Majors in the College of Agriculture must include Biol 312 in their program.
8. The minor in genetics may be earned by completing Gen 313, 313L, 314L, Gen 409, 410 and 491. A Genetics major may not double major or minor in Biology.

Courses primarily for undergraduate students

Gen 110. Genetics Orientation. (1-0) Cr. 1. F. Orientation to the area of genetics. For students considering a major in genetics. Specializations and career opportunities. Satisfactory-fail only.

Gen 260. Human Heredity and Society. (3-0) Cr. 3. F. Prereq: One semester of college biology or Anth 202. A survey course in genetics for non-biology majors interested in heredity and its importance, and implications to self and Society. Not recommended for those intending to take advanced courses in genetics. Credit for graduation will not be allowed for more than one of the following: Gen 260, 313, 313L, Biol 313 and 313L, and Agron 320.

Gen 298. Cooperative Education. Cr. R. F.S.S. Prereq: Permission of department cooperative education coordinator; junior classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Gen 313L. Genetics Laboratory. (Cross-listed with Biol). (3-0) Cr. 1. F. Prereq: Credit or enrollment in 313. Laboratory to accompany 313. Students may receive graduation credit for no more than one of the following: Biol 313 and 313L, Gen 260, Gen 313, Gen 320, and Agron 320.

Gen 320. Genetics, Agriculture and Biotechnology. (Cross-listed with Agron). (3-0) Cr. 3. F. Prereq: Biol 212. Transmission genetics with an emphasis on applications in agriculture, the structure and expression of the gene, how genes behave in populations and how recombinant DNA technology can be used to improve agriculture. Credit for graduation will not be allowed for more than one of the following: Gen 260, 313, 313L, Biol 313 and 313L, and Agron 320.

Gen 444. Introduction to Bioinformatics. (Cross-listed with BCB, Biol, Corn S, Cpr Ei). (4-0) Cr. 4. F. Prereq: Math 165 or Stat 401 or equivalent. Broad overview of bioinformatics with a significant problem-solving component, including hands-on practice using computational tools to solve a variety of biological problems. Topics include: database searching, sequence alignment, gene prediction, RNA and protein structure prediction, construction of phylogenetic trees, comparative and functional genomics. Nonmajor graduate credit.

Gen 462. Evolutionary Genetics. (Cross-listed with Biol). (3-0) Cr. 3. S. Prereq: Biol 313. The genetic basis of evolutionary processes in higher organisms. The role of genetic variation in adaptation, natural selection, adaptive processes, and the influence of random processes on evolutionary change. Nonmajor graduate credit.

Gen 490. Independent Study. Cr. arr. Repeatable. Prereq: 313, junior or senior classification, permission of instructor. Students in the College of Agriculture may use no more than 6 credits of Gen 490 toward the total of 128 credits required for graduation; students in the College of Liberal Arts and Sciences may use no more than 9 credits of Gen 490 toward graduation.

R. Genetics research. Cr. 1 to 5 each time taken. S. Attendance and critique of genetics seminars. Cr. 1. Offered on a satisfactory-fail grading basis only. U. Laboratory teaching experience. For students registering to be undergraduate laboratory assistants. Cr. 1 to 2. Offered on a satisfactory-fail grading basis only.

Gen 491. Undergraduate Seminar. (1-0) Cr. 1. F. Prereq: Junior classification. The investigation of current issues in genetics. Graduate school and employment opportunities discussed. Practice in resume writing and interview techniques. Required for majors in genetics.

Gen 495. Molecular Biology for Computational Scientists. (Cross-listed with BCB). (3-0) Cr. 3. F. Survey of molecular cell biology and molecular genetics for nonbiologists, especially those interested in bioinformatics/computational biology. Basic cell structure and function; principles of molecular genetics; biosynthesis, structure, and function of DNA, RNA, and proteins; regulation of gene expression; selected topics. Provides biological background for BCB 584. Credit for graduation will not be allowed for more than one of Gen 411 and Gen/BCB 495. Nonmajor graduate credit.

Gen 498. Cooperative Education. Cr. R. F.S.S. Prereq: Permission of department cooperative education coordinator; senior classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Geological and Atmospheric Sciences

Carl E. Jacobson, Chair of Department

Distinguished Professor (Emeritus): Vondra

Professors: Arrit, Beresnev, Burras, Chen, Gallus, Gutowski, Iverson, Jacobson, Sandor, Simpkins, Spry, Takle, Thompson

Professors (Emeritus): Seifert, Yarger

Professors (Collaborators): Kato, Koch

Associate Professors: Cervato, Windom, Wu

Associate Professor (Emeritus): Cody

Associate Professors (Collaborators): Brake, Burkart, Hasiotis, Turner

Assistant Professors: Franz, Harding, Hornbuckle

Assistant Professors (Collaborators): Burke, Jones

Senior Lecturer: Dawson

Lecturers: Fiory, Noggle

Undergraduate Study

The department offers courses in Geology and Meteorology. Majors can be earned in earth science (B.A., B.S.), geology (B.S.), and meteorology (B.S.). Candidates for all degrees must satisfy the requirements established by the College of Liberal Arts and Sciences (see Liberal Arts and Sciences, Curriculum). In addition, the department has requirements for each major.

The bachelor of science in Geology prepares the student for a professional career and/or graduate study in the geological sciences. Students selecting geology as a major will elect an option in traditional geology or environmental geology/hydrogeology. The traditional option prepares a student for employment in state and U.S. geological surveys, mineral and petroleum exploration, and graduate study in most aspects of geology. Required courses in this option include Geol 100, 100L, 102, 102L, 302, 311, 356, 365, 368, 479 and at least 9 credits of geology electives. The environmental geology/hydrogeology option prepares a student for employment in environmental consulting, state and U.S. geological surveys, regulatory agencies, and graduate study in the environmental aspects of geology. Required courses in this option include Geol 100, 100L, 102, 102L, 302, 311, 356, 368, 411, 419 or 426 or 434, 479, and at least 6 credits of geology electives. Required supporting courses include Chem 177, 177L, 178, 178L; Phys 111, 112; Math 165, 166 or Math 181, 182; at least 6 additional credits from an approved departmental list of courses in the science, engineering, or mathematical disciplines outside of geology. No more than 9 credits in 490 may be counted toward a degree in Geology.
A minor in Geology may be earned by taking 15 credits of geology coursework, including Geol 100 and 100L (or 201), 102, and 102L. The remainder should be at the 300 level or above.

Graduates work to understand natural processes on Earth and other planets. They are able to apply their knowledge of forces and factors that shape the Earth to reconstruct the past and anticipate the future. Graduates provide essential information for solving problems for resource management, environmental protection, and public health, safety, and welfare. They work as consultants on engineering and environmental problems, explorers for new minerals and hydrocarbon resources, researchers, teachers, writers, editors, and museum curators. Graduates are able to integrate field and laboratory data and to prepare reports. They are able to make presentations that include maps and diagrams that illustrate the results of their studies.

The study of Meteorology involves the description of the earth's atmosphere and the processes responsible for its behavior. Students majoring in Meteorology earn the bachelor of science. Successful preparation for professional or graduate work in Meteorology requires students develop and integrate a diverse range of skills and knowledge bases. These include weather observing, the physics and dynamics of the global atmosphere, application of new weather technologies, advanced mathematical tools, computer programming and modeling, and effective oral and written communication. The faculty view the senior thesis (Meteorology 499), in particular, as a capstone experience in which students demonstrate they have achieved this integration. Also, contemporary meteorology is an earth-system science with ties to a variety of human experiences. The electives and general education required in the college are further experiences that the meteorology student must integrate with their core meteorology knowledge in order to function effectively in a global-oriented profession. The program requires the following courses: Mteor 111, 201, 206, 227, 301, 311, 341, 342, 411, 417, 432, 443, 454, and 499. An additional 9 credits must be chosen from Mteor 402, 404, 406, 407, 452, 490, and Geol 415 or Geol 472 (some experimental Mteor courses can also be used). Supporting work is required in areas at least equivalent to Chem 163, 163L; Phys 221, 222; Math 165, 166, 265, 266; Stat 105; Sp Cm 212. A grade of C or better (not C-) is required in each of the following courses to meet minimum graduation requirements for a bachelor of science degree in Meteorology: 206, 301, 311, 341, 342, and 443. Several co-op programs are available for upper division undergraduates. Although a range of opportunities exists for men and women who terminate their studies with a bachelor of science, students who meet the necessary academic standards are encouraged to continue their studies in a graduate program. For these students, minor work is recommended in a mathematical or physical science. Other students can choose a wide range of supporting courses that will contribute to their particular area of interest in meteorology.

The department offers a minor in Meteorology which may be earned by completing 15 credits including Meteorology 201 (or Meteorology 200L may count toward the minor), Meteorology 206 and Meteorology 301. Further information concerning programs of study, including sample degree programs, is available from the department.

The Earth Science major is a broad program that typically emphasizes an interdisciplinary field. Programs leading to the bachelor of science may be individually designed but will include required courses in Geology and Meteorology, and required supporting work in chemistry, physics, and mathematics. Specific programs have been designed for students interested in a geology, meteorology, or an environmental earth science emphasis. Programs leading to the bachelor of arts for earth science teaching are available. The latter program must satisfy the requirements of the Teacher Education Program (see Index, Teacher Education).

Communication Proficiency requirement: The department requires a grade of C or better in each of English 150 and 250 (or 250H), and a C or better in English 314 or 302 or JI MC 347.

Graduate Study

The department offers programs leading to the master of science and doctor of philosophy with majors in Earth Science, Geology, and Meteorology. Program options are available for the M.S. and Ph.D. degrees in earth science leading to careers in teaching. The department also cooperates with the interdepartmental major in Water Resources (see Index). Students desiring a major in the above fields normally will have a strong undergraduate background in the physical and mathematical sciences. Individual graduate programs are evaluated by considering their undergraduate background and performance and their expressed goals.

Programs of study are designed on an individual basis in accordance with requirements of the Graduate College and established requirements for each departmental major. Minor work is normally taken in aerospace engineering, Agronomy (soil science), chemistry, civil and construction engineering, computer engineering, computer science, engineering mechanics, materials engineering, mathematics, mechanical engineering, microbiology, physics, or Statistics. Departmental requirements provide a strong, broad background in the major and allow considerable flexibility in the program of each individual.

A dissertation is required of all Ph.D. candidates. M.S. students in Geology are required to complete a thesis. The M.S. in Earth Science is available to students electing the non-thesis (Creative Component) option in Geology or Meteorology. A non-thesis option is also offered for the M.S. degree in Meteorology.

Graduates in Geology specialize in a subdiscipline, but they comprehend and can communicate the basic principles, contemporary geology and supporting sciences. They possess the capacity for critical and independent thinking. They are able to write a fundable research proposal, evaluate current relevant literature, carry out the proposed research, and communicate the results of their research to peers at national meetings and to the general public. They work as consultants on engineering and environmental problems, explorers for new minerals and hydrocarbon resources, researchers, teachers, writers, editors, and museum curators.

All candidates for an advanced degree in Meteorology are expected to complete Mteor 542, 543, and 552. In addition, students without prior synoptic course-work must complete Mteor 511; other students must elect either Mteor 500 or Agron 507. Students must also complete Mteor 504 (or Agron 504) or Mteor 605 or Agron 505.

Graduates in Meteorology have a good comprehension of basic principles, a capacity for critical and independent thought and an ability to communicate effectively with scientific colleagues. They have an appropriate breadth in their understanding of meteorology with a suitable specialization. Graduates are able to undertake thorough research and explain the results in a scientifically reasonable fashion.
Geol 311. Mineralogy and Earth Materials. (3-4) Cr. 5. F. Prereq: 100 or 201, Chem 163. Introduction to mineral classification, elementary crystal chemistry, crystal morphology, mineral stability, and association. Laboratory problems in mineral identification methods, including hand-specimen identification, optical microscopy, and x-ray diffraction. Nonmajor graduate credit.

Geol 324. Energy and the Environment. (Cross-listed with Env S, Mteor). (3-4) Cr. 3. S. Renewable and non-renewable energy resources. Origin, occurrence, and extraction of fossil fuels. Nuclear fission, and solar energy. Energy efficiency. Environmental effects of energy production and use, including air pollution, acid precipitation, groundwater contamination, nuclear waste disposal, and global climate change. Geol 324 does not count toward credits required in the Geology major.

Geol 356. Structural Geology. (3-6) Cr. 3. S. Prereq: 100 or 201, Phys 111, Math 165 or 181. Principles of stress and strain. Brittle and ductile behavior of rocks. Description and classification of joints, faults, folds, fractures, foliation, and lineation. Plate tectonics and regional geology. Laboratory includes application of geometrical techniques to solve structural problems; emphasizes map interpretation and use of stereonet and computer methods. Nonmajor graduate credit.

Geol 365. Igneous and Metamorphic Petrology. (2-3) Cr. 3. S. Prereq: 311. Nature and origin of igneous and metamorphic rocks. Emphasis on important rock-forming environments and processes and their influence on rock characteristics. Laboratory includes thin section study of rock textures and mineralogy and the interpretation of these features. Field trips. Nonmajor graduate credit.

Geol 368. Stratigraphy and Sedimentation. (3-2) Cr. 4. F. Prereq: 311. Origin of sedimentary rocks and the characteristics of major depositional systems, geologic time, stratigraphic nomenclature, methods of correlation, facies and facies analysis, sequence stratigraphy, sedimentary systems and basin analysis. Required field and laboratory-based problem with a comprehensive written report. Nonmajor graduate credit.

Geol 398. Cooperative Education. Cr. R. F.S.S. Prereq: 100 or 201, 100L, 102, 102L, and permission of the department cooperative education coordinator; junior classification in all cooperative education students. Students must register for this course prior to commencing each work period. Repeatable. F. S.

Geol 402. Watershed Hydrology. (Dual-listed with 502). (Cross-listed with Agron, EnSci, Mteor, NREM). (3-3) Cr. 4. F. Prereq: Four courses in physical or biological sciences, junior standing. Examination of watersheds as systems, emphasizing the surface components of the hydrologic cycle. Combines qualitative understanding of hydrological processes and uncertainty with quantitative representation. Laboratory emphasizes field investigation and measurement of watershed processes. Nonmajor graduate credit.

Geol 409. Field Methods in Hydrogeology. (Dual-listed with 509). (Cross-listed with EnSci). (0-4) Cr. 2. Alt. S. Offered 2010. Prereq: 402 or 411 or C E 473. Introductory to hydrogeological methods used in groundwater investigations. In-field implementation of pumping tests, slug tests, monitoring well installation and drilling techniques, geochemical and water quality sampling, seeage meters, piezometers, stream gaging, electronic instrumentation for data collection, and geophysics. Field trips to investigate water resources and contaminant transport. Lab emphasizes field methods and laboratory methods for hydrogeological investigations. Nonmajor graduate credit.

Geol 411. Hydrogeology. (Dual-listed with 511). (Cross-listed with EnSci). (3-2) Cr. 4. F. Prereq: Geol 100 or 201, Math 165 or 181, Phys 111 or 221. Physical principles of groundwater flow, nature and origin of aquifers and confining units, well hydraulics, groundwater modeling, and contaminant transport. Lab emphasizes applied field and laboratory methods for hydrogeological investigations. Nonmajor graduate credit.

Geol 415. Paleoclimatology. (Dual-listed with 515). (Cross-listed with EnSci). (3-0) Cr. 3. Alt. S., offered 2011. Prereq: Four courses in biological or physical science. Introduction to mechanisms that drive climate, including natural and anthropogenic processes. Meteorology and atmospheric circulation and fluctuation in Earth’s orbital parameters. Examination and analysis of past climate records ranging from historical documentation to ecological and geochemical proxies (e.g. tree ring analysis; O and C isotopes of skeletal carbonates and soils). Dating methods used to constrain and correlate climatic periods; utility of computer models to reconstruct past climates and predict future climate change. Emphasis on paleoclimatology and paleoecology of the late Quaternary (last ~1 million years). Nonmajor graduate credit.

Geol 452. GIS for Geoscientists. (Dual-listed with 552). (Cross-listed with Agron, EnSci). (2-2) Cr. 3. F. Prereq: Geol 100, 201 or equivalent. Introduction to geographic information systems (GIS) with particular emphasis on geoscientific data. Uses ESRI’s ArcGIS Desktop Software and extension modules. Emphasizes typical GIS operations and analyses in the geosciences to prepare students for advanced GIS courses. Nonmajor graduate credit.

Geol 474. Glacial and Quaternary Geology. (Dual-listed with 574). (2-2) Cr. 3. Alt. S., offered 2011. Prereq: 100 or 201 or equivalent experience. Study of the depositional and erosional processes of glaciers using modern glacier analogs and landforms. Discussion of glaciology, glacier hydrology, Quaternary history and stratigraphy, paleoecology, and climate change. Lab emphasizes aerial photo and topographic map interpretation and the Quaternary stratigraphy of Iowa. Two required field trips. Nonmajor graduate credit.

Geol 479. Surficial Processes. (Dual-listed with 579). (Cross-listed with EnSci). (2-2) Cr. 3. F. Prereq: 100 or 201 or equivalent experience. Study of surficial processes in modern and ancient geological environments. Topics include weathering, sediment transport, and landform genesis with emphasis on fluvial, glacial, hillside, eolian, and coastal processes. Applications to engineering and environmental problems. Laboratory emphasizes aerial photo and topographic map interpretation. Nonmajor graduate credit.

Geol 490. Independent Study. Cr. arr. Repeatable. Prereq: 8 credits in geology and permission of instructor. No more than 9 credits of Geol 490 may be counted toward graduation.

Geol 495. Undergraduate Seminar. Cr. 1. F.S. Prereq: Junior or senior classification. Weekly seminar on topics of current research interest.

Geol 498. Cooperative Education. Cr. R. F.S.S. Prereq: Geol 100 or 201, 100L, 102, 102L, and permission of the department cooperative education coordinator; senior classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Courses primarily for graduate students, open to qualified undergraduate students.

Geol 502. Watershed Hydrology. (Dual-listed with 492). (Cross-listed with Agron, EnSci, Mteor). (3-3) Cr. 3. F. Prereq: Agron 100 or 201; Math 165 or 181; Phys 111 or 221. Physical principles of groundwater flow, nature and origin of aquifers and confining units, well hydraulics, groundwater modeling, and contaminant transport. Nonmajor graduate credit.

Geol 509. Field Methods in Hydrogeology. (Dual-listed with 409). (Cross-listed with EnSci). (0-4) Cr. 2. Alt. S., offered 2010. Prereq: 402 or 411 or C E 473. Introduction to field methods used in groundwater investigations. In-field implementation of pumping tests, slug tests, monitoring well installation and drilling techniques, geochemical and water quality sampling, seeage meters, piezometers, stream gaging, electronic instrumentation for data collection, and geophysics. Field trips to investigate water resources and contaminant transport projects. Nonmajor graduate credit.
Geophysics

Geol 515. Paleoclimatology. (Dual-listed with 415). (Cross-listed with EnSci). (3) Cr. 3. Alt. S., offered 2011. Prereq: Four courses in biological or physical science. Introduction to mechanisms that drive climate, including the interplay between oceanic and atmospheric circulation and fluctuation in Earth's orbital parameters. Examination and analysis of past climate records ranging from historical documentation to ecological and geochemical proxies (e.g. tree ring analysis; O and C isotopes of skeletal carbonates and soils). Dating methods used to constrain and correlate climatic periods; utility of computer models to reconstruct past climates and predict future climate change. Emphasis placed on paleoclimatology and paleoecology of the late Quaternary (last ~1 million years).

Geol 519. Environmental Geochemistry. (Dual-listed with 419). (Cross-listed with EnSci). (2-2) Cr. 3. F. Prereq: 511 or equivalent. Geochemistry of natural waters and water-rock interactions. Acid-base equilibria, carbonate chemistry and buffer systems, mineral dissolution and precipitation, sorption, ion exchange, and redox reactions. Introduction to thermodynamics and kinetics. Laboratory emphasizes chemical analysis of waters and computer modeling.

Geol 542. Optical Mineralogy. (1-2) Cr. 2. F. Prereq: Geol 311. Introduction to using the microscope for mineral identification. Optical properties of minerals in immersion oils and in thin section. Research project required.

Geol 551. Applied and Environmental Geophysics. (Dual-listed with 451). (Cross-listed with EnSci). (2-2) Cr. 3. S. Prereq: 100 or 201; Math 181 or equivalent experience. Seismic, gravity, magnetic, resistivity, electromagnetic, and ground-penetrating radar techniques for shallow subsurface investigations and imaging. Lab and interpretation methods. Lab emphasizes computer interpretation packages. Field work with seismic- and resistivity-imaging systems and radar.

Geol 552. GIS for Geoscientists. (Dual-listed with 452). (Cross-listed with Agron, EnSci). (2-2) Cr. 3. F. Prereq: Geol 100, 201 or equivalent. Introduction to geographic information systems (GIS) with particular emphasis on geoscientific data. Uses ESRI's ArcGIS Desktop Software and extension modules. Emphasizes typical GIS operations and analyses in the geosciences to prepare students for advanced GIS courses.

Geol 558. Introduction to the 3D Visualization of Scientific Data. (Cross-listed with HCl, Com S). (2-2) Cr. 3. Alt. S., offered 2011. Prereq: Graduate-student standing in the Mathematical or natural sciences. Introduction to visualizing scientific information with 3D computer graphics and their foundation in human perception. Overview of different visualization techniques and examples of 3D visualization projects from different disciplines (natural sciences, medicine, engineering). Class project in interactive 3D visualization using the OpenDX, VTK or a similar system.

Geol 574. Glacial and Quaternary Geology. (Dual-listed with 474). (2-2) Cr. 3. Alt. S., offered 2011. Prereq: 100 or 201. The study of the depositional and erosional processes of glaciers using modern glacial analogs and landforms. Discussion of glaciology, glacier hydrology, Quaternary history and stratigraphy, paleoclimatology, and causes of glaciation. Laboratory emphasizes aerial photo and topographic map interpretation and the Quaternary stratigraphy of Iowa. Two required field trips.

Geol 579. Surficial Processes. (Dual-listed with 479). (Cross-listed with EnSci). (2-2) Cr. 3. F. Prereq: Geol 100 or 201 or equivalent experience. Study of surficial processes in modern and ancient geological environments. Topics include weathering, sediment transport, and landform genesis with emphasis on fluvial, glacial, hillslope, eolian, and coastal processes. Applications to engineering and environmental problems. Laboratory emphasizes aerial photo and topographic map interpretation.

Geol 590. Special Topics. Cr. arr. Repeatable. Prereq: Permission of instructor.
A. Surficial Processes
B. Stratigraphy
C. Sedimentation
D. Paleontology
E. Petrology
F. Structural Geology
G. Geochemistry
H. Hydrogeology
I. Earth Science
J. Mineral Resources
K. Geophysics

Meteorology (Mteor)

Courses primarily for undergraduate students

Mteor 111. Synoptic Applications. (1-0) Cr. 1. Repeatable. F. Prereq: Credit or enrollment in Math 185. Current weather discussions and introduction to synoptic-scale interpretation of meteorology. Application and use of calculus in meteorology. Course restricted to majors. Others with permission of instructor.

Mteor 201. Introductory Seminar. (1-0) Cr. 1. F. An overview of the atmospheric sciences, the meteorology program at Iowa State, and the major research journals used in the discipline.

Mteor 206. Introduction to Meteorology. (Cross-listed with Agron). (3-0) Cr. 2. F. Basic concepts in meteorology, including atmospheric measurements, radiation, stability, precipitation, winds, fronts, forecasting, and severe weather. Applied topics include global warming, ozone depletion, world climates and weather safety. Self-study laboratory assignments utilize interactive computerized exercises, worksheets and computerized real-time forecasting. Self-study section may be available to distant education students.
Mteor 227. Computational Meteorology I. (3-1) Cr. 3. F. Prereq: Credit or concurrent enrollment in Mteor 206, credit or concurrent enrollment in Phys 221. An introduction to computer programming using FORTRAN with focus on meteorological applications. Emphasis on basic programming techniques and style through extensive practice in top-down design, writing, running, and debugging small programs. Topics include operations and functions, selective execution, repetitive execution, arrays, input/output, file processing, and subprograms. This course is designed for majors.

Mteor 298. Cooperative Education. Cr. R. F.S.S.S. Prereq: Permission of the department cooperative education coordinator; sophomore classification. Required of all cooperative education students. Students must register for this course prior to commencing the work period.

Mteor 301. General Meteorology. (4-0) Cr. 4. S. Prereq: Math 166, credit or enrollment in Phys 222. Global distribution of temperature, wind, and atmospheric constituents; atmospheric thermodynamics, radiative transfer, global energy balance, storms, and clouds, introductory dynamics. Nonmajor graduate credit.

Mteor 311. Introduction to Synoptic Meteorology. (1-2) Cr. 2. F. Prereq: 301. Concepts of weather map plotting and analysis. Introduction to forecasting and to the use of real-time UNIDATA computer products. Nonmajor graduate credit.

Mteor 321. Meteorology Internship. Cr. arr. Repeatable. F.S.S.S. Prereq: 311; junior or senior standing; permission of co-op program coordinator; acceptance by sponsoring agency. Supervised practical experience in a professional meteorological agency. Experiences may include weather prediction for radio, TV, utilities, government agencies, construction, or agribusiness.

Mteor 324. Energy and the Environment. (Cross-listed with Env S, Geol). (3-0) Cr. 3. S. Prereq: Math 166 or equivalent. Renewable and non-renewable energy resources. Origin, occurrence, and extraction of nuclear fuels. Nuclear, wind, and solar energy. Energy efficiency. Environmental effects of energy production and use, including air pollution, acid precipitation, groundwater contamination, nuclear waste disposal, and global climate change. Mteor 324 does not count toward credits required in the meteorology major.

Mteor 342. Atmospheric Physics II. (3-0) Cr. 3. S. Prereq: 341. Precipitation physics, radiative, and atmospheric radiation, atmospheric optics, atmospheric electricity. Nonmajor graduate credit.

Mteor 398. Cooperative Education. Cr. R. F.S.S.S. Prereq: Permission of the department cooperative education coordinator; junior classification. Required of all cooperative education students. Students must register for this course prior to commencing the work period.

Mteor 402. Watershed Hydrology. (Dual-listed with 502). (Cross-listed with Agron, EnSci, Geol, NREM). (3-3) Cr. 4. F. Prereq: Four courses in physical or biological sciences or engineering; junior standing. Examination of watersheds as systems, emphasizing field investigation and style through extensive practice in top-down design, writing, running, and debugging small programs. Topics include operations and functions, selective execution, repetitive execution, arrays, input/output, file processing, and subprograms. This course is designed for majors.

Mteor 404. Global Change. (Dual-listed with 504). (Cross-listed with Agron, EnSci, Env S). (3-0) Cr. 3. S. Prereq: Four courses in physical or biological sciences or engineering; junior standing. Recent changes in global biogeochemical cycles and climate, models of future changes in the climate system; impacts of global change on agriculture, water resources and human health; ethical issues of global environmental change. Nonmajor graduate credit.

Mteor 405. Environmental Biophysics. (Dual-listed with 505). (Cross-listed with Agron, EnSci). (3-0) Cr. 3. Alt. S., offered 2010. Prereq: Math 166 or equivalent. Hornbuckle. The physical microenvironment in which organisms live, with an emphasis on the processes of energy and mass (water and carbon) exchange between organisms and their environment and the quantitative models that represent these processes. Temperature, water, and wind. Heat, mass, and radiative transport. Applications to animals, plants, and plant communities.

Mteor 406. World Climates. (Cross-listed with Agron, EnSci). (3-3) Cr. 3. F. Prereq: Agron/Mteor 206. Arntt. Distribution and causes of different climates around the world. Effects of climate and climate variations on human activities including Society, economy and agriculture. Current issues such as climate change and international efforts to assess and mitigate the consequences of climate change. Semester project and in-class presentation required. Nonmajor graduate credit.

Mteor 411. Synoptic Meteorology. (Dual-listed with 511). (1-4) Cr. 3. F. Prereq: Credit or enrollment in 454. Current weather forecasting and discussion. Applications of atmospheric physics and dynamics in real-time weather situations. Use of UNIDATA computer products. Nonmajor graduate credit.

Mteor 417. Mesoscale Forecasting Laboratory. (Dual-listed with 517). (1-5) Cr. 3. S. Prereq: Credit or enrollment in 411. Real-time computer analysis of current weather situations. Use of UNIDATA computer products. Nonmajor graduate credit.

Mteor 432. Instrumentation and Measurements. (3-0) Cr. 3. S. Prereq: Credit or enrollment in Stat 106, Math 266, Phys 222. Measurement of meteorological variables and including surface, upper air, and remote sensors; measurement errors, signal processing, recording and archiving; quality assurance. Nonmajor graduate credit.

Mteor 450. Physics of Climate. (Dual-listed with 552). (3-0) Cr. 3. F. Prereq: Mteor 301. Exploration of the fundamental physical principles that govern the climate systems of the Earth and other planets. Emphasis on coupled, nonlinear system interactions of physical processes such as circulation dynamics, radiative transfer, and cloud/precipitation physics, starting with fairly simple 0- and 1-dimensional analytical and numerical models based on energy, mass, and momentum conservation. Observational study of seasonally evolving systems that form climates around the world. Nonmajor graduate credit.

Mteor 454. Dynamic Meteorology II. (3-0) Cr. 3. S. Prereq: 443. Planetary boundary layer, linear perturbation theory, atmospheric wave motions, baroclinic and convective instability, mesoscale circulations. Nonmajor graduate credit.

Mteor 490. Independent Study. Cr. arr. Repeatable. Prereq: 6 credits in meteorology, permission of instructor. No more than 9 credits in Mteor 490 may be counted toward graduation.

Mteor 499. Senior Research. (2-0) Cr. 2. F. Required of all senior meteorology majors. Research projects in collaboration with faculty. Written and oral presentations of results at the end of the semester.

Courses primarily for graduate students, open to qualified undergraduate students

Mteor 502. Watershed Hydrology. (Dual-listed with 402). (Cross-listed with EnSci, Geol). (3-3) Cr. 4. F. Prereq: Four courses in physical or biological sciences or engineering; junior standing. Examination of watersheds as systems, emphasizing the surface components of the hydrologic cycle. Combines qualitative understanding of hydrological processes and uncertainty with quantitative representation. Laboratory emphasizes field investigation and measurement of watershed processes.

Mteor 504. Global Change. (Dual-listed with 404). (Cross-listed with Agron, EnSci). (3-0) Cr. 3. F. Prereq: Four courses in physical or biological sciences or engineering; junior, senior, or graduate standing. Recent changes in global biogeochemical cycles and climate, models of future changes in the climate system; impacts of global change on agriculture, water resources and human health; ethical issues of global environmental change.

Mteor 505. Environmental Biophysics. (Dual-listed with 405). (Cross-listed with Agron, EnSci). (3-0) Cr. 3. Alt. S., offered 2011. Prereq: Math 166 or equivalent. Hornbuckle. The physical microenvironment in which organisms live, with an emphasis on the processes of energy and mass (water and carbon) exchange between organisms and their environment and the quantitative models that are used to represent these processes. Temperature, water, and wind. Heat, mass, and radiative transport. Applications to animals, plants, and plant communities. Semester project required.

Mteor 511. Synoptic Meteorology. (Dual-listed with 411). (1-4) Cr. 3. F. Prereq: Credit or enrollment in 454. Current weather forecasting and discussion. Applications of atmospheric physics and dynamics in real-time weather situations. Use of UNIDATA computer products.

Mteor 517. Mesoscale Forecasting Laboratory. (Dual-listed with 417). (1-5) Cr. 3. S. Prereq: Credit or enrollment in 411. Real-time computer analysis of current weather, with emphasis on small-scale features. Studies of severe weather, lake-effect snow, CSI, cold-air damming.
Mteor 518. Microwave Remote Sensing. (Cross-listed with Agron, E E). (3-0) Cr. 3. Alt. S., offered 2010. Prereq: Math 265 or equivalent or permission of instructor. Hornbuckle. Microwave remote sensing of Earth's surface and atmosphere. Overview of relevant electromagnetic theory and antenna theory. Planck emission and the radiative transfer equation. The electrical properties of natural materials at microwave frequencies. Specific examples include remote sensing of atmospheric temperature and water vapor, precipitation, and soil and vegetation water content.

Mteor 552. Physics of Climate. (Dual-listed with 452). (3-0) Cr. 3. F. Prereq: Mteor 301. Exploration of the fundamental physical processes that govern the climate systems of the Earth and other planets. Emphasis on coupled, nonlinear-system interactions of physical processes such as circulation dynamics, radiative transfer, and cloud/precipitation physics, starting with fairly simple 0- and 1-dimensional analytical and numerical models based on energy, mass, and momentum conservation. Observational study of seasonally evolving weather patterns that form climates around the world.

Mteor 561. Geophysical Fluid Dynamics. (3-0) Cr. 3. Alt. F., offered 2009. Prereq: 455 or E M 378 or M E 335 or Phys 361. Basic concept of rotating fluid dynamics, governing equations and boundary conditions, dynamics of vorticity, potential vorticity and geostrophic motion, wave motion in a rotating system, dynamics of Ekman and Stewartson layers, ocean circulation.

Mteor 590. Special Topics. Cr. arr. Repeatable. Prereq: Permission of instructor. Topics of current interest.

Courses for graduate students

Gerontology

www.iastate.edu/~gerontology

(International Departmental Minor and Interinstitutional Program)

Advisory Committee: P. Martin, Director; L. Alekel, W. Franke, J. Lempers, Fred Lorenz, Jennifer Margrett, Mack Shelley, A. Smiley-Oyen, R. West

The gerontology program is designed for students desiring careers in aging-related fields and for students interested in improving their understanding of aging persons in American Society. Students are expected to take courses to develop the necessary interdisciplinary breadth which, in combination with other disciplinary training, can prepare them to work with older adults.

Graduates understand the ways in which individual and Societal aging influence, and are impacted by, developments in their major field of study. They have an appreciation and understanding of the cross-disciplinary aspects of human aging.

Gerontology courses are offered in the interdepartmental gerontology program in the following participating departments and programs: Architecture; Biochemistry, Biophysics, and Molecular Biology; Economics; Apparel, Educational Studies, and Hospitality Management, Food Science and Human Nutrition; Health and Human Performance; Human Development and Family Studies; Political Science; Psychology; and Sociology.

Undergraduate Study

Christine Cook, Coordinator

Undergraduate study in this program provides the student with an opportunity to develop a minor in gerontology. A balanced grouping of courses assists the student in developing both a sensitivity to the issues and the ability to synthesize ideas from the variety of disciplines important to the study of the aging process.

Undergraduate students may minor in gerontology by taking 16 semester hours of gerontology related courses. Nine of these credits must come from the following courses: Geron 377, 386, 463. Students will participate in a practicum seminar, Geron 466, and will complete a supervised field practicum after all gerontology coursework is completed (Geron 467). A minimum of 3 semester credits must be selected from a list of supportive gerontology related courses. Supportive courses include units or topics related to aging and can be used to complement the student's major interests. The student's minor program must be approved by the gerontology coordinator.

Graduate Study

Karen Bermann, Coordinator

A declared graduate minor in gerontology consists of a minimum of 12 credits taken from a list of acceptable courses, and from at least two departments. Nine of the 12 credits must be in courses that are focused specifically on aging. One 590 course (3 credits maximum) can be taken as part of the 12 credits (circumstances Geron 510 is required for all minor students. At least one member of the gerontology faculty will be on a student's advisory committee; this person must be a member of the Graduate Faculty. Contact the coordinator to determine whether courses other than those listed below are available.

Gerontology is an interinstitutional distance education program offered through the Web. The student selects the home institution, which grants the degree. After admission at the home institution, the student takes courses from each of the six institutions: Iowa State University, Kansas State University, North Dakota State University, Oklahoma State University, Texas Tech University, and the University of Missouri.

At Iowa State University, gerontology is an area of specialization in the Master of Family and Consumer Sciences degree program of 36 semester hours. Nine of these hours are from the following courses: Geron 530, 534, 540, 545, 563, 577, 584, 594. The remaining 27 credits will include electives and specific courses needed to meet the requirements of the institution awarding the degree. Neither a thesis nor a creative component is required. A computer with CD-ROM drive, the capacity to access and download materials from the Internet, and a browser equivalent to Netscape/Explorer 4.0 or newer are required for completing the program. An e-mail address is essential as well, plus access to a VCR and a FAX.

Gerontology Graduate Certificate Program

The 21-credit Graduate Certificate Program in Gerontology includes five courses from the list of core courses: Geron 530, 534, 540, 585, 594. The additional six credits required for the certificate can be chosen from the remaining core courses or from other approved elective courses. A maximum of three credits of practicum also can be included in the elective credits.

Admission Procedures: Admission to the Gerontology Certificate Program requires exactly the same procedures as admission to the Graduate College. See Graduate College section of the catalog.

Registration: Students choosing to receive their degree from Iowa State University complete all the admissions, registration, and fee payment processes through ISU.
Courses primarily for undergraduate students

Geron 373. Death as a Part of Living. (Cross-listed with HD FS). (3-0) Cr. 3. F.Alt. SS., offered 2010. Prereq: HD FS 102. Consideration of death in the life span of the individual and the family with opportunity for exploration of personal and Societal attitudes.

Geron 377. Aging and the Family. (Cross-listed with HD FS). (3-0) Cr. 3. Prereq: HD FS 102. Interchanges of the aged and their families. Emphasis on role changes, social interaction, and independence as influenced by health, finances, life styles, and community development.

Geron 378. Economics of Aging. (Cross-listed with Econ, HD FS). (3-0) Cr. 3. S. Prereq: 3 credits in principles of economics and 3 credits in human development and family studies. Emphasis on economic Status of the aging, retirement planning and the retire-ment decision, role of Social Security, public transfer programs for the elderly, intra-family transfers to/from the elderly, private pensions, financing medical care and housing for the elderly, prospects and issues for the future.

Geron 463. Environments for the Aging. (Dual-listed with 563). (Cross-listed with HD FS). (3-0) Cr. 3. Prereq: 3 credits in principles of economics and 3 credits in human development and family studies. Emphasis on independent living within residential settings including specialized shelter, supportive services, and housing management. Application of criteria appropri-ate for accessibility and functional performance of activities; universal design principles. Creative project provides service learning opportunities.

Geron 466. Gerontology Prepracticum Seminar. (1-0) Cr. 1. F.S.SS. Prereq: 9 credits in core courses for the gerontology minor and approval of the gerontol-ogy undergraduate coordinator. Prepracticum training for students planning a gerontology practicum. Explo-ration of possible agencies for the practicum, in-depth study of a selected agency, and development of goals and objectives for the practicum.

Geron 490. Independent Study. Cr. arr. Consult program coordinator for procedure.

Courses primarily for graduate students, open to qualified undergraduate students

Geron 501. Seminar. Cr. arr. Repeatable. F.S.SS.

Geron 510. Survey of Gerontology. Cr. arr. Repeat-able. S. Provides an overview of important geronto-logical issues.

Geron 530. Perspectives in Gerontology. (Cross-list-ed with HD FS). (3-0) Cr. 3. F. 1WWW only. Overview of current aging issues including theory and research, critical social and political issues in aging, the interdisci-plinary focus of gerontology, career opportunities, and aging in the future.

Geron 534. Adult Development. (Cross-listed with HD FS). (3-0) Cr. 3. F. On campus. S. 1WWW only. Exploration of the biological, psychological, and social factors associated with aging. Although the focus is on the later years, information is presented from a life-span developmental framework. Empirical studies are reviewed and their strengths, limitations and implications for normative and optimal functioning are discussed.

Geron 540. Nutrition and Physical Activity in Aging. (Cross-listed with Diet). (3-0) Cr. 3. F. Alt. F, offered 2010. 1WWW only. Basic physiologic changes during aging and their impact on health and disease. The focus will be on successful aging with special emphasis on physical activity and nutrition. Practical application to community settings is addressed.

Geron 545. Economics, Public Policy, and Aging. (Cross-listed with HD FS). (3-0) Cr. 3. Alt. F, offered 2010. 1WWW only. Policy development in the context of the economic Status of the older adult population. Retirement planning and the retirement decisions; so-cial security and public transfer programs; intra-family transfers to/from the aged; private pensions; financing medical care; prospects and issues for the future.

Geron 563. Environments for the Aging. (Dual-listed with 463). (Cross-listed with HD FS). (3-0) Cr. 3. Alt. S., offered 2010. Prereq: HD FS 360 or 3 credits in housing, architecture, interior design, rehabilitation, psychology, or human development and family stud-ies. Emphasis on independent living within residential settings including specialized shelter, supportive services and housing management. Application of criteria appropri-ate for accessibility and functional performance of activities; universal design principles. Creative project provides service learning opportuni-ties.

Geron 571. Design for All People. (Cross-listed with Arch, Dsn Sj). (3-0) Cr. 3. S. Prereq: Senior classification or graduate standing. Principles and procedures of universal design in response to the varying ability level of users. Assessment and analysis of existing buildings and sites with respect to standards and details of accessibility for all people, including visually impaired, mentally impaired, and mobility restricted users. Design is neither a prerequisite nor a required part of the course. Enrollment open to students majoring in related disciplines. Credit counts toward fulfillment of Studies in Architecture and Culture requirements.

Geron 590. Special Topics. Cr. arr. Repeatable. Con-sult program coordinator for procedure.

Geron 594. Professional Seminar in Gerontology. (Cross-listed with HD FS). (3-0) Cr. 3. Alt. SS., offered 2010. 1WWW only. Overview of professional experiences in gerontol-ogy students designed to be taken near the end of the degree program. By applying knowledge gained in earlier coursework, students will strengthen skills in ethical decision-making behavior, applying these skills in gerontology-related areas such as advocacy, profes-sionalism, family and workplace issues. Students from a variety of professions will bring their unique perspectives to bear on topics of common interest.

Global Resource Systems

http://www.globe.iastate.edu

Gail R. Nonnecke, Faculty Coordinator

Supervisory Committee: David Acker, Richard Hall, Arne Hallam, Jeffrey Iles, Kendall Lamkey, Ruth MacDonald, and Robert Martin

Global Resource Systems is a cutting-edge, interdisciplinary, college-wide major that prepares students to make a difference in the world. This major is offered by the College of Agriculture and Life Sciences. The major emphasizes global and cross-cultural competency while equipping students with a strong technical competency in a resource area of their choice. The interdisciplinary program is designed to prepare students to work on complex global resource issues through leader-ship positions in global businesses, governmental agencies engaged in international trade and development, non-governmental organizations and globally engaged foundations, educational institu-tions, and volunteer organizations. It aims to pro-duce systemic thinkers and problem solvers with a global perspective who are trained in resource issues and able to lead teams representing high levels of cultural diversity. Students interested in this major are encouraged to contact the Faculty Coordinator at globe@iastate.edu.

Undergraduate Study

The Global Resource Systems undergradu-ate major empowers students with a truly interdisciplinary and systemic approach to understanding complex global resource issues. The major allows students to develop a core set of technical competencies in a resource area selected from among the 23 minors and certificates offered by the College of Agriculture and Life Sciences. Students choose a world region in which to specialize, develop compet-enncy in a relevant world language, participate in a significant cross-cultural living and working immers-ion experience in their chosen world region, and carry out a senior project related to their resource specialization within the context of the world region.

Multidisciplinary themes will be developed in the context of the physical, biological and sociological factors affecting global resource systems. In this context, resource systems will include agricultural (including crops, livestock and aquaculture), food, fuel, natural, environmental, biological, financial, governmental, institutional, human, knowledge, and other resources. Graduates of this program will have a deepened transnational leadership skills and will be successful integrators of various specializations on a team. They will be skilled in developing a systemic perspective and accomplished at solving complex global resource systems problems.

Courses for undergraduate students

Globe 110. Orientation. (1-0) Cr. 1. F. An introduction to Global Resource Systems (GRS) program, development of student and professional skills, participation in GRS Learning Community and service learning project.

Globe 211. Issues in Global Resource Systems. (1-0) Cr. 1. Repeatable. F.S. Prereq: credit or enrollment in 201. Discussion of topics of current importance in global resource systems. A maximum of 3 credits of 211 may be used towards degree requirements.

Globe 221. Apprenticeship. Cr. R. Repeatable. F.S.SS. Prereq: Approval by the Global Resource Sys-tems Faculty Coordinator. Practical work experience in approved domestic or international settings such as with a company, research laboratory, governmental agency or non-governmental organization. Satisfac-tory-fail only.

Globe 290. Independent Study. Cr. arr. Repeat-able. F.S.SS. Prereq: Approval of the instructor and approval by the Global Resource Systems Faculty Co-ordinator. Independent study on topics of special in-terest to the student. Comprehensive report required. Intended primarily for freshmen and sophomores. H. Honors
Globe 301. Resource Systems of Industrialized Nations. (2-3) Cr. 3. F. Prereq: 201, Econ 101 or 102. In-depth analysis of the opportunities, constraints and consequences of the resource systems common in industrialized nations. Topics integrate natural resources with land tenure, social structure, food security, agriculture, shelter, energy and wealth dynamics.

Globe 302. Resource Systems of Developing Nations. (2-3) Cr. 3. S. Prereq: 201, Econ 101 or 102. In depth appraisal of resource systems common throughout the developing world. Topics integrate natural resources with land tenure, social structure, food security, agriculture, shelter, energy and wealth dynamics.

Globe 321. Internship - Global. Cr. arr. Repeatable. Prereq: Junior or Senior and enrollment in Global Resource Systems major; permission of the instructor and approval by the Global Resource Systems Faculty Coordinator. A supervised learning experience including an analysis of an international location’s resource system via immersion in a foreign culture lasting at least five weeks. The experience should focus on the region consistent with the student’s degree track. A maximum of 12 credits of 321 and 322 may be used for degree requirements.

Globe 322. Internship - United States. Cr. arr. Repeatable. Prereq: Junior or Senior and enrollment in Global Resource Systems major; permission of the instructor and approval by the Global Resource Systems Faculty Coordinator. A supervised learning experience including an analysis of a domestic location’s resource system via immersion in a different culture within the United States lasting at least five weeks. Designed for international students and for students who are not in a position to leave the United States. A maximum of 12 credits of 321 and 322 may be used for degree requirements.

Globe 401. Senior Project. Cr. 3. F.S. Prereq: Senior classification in Global Resource Systems. Research project in collaboration with faculty that complements and furthers the student’s experiences from Globe 321 and 322 while simultaneously bringing into focus entire four-year experience. Student will write a research report and make either an oral or poster presentation. H. Honors

Globe 402. Responses to Global Resource System Challenges. (1-4) Cr. 3. S. Capstone analysis of critical challenges facing global resources and, especially, identification of alternative solutions.

Globe 446. International Issues and Challenges in Sustainable Development. (Cross-listed with Agron, IntStSt) Cr. 4. S. Prereq: 3-credit biology course, Sophomore or higher classification, permission of Instructor. Mullen. Interdisciplinary study and analysis of agricultural, biophysical, environmental, sociological, economical, political, and historical factors affecting sustainable development of communities and countries from art and science perspectives. International field experience with foreign language training required. A program fee is charged to students for international study abroad.

Globe 490. Independent Study. Cr. arr. Repeatable. F.S.SS. Prereq: Permission of the instructor and approval by the Global Resource Systems Faculty Coordinator. Independent study on topics of special interest to the student. Comprehensive report required. Intended primarily for juniors and seniors. A maximum of 4 credits may be used for degree requirements. E. Entrepreneurship H. Honors Z. Service Learning

Globe 495. Global Resource Systems Study Abroad Course Preparation. Cr. R. Repeatable. F.S. Prereq: Permission of instructor. Global resource systems topics will include the agricultural industries, climate, crops, culture, economics, food, geography, government, history, livestock, marketing, natural resources, public policies, soils, and preparation for travel to locations to be visited. Students enrolled in this course intend to register for Globe 496 or 497 the following term.

Globe 496. Global Resource Systems Study Abroad. Cr. arr. Repeatable. F.S.SS. Prereq: Permission of instructor. Extended field trips abroad to study global resource systems. Location and duration of trips will vary. Pre-trip sessions arranged through Globe 495. Trip expenses paid by students.

Globe 497. Deans Global Ag and Food Leadership Program. Cr. arr. Repeatable. F.S.SS. Prereq: Permission of instructor. An integrated agricultural and food production and policy program that allows students to assess, analyze and evaluate complex, country-specific situations and to develop their skills, knowledge and abilities via team-oriented projects that involve complex issues such as development of effective foreign food aid and agricultural and food production systems, drivers of world hunger, sustainable resource management and efficacy of policy, and the role of the USA and the United Nations and other development agencies in these systems. International location and duration of program will vary. Pre-trip sessions arranged through Globe 495. Trip expenses paid by students.

Globe 499. Undergraduate Research. Cr. F. Prereq: Permission of the instructor and approval by the Global Resource Systems Faculty Coordinator. Research projects in collaboration with faculty.

Graduate Studies

No major is granted in Graduate Studies. At the recommendation of the major professor and/or the department chair, graduate students may enroll in the following graduate courses to fulfill certain enrollment requirements.

Courses for graduate students

Gr St 585. Preparing Future Faculty Introductory Seminar. Cr. 1. Prereq: One year of graduate course work; admission into PFF program. Introduction to faculty life issues such as hiring, tenure, teaching, and service at a variety of higher education institutions. Includes presentations from faculty at other institutions.

Gr St 586. Preparing Future Faculty Intermediate Seminar. Cr. 1-3. Prereq: Admission into PFF program; completion of 585 or permission of instructor. Consideration of a wide range of faculty life issues. Includes topics such as higher education trends, diversity issues, learning styles, assessment, grant and proposal writing, and legal and ethical issues. Written components include job and teaching portfolios.

Gr St 587. Preparing Future Faculty Teaching Practice. Cr. 1. Prereq: Permission of instructor, 585, credit for or concurrent enrollment in 586. Students complete a stand-alone teaching assignment at Iowa State or another higher education institution. Written components include pedagogical documents.

Gr St 588. Preparing Future Faculty Special Topics. Cr. 1-3. Prereq: Permission of instructor, 585, credit for or concurrent enrollment in 586. In-depth study of topic providing academic professional development.

Gr St 600. Examination Only. Cr. R. Reserved for graduate students the term they take the final oral examination. Students must have completed all required coursework and not be registered for another course.

Gr St 601. Required Enrollment. Cr. R. Reserved for graduate students who must be registered for a particular term, but are not required to take additional coursework.

Gr St 680. Doctoral Post Prelim (Continuous) Registration. Cr. R. Repeatable. Reserved for Ph.D. candidates only. See the Graduate College Handbook for specific requirements.

History

www.history.iastate.edu/

Charles Dobbs, Chair of Department

University Professors (Emeritus): Schwieder

Professors: Adeleke, Cravens, Dobbs, Goedeken, Liu, Riney-Kehrberg, Wilson

Professors (Emeritus): Bennett, Dobson, Geiger, Keller, Kottman, Lowitt, Marcus, McJimsey, Plakans, Rawson, Schofield

Associate Professors: Andrews, Bix, Griffiths, Holland, Monroe

Associate Professors (Emeritus): Avraamides, Pope, Whitaker

Assistant Professors: Bailey, Byars, Delcastillo, Hilliard, Houghtby, Sadowsky

Assistant Professors (Emeritus): Madison, Osborn, Zaring

Assistant Professor (Adjunct): Schneider

Lecturer: Hill

The History department offers curricula leading to the B.A. and B.S. degrees in history, the M.A. degree in history, the M.A. and Ph.D. degrees in the history of technology and science, and the Ph.D. degree in agricultural history and rural studies.

The department offers a variety of survey courses (200 series) designed to serve primarily first- and second-year students as either general education courses or as introductions to advanced courses in history or other subject areas. In addition to 200-level survey courses, it offers advanced undergraduate courses in the history of Europe, Asia, Latin America, the United States, technology and science, agriculture, and other selected topics.

Undergraduate Study

The History major. For a description of the undergraduate curriculum with a major in History see Liberal Arts and Sciences, Curriculum. History majors may earn either a bachelor of arts or bachelor of science degree. The minimum required for a major in history is 36 credits, of which at least 24 must be in courses numbered 300 or above.

Students may take a maximum of 12 credits at the 200-level, a maximum of 15 credits at the 300-level, and must take a minimum of 12 credits at the 400-level or above. A minimum of 15 credits numbered 300 or above must be taken in residence at Iowa State. Candidates for the B.A. must complete two years of university-level study in one foreign language or the equivalent.

Objectives for History Majors

1. Display the appropriate level of critical knowledge of historical themes and events based upon the student’s course of study.

2. Display an understanding of past cultures and social organizations, based on the course of study.

3. Develop the fundamental methodological skills of the historical craft:
   - The ability to contextualize and analyze primary source evidence.
   - Familiarity with the concepts of historical argument and interpretation, and the ability to formulate effective argumentation in written and oral forms.

4. Display a sophisticated understanding of the relationship between past events and the present.
For purposes of outcomes assessment, all History majors must complete three credits of History 495 or, if qualified and willing, one graduate level writing/research seminar.

Communication Proficiency requirement: History majors must receive a grade of C or better in each of Eng 150 and 250 (or 250H), and Hist 495 or any graduate seminar.

For a description of the major in History as preparation for professional programs, see Preprofessional Study. Students majoring in History may also earn a second major in International Studies; see International Studies.

Majors must distribute their courses across geographic and chronological areas such that they take at least 3 credits at the 300-level or above in five of the following six areas:

- U.S. history
- European history
- African/American history
- Latin American history
- Ancient history (pre-500)
- Medieval and early-modern history (ca. 500-1750), and modern history (post-1750)

It is expected that individual courses will fulfill both a geographic and a chronological area. For example, a course on nineteenth century France would count as both European history and modern history. No single course, however, may be used to fulfill more than one geographic and one chronological area. If a course stretches significantly across two or more areas, students will select which geographic and/or chronological area they want the course to fulfill. The History Department undergraduate adviser should be consulted as to which courses fulfill what areas. History 495 may not be used to fulfill any area.

The department offers a minor in History, which may be earned with 15 credits in History courses, of which at least 9 credits must be in courses numbered 300 or above, excluding Hist 490. A minimum of 9 credits numbered 300 or above must be taken at Iowa State. The College of Liberal Arts and Sciences requires students to earn a C or higher in at least 6 of the required 300-level credits. The History minor is most frequently chosen by students majoring in Political Science, English, Journalism, Computer Science, and Business.

Graduate Study

Graduate students may take any 400-level history course except 490 and 495 for graduate credit. No more than 12 credits of 400-level courses, however, may be used toward the minimum credits required for a graduate degree in history. Additional work is required for graduate credit in 400-level courses.

Most history graduate courses are either preseminars or seminars. Preseminars acquaint students with the historical literature of a field and prepare them for careers in teaching and research. Seminars require students to conduct original historical research and to write extensive research papers reporting the results.

The M.A. in history. For the M.A. in history, students may elect a thesis or a nonthesis program. See the departmental website on the M.A. in History for a full discussion of the options and requirements. An M.A. in History serves as the basis for continued study in history, as well as preparation for careers in law, education, business, and government service. For international students, a TOEFL score of 600 is required at the time of admission.

The M.A. and Ph.D. in history of technology and science. The Graduate program in the history of technology and science examines the role of technology and science in the formation of modern societies and their attitudes toward people and the world. The program is structured in a sequence of courses leading to the M.A. and Ph.D. degrees. Since these courses approach their subject in the context of social and cultural change, they are also open to and appropriate for students in engineering, the sciences, science education, and science journalism. For a thorough description of the program requirements, see the department's website on the history of technology and science program.

The Ph.D. in agricultural history and rural studies. The program is designed as a Ph.D. program, but students without an M.A. in history will be expected to qualify for the departmental M.A. in history while progressing toward the doctorate.

In some cases, the M.A. may be recommended as the terminal degree. Thirty semester hours of graduate credit are required for the M.A. and 72 for the Ph.D. Students who continue beyond the M.A. are expected to pass preliminary examinations in four areas of specialization, complete a dissertation, and defend it orally in the Ph.D. final examination. See the departmental website on the program for a full description of requirements.

Courses primarily for undergraduate students

Hist 201. Introduction to Western Civilization I. (3-0) Cr. 3. F. Western civilization from ancient Mediterranean world to 1500. Social and cultural developments; economic and political ideas and institutions; problems of historical change and continuity.

Hist 202. Introduction to Western Civilization II. (3-0) Cr. 3. S. Western civilization from 1500 to present. Social and cultural developments; economic and political ideas and institutions; problems of historical change and continuity.

Hist 207. Chinese Civilization. (3-0) Cr. 3. C. Origins, development, and transformation of China from earliest times to present.

Hist 211. Survey of United States History I. (3-0) Cr. 3. F. Colonial foundations; revolution, confederation, and constitution; nationalism and democracy; sectional disunity; Civil War, and reunion.

Hist 222. Survey of United States History II. (3-0) Cr. 3. S. Industrialization; emergence as a great power; boom and depression; war, internationalism and Cold War; modern industrial society.

Hist 245. Introduction to Latin American History. (3-0) Cr. 3. Latin America from pre-conquest times to the present. Economic, social, political, and cultural developments; problems of historical change and continuity.

Hist 281. Introduction to History of Science I. (3-0) Cr. 3. F. Ideas of nature from ancient Greece to the seventeenth-century scientific revolution.

Hist 282. Survey of World History: Ancient to Modern World: Ancient to Early Modern. (3-0) Cr. 3. The world from pre-conquest times to the present. The focus of the course is on the major developments of Western society, the major political and economic institutions, and the major cultural achievements that have shaped the modern world. The course examines the major developments of Western society, the major political and economic institutions, and the major cultural achievements that have shaped the modern world.

Hist 284. Wonders of the World. (3-0) Cr. 3. The history of the world's most famous works of art, architecture, technology, and culture from prehistoric times to the present. The course examines the major developments of Western society, the major political and economic institutions, and the major cultural achievements that have shaped the modern world.

Hist 304. Cultural Heritage of the Ancient World. (Cross-listed with Cl St). (3-0) Cr. 3. Prereq: Sophomore classification. Historical examination of art, literature, thought, and religious beliefs of major civilizations of the ancient Mediterranean countries until the end of the 8th century.

Hist 305. Cultural Heritage of the Modern World. (3-0) Cr. 3. Prereq: Sophomore classification. Examination of parallel formal and structural elements in scientific and social thinking, technological design, and composition in literature, music, theater, and other entertainments. Diné novels, vaudeville, rock and roll music, Hol- lywood and establishment of professional athletic leagues are among the cultural artifacts and phenomena considered.

Hist 316. History of Medieval Europe, 300-1500. (3-0) Cr. 3. Prereq: Sophomore classification. Survey of political, social, and cultural developments in western Europe for the entire medieval period, 300-1500.

Hist 323. Science and Religion. (Cross-listed with Religion). (3-0) Cr. 3. Prereq: Sophomore classification. History of changing interplay of science and religion in our understanding the nature, from the trial of Galileo to the reception of Darwin.

Hist 337. History of Modern China I. (3-0) Cr. 3. Prereq: Sophomore classification. China from 1644 to 1912; internal and external stimuli on traditional structure leading to reform and revolution.

Hist 338. Modern Japanese History. (3-0) Cr. 3. Prereq: Sophomore classification. Japan 1600 to the present; emphasis on transformation of feudal Japan into a post-industrial Society.

Hist 341. History of Latin America II. (3-0) Cr. 3. Prereq: Sophomore classification. Modern Latin American national origins from 1800 to present.

Hist 351. Social and Cultural History of American People I. (3-0) Cr. 3. Prereq: Sophomore classification. History of ordinary Americans from 1600; development of society; dissemination of popular ideas; living conditions, work, and play; the arts, music, architectural styles, material culture; rural and urban lifestyles; majority-minority and gender relations; religion, mass culture, corporations, and technology in modern times.

Hist 352. Social and Cultural History of American People II. (3-0) Cr. 3. Prereq: Sophomore classification. History of ordinary Americans since 1900; development of society; dissemination of popular ideas; living conditions, work, and play; the arts, music, architectural styles, material culture; rural and urban lifestyles; majority-minority and gender relations; religion, mass culture, corporations, and technology in modern times.
Hist 353. History of African Americans I. (Cross-listed with Af Am). (3-0) Cr. 3. Prereq: Sophomore classification. Examines African roots of black culture and the African American experience in the United States from the colonial period through the Civil War. Topics include Atlantic Slave Trade, slavery and American identity, abolition, the emergence of Black Nationalism, and black participation in the Civil War.

Hist 354. History of African Americans II. (Cross-listed with Af Am). (3-0) Cr. 3. Prereq: Sophomore classification. Explores African American political thought and political action from Reconstruction to the present. Topics include rise of Jim Crow segregation, urban migration, Garvey movement, Harlem Renaissance, Depression and world wars, Pan-Africanism, civil rights, Black Power, and black feminism.

Hist 355. Slavery and the Crisis of Union. (3-0) Cr. 3. Prereq: Sophomore classification. Examines causes and primary events of the sectional crisis over slavery leading up to the Civil War. Missouri Crisis through Presidential Election of 1860.

Hist 360. U.S. 1900 to 1945. (3-0) Cr. 3. Prereq: Sophomore classification. Examines American society in transition and crisis: Progressivism, World War I, the twenties, the Great Depression, and World War II.

Hist 361. U.S. 1945 to the Present. (3-0) Cr. 3. Prereq: Sophomore classification. From the Cold War to the Baby Boom to the liberal swing of the 1960s back to the conservative counter-swing thereafter.

Hist 367. Topics in American Agriculture. (3-0) Cr. 3. Prereq: Sophomore classification. Thematic approach to the development of the American agricultural system. Topics vary; examples include food and agriculture, animals in agriculture, and systems of production.

Hist 370. History of Iowa. (3-0) Cr. 3. Prereq: Sophomore classification. Survey of major social, cultural, and economic developments in Iowa from the late 1700s. Emphasis on rural life, early economic development, industrial development, educational and religious development, and outstanding personalities.

Hist 374. Women in the Ancient Mediterranean World. (Cross-listed with Cl St, W S). (3-0) Cr. 3. Repeatable. S. Prereq: Any one course in Cl St, W S, Latin, or Greek. Chronological and topical survey of the Status of women in the Ancient Mediterranean world; study of constructs of the female and the feminine. Readings from ancient and modern sources. Emphasis on either the Greek world and Hellenistic Egypt, or Hellenistic Egypt and Rome. A. Hellenic World and Hellenistic Egypt B. Roman World including Roman Egypt

Hist 376. Classical Archeology. (Cross-listed with Cl St, Relig). (3-0) Cr. 3. Repeatable. Chronological survey of the material culture of the ancient Greece, Roman world and the role of archaeological context in understanding the varied aspects of ancient Greek or Roman culture. Among other topics, economy, architecture, arts and crafts, trade and exchange, religion and burial customs, will be explored.

A. Bronze Age (Minoan and Mycenaean palatial cultures) and Early Iron Age Greece. (ca 3000-700 BC).
B. Archaic through Hellenistic Greece (ca 700-30 BC).

Hist 380. History of Women in Science, Technology, and Medicine. (Cross-listed with W S). (3-0) Cr. 3. Prereq: Sophomore classification. History of women’s relationship to the fields of science, technology, and medicine, as students and professionals, consumers, subjects and patients, family members, workers and citizens. Concentrates especially on 19th and 20th century United States, concluding with an examination of current issues of special interest to women in science, technology, and medicine.

Hist 383. Technology, Public Science, and European Culture, 1715-Present. (3-0) Cr. 3. Prereq: Sophomore classification. A survey from the Age of Enlightenment to the end of the twentieth century of the relationship between science, technology, and public or popular culture in a comparative European context (including Russia and the former Soviet Union).

Hist 386. History of Women in America. (Cross-listed with W S). (3-0) Cr. 3. Prereq: Sophomore classification. A survey of social, economic, and political aspects of women’s role from colonial era to present; emphasis on employment, education, concepts of sexuality, and changing nature of the home.

Hist 388. History of Modern Astronomy. (3-0) Cr. 3. Prereq: Sophomore classification. An in-depth investigation of the cosmos, including the birth of the universe from Galileo to Edwin Hubble and beyond.

Hist 390. World Military History. (3-0) Cr. 3. Prereq: Sophomore classification. American military history from the colonial wars to the present, including Revolutionary War, Mexican War, Civil War, First and Second World Wars, Korean War, Vietnam War, and Gulf Wars.

Hist 395. Modern England. (3-0) Cr. 3. Prereq: Sophomore classification. Thematic approach to the history of the British Empire. Topics vary: examples include empire and race, colonialism and empire, the arts and the sciences, the Common Law, and the development of the British Empire.

Hist 405. History of the Early Middle Ages. (3-0) Cr. 3. Prereq: Sophomore classification. General coverage of political, economic, social, and cultural developments in high medieval Europe, 1000-1300; in-depth coverage of particular issues and topics. Nonmajor graduate credit.

Hist 408. Europe, 1500-1648. (3-0) Cr. 3. Prereq: Sophomore classification. Northern Renaissance; Church and Luther; Protestant reform and Roman-Catholic counter-reform; social, cultural, and economic changes; Spain in triumph and decline; religious wars and influence of France. Nonmajor graduate credit.

Hist 419. History of Modern France. (3-0) Cr. 3. Prereq: Sophomore classification. From absolutism to revolution and the rise of modern democracy. Nonmajor graduate credit.

Hist 420. France’s Revolutionary Century, 1715-1815. (3-0) Cr. 3. Prereq: Sophomore classification. An in-depth investigation of the French Revolution, its causes and consequences, beginning in the Ancien Regime and ending with the fall of Napoleon. Nonmajor graduate credit.

Hist 421. History of Russia I. (3-0) Cr. 3. Prereq: Sophomore classification. Russia to 1850. Origins of Russian people; Byzantine influences; Mongol invasion; rise of Moscow; Westernization. Nonmajor graduate credit.

Hist 422. History of Russia II. (3-0) Cr. 3. Prereq: Sophomore classification. Russia since 1850. Reform and revolution; transformation of society; USSR as a world power; recent changes. Nonmajor graduate credit.

Hist 424. History of Modern Germany. (3-0) Cr. 3. Prereq: Sophomore classification. Political, social, and cultural history of Germany from the 19th century to the present. Nonmajor graduate credit.

Hist 427. Crime and Policing in England 1550-1850. (3-0) Cr. 3. Prereq: Sophomore classification. Course examines different forms and ideas of criminality and the nature and development of law enforcement in England between 1550 and 1856. Significant issues will include the nature of criminal records and Statistics, the legal system, the politics of the law and its links with social relations, policing, female crime, juvenile delinquency, organized crime, riots, “social crime,” and the treatment of crime in creative literary texts. Nonmajor graduate credit.

Hist 428. Punishment, Mentalities, and Society in England, 1550-1898. (3-0) Cr. 3. Prereq: Sophomore classification. Explores the history of punishing criminals in England and shows how interdisciplinairy perspectives, ideas, and practices of punishment are related to mentalities, and to-Socio-economic change. Significant issues will include the nature of medical records and Statistics, the legal system, the politics of the law and its links with social relations, policing, female crime, juvenile delinquency, organized crime, riots, “social crime,” and the treatment of crime in creative literary texts. Nonmajor graduate credit.

Hist 429. “Monstrous London”: London’s Histories 1500-1800. (3-1) Cr. 4. Prereq: Sophomore classification. Study of London’s social, economic, cultural, political, and environmental history 1500-1800, using both quantitative and qualitative methods to examine contemporary and secondary sources. Course combines standard lecture and discussion format with one week of intensive study abroad for 4th hour of course credit. Nonmajor graduate credit.

Hist 443. Science, Technology, and Medicine in Latin America. (3-0) Cr. 3. Prereq: Sophomore classification. Development of science, technology, and medicine in Latin America from pre-colonial times to the present. Themes include: intersection of science, medicine, and technology with colonization, impact of human populations on environments, formation of nation-states, spread of disease, and how perceptions of accepted scientific knowledge change over time. Nonmajor graduate credit.
Courses primarily for graduate students, open to qualified undergraduate students

Hist 510. Proseminar in East Asian History. (3-0) Cr. 3. Repeatable. Prereq: Permission of instructor. Readings in East Asian history. Topics vary each time offered.

Hist 511. Proseminar in American History. (3-0) Cr. 3. Repeatable. Prereq: Permission of instructor. Readings in American history. Topics vary each time offered.

A. Colonial Period
B. Nineteenth Century
C. Twentieth Century
D. Environment
E. Social and Cultural

Hist 512. Proseminar in European History. (3-0) Cr. 3. Repeatable. Prereq: Permission of instructor. Readings in European history.

A. Ancient (Same as CI St 512A)
B. Medieval
C. Modern

Hist 513. Proseminar in Latin American History. (3-0) Cr. 3. Repeatable. Prereq: Permission of instructor. Readings in Latin American history. Topics vary each time offered.

Hist 530. Proseminar in Modern Russian/Soviet History. (3-0) Cr. 3. Repeatable. Prereq: Hist 422. Readings in modern Russian history. Topics vary each time offered.

Hist 550. Proseminar in European Rural and Agricultural History. (3-0) Cr. 3. Repeatable. Prereq: Permission of instructor.

A. Modern European Rural Life
B. Twentieth Century Europe

Hist 552. Proseminar in American Rural and Agricultural History. (3-0) Cr. 3. Repeatable. Prereq: Permission of instructor.

A. American Agriculture
B. Agrarian Reform Movements
C. Midwestern Rural Society
D. Women in Rural Life

Hist 570. Seminar in General History of Science I. (3-0) Cr. 3. Prereq: Permission of instructor. The history of science from pre-classical civilizations to the Age of Isaac Newton with emphasis on the historical literature, varying interpretations of the period, and problems for continuing research.

Hist 571. Seminar in General History of Science II. (3-0) Cr. 3. Prereq: Permission of instructor. The history of science from Isaac Newton to modern times, with emphasis on the historical literature, varying interpretations of the period, and problems for continuing research.

Hist 575. Seminar in General History of Technology. (3-0) Cr. 3. Prereq: Permission of instructor. The history of technology from the 11th century to the present, with emphasis on the historical literature, differing interpretations of major problems, and problems identified for college-level teaching and for further scholarly research.

Hist 576. Colloquium in Historiography of Technology and Science. Cr. R. F. Topical lectures, reports, and discussion of methodology and research in history of technology and science. Required of all graduate students in history of technology and science program.

Hist 580. Museum or Archive Internship. (3-0) Cr. arr. Prereq: 15 graduate credits in history and department chair. Reading and reports on problems selected in conference with each student. No more than 6 credits of Hist 490 may be counted toward graduation.

Hist 583. Historical Methods. (3-0) Cr. 3. Study of evidence, theory, and methods.

A. Historical Narrative
B. Statistical Evidence and Analysis

opportunities for independent study and research

Honors Program Director. Most departments offer courses by making appropriate arrangements with students may designate any course as an Honors course in addition to established Honors courses, Honors courses are listed by department or field. Honors courses are open to Honors Program members, have limited enrollment and are taught by specially selected instructors. Most of these courses are listed by department or program. (See Econometrics, Engineering, English, Mathematics, Physics, Psychology, and Speech Communication.)

In addition to established Honors courses, Honors students may designate any course as an Honors course by making appropriate arrangements with the course instructor and obtaining approval of the Honors Program Director. Most departments offer opportunities for independent study and research under 290 and 490; when designated by an H, these courses also carry Honors credit. Research grants are available to support Honors research.

Courses primarily for undergraduate students
Hon 121. First-Year Honors Seminar. (0-2) Cr. 1. F. Prereq: Membership in the First-Year Honors Program: Orientation to Iowa State University and to the University Honors Program. Satisfactory-fail only.

Hon 290. Special Problems. Cr. arr. Repeatable. Prereq: Permission of instructor. Topics vary each time offered.
A. Colonial Period
B. Nineteenth Century
C. Twentieth Century
D. Environmental

Hon 594. Seminar in European History. (3-0) Cr. 3. Repeatable. Prereq: Permission of instructor. Topics vary each time offered.
A. Ancient (Same as Cl St 594A)
B. Medieval
C. Modern

Courses for graduate students
Hon 602. Seminar on History of Science and Technology. (3-0) Cr. 3. Repeatable. Prereq: Permission of instructor. Emphasis varies each time offered.

Hon 610. Seminar on American Rural Life. (3-0) Cr. 3. Prereq: Permission of instructor. Emphasis varies each time offered.

Honors Program
http://www.honors.iastate.edu/
Susan Yager, Chair, University Honors Committee

The Honors Program provides a vehicle for highly motivated and able students to pursue an innovative and challenging undergraduate education. Oversight of students’ progress toward this goal is primarily the responsibility of the undergraduate colleges, each of which operates its own Honors Program. The college Honors Program committees advise students into the Program, approve programs of study, and are responsible for the administration of their college Honors Program. The University Honors Program Committee, which includes the chairs of the college programs, is responsible for the general coordination of the college Honors Programs and the First-Year Honors Program.

Students in the Honors Program are offered a variety of academic opportunities designed to help them derive the fullest benefit from their undergraduate education. To enhance their individualized programs of study, students are offered numerous Honors courses, seminars, and independent research opportunities.

Honors courses and Honors sections of regular courses are offered by several departments and programs. These courses, open only to Honors Program members, have limited enrollment and are taught by specially selected instructors. Most of these courses are listed by department or program. (See Econometrics, Engineering, English, Mathematics, Physics, Psychology, and Speech Communication.)

In addition to established Honors courses, Honors students may designate any course as an Honors course by making appropriate arrangements with the course instructor and obtaining approval of the Honors Program Director. Most departments offer opportunities for independent study and research under 290 and 490; when designated by an H, these courses also carry Honors credit. Research grants are available to support Honors research.

Listed below are those courses that are offered directly by the University Honors Program. Specific information about the full range of Honors courses and seminars for the current academic year, including the Honors courses offered by individual departments and programs, may be obtained from the Honors Program Office in Jischke Honors Building.

Courses primarily for undergraduate students
Hon 121. First-Year Honors Seminar. (0-2) Cr. 1. F. Prereq: Membership in the First-Year Honors Program: Orientation to Iowa State University and to the University Honors Program. Satisfactory-fail only.

Hon 290. Special Problems. Cr. arr. Prereq: Membership in and permission of the University Honors Program. Independent study on topics of an interdisciplinary nature. Intended primarily for freshmen and sophomores. Satisfactory-fail only.

H. Honors
U. Undergraduate Research

Hon 302. Honors Leadership Seminar. (1-2) Cr. 2. F. Prereq: Selection as a leader of a First-Year Honors Seminar. For students serving as leaders of First-Year Honors Seminars, under faculty supervision. Development of teaching and leadership skills within the context of an Honors education experience. Satisfactory-fail only.

Hon 321. University Honors Seminars. Cr. arr. F.S.SS. Prereq: Membership in the University Honors Program. Interdisciplinary seminars on topics to be announced in advance. Satisfactory-fail only.

Hon 322. University Honors Seminars. Cr. arr. F.S.SS. Prereq: Membership in the University Honors Program. Interdisciplinary seminars on topics to be announced in advance. Satisfactory-fail only.

Hon 323. University Honors Seminars. Cr. arr. F.S.SS. Prereq: Membership in the University Honors Program. Interdisciplinary seminars on topics to be announced in advance. Satisfactory-fail only.

Hon 324. University Honors Seminars. Cr. arr. F.S.SS. Prereq: Membership in the University Honors Program. Interdisciplinary seminars on topics to be announced in advance. Satisfactory-fail only.

Hon 490. Independent Study. Cr. arr. Repeatable. Prereq: Membership in and permission of the University Honors Program. Independent study on topics of an interdisciplinary nature. Intended primarily for juniors and seniors.

Horticulture
www.hort.iastate.edu
Jeffery Iles, Chair of Department
University Professors: Christians, Nonnecke
Professors: Arora, Domoto, Gleason, Graves, Hannapel, Iles, Minner, Taber
Professors (Emeritus): Chaplin, Hall, Hodges
Professor (Collaborator): Yadav
Associate Professors: Delate, Fei, Gladon, Haynes, Stephens, VanDerZanden
Associate Professors (Collaborators): Beeson, Krebs
Assistant Professor: Reinert
Assistant Professors (Collaborators): Sharma, Widleichner
Senior Lecturers: Osborn, Rollenhagen
Lecturer: Nilles

Undergraduate Study
For undergraduate curriculum in Horticulture leading to the Bachelor of Science degree, see Horticulture, Curriculum.

To meet the educational needs of a student population with interests ranging from landscape design/installation to fruit and vegetable production to golf course management, considerable flexibility is built into the Horticulture curriculum. And the diversity of interests and need for flexibility is reflected in our impressive array of Horticulture courses.

Graduates possess the technical knowledge and skills to become professional horticulturists. They understand plant growth and development and are familiar with cultural and management principles for a wide assortment of Horticultural crops. They are able to work and communicate effectively with fellow Horticultural professionals and with ordinary citizens who share an interest in Horticulture. Graduates also understand the ethical and environmental dimensions of problems and issues facing Horticultural professionals.

A degree in Horticulture opens the door to employment opportunities with production nurseries, seed companies, interior landscaping firms, greenhouses, garden centers, conservatories, landscapes, design/installation firms, public gardens and arboreta, orchards and vineyards, food processing companies, vegetable farms, golf courses, sports fields, sod production companies and lawn care businesses. Several industries closely related to Horticulture provide employment opportunities in the areas of sales, management, and communication. Opportunities also exist for careers in research, teaching, and business after obtaining advanced training in graduate school.

Undergraduate students have the option of selecting a secondary major in one of several interdepartmental programs including, seed science, agricultural education, environmental studies, or international agriculture (see Index).

The Department of Horticulture offers work for a minor in Horticulture that is earned by taking Hort 221 plus 12 additional credits with a maximum of 3 credits at the 200-level and a minimum of 9 credits at the 300-level or above.

Visit our departmental website at www.hort.iastate.edu

Graduate Study
The graduate major in Horticulture leads to the M.S. (thesis required) and Ph.D. A nonthesis master’s degree is offered through the major of agriculture program. Some faculty members of the department serve as major professors for students in interdepartmental graduate majors in plant biology; genetics; molecular, cellular and developmental biology; ecology and evolutionary biology; sustainable agriculture; and environmental science.
Graduate students majoring in Horticulture usually take minor course work in Agronomy, botany (cy-tology, morphology, or physiology), biochemistry, chemistry, entomology, food science and human nutrition, genetics, plant pathology, or Statistics. There is no uniform foreign language requirement for the Master of Science or Doctor of Philosophy degree.

Graduates possess a broad understanding of horticulture and the allied plant sciences. They are able to communicate effectively with members of the scientific community, industry groups, and other interested citizens. They are experienced in conducting research and communicating the results from that research. They are capable of addressing and solving complex problems that confront the many Horticultural, agricultural and plant science professions. They also understand the ethical, legal, social, and environmental issues associated with modern agricultural/horticultural practices.

Courses primarily for undergraduate students

Hort 110. Orientation in Horticulture. (1-0) Cr. 1. F. Introduction to the field of Horticulture.

Hort 112. Orientation to Learning and Productive Team Membership. (Cross-listed with Aer E, FS HN, TSM, NREM). (2-0) Cr. 2. F. Introduction to developing intensive learners and worthy team members. Learning as the foundation of human enterprise; intellectual curiosity; ethics as a personal responsibility; everyday leadership; effective team and community interactions including team learning and the effects on individuals; and growth through understanding self, demonstrating ownership of own learning, and internalizing commitment to helping others. Inten-tional mental processing as a means of enhancing learning. Interconnectedness of the individual, the community, and the world; leading from within; holding self and others accountable for growth and development as learners and leaders.

Hort 114. Developing Responsible Learners and Effective Leaders. (Cross-listed with NREM, FS HN, TSM). (2-0) Cr. 2. S. Focus on team and community. Application of fundamentals of human learning; evidence of development as a responsible learner; intentional mental processing as a habit of mind; planning and facilitating learning opportunities for others; responsibility of the individual to the community and the world; leading from within; holding self and others accountable for growth and development as learners and leaders.

Hort 121. Home Horticulture. (2-0) Cr. 2. F. Growing plants in and around the home including require-ments for growing house plants; plant propagation; designing and maintaining flower, fruit, and vegetable gardens; lawn, tree, and shrub maintenance.

Hort 122. Hands-On Home Horticulture. (1-0) Cr. 1. F. Demonstration and activities that illustrate principles of growing plants for the home garden. Top-ics include plant identification, propagation, selection, and management for indoor and outdoor gardens.

Hort 193. Topics in Horticulture. Cr. arr. Repeatable. F.S.S. Off Campus. Offered as demand warrants. Includes practical courses in the field of Horticulture. A maximum of 4 credits of Hort 193 may be used toward the total of 128 credits required for graduation.

A. Greenhouse Crops
B. Nursery Crops
C. Turfgrass
D. Fruit Crops
E. Vegetable Crops
F. Cross-Commodity
G. Landscape Horticulture

Hort 221. Principles of Horticulture. (2-2) Cr. 3. F. Prereq: Biol 211. Biological principles of growing Horticultural crops including anatomy, reprodu-cion, light, temperature, water, nutrition, and growth and development. Laboratory exercises emphasize environmental factors and permit detailed observation of plant growth.

Hort 240. Trees, Shrubs, and Woody Vines for Landscaping. (3-0) Cr. F. Students will learn to identify trees, shrubs, and woody vines. Factors influencing the horticultural use of woody plants also will be taught.

Hort 280. Landscape Graphics. (3-0) Cr. 3. S. Intro-duction to computer and hand rendering techniques of landscape graphics. Students will gain proficiency in plan view, section and elevation graphics. Intensive studio and computer based instruction.

Hort 282. Educating Youth Through Horticulture. (3-0) Cr. Alt. S., offered 2010. Planning, develop-ing, and implementing science-based educational programs in a public garden setting. Through hands-on experiences students will learn about Horticulture, learning theory, and the application of science prin-ciples as they pertain to educating youth.

Hort 283. Pesticide Application Certification. (Cross-listed with Ent, for, Agron). (2-0) Cr. 2. S. Holshcer. Core background and specialty topics in agricultural, and Horticultural pest applicator certification. Students can Select certification categories and have the opportunity to obtain pesticide applicator certifica-tion at the completion of the course. Commercial pesticide applicator certification is emphasized.

Hort 321. Horticulture Physiology. (3-0) Cr. 3. F. Prereq: 221 or Biol 211. Principles of plant physiology relating to growth and development of Horticultural plants including plant water relations, membrane transport, photosynthesis, photomorphogenesis, respiration, and phytohormones. Emphasis on plant’s responses to environmental factors (temperature, water, and light) including cellular and whole-plant physiology under stressful environments.

Hort 322. Plant Propagation. (2-3) Cr. 3. S. Prereq: 221 or Biol 211. Fundamental principles underlying sexual and asexual propagation of plants; practice in reproducing plants by use of seeds, leaves, stems, and roots.

Hort 330. Herbaceous Ornamental Plants. (2-2) Cr. 3. F. Prereq: 221 or by permission of instruc-tor. Identification, botanical characteristics, origins, propagation, uses and general culture of herbaceous annual and perennial plants for Midwestern gardens and landscapes.

Hort 332. Greenhouse Operation and Manage-ment. (3-0) Cr. 4. F. Prereq: 221, Principles of greenhouse and other controlled environment opera-tion and management. Methods of monitoring and manipulating environmental factors such as light, tem-perature, fertility, production media, etc., to maximize production rate and quality and minimize production costs and time. Field trip(s) outside scheduled class time required. Nonmajor graduate credit.

Hort 338. Seed Science and Technology. (Cross-listed with Agron). (2-0) Cr. 3. F. Prereq: Agron 114 or Hort 221, Biol 211. Gogg. Seed production, nomenclature, selection, physiology and related aspects of enhancement, conditioning, storage, and quality evaluation. Aspects of the seed industry and regulation of seed marketing.

Hort 341. Woody Plant Cultivars: Shade Trees. (1-0) Cr. 1. S. Prereq: 240 or L A 221 or L A 222. Students will learn how to identify and care for the most Hor-ticulturally important shade trees suitable for the Midwest. Cultivars of the most prevalent species also will be taught.

Hort 342. Landscape Installation and Establish-ment. (2-0) Cr. 3. F. Prereq: 240 or L A 221 or L A 222. Principles and practices involved with establishment of managed landscapes. Laboratory work involves site evaluation, installation techniques, postplant care, and maintenance of established landscape plants.

Hort 351. Turfgrass Establishment and Manage-ment. (Cross-listed with Agron). (3-0) Cr. 3. F. Prereq: 221 or Agron 114 or Biol 211. Principles and practices of turfgrass propagation, establishment, and manage-ment. Specialized practices related to professional lawns, golf courses, athletic fields, highway road-sides, and seed and sod production. The biology and control of turfgrass pests. Nonmajor graduate credit.

Hort 351L. Turfgrass Establishment and Manage-ment Laboratory. (Cross-listed with Agron). (0-3) Cr. 1. F. Prereq: Credit or enrollment in 351. Those enrolled in the Horticulture curriculum are required to take 351L in conjunction with 351 except by permis-sion of the instructor. Nonmajor graduate credit.

Hort 354. Soils and Plant Growth. (Cross-listed with Agron). (3-0) Cr. 3. F. Prereq: Biol 101 or 211. Killorn or Loyanach. Effects of chemical, physical, and biological properties of soils on plant growth, with emphasis on nutritive elements, pH, organic matter maintenance, and rooting development. Nonmajor graduate credit.

Hort 354L. Soils and Plant Growth Laboratory. (Cross-listed with Agron). (0-3) Cr. 1. F. Prereq: Credit or enrollment in 354. Henning. Laboratory exercises in soil testing that assess soil’s ability to support nutritive requirements for plant growth.

Hort 380. Principles of Garden Composition. (2-0) Cr. 2. S. Prereq: 240. Not available as credit for L A majors. Functional and aesthetic aspects of landscape planning as a basis for design decisions; emphasis on plant selection. Includes site analysis, development process, and design principles.

Hort 391. Horticultural Management Experience. Cr. 1. Repeatable. F.S.S. Prereq: 221, permission of instructor. A structured work experience for the student to gain insight into management operations associated with production and management of Horti-cultural crops. A report of 10 or more pages describ-ing the student’s experience is required. One credit is given for each term the student is enrolled in the course. A maximum of two credits may be used to-ward the Horticultural sciences course requirements, and two additional credits may be used toward the 128 credits required for graduation.

Hort 398. Cooperative Education. Cr. R. Repeatable. F.S.S. Prereq: Permission of department resource and career center coordinator. Students must register for this course before commencing each work period.

Hort 421. Introduction to Plant Breeding. (Cross-listed with Agron). (3-0) Cr. 3. F. Prereq: Gen 320 or Biol 313. Breeding methods used in the genetic improvement of self-pollinated, cross-pollinated, and asexually reproduced Agronomic and Horticultural crops. Applications of biotechnology techniques in the development of improved cultivars. Nonmajor graduate credit.

Hort 422. Postharvest Technology. (3-3) Cr. 4. Alt. F. Offered 2009. Prereq: 221, junior or senior standing. Principles, methods, and techniques related to postharvest maintenance of quality of Horticultural commodities. Emphasis on the effects of handling, storage facilities and techniques, and quality evalua-tion. Field trips outside scheduled class time required. Weekend/overnight field trips may be required. Nonmajor graduate credit.

Hort 424. Sustainable and Environmental Horticulture Systems. (Dual-listed with 524). (Cross-listed with Env S). (2-0) Cr. 2. F. Inquiry into ethical issues and environmental consequences of Horticultural cropping systems and production practices. Emphasis on producing quality products, environmentally sound, socially acceptable, and profitable.

Hort 442. Nursery Production and Management. (2-0) Cr. 2. Alt. F., offered 2009. Prereq: 221. Theory, nursery layout and design, and cultural practices important for growing and shipping field and container-grown nursery crops. Overview of garden center design and retailing and marketing strategies. Field trips outside scheduled class time may be required. Nonmajor graduate credit.

Hort 444. Landscape Construction. (2-3) Cr. 3. F. Prereq: 240. Junior or senior classification. Principles and practices of residential landscape construction. Encompasses process from initial client contact, materials procurement, job sequencing, and installation of plant material and hardscapes. Laboratory work involves scale model design and landscape construction using various landscape materials and techniques.

Hort 445. Horticulture Management and Administration. (2-0) Cr. 2. F. Prereq: 221, junior or senior classification. In-depth presentation and discussion of skills and strategies needed to manage a Horticultural enterprise. Topics include motivating employees, managing meetings, conducting performance appraisals, dealing with conflict, and managing an increasingly diverse workforce.

Hort 446. Landscape Contracting and Estimating. (2-0) Cr. 2. F. Prereq: 240 and credit or enrollment in 342, junior or senior classification. Overview and implementation of landscape estimating and contracting. Includes estimating procedures (material, labor, equipment) and landscape business issues (contracts, insurance, personnel).

Hort 451. Professional Turfgrass Management. (2-0) Cr. 2. Alt. S., offered 2011. Prereq: 251. Turfgrass science including the study of: (1) specific information on soil chemistry and soil modification as they relate to the development and maintenance of turfgrass areas, (2) specialized management practices used in athletic field care, professional lawn care, and golf course industries, and (3) construction methods for golf courses and sports fields. Nonmajor graduate credit.

Hort 453. Sports Turf Management. (3-0) Cr. 3. Alt. F., offered 2010. Prereq: 351. Management techniques for today’s specialized athletic fields. The Horticultural and budgetary aspects of football, soccer, baseball, and softball fields will be presented. Field trips and laboratory exercises will develop a practical understanding of actual principles in field development, construction, and management. Nonmajor graduate credit.

Hort 454. Turf & Landscape Irrigation. (3-0) Cr. 3. Alt. F., offered 2009. Irrigation systems and principles for turf and landscape environments. Topics include design, installation, equipment, management, and troubleshooting of irrigation systems for golf, athletic fields, residential lawns and landscapes. Participation in practical exercises and local field trips to irrigation sites are required.

Hort 471. Vegetable Production and Management. (2-0) Cr. 2. Alt. S., offered 2010. Prereq: 221 or Agron 114 and Agron 154 or 155. Principles of vegetable production with emphasis on sustainable practices, market outlets, business aspects, and risk management. Organic techniques will be discussed. Major crop climatic conditions, physiological growth and development, harvesting, storage, and marketing. Nonmajor graduate credit.

Hort 471L. Vegetable Production and Management Laboratory. (3-0) Cr. 1. Alt. S., offered 2010. Prereq: Credit or enrollment in Hort 471 is required, except by permission of the instructor. Sequence planting techniques, seed and seeding identification, seed germination quality and requirements, earliness techniques, irrigation management, fertilizer and compost application, postharvest handling, high tunnel production, and pesticide application will be covered. Field trip required. Some laboratory projects will require time outside the regular scheduled class period. Nonmajor graduate credit.

Hort 475. Urban Forestry. (Cross-listed with For). (2-3) Cr. 3. F. Prereq: Hort 225 or junior or senior classification. 3 credits in biology. Discussion of establishment and management of woody perennials in community-owned urban greenspaces, consideration of urban soils, urban soil characteristics, plant physiology, urban culture, urban forest valuation, inventory methods, species selection, and urban forest maintenance (health care and pest management). Nonmajor graduate credit.

Hort 480. Contemporary Issues in the Green Industry. (2-0) Cr. 3. S. Prereq: Hort 225 or junior or senior classification. Analysis and evaluation of contemporary issues facing the green industry including environmental regulations, labor, market share, landscape contracting, business management and professionalism. Discussion format and interaction with green industry professionals.

Hort 481. Advanced Garden Composition. (0-5) Cr. 3. F. Prereq: 240, 330, 380, 381. Limited to Planting Design/Installation option students. Development of residential landscapes using design principles and the design process. Projects encompass site analysis, concept development, preliminary design, final design, and graphic presentation techniques. Techniques will include hand and computer rendering.

Hort 490. Independent Study. Cr. arr. Repeatable. Prereq: Junior or Senior classification in Horticulture, permission of instructor. Investigation of topic holding special interest to the student. Comprehensive report required. Election of course and topic must be approved by department head. A maximum of 4 credits of Hort 490 and an additional 2 credits of 490 from outside Horticulture may be used toward the total of 128 credits required for graduation.

Hort 495. Horticulture Travel Course Preparation. Cr. R. Repeatable. F.S. Prereq: Permission of instructor. Limited enrollment. Students enrolled in this course also interview for selection. Hort 496 the following term. Topics include preparation for safe international travel, the Horticultural/agricultural industries, climate, crops, economics, geography, history, marketing, soils, culture, traditions, and Horticultural agricultural development of the country to be visited. Students enroll in this course the term immediately before travel to the foreign country.

Hort 497. Professional Development Seminar. (1-0) Cr. 1. S. Prereq: Hort 225 or junior or senior classification. Weekly series of lectures and workshops will help students better prepare for their professional career in Horticulture by developing the professional skills necessary to be successful in today’s competitive workplace.

Courses primarily for graduate students, open to qualified undergraduate students

Hort 511. Integrated Management of Tropical Crops. (Cross-listed with Pi P, Ent). (3-0) Cr. 3. Alt. S., offered 2011. Prereq: Pi P 392 or 396 or Ent 370 or ENT or Hort 221. Gleason, Lewis, Nonnecke. Applications of Integrated Crop Management principles (including plant pathology, entomology, and Horticulture) to tropical cropping systems. Familiarization with a variety of tropical agroecosystems and Costa Rican culture is followed by 10-day tour of Costa Rican agriculture during spring break, then writeup of individual projects. Tour expenses paid by students.

Hort 524. Sustainable and Environmental Horticulture Systems. (Dual-listed with 424). (2-0) Cr. 2. F. Inquiry into ethical issues and environmental consequences of Horticultural cropping systems and production practices. Emphasis on production systems that are resource efficient, environmentally sound, socially acceptable, and profitable.

Hort 529. Publishing in Biological Sciences Journals. (Cross-listed with Agron, NREM). (2-0) Cr. 2. S. Prereq: Permission of instructor; evidence of a publishable unit of the student's research data. Process of preparing a manuscript for submission to a refereed journal in the biological sciences. Emphasis on publishing self-generated data from thesis or dissertation research.

Hort 530. Research Orientation. (1-3) Cr. 2. F. Instruction in scientific methods and communication skills.

Hort 565. Professional Practice in the Life Sciences. (Cross-listed with PI, P An S, V MPM, Agron, BCB, Micro). Cr. arr. S. Prereq: Graduate classification. Professional discourse on the ethical and legal issues facing life science researchers. Offered in modular format; each module is four weeks.

A. Professional Practices in Research. (Cr. 1.0) Good scientific practices and professional ethics in the life sciences.

B. Intellectual Property and Industry Interactions. (Cr. 0.5) Ethical and legal issues facing life scientists involved in research interactions with industry.

Hort 584. Organic Agricultural Theory and Practice. (Dual-listed with 484). (Cross-listed with Agron, SusAg). (3-0) Cr. 3. Alt. S., offered 2010. Prereq: 9 cr in biological or physical sciences. Delate & DeWitt. Understanding of the historical origins and ecological theories underpinning the practices involved in organic agriculture. Interdisciplinary examination of crop and livestock production and Socio-economic processes and policies in organic agriculture from researcher and producer perspectives.

Hort 590. Special Topics. Cr. arr. Repeatable. Prereq: a major or minor in Horticulture.

Hort 593. Workshop in Horticulture. Cr. arr. Repeatable. Workshops in Horticulture, with emphasis on off-campus instruction.

A. Greenhouse Crops
B. Nursery Crops
C. Turfgrass
D. Fruit Crops
E. Vegetable Crops
F. Cross-Commodity
G. Landscape Horticulture

Hort 599. Creative Component. Cr. arr. Repeatable. Courses for graduate students

Hort 690. Advanced Topics. Cr. arr. Repeatable.

Hort 696. Research Seminar. (Cross-listed with GDCB, Agron, BBMB, PIBs, for). Cr. 1. Repeatable. Research seminars by faculty and graduate students. Satisfactory-fail only.

Hort 698. Horticulture Teaching Practicum. (1-0) Cr. 1. S. Prereq: Graduate student classification. Discussions are intended to foster the development of graduate students as teaching assistants and future Horticulture/plant science teachers. Topics include establishing a classroom presence, improving lectures, motivating students, dealing with difficult or disruptive students, and developing a teaching philosophy. Satisfactory-fail only.

B. Nursery Crops
C. Turfgrass
D. Fruit Crops
E. Vegetable Crops
F. Cross-Commodity
G. Landscape Horticulture
I. Biotechnology

Hotel, Restaurant, and Institution Management

The program offers work for the degree bachelor of science in hospitality management. Coursework is planned to provide students with a general education plus professional preparation for supervisory and executive positions in hospitality organizations. Principles of business management are presented, as well as fundamentals of hospitality operations. Graduates demonstrate leadership characteristics and make decisions based on integrating knowledge of financial, human resources, marketing, and operational principles for managing hospitality operations. They demonstrate best practices in meeting customer expectations and use of technology to achieve operational efficiency.

Learning experiences are provided in the quantity food production and service facility of the HRM program. Students are required to have a total of at least 600 hours of relevant work experience prior to graduation. Of the 600 hours, 200 hours are required prior to completing one year in the program. The HRIM program offers a minor that may be earned by successfully completing at least 15 credits of AESH/HRIM courses in consultation with the advisor. The program also participates in food safety and entrepreneurship interdisciplinary minors.
Communication Proficiency Requirement: Grade of C or better in either ENG 150 and 250 or equivalent transfer courses.

**Graduate Study**

The HRIM program offers work for the master of science and doctor of philosophy degrees in hospitality management. Graduates of the program are able to interpret trends and adapt operating practices of hospitality organizations to changing economic, social, political, technological, and environmental conditions. They can manage a hospitality enterprise successfully to achieve objectives of the operation or, at the doctoral level, successfully carry out responsibilities of a hospitality educator. Graduates will make positive contributions to the growth and improvement of the hospitality industry using current research in the decision-making process.

A degree in hotel, restaurant, and institution management is the usual background for graduate study; however, applicants with preparation in dietetics, business, or closely related fields are encouraged to apply. Ph.D. applicants must have two (2) years of professional work experience in the field.

The master of science degree requires either a thesis or non-thesis (creative component) project. Students also are required to take one course in three of four core areas (human resources, financial management, marketing, and strategic management).

The program participates in the Master of Family and Consumer Sciences degree by offering a specialization in Hospitality Management. The program also participates in the Master of Family and Consumer Sciences degree with specialization in Dietetics, offered in cooperation with the Department of Food Science and Human Nutrition. The Ph.D. program requires 80 credits, up to 30 of which may be applied from the Master’s degree. All Ph.D. students take a minimum of 15 research/dissertation credits.

**Courses primarily for undergraduate students**

**HRI 101. Introduction to the Hospitality Industry.** (3-0) Cr. F. Introduction to the foodservice, lodging, and tourism components of the hospitality industry. Background information, current issues, and future challenges in various segments of the industry.

**HRI 189. Introduction to University Dining Services Management.** (1-0) Cr. S. Overview of management concepts and distinct features of university dining services.

**HRI 193. Hospitality Work Experience I.** Cr. R. F.S.SS. Approved work experience in foodservice, lodging, or related operations. A minimum of 200 hours required prior to completing one year in the program. Satisfactory-fail only.

**HRI 260. Global Tourism Management.** (3-0) Cr. 3. S. Overview of the global tourism industry: hospitality and related services, destination/attractions, and transportation. Introduction to travel behavior, tourism planning and research, and economic and social impacts of tourism development.

**HRI 289. Private Club Operations.** (2-0) Cr. 2. F.S. Prereq: 101. Organization and management of private clubs including city, country, and other recreational and social clubs. Field trip required.

**HRI 315. Hospitality Law.** (3-0) Cr. 3. S. Prereq: 101. Laws relating to ownership and operation of hospitality organizations. The duties and rights of both hospitality business operators and customers. Legal implications of various managerial decisions. Nonmajor graduate credit.

**HRI 333. Hospitality Operations Cost Controls.** (3-0) Cr. 3. F. Prereq: Credit or enrollment in 380, 380L, Math 104 or 150, Com S 103. Introduction to revenue and cost systems in foodservice and lodging operations. Application of principles related to procurement, production, and inventory controls.

**HRI 352. Lodging Operations Management I.** (3-0) Cr. 3. F. Prereq: Credit in 101. Introduction to functional department activities and current issues of lodging operations with emphasis on front office and housekeeping. Reservation activities and night audit exercises. Case studies.

**HRI 380. Quantity Food Production Management.** (3-0) Cr. 3. F.S. Prereq: 233 or 2 cr Micro; FS HN 111 or 214; at least junior classification; enrollment in 380L. Principles of and procedures used in quantity food production management including quality control, food costing, work methods, menu planning, food production systems, and service.

**HRI 380L. Quantity Food Production and Service Management Experiential Learning.** (2-0) Cr. 2. F.S. Prereq: 233 or 2 cr Micro; FS HN 111 or 214; at least junior classification; enrollment in 380; reservation with program required. Application of quantity food production and service management principles and procedures in the program’s foodservice operations.

**HRI 381. International Study in Hospitality.** Cr. arr. Repeatable. S.S. Prereq: Permission by application. Limited enrollment. Supervised study abroad of tourism and its impact on hospitality operations. Experiences include hospitality-related tourist attractions and cultural activities related to different cultures. Required pre-study sessions arranged. Expenses paid by student.

**HRI 382. Field Study.** Cr. arr. F.S.SS. Prereq: Permission by application. Supervised study opportunity for students to observe and apply classroom theory to actual hospitality operations across the US. Hospitality operations may include hotels, restaurants, resorts, wineries, theme parks, clubs, hospitals, and tourism operations. Required pre-study sessions may be arranged. Expenses paid by student.

**HRI 383. Introduction to Wines, Beers, and Spirits.** (2-0) Cr. 2. F. Prereq: Must be at least 21 years old. Introduction to history and methods of production for a variety of wines, beers, spirits, and other beverages. Product knowledge, sales, and service techniques related to the hospitality industry.

**HRI 391. Foodservice Systems Management I.** (3-0) Cr. 3. F. Prereq: Credit or enrollment in 380, 380L. Principles and techniques related to basic management, leadership, and human resource management of foodservice in health care and other institutional settings. Food safety and sanitation for institutions. Credit for either HRI 391 or 217 and 438 may count toward graduation. Not accepted for credit toward a major in HRIM.

**HRI 392. Foodservice Systems Management II.** (3-0) Cr. 3. S. Prereq: 391. Introduction to cost control in foodservice departments: procedures for controlling food, labor, and other variable costs. Application of principles related to food product selection, specification, purchase, and storage in health care and other institutions. Credit for either HRI 392 or 233 and 333 may count toward graduation. Not accepted for credit toward a major in HRIM.

**HRI 393. Hospitality Work Experience II.** Cr. 2. F.S.SS. Prereq. 101, 193, 233, 287; adviser approval. Approved 400-hour experience in foodservice, lodging, or related operations for HRM majors. Open to minors. Satisfactory-fail only.

**HRI 433. Hospitality Financial Management.** (3-0) Cr. 3. S. Prereq: 333; Accct 284; Econ 101; credit or enrollment in Stat 101. Use of common financial statement, accounting ratios, and financial techniques to impact management decisions.

**HRI 452. Lodging Operations Management II.** (3-0) Cr. 3. S. Prereq: 352; Com S 103. Development of business plan and evaluation of business performance in a simulated environment. Operational decision making practices by applying concepts of management, operations, marketing, and finance for a computer-mediated environment. Nonmajor graduate credit.

**HRI 455. Introduction to Strategic Management in Foodservice and Lodging.** (3-0) Cr. 3. S. Prereq: 340; credit or enrollment in 433; 438. Introduction to strategic management principles and practices with an application of human resources, operations, marketing, and financial management concepts. Case studies.

**HRI 487. Fine Dining Management.** (Dual-listed with 587). (2-3) Cr. 3. F. Prereq: 380, 380L; credit or enrollment in 333. Creative experiences with U.S. regional and international foods appropriate for fine dining. Application of management principles in food preparation and service in fine dining operations. Exploration of the historical and cultural development of the world food table.

**HRI 489. Issues in Food Safety.** (Cross-listed with An S, FS HN, VDPAM). (1-0) Cr. 1. S. Prereq: Credit or enrollment in FS HN 101 or 272 or HRI 233; FS HN 419 or 420; FS HN 403. Capstone seminar for the food safety minor. Case discussions and independent projects about safety issues in the food system from a multidisciplinary perspective.

**HRI 490. Independent Study.** Cr. arr. Prereq: Sections B-E. Program approval; Section F: Full membership in Honors Program. A. Hospitality Management B. Lodging Operations C. Foodservice Operations D. Hospitality Education

**HRI 498. Cooperative Education.** Cr. R. F.S.SS. Prereq: Permission of undergraduate coordinator. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

**Courses primarily for graduate students, open to qualified undergraduate students**

**HRI 504. Seminar.** (0-1) Cr. 1. F. (A), S. (B). 504B may be taken more than once for credit. A. Hospitality Research B. Current Issues

**HRI 511. Research Methods in Foodservice & Lodging Management.** (3-0) Cr. 3. Prereq: Graduate standing in the Department. Overview of research methods. Methods for collecting and analyzing quantitative and qualitative data. Development of research plan.
HRI 533. Financial Decision Making in Foodservice and Lodging Organizations. (3-0) Cr. 3. S. Prereq: 433. Concepts of financial management applied to strategic decision making.

HRI 538. Human Resources Development in Foodservice and Lodging Organizations. (3-0) Cr. 3. Prereq: 438. Theories of human resources management, practices and principles related to development of management personnel.

HRI 555. Strategic Management in Foodservice and Lodging Organizations. (3-0) Cr. 3. Prereq: Courses in Mkt. and Fin. Management. Strategic management process as a planning and decision-making framework; integration of human resources, operations, marketing, and financial management concepts.

HRI 575. Professional Experience in Foodservice and Lodging Organizations. Cr. 2. F.S.SS. Prereq: Accepted in HRIM graduate program. Analysis and interpretation of professional functions or data, or design and implementation of a management project.

HRI 590. Special Topics. Cr. arr. Repeatable. Prereq: 9 credits in HRI at 400 level or above; permission of instructor.

HRI 638. Advanced Human Resources Management in Foodservice and Lodging Organizations. (3-0) Cr. 3. F. Prereq: 538. Research in human resources management with an emphasis on organization or unit administration.

HRI 652. Advanced Lodging Operations. (3-0) Cr. 3. Prereq: Enrollment in PhD program. Analysis and applications of concepts and theories of operations research for lodging operations.

HRI 675. HRIM Teaching Experience. Cr. 1. F.S.SS. Prereq: Accepted in PhD program. Development of objectives, teaching methods and materials, and test items for selected topics. Implementation in an HRIM course.

Human Computer Interaction

www.hci.iastate.edu

[Interdepartmental Graduate Program]

Supervisory Committee: James Oliver, Chair; Chui Shui Chan; Julie Dickerson, Steven Hennestad, Doug Gentile, Stephen Gilbert, Brian Mennenke

Graduate Study

Work is offered for the master of science and doctor of philosophy degrees with a major in Human Computer Interaction (HCI). A Graduate Certificate in Human Computer Interaction is also offered. It is targeted specifically for the benefit of students working in business and industry wanting education in this field. The graduate program in Human Computer Interaction (HCI) welcomes applicants from a diverse collection of technical and creative fields whose unifying characteristic is the desire to develop new ways to bridge the gap between human and machine. The students must demonstrate skill in software development and proficiency in high-level, object-oriented programming. To accommodate students who lack exposure to programming, the HCI interdepartmental graduate major will offer an introductory course to provide a base of technical skills.

At the Masters level, entrance requirements will include an undergraduate degree and demonstrable software skills. The degree calls for 30 credits of course work including appropriate credit for the master’s thesis. MS students must take one core course of their choice from each of the categories of Implementation, Design, Evaluation and Phenomena. MS students must also take two semesters of HCI 591 Seminar in HCI.

All programs of study for the Ph.D. must include 1) one core course of their choice from each of the categories of Implementation, Design, Evaluation and Phenomena, if not completed as part of the student’s masters program; 2) two more courses of their choice from a list of recommended electives; and 3) four semesters of HCI 591 Seminar in HCI.

Information on applications procedures and specific requirements of the major can be obtained from the following Internet address: www.hci.iastate.edu.

Courses for graduate students

HRI 409. Computer/Video Game Design and Development. (Dual-listed with 509). (Cross-listed with ArtIS). (4-0) Cr. 3. Repeatable. F.S. Prereq: Permission of instructor. Programming emphasis: Com S 227, 228, 229 or equivalent in Engineering, art or graphics emphasis: Art 230 and ArtIS 308; writing emphasis: an English course in creative writing or writing screen plays; business or marketing students: junior classification. Independent project based creation and development of "frivolous and non-frivolous" computer games in a cross-disciplinary team. Projects require cross-disciplinary teams. Aspects of indie development and commercial game history will be discussed. Nonmajor graduate credit.

HCI 504. Managing and Evaluating Instructional Technology Interventions. (Cross-listed with C II). (3-0) Cr. 3. S. Prereq: CI 501. Principles and procedures for analysis, review, and assessment of instructional technology interventions in education and corporate settings. Methods for planning, organizing, and conducting evaluative studies are applied.

HCI 509. Computer/Video Game Design and Development. (Dual-listed with 409). (Cross-listed with ArtIS). (4-0) Cr. 3. Repeatable. F.S. Prereq: Permission of instructor. Programming emphasis: Com S 227, 228, 229 or equivalent in Engineering, art or graphics emphasis: Art 230 and ArtIS 308; writing emphasis: an English course in creative writing or writing screen plays; business or marketing students: junior classification. Independent project based creation and development of "frivolous and non-frivolous" computer games in a cross-disciplinary team. Projects require cross-disciplinary teams. Aspects of indie development and commercial game history will be discussed.

HCI 515. Humanities/Linguistic Natural Language Processing. (Cross-listed with EngL, LingL). (3-0) Cr. 3. F. Prereq: Stat 330 or equivalent, recommended Ling 219 or Ling 511. Introduction to computational techniques involving human language and speech in applications such as information retrieval and extraction, automatic text categorization, word prediction, intelligent Web searching, spelling and grammar checking, speech recognition and synthesis, statistical machine translation, n-grams, POS-tagging, word-sense disambiguation, sentential expressions and thesauri, markup languages, corpus analysis, and Python programming language.

HCI 520. Computational Analysis of English. (Cross-listed with EngL, LingL). (3-0) Cr. 3. F. Prereq: EngL 510 or 511. Concepts and practices for analysis of English by computer with emphasis on the applications of computational analysis to problems in applied linguistics such as corpus analysis and recognition of learner language in computer-assisted learning and language assessment.

HCI 521. Cognitive Psychology of Human Computer Interaction. (Cross-listed with Psych). (3-0) Cr. 3. Prereq: Graduate classification or instructor approval. Biological, behavioral, cognitive and social issues relevant to human computer interactions.

HCI 525. Optimization Methods for Complex Designs. (Cross-listed with M E). (3-0) Cr. 3. S. Prereq: Engr 180, Math 265. Optimization techniques including unconstrained and constrained minimization, linear programming, and particle swarm optimization. Both the theory and methods and the application to complex designs will be presented.

HCI 558. Introduction to the 3D Visualization of Scientific Data. (Cross-listed with Geol, Com S). (2-2) Cr. 3. Alt. S., offered 2011. Prereq: Graduate-student standing in the Mathematical or natural sciences. Introduction to visualization and computer graphics. Use of information from 3D computer graphics and their foundation in human perception. Overview of different visualization techniques and examples of 3D visualization projects from different disciplines (natural sciences, medicine, engineering). Class project in interactive 3D visualization using the OpenDX, VTK or a similar system.
HCl 575. Computational Perception. (Cross-listed with Com S, Cpr E). (3-0) Cr. 3. S. Prereq: Graduate standing or permission of instructor. This class covers Statistical and algorithmic methods for sensing, recognizing, and interpreting the activities of people by a computer. This semester we will focus on machine perception techniques that facilitate and augment human-computer interaction. The main goal of the class is to introduce computational perception on both theoretical and practical levels. You will work in small groups to design, implement, and evaluate a prototype of a human-computer interaction system that uses one or more of the techniques covered in the lectures.

HCl 592. Entrepreneurship Workshop. (1-0) Cr. 1. F. Students will be taken step-by-step through activities that must be undertaken when attempting to commercialize a technology or start their own company. Speakers will be brought in to introduce relevant topics, provide resources, answer questions, and provide working examples.

HCl 603. Advanced Learning Environments Design. (Cross-listed with C I). (3-0) Cr. 3. S. Prereq: CI 503. Exploration of advanced aspects of the instructional design process. Application of analysis, design, development, production, evaluation, implementation, and project management principles. Focus on the production and use of instructional technology with an emphasis on the instructional design consulting process. Theory and research in instructional technology provides the foundation for design decisions.

HCl 655. Organizational and Social Implications of Human Computer Interaction. (Cross-listed with MIS). (3-0) Cr. 3. Prereq: Graduate Classification. Examine opportunities and implications of information technologies and human computer interaction on social and organizational systems. Explore ethical and social issues appertaining to human computer interaction, both from a prescriptive and descriptive perspective. Develop informed perspective on human computer interaction. Implications on research and development programs.

HCl 697. HCI Internship. Cr. R. Repeatable. Prereq: Permission of Director of Graduate Education, graduate classification.

Human Development and Family Studies

Corliss Brooke, Interim Chair of Department

Distinguished Professors (Emeritus): Bivens, Moxner

Professors: Brooke, Brotherson, Crase, Draper, Fletcher, Garaisy, Hira, Lempers, Macdonald, Martin, Peterson, Roeske, Vlaskam, Waars

Professors (Emeritus): Coulson, Deacon, Engel, Joanning, Mercier, Pickett, Winter

Associate Professors: Cook, Greder, Hegland, Luce, Maude, Murphy, Torrie

Associate Professors (Emeritus): Crull, Dail, Herwig, K. Miller, N. Miller, Strong, Volk

Associate Professor (Adjunct): Melby

Assistant Professors: Hughes, Lohman, Margrett

Assistant Professors (Emeritus): Glass, Graham

Assistant Professors (Adjunct): Colbert, Hockaday, Oesterreich, Swanson

Senior Lecturer: Krog

Lecturers: Borkovski, Enloe, Hensley, Kosteley, Mahan, Mcclain, Popillion, Schrag, Shed, Trueau, Vanneter, Walsh, Wetzler

Undergraduate Study

For undergraduate curricula in Human Development and Family Studies, leading to the degree bachelor of science, see Human Sciences, Curricula.

The Department of Human Development and Family Studies offers courses that focus on the interactions among individuals, families, their resources, and their environments throughout the life span. The department offers work for the Bachelor of Science degree in three curricula: Child, Adult, and Family Services; Early Childhood Education; and Family Finance, Housing and Policy. The Child, Adult and Family Services curriculum leads to work in the helping professions with employment opportunities in public and private agencies, including Head Start. Opportunities exist to observe and work with infants, preschoolers, school-age children, adolescents, adults, and families. Graduates of the program are prepared for employment in agencies and organizations serving children, youth, families, and adults as program development specialists, directors, directors, direct care staff, and administrators. This flexible program provides a broad emphasis in theory, research, and application in child, adult and family services including attention to community issues and public policy.

Students in the Child, Adult and Family Services curriculum are eligible to participate in Camp Adventure Youth Services. Administered by the University of Northern Iowa, Camp Adventure ™ offers students an opportunity to plan and implement school-age service and youth development, develop leadership and management skills, enhance one's global awareness and promote cultural sensitivity. Comprehensive school age and youth service programs developed primarily toward U.S. military installations, U.S. embassies, and corporate clubs and associations are offered. Students will earn 12 credits from the University of Northern Iowa, which can be transferred and applied to CAFS requirements. Students in the child program and youth program options may use Camp Adventure as HD FS 491 Internship if prerequisites are met before beginning the internship. See departmental advising coordinator for information and eligibility.

Students graduating in the Child, Adult, and Family Services major will 1) demonstrate competency in human development and family studies and their chosen field of emphasis; 2) demonstrate proficiency in interpersonal communication and in working with diverse groups to solve multidisciplinary problems; 3) effectively practice preparation and delivery of information to family finance, housing, and policy professionals as well as to the general public; 4) critically evaluate information and accurately interpret and use research, and 5) understand the complex of issues facing professionals in the field, including ethical, cultural and environmental elements.

The curriculum in Early Childhood Education is planned for students preparing to teach young children and work with their families. This program leads to careers in working with young children who are typically developing and those with special needs from birth through age eight. Graduates in this curriculum may teach in early childhood (preschool and primary) classrooms or home based programs, with emphasis on inclusive services; graduates may be employed by either public or private agencies or schools. This curriculum has been approved by the Iowa Department of Education and meets requirements for the early childhood education unified teacher license, which permits individuals to teacher general and special education for children from birth through age eight. The program is an interdepartmental major administered by the Department of Curriculum and Instruction and the Department of Human Development and Family Studies within the College of Human Sciences. Students who enroll in Early Childhood Education must take the traditional student teaching option or be accepted into the teacher education program prior to enrolling in advanced courses. All early childhood education students, including those seeking a double major, must meet general education requirements for teacher licensure. Iowa State University is in compliance with the Iowa Department of Education’s mandates for a performance based system of teacher training. Following this same type of system, the State of Iowa has developed and implemented a competency system to evaluate the performance of all teachers. A detailed list of the eleven Iowa State University Teacher Education Standards and the eight State of Iowa Teacher Licensing Standards, along with other information about the Teacher Education Program, can be found at www.teacher.hm.iastate.edu, the teacher education website. Information is also available from the student’s academic adviser.

households including populations who experience discrimination due to poverty, minority Status, age, and/or disability Status. Laboratory and practicum opportunities exist in the ISU Financial Counseling Clinic, a HUD-approved financial and housing counseling service. Laboratory opportunities also exist in the Universal Design Learning Laboratory where students can conduct research, design, test prototypes and investigations to better understand requirements of life span design and accessibility issues. A variety of service learning opportunities are available to familiarize students with public and not-for-profit community services and agencies. Well qualified juniors and seniors in Family Finance, Housing and Policy who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both a B.S. in FFHP and an M.S. in HDFS or a B.S. in FFHP and a Graduate Certificate in Family Financial Planning. Under concurrent enrollment, students simultaneously take undergraduate and graduate courses and may be eligible for assistantships. See Graduate Study for more information.

Students graduating in the Family Finance, Housing, and Policy major will 1) demonstrate competency in consumer science and policy and their chosen field of emphasis, 2) demonstrate proficiency in interpersonal communication and in working with diverse groups to solve multidisciplinary problems, 3) effectively practice preparation and delivery of information to family finance, housing, and policy professionals as well as to the general public, 4) critically evaluate information and accurately interpret and use research, and 5) understand the complex of issues facing professionals in the field, including ethical, cultural and environmental elements.

The curriculum in Early Childhood Education is planned for students preparing to teach young children and work with their families. This program leads to careers in working with young children who are typically developing and those with special needs from birth through age eight. Graduates in this curriculum may teach in early childhood (preschool and primary) classrooms or home based programs, with emphasis on inclusive services; graduates may be employed by either public or private agencies or schools. This curriculum has been approved by the Iowa Department of Education and meets requirements for the early childhood education unified teacher license, which permits individuals to teach general and special education for children from birth through age eight. The program is an interdepartmental major administered by the Department of Curriculum and Instruction and the Department of Human Development and Family Studies within the College of Human Sciences. Students who enroll in Early Childhood Education must take the traditional student teaching option or be accepted into the teacher education program prior to enrolling in advanced courses. All early childhood education students, including those seeking a double major, must meet general education requirements for teacher licensure. Iowa State University is in compliance with the Iowa Department of Education’s mandates for a performance based system of teacher training. Following this same type of system, the State of Iowa has developed and implemented a competency system to evaluate the performance of all teachers. A detailed list of the eleven Iowa State University Teacher Education Standards and the eight State of Iowa Teacher Licensing Standards, along with other information about the Teacher Education Program, can be found at www.teacher.hm.iastate.edu, the teacher education website. Information is also available from the student’s academic adviser.
Students in early childhood education must meet the performance outcome standards for teacher licensure. Standards are assessed in coursework through designated performance indicators such as assignments, projects, or practicum participation. These standards assessments are based on the early childhood content standards for endorsement 100 in the State of Iowa. These include competencies in (1) child growth, development, and learning; (2) developmentally appropriate learning environment and curriculum implementation; (3) health, safety, and nutrition; (4) family and community collaboration; and (5) professionalism. Pre-student teaching field experiences and student teaching experience in a least two different settings are required. Students will receive both formative and summative evaluations of their progress toward meeting these outcomes throughout their program at ISU.

The department offers minors in Child, Adult, and Family Services, and Family Finance, Housing, and Policy.

The Child, Adult, and Family Services minor may be completed by earning 102 credits, selecting 3 credits from 220, 221, 226, or 227; and selecting 9 credits from 270, 344, 349, 360, 367, 373, 380, 395, 449, 463 or 479.

The Family Finance, Housing, and Policy minor may be completed by earning 10 credits from HD FS 239, 283; and selecting 6 credits from HD FS 341, 360, 378, 463, 483, 488 or 489.

Communication Proficiency requirement: A student must achieve a grade of C or higher in English 150 and 250. A student achieving a grade of C– or lower in 150 and/or 250 must either repeat the coursework, earning a minimum grade of C, or, in consultation with the adviser and the coordinator of freshman English, complete another appropriate English writing course with a minimum grade of C.

Graduate Study

The department offers work for the degrees Master of Science and Doctor of Philosophy with the major in Human Development and Family Studies, and minor work for students taking major work in other departments. Graduates of M.S. and Ph.D. programs in the department will understand and apply relevant theories to educational, research, and intervention programs. It is intended that they will produce and disseminate research results and provide leadership in human development and family studies professions.

Within the major of Human Development and Family Studies, both M.S. and Ph.D. candidates may choose to work primarily in one of three signature areas: early childhood, care and education; life-span development; or family policy and practice. The Department of Human Development and Family Studies offers coursework and experiences leading to National Council of Family Relations certification as a family life educator.

Prerequisite to work in the major is the completion of a related undergraduate program with basic courses in one or more of the following areas: architecture, child/human development, community and regional planning, economics, education, family studies, interior design, psychology, or sociology. Additional coursework or prerequisites may be required depending on the undergraduate program and program of study.

Core guidelines for graduate programs of study in Human Development and Family Studies have been developed, and the student’s program of study committee has the major responsibility for determining additional requirements for an individual program.

The department also participates in the Master of Family and Consumer Sciences degree programs. Students selecting this option may choose Human Development and Family Studies as the focus of their studies. A 42-credit Master of Family and Consumer Sciences-Family Financial Planning program (MFCS-FFP) along with the 18-credit Graduate Certificate Program is designed to prepare individuals to work in the financial planning field. The courses for this program are completely Web-based. Completion of course work in the Master’s degree and Graduate Certificate meets the educational re-quirements to sit for the Certified Financial Planner (CFP) Board of Standards Certification Examination. The department offers well qualified students in Family Finance, Housing, and Policy concurrent degree programs to obtain a B.S. in FFH and an M.S. in HD FS or a B.S. in FFH and a Graduate Certificate in Family Financial Planning in 5 years. Application for admission to the Graduate College should be made near the end of the junior year. Under concurrent enrollment, students simultaneously take undergraduate and graduate courses and may be eligible for assistantships. Students interested in these programs should contact the department for details.

The department cooperates in the interdepartmental Gerontology program; students may declare a minor in Gerontology. The Master of Family and Consumer Sciences - Gerontology program (MFCS-Geron) and the Graduate Gerontology Certificate program are designed to prepare professionals who work directly with older people or are involved in education and research related to the elderly. Professionals offering direct services often are involved in health promotion programs, direct-ing intergenerational activities, managing senior centers or retirement communities, counseling older people and their families, and helping people plan for retirement. Professionals involved in education and research may evaluate community-based services, teach others about the aging process, develop policies and programs to serve the needs of the elderly, and work with business and industry on issues related to an aging work force.

Courses primarily for undergraduate students

HD FS 102. Individual and Family Life Development. (3-0) Cr. 3. FS.SS. Development of individuals, families, and their reciprocal relationships as affected by external factors; examined within a framework of life-span developmental tasks.

HD FS 110. Freshman Learning Community Orientation. Prereq: Membership in HD FS Learning Community. Introduction to the Department of Human Development and Family Studies including academic requirements and opportunities, strategies for transitioning to college, learning and study strategies, reading and reflection, and career awareness. (2-2) Cr. 3. F.S.

HD FS 218. Professional Orientation and Service Learning. Cr. 2. Prereq. 102. Restricted to CH FS majors. Ethics, professional development, and career exploration in child, adult and family services. Visits to and service learning with programs that serve children, adults and families with diverse needs. Participation in service learning project required. Satisfactory-fail only.

HD FS 223. Development and guidance Ages Birth through 8 Years. (3-0) Cr. 3. S. Typical and atypical development from birth through eight years of age. Development and guidance within the contexts of the family, program, and Society. Guided observation of physical, motor, cognitive, communication, social, and emotional development.

HD FS 227. Adolescent Development. (3-0) Cr. 3. F. Prereq. 102 or Psych 101 or 230. Physical, cognitive, and socioemotional development of adolescents and young adults in the context of family, relationships, and culture.

HD FS 239. Housing and Consumer Issues. (3-0) Cr. 3. F.S. Introduction to factors affecting housing consumption of individuals and families, including current housing consumer issues related to housing choices, housing context of neighborhoods and communities, housing structure types, and credit and housing finance. Issues such as homelessness, housing discrimination, indoor air quality, accessible design.

HD FS 240. Literature for Children. (3-0) Cr. 3. F.S. Prereq. 102 or Psych 230. Evaluation of literature for children. Roles of literature in the total development of children. Literature selection and use.

HD FS 269. Research in Human Development and Family Studies. (3-0) Cr. 3. F.S. Prereq. 102 or Psych 230. Understanding and evaluating research. Use of primary and secondary data to identify and study problems related to human development and family issues, including finance and housing. An introduction to Statistical concepts and computer analysis. Research participation.

HD FS 270. Family Relationships. (3-0) Cr. 3. F.S. Alt. SS., offered 2011. Prereq. 102 or Psych 230. Introduction to and application of family theories. Family communication and its functions to develop, maintain, enrich and limit family relationships.

HD FS 283. Personal and Family Finance. (3-0) Cr. 3. F.S.SS. Introduction to basic principles of personal and family finance. Budgeting, record keeping, checking and savings accounts, consumer credit, insurance, investments, and taxes.

A. Early Childhood Education Programs. Prereq. 343. B. Family Services Programs. Prereq. 9 credits in HD FS.
C. Early Childhood Special Education Programs. Prereq: 220, 221.
D. School-Age Child Care Programs. Prereq: 226; E. Infant/Toddler Programs. Prereq: 340.
F. Research. Prereq: 269.
G. Family Financial Programs.
H. Housing Programs.
I. Policy Programs.

HD FS 340. Assessment and Curricula: Ages Birth through 2 Years. (3-3) Cr. 4. F. S. Prereq: 220. Assessment strategies for infants and toddlers, including those with special needs. Curricula, learning environments, teaching strategies, health and nutritional practices, and schedules that are developmentally, individually, and culturally appropriate. Using assessment to plan, implement, and evaluate activities to promote physical, cognitive, communication, and social emotional development; practicum.

HD FS 341. Housing Finance and Policy. (3-0) Cr. 3. F. Prereq: 6 credits in social sciences. The social, economic, and governmental contexts of housing and financial decision-making at the household level. Financial considerations for residential property management.

HD FS 343. Assessment and Programming: Ages 3 through 6 Years. (3-3) Cr. 4. F. S. Prereq: 227, 240, 269 or Psych 332 or 333. Assessment strategies for preschool and kindergarten children, including those with special needs. Developing, implementing, and evaluating learning environments; activities and materials; behavioral guidance and classroom management practices; health and nutritional practices; and schedules to ensure developmental, individual, and cultural appropriateness. Using assessment to plan, implement, and evaluate activities to promote physical, motor, cognitive, communication, and social emotional development; practicum.

HD FS 344. Programming for Children in Early Care and Education. (3-3) Cr. 4. F. S. Prereq: 220 or 221. Programming in inclusive child care centers and family child care homes, including those with special needs, aged birth through 8 years. Developing, implementing, and evaluating learning environments; activities and materials; behavioral guidance and classroom management practices; health and nutritional practices; and schedules to ensure developmental, individual, and cultural appropriateness. Monitoring children’s development and behavior to promote physical, motor, cognitive, communication, and social emotional development. Collaborating effectively with parents and staff.

HD FS 345. Adapting Programming in Inclusive Settings. (3-1) Cr. 3. F. S. Prereq: Credit or concurrent enrollment in 340 or 343; Sp Ed 280. Adapting instruction, materials, and equipment to meet developmental needs of young children birth through age 8 with diverse learning needs and multiple disabilities in inclusive settings. Addressing individualized education programs; special health care needs, challenging behavior, and positioning and handling techniques; practicum.

HD FS 349. Parenting and Family Diversity Issues. (3-0) Cr. 3. F. S. Alt. SS., offered 2010. Prereq: 102 or Psych 230, 270. Diversity issues as they affect families. Parenting practices and family relationships among diverse human populations. Understanding the family system and the relationship of that system to Societal systems.

HD FS 360. Housing and Services for Families and Children. (3-0) Cr. 3. F. S. Prereq: 6 credits in social sciences. Approaches to and assessment of housing services that assist those with special needs, including those with disabilities, low-income, children at risk, single-parents, and the homeless. Emphasis on community settings, e.g., residential facilities, group housing, shelters and transitional housing.

HD FS 367. Abuse and Illness in Families. (3-0) Cr. 3. F. S. Alt. SS., offered 2010. Prereq: 102 or Psych 230, 270. Causes and consequences of family stressors including physical, sexual, and emotional abuse; substance abuse, and mental and physical illness across the life span. Interplay between victims, offenders, and the treatment system.

HD FS 373. Death as a Part of Living. (Cross-listed with Geront.) (3-0) Cr. 3. F. Alt. SS., offered 2010. Prereq: 102. Consideration of death in the life span of the individual and the family with opportunity for exploration of personal and Societal attitudes.

HD FS 378. Economics of Aging. (Cross-listed with Econ, Geront.) (3-0) Cr. 3. S. Prereq: 3 credits in principles of economics and 3 credits in human development and family studies. Economic Status of the aging, retirement planning and the retirement decision, role of Social Security, public transfer programs for the elderly, intrafamily transfers to/from the elderly, private pensions, financing medical care and housing for the elderly, prospects and issues for the future.

HD FS 380. Family Law. (3-0) Cr. 3. S. Prereq: Junior classification. Family relationships, rights, and duties as prescribed by law. Investigation of sources and interpretations of law.

C. Early Childhood Special Education Programs. F. S. Prereq: GPA 2.5; full admission to teacher education program, 455, 456. Teaching experience with preschool children with disabilities.

HD FS 445. Administration of Programs for Children. (3-0) Cr. 3. F. Alt. SS., offered 2010. Prereq: 283. Program management principles and techniques, including an introduction to financial management involved in programs for children with diverse needs and their families. Staff development, supervision, and evaluation in programs for children and families. Government regulations concerning child and family programs; community relations; and advocacy for children and families.

HD FS 449. Linking Families and Communities. (3-0) Cr. 3. F. S. Prereq: 269 or Psych 332 or 333, senior classification. Assessing family needs and community resources across the lifespan. Characteristics of successful community-based family intervention and support programs. Strategies and skills needed by community-based professionals, including grant writing skills. Linking families to community resources. Nonmajor graduate credit.

HD FS 455. Curricula for Ages 3 through 6 Years. (3-1) Cr. 4. F. S. Prereq: 343, 348; Sp Ed 365 and 485. Program models and methods leading to development and organization of appropriate curricula in preschool and kindergarten programs for young children with diverse learning needs. Government regulations and professional standards for childcare programming. Teaming with parents, colleagues, and paraprofessionals to plan, implement, and evaluate developmentally and culturally appropriate individualized education plans in inclusive settings; practicum. Nonmajor graduate credit.

HD FS 463. Environments for the Aging. (Dual-listed with 583). (Cross-listed with ArtID, Geront.) (3-0) Cr. 3. S. Prereq: HD FS 380 or 3 credits in housing, architecture, interior design, rehabilitation, psychology, or human development and family studies. Emphasis on independent living within residential settings including specialized shelter, supportive services, and housing management. Application of criteria appropriate for accessibility and functional performance of activities; universal design principles. Creative project provides service learning opportunities.

HD FS 479. Family Interaction Dynamics. (3-0) Cr. 3. F. Prereq: 102 or equivalent; 269 or equivalent; 9 hours in social sciences and junior or senior Status. Analysis of research related to family interaction processes across the family life span. Emphasis on relationship dynamics and cultural differences. Nonmajor graduate credit.

HD FS 483. Advanced Personal and Family Finance. (3-0) Cr. 3. S. Prereq: 282. Managerial approaches to achievement of short- or long-term financial goals for households. Investigation of different forms of investments and investment risks management in financing current and future consumption. Analyses of tax, estate, and retirement planning needs of the family. Nonmajor graduate credit.

HD FS 486. Administration of Human Service Programs. (3-0) Cr. 3. F. Prereq: Junior classification, 6 credits in HD FS at 300 level and above. An examination of purposes, staffing, operation, and clientele of organizations and agencies serving families. Analysis of issues in coordination and delivery of services.

HD FS 488. Families in the Economy. (3-0) Cr. 3. S. Prereq: Econ 101. Analysis of the family as an economic unit in Society. Structure and composition of the family. Patterns of resource use and activities pursued by the family. Family economic transitions such as marriage, divorce, and childbirth. Nonmajor graduate credit.

HD FS 489L. Financial Counseling Laboratory. (Dual-listed with 589L) (0-2) Cr. arr. Repeatable. F. S. Prereq: Instructor permission. Practical experience in remedial, preventative, and productive approaches to both financial and housing counseling in one-on-one and/or group settings.

A. Child and Family Studies
B. Housing
C. Family Finance
F. Early Childhood Education
G. Early Childhood Special Education
H. Honors
I. Human Development and Family Studies
J. Policy Programs.
HD FS 491. Internship. Cr. arr. Repeatable. F.S.S.S. Prereq: 449; permission of instructor, senior classification. Reservation required one semester before placement; minimum 2.0 GPA. Supervised work experience related to the student’s curriculum. Satisfactory-fail only.

Courses primarily for graduate students, open to qualified undergraduate students

HD FS 501. Graduate Study Orientation. (1-0) Cr. F. Orientation to graduate study and current research in the department.

HD FS 503. Quantitative Research Methodology. (3-0) Cr. 3. S. Prereq: Stat 401 or ResEv 553, concurrent enrollment in HD FS 505. Concepts, methods, and strategies for research in human development and family studies. Topics include the nature of scientific research, measurement, types of research in human development and family studies, validity of research designs, methods of data gathering, and strategies for addressing the study of change.

HD FS 504. Qualitative Research Methods I. (3-0) Cr. 3. F. Prereq: 9 credits of social sciences. Introduction to qualitative research methodology. Application of fieldwork methods, analysis, interpretation, and writing through individual qualitative research projects.

HD FS 511. Family Theory. (3-0) Cr. 3. F. Prereq: 9 credits in social sciences. Theoretical approaches and current research in family development. Review the nature and value of theory to the study of the family and evaluate the use of theory in empirical research. Policy implications.

HD FS 525. Theories and Research in Early Childhood Education. (3-0) Cr. 3. Alt. F., offered 2009. Prereq: 510 or 6 credits in social sciences. Analysis of contemporary and historical models, including early intervention programs. Examination of relationships among physical environment, programming, teacher effectiveness, and child outcomes.

HD FS 530. Perspectives in Gerontology. (Cross-listed with Geron). (3-0) Cr. 3. F. WW only. Overview of current aging issues including theory and research, critical social and political issues in aging, the interdisciplinary focus of gerontology, career opportunities, and aging in the future.

HD FS 534. Adult Development. (Cross-listed with Geron). (3-0) Cr. 3. F. On campus. S. WW only. Explores the biological, psychological and social factors associated with aging. Although the focus is on the later years, information is presented from a life-span developmental framework. Empirical studies are reviewed and their strengths, limitations and implications for normative and optimal functioning are discussed.

HD FS 541. Housing and Real Estate in Family Financial Planning. (Cross-listed with FFP). (3-0) Cr. 3. Alt. SS., offered 2010. WW only. The role of housing and real estate in the family financial planning process, including mortgage and loan calculations, legal concerns, and ethical issues related to home ownership and real estate investments. Emphasis on emerging issues in the context of housing and real estate.

HD FS 545. Economics, Public Policy, and Aging. (Cross-listed with Geron). (3-0) Cr. 3. Alt. F., offered 2010. WW only. Policy development in the context of the economic Status of the older adult population. Retirement planning and the retirement decisions, social security and public transfer programs, intra-family transfers to/from the aged, private pensions; financing medical care, prospects and issues for the future.

HD FS 548. Parent Education. (3-0) Cr. 3. Alt. S., offered 2010. Prereq: 510 or 511 or 6 credits in social sciences. Needs assessments, models, delivery systems, and evaluation procedures used in parent education programs for families with diverse needs, including single parents, adolescent parents, and parents of children with developmental disabilities. Developmental aspects of parenting. Effects of values, family structures, family goals, and parenting styles on parent education.

HD FS 555. Current Issues in ECSE. (3-0) Cr. 3. Alt. F., offered 2010. Prereq: 9 credits in social sciences. Examination of research and current issues in early childhood special education with special emphasis on inclusion, activity-based intervention, and developmentally appropriate programming. Emphasis on continuum of strategies to embed learning opportunities that promote physical, language, cognitive, and social development.

HD FS 563. Environments for the Aging. (Dual-listed with 483). (Cross-listed with Geron). (3-0) Cr. 3. S. Prereq: 360 or 3 credits in housing, architecture, interior design, rehabilitation, psychology, or human development and family studies. Emphasis on independent living within residential settings including specialized shelters, support services and housing management. Application of criteria appropriate for accessibility and functional performance of activities; universal design principles. Creative project provides service learning opportunities.

HD FS 566. Impact of Public Policy on the Family. (3-0) Cr. 3. S. Prereq: 9 credits in social sciences. The effect of public policies on families, with a special emphasis on those at risk. Examines poverty in the U.S.; the consequences of poverty; the programs used to alleviate the consequences of poverty; evaluation of the efficacy of these programs.

HD FS 567. Family Stress, Abuse, and Illness. (3-0) Cr. 3. Alt. F., offered 2009. Prereq: 9 credits in social sciences. Contemporary theory and research on the causes and consequences of family stressors including physical, sexual, and emotional abuse; substance abuse; and mental and physical illness across the life span. Interplay between victims, offenders, and the treatment system. Identification of barriers to services and supports and exploration of approaches to assist families in overcoming these barriers.

HD FS 576. Marriage Across the Life Course. (3-0) Cr. 3. Alt. S., offered 2010. Prereq: 511. A developmental approach to exploring predictors of the formation, maintenance, and dissolution of intimate relationships across the life course. Understanding how intimate relationships develop and change over time, beginning with the development of early adolescent relationships and continuing through later life.

HD FS 579. Family Interaction Dynamics. (3-0) Cr. 3. Alt. S., offered 2011. Prereq: 9 credits in social sciences. Current research and theory in family interaction, with emphasis on family dynamics and family change across the life course.

HD FS 583. Investing for the Family's Future. (Cross-listed with FFP). (3-0) Cr. 3. F. Prereq: 483. Evaluation of investment markets for the household. Analysis of how families choose where to put their

2009-2011

266 Human Development and Family Studies
savings. Emphasis is on using the family’s overall financial and economic goals to help inform investment choices.

HD FS 584. Program Evaluation and Research Methods in Gerontology. (Cross-listed with Geronton.) (3-0) Cr. 3. Alt. SS., offered 2010. WWW only. Overview of program evaluation, research methods, and grant writing in gerontology. Includes application of quantitative and qualitative methods in professional settings.

HD FS 585. Family Policy Analysis and Evaluation. (3-0) Cr. 3. Alt. F., offered 2010. Prereq: 6 credits in graduate level social sciences. Theoretical and practical issues related to family policy analysis and program evaluation. Assessment of programs’ success in meeting goals. Examination of concepts related to family policy development in the United States. Examination of how individuals and groups can influence family policy and evaluation.

HD FS 587. Diversity Issues in Marriage and Family Therapy. (Cross-listed with W S). (3-0) Cr. 3. Alt. F., offered 2009. Review of treatment implications associated with topics such as gender and power, race/ethnicity, family structure, and Socioeconomic Status. Discuss treatment implications of social oppression and discrimination on families.

HD FS 589. Financial Counseling. (Dual-listed with 489B). (3-0) Cr. 3. F. Prereq: Graduate classification. Personal, social/psychological and legal climates affecting family financial decisions. A life cycle approach to financial decision making. Development of financial counseling and planning skills to assist families and individuals to become self-sufficient in family financial management.

HD FS 589L. Financial Counseling Laboratory. (Dual-listed with 489BL). (2-0) Cr. arr. Repeatable. F.S. Prereq: Instructor permission. Practical experience in remedial, preventive, and productive approaches to both financial and housing counseling in one-on-one and/or group settings.

HD FS 593. Workshop. Cr. arr. Repeatable. F.S.SS. Prereq: Senior classification. (Dual-listed with 493S.)

HD FS 594. Professional Seminar in Gerontology. (Cross-listed with Geronton.) (3-0) Cr. 3. Alt. SS., offered 2011. WWW only. An integrative experience for gerontology students designed to be taken near the end of degree program. By applying knowledge gained in earlier coursework, students will strengthen skills in ethical decision-making behavior, applying these skills in gerontology-related areas such as advocacy, professionalism, and family and workplace issues. Students from a variety of programs will bring their unique perspectives to bear on topics of common interest.

Courses for graduate students

HD FS 603. Advanced Quantitative Methods. (3-0) Cr. 3. S. Prereq: 502; 5402 or 5404. Methodological and analytical issues in research in human development and family studies. Advanced research design and measurement, selection of Statistical techniques, and issues in the interpretation of findings.

HD FS 604. Advanced Qualitative Research. (3-0) Cr. 3. F. Prereq: 503. Qualitative methods and related theory in human development and family studies. Research procedures, including phenomenology, grounded theory, ethnography, and case studies. Methods of data collection and analysis.

HD FS 616. Seminar. Cr. arr. May be repeated. F.S.SS.

HD FS 691. Internship. Cr. arr. Repeatable. F.S.SS. Prereq: Permission of instructor. Supervised practice and experience in the following specified areas: Satisfactory-fail only.

A. College Teaching B. Research C. Marriage and Family Therapy D. Professional Experience

Human Sciences

David Whaley, Program Coordinator

Human Sciences courses provide integrative study and enriching experiences in areas that cut across the diverse curricula of the College of Human Sciences. These may include such areas as leadership, global understanding, social justice/responsibility, and ethics. Students in any college may take these courses.

Courses primarily for undergraduate students

H Sci 150. Dialogues on Diversity. (1-0) Cr. 1. FS. An exploration of diversity within the context of the Iowa State University community through understanding human relations issues. Satisfactory-fail only.

H Sci 482. The Dean’s International Leadership Seminar. (Dual-listed with 582). (3-0) Cr. 3. S. S. Prereq: Permission of the seminar leader. Leadership strategies and effective use of leadership skills in an international setting. Compare leadership theories and practices in the U.S. and foreign countries. Construct individual leadership strategies to deal with complex issues in a global environment. Use discussion, personal assessment inventories, and simulated experiences to evaluate leadership strategies. Develop and improve skills in meeting the challenges of teamwork. Learn about the culture of a foreign country.

H Sci 490. Independent Study. Cr. arr. E. Entrepreneurship

H Sci 582. The Dean’s International Leadership Seminar. (Dual-listed with 582). (3-0) Cr. 3. S. S. Prereq: Permission of the seminar leader. Leadership strategies and effective use of leadership skills in an international setting. Compare leadership theories and practices in the U.S. and foreign countries. Construct individual leadership strategies to deal with complex issues in a global environment. Use discussion, personal assessment inventories, and simulated experiences to evaluate leadership strategies. Develop and improve skills in meeting the challenges of teamwork. Learn about the culture of a foreign country.
Immunobiology
www.immunobiology.iastate.edu
(Interdepartmental Graduate Program)
Supervisory Committee: Marian Kohut, Chair; Mike Wannemuehler, Louis Tabatabai, Jesse Hostetter, Bryan Belleira
The Graduate Faculty: Marian Kohut, Chair; Ackerman, Mark, Andreassen; Claire, Andreotti, Amy; Bartholomay, Lyn; Belleira, Bryan; Cunnick, Joan; Griffith, Ronald; Harris,D.L; Hostetter, Jesse; Jarvinen, Julie; Jones, Doug, Kanthasamy, Anungantha; Lamont, Susan; Lippolis, John; Minion, F. Chris; Nilsen-Hamilton, Mart; Nonnece, Brian; Nystrom, Evelyn; Opiresing, Tanja; Palic, Dusan; Petersen, Christine; Platt, K; Rosenthal, Don; Rosenbusch, Ricardo; Roth, James; Rothschild, Max; Sacco, Randy; Stabel, Judy; Tabatabai, Louis; Thoen, Charles; Wannemuehler, Mike; Waters Ray, Zhang, Qijing

Graduate Study
Work is offered for the master of science and doctor of philosophy degrees with a major in Immunobiology. Faculty are drawn from eight departments: Animal Science; Biochemistry, Biophysics, and Molecular Biology; Biomedical Sciences; Entomology; Kinesiology; Veterinary Diagnostic & Production Animal Medicine; Veterinary Microbiology & Preventative Medicine; and Veterinary Pathology. The diversity of faculty expertise ensures a broad education, while offering flexibility in choice of specialization. Ongoing research projects include areas such as: antibody and cell-mediated immunity, immunoochemistry, immunogenetics, immunomodulation, mucosal immunity and nutritional immunology.

Students may enter the Immunobiology major in one of two ways: they apply to be directly accepted into the major, or they may be admitted to a participating department followed by formal admission to the major. Students directly admitted into the Interdepartmental Immunobiology Major will take Imbio 697 (graduate research rotation) in their first two semesters, and by the end of the second semester, enter a department by choosing a major professor from the participating faculty. Students first admitted to a department will choose a major professor from the participating faculty in that department.

Students should have a strong background in the biological sciences, including work in immunology, genetics and biochemistry. Prior research experience is highly encouraged. Submission of scores of the GRE General Test is required.

Immunobiology students should include in their program of study a core of courses which will provide a broad coverage of the basic program in immunobiology. Formal courses should include immunology, biochemistry, and Statistics. Additional coursework may be selected to satisfy individual interests or departmental requirements. The foreign language and teaching requirements are determined by the student’s department. All students will take a minimum of one seminar course per year.

Graduates have a broad understanding of the interdisciplinary field of immunobiology, and can effectively integrate the principles of immunology with related disciplines. They are able to effectively communicate with scientific colleagues and the general public in both formal and informal settings. Graduates are able to integrate theory and research to address complex problems facing scientific professionals studying animal and human health, taking into account related ethical, social, legal and environmental issues. They are skilled at carrying out research, communicating research results, and writing persuasive grant proposals.

Courses for graduate students
Imbio 602. Current Topics Workshop in Immunology. (1-0) Cr. 1. Repeatable. Lectures provided by off-campus experts. Students are required to participate in discussion sessions with lecturers.
Imbio 604. Seminar in Immunobiology. (1-0) Cr. 1. Repeatable. Student and faculty presentation.
Imbio 690. Special Topics. Cr.arr. Repeatable. Advanced study of specific topics in specialized field of immunobiology.
Imbio 697. Graduate Research Rotation. Cr.arr. Repeatable. Graduate research projects performed under the supervision of selected faculty members in the Interdepartmental Immunobiology major.

Industrial Engineering
(Administered by the Department of Industrial and Manufacturing Systems Engineering)
Gary Mirka, Chair of Department
Distinguished Professors (Emeritus): Cowles
University Professor: Vardeman
University Professor (Emeritus): David
Professors: Heising, Mirka, Morris, Ryan
Professors (Emeritus): Barta, Berger, Even, Mohr, Montag, Moore, Patterson, C. Smith, G. Smith, Tamashunans, Vaughn
Associate Professors: Gemmill, Jackman, Meeks, Min, Olafsson, Peters
Assistant Professor (Emeritus): Love
Assistant Professors: Frank, Stone, Wang
Assistant Professor (Collaborator): Guerra-De-Castillo
Senior Lecturer: Potter
Lecturers: Sly

Undergraduate Study
For the undergraduate curriculum in industrial engineering leading to the degree bachelor of science, see College of Engineering, Curricula. This curriculum is accredited by the Engineering Accreditation Commission ABET.

Industrial engineers are employed to design, analyze, and improve systems and processes found in manufacturing, consulting, and service industries. Professional responsibilities are typically in design, management, analysis, optimization, and modeling of industrial systems. An industrial engineer is focused on human factors, operations research, engineering management, manufactur- ing engineering, and quality. Industrial engineers are typically found in organizations responsible for operations management, product engineering, automation, logistics, supply chain management, scheduling, plant engineering, quality control, and technical sales. The overall goal of the industrial engineering undergraduate curriculum is to produce technically qualified industrial engineers who are capable of successful professional practice in the field. To meet this goal, the curriculum includes in-depth instruction to accomplish the integration of systems using appropriate analytical, computational, and engineering practices. The curriculum also provides graduates with the necessary educational foundation to pursue advanced studies in industrial engineering or related fields.

The industrial engineering curriculum has the following objectives. The industrial engineering curriculum is preparing its graduates during their professional careers to:

Graduate Study
The department offers work for the degrees master of science and doctor of philosophy with a major in industrial engineering. A formal minor is available to graduate students having a major in another department. Graduate study is designed to improve the student’s capability to conduct research as well as improve professional expertise in industrial engineering.

The prerequisite to major graduate work is the completion of a curriculum similar to that required of undergraduate students in engineering at this institution.

With the help of a program of study committee, a graduate student develops an educational program in areas within industrial engineering. Typical areas of concentration include ergonomics, engineering management, human computer interfaces, manufacturing systems, operations research and optimization, and information engineering.

Courses primarily for undergraduate students
I 428. Engineering System Design, Manufacturing Processes and Specifications. (2-2) Cr. 3. F.
Prereq: Credit or enrollment in 101 and Mat E 272.
Introduction to metrology, engineering drawings and specifications. Engineering methods for designing and improving systems. Theory, applications, and quality issues related to machining processes.

I 427. Applied Ergonomics and Work Design. (3-0) Cr. 3. S. Prereq: Phys 221. Basic concepts of ergonomics and work design. Their impact on worker and work place productivity, and cost. Investigations of work physiology, biomechanics, anthropometry, work methods, and their measurement as they relate to the design of human-machine systems.

I 428. Cooperative Education. Cr. R. F.S.SS.
Prereq: Permission of department and Engineering Career Services. First professional work period in the cooperative education program. Students must register for this course before commencing work.

I 312. Optimization. (3-0) Cr. 3. F. Prereq: Math 267 Concepts, optimization and analysis techniques, and applications of operations research. Formulation of Mathematical models for systems, concepts, and methods of improving efficiency, linear programming and sensitivity analysis, network models, and integer programming. Nonmajor graduate credit.

I 341. Production Systems. (3-0) Cr. 3. F. Prereq: Stat 231; credit or enrollment in I E 312. Introduction of key concepts in the design and analysis of production systems. Topics include inventory control, forecasting, material requirement planning, project planning and scheduling, operations scheduling, and other production systems such as Just-In-Time (JIT), warehousing, and global supply chains. Nonmajor graduate credit.

I 348. Solidification Processes. (2-2) Cr. 3. S. Prereq: 248. Theory and applications related to metal casting, welding, powder processing, powder metallurgy, electronic assembly, and semiconductor manufacturing. Nonmajor graduate credit.

I 403. Introduction to Sustainable Production Systems. (Dual-listed with 503). (3-0) Cr. 3. Alt., offered 2011. Prereq: Credit or enrollment in 341. Quantitative introduction of sustainability concepts in production planning and inventory control. Review of material requirements planning and production component recovery (remanufacturing) from productivity perspectives. Sustainability rubrics ranging from design and process to systems. Application to multi-echelon net-works subject to forward/backward flow of material and information. Closed-loop supply chains. Compara-tive study of sustainable vs traditional models for local and global production systems.

I 408. Interdisciplinary Problem Solving. (Cross-listed with E E, TSM). (3-0) Cr. 3. F. Prereq: Junior or senior classification. Use of the Theory of Constraints as a way of approaching win-win negotiation, project planning and effective delega-tion in the context of engineering/business systems. Team projects aimed at improving design outcomes. Nonmajor graduate credit.

I 409. Interdisciplinary Systems Effectiveness. (Cross-listed with E E, TSM). (3-0) Cr. 3. F.S. Prereq: Junior or senior classification. Focus on functions that determine the effectiveness of an entire organization. Generic Theory of Constraints solutions to production, distribution, and project management are compared to traditional solutions. Strategy for improvements discovered using simulations. Nonmajor graduate credit.

I 413. Stochastic Modeling, Analysis and Simulation. (4-0) Cr. 4. F. Prereq: Math 267, Stat 231. Development and analysis of simulation models using a stochastic model. Various areas of manufacturing and service systems such as assembly, material handling, and customer queues. Utilizing model output to make important business decisions. Fitting of data to Statistical distributions. Introduction to Markov processes and other queuing models. Nonmajor graduate credit.

I 419. Manufacturing Systems Modeling. (3-0) Cr. 3. S. Prereq: Stat 231. Modeling material handling systems, inventory systems, and production systems for performance analysis. Introduction to analysis, simulation, and physical models of manufacturing systems. Simulation languages such as ARENA, AwSim, and ProModel. Not available for degrees in industrial engineering. Nonmajor graduate credit.

I 441. Industrial Engineering Design. (1-6) Cr. 3. F. Prereq: 248, 271, 361; credit or enrollment in 341, 413, and 448. A large, opened design project related to an enterprise. Application of engineering design principles including problem definition, analysis, synthesis, and evaluation. Nonmajor graduate credit.

I 446. Geometric Variability in Manufacturing. (Dual-listed with 548). (3-0) Cr. 3. Alt. S., offered 2011. Prereq: I E 348, or Mat E 341, or M E 324. Assessment, accommodation, and control of geometric variability of manufacturing processes. Use of CMMs, vision and scanning systems, and profilometers. Techniques to successfully accommodate variation through design of product, tooling or process plan including plastic injection molding, metalcasting, welding, machining, powder metallurgy. Methodologies to control geometric variability. Nonmajor graduate credit.

I 448. Manufacturing Systems Engineering. (3-0) Cr. 3. S. Prereq: 248 or similar manufacturing experience. 305. Fixturing and tooling requirements for manufacturing process planning, geometry verification and tolerancing, computer aided inspection, cellular and flexible manufacturing, and facility layout. The role of these topics in supporting lean manufac-turing will be assessed throughout the course. Nonmajor graduate credit. Nonmajor graduate credit.

I 466. Multidisciplinary Engineering Design. (Cross-listed with A. E, Aer E, Cpr E, E E, Engr, Mat E, M E I, (1-4) Cr. 3. Repeatable. F.S. Prereq: Students must be graduate student and receive permission of instructor. Application of team design concepts to projects of a multidisciplinary na-ture. Concurrent treatment of design, manufacturing, and life cycle considerations. Application of design tools such as CAD, CAM, and Fem. Design method-ologies, project scheduling, cost estimating, quality control, manufacturing processes. Development of a prototype and appropriate documentation in the form of written reports, oral presentations, and computer models and engineering drawings.

I 483. Knowledge Discovery and Data Mining. (Dual-listed with 583). (3-0) Cr. 3. Alt. F., offered 2010. Prereq: 148, 312, and Stat 231. Introduction to data mining, and mining of multimedia data. Case studies from both manufacturing and service industries. A computing project is required. Nonmajor graduate credit.

I 498. Cooperative Education. Cr. R. Repeatable. F.S.SS. Prereq: 298, permission of department and Engineering Career Services. Third and subsequent professional work periods in the cooperative education program. Students must register for this course before commencing work. Satisfactory-fail only.

Courses primarily for graduate students, open to qualified undergraduate students

I 501. M.S. Research Basics and Communications. Cr. R. Repeatable. Principles and practices for research tasks at the M.S. level including proposal writing, presentations, paper preparation, and project management.

I 503. Introduction to Sustainable Production Systems. (Dual-listed with 403). (3-0) Cr. 3. Alt. S., offered 2011. Prereq: Credit or enrollment in 341. Quantitative introduction of sustainability concepts in production planning and inventory control. Review of material, economic, and environmental impacts. Introduction to decision recovery (remanufacturing) from productivity perspectives. Sustainability rubrics ranging from design and process to systems. Application to multi-echelon networks subject to forward/backward flow of materi-al. Analysis of supply chains. Compari-tive study of sustainable vs. traditional models for local and global production systems. A course project is required for graduate credit.

I 508. Design and Analysis of Allocation Mechanisms. (3-0) Cr. 3. Prereq: 312 or Math 307 Market-based allocation design. Concepts and mechanisms from quantitative economic systems perspective. Pricing and costing models designed and analyzed with respect to decen-tralized decision processes, information requirements, and coordination. Case studies and examples from industries such as regulated and competitive manufacturers, and financial engineering services.

I 510. Network Analysis. (3-0) Cr. 3. Prereq: 312. Formulation and solution of deterministic network flow problems including shortest path, minimum cost flow, and maximum flow. Network and graph formulations of combinatorial problems including assignment, matching, and spanning trees. Introduction to deter-ministic and stochastic dynamic programming.
I E 513. Analysis of Stochastic Systems. (3-0) Cr. 3. Prereq: Stat 231. Introduction to modeling and analysis of manufacturing and service systems subject to uncertainty. Topics include the Poisson process, renewal processes, Markov chains, and Brownian motion. Applications to inventory systems, production system design, production scheduling, reliability, and capacity planning.

I E 514. Production Scheduling. (3-0) Cr. 3. Prereq: 312, 341. Introduction to the theory of machine shop systems. Complexity results for various systems such as job, flow and open shops. Applications of linear programming, integer programming, network analysis, Enumerative methods for machine sequencing. Introduction to stochastic scheduling.

I E 531. Quality Control and Engineering Statistics. (Cross-listed with Stat). (3-0) Cr. 3. Alt. S., 2011. Prereq: Stat 247 or 447 Wu. Statistical methods and theory applicable to problems of industrial process monitoring and improvement. Statistical issues in industrial measurement; Shewhart, CUSUM, and other control charts; feedback control; process characterization studies; estimation of product and process characteristics; acceptance sampling, continuous sampling and sequential sampling; economic and decision theoretic arguments in industrial Statistics.

I E 533. Reliability. (Cross-listed with Stat). (3-0) Cr. 3. Alt. S., 2011. Prereq: Stat 342 or 447 Meeker. Probabilistic modeling and inference in reliability; analysis of systems; Bayesian aspects; product limit estimator, probability plotting, maximum likelihood estimation for censored data, accelerated failure time and accelerated hazard regression models with applications to accelerated life testing; repairable system data; planning studies to obtain reliability data.

I E 541. Inventory Control and Production Planning. (3-0) Cr. 3. Prereq: 341. Economic Order Quantity, dynamic lot sizing, newsboy, base stock, and (Q, r) models, Material Requirements Planning, Just-In-Time (JIT), variability in production systems, push and pull production systems, aggregate and workforce planning, and capacity management.

I E 545. Rapid Prototyping and Manufacturing. (3-0) Cr. 3. Prereq: 248 or similar manufacturing experience. Introduction to rapid prototyping processes and other rapid manufacturing methodologies. Operating principles and characteristics of current and developing rapid prototyping processes. Use of rapid prototypes in product design, development, and service. Selection of appropriate systems based on rapid methodologies used in manufacturing processes and rapid tooling approaches.

I E 546. Geometric Variability in Manufacturing. (Dual-listed with 446). (3-0) Cr. 3. Alt. S., offered 2011. Prereq: I E 348, or Mat E 341, or M E 324. Assessment, accommodation of geometric variability of manufacturing processes. Use of CMMs, vision and scanning systems, and profilometers. Techniques to successfully accommodate variation through design of product, tooling or process plan including plastic injection molding, metalcasting, welding, machining, powder metallurgy. Methodologies to control geometric variability.

I E 561. Continuous Quality Improvement of Process. (3-0) Cr. 3. Prereq: Coursework for continuous quality improvement in process analysis. The systems analysis for process improvement model based on W. Edwards Deming. Quality function development methodologies. Case studies of applications to manufacturing and other heavy industries. Use of process analysis computerized programs and tools for design analysis.

I E 565. Systems Engineering and Analysis. (Cross-listed with AER E, E E). (3-0) Cr. 3. Prereq: Coursework in basic Statistics. Introduction to organized multidisciplinary approach to designing and developing systems. Systems analysis and design of system engineering as applied to large integrated systems. Life cycle costing, scheduling, risk management, functional analysis, conceptual and detail design, test and evaluation, and systems engineering planning and organization. Not available for degrees in industrial engineering.

I E 566. Applied Systems Engineering. (3-0) Cr. 3. Prereq. 365. Design for reliability, maintainability, usability, supportability, producibility, disposability, and life cycle costs in the context of the systems engineering processes. Students will be required to apply the principles of systems engineering to a project including proposal, program plan, systems engineer management plan, and test and evaluation plan. Not available for degrees in industrial engineering.

I E 570. Systems Engineering and Project Management. (3-0) Cr. 3. Prereq: Coursework in Basic Statistics. Systems view of projects and the processes by which they are implemented. Focuses on qualitative and quantitative tools and techniques of project management. Specific systems concepts, methodologies, and tools for effective management of both simple and complex projects. Concepts, principles, and practice of system engineering as applied to large integrated systems. Life cycle costing, scheduling, risk management, functional analysis, conceptual and detail design, test and evaluation, and systems engineering planning and organization. Not available for degrees in industrial engineering.

I E 572. Design and Evaluation of Human-Computer Interaction. (3-0) Cr. 3. Prereq: I E 577 Human factors methods applied to interface design, prototyping, and evaluation. Conceptual understanding user characteristics, usability analysis, methods and techniques for design and evaluation of the interface. The evaluation and design of the information presentation characteristics of a wide variety of interfaces: web sites (e-commerce), computer games, information presentation systems (cokkirts, instrumentation, etc.), and desktop virtual reality.

I E 576. Human Factors in Product Design. (3-0) Cr. 3. Prereq: I E 577 Investigation of the human interface to consumer and industrial systems and products, providing a basis for their design and evaluation. Discussions of human factors in the product design process: modeling the human during product use; usability; human factors methods in product design evaluation; user-device interface; safety, warnings, and instructions for products; considerations for human factors in the design of products for international use.

I E 577. Human Factors. (3-0) Cr. 3. Prereq: 271, Stat 231 or 401. Physical and psychological factors affecting human performance in systems. Signal detection theory, human reliability modeling, information theory, and performance shaping applied to safety, reliability, productivity, stress reduction, training, and human/ equipment interface design. Laboratory assignments related to system design and operation.

I E 582. Enterprise Modeling and Integration. (3-0) Cr. 3. Prereq. 3 credits in information technology or information systems. The design and analysis of enterprise models to support information engineering of enterprise-wide systems. Representation of system behavior and structure including process modeling, information modeling, and conceptual modeling. Applications in enterprise application integration, enterprise resource planning systems, product data management systems, and manufacturing execution systems.

I E 583. Knowledge Discovery and Data Mining. (Dual-listed with 483). (3-0) Cr. 3. Alt. F., offered 2010. Prereq: 148, 312, and Stat 231. Introduction to data warehouses and knowledge discovery. Techniques for data mining, including probabilistic and Statistical methods, genetic algorithms and neural networks, visualization techniques, and Mathematical programming. Advanced topics include web-mining and mining of multimedia data. Case studies from both manufacturing and service industries. A computing project on an additional project with more theoretical content are required.

I E 585. Requirements Engineering. (3-0) Cr. 3. Prereq: 3 credits in information technology or information systems. Principles and practices for requirements engineering as part of the product development process with emphasis on software systems engineeriing. System requirement definition, requirements analysis, requirements elicitation, validation, specifications. Cases study using requirements engineering methods and techniques.

I E 588. Information Systems for Manufacturing. (3-0) Cr. 3. Preq: 148, 448 Design and implementation of systems for the collection, maintenance, and usage of information needed for manufacturing operations, such as process control, quality, process definition, production definitions, inventory, and plant maintenance. Topics include interfacing with multiple data sources, methods to utilize the information to improve the process, system architectures, and maintaining adequate and accurate data for entities internal and external to the enterprise to achieve best manufacturing practices.

Courses for graduate students

I E 613. Stochastic Production Systems. (3-0) Cr. 3. Prereq: 513. Modeling techniques to evaluate performance and address issues in design, control,
A student’s Program of Study Committee, in consultation with the student, determines the elective courses to be taken and the acceptability of transfer credits. The major professor will be selected from the discipline where the student is admitted (home department).

The basic prerequisite for admission to this program is a baccalaureate degree in engineering, mathematics, computer science, management information systems, political science, or closely related field. The GRE or GMAT examination may be required based on the standards of the home department. If the GRE or GMAT is not required it will be considered in admissions decisions if offered. Potential students with baccalaureate degrees in the physical sciences, statistics, or other related fields will be considered on an individual basis, possibly with provisional admission. The degree awarded is a master of science in information assurance.

A graduate certificate in Information Assurance is offered, which consists of four courses (12 credits) (InfAs 530, 531, 532, (533 or 535)).

For additional information students should contact the chair of the Supervisory Committee, 2215 Cooper Hall, ISU, Ames, Iowa 50011, or www.iac.iastate.edu.

Courses for graduate students

InfAs 530. Advanced Protocols and Network Security. (Cross-listed with Cpr E). (3-0) Cr. 3. Prereq: Cpr E 381 or 389. The network security model: basic cryptographic security, security policies, multilevel security models, attack and protection mechanisms, legal and ethical issues.

InfAs 532. Information Warfare. (Cross-listed with Cpr E). (3-0) Cr. 3. Prereq: Cpr E 489 or 530 or Com S 533/InfAs 533. Computer and network security: basic cryptography, security policies, multilevel security models, attack and protection mechanisms, legal and ethical issues.

InfAs 533. Information System Security. (Cross-listed with Cpr E). (3-0) Cr. 3. Prereq: Cpr E 489 or 530 or Com S 533/InfAs 533. Computer and network security: basic cryptography, security policies, multilevel security models, attack and protection mechanisms, legal and ethical issues.

InfAs 535. Steganography and Watermarking. (Cross-listed with Cpr E). (3-0) Cr. 3. S. J. Crase, (Social Sciences), C. Flora (Community Development). The degree of master of science or master of arts with major in interdisciplinary graduate studies is available to graduate students who wish to have a more diversified program of advanced study than that generally permitted students who specialize in a single subject. Areas of specialization in arts and humanities, biological sciences, international development studies, physical sciences, social sciences, community development (see below) and a general area are designed to broaden and supplement a student’s program. Students must take courses in three different graduate subject matter areas, each subject contributing a minimum of nine credits toward the degree. Courses which may be used for credit toward this degree program are selected from those listed in the Graduate College Catalog for graduate credit.

Both thesis and nonthesis options are available except in arts and humanities in which a thesis is required. If the thesis option is chosen, a minimum of three credits of IGS 699 (Research) is required and a maximum of five credits of IGS 699 may be counted in the total of 35 required credits. If the nonthesis option is elected, evidence of original creative effort must be presented. This may be in the form of a demonstration of independent creativity such as a written report of laboratory, field, or library research on fine arts; or some other original contribution acceptable to the student’s committee. In the nonthesis option a minimum of three credits of IGS 599 (Creative Component) is required and a maximum of five credits of IGS 599 may be counted toward the total of 35 graduate credits. The student, in consultation with the program of study committee, will decide on the option. The committee also aids the student in planning a program of study and in selecting appropriate courses. Graduates will have
experience in designing their own program centered around issues they have identified. Because of the interdisciplinary nature of IGS, students are expected to synthesize knowledge from three different areas of study.

Students who wish to apply for admission to interdisciplinary graduate studies should communicate with the chair of the program, the chair of the supervisory committee or one of its members (see above).

Students in IGS may select a 37-credit area of specialization in Community Development. The Community Development area of specialization, offered in collaboration with five other universities in the Great Plains Interactive Distance Education Alliance, is offered exclusively through courses on the Web.

Courses for graduate students

IGS 599. Creative Component. Cr. arr. Repeatable.

Interdisciplinary Studies

www.las.iastate.edu/academica/interdisciplinarystudies.shtml
(Interdepartmental undergraduate major administered by the College of Liberal Arts and Sciences)

A major in interdisciplinary studies is offered in the College of Liberal Arts and Sciences for undergraduate students who have unique interdisciplinary educational goals. The student, a faculty review board, and an academic adviser design the major. Leading to either the bachelor of arts or the bachelor of science degree, the major includes 36 to 48 credits of coursework chosen to provide a coherent, carefully planned program in an area of interest that bridges two or more departments. This specialized area is identified on the diploma. Learning goals are individually crafted for each proposed major.

A degree in Interdisciplinary Studies may be particularly attractive to students who wish to develop an area of interest based upon one of the College’s cross-disciplinary programs. Areas of interest in Interdisciplinary Studies have included Classical Studies, Criminology and Criminal Justice, International Relations, Ecology Studies, African American Cultural Studies, Asian Studies, and U.S. Latino/a Studies.

A student seeking admission to the program in interdisciplinary studies writes a letter of application that explains how the proposed major meets specific educational and learning goals. A faculty review board screens applications. Since students are expected to earn at least 30 credits after they are admitted into the program, the proposal is ordinarily submitted to the review board in the sophomore or junior year. The proposal will be considered if the area of interest properly falls within the College of Liberal Arts and Sciences and if the student’s educational goals cannot be met by a more traditional combination of existing majors, minors, and electives.

The interdisciplinary studies major must satisfy the requirements of the liberal arts and sciences curriculum in the College of Liberal Arts and Sciences. A major emphasizing the humanities or communicative arts normally leads to a B.A.; a major emphasizing the natural or social sciences normally leads to a B.S. Different requirements for the B.A. and B.S. degrees are determined by the nature of the chosen field of study. Courses listed in the individualized major may come from any department of the university with the following restrictions:

1. The selection of courses needs to focus on a single theme and be consistent with the career and educational goals of the student.
2. At least one half of the courses in the major will come from departments within the College of Liberal Arts and Sciences.
3. The courses will be chosen from at least two disciplines.

All courses in the major must be at the 200-level or higher. At least 15 credits must be at the 300-level or higher with at least 6 credits at the 400-level or higher. An average grade of C or better must be earned in 15 credits at the 300-level or higher in the major. To meet the English and communication proficiency requirement, a grade of C or better must be earned in either an advanced English composition course or a course in the major with a significant writing component. Further information may be obtained from the college office.

International Agriculture

www.ageds.iastate.edu/intrnlag/index.htm
(Interdisciplinary Undergraduate Program)

Supervisory Committee: Robert A. Martin, Chair; Michael D. Kenealy, Ebby Livaga

The international agriculture program provides opportunities to develop knowledge and skills related to the factors that interact to impact agricultural and environmental issues, production, processes, distribution and utilization worldwide. The program puts emphasis on international experience through structured internships and study abroad. The international agriculture program is appropriate for students seeking positions that require knowledge and experience related to global agricultural issues and their impact on local, regional, national and international policies and practices.

Students preparing for careers in the following areas will benefit from the international agriculture program; governmental and non-governmental development agencies, agribusinesses, educational institutions, and non-profit assistance agencies.

Outcomes from participation in this program include developing an awareness for the role of international agriculture in the career development process, analyzing international agricultural issues and policies, acquiring skills for solving problems in international development and agribusiness and experiencing real situations and gaining perspectives about agriculture in a global setting.

Secondary Major

International agriculture is an undergraduate secondary major that may be taken only in conjunction with a primary major in agriculture and life sciences curriculum. Students choosing international agriculture will strengthen their career placement with a business or agency involved in international activities. Technical knowledge of a primary major discipline will be strengthened by a global awareness of agriculture and life sciences. A secondary major in international agriculture will give students practical insight into the role of agriculture in a world of increasing food and fiber needs. It is ideal for those who wish to broaden their international perspective or prepare for international work in agriculture. The secondary major includes an emphasis on international internship or study abroad and/or foreign languages, and selection of appropriate courses (from an approved list) to meet the needs and interests of the student.

Courses for the secondary major include Agron 342; six credits of study abroad, travel, or language courses or any combination thereof; and six credits in selected international agriculture courses in the College of Agriculture and Life Sciences. Fifteen credits of the secondary major cannot be used to meet requirements of the major or any other college or university requirement.

See International Agriculture, Curriculum, for the specific program. Students interested in earning a secondary major in international agriculture must contact a program adviser. The early indication of an interest in international agriculture allows for effective integration of the secondary major course requirements with those of the primary major.

Minor

A minor in international agriculture is available to interested students regardless of their major. Students selecting the minor should have at least minimal familiarity with agriculture and life sciences and agricultural systems.

Courses for the minor include Agron 342; 3 to 6 credits of study abroad and/or foreign language and 3 to 6 credits in selected international agriculture courses in the College of Agriculture and Life Sciences. Nine credits of the 15 credit total for the minor can not be used for meeting requirements for the major.

For more information about a secondary major or minor in international agriculture, see descriptions in the designated departments or the supervisory committee.

For more information about courses for either a secondary major or a minor in international agriculture, see descriptions in the designated departments.

International Business

Interdepartmental Undergraduate Secondary Major

Supervisory Committee: Dr. Ann Coppennoli-Farni (contact person) and others annually appointed by College.

The international business program is designed to provide students with information that will enable them to work for companies that are involved with international business. Students are expected to develop an understanding of international business issues applied to the different functional areas of business. They will also develop skills to prepare themselves for business positions with international responsibilities. The program is designed to prepare students for employment in multinational companies and for business assignments beyond the United States.

International business is an undergraduate secondary major that may be taken only in conjunction with a primary major in business. Technical knowledge of international business will strengthen the expertise acquired with the primary major.

Business students pursuing this program should strengthen their placement opportunities with multinational corporations.

A student in the College of Business may earn a secondary major in International Business. The requirements for this major include 12 credits in international business courses, one year of the same university-level foreign language (minimum of 6 credits) and an approved international experience (minimum 3 months). Students who pursue this secondary major will be required to complete the requirements for a primary major in Business. Fifteen of the 18 credits required for the International Business major must not be used for the primary major.

2009-2011
International Studies

www.iastate.edu/intermajor/major.shtml
(Interdepartmental/Undergraduate Major and Minor, Administered by the College of Liberal Arts and Sciences)

Director: Dawn Bratsch-Prince

Faculty Steering Committee: Charles Dobbs, Chad Gasta, Hsain Ilahaine, Olga Mesropova, Thomas Waldemar.

Undergraduates completing the International Studies major understand the interconnections between local and global issues and events. They can integrate their understanding of a selected global issue with knowledge of the major culture, values, and problems of a selected geographical area. They can communicate with persons of cultures other than their own and, in so doing, appreciate the impact of their own cultural and educational experience on their perception of the world. The international studies program provides opportunities for students to develop skills and understanding about international events and problems, and global issues. The program is designed for students who wish to prepare for work or advanced study in the international arena, such as in foreign service, journalism, advocacy organizations, political or research institutions, business, nongovernmental development organizations (NGOs), humanitarian agencies, environmental organizations, human rights organizations, think tanks, international agriculture, engineering, and other fields.

A secondary major and a minor in International Studies are available for undergraduates. The program requirements are structured around a combination of a designated Topical Module and a Geographic Regional Studies Component. Each student's program of study is designed to reflect programmatic opportunities at Iowa State University and the academic, intellectual, and professional interests of the student.

Secondary Major

A student seeking a secondary major in International Studies must successfully complete a minimum of 27 semester credits in courses approved for use in the International Studies program, including: IntSt 235, 430; 21 credits in courses approved for the International Studies program, with a minimum of 5 credits (at least 6 of which are numbered 300 or above) in a designated Topical Module and a minimum of 9 credits (at least 6 of which are numbered 300 or above) in a Geographic Regional Studies Component; Fulfillment of Language Proficiency (see below); study abroad.

The major must include a minimum of 12 credits not used to meet any other department, college, or university requirement.

Minor

A student seeking a minor in International Studies must successfully complete a minimum of 18 semester credits in courses approved for use in the International Studies program, including: IntSt 235, IntSt 430; 12 credits in courses approved for the International Studies program, with a minimum of 6 credits (at least 3 of which are numbered 300 or above) in a designated Topical Module and a minimum of 6 credits (at least 3 of which are numbered 300 or above) in a Geographic Regional Studies Component; Fulfillment of Language Proficiency (see below); study abroad.

The minor must include a minimum of 9 credits not used to meet any other department, college, or university requirement.

Language Proficiency

Students with a major or minor in International Studies fulfill the Language Proficiency requirement through one of the following options:

• Completion of two years of university-level language instruction in a single, appropriate foreign language, as determined by a foreign language course numbered 202 or higher. Students whose first language is other than English fulfill Language Proficiency with Engl 250 at a grade of “C” or better.

• Passing an examination given by the Dept. of World Languages and Cultures or otherwise certifying proficiency equivalent to two years of college instruction. Students proficient in language(s) other than English at ISU may petition for special consideration.

• Intensive study abroad experience that includes in-the-field-use of a language other than English (individual prior approval of committee required for this option).

A. Topical Modules

• Global Environmental Issues
• Globalization and Economic Development
• International Issues in Science and Technology
• International Communication
• International Conflict
• Social and Cultural Change

B. Geographic Regional Studies Component

• Africa and Middle East
• Asia
• Latin America
• Western Europe
• Russia, East Europe and Central Asia

International Studies students are required to participate in study and/or work abroad programs. Students may petition to use up to 9 credits in the major (6 credits earned in study abroad and/or international internship programs to substitute for courses within the Topical Module, Geographic Regional Studies Component, and/or Language Proficiency requirements.

Courses primarily for undergraduate students

IntSt 235. Introduction to International Studies. (3-0) Cr. 3. FSS. Overview of international studies, emphasizing cultural, geographic, economic, and political characteristics of major world areas and nations.

IntSt 350. Topics in International Studies. Cr. arr.

IntSt 430. Seminar in International Studies. (3-0) Cr. 3. 5. Capstone seminar in international studies focused on economic development, women’s issues, war and ethnic conflict, population, the environment, globalization, human rights, international trade and business and other issues. Students develop a project on a subject linked to their area of professional interest or academic specialization.

IntSt 446. International Issues and Challenges in Sustainable Development. (Cross-listed with Agron, Glob, Cr. 4. S. Prereq: 3-credit biology course, Sophomore or higher classification, permission of Instructor: Mullen. Interdisciplinary study and analysis of agricultural, biophysical, environmental, sociological, economical, political, and historical factors affecting sustainable development of communities and countries from art and science perspectives. Interna- tional field experience with foreign language training required. A program fee is charged to students for international study abroad.

IntSt 490. Independent Study. Cr. arr. Repeatable. Prereq: Permission of International Studies Advisory Committee Chair and faculty supervisor. Designed to meet the needs of students who wish to study in areas other than those in which courses are offered or to integrate areas of study appropriate to special problems with international focus. No more than 3 credits of IntSt 490 may be used in the International Studies major or minor.

Iowa Lakeside Laboratory

www.lakesidelab.org
(Internstitutional Program)

Participating Faculty: Neil P. Bernstein (Biology, Mount Mercy College), Bonnie S. Boxen (Ecology, Evolution and Organismal Biology, Iowa State University), C. Lee Burris (Agronomy, Iowa State University), C. Arthur Coyte (Art and Design, Iowa State University), John F. Doershuk (Anthropology, University of Iowa, and State Archaeologist), Mark B. Edlund (Science Museum of Minnesota, St. Croix Watershed Research Station), Jim Heynen (English, St. Olaf College), Laura Johnson (Biology, University of Northern Iowa), Stephen Juggins, (School of Geography, Politics & Sociology, University of Newcastle, UK), Kenneth L. Lang (Biological Sciences, Humboldt State University), Michael J. Lannino (Muncie Center for Medical Education, Ball State University), William R. Norris (Natural Sciences, Western New Mexico University), Clay L. Pierce (Natural Resource Ecology and Management, Iowa State University), Thomas R. Rosburg (Biology, Drake University), Daryl D. Smith (Native Roadside Vegetation Center, University of Northern Iowa), Sarah A. Spaulding (Inst. of Arctic & Alpine Research, University of Colorado), Lois H. Tiffany (Ecology, Evolution and Organismal Biology, Iowa State University), Amanda Van Der Valk (Ecology, Evolution, and Organismal Biology), James L. Wee (Biological Sciences, Loyola University).

Iowa Lakeside Laboratory is run cooperatively by the Iowa Lakeside Laboratory Consortium whose members include Drake University, Iowa State University, the University of Northern Iowa, and the University of Iowa. Lakeside courses can be taken for credit through all Consortium members. Students should check with their advisers to determine whether Lakeside courses can be used to satisfy major or minor requirements or college or university general education requirements.

The Laboratory was established in 1909 for the conservation and study of the rich flora and fauna of northwest Iowa, especially those of the Iowa Great Lakes region with its numerous lakes, wetlands, and prairies. Its campus is located on approximately 140 acres of restored prairie, wetland, and gallery forest along the west shore of West Okoboji Lake. Lakeside’s mission is to provide undergraduate and graduate students an opportunity to get hands-on experience working with a variety of natural and human phenomena through its field-oriented summer courses and to provide research facilities and support for graduate students and faculty working on research projects in northwestern Iowa. Each summer, Iowa Lakeside Laboratory offers students a unique educational experience: small, full-immersion, field-oriented courses in the natural sciences (archaeology, ecology, environmental science, hydrology, evolution, geology, soils, taxonomy). All courses meet all day from Monday through Friday. The majority of courses run for 4 weeks. Enrollments in most courses are limited to 8 to 10 students. Courses are taught at the undergraduate (sophomore and junior) and the senior/graduate level. Students obtain one credit for each week (40 hours) in class. One and two week courses are also available, including courses designed especially for teachers. Weather permitting, students normally spend at least part of each day doing field work, either as part of their class work or working on individual or group projects. Because some courses are offered intermittently, the current Iowa Lakeside Laboratory summer brochure or the Lakeside Lab Website (www.lakesidelab.org) should be consulted for the list of courses being offered in a given summer session. The Lakeside Lab Website

la LL 4021. Watershed Hydrology and Surficial Processes. (Cross-listed with Agron, EnSci). Cr. 4. SS. Prereq: Four courses in physical or biological sciences or engineering. Effects of geomorphology, soils, and land use on transport of water and materials (nutrients, contaminants) in watersheds. Fieldwork will emphasize investigations of the Iowa Great Lakes watershed. Nonmajor graduate credit.

la LL 403. Evolution, Cr. 4. SS. Mechanisms and patterns in microevolution and macroevolution. Field exercises will emphasize studies of natural selection, adaptation, genetic variation, and population genetics of local plant and animal populations. Nonmajor graduate credit.

la LL 4041. Behavioral Ecology. (Cross-listed with A Ecl). Cr. 4. Alt. SS., offered 2010. Prereq: Two semesters of biology. Animal community, courtship, territoriality, predator defense, habitat selection, foraging, mating systems, and parental care will be examined in the field in order to evaluate various ecological and evolutionary theories of animal behavior.

la LL 4201. Amphibians and Reptiles. (Cross-listed with A Ecl). Cr. 4. Alt. SS., offered 2010. Prereq: Two semesters of biology, Ecology, behavior, and conservation biology of amphibians and reptiles with emphasis on their anatomy and morphology; temperature and water regulation; locomotion; life history; reproduction, population and community ecology; and conservation.

la LL 4221. Prairie Ecology. (Cross-listed with EnSci). Cr. 4. SS. Prereq: Familiarity with basic principles in biological sciences and ecology. Basic patterns and underlying physical and biotic causes of both regional and local distributions of plants and animals of North American prairies; field and laboratory analyses and projects. Nonmajor graduate credit.

la LL 4251. Aquatic Toxicology and Wetland Dynamics in Freshwater Systems. Cr. 4. SS. Prereq: Introductory biology course and general chemistry course. Fundamental knowledge and understanding of the scientific concepts related to the physio-chemical and biological environment. Problems and issues (global, national, regional, and local) associated with freshwater systems and how wetland restoration can be used to ameliorate problems. Discussion and application of basic tools used to assess aquatic toxicological problems. Nonmajor graduate credit.

la LL 4271. Archaeology. (Cross-listed with Anthr). Cr. 4. SS. Nature of cultural and environmental evidence in archaeology and how they are used to model past human behavior and land use; emphasis on Iowa prehistory; basic reconnaissance surveying and excavation techniques. Nonmajor graduate credit.

la LL 4351. Illustrating Nature I Sketching. (Cross-listed with BPM I). Cr. 2. SS. Sketching plants, animals and terrain. Visual communication, development of a personal style, and integration of typographic and visual elements on a page will be emphasized.

la LL 4361. Illustrating Nature II Photography. (Cross-listed with BJP I). Cr. 2. SS. Beginning to intermediate technical and compositional aspects of color photography of natural areas and their plants and animals.

la LL 484. Plant Ecology. Cr. 4. SS. Principles of plant population, community, and ecosystem ecology illustrated through studies of native vegetation in local prairies, wetlands and forests. Group or individual projects. Nonmajor graduate credit.

la LL 4901. Undergraduate Independent Study. (Cross-listed with Anthr, NREM). Cr. arr. Repeatable. SS. Prereq: Junior or senior classification and permission of instructor.

la LL 494. Ecosystems of North America. Cr. arr. SS. Prereq: A general ecology course and permission of the instructor. An extended field trip to study a particular type of ecosystem (prairie, coastal wetland, forest, alpine, coral reefs, etc.) or the ecosystems of a specific region (Rocky Mountains, Gulf Coast, Appalachian Mountains, Deserts of the Southwest, Central America, etc.). Prior to the field trip, there will be an orientation period and after each field trip a review and synthesis period. A field trip fee will be assessed to cover travel expenses. Nonmajor graduate credit.

la LL 499. Undergraduate Research. Cr. arr. Prereq: Junior or senior classification and permission of instructor.

Courses primarily for graduate students

la LL 501. Freshwater Algae. (Cross-listed with EEBO). Cr. 4. SS. Structure and taxonomy of freshwater algae based on field collected material; emphasis on genus-level identifications, habitats visited include lakes, fens, streams, and rivers; algal ecology.
la LL 503. Graduate Internships. Cr. arr. SS. Prereq: Permission of instructor and graduate standing. Placement with county conservation boards, camps, parks, schools, etc. For experience as interpreters, rangers, technicians, and teachers.

la LL 508I. Aquatic Ecology. (Cross-listed with EnSci, NREM). Cr. 4. SS. Prereq: Courses in ecology, chemistry, and physics. Analysis of aquatic ecosystems; emphasis on basic ecological principles; ecological theories tested in the field; identification of common plants and animals.

la LL 523I. Fish Ecology. (Cross-listed with A Ecl). Cr. 4. Alt. SS., offered 2010. Basic principles of fish interaction with the biotic and abiotic environment. Field methods, taxonomy, and biology of fish with emphasis on the fish fauna of northwestern Iowa.

la LL 526I. Advanced Field Ornithology. (Cross-listed with A Ecl. Cr. 2. SS. Prereq: Concurrent registration in la LL 326I. Field study of birds of the upper Midwest; extended field trip to Minnesota and Wisconsin; individual or group project.

la LL 532. Analysis of Environmental Data. (2-0) Cr. 2. SS. Prereq: An undergraduate course in statistics, understanding of basic concepts such as correlation and regression, and familiarity with PC-based software for data analysis. Analysis of Environmental Data will provide students with training in the theory and application of a range of Statistical techniques useful for the analysis of ecological and paleoecological data. Topics will include data management, exploratory data analysis, regression analysis, direct and indirect ordination methods, classification techniques, transfer functions and the analysis of temporal data. Practical classes will provide hands-on training in the use of Statistical and graphical software including R, CANOCO, C2, and TWINSPAN. The course will be directed towards advanced undergraduate, graduate and working professionals in ecology and paleoecology.

la LL 573. Techniques for Biology Teaching. (Cross-listed with EEOB, A Ecl. Cr. arr. Repeatable. SS. The development and implementation of laboratory exercises suitable for use in elementary, middle, high school, and community college biology and environmental courses. Exercises will be built around common organisms and ecosystems in Iowa. Field trips.

A. Animal Biology (Same as A Ecl 573A)
B. Plant Biology

C. Fungi and Lichens
D. Aquatic Ecology
E. Prairie Ecology
F. Wetland Ecology
G. Limnology (Same as A Ecl 573G)
H. Animal Behavior (Same as A Ecl 573H)
I. Insect Ecology
J. Biology of Invertebrates
K. Non-invasive Use of Living Organisms
W. Project WET (Same as A Ecl 573W)

la LL 578I. Field Mycology. (Cross-listed with EEOB). Cr. 4. Alt. SS., offered 2010. Identification and classification of the common fungi; techniques for identification, preservation, and culture practiced with members of the various fungi groups.

la LL 580I. Ecology and Systematics of Diatoms. (Cross-listed with EEOB). Cr. 4. SS. Field and laboratory study of freshwater diatom communities; techniques in collection, preparation, and identification of diatom samples; study of environmental factors affecting growth, distribution, taxonomic characters; project design and execution including construction of reference and voucher collections and data organization and analysis.

la LL 589I. Graduate Independent Study. (Cross-listed with A Ecl, Anthr, EEOB). Cr. arr. Repeatable. SS. Prereq: Graduate classification and permission of instructor.

la LL 593I. Natural History Workshop. Cr. arr. Prereq: Permission of instructor. Graduate workshop on some aspect of the natural history of the Upper Midwest or on techniques for studying natural history.

Courses for graduate students
la LL 699I. Research. (Cross-listed with A Ecl, Anthr, EEOB, GDCB). Cr. arr. Repeatable.

Journalism and Communication, The Greenlee School of

www.jmc.iastate.edu

Michael Buggeja, Director
Professors: Abbott, Beall, Buggeja, Peterson, Rodriguez, Smith
Professors (Emeritus): Disney, Emmerson, Friederich, Gillette, Kunerth, Shelley, Wechsler
Associate Professors: Geske, Mack, Prior-Miller
Associate Professors (Emeritus): Coon, Fowler, Haws
Assistant Professors: Blevins, Bulla, Chamberlin, Cozma, Dahlstrom, Dimstrova, Groshen, Han, Harms, Lee, Newell, Sar
Senior Lecturers: Wilgenbusch
Lecturers: D. Buggeja, Haag, Monahan, Rouse, Thomas
Clinicians: Ames, Gibson

The Greenlee School of Journalism and Communication offers work for the bachelor of arts in advertising, and the bachelor of science degree in journalism and mass communication. The unit, founded in 1905, has been continuously accredited every six years since 1948 by the Accrediting Council on Education in Journalism and Mass Communications and was last reaccredited in 2004. Accreditation is based on the principle that students need a broad-based, liberal arts education, as well as the core of courses within the discipline.

Undergraduate Study

Students who complete degrees in advertising or journalism and mass communication will develop competencies in 12 key areas:

History/role of professionals and institutions: Demonstrate an understanding of the history and role of professionals and institutions in shaping communications;

First Amendment/Law: Understand and apply the principles and laws of freedom of speech and press, including the right to dissent, to monitor and criticize power, and to assemble and petition for redress of grievances;

Theory: Understand concepts and apply theories in the use and presentation of images and information;

Research and evaluation: Conduct research and evaluate information by methods appropriate to the communications professions in which they work;

Diversity: Demonstrate an understanding of the diversity of groups in a global society in relationships to communications;

Ethics: Demonstrate an understanding of professional ethical principles and work ethically in pursuit of truth, accuracy, fairness and diversity;

Critical thinking: Think critically, creatively and independently;

Writing: Write correctly and clearly in forms and styles appropriate for the communications professions, audiences and purposes they serve;

Visual Communication: Conceptualize, prepare or select appropriate methods to convey information in visual form, whether as a complement or supplement to words;

Numeracy: Apply basic numerical and statistical concepts;

Critical Evaluation/Editing: Critically evaluate their own work and that of others for accuracy and fairness, clarity, appropriate style and grammatical correctness;

Tools and technology: Apply tools and technologies appropriate for the communications professions in which they work.

To become an advertising or journalism and mass communication major, the student must 1) have either achieved a score of 26 or higher on the ACT English exam, 590 or higher on the SAT verbal exam, or passed the School’s English Usage Test as outlined in the Greenlee School’s policy for meeting the English Usage Standard; and 2) have completed the pre-major core requirements (See majors). Until those requirements are successfully completed, advertising and journalism and mass communication students are designated as pre-majors. A copy of the EUT policy, including additional details and requirements, is available from the Greenlee School.

Communication Proficiency Requirement

To meet the University’s Communication Proficiency requirement, all majors in the School must earn a grade of C or better in English 150 and 250 (or 250H). These additional requirements apply: Advt majors must earn a C+ or better in JI MC 201 and one of Advt 334 or 336. JI MC majors must earn a C+ or better in JI MC 201 and 202 or 206 or 321.
The Advertising Major
The advertising major prepares students for careers in business and industry or for graduate education. Students majoring in advertising find career opportunities in professions requiring applied communication expertise. Graduates are qualified for positions in the creative and account sides of advertising within businesses, agencies and media.

To become an advertising major, a student must successfully complete Jl MC 101, 110, and 201 (with a C+ or better) and Advrt 230. Until the EUT standard is met and these courses are successfully completed, all advertising students are designated as pre-majors. To receive a bachelor of arts degree in advertising, a student must earn at least 120 credits. A minimum of 80 credits must come from courses other than Advrt or Jl MC and must include Principles of Marketing, Mkt 340. At least 65 of these credits must come from the liberal arts and sciences, and must include Principles of Statistics, Stat 101, or other approved statistics course, and Fundamentals of Public Speaking, Sp Cm 212. Overall, at least 45 credits must be from 300-level courses or above.

The degree requirements allow for a minimum of 33 and a maximum of 40 credits to be taken in Advrt and Jl MC. These include the pre-major core requirements of 6 credits: Mass Media and Society, Jl MC 101, 3 credits; Orientation to Journalism and Communication, Jl MC 110, required; Reporting and Writing for the Mass Media, Jl MC 201, 3 credits; and Principles of Advertising, Advrt 230, 3 credits.

Advrt 301, Strategic Planning for Advertising and Public Relations, Jl MC 480 Law of Mass Communication, and Jl MC 499 Professional Media Internship, are required of all Advrt majors. Additional recommended courses and requirements for the advertising major are available from the Greenlee School.

Advrt majors need a broad-based academic background that the School seeks to ensure by requiring a Designated Area of Concentration (DAC) made up of 21 credits with at least 12 credits from the 300-level or above. The DAC is a secondary area of expertise made up of courses selected and designed by the student, with adviser approval, to complement the student’s professional and academic interests. A second major outside of Advrt or Jl MC may substitute for the DAC.

The Journalism and Mass Communication Major
The major in journalism and mass communication prepares students for careers that involve all aspects of news and information. The emphasis is on generating ideas, organizing, writing, editing and presenting information for various media platforms and audiences. Graduates most likely will work in journalism (magazines, newspapers, electronic media) or in on-line media and public relations and public information as well as related disciplines that expect articulate and informed writing and presentation. Students work with advisers to develop programs of study designed to prepare them for work in a variety of communication professions. Graduates are designated as pre-majors. To receive a bachelor of science degree in journalism and mass communication, a student must earn at least 120 credits. A minimum of 80 credits must come from courses other than Advrt or Jl MC. At least 65 of these credits must come from the liberal arts and sciences and must include Principles of Statistics, Stat 101, or other approved statistics course, and Fundamentals of Public Speaking, Sp Cm 212. Overall, at least 45 credits must be from 300-level or above.

The degree requirements allow for a minimum of 33 and a maximum of 40 credits to be taken in Advrt and Jl MC. These include the pre-major core requirements of 6 credits: Mass Media and Society, Jl MC 101, 3 credits; Orientation to Journalism and Communication, Jl MC 110, required; Reporting and Writing for the Mass Media, Jl MC 201, 3 credits.

Jl MC 480 Law of Mass Communication and Jl MC 499 Professional Media Internship are required of all Jl MC majors. Additional recommend courses and requirements for the journalism and mass communication major are available from the Greenlee School.

Jl MC majors need a broad-based academic background that the School seeks to ensure by requiring a Designated Area of Concentration (DAC) made up of 21 credits with at least 12 credits from the 300-level or above. The DAC is a secondary area of expertise made up of courses selected and designed by the student, with adviser approval, to complement the student’s professional and academic interests. A second major outside of Advrt or Jl MC may substitute for the DAC.

Minors
The Greenlee School offers a minor in Advertising and a minor in Journalism and Mass Communication.

For a minor in Advertising or Journalism and Mass Communication, students complete 15 credits, beginning with Jl MC 101. The remaining 12 credits, at least 9 of which must be from Iowa State University, are selected from course offerings in the advertising and journalism and mass communication majors, as follows: 6 credits from the following 200- and 300-level courses, Advrt 230, 301, and 335; Jl MC 220, 301, 305, 341, and 342; and 6 credits from the following 400-level courses: Jl MC 401, 406, 453, 454, 481, 462, 464, 474, 476 and 477 and Advrt or Jl MC 497. Jl MC majors may not minor in Advrt and Advrt majors may not minor in Jl MC.

Graduate Study
The Greenlee School of Journalism and Communication offers work for a master of science degree in journalism and mass communication. Two tracks are available: one for students who desire specialized study in communication theory and research; the second for students who wish to strengthen professional strategic skills.

Major plan programs of study in one of two tracks:
I. Communication as theory and research – The School offers advanced academic preparation in communication theory and research leading to the master of science degree. Graduate work prepares students to use and contribute to research and scholarship in the field of communication. The degree requires a thesis or creative component based on original research, which must be defended successfully before a committee at the end of the program.

Areas of research emphasis include: science and risk communication, media performance, media effects, advertising, public relations, political communication, communication technology, law and ethics, international communication and visual communication.

II. Professional and Strategic Communication – The School offers advanced professional study in journalism and mass communication leading to the master of science degree. Graduate work prepares students for professional careers in a variety of mass communication fields. Students with limited training or experience in journalism and mass communication may include skills courses in their programs for no credit. The degree requires either a creative component or thesis.

All students must complete four core courses: Introduction to Graduate Study in Journalism and Mass Communication (Jl MC 592), Theories of Mass Communication (Jl MC 501), Communication Research Methods (Jl MC 502) and Internship in Mass Communication (Jl MC 598). Each student selects elective courses based on his/her area of emphasis and career goal, in consultation with the student’s major professor and Program of Study Committee.

The Greenlee School graduate program offers minor work for students majoring in other departments. The M.S. minor requires Jl MC 501 (Communication Theory), Jl MC 502 (Communication Strategies), and one other course in journalism and mass communication for a total of 9 credits taken within the Greenlee School.

Advertising (Advrt)
Courses primarily for undergraduate students
Advrt 230. Advertising Principles. (3-0) Cr. 3. F.S. Historical, social, economic and legal aspects of advertising. Evaluations of advertising research, media, strategy, and appeals. Study of the creation of print and broadcast advertising.

Advrt 301. Strategic Planning for Advertising and Public Relations. (Cross-listed with Jl MC). (3-0) Cr. 3. F.S. Prereg. 230 or Jl MC 220; Sophomore classification. Prospect analysis, market segmentation, positioning, strategic planning, public opinion formation, communication strategy formation and development of critical thinking skills.

Advrt 336. Advertising Account Management. (3-0) Cr. 3. Prereg: C+ or better in Jl MC 201; Advrt/UL MC 301. Fundamentals of account management with emphasis on leadership, sales techniques, relationship building, presentation skills, and strategic thinking. Includes aspects of agency revenue growth, team building, client management, evaluating creative concepts and media plans, and developing strategic proposals and campaign recommendations.

Advrt 390. Professional Skills Development. (Cross-listed with Jl MC). Cr. arr. Repeatable. Prereg: C+ or better in 201, other vary by topic; instructor permission. Credit not given for work on student or professional media. Check School for course availability.

Advrt 434. Advertising Campaigns. (3-0) Cr. 3. F.S. Prereg: Advrt/UL MC 301; C+ or better in 334 or 336, and major Status. Development of advertising campaigns for business and social institutions. Projects
Journalism and Communication, The Greenlee School of

2009-2011

Journalism and Communication (Jl MC)

Courses primarily for undergraduate students

Jl MC 101. Mass Media and Society, (3-0) Cr. 3. F.
Communication models and their application to the mass media; the mass communication process; organization, characteristics and responsibilities of the mass media; media-related professional operations.

Jl MC 110. Orientation to Journalism and Communication, Cr. R. F.
Orientation to career opportunities, emphasis areas and requirements in the Greenlee School. Satisfactory-fail only.

Jl MC 201. Reporting and Writing for the Mass Media, (1-4) Cr. F.
Prereq: Engl 250 (or testout) and either a score of 26 or higher on the ACT-English exam, 590 or higher on the SAT verbal exam or a passing score on the School's English Usage Test. Generating story ideas, exercising news judgment and gathering information via interviews, observation and documentary sources to produce news and informational material for the mass media. Emphasis on analyzing and organizing information, as well as accuracy and principles of good writing.

Jl MC 202. Intermediate Reporting and Writing for the Mass Media, (2-2) Cr. 3. F.
Prereq: C+ or better in 201. Designed for students interested in writing for newspapers, magazines and online media. Enhancing and refining skills in developing sources and generating story ideas, information-gathering techniques, reporting and writing. Includes segments on local government and judiciary.

Jl MC 206. Reporting and Writing for the Electronic Media, (2-3) Cr. 3. F.
Prereq: C+ or better in 201. Researching, organizing, and writing for radio, television and online media. Basic principles of news, information and entertainment. An emphasis on development, content and structure.

Jl MC 220. Principles of Public Relations, (3-0) Cr. 3. F.
Introduction to public relations in business, government and non-profit organizations; functions, processes, and management; attitudes, public opinion and persuasion; overview of theory.

Jl MC 301. Strategic Planning for Advertising and Public Relations, (Cross-listed with Advrt), (3-0) Cr. 3. F.
Prereq: Advrt 232 or Jl MC 220. Sophomore classification. Prospect analysis, market segmentation, positioning, strategic planning, public opinion formation, communication strategy formation and development of critical thinking skills.

Jl MC 305. Publicity Methods, (3-0) Cr. 3.

Jl MC 306. Electronic Media Production, (2-2) Cr. 3.
Prereq: C+ or better in Jl MC 201. Introduction to studio professional equipment. Course focus on visual concepts, maintenance and practical operation of studio equipment.

Jl MC 308. Electronic News Gathering and Production, (2-3) Cr. 3.
Prereq: C+ or better in 202 or 206 or 321. Field techniques in single-camera video production used to shoot and edit visual stories. Introduction to electronic news gathering.

Prereq: C+ or better in 201. Basic photojournalism techniques. Introduction to camera operation, lighting, composition, and photo reproduction techniques for print or computer-mediated applications. Emphasis on using the camera as a reporting tool. Basic use of digital imaging and editing software. Ethical issues involving photojournalism.

Jl MC 315. Multimedia Production, (2-2) Cr.
Prereq: 306 or 342L or 343L or equivalent computer design proficiency. Concepts and principles for evaluating, constructing, and designing information for the Web and other computer-mediated communication systems. Explores the use of computer-generated animation and graphics, audio and video. Issues of ethics and ownership of work pertinent to the new media are discussed.

Prereq: C+ or better in 201, 220 or Advrt 230 and 342L or computer design proficiency recommended. May be taken concurrently with 301. Developing and writing public relations materials with an emphasis on media relations and news. Techniques addressed include media kits, brochures, newsletters and speeches.

Jl MC 341. Contemporary Magazine Publishing, (Dual-listed with 541), (3-0) Cr.
Prereq: Junior classification. Analysis of magazine industry and specific audiences served by print and online magazines. Editorial procedures and policies, advertising, circulation, and history of the industry. Individual study of magazine.

Prereq: Sophomore classification. Understanding of the visual message. Visual perception, visual communication theory, design syntax, design elements and how they are applied in journalism and mass communication.

Jl MC 342L. Laboratory in Basic Visual Principles, (2-2) Cr.
Prereq: Credit or enrollment in 342. Introduction to desktop publishing, beginning techniques in layout. Application of visual principles to design simple print projects.

Prereq: 342L or equivalent computer design proficiency. Assignment of more advanced features of desktop publishing and other document-enhancing software. Production of newsletters, multi-page brochures and other documents.

Jl MC 344. Depth Reporting and Writing, (2-2) Cr.
Prereq: C+ or better in 202 or 206 or 321. Developing and writing comprehensive news features and magazine articles. Majors may not apply both 344 and Engl 303 toward graduation.

Prereq: C+ or better in 202 or 206 or 321. Reporting on government, business, and other institutions; identification of and access to public records; investigative reporting techniques. Assignment major stories on government and non-profit organizations, and issues for print and broadcast media.

Jl MC 347. Science Communication, (Dual-listed with 547), (2-2) Cr.
Prereq: C+ or better in 202 or 206 or 321 for Jl MC majors; C+ or better in Jl MC 201 and Advrt 324 or 336 for Advrt majors. Nonmajors by permission of instructor. Writing about science and technology topics for general audiences. Outlets for stories include print, broadcast and online media. Story topics include reporting about basic, applied sciences and social sciences, as well as ethical, political and policy issues related to science and technology.

Jl MC 349. Print Media Editing, (1-5) Cr.
Prereq: C+ or better in 202 or 206 or 321. Grammar, punctuation, usage, syntax and logic. Editing newspaper, magazine and online copy. Headline, title writing and visual presentation. Use of computer editing programs.

Prereq: 306 and 308. Application of advanced television techniques: producing, directing and managing live and recorded information programs.

Jl MC 390. Professional Skills Development, (Cross-listed with Advrt). Cr. Ar. Repeatable. Prereq: C+ or better in 201, other vary by topic. Instructor permission. Credit not given for work on student or professional media. Check School for course availability.

Jl MC 401. Mass Communication Theory, (3-0) Cr.
Prereq: Junior classification. Theory and research in mass communication processes and effects; the scientific professional methods of measuring, evaluating and reporting mass communication research.

Jl MC 406. Media Management, (Dual-listed with 506), (3-0) Cr.
Prereq: Junior classification. Decision-making functions of media. Basic media market analysis, media organization and management, circulation and audience development, technological developments affecting management decisions, and relationships with labor and regulatory agencies that affect media operations.

Jl MC 424. Public Relations Campaigns, (3-0) Cr.
Prereq: 220, 301, and C+ or better in 321; junior classification. Section B. May be taken concurrently with 202; instructor permission only. Developing public relations and corporate communication campaigns for business and social institutions.

Jl MC 449. Advanced Print Media Editing, (3-0) Cr.
Prereq: 342, 342L, 349 or concurrent enrollment; junior classification. Developing high-level editorial skills needed for issue-planning, editorial management and decision making. Designing, developing, and repopulating existing and new magazines, newspapers, and new media. Editing complex manuscripts, with continued emphasis on grammar, punctuation, usage, syntax and logic. Use of computer publishing programs. Nonmajor graduate credit.

Jl MC 453. Electronic Media Technology and Public Policy, (3-0) Cr.
Prereq: Junior classification. Issues and policies affecting historical, contemporary and future developments of electronic media and their technologies.

Jl MC 454. Critical Analysis and History of the Moving Image, (3-0) Cr.
Prereq: Junior classification. Evolution of motion picture and television content and other visual technologies. Theories and techniques for evaluating and critiquing film and video. Nonmajor graduate credit.

Jl MC 480. Law of Mass Communication, (3-0) Cr.
Prereq: C+ or better in 201; junior classification. First Amendment law, libel, privacy, obscenity, contempt, copyright, trademark, the Federal Communications Act; laws affecting advertising, legal publication, and other business activities of the media, including the Internet. Nonmajor graduate credit.

Jl MC 481. History of American Journalism, (3-0) Cr.
Prereq: Junior classification. Role of the mass media, including advertising and public relations, in shaping the social, economic and political history of America; impact of change in these areas on the development, traditions, and philosophies of the media. Nonmajor graduate credit.

Jl MC 482. Media Ethics, Freedom, Responsibility, (3-0) Cr.
Prereq: Junior classification. Media ethics and performance; functions of the media in relation to the executive, judicial and legislative branches of government; agencies of media criticism; right to know versus right to privacy.

Jl MC 484. Journalism and Literature, (3-0) Cr.
Prereq: Junior classification. A study of journalism's impact on literary writing and literature's impact on journalism, as seen through the works of such American author-journalists as Ernest Hemingway, Truman Capote, Joan Didion, John McPhee, Tom Wolfe, Hunter Thompson. Nonmajor graduate credit.
JI MC 474. Communication Technology and Social Change. (Cross-listed with T SC). (3-0) Cr. 3. Prereq: Junior classification. Examination of historical and current communication technologies, including how they shape and are shaped by the cultural and social practices into which they are introduced.

JI MC 476. World Communication Systems. (Dual-listed with 576). (3-0) Cr. 3. Prereq: Junior classification. World communication systems and social, political, and economic factors determining flow, character, and volume of news. Impact of media information and entertainment content on nations and societies. Comparative analysis of role and impact of traditional modes of communication, the mass media, and computer-mediated systems.

JI MC 477. Ethnicity, Gender, Class and the Media. (3-0) Cr. 3. Prereq: Junior classification. Portrayals of ethnic groups, genders, and classes in the media in news, information, and entertainment; the effects of mass media on social issues and population groups. Nonmajor graduate credit.

JI MC 490. Independent Study in Communication. Cr. arr. Prereq: Junior classification and contract with supervising professor to register. Independent studies are research-based. Students may study problems associated with a medium, a professional specialization, a philosophical or practical concern, a repertorial method or writing technique, or a special topic in their field. Credit is not given for working on student or professional media without an accompanying research component. See Greenlee School Student Services Office for more information. No more than 3 credits of JI MC 490 may be used toward a degree in journalism and mass communication or advertising.

JI MC 497. Special Topics in Communication. (Cross-listed with Advrt). Cr. arr. Repeatable. Seminars or one-time classes on topics of relevance to students interested in communication.

JI MC 499. Professional Media Internship. Cr. 3. Prereq: JI MC majors, C+ or better in 202 or 206 or 321; Advrt majors, C+ or better in JI MC 201; Advrt 301. All students, junior classification, formal faculty adviser approval of written proposal. Required of all JI MC and Advrt majors. A 400-hour internship in the student's journalism and mass communication or advertising specialization. Assessment based on employer evaluations, student reports and faculty reviews. Available only to JI MC and Advrt majors. Satisfactory-fail only.

Courses primarily for graduate students, open to qualified undergraduate students

JI MC 501. Theories of Mass Communication. (3-0) Cr. 3. F. Prereq: 6 credits in social science or admission to the graduate program. Examination of major areas of research activity and theoretical development related to organization, functions, and effects of mass communication.

JI MC 502. Communication Research Methods. (3-2) Cr. 4. S. Prereq: 501 or equivalent communication theory course. Research methods in journalism and mass communication, including problem selection, sampling, hypothesis formulation, research design, data collection, and analysis. Designing a research strategy appropriate for a variety of communication-related questions and assessing the appropriateness, validity, and generalizability of research results.

JI MC 506. Media Management. (Dual-listed with 406). (3-0) Cr. 3. S. Prereq: 6 credits in social science (economics highly recommended) or admission to the graduate program. Decision-making functions of media. Basic media market analysis, media organization and management, circulation and audience development, technological developments affecting management decisions, and relationships with labor and regulatory agencies that affect media operations.

JI MC 510. Strategies of Communication. (3-0) Cr. 3. Prereq: 501. The process of developing professional communication and persuasion strategies, with emphasis on problem definition, behavioral objectives, situation analysis, strategy formulation, and justification through application of communication theories and research results.

JI MC 520. Persuasion Theory and Methods. (3-0) Cr. 3. Prereq: 6 credits in social science. Theories and research methods applied to the study and practice of public relations.

JI MC 521. Theories of Visual Communication. (2-2) Cr. 3. Prereq: 6 credits in social science. Introduction to the study of picture-based media (film, television, photography, advertising, etc.). Exploration of theoretical concepts of vision and perception, visual literacy, visual language, visual persuasion/manipulations, and the cultural implications of visual images.

JI MC 541. Contemporary Magazine Publishing. (Dual-listed with 341). (3-0) Cr. 3. Prereq: 502 or Instructor permission. Analysis of magazine industry and specific audiences served by print and online magazines. Editorial procedures and policies, advertising, circulation, and history of the industry. Roundtable on research literature.

JI MC 547. Science Communication. (Dual-listed with 347). (2-2) Cr. 3. S. Prereq: 6 credits of social science or admission to the graduate program. Reporting and writing about science and technology topics for general audiences. Outlets for stories including print, broadcast and online media. Story topics include reporting about basic, applied and social sciences, as well as ethical, political and policy issues related to science and technology. Nonmajors by permission of instructor.

JI MC 561. Media and Society: Interrelationships. (3-0) Cr. F. Prereq: 6 credits in social science. Media functions in a democratic society; conflicts between the media and social institutions; ethical and social controls on the media.

JI MC 574. Communication Technologies and Social Change. (Cross-listed with T SC). (3-0) Cr. 3. Prereq: 6 credits in social science. Personal, organizational, and social implications of the use of communication technologies. Includes theories and empirical research across the continuum of perspectives, from techno-utopianism through an anti-technology stance.

JI MC 576. World Communication Systems. (Dual-listed with 476). (3-0) Cr. 3. World communication systems and social, political, and economic factors determining flow, character, and volume of news. Impact of media information and entertainment content on nations and societies. Comparative analysis of role and impact of traditional modes of communication, the mass media and computer-mediated systems.

JI MC 592. Introduction to Graduate Study in Journalism and Mass Communication. Cr. R. F. Prereq: Graduate classification. Overview of advanced study in journalism and mass communication with special emphasis on requirements for obtaining the master of science degree.

Courses for graduate students

Kinesiology

(www.edu.iastate.edu/hhp/homepage.htm)

Philip Martin, Chair of Department

Distinguished Professors (Emeritus): Forker, Toman

Professors: Anderson, Bloedel, Franke, King, Martin, Sharp

Professors (Emeritus): Frye, Hutchinson, Schneider, J. Thomas

Professor (Emeritus Adjunct): Beran

Associate Professors: Derrick, Ekkekakis, Engelhorn, Gillette, Kohut, Smiley-Oyen, K. Thomas, Weik

Associate Professor (Emeritus): Wood

Assistant Professors: Baker, Murdoch, Schabel, Selbys, Welch

Assistant Professor (Emeritus): McDonald

Assistant Professors (Collaborators): Buck, Senchina

Instructors (Adjunct): Coberley, Meier, O'Mara, Pak

Senior Lecturers: Atkinson, Denton, Lipsy, Power

Lecturers: Dukes, Franke, Gundlach, Miller, Nespor, Norris, Packheiser, Peel, Spy-Knutson, Wisinsk

Mission

We promote health and well-being by creating and disseminating knowledge about physical activity and active living. Through discovery, learning and engagement we improve the lives of citizens of Iowa, the United States and the world.

Goals

The department has identified the following goals to support this mission:

1. We seek to improve the lives of citizens of Iowa, the United States, and the world by the creation and dissemination of knowledge about physical activity and its relationship to health and well-being.

2. We prepare scholars and professionals in the study of physical activity at the undergraduate and graduate levels.

3. We educate the public and the University community in the scientific aspects of physical activity especially exercise, sport, and the role of movement throughout the lifespan.

Overview of Programs

The Department of Kinesiology provides opportunities for matriculation leading to the degrees of Bachelor of Science, Master of Science, and Doctor of Philosophy. At both the undergraduate and graduate level, there are opportunities for study in the department’s two specializations: the behavioral and biological bases of physical activity.

Undergraduate Study

Dance. Coursework in dance provides opportunities for students to develop an understanding and appreciation of dance as part of a liberal education. Those interested in teaching dance and Physical Education in the public schools may major in...
health and human performance (teacher licensure option) and minor in dance.

An interdisciplinary Performing Arts major with a dance emphasis is available through the College of Liberal Arts and Sciences. For further information see <Index, Theatre and Performing Arts>.

The department offers a minor in dance that may be earned by completing the following: Dance 220, 222, 270, 320, 360, 384, 385 or 386, and three additional credits selected from dance courses numbered 200 or above. Participation in Orchesis I or II is recommended.

Kinesiology. Kinesiology. The undergraduate curriculum in Kinesiology is comprised of four components: general education, the Basic Core, the Advanced Core, and the option component. The intent of the general education component is to promote intellectual and personal growth and to prepare students for success in the basic, advanced and option components. The Basic Core enables students to understand, define and explore their own health and physical activity through the cognitive, affective and psychomotor domains. The Advanced Core extends this learning to include disciplinary concepts and tools of inquiry that comprise scientific literacy associated with health and physical activity. Finally, coursework within each specialization option builds upon this personal and scholarly learning by enabling students to master content and skills specific to career applications. The specialization options comprise a focused area of study within Kinesiology. Options available are 1) Athletic Training, 2) Community and Public Health, 3) Exercise Science, 4) General Studies, and 5) Health/Fitness Management and 6) Physical Education/Licensure. Enrollment in the Athletic Training and Physical Education Licensure options is limited because of accreditation requirements and the provision of more individualized field experiences.

Academic options within the undergraduate program. Students in the CAATE accredited Athletic Training option are prepared for the National Athletic Training Association Board of Certification examination or for graduate work in athletic training. Graduates of this option will effectively use their expertise to plan Strategies aimed at the prevention, treatment and rehabilitation of athletic injuries.

Academic options within the undergraduate program. Students in the CAAHPE accredited Athletic Training option are prepared for the National Athletic Training Association Board of Certification examination or for graduate work in athletic training. Graduates of this option will effectively use their expertise to plan Strategies aimed at the prevention, treatment and rehabilitation of athletic injuries. Students in the Community and Public Health option are prepared for professional employment at local, state or national health agencies, medical centers, and other public organizations that seek to promote health in the population. The curriculum prepares students to take the Certified Health Education Specialist certification examination upon graduation.

Students in the Exercise Science option utilize an interdisciplinary approach to the study of human movement. In so doing, they become prepared for graduate study in Kinesiology or advanced study leading to careers in medicine, physical therapy, or other allied health programs. Students in the General Studies option combine kinesiology with a concentration in another area of study to support an individualized program, such as community sport and recreation, dance, and other sport, exercise, or health related fields. Programs of study must be approved by the undergraduate program coordinator. Students in the Health/Fitness Management option are prepared for professional roles as health and fitness leaders or program managers. Employment opportunities include work in corporate fitness programs, health clubs, cardiac rehabilitation programs or personal training. Graduates are able to plan, implement and supervise exercise programs which will improve fitness and health. Graduates also have a basic understanding of economic and management issues related to business applications in the health and fitness field.

Students in the Physical Education Licensure option are prepared to teach Physical Education in grades K-12 and to meet the State of Iowa licensing outcomes for teachers. Graduates can plan developmentally appropriate physical education, and individualize instruction and assessment for diverse audiences.

Learning outcomes for the undergraduate degree. Despite the diversity in specialization options, the Learning Outcomes comprise a common framework for each student as they matriculate through Iowa State University. The learning outcomes emphasized in academic coursework in the Department of Kinesiology are:

- Content knowledge. The student has a broad conceptual view of physical activity and health, recognizes its scientific underpinnings (e.g. history, content, disciplinary concepts, and tools of inquiry) and appreciates the interdisciplinary nature of the study of physical activity and health. Literacy will be gained from the personal, scholarly and professional perspectives.
- Discovery and critical thinking. The student can use accepted techniques of discovery and apply critical thinking within and outside of the discipline area. The student will be able to solve problems independently and evaluate opinions and outcomes at the personal scholarly and professional level.
- Communication. The student uses knowledge of effective verbal, nonverbal and media communication techniques to foster inquiry, collaboration, and engagement in physical activity and health related settings.
- Numeracy. The student understands and uses qualitative and quantitative analysis through formal and informal assessment strategies.
- Technology. The student understands and uses a variety of technological applications to improve personal understanding and to enhance scholarly pursuits and professional practice in their chosen area of study.

Learning in the following domains occurs both in and outside the Iowa State University experience. The department will foster development in these domains through its courses and other activities.

- Citizenship. The student uses value and ethics based decision making to demonstrate personal, professional and world citizenship through fostering relationships, embracing leadership, accepting social responsibility, seeking and completing opportunities to improve the quality of life for others.
- Lifelong learning. The student is a reflective professional who actively seeks to further self-knowledge and seeks opportunities to grow professionally.
- Diversity. The student understands how individuals differ in their approaches to initiating and maintaining a physically active, healthy lifestyle, and creates appropriate environments for diverse participants.

The department offers a minor in athletic coaching. The minor may be earned by completing the following: Kin 220, 258, 315, 355, 358, 365, Biol 155, and Psych 230.

The department offers a minor in sport and culture. The minor may be earned by completing the following: Kin 360 and 365; and completing 9 credits from the following: Kin 242, 316, 331, 442, and 445.

Endorsement to Coach Interscholastic Athletics. The State Department of Education has provided for the endorsement of licensed teachers for the coaching of athletic teams in schools. The endorsement does not lead to licensure to teach physical education. For requirements of the program, leading to the coaching endorsement, see <Teacher Education, Requirements for Areas of Specialization>.

Basic Activity Instruction Program. The department offers a wide selection of beginning, intermediate, and advanced courses in the areas of aquatics, dance, and sports. These courses are designed to serve general education purposes for all students.

B.S./M.S. degree in Diet and Exercise. A combined Bachelor of Science and Master of Science (B.S./M.S.) degree in diet and exercise is available. The program is jointly administered by the Department of Food Science and Human Nutrition (FSHN), within the Colleges of Agriculture, Food and Human Sciences, and the Department of Kinesiology, within the College of Human Sciences. Students interested in this program must enroll as freshmen in the pre-diet and exercise program. In the fall of the junior year students will apply for admission to the B.S./M.S. program. Students not accepted into the program will continue toward completion of a B.S. degree in dietetics or kinesiology. Coursework has been designed to facilitate a 4-year graduation date for those students not accepted into the program and electing to complete a single undergraduate degree. Students accepted into the program will progress toward completion of B.S./M.S. degrees in diet and exercise.

Graduate Study

The Department of Kinesiology graduate seeks to integrate discovery and learning by preparing graduate students to understand and create basic and applied knowledge in the study of physical activity, exercise and sport. For all graduate degrees the department offers specializations in behavioral basis of physical activity and biological basis of physical activity. The normal prerequisite to major graduate work is the satisfactory completion of a curriculum essentially equivalent to that required of undergraduate students in kinesiology at this university. However, it is possible for students to qualify for graduate study if undergraduate preparation has been in a related area.

Students in the M.S. and Ph.D. degrees are required to complete original research and write a thesis or dissertation. There is a nonthesis degree option for M.S. students requiring more coursework and an internship experience or other creative component. Specific information about the requirements for these degree options is available from the department office or from the department website (<www.kin.hs.iastate.edu/graduate>).

The department participates in the interdepartmental minor in gerontology (see <Index>).
Courses primarily for undergraduate students

Kin 101. Swimming I. (0-3) Cr. 1. F.S. Basic course for non-swimmers. Emphasis on teaching basic strokes and personal water safety skills. Satisfactory-fail only.

Kin 102. Swimming II. (0-3) Cr. 1. F.S. Prereq: 101 or equivalent skill. Intermediate course. Emphasis on learning and improving five basic strokes and personal water safety skills. Satisfactory-fail only.

Kin 108. Aquatic Fitness. (0-3) Cr. 1. F.S. Prereq: 102 or equivalent skill. Water related exercises, activities, and swimming workouts to improve physical fitness. Satisfactory-fail only.

Kin 114. Lifeguard Training. (0-3) Cr. 1. F.S. Prereq: Ability to swim 500 yards continuously of front crawl, sidestroke, and breaststroke, perform a standing and surface dive; swim under water; and tread water for one minute. Minimum age 16. Specific training for Red Cross Lifeguard certification. First aid and CPR included. Satisfactory-fail only.

Kin 116. Water Safety Instructor Practicum. (0-3) Cr. 1. Prereq: H S 105, CPR certification, and permission of instructor. Supervised teaching experience in swimming, aquatic fitness, lifeguard training, and WSI courses. Satisfactory-fail only.

Kin 117. Lifeguard Training Instructor. (0-2) Cr. 1. F.S. Prereq: Minimum age 17, able to swim 500 yards; current lifeguard, first aid, and CPR certifications. The students will learn skills (rescue skills and CPR for the Professionals) necessary to certify prospective Lifeguards in the American Red Cross Lifeguard Training Program. Satisfactory-fail only.

Kin 118. Water Safety Instructor. (1-3) Cr. 2. S. Prereq: Minimum age 17, able to swim 500 yards; current first aid and CPR certification. The students will learn the skills necessary to teach and certify individuals in the following American Red Cross courses. Learn to Swim Program (Levels 1-6), Parent and Child Aquatics (Level A 6 months-2 years; Level B 18 months-5 years), Safety Training for Swim Team Coaches, Community-Water Safety, Home Pool Safety, Aquatic Leader Program, and Basic Water Rescue. Satisfactory-fail only.

Kin 119. Archery. (0-2) Cr. 1. F.S. Satisfactory-fail only.

Kin 122. Badminton. (0-2) Cr. 1. F.S. Satisfactory-fail only.

Kin 126. Pocket Billiards. (0-2) Cr. 1. F.S. Introduction to the basic strokes (stop, draw, follow) and contemporary game forms associated with pocket billiards. Satisfactory-fail only.

Kin 129. Bowling. (0-2) Cr. 1. F.S. Satisfactory-fail only.

Kin 135. Golf. (0-2) Cr. 1. F.S. Beginning skills only. Satisfactory-fail only.

Kin 144. Racquetball. (0-2) Cr. 1. F.S. Satisfactory-fail only.

Kin 153. Ice Skating. (0-2) Cr. 1. F.S. Satisfactory-fail only.

Kin 158. Tennis. (0-2) Cr. 1. F.S.S.S. Introduction to basic skills (forehand, backhand, serve) and basic knowledge of game play. Satisfactory-fail only.

Kin 162. Triathlon Training. (0-3) Cr. 1. F.S. Prereq: 102 or equivalent skill. Introduction to the sport of triathlon integrating the discipline(s) of running, cycling, and swimming. Emphasis on cross-training systems and skill enhancement. Satisfactory-fail only.

Kin 163. Physical Fitness. (0-3) Cr. 1. Evaluation of fitness Status. Exercises, activities, and programs to improve physical fitness. Relationship between physical activity and weight control. Credit for only Ex Sp 163 or 288 may be applied toward graduation. Satisfactory-fail only.

Kin 164. Walking for Fitness. (0-3) Cr. 1. F.S. Fitness walking as an activity to improve health and fitness; values of this type of activity as a lifetime endeavor. Satisfactory-fail only.

Kin 166. Weight Training. (0-3) Cr. 1. F.S. Satisfactory-fail only.

Kin 170. Tae Kwon Do/Karate I. (0-2) Cr. 1. F.S. Satisfactory-fail only.

Kin 171. Tae Kwon Do/Karate II. (0-2) Cr. 1. Satisfactory-fail only.

Kin 182. Volleyball. (0-2) Cr. 1. Satisfactory-fail only.

Kin 185. Soccer. (0-2) Cr. 1. Satisfactory-fail only.

Kin 200. Basic Athletic Training. (1-2) Cr. 2. Prereq: Biol 105 or 265 or 265L. Provides pre-athletic training students with the knowledge of the profession of a certified athletic trainer, factors associated with injury prevention, treatment, emergency care of athletic injuries, protective equipment, athletic training program administration, organization, and legal concepts in the athletic training setting. To be taken concurrently with 221.

Kin 202. Basic Athletic Training for Athletes. (2-2) Cr. 3. S. Prereq: Biol 265, 265L. Provides pre-athletic training students with the knowledge of the profession of a certified athletic trainer, factors associated with injury prevention, treatment, emergency care of athletic injuries, protective equipment, athletic training program administration, organization, and legal concepts in the athletic training setting. To be taken concurrently with 221.

Kin 223. Clinical Practicum in Athletic Training. (0-3) Cr. 1. F.S. Prereq: Permission of Athletic Training Program Director. Clinical experiences for athletic training students during pre-season intercollegiate football. Clinical experiences include: Professional Rescuer CPR, AED certification, emergency splinting and spineboarding, medical record keeping and HIPPA regulations, environmental conditions, prevention of injury screening strategies, athletic training room and education program policies and procedures, review of athletic taping techniques, acute injury management, mouthpiece formation, and athletic review. Satisfactory-fail only.

Kin 225. Athletic Injuries I Clinical Practicum. (0-3) Cr. 1. F.S. Prereq: Permission of athletic training program director. Athletic training clinical experience to accompany 224. Open to students in the athletic training option. Satisfactory-fail only.

Kin 226. Evaluation of Athletic Injuries II. (2-3) Cr. 3. S. Prereq: Permission of athletic training program director. Sport injury assessment procedures and evaluation techniques for upper body injuries. Includes an overview of mechanisms of injury, general musculoskeletal and dermatological conditions. Designed for students in the athletic training option or preprofessional health programs.

Kin 227. Athletic Injuries II Clinical Practicum. (0-3) Cr. 1. S. Prereq: Permission of athletic training program director. Athletic training clinical experience to accompany 226. Open to students in the athletic training option. Satisfactory-fail only.

Kin 232. Fundamentals of Indoor Team Sports. (0-3) Cr. 1. S. Prereq: Eligibility for admission to Kin teacher education program. Fundamentals of indoor team sports, for example basketball, volleyball, team handball. Skill enhancement, analysis, understanding practice and the development of progressions.

Kin 235. Fundamentals of Racquet Sports. (0-3) Cr. 1. S. Prereq: Eligibility for admission to Kin teacher education program. Fundamentals of racquet sports, for example tennis, badminton, racquetball. Skill enhancement, analysis, understanding practice and the development of progressions.

Kin 236. Fundamentals of Individual Sports. (0-3) Cr. 1. F. Prereq: Eligibility for admission to Kin teacher education program. Fundamentals of individual sports, for example track and field, golf, archery and bowling. Skill enhancement, analysis, understanding practice and the development of progressions.

Kin 238. Fundamentals of Outdoor and Adventure Activities. (0-3) Cr. 1. F. Prereq: Eligibility for admission to Kin teacher education program. Techniques of individual and group facilitation for initiatives involving outdoor adventure activity. Topics include ropes/challenge course events, activity presentation, and sequencing, safety techniques, preparation principles and new games Philosophy. Participation is required in one weekend of fieldwork.

Kin 240. Introduction to Taping, Equipment, and Bracing Techniques. (0-3) Cr. 1. F.S. Prereq: Permission of admission to Kin teacher education program. Techniques of individual and group facilitation for initiatives involving outdoor adventure activity. Topics include ropes/challenge course events, activity presentation, and sequencing, safety techniques, preparation principles and new games Philosophy. Participation is required in one weekend of fieldwork.

Kin 244. Development of Allied Health. (0-3) Cr. 1. F.S. Satisfactory-fail only.

Kin 250. Orientation in Kinesiology and Health. (2-0) Cr. 2. F.S. Overview of the various disciplines and professions that comprise the field of Kinesiology (the study of human movement) and help students determine the career option that best fits their interests.

Kin 253. Orientation in Kinesiology and Health. (1-0) Cr. 1. S. Prereq: Concurrent enrollment or credit in 252. Overview of ISU policies and procedures, academic advising operations, degree requirements, programs of study planning, and campus resources. Satisfactory-fail only.

Kin 254. Learning Communities in Kinesiology/Health. (0-5) Cr. 0.5. F.S. Prereq: Concurrent enrollment or credit in 253. Semester long course for new students in the Kinesiology Learning Community to be taken concurrently with the general education class for Kin teacher education program. Students will take field trips and work with faculty, staff and mentors to explore careers in kinesiology and complete assignments related to identification & development of their skills and interests. Required for freshmen only. Satisfactory-fail only.
Kin 258. Physical Fitness and Conditioning. (1-3) Cr. 2. F.S. Prereq: Kinesiology and health majors only. Development of personal fitness using a variety of conditioning and exercise techniques such as aerobics, weight training, and aquatic fitness. Introduction to acute and chronic responses to exercise, and the role of exercise in health promotion and weight management. Credit for only one of the following courses may be applied toward graduation: Kin 163, 258.

Kin 259. Leadership Techniques for Fitness Programs. (1-3) Cr. 2. F.S. Prereq: 258. Development of exercise leadership skills in a variety of activities. Includes planning, promotion, and teaching techniques for developing fitness in others using a variety of exercise modalities including aerobics, weight training, and aquatic fitness.

Kin 266. Advanced Strength Training and Conditioning. (1-2) Cr. 2. F.S. Prereq: 258, 259. This course is designed to enhance the student’s current level of knowledge and expertise to an advanced level in the area of strength training and conditioning. The course will prepare students interested in taking the National Strength and Conditioning Association Certified and Conditioning Specialist’s exam. The course will focus on the assessment and implementation of training programs with strong emphasis on the areas of resistance training, metabolic training, flexibility, reaction time, speed, and power.

Kin 280. Directed Field Experience in Elementary Physical Education. (0-3) Cr. arr. S. Observing, planning, and facilitating movement experiences of children in an elementary school setting. Satisfactory-fail only.

Kin 281. Directed Field Experience in Physical Education. (0-3) Cr. arr. F.S.S.S. Prereq: 3 credits in human development and family studies. Approaches to teaching movement skills to pre-school and elementary school age children. Emphasis on planning and conducting developmentally appropriate movement experiences for preschool and elementary aged children based upon motor development research. Practical experience provided. Credit in only one of the following courses may be applied toward graduation: Kin 284, 312.

Kin 285. Pre-Internship in Kinesiology. Cr. arr. F.S.S.S. Prereq: Kinesiology and Health major and permission of internship coordinator. Pre-internship experience with a community sport and recreation or health fitness organization. Satisfactory-fail only.

Kin 312. Movement Education in Elementary School Physical Education. (2-3) Cr. 3. S. Prereq: Concurrent enrollment in 280. Planning for management and instruction of developmentally appropriate physical education for children pre-school through elementary grade 6. Laboratory experience required. Credit for only one of the following courses can be applied toward graduation: Kin 284, 312.

Kin 315. Coaching Theory and Administrative Issues. (3-0) Cr. 3. S. Study in the theory, ethics, strategy, and mechanics of coaching various interscholastic and/or intercollegiate sports. Emphasis on formulating a Philosophy, identifying goals and psychological aspects, teaching skills, and developing strategies.

Kin 323. Therapeutic Modalities for Athletic Trainers. (2-2) Cr. 3. F. Prereq: Permission of athletic training program director. Theory and technique of therapeutic modalities used in the management of injuries.

Kin 324. Therapeutic Modalities Clinical Practicum. (0-3) Cr. 1. F. Prereq: Permission of athletic training program director. Clinical training clinical experience to accompany 323. Open to students in athletic training option. Satisfactory-fail only.

Kin 326. Rehabilitation of Athletic Injuries. (2-2) Cr. 3. S. Prereq: Permission of athletic training program director. Theory and practical application of rehabilitation principles used in the management of athletic injuries.

Kin 327. Rehabilitation of Athletic Injuries Clinical Practicum. (0-3) Cr. 1. S. Prereq: Permission of athletic training program director. Athletic training clinical experience to accompany 326. Open to students in the athletic training option. Satisfactory-fail only.

Kin 331. Youth Sports. (Dual-listed with 331). (3-0) Cr. 3. S. The research findings from non-school related sport programs for children and adolescents and how these impact programs, parameters, and standards including bio-physical, social, psycho-motor and cognitive factors.

Kin 345. Management of Health-Fitness Programs and Facilities. (3-0) Cr. 3. S. Application of management concepts to the fitness industry, e.g., understanding customers, marketing, program management, financial management, legal issues, and evaluation and planning.

Kin 355. Biomechanics. (2-2) Cr. 3. S. Prereq: Phys 106 or 111. Mechanical basis of human performance; application of mechanical principles to exercise, sport and other physical activities. Nonmajor graduate credit.

Kin 360. Sociology of Sport and Exercise. (3-0) Cr. 3. F.S. Prereq: Soc 134 and one of Stat 101, 104 or 226/226, or Kin 471. Sport and exercise as social systems and as institutions related to other institutions such as the polity, the economy, mass media, and education.

Kin 365. Sport Psychology. (3-0) Cr. 3. F.S. Prereq: Psych 101 or Psych 230. Psychological factors that influence performance in sport settings. The influence of personality, anxiety, motivation, social factors, and psychological skills training.

Kin 372. Motor Control and Learning Across the Lifespan. (2-2) Cr. 3. F.S. Prereq: Psych 101, 230, Biol 255, 256. Introduction to major concepts of neuromotor control, behavioral motor control and motor learning in the child, adult and older adult, with emphasis on the adult system.

Kin 375. Teaching Physical Education. (2-3) Cr. 3. S. Prereq: admission to University Teacher Education Program. Current theory, practice and research on teaching focusing on management, instructional, and learning styles of students in secondary schools.

Kin 385. Search Strategies for Field Experiences and Employment. (Cross-listed with HSc. Cr. R. F.S. Prereq: Junior classification; to be taken minimum of two semesters prior to Kin 485. Search techniques and preparation of materials utilized for acquisition of jobs and/or internships in kinesiology and health fields. Internship process and policies/procedures will be covered.

Kin 395. Adapted Physical Education. (Dual-listed with 395, 257). (2-3) Cr. 3. F. Prereq: 378. Specific disabling conditions in terms of etiology, characteristics, needs, and potential for movement experiences. Techniques of assessment, prescription, adaptation of activities, methods, and program planning. Laboratory experience required. Kin 395 may not be taken by students who have previously earned credit in Kin 395.

Kin 418. Supervised Teaching in Physical Education in the Elementary School. Cr. 8. F.S. Prereq: 280, 312, 355, 358, 375, 395, 471, 475. Students must be fully admitted to Teacher Education and must apply for approval to enroll at the beginning of the semester prior to registering. Supervised teaching in the elementary schools.

Kin 442. Sport, Recreation, and Tourism. (3-0) Cr. 3. F. Prereq: 242, 280, Soc 134. The role of sport in developing fitness, recreational opportunities, and tourism, with special emphasis on issues related to youth sport, volunteerism, and the marketing of sport events and facilities.

Kin 445. Legal Aspects of Sport. (3-0) Cr. 3. S. Students will understand legal concepts and terminology relevant to sport/activity, identify strategies for limiting liability in sport programs, and identify solutions for elimination of discriminatory practices in sport and physical activity.

Kin 450. Medical Concerns for the Athletic Trainer. (3-0) Cr. 3. F. Prereq: Permission of athletic training program director. Current medical issues and concerns, including pathology of illness and injury, dermatological conditions, exposure to allied health care professionals, and pharmacological indications in relation to the profession of athletic training and in patient/athlete care.

Kin 458. Principles of Fitness Assessment and Exercise Prescription. (3-2) Cr. 4. F.S. Prereq: 358. Psychological principles of fitness program design and administration of fitness programs; testing, evaluation, and prescription; cardiarc risk factor modification.

Kin 459. Internship in Exercise Leadership. (0-3) Cr. 1. Prereq: C- or better in 259, CPR certification, concurrent enrollment in 458. Observation and practice of exercise leadership techniques in an on-campus adult fitness program.

Kin 462. Medical Aspects of Exercise. (3-0) Cr. 3. F.S. Prereq: 358. The role of exercise in preventive medicine. Impact of exercise on various diseases, and the effect of various medical conditions on the ability to participate in vigorous exercise and competitive sports. Principles of exercise testing and prescription for individuals with these conditions. Environmental and nutritional aspects of exercise.

Kin 471. Measurement in Physical Education. (Dual-listed with 571). (3-0) Cr. 3. S. Study of grading, assessment and evaluation in physical education with a focus on measuring cognitive and psycho-motor achievement.

Kin 472. Neural Basis of Human Movement. (Dual-listed with 572). (0-3) Cr. 3. S. Prereq: 372 or Psych 310. Addresses the role of the central nervous system in the control of voluntary human movement, with the focus on the cerebral cortex, basal ganglia and cerebellum. Content is organized around specific nervous system damage (such as stroke, apraxia, spasticity, or spinal cord damage) and functional movements (such as reaching and grasping, balance and gait). Converging evidence from human movement disorders, brain imaging, lesion and single cell studies provide the primary basis for the content. Nonmajor graduate credit.

Kin 475. Physical Education Curriculum Design and Program Organization. (Dual-listed with 575). (3-0) Cr. 3. F. Prereq: Admission to University Teacher Education Program. Current theory and practices and principles applied to curriculum development for programs in physical education, K-12. Organizing for teaching in a variety of school settings.
Kin 480. Functional Anatomy. (3-0) Cr. 3. S. Prereq: 355; Biol 155 or 255 and 256. The structure and function of human muscular, skeletal and nervous systems. The relationship of these systems to efficient and safe human motion. Nonmajor graduate credit.

A. Health/Fitness Management. Prereq: C or better in 458 and 459, Kinesiology and Health majors only. Cumulative GPA 2.0.

B. Sport and Physical Activity. Prereq: Kinesiology and Health majors only. Cumulative GPA 2.0.

Kin 489. Review of Athletic Training Competencies and Clinical Proficiencies. Cr. R. F.S. Prereq: Senior classification, permission of athletic training program director. Preparation for professional endorsement and certification by review of required competencies and clinical proficiencies. Required for endorsement or approval to sit for Board of Certification Exam. Satisfactory-fail only.

Kin 490. Independent Study. Cr. arr. Repeatable. Prereq: 6 credits from Kin advanced core and permission of coordinator. Independent study of problems of areas of interest in exercise and sport science and related areas.

A. Exercise and Sport Science
B. Coaching
H. Honors

Kin 501. Research Methods in Physical Activity. (3-0) Cr. 3. Repeatable. Prereq: Graduate classification in kinesiology and health. Methods and techniques used in the design and interpretation of research involving physical activity. Emphasis on styles of writing, library use, and computer applications.

Kin 505. Research Laboratory Techniques in Exercise Physiology. (3-4) Cr. 2. Prereq: Kin 358 or equivalent course appropriate for basic laboratory experience. Application and use of laboratory research equipment in exercise physiology, including operation, calibration, and use in selected situations.

Kin 510. Advanced Medical Aspects of Exercise. (2-0) Cr. 2. Prereq: Kin 358. The role of exercise in preventive medicine. Impact of exercise on various diseases, and the effect of various medical conditions on the ability to participate in vigorous exercise and competitive sports. Principles of exercise testing and prescription for individuals with these conditions.

Kin 512. Methods in Physical Education. (3-0) Cr. 3. S. Study of learning and teaching in physical education for elementary and secondary schools.

Kin 516. Quantitative Analysis of Human Movement. (3-1) Cr. 3. Prereq: 356 or permission from instructor. Systematic problem-solving approaches and design of computer programs for biomechanical analyses. Estimation of anthropometric parameters and mechanical properties of muscles, bones, and joints. Integration of anthropometrics, kinestatics, and muscle mechanics into simulations of human movement.

Kin 518. Student Teaching in Elementary Physical Education. (3-0) Cr. 3. Prereq: 512, 570, 578. Student teaching for 8 weeks in an elementary school.

Kin 519. Student Teaching in Secondary Physical Education. (4-0) Cr. 8. F.S. Prereq: 512, 570, 578. Student teaching for 8 weeks in a middle or high school.

Kin 520. The Social Analysis of Sport. (3-0) Cr. 3. Prereq: 360; open to majors only or by permission of instructor. Sociological analysis of sport with emphasis on Sociological theory, sports structure, and function in modern industrialized Society; the systems of sport in regard to their role structure, formal organization, and professionalization and its differentiation among social class, age, and sex.

Kin 521. Advanced Topics in Exercise and Sport Psychology. (3-0) Cr. 3. Prereq: 365 or 368, 3 courses in psychology; open to majors only or by permission of instructor. Aspects of psychology which form a basis for understanding and explaining behavior in the context of exercise and sport. Emphasis on evaluating published research, particularly theory and research methodology, student presentations.

Kin 531. Youth Sports. (Dual-listed with 331). (3-0) Cr. 3. S. The research findings from non-school related sport programs for children and adolescents and how these impact programs, parents and children including bio-physical, social, psycho-motor and cognitive factors.

Kin 549. Advanced Vertebrate Physiology I. (Cross-listed with An S. B. M. St.) (3-0) Cr. 3. F. Prereq: Bio 335; credit or enrollment in BBMB 404 or 420. Neurophysiology, sensory systems, muscle, neuroendocrinology, endocrinology.

Kin 552. Advanced Vertebrate Physiology II. (Cross-listed with An S. B. M. S. NutrS). (3-0) Cr. 3. Prereq: Bio 335; credit or enrollment in BBMS 404 or 420. Cardiovascular, renal, respiratory, and digestive physiology.

Kin 558. Physical Fitness - Principles, Programs, and Evaluation. (2-3) Cr. 3. Prereq: Kin 358. Principles of physical fitness, design and administration of fitness programs; testing, evaluation, and prescription; electrocardiogram interpretation.

Kin 560. Principles of Motor Control and Learning. (2-0) Cr. 3. Prereq: Kin 372. Theoretical perspectives of motor control and learning will be examined as well as factors that facilitate motor learning. Motor control and learning will also be addressed by studying functional tasks such as reach and grasp, posture and locomotion, handwriting, catching and oral speech.

Kin 561. Motor Development. (2-0) Cr. arr. Prereq: Psych 230. The physical development and characteristic reactions of children in relation to motor performance. Identification of special psychomotor needs of various age groups of children. All literature and theories applied to the physical education environment.

Kin 570. Physical Activity Assessment for Health Related Research. (2-2) Cr. 3. This course will cover the broad scope of research in physical activity and public health. Emphasis will be placed on the application of physical activity assessment techniques since accurate measures are needed to more accurately assess the health benefits from physical activity and to evaluate the effectiveness of behavioral interventions designed to promote physical activity.

Kin 571. Measurement in Physical Education. (Dual-listed with 471). (3-0) Cr. 3. S. Study of grading, assessment and evaluation in physical education with a focus on measuring cognitive and psycho-motor achievements.

Kin 572. Neural Basis of Human Movement. (Dual-listed with 472). (3-0) Cr. Prereq: Kin 372 or Psych 310. Addresses the role of the central nervous system in the control of voluntary human movement, with the focus on the cerebral cortex, basal ganglia and cerebellum. Content organized around specific nervous system damage (such as stroke, apraxia, spasticity, or spinal cord damage) and functional movements (such as reaching and grasping, balance and gait). Converging evidence from human movement disorders, brain imaging, animal lesion and single cell studies provide the primary basis for the content.

Kin 575. Physical Education Curriculum Design and Program Organization. (Dual-listed with 475). (3-0) Cr. F.S. Current theory, practices and principles applied to curriculum development for programs in physical education, K-12. Organizing for teaching in a variety of school settings.

Kin 590. Special Topics. Cr. arr. Repeatable. A. Physical Education
B. Health and Exercise Promotion
D. Exercise Physiology
E. Sport Sociology
F. Sport/Exercise Psychology
G. Motor Behavior
H. Biomechanics
I. Human Growth and Puberty

Kin 591. Supervised Field Experience. Cr. arr. Prereq: 10 graduate credits in health and human performance and/or related areas. Supervised on-the-job field experience in special areas. A. Physical Education
B. Health and Exercise Promotion
D. Exercise Physiology

Kin 595. Adapted Physical Education. (Dual-listed with 395). (3-0) Cr. F.S. Prereq: 375. Specific disabling conditions in terms of etiology, characteristics, needs, and potential for movement experiences. Techniques of assessment, prescription, adaptation of activities, methods, and program planning. Laboratory experience required. Kin 595 may not be taken by students who have previously earned credit in Kin 395.

Kin 620. Advance Research Methods in Physical Activity. (3-0) Cr. 3. S. Prereq: 501, Stat 401 and 402. Doctoral students only. Culminating seminar designed to synthesize Statistical and design courses with practical research issues using data from physical activity.

Athletics (Ath)

Courses primarily for undergraduate students

Ath 101. Intercollegiate Athletics. Cr. 1. Repeatable. F.S. Prereq: Permission of head coach. Limited to 1 credit per year to a maximum of 4. Credit for a sport section of Ath 101 may not be applied toward graduation requirements. Also required for Kin 186 or any skill technique course in the same sport. Satisfactory-fail only.

B. Basketball (men)
C. Basketball (women)
D. Cross Country (men)
E. Cross Country (women)
F. Football (men)
G. Golf (men)
J. Gymnastics (women)
K. Softball (women)
M. Swimming/Diving (women)
O. Tennis (women)
P. Track and Field (men)
Q. Track and Field (women)
R. Volleyball (women)
S. Wrestling (men)
T. Golf (women)
U. Soccer (women)

Dance (Dance)

Dance 200. Modern Dance I. (3-0) Cr. 1. F.S. Introduction and practice of basic dance concepts, including preparatory techniques and guided creativity problems. No previous modern dance experience required. Satisfactory-fail only.
Dance 130. Ballet I. (0-3) Cr. 1. F.S. Introduction to the basic skills, vocabulary, and tradition of ballet with concentration on control and proper alignment. No previous ballet experience required. Satisfactory-fail only.

Dance 140. Jazz I. (0-3) Cr. 1. F.S. Introduction to the modern jazz style with concentration on isolation and syncopation. No previous jazz experience required. Satisfactory-fail only.

Dance 150. Tap Dance I. (0-3) Cr. 1. F. Instruction and practice in basic tap technique and terminology. No previous tap experience required. Satisfactory-fail only.

Dance 160. Ballroom Dance I. (0-2) Cr. 1. F.S. Instruc-

theory and practice in foxtrot, waltz, swing, cha cha, rhumba, tango, and selected contemporary dances. Satisfactory-fail only.

Dance 199. Dance Continuum. Cr. arr. Repeatable. F.S. Prereq: Permission of instructor. Advance registration required. Continued instruction and practice in either modern dance, recreational dance, ballet, jazz and/or compositional skills. Satisfactory-fail only.

Dance 211. Fundamentals and Methods of social and World Dance. (1-3) Cr. 2. S. Skill enhancement, teaching, progressions with emphasis on world and social dance. Designed for kinesiology and health majors, open to others.

Dance 220. Modern Dance Composition. (1-3) Cr. 2. F. Prereq: 120 or previous modern dance experience. Theory and practice of the creative skills involved in solo and small group composition.

Dance 222. Modern Dance II. (0-3) Cr. 1. F. Prereq: 120 or previous modern dance experience. Dance techniques emphasizing strength, balance, endurance, rhythmic activity and extended combinations.

Dance 223. Modern Dance III. (0-3) Cr. 1. S. Prereq: 222. Continued experience in dance techniques and extended combinations. Emphasis on maturation of skill and artistry. Exposure to a variety of modern dance technical styles.

Dance 224. Concert and Theatre Dance. (Cross-listed with Theatre). (0-3) Cr. arr. Repeatable. F.S. Prereq: By audition only. Choreography, rehearsal, and performance in concert dance concerts and/or musical theatre productions. Satisfactory-fail only.

Dance 232. Ballet II. (0-3) Cr. 1. S. Prereq: Previous ballet experience. Technical skills in the classical movement vocabulary. Emphasis on alignment, technique, sequence development, and performing quality.

Dance 242. Jazz II. (0-3) Cr. 1. S. Prereq: Previous jazz dance experience. Dance concepts within the jazz idiom. Instruction in extended movement sequences and artistic interpretation.

Dance 270. Dance Appreciation. (3-0) Cr. 3. F.S.SS. Introduction to the many forms and functions of dance in world cultures. Develop abilities to distinguish and analyze various dance styles. No dance experience required.

Dance 320. Sound and Movement. (2-3) Cr. 3. S. Prereq: 220. Intermediate composition based on the relationship of movement to improvised sounds, rhythmic scores, and the musical works of composers from various periods.

Dance 380. History and Philosophy of Dance. (3-0) Cr. 3. Art, S., offered 2010. Prereq: 270. Study of the history of dance from early to modern times with emphasis on the theories and Philosophies of contemporary modern dance, dancers, and dance educators.

Dance 370. Advanced Studies in Dance. Cr. arr. Repeatable. F.S. Prereq: 2 credits in dance. Advance registration required. Designed to meet special interests and talents of students to include both group and independent study in various aspects of dance as a performing art including production, choreography, and performance.

Dance 384. Teaching Children's Dance. (1-3) Cr. 2. S. Content, experiences, and methods of a comprehensive dance program at the elementary school level. Theories and practice in guiding elementary school children in dance. Prerequisites: 105, 110, 215.

Dance 385. Methods of Teaching Dance. (1-3) Cr. 2. F. Methods and techniques of teaching social and world dance forms. Introduction to teaching educational modern dance.

Dance 386. Teaching Dance Technique and Composition. (1-3) Cr. 2. Prereq: 320. Teaching of dance as an expressive art form with emphasis on technique, rhythm, and the creative teaching process.

Dance 490. Independent Study. Cr. arr. Repeatable. Prereq: 6 credits in dance and permission of coordinator. Independent study of problems or areas of interest in dance.

Health Studies (H S)

H S 105. First Aid and Emergency Care. (1-2) Cr. 2. F.S. Discussion and application of the basic techniques of administering first aid and cardiopulmonary resuscitation. ARC certification available.

H S 110. Personal and Consumer Health. (3-0) Cr. 3. F.S. Physical, mental, and social aspects of health as a basis for understanding health problems. False and misleading advertising and effects of cultists and faddists on consumer health. Study of legislation and agencies concerned with consumer protection and health insurance.

H S 215. Drug Education. (3-0) Cr. 3. Prereq: 101 or 230. Use and abuse of mood modifying substances in contemporary society. Includes study of tobacco, alcohol, and other drugs.

H S 275. Health Education in the Elementary School. (3-0) Cr. Prereq: HD FS 102 or 226. An overview of school health services, healthful school living, and health instruction for teachers at the elementary level. Credit for both H S 275 and 375 may not be applied toward graduation.

H S 305. Instructor's First Aid and Cardio-pulmonary Resuscitation. (1-2) Cr. 2. S. Prereq: 105, current Standard First Aid and Community CPR Certification. Discussion and practice of skills needed to teach first aid and cardiopulmonary resuscitation. ARC certification available.

H S 310. Community and Public Health. (3-0) Cr. 3. Prereq: 110. Introduction to community health problems, programs of prevention, environmental health agencies, and health services. Study of local, state, and national community health agencies, their purposes and functions.

H S 375. Teaching-Learning Process in Health Education. (3-0) Cr. 3. Prereq: 105, 110, 215. Principles, methods, materials and resources involved in the teaching of health. Includes organization and development of the health education curriculum (K-12). Credit for both H S 275 and 375 may not be applied toward graduation.

H S 380. Worksite Health Promotion. (3-0) Cr. 3. Prereq: 268, 366, FS HN 167. The design and implementation of worksite health promotion programs and the benefits these programs have for both employees and employers. Review of various health risk appraisals and planning theory-based incentive programs designed to promote positive lifestyles.

H S 385. Search Strategies for Field Experience and Employment. (Cross-listed with KIN). Cr. R. F.S. Prereq: Junior classification, to be taken minimum of two semesters prior to KIN 485. Search techniques and preparation of materials utilized for acquisition of jobs and/or internships in kinesiology and health fields. Internship process and policies/procedures will be covered. Satisfactory-fail only.

H S 390. Administration of the School Health Program. (3-0) Cr. 3. F. Prereq: 310. History and legal basis of school health programs. Procedures for developing, organizing, implementing, and evaluating a modern program of health services, healthful school living, and health instruction. Includes administration, community and school relationships.

H S 430. Community Health Program Development. (3-0) Cr. 3. F.S. Prereq: 380. Techniques of needs assessment, program design, administration, and evaluation of community health education programs in various settings.

H S 485. Directed Field Experience in Health Education. Cr. arr. Prereq: All required health studies courses and permission of coordinator. Advance registration required. Supervised experience in health education. Satisfactory-fail only.

Landscape Architecture

www.design.iastate.edu/LA/

Douglas Johnston, Chair of Department

Distinguished Professor (Emeritus): Dyas

Professors: Anderson, Engler, Hightshoe, Johnston, Keller

Professors (Emeritus): Boon, Harvey, Lane

Associate Professors: Badenhep, Grundmann, Hohmann, Martin, Wagner

Assistant Professors: Rogers, Seeger

Assistant Professors (Adjunct): Kane, M. Miller, Pritchard

Lecturers: Belkacemi, Groe

Undergraduate Study

Landscape architecture is an environmental design discipline. Landscape architects actively shape the human environment: they map, interpret, imagine, draw, build, conceptualize, synthesize, and project ideas that transform landscapes. The design process involves creative expression that derives from an understanding of the context of site (or landscape) ecosystems, cultural frameworks, functional systems, and social dynamics. Students in our program learn to change the world around them by re-imagining and re-shaping the landscape to enhance its aesthetic and functional dimensions, ecological health, cultural significance, and social relevance. The profession addresses a broad range of landscapes in urban, suburban, rural, and wilderness settings. The scale of landscape architecture projects varies from broad, regional landscape analysis and planning to detailed, individual site-scale designs. The curriculum at Iowa State prepares students for this challenge as they develop their abilities to design and communicate ideas through a sequence of foundational courses and studios.

Graduates draw upon scientific and historical/cultural knowledge in applying their creative and technical skills in the planned arrangement of natural and constructed elements on the land with a concern for the stewardship and conservation of natural, constructed, and human resources. The resulting environments serve useful, aesthetic,
Landscape Architecture

safe, and enjoyable purposes. Graduates are able to communicate clearly and work effectively with others on complex land design and planning problems. They understand the ethical, social, and environmental/ecological dimensions of issues involving changes in the landscape.

The curriculum includes one year of the College’s core design program followed by a four-year professional program. Admission to the professional program is subject to the approval of a faculty committee at the completion of the preprofessional program. Scholastic performance, aptitude, and personal development are the qualifications considered. The department also cooperates in the undergraduate minor in design studies.

Following admission to the professional program, students embark on the traveling studio during the fall semester of their second year. This studio is a full semester offering. This concentration in design and involves extensive travel within and beyond the great midwest region of North America, to study regional natural systems and the cultural response to those systems.

To enhance the study of landscape architecture in off-campus settings, the department recommends that each student participate in optional College or Department-led international study opportuni-
ties such as the Rome or Pacific Rim summer offerings. In addition, the department requires students to choose from among the following three options during the spring and summer of their fourth year: a professional internship, an indepen-
dent study abroad experience, or National Student Exchange. The department assists students with placement, and additional information through the department and the College of Design’s Career Services Office.

Personal laptop/computer notebooks and appropri-
ate software are regularly used in classes starting with the second year. Refer to the college for options and recommendations.

The curriculum is accredited by the Landscape Architecture Accreditation Board and provides the education which, combined with experience, is necessary for professional licensure.

For undergraduate curriculum in landscape architecture leading to the degree bachelor of landscape architecture, see College of Design, Curricula.

Graduate Study

The department offers opportunities for post-pro-
fessional study leading to the degree master of landscape architecture. Minor work is offered to students taking major work in other departments.

The M.L.A. degree is granted upon completion of 36 credits and the acceptance of a thesis or creative component. Typically, the program will require four semesters of study for students with a bachelor’s degree in landscape architecture.

Students with a bachelor’s degree in landscape architecture may also enter a special program to earn the M.L.A. and the master’s degree in regional planning (M.C.R.P) degrees in three years. Graduate students who do not possess a bachelor’s degree in landscape architecture may complete addi-
tional coursework in the fundamental skill areas of the profession. This is accomplished by concurrent enrollment in the graduate program to earn the B.L.A. degree before fully engaging in graduate study. The time necessary to earn the B.L.A. in addition to the M.L.A. will vary according to the student’s background upon admission. Students interested in the concurrent B.L.A./M.L.A. and double degree M.L.A./M.C.R.P programs should contact the department to receive a detailed description of requirements.

Graduates have a broad understanding of landscape architecture and related disciplines. They are able to communicate effectively with colleagues in the sciences and/or humanities as well as in the allied professions. Graduates are prepared to work indi-
vidually and in multidisciplinary teams to address complex problems dealing with the cultural/ecologi-

cal environment at an undertaking level of research and/or creative activities and communicat-
ing the results of these efforts in a concise and persuasive manner. The department participates in the Graduate Certificate Program in Geographic Information Systems (GIS), administered by the Department of Community and Regional Planning.

Courses primarily for undergraduate students

LA 201. Studio: Landscape Interpretation and Representation. (1-15) Cr. 6. F. Prereq: Enrollment in the professional program. Reading and representing varied landscapes; development of aesthetic sensitiv-
ity to the geomorphology, vegetation and cultural influences on these landscapes. Small scale interven-
tions and exploration of landscape phenomena and change. Emphasis on a variety of documentation and drawing techniques.

LA 202. Studio: Site Design I. (1-15) Cr. 6. S. Prereq: 201. Fundamental issues of landscape planning and design at a site scale. Projects introduce a variety of (objective and subjective) site inquiry methods, space and place sensitive analysis of architecture and landscape for specific land uses. User needs, precedent study, programming, site engi-
neering, planting design, and outdoor space design expressed through a variety of three-dimensional modeling, graphic, and written media.

LA 221. Native Plants of the Savanna Etocone. (2-3) Cr. 3. F. Prereq: Enrollment in the professional program. Observation and study of the wetland, prairie, and woodland vegetation native to the savanna etocone. Emphasis on plant communities, their diversity, functions, aesthetics. Plant identification and use in landscape design. Precise and careful study of vegetation patterns, vegeta-
tion and use in built works.

LA 222. Introduced Plants of the Midwest. (2-3) Cr. 3. S. Prereq: 221. Observation and study of plants introduced to cultivation in the Midwest region. Plant cultural requirements, includ-
ing adaptations to climate changes, soil fertility and soil conditions. Investigation of history of plant intro-
duction and use in designed landscape, including consequences and applications of such and plant invasion. Introduction to planting design at the site scale, including matching plant cultural require-
ments to site conditions, functional uses of plants and expressive composition using plant form, texture and color.

LA 241. Developing Identity as a Landscape Architect. (1-0) Cr. 1. F. Prereq: Enrollment in the professional program. Designed to accompany L A 201, 221, 272, 281. Development of life skills for conflict resolution, effective interpersonal communication, and CPR/First Aid. Development of personal values as they relate to the backgrounds, abilities, attitudes, and values of others; exploration of how these influence personal decision-making and group interaction.

Reading, discussion, class activities, journal-keeping, writing.

LA 272. Cultural Landscape Studies. (3-0) Cr. 3. F. Prereq: Enrollment in the professional program. Exploration of cultural landscapes, from broad settlement patterns to individual sites, with an emphasis on the origins and evolution of landscapes. Investigation of relationships between vernacular and designed landscapes. Landscapes considered as modes of cul-
tural production that shape and are shaped by social, political, and economic processes. Exploration of land-
scapes as persistent (yet ephemeral) repositories of culture. Lectures, reading, field studies, and writing.

LA 274. The Social and Behavioral Landscape. (Cross-listed with Dan S.). 3(0) Cr. 3. S. Exploration of social and behavioral factors pertinent to design of the domestic, civic, and commercial landscape. Focus on working familiarity with design principles as they relate to the behavior and use angle across a broad demographic and cultural spectrum; application of these principles to design of outdoor environ-
ments. Lectures and discussions, including group exercises and field trips.

LA 281. Investigating Landscape form, Process, and Design. (1-6) Cr. 3. F. Prereq: Enrollment in the professional program. Exploration of the poetics and principles of landscape construction. Investigation and interpretation of landform and geomorphic processes such as the hydrologic cycle, erosion, and sedimenta-
tion. Close observation and representation of detail design, with an emphasis on material types, their connections and weathering. Readings, field studies, and drawings.

ment and management, ideas about wilderness, and Philosophy of parks as types of land use. History of landscape architecture in the National Park Service, the development of American parks, the history of park wildlife management, and interpretation. Recent initiatives in ecosystem management, community conservation, and international points of comparison. Readings, discussion, exercises.

LA 301. Site Design II. (1-15) Cr. 6. S. Prereq: 202. Development of half-acre to hundred-acre landscape design and planning proposals. Apply critical meth-
ological frameworks to shape site systems while providing appropriate support for diverse user groups and creating culturally meaningful places. Assess and interpret a program of use, organize subjective and objective site inventory and analysis, develop func-
tional and poetic design strategies for infrastructure and natural systems, and craft artistic and functionally explicit landscape architectural proposals. Develop-
ment of appropriate technique and high level of craft in representations to support design thinking process and final scheme presentation.

LA 302. Ecological Design at the Regional Scale. (1-15) Cr. 6. S. Prereq: 301, 381, 485 and Agronomy 156. Application of ecological theories and processes in design and planning at the hundred plus-acre scale specifically focusing on urban fringe land-
scapes. Apply advanced landscape analysis of soil, water, and vegetation utilizing geographic information systems. Particular focus on stream and wetland res-
itation, mitigation, and regulations and developing design representations for public use.

LA 303. Field Travel. Cr. 1. Repeatable. F.S.S. Prereq: Enrollment in the professional program and permission of instructor. Observation of professional practice and landscapes in urban, rural, and wilder-
ness areas. Satisfactory-fail only.

LA 322. Fundamentals of Planting Design. (2-6) Cr. 4. Alt. F. offered 2009. Prereq: 221. The art and techniques of creating plant compositions in the landscape that respond to cultural and biophysical contexts. Investigation of soil properties and plant/soil relationships relevant to the built environment. Methods of site inventory and analysis, developing plant palettes and composing plant assemblages that address expressive and functional needs. Introduction to the techniques of preparing planting plans, includ-
ing standards for plant selection, plant lists and plant speci-
fication.

LA 341. Contemporary Landscape Architecture. (1-0) Cr. 1. Prereq: 303. Exploration of contemporary landscape architecture practice through individualized research into practicing firms. Preparation of paper and presentation outlining broad framework and spe-
cific parameters of a selected area of contemporary practice using specific practice examples. Work may result in invation of current practitioner(s) as a lecture series or event. Resume and portfolio prepara-
tion in advance of required off-campus semester (L A 451 A, B or C).
LA 371. Landscape Architectural History: 1750 to Present. (Cross-listed with Dsn S). (3-0) Cr. 3. S. Investigation of landscape design concepts and trends as observed over time, from approximately 1750 to the present, with emphasis on the United States and Europe. Examination of significant figures and outstanding works (sites, gardens, landscapes, monuments, subdivisions, city plans, etc.) of varied geographic regions. Analysis of the social, economic, political, and technical forces contributing to the development of landscape design styles, vocabulary, and literature. Lectures, readings, projects, research papers.

LA 373. Landscape Architectural History: Prehistory to 1750. (Cross-listed with Dsn S). (3-0) Cr. 3. F. Investigation of international landscape design concepts and trends as observed over time, from pre-history to the mid 18th century. Examination of significant figures and outstanding works (sites, gardens, landscapes, monuments, subdivisions, city plans, etc.) of varied geographic regions. Analysis of the social, economic, political and technical forces contributing to the development of landscape design styles, vocabulary, and literature. Lectures, readings, projects, research papers.

LA 381. Shaping the Land. (3-0) Cr. 3. F. Prereq: 281, Math 141. Manipulation of the land form and its change through the use of contour maps and models. Transformation of the landform and its implications on the surrounding environment. Surface drainage and storm water runoff calculations, contour manipulation to insert swales, channels, ditches, walls, walls, steps, terraces, buildings, road layout and alignment and other constructed elements. Class exercises, case study precedents, and preliminary construction documents.

LA 401. Community Design. (1-3) Cr. 6. F. Prereq: 402. Design of urban and/or rural places utilizing participatory methods and techniques. Projects address midwestern community issues including reuse of abandoned sites, in-fill, recreation, and peri-urban agriculture. Emphasis on development of user-orientated relationship skills and design research.

LA 402. Urban Design. (1-5) Cr. 6. F. Prereq: 302. Comprehensive planning and design for urban Sites or for sites within urban contexts. Projects typically include planning for a variety of integrated land uses, and cover the full range of design scales from master planning to proposals for site details. Emphasis on written and verbal as well as graphic communications. Integrated seminar component.

LA 405. Senior Thesis. (1-15) Cr. 6. S. Prereq: 401, 402, 403, and enrollment in Honors program; permission of advisor, chair and thesis advisor. Individual advanced forum for the demonstration of sophistication in landscape architectural design. Experimentation and innovation are expected.

LA 421. Advanced Planting Design. (2-4) Cr. 4. Alt., offered 2011. Prereq: 221, 222 or equivalent. Introduction to the theory and practice of planting design, with emphasis on the ecological, cultural and aesthetic factors affecting planting design and vegetation management in the built environment. Three venues for collaborative learning form the basis of the course: topical research inquiry, case history investigation and completion of one comprehensive project design.

LA 441. Professional Practice. (2-0) Cr. 2. S. Prereq: 481. Studies of conventional and developing forms of public and private practice. Explore relationships between professional life and the culture of the professional design firm; investigate firm identities and structures; understand design projects, their delivery process, and contractual agreements. Lecture and class discussion.

LA 461. Introduction to GIS. (Cross-listed with LL, EnSci, Env S). Cr. 4. SS. Descriptive and predictive GIS modeling techniques, spatial Statistics, and map algebra. Application of GIS modeling techniques to environmental planning and resource management. Nonmajor graduate credit.

LA 465. Landscape Change and Conservation. (Dual-listed with 565). (Cross-listed with NREM). (3-0) Cr. 3. F. Prereq: 202. Exploration of issues in landscape ecology and conservation biology relevant to landscape change, design, and planning. Examination of foundational principles and their applications across a continuum of land uses, from wilderness to urban areas.

LA 478. Topical Studies in Landscape Architecture. (Dual-listed with 578). (Cross-listed with Dsn S). Cr. arr. Repeatable. F.S.SS. Prereq: L A 371 or senior classification or graduate standing. Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

LA 481. Landscape Construction. (1-4) Cr. 3. S. Prereq: 481. Advanced site construction issues, with emphasis on water and irrigation systems, mechanical and electrical systems, site lighting, proposal preparation, project scheduling, project costing and estimating. Final construction document preparation including drawings and specifications.

LA 482. Advanced Landscape Construction. (1-4) Cr. 3. S. Prereq: 481. Advanced site construction issues, with emphasis on water and irrigation systems, mechanical and electrical systems, site lighting, proposal preparation, project scheduling, project costing and estimating. Final construction document preparation including drawings and specifications.

Courses primarily for graduate students, open to qualified undergraduate students

LA 501. Landscape Architecture Theory. (3-0) Cr. 3. S. Prereq: Admission to graduate program or permission of instructor. Exploration of major theories of landscape architectural design and their relationships to broader cultural and theoretical practices. Analysis of key texts and projects in landscape architecture, art, and related fields. Emphasis on developing critical ways of analyzing ideas. Lectures, readings, discussion, and writings.

LA 541. Principles of Research for Landscape Architects. (3-0) Cr. 3. F. Prereq: Admission to graduate program or permission of instructor. Examination of design inquiry and research methods appropriate to landscape architectural projects, including bibliographical, historical, numerical, statistical, survey, and geographical methods. Readings, discussions, and application problems. Preparation of a research proposal.

LA 562. Studio in Resource Conservation and Management. Cr. arr. Repeatable. S. Prereq: 465 or 565, admission to graduate program or permission of instructor. Developing plans and policies that feature ecological landscape description, planning, and resource conservation. Hands-on field experience with professional resource planners and managers. Contact hours (1-3) to (1-15) depending on number of credits.

LA 565. Landscape Change and Conservation. (Dual-listed with 465). (Cross-listed with NREM). (3-0) Cr. 3. F. Prereq: 202. Exploration of issues in landscape ecology and conservation biology relevant to landscape change, design, and planning. Examination of foundational principles and their applications across a continuum of land uses, from wilderness to urban areas.

LA 572. Landscape Architectural History and Preservation. (3-0) Cr. 3. F. Prereq: Admission to graduate program or permission of instructor. Methods applied to preservation of historic landscapes, including current federal standards and regulations. Outstanding historic landscapes and recent landscape preservation projects of varied time periods and scales used to familiarize students with methods of archaeological and documentary research. Philosophical issues of significance and interpretation, and technical concerns of treatment, management, and maintenance. Lectures, readings, discussion, and independent and group research.

LA 578. Topical Studies in Landscape Architecture. (Dual-listed with 478). (Cross-listed with Dsn S). Cr. arr. Repeatable. F.S.SS. Prereq: Senior classification or graduate standing. Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

A. Landscape Design
B. Planting Design
C. Construction
D. History/Theory/Criticism
E. Landscape Planning
F. Urban Design
G. Graphics
H. Honors
I. Interdisciplinary Studies
J. International Studies
K. Computer Applications
L. Ecological Design
M. Social/Behavioral
N. Natural Resources

L A 582. Research Colloquium. (1-0) Cr. 1. Repeatable. F. Prereq: Admission to graduate program or permission of instructor. Examination and discussion of professional practice, research in landscape architecture, and environmental planning through research and projects by faculty and graduate students in landscape architecture and related fields.

L A 591. Environmental Law and Planning. (Cross-listed with C R P Dan St.) (3-0) Cr. 3. S. S. Prereq: Graduate classification. Environmental law and policy as applied in planning at the local and state levels. Brownfields, environmental justice, water quality, air quality, wetland and floodplain management, and local government involvement in ecological protection through land use planning and other programs.

L A 599. Creative Component. Cr. arr. Repeatable. F.S.S.S. Prereq: Permission of major professor. Comprehensive study and original development of a project selected by the student and approved by the major professor. Completed project must be submitted to and approved by a graduate faculty committee as evidence of mastery of the principles of landscape architecture.

Course for graduate students, major or minor

Liberal Arts and Sciences Cross-Disciplinary Studies

Zora D. Zimmerman, Associate Dean for Academic Programs

Cross-disciplinary studies in the College of Liberal Arts and Sciences encompass a variety of interdisciplinary and cross-disciplinary areas of study as well as courses that cross established departmental lines. Students may enroll in Program courses; declare majors or minors when offered, or develop an Interdisciplinary Studies major built upon Program offerings. (See Index for Program courses).

Cross-Disciplinary Programs

African American Studies Program (Minor only) see Index, African and African American Studies

American Indian Studies Program (Minor only) see Index, American Indian Studies

Biological/Premedical Illustration Program (Major or minor) see Index, Biological/Pre-Medical Illustration

Classical Studies (Minor only) see Index, Classical Studies

Communication Studies (Major or minor) see Index, Communication Studies

Criminal Justice Studies (Minor only) see Index, Criminal Justice Studies

International Studies Program (Second major or minor) see Index, International Studies

Latino/a Studies, U.S. Program Program Director: H. Avalos U.S. Latino/a Studies is devoted to the study of Mexican Americans, Puerto Ricans, Cuban Americans and other groups of people living in the United States who trace their ancestry to the Spanish-speaking countries of Latin America, and who comprise the fastest growing ethnic groups in America. U.S. Latino/a Studies is to be distinguished from Latin American Studies, which focuses on people living in Latin America. The methodology of U.S. Latino/a Studies is cross-disciplinary, drawing from the methods established in anthropology, sociology, political science, economics, history, literary studies, and other fields. In addition to the general requirements of a major in Interdisciplinary Studies, (see Index, Interdisciplinary Studies) a major in Interdisciplinary Studies focusing on U.S. Latino/a Studies would require the completion of 24 credits. At least 15 of the 24 credits must be in courses numbered 300 and above. These 24 credits in the major focusing on U.S. Latino/a Studies must include the following courses, each of which is worth three credits: LAS 211 (Introduction to U.S. Latino/a Studies), Anthr 323 (Peoples and Cultures of Latin America), Engl 344 (U.S. Latino/a Literature), Hist 441 (History of Mexico and Central America) or a course in U.S. Latino/a history, Relig 338 (The Latino/a Religious Experience), and Soc 332 (The Latino/a Experience in U.S. Society). The student must have an average grade of C in the required courses of the major. Fulfillment of the foreign language requirement with Spanish is strongly recommended, but not required. For a list of other eligible courses and more information on the U.S. Latino/a Studies Program, contact the program committee chair.

Certificate Programs

Community Leadership and Public Service (Certificate Only) Interdisciplinary undergraduate program Dianne Bystrom, Director

This interdisciplinary certificate program utilizes university courses offered in a variety of academic disciplines to provide a strong foundation and appropriate experiences for undergraduate students who plan to become community leaders and engage in public service—regardless of their profession—in the public, nonprofit or private sectors.

The program requires the completion of 21 credits through three, three-hour core required courses in leadership, speech communication and public administration; a three-hour elective course in communication; six hours of elective courses in leadership; and a three-hour capstone experience through a course, internship or study abroad experience.

The certificate will be awarded by the College of Liberal Arts and Sciences. Completion of the certificate will be noted on the student's transcript and via a certificate provided by the Registrar.

Objectives:
• Provide opportunities for students to learn about leadership and organizational theories, ethics and decision-making, principles of public service, effective communication, and leadership practices in groups and organizations, and diversity issues.
• Develop leadership skills—including written and oral communication, creative thinking, personal management, group and organizational effectiveness, and problem-solving—important to students' careers, communities and personal development.
• Bring students into contact with faculty members from diverse academic departments, backgrounds and leadership experiences.
• Prepare students to undertake leadership roles in their careers and in service to their community through course work and co-curricular activities.

Learning outcomes:
Upon completion of the Certificate in Community Leadership and Public Service, students will:
• Demonstrate understanding of key concepts of leadership theories and effective practices within groups and organizations and diverse communities.
• Demonstrate understanding of key concepts of organizational theories, ethics and principles of public service.
• Demonstrate proficiencies in written and oral communication.
• Demonstrate awareness of cultural values and diversity issues as they pertain to community leadership and public service.
• Become engaged citizens through service to the university and larger community.
General requirements:
The Certificate in Community Leadership and Public Service requires 21 credits. At least 9 credits must be taken in courses numbered at the 300 level or above. At least 9 credits used for the certificate cannot be used to meet any other department, college or university requirement for the baccalaureate degree except to satisfy the total credit requirement for graduation and to meet credit requirements in courses numbered 300 or above. Courses for the certificate cannot be taken pass-fail. A cumulative grade point average of at least 2.0 is required in courses taken for the certificate.

The 21 credits required for the certificate are fulfilled by:

- 9 credits of core required courses—LAS 222, Leadership Styles and Strategies in a Diverse Society, 3 credits; Sp Cm 312, Business and Professional Speaking, 3 credits; and Pol S 371, Introduction to Public Administration, 3 credits.
- 3-credit communication course chosen from the designated list.
- 6 credits of leadership courses chosen from the designated list.
- 3 credits of a capstone course or experience, which can be fulfilled by a 3-credit course from the list of approved capstone courses, or a 3-credit internship with a community leadership or public service focus, or a 3-credit study abroad experience. Capstone courses focus on the scholarly and professional fields of study whereas an internship or study abroad provides a leadership-in-practice experience.

Required courses (9 credits): LAS 222, Sp Cm 312, Pol S 371.

Additional communication course (3 credits), from:
- Eng 302, 309, 412; Ji MC 305; Sp Cm 212, 322, 323, 327

Additional leadership topic courses (6 credits), from:
- AESHM 287, 289; A E/C E/E 388; AgEds 315, Con E 380; C R F 291, 293, 332, 425, 429, 435, 465, 481, 494, 491, 492; Engr 150, 327X; HD FS 395, 445; LAS/WS 333; LAS 381; M E 412; M E/Hist 488; Mgmt 371, 419, 472; Pol S 310, 311, 344, 385, 413, 477, 480, 487; Soc 310, 334, 420, 435; Sp Cm 416, 417; U St 170; W S 301, 435

Capstone Course, Internship or Study Abroad (3 credits), from:
- AESHM 421, CRP 432, 475; Engl 418; HD FS 445; LAS/WS 418; ME/WS 484; Pol S 475, Psych 450, Soc 464

Instead of a capstone course, students may complete a 3-credit internship. The internship must have a public service or community leadership focus and must be approved by the department of the student’s major and the Community Leadership and Public Service Advisory Committee. Information on internships is available through the participating colleges and departments, including career services offices. Examples: LAS 390, 392, 499G, 499H, 499L, Pol S 499; WS 491.

Instead of a capstone course or internship, students may participate in a study abroad experience that includes 3 hours of credit. The study abroad experience must include a public service or community leadership focus. It must be approved by the student’s major department and by the Community Leadership and Public Service Advisory Committee. Information is available through the ISU Study Abroad Center and international programs offices in the participating colleges and departments. Examples: International Leadership Seminar in Sydney, Australia; International Leadership in Educational Technology Academy in Spain and England; International Partnership for Service Learning and Leadership; College of Design Programs in Rome; Community and Regional Planning; LAS 395, Interdisciplinary Study Abroad Series.

Additional courses may be proposed and approved for inclusion in the list of communication, leadership and capstone courses applicable to the certificate program. Students and advisers should contact the Carrie Chapman Catt Center for Women and Politics, 309 Catt Hall, 294-3181, cattcon@iastate.edu, www.las.iastate.edu/Catt-Center/ for the current list of courses.

Application and selection process: Enrollment is limited to 20 entering students per academic year. Applications are reviewed twice each year. Selection will be based on current and past leadership experiences; previous leadership education and training; academic performance; and, most importantly, how completion of the certificate program will add value to the student’s major/minor areas of study and future leadership goals.

Applicants should meet with their adviser on course planning and questions regarding prerequisites and then submit an application packet consisting of a Application for Admission form, Leadership Involvement Worksheet, and Proposed Program of Study form (signed by the adviser) by March 1 or October 1 to the Community Leadership and Public Service Advisory Committee, 309 Catt Hall, Iowa State University, Ames, IA, 50011, 1305, The committee will be comprised of one representative each from the Catt Center, Public Policy and Administration, Speech Communication and Student Affairs and one representative from another participating department.

Latin American Studies (Certificate only) (Interdepartmental undergraduate program) Kathy S. Leonard, Director

The certificate in Latin American Studies is a cross-disciplinary course of study in the College of Liberal Arts and Sciences and is designed for undergraduates in any major who wish to enhance their degree and employment possibilities by adding expertise in Latin America and linguistic competence in a primary and secondary foreign language.

Completion of the Certificate is noted on the student’s transcript, and via a Certificate provided by the Registrar.

Objectives:

- Provide opportunities for students to develop skills and understanding about issues concerning Latin America by bringing them into contact with faculty members from many different academic backgrounds
- Provide students with an immersion experience where they gain cultural awareness and sensitivity
- Prepare students for work or advanced study in Latin America, such as in foreign service, journalism, advocacy organizations, scientific or research institutions
- Help students acquire proficiency in at least two of the languages of Latin America (Spanish and Portuguese)
- Guide students in interdisciplinary study leading to an understanding of the multifaceted picture of the past, present, and future of Latin America

Learning Outcomes:

Upon Completion of the Certificate in Latin American Studies, students will be able to:

- Demonstrate understanding of the major concepts pertaining to Latin American cultural, historical and political contexts
- Understand, interpret and articulate the major processes, theories and problems of selected contemporary and historical issues in Latin America
- Demonstrate oral, aural, and writing proficiency in a primary foreign language (Spanish or Portuguese) equivalent to the mid advanced level
- Demonstrate oral, aural, and writing proficiency in a secondary foreign language (Spanish or Portuguese) equivalent to the low Intermediate level

- Effectively communicate with persons of Latin American cultures
- Become effective global citizens through knowledge and comparison of the cultures and issues of the United States and Latin American countries
- Be able to read Latin American cultural, literary, and historical texts in the target language with comprehension and analytical insight
- Demonstrate awareness of cultural values, beliefs, and ideologies of the various Latin American countries
- Demonstrate a thorough knowledge of the geography of the Latin American countries

General Requirements:

Requirements for the Certificate in Latin American Studies are satisfied through formal language instruction and by completing a minimum of 24 credits at the 300 level or above. Students will take coursework in at least four different disciplines and departments (Spanish, Portuguese, Anthropology, and Political Science) with other possible course offerings in LAS, History, Agriculture, and Agronomy.

Course Requirements:

Students will complete 12 credits of core courses: Pol S 343, Anthr 323

(Should one of the above courses not be offered, students should consult the adviser to find an appropriate substitute)

Choice of one of the following 3-credit courses: Span 332, 333

Choice of one of the following 3-credit courses: Anthr 337, Span 324, 322

Other Requirements:

Students will complete an additional 12 credits selected from the approved list of courses in Latin American Studies at the 300 level or above. At least one of these courses must be at the 400 level and approved by the Latin American Studies Program adviser.

In order to stress the interdisciplinary aspect of the Certificate no more than three courses from one single department will count toward the Certificate.

No more than 3 credits may be taken as a 490, independent study, and the topic must deal with Latin America.

A minimum of 12 credits applied toward the Certificate cannot be used to meet any other departmental, college, or university requirement.

Students may receive credit on a pre-approved basis for internships completed in Latin America. No more than 3 credits from this area may be applied to the Certificate.

Courses taken for the Certificate may not be taken on a pass/fail basis.

Credits for a Certificate may be used to satisfy the credit requirement for graduation and to meet the credit requirements for courses numbered 300 and above.

A certificate is not awarded if the baccalaureate degree is not finished.

For students earning an ISU baccalaureate degree, a certificate is awarded concurrent with or after the ISU baccalaureate degree.

After receiving a baccalaureate degree from any accredited institution, a student may enroll at ISU to earn a certificate.

A cumulative grade point average of at least 2.0 is required in courses taken at ISU for a certificate.

Language Requirement:

The minimum requirement in formal language instruction is completion of two years or the equivalent of a primary language (Spanish or Portuguese) at the university level. At ISU the completion of 202 in the appropriate language satisfies this requirement.

Students are required to take at least one year or the equivalent of a secondary language (Spanish or Portuguese) at the university level. At ISU the completion of 102 or 112 in the appropriate language satisfies this requirement.

Native speakers, or those with in-field experience of another Latin American language with a level equivalent to 202 can have the primary language requirement waived. Equivalence will normally be assessed.
of the Connections seminars will have a joint event in conjunction with an exhibit at the Brunnier Museum entitled Shattered Earth.

A. General
B. Humanities
C. Communication.
D. Mathematics and Natural Sciences
E. Social Sciences

LAS 140. Advancing Citizenship Together Learning Community Seminar. (1-0) Cr. 1. Repeatable. Fowler. First semester of required seminar for participants in the ACT (Advancing Citizenship Together) Learning Community. Build citizenship skills with a focus on women’s issues and politics, and includes a service-learning component. Linked with Introduction to Women’s Studies and Speech Communication classes. Satisfactory-fail only.

LAS 160. Intro to Race and Ethnicity in America. (3-0) Cr. 3. Prereq: Permission of Instructor. One of two courses linked with the Multicultural Learning Community (MLC). Concepts and methods employed in understanding the social and cultural experiences of the major ethnic minority groups in the U.S. with explorations primarily of Native, African, Latino, and Asian Americans.

LAS 161. Studies in Race and Ethnicity in America. (1-0) Cr. 1. Prereq: 160. Permission of Instructor. Second of two courses linked with the Multicultural Learning Community (MLC). Application of concepts and methods to understanding the social and cultural experiences of the major ethnic minority groups in the U.S. with explorations of Native, African, Latino, and Asian.

LAS 211. Introduction to U.S. Latino/a Studies. (3-0) Cr. 3. S. A survey of the people in the United States who trace their origin to Latin America, focusing principally on Mexican Americans, Puerto Ricans, and Cuban Americans. History, history, religion, social structure, political participation, literature, and other aspects of each group within the framework of various Sociological theories of ethnic identity and relationship.

LAS 222. Leadership Styles and Strategies in a Diverse Society. (Cross-listed with W S). (3-0) Cr. 3. Prereq: Sophomore classification. Develop and practice leadership skills through understanding personal leadership styles, leadership theory and communicati- theory, including how they relate to gender issues and cultural diversity; exploring personality types, communication styles, and leadership styles, networking and developing mentoring relationships; setting goals and participating in leadership opportunities and service.

LAS 250. Cultures in Transition. (3-0) Cr. 3. An interdisciplinary introduction to a world region in a state of rapid social and cultural transition. Discussion of the history, social and political institutions, arts, economy, agriculture, and environment of the new nations.

LAS 298. Internship/Co-op. Cr. R. F.S.S. Prereq: Permission of the dean of the College of Liberal Arts and Sciences. Service work as appropriate to the student’s degree program. Academic work under faculty supervision may include written project, report, and guided reading.

LAS 498. Internship/Co-op. Cr. R. F.S.S. Prereq: Permission of the dean of the College of Liberal Arts and Sciences. Service work as appropriate to the student’s degree program. Academic work under faculty supervision may include written project, report, and guided reading.
LAS 499. Internship. Cr. arr. Repeatable. F.S.S. Prereq: Permission of Liberal Arts and Sciences Career Services. Work experience in professional setting appropriate to the student’s degree program. Academic work under faculty supervision may include written projects, reports, and guided reading.

Liberal Studies

The bachelor of liberal studies degree (B.L.S.) was established by the three Iowa Regent universities to meet the needs of Iowans who want to earn a college degree but whose circumstances present obstacles to completing a traditional on-campus degree program. The degree may be earned from Iowa State University, the University of Iowa, or the University of Northern Iowa.

The B.L.S. is a general studies degree in the liberal arts. There is no traditional major. Instead, students take coursework in three areas of distribution. These areas may be focused in a single discipline or diversified over several disciplines. With the assistance of a B.L.S. adviser, students can structure a program that meets their individual educational, vocational, or personal goals.

Up to three-fourths of the total degree requirements can be transferred from accredited institutions. Work done in community colleges or other accredited colleges and universities can be applied toward the degree, as can applicable courses taken at any of the three Iowa Regent universities, whether on or off campus.

The B.L.S. program has no residence requirements. To complete the degree, students may offer credits earned in various study formats: correspondence courses; telecourses; Saturday and evening courses; off-campus courses, including those with distance-learning formats; and regular on-campus courses. Students may also earn credits by proficiency or test-out examinations.

Admission

Admission to the B.L.S. program is open to persons who meet either of the following levels of previous educational attainment:

Hold the associate in arts (A.A.) or associate in science (A.S.) degree from an accredited two-year college. (Holders of the associate in applied science or associate in applied arts degree are not automatically eligible, although some courses may be found applicable upon review.)

Have at least 62 semester credits of collegiate work acceptable toward graduation at ISU with a total cumulative grade point average of at least 2.00 (C average).

Library

Olivia Madison, Dean of Library Sciences

Professors: Cole, Gerhard, Goedeke, Madison

Professors (Emeritus): Dobson, Galejs, Kuhn, Morris, Yates

Associate Professors: Boydston, Christian, Coffey, Gregory, Jackson, Kappmeyer, King, Kushkovich, Lawson, Leysen, Marininko, McKiernan, Parsons, Pedersen, Pellad, Shride, Stacy-Bates, Vega-Garcia, Wool, Zanish-Belcher

Associate Professors (Emeritus): Mathews, Pelzer, Wendell

Assistant Professors: Arcand, Dinkelman, Kuruppu, Lewin, Matava, McNinn, Passonneau, Seo

Assistant Professor (Emeritus): Fryer

Assistant Professor (Adjunct): Lesar

Undergraduate Study

A foundation of library instruction is the Library 160 course, which is a requirement for undergraduate graduation. Library faculty also offer course-related instruction for undergraduate students in the effective use of library resources in all fields of study. Offered F.S.S. For more information, call the Library at 294-3642.

Graduate Study

Library faculty offer course-related instruction for graduate students in the effective use of library resources. These sessions cover sources of information in all fields of study. Offered F.S.S. For more information, call the Library at 294-3642.

Courses primarily for undergraduate students

Lib 160. Library Instruction. (1-0) Cr. 0.5. F.S.S. Prereq: for students whose native language is not English: Completion of English 101 requirement. 8 week course required for undergraduate degree. Use of research libraries and information sources, including services of the University Library, with an emphasis on finding, evaluating, and using scholarly information. To be taken as early as possible in the student’s undergraduate career. See course descriptions of Eng 150 and 250 for prerequisite related to Lib 160. Satisfactory-fail only.

Linguistics

www.public.iastate.edu/~apling/Lingprog.html

(Interdepartmental Program)

Program Committee: C.A. Chapelle (Chair), K.S. Leonard, J. M. Levis, Nick Pendar, W. S. Robinson, H. Venkatagiri

Undergraduate Study

Linguistics is a cross-disciplinary program in the College of Liberal Arts and Sciences designed to meet the needs of students interested in various aspects of language—its structure, history, varieties, meanings, and uses. The program includes courses in anthropology, English, computer science, psychology, and speech communication and world languages and cultures, thus providing a multi-disciplinary approach to the study of human language.

Courses in linguistics serve as background for students interested in any career that involves working with language, such as linguistic anthropology, computational linguistics, second language studies, teaching English both as a first and as a second language, psycholinguistics, cross-cultural communication, speech-language pathology and audiology.

In the College of Liberal Arts and Sciences, courses in linguistics can be applied as electives or as part of the group requirements. They may also be used in a minor or in a major.

Majors in linguistics complete a minimum of 36 hours in linguistics with a grade of C or better in each linguistics course. Courses specifically required are Ling 119, 120, 207, 219, 220, 309, 371, 413, 420, and 437. In addition, linguistics majors must choose credits of courses from one or more of the following areas: communication disorders (Ling 275, 286, 471), computational linguistics (Ling 331, 520), second language studies (Ling 425, 486, 487, 519, 524, 525, 526), sociolinguistics and language use (Ling 305, 422, 514, 527), or psycholinguistics (351, 352, 462, 463). Additional courses on world languages are available through study abroad. Majors in linguistics must show proficiency in a foreign language equivalent to that achieved after two years of university-level study.

Minors in linguistics are individually tailored to the interests of the student, who consults with the chair of the supervisory committee for linguistics. All minors must have a minimum of 15 credits in linguistics, of which 6 must be in courses numbered over 300. All programs must include Ling 219.

Communication Proficiency requirement: The linguistics program requires grades of C+ or better in each of the following: English 150; 250 (or 250H); and one of English 305, 314, or a World Languages and Cultures 370 course; or one of Cl St 372, 373, 374, or 376.

For information about using linguistics courses in an interdisciplinary studies major, see Liberal Arts and Sciences, Cross-Disciplinary Studies.

Graduate Study

A graduate minor in linguistics is offered through a cooperative agreement with the departments and programs of Anthropology, Computer Science, English, Psychology, Speech Communication, and World Languages and Cultures. The minor permits students to investigate a variety of aspects of linguistics, emphasizing the ability to think about language in a systematic and disciplined way and to apply the methods of the field to research problems in their own disciplines.

For the master’s degree, a declared minor consists of 9 credits in linguistics including two foundation courses (511 and either 514, 527 or 537) and one elective from the list of courses approved for graduate credit. For the Ph.D. degree, the minor consists of 12 credits in linguistics including three foundation courses (511, 527, and 537) and one elective. Additional courses beyond those listed below may be used as electives. The chair of the supervisory committee can provide information about these.

At least one member of the linguistics faculty will serve on a student’s program of study committee. A list of faculty members may be obtained from the Linguistics program website. Ph.D. candidates will write one section of the preliminary examination on an area of linguistics. All students in the minor are expected to attend linguistics lectures and colloquia. Students in Teaching English as a Second Language/Appplied Linguistics are not eligible for a graduate minor in linguistics.

Courses primarily for undergraduate students

Ling 119. Introduction to World Languages. (Cross-listed with WLO). (3-0) Cr. 3. Study of language diversity and the personal, social and political effects of diversity. Language families, attitudes toward language and dialects, language and culture, multilingualism, foreign language learning, written codes, official languages, and language policy.

Ling 120. Computers and Language. (Cross-listed with Eng). (3-0) Cr. 3. Introduction to the use of linguistic knowledge in computer applications today and the basic computational techniques used in such applications. The development of these techniques throughout the history of computational linguistics. How the study of language has contributed to the advancement of technology and how certain computational problems have influenced the way linguists study language.
Ling 207. Introduction to Symbolic Logic. (Cross-listed with Phil.) (3-0) Cr. 3. S. Introduction to fundamental logical concepts and logical symbolism. Development of natural deduction through first order predicate logic with identity. Applications to arguments in ordinary language, and to philosophical issues. Majors should take Phil 207 as early as possible.

Ling 219. Introduction to Linguistics. (Cross-listed with Engl.) (3-0) Cr. 3. F. Prereq: Sophomore classification. Introduction to linguistic concepts and principles of linguistic analysis with English as the primary language. Sound and writing systems, sentence structure, vocabulary, and meaning. Issues in the study of usage, regional and social dialects, language acquisition, and language change.

Ling 220. Descriptive English Grammar. (Cross-listed with Engl.) (3-0) Cr. 3. F. Prereq: Engl 250. Overview of grammatical structures and functions. Parts of speech, sentence types, sentence structure, transformational grammar and sentence style; terminology. Not a remedial, English composition, or ESL course.

Ling 275. Introduction to Communication Disorders. (Cross-listed with CmDis). (3-0) Cr. 3. Survey of nature, causes, major communication disorders including phonological, adult and child language, voice, cleft palate, fluency, and hearing disorders.

Ling 286. Basic Sign Language. (Cross-listed with CmDis). (3-0) Cr. 3. Development of basic skills in the use and understanding of signed English, a modification of American Sign Language. Overview of the types, causes and consequences of hearing impairment, deaf culture and the education of hearing-impaired children.

Ling 305. Language, Thought and Action. (Cross-listed with Sp Cm, ComStl). (3-0) Cr. 3. F.S.S. Prereq: Engl 250. The structure of language and how meaning is conveyed in words, sentences, and utterances; discussion of modern theories of meaning, and an exploration of relationships among language, thought and action. Nonmajor graduate credit.

Ling 309. Linguistic Anthropology. (Cross-listed with Anthr.) (2-2) Cr. 3. F. Prereq: Anthr 201. Language as a human attribute; language versus animal communication; human communication in cultural context; paralanguage, kinesics, proxemics, artifacts as communication; language and culture; cross-cultural Sociolinguistics, and language policies. Participatory lab: focus on analysis of non-Western language and communication system.

Ling 331. Theory of Computing. (Cross-listed with Com S). (3-1) Cr. 3. F. Prereq: C- or higher in 228, C- or higher in Com S 330 or Cpe 210, C- or higher in Math 166, and Engl 250. Models of computation: finite state automata, pushdown automata, and Turing machines. Study of grammars and their relation to automata. Limits of digital computation, unsolvability and Church-Turing thesis. Chomsky hierarchy and relations between classes of languages. Nonmajor graduate credit.

Ling 352. Introduction to Spanish Phonology. (Cross-listed with Span). (3-0) Cr. 3. F. Prereq: Span 301, 303 or 304. An introductory study of the articulation, classification, distribution, and regional variations of the sounds of the Spanish language. Taught in Spanish. Nonmajor graduate credit.

Ling 371. Phonetics and Phonology. (Cross-listed with CmDis). (3-0) Cr. 3. Prereq: CmDis 275 or Engl 219. Analysis of speech through study of individual sounds, their variations, and relationships in context; English phonology, practice in auditory discrimination and transcription of sounds of American English; description of speech sounds in terms of their production, transmission, and perception.

Ling 413. Psychology of Language. (Cross-listed with Psych). (3-0) Cr. 3. Prereq: Psych 101. Introduc- tion to psycholinguistics. Topics may include origin of language, speech perception, language comprehen- sion, reading, bilingualism, brain bases of language, and computational modeling of language processes. Nonmajor graduate credit.

Ling 420. History of the English Language. (Cross-listed with Engl). (3-0) Cr. 3. F.S. Prereq: Engl 219. Comparison of English to other languages by family background and by type. Analysis of representative Old, Middle, Early Modern and present-day English texts, including both literary works and non-literary documents. Nonmajor graduate credit.

Ling 422. Women, Men, and the English Language. (Cross-listed with Engl, W S). (3-0) Cr. 3. Prereq: Engl 219. The ways men and women differ in using language in varied settings and the ways in which language use both recreates and reflects gender divisions. Nonmajor graduate credit.

Ling 425. Second Language Learning and Teaching. (Cross-listed with Engl). (3-0) Cr. 3. S. Prereq: Engl 219; junior classification. The process of second language learning and principles and techniques of teaching second languages. Learning and teaching in applications with emphasis on particular purposes. Current applications of technology in teaching and assessment. Nonmajor graduate credit.

Ling 437. Grammatical Analysis. (Dual-listed with 537). (3-0) Cr. 3. Prereq: Engl 220; junior classification. Theories and methods for analysis of English syntax with emphasis on recent syntactic theory.

Ling 463. Hispanic Dialectology. (Cross-listed with Span). (3-0) Cr. 3. Prereq: Spanish 352. Intensive study of the phonology, morphosyntax and lexicon of the Hispanic dialects of Spain and Latin America in their historical and current context. Taught in Spanish. Nonmajor graduate credit.

Ling 471. Language Development. (Cross-listed with CmDis). (3-0) Cr. 3. Prereq: CmDis 275 or Psych 230 or Engl 219. Development of components of language. Overview of theories and developmental processes related to each component of linguistic skill (semantics, lexicon, syntax, morphology, phonology, pragmatics). Overview of normative information available for infants, children, adolescents, and adults. Attention to metalinguistic skills and the complementarity of linguistic and paralinguistic skills. Nonmajor graduate credit.

Ling 489. Undergraduate Seminar. (Cross-listed with Engl). (3-0) Cr. 3. Repeatable. F. Prereq: 9 credits in English beyond 250. Intensive study of a selected topic in literature, criticism, rhetoric, writing, or language. Cross-listing with linguistics acceptable only when offered as a course in linguistics. Nonmajor graduate credit.

Ling 490B. Independent Study. (Cross-listed with Engl). Cr. arr. Repeatable. F.S. Prereq: 9 credits in English beyond 250 appropriate to the section taken, junior classification, permission of Undergraduate Studies Committee. Designed to meet the needs of students who wish to study areas other than those in which courses are offered, or who desire to integrate a study of literature or language with special problems in major fields.

B. Linguistics, Semantics (Engl 490B)

D. Linguistic Anthropology (Same as Anthr 490D)

Courses primarily for graduate students, open to qualified undergraduate students

Ling 500. Language and Culture. (Cross-listed with Anthr). (3-0) Cr. 3. S. Prereq: Anthr 309 or 510. Approaches to the study of the relationship between language structure, worldviews, cognition; social and structural linguistic variation; cross-cultural aspects of verbal and non-verbal communication; linguis- tic change; contemporary applications of linguistic anthropology.

Ling 511. Introduction to Linguistic Analysis. (Cross-listed with Engl). (3-0) Cr. 3. F. Prereq: Gradu- ate classification. Principles and methods of linguistic analysis with emphasis on phonology, morphology, and syntax. Description of linguistic variation and cur- rent theoretical approaches to linguistics.

Ling 512. Linguistic Change in English: Historical Analysis of Literary and Non-Literary Texts. (Cross-listed with Engl). (3-0) Cr. 3. S. Prereq: Graduate class- ification. Linguistic change in English, connections to literary and rhetorical history. Development of formal written English and its conventions. Historical survey of ideas about the English language.

Ling 514. Sociolinguistics. (Cross-listed with Engl). (3-0) Cr. 3. S. Prereq: 511 or an introductory course in linguistics. Theories and methods of examining lan- guage in its social setting. Analysis of individual char- acteristics (e.g., age, gender, ethnicity, social class, region), interactional factors (e.g., situation, topic, purpose) and national policies affecting language use.

Ling 515. Statistical Natural Language Processing. (Cross-listed with Engl, HCI). (3-0) Cr. 3. F. Prereq: Stat 330 or equivalent; recommended 219 or 511. Introduc- tion to computational techniques involving human lan- guage and speech in applications such as information retrieval and extraction, automatic text categorization, word prediction, intelligent searching, spelling and grammar checking, speech recognition and syn- thesis, statistical machine translation, n-grams, POS- tagging, word-sense disambiguation, on-line lexicons and thesauri, markup languages, corpus analysis, and Python programming language.

Ling 517. Second Language Acquisition. (Cross-listed with Engl). (3-0) Cr. 3. F. Prereq: 511 or an introductory course in linguistics. Theory, methods, and results of second language acquisition research with emphasis on approaches relevant to second language teaching.

Ling 518. Teaching English as a Second Language Methods and Practice with Engl). (3-0) Cr. 3. F. Prereq: 511 or an introductory course in linguistics. Introduction to approaches, methods, techniques, materials, curricular design, and assess- ment for various levels of ESL instruction. Attention to issues related to the teaching of listening, speaking, reading, writing, vocabulary, pronunciation, and culture.

Ling 520. Computational Analysis of English. (Cross-listed with Engl, HCI). (3-0) Cr. 3. F. Prereq: Engl 510 or 511. Concepts and practices for analysis of English by computer, with an emphasis on the applica- tions of computational analysis to problems in applied linguistics such as corpus analysis and recognition of learner language in computer-assisted learning and language assessment.

Ling 524. Literacy: Issues and Methods for Non- native Speakers of English. (Cross-listed with Engl). (3-0) Cr. Alt. S. offered 2010. Prereq: 511 or an introductory course in linguistics. Theoretical and practical issues and techniques in the teaching of...
Literacy in a variety of contexts, involving children and adults at basic skill levels and teens and adults in academic and vocational programs.

Ling 525. Methods in Teaching Listening and Speaking Skills to Nonnative Speakers of English. (Cross-listed with Eng). (3-0) Cr. 3. S. Alt., offered 2011. Prereq: S11 or an introductory course in linguistics. Theoretical and practical issues and techniques in the teaching of second language pronunciation, listening, and speaking skills. Topics will be relevant to those intending to teach in various contexts involving both K-12 and adult learners.

Ling 526. Computer-Assisted Language Learning. (Cross-listed with Eng). (3-0) Cr. 3. S. Prereq: S11 or an introductory course in linguistics. Methods and theoretical foundations for linguistic approaches to discourse analysis. Applications of discourse analysis to the study of texts in a variety of settings, including academic and research contexts.

Ling 537. Grammatical Analysis. (Dual-listed with 437). (3-0) Cr. 3. S. Prereq: S11 or an introductory course in linguistics. Explores both foundational texts in a variety of contexts, involving children and adults at basic skill levels and teens and adults in academic and vocational programs. Prereq: grad.

Ling 588. Practicum in Technology and Applied Linguistics. (Cross-listed with Eng). (1-5) Cr. 3. F.S.SS. Prereq: 510, 511, 517, 518, others depend on the topic. Topics change each semester. Topics include applied linguistic study, including experimental and quasi-experimental methods, classroom observation and research, introspective methods, elicitation techniques, case studies, interactional analysis, ethnography, and program evaluation. Computational tools and resources for linguistic research will be highlighted.

Ling 623. Research Methods in Applied Linguistics. (Cross-listed with Eng). (3-0) Cr. 3. F. Prereq: S11 or an introductory course in linguistics. Focus on theoretical and practical aspects of quantitative and qualitative approaches to applied linguistic study, including experimental and quasi-experimental methods, classroom observation and research, introspective methods, elicitation techniques, case studies, interactional analysis, ethnography, and program evaluation. Computational tools and resources for linguistic research will be highlighted.
LSCM 485. Demand Planning and Management. (Cross-listed with OSCM). (3-0) Cr. LSCM 360, OSCM 320. Demand planning process which synchronizes demand with manufacturing and distribution. Addresses linking business plans and demand forecasts both horizontally and vertically within the organization and collaboratively among supply chain partners. Forecasting, customer relationship management, sales and operations planning, customer service, distribution channels, e-fulfillment, and information systems requirements. Nonmajor graduate credit.

LSCM 486. Principles of Purchasing and Supply Management. (Cross-listed with OSCM). (3-0) Cr. LSCM 360, OSCM 320. Sourcing strategies, concepts, tools and dynamics in the context of the integrated supply chain. Make or buy decision, supplier evaluation and selection, global sourcing, the total cost of ownership, contracts and legal terms, negotiation, purchasing ethics, and information systems requirements. Nonmajor graduate credit.

LSCM 487. Strategic Supply Chain Management. (Cross-listed with OSCM). (3-0) Cr. Prereq: LSCM 460 or OSCM 422 or OSCM 424; LSCM 485 or LSCM 486. Capstone course in supply chain management. Integrating and applying the theories, concepts, and methods covered in the prerequisite courses through the use of readings, case studies, projects, and industry speakers. Nonmajor graduate credit.

Mgmt 310. Entrepreneurship and Innovation. (3-0) Cr. 3. F.S. Prereq: Sophomore classification. Review of the entrepreneurial process with emphasis on starting a new business. How to analyze opportunities, develop an innovative product, organize, finance, market, launch, and manage a new venture. Deals with the role of the entrepreneur and the importance of a business plan. Speakers and field project.

Mgmt 313. Feasibility Analysis and Business Planning. (3-0) Cr. 3. S. Prereq: 310 and Entrepreneurship Minor or Management Major. Developing an idea for a new business venture, conducting a feasibility study, researching the potential market, analyzing the competition, and writing a formal business plan. Basic business functions are discussed in terms of their application to conducting feasibility analysis and writing a business plan for an entrepreneurial venture.

Mgmt 370. Management of Organizations. (3-0) Cr. 3. F.S.SS. Prereq: Econ 101 or 102 or equivalent. A management functions approach is used to explain what managers do in organizations; how they deal with external constituents, how they structure their companies, and how they deal with employees. A contingency approach is used as a framework for understanding how to increase the effectiveness and efficiency of organizations in today’s dynamic, highly competitive business environment.

Mgmt 371. Organizational Behavior. (3-0) Cr. 3. F.S. Prereq: 370. The study of individual attributes, interpersonal relations, and employee attitudes in organizations. Instructional emphasis is placed on how management concepts such as reward systems, job design, leadership, teams, etc., can be used to manage employee attitudes and behavior.

Mgmt 377. Competitive Strategy. (3-0) Cr. 3. F. Prereq: Econ 101 and junior classification. Developing competitive strategy and achieving competitive advantage in firms, including: industry analysis, generic strategies, hypercompetition, competing against time, and building distinctive capabilities.

Mgmt 414. International Management. (3-0) Cr. 3. F. The nature and economic role of the multinational firm and entrepreneurial ventures, including the impact of legal, political, and cultural variables upon firm performance and managerial activity; case studies illustrate interdependent nature of functional areas of credit projected across national boundaries. Nonmajor graduate credit.

Mgmt 415. Managing New Ventures. (3-0) Cr. 3. F.S. Prereq: 370; Mkt 340; Fin 301; LSCM 360, OSCM 320. Examination of business problems and issues in new and growing firms. Emphasis is on analyzing existing businesses. Includes a field project. Nonmajor graduate credit.

Mgmt 419. Social Responsibility of Business. (3-0) Cr. 3. S. A consideration of the role of business in Society. Critical analysis of ethical, managerial, and public issues as they affect the corporation.

Mgmt 471. Personnel and Human Resource Management. (3-0) Cr. 3. F.S. Prereq: Junior standing. Recruitment and selection, utilization, and development of people in organizations. Examination of each personnel function; interrelationships among the functions.

Mgmt 472. Management of Diversity. (3-0) Cr. 3. F.S. Prereq: Junior classification. One of the most crucial problems in organizations today is the management of diversity. Attempts to define the difference between equal employment opportunity/affirmative action, which has a legal basis, and diversity which has an educational basis. Organized around the concepts of: (1) cultural diversity and cultural unity; (2) development of skills and tools to manage diversity; and (3) structure of diversity development programs in organizations. Nonmajor graduate credit.

Mgmt 478. Strategic Management. (3-0) Cr. 3. F.S.SS. Prereq: 370; OSCM 320; Fin 301; Mkt 340; LSCM 360; Acct 285, graduating senior. Strategy formulation, implementation, and evaluation and control in today’s organizations. Emphasis is on strategic planning and decision making using the case method and/or projects.

Courses primarily for graduate students, open to qualified undergraduate students

The department offers graduate courses under the heading of Supply Chain Management. These courses include SCM 601, 602, 603, 604, 605, 650, 651, and 699. For descriptions of these courses, see Supply Chain Management.

Management

Thomas Chacko, Chair of Department
University Professors: McElroy, Morro Shadrer
Professors: Chacko, Van Auken, Werbel
Professor Emeritus: Hunger
Associate Professors: Blackburn, Demarie, Herrmann, Johnson
Associate Professor Emeritus: Atchison
Assistant Professors: Anderson, Schwab, Zhang
Senior Lecturer: Elston, R. Smith
Lecturer: Mullen
Mgmt 507. Organizational Behavior. (2-0) Cr. 2. F.
Prereq: Graduate classification. Understanding human behavior in organizations and the nature of organiza-
tions from a managerial perspective. Special empha-
sis is placed on how individual differences, such as perceptions, personality, and motivation, influence individual and group behavior in organizations and on how behavior can be influenced by job design, leader-
ship, groups, and the structure of organizations.

Mgmt 511. Ethics and Social Responsibility. (1-0) Cr. 1. S.
Prereq: Graduate classification. The ethical issues, moral dilemmas, and stakeholder responsibilities em-
bodied by today’s corporate decision makers. The morality of current management models and practices. Corporate governance and control, moral reasoning in groups, whistleblowing, employee safety, truth in advertising, environmental pollution, plant closings, insider trading, employee rights.

Mgmt 512. Strategic Management. (2-0) Cr. 2. S.

Mgmt 565. Technology Transfer and Feasibility Analysis. (3-0) Cr. 3. Prereq: Graduate classification. Commercialization of new technology. Topics covered include market analysis, intellectual property, product development, feasibility analysis, and new business evaluation.

Mgmt 566. Entrepreneurship and New Business Creation. (3-0) Cr. 3. Prereq: Graduate classification or permission of instructor. The essentials of starting and operating a new business. Topics include current research on entrepreneurial perspective, starting and developing a new business, financing the venture, managing the growing firm, and special issues.

Mgmt 567. International Entrepreneurship. (3-0) Cr. 3. Essentials of operating an entrepreneurial firm in an international environment. Topics include international entrepreneurship, starting and develop-
ing a business in an international market, financing international ventures, international management issues, exchange rates, and culture.

Mgmt 570. Managing Employee Attitudes and Behav-
iors. (3-0) Cr. 3. F.S.S. Prereq: 371 or 507 or Psych 450. Advanced topics germane to the management of individual differences and group work lives: sustained work commitment, motivation and job career satisfac-
tion, absenteeism, turnover, stress, leadership and career development (e.g., career ladders, mentoring).

Mgmt 571. Seminar in Personnel and Human
Resources Management. (3-0) Cr. 3. S. Prereq: 507 or Soc 420. Topics and issues in personnel management with a focus on the management of human resources in organizations. Current personnel practices, Philosophies, and behavioral science research.

Mgmt 575. Compensation Management. (3-0) Cr. 3. F.
Prereq: 571. Concepts, techniques, and issues dealing
with remuneration of the work force. The impact of government legislation as well as organizational and
Societal issues.

Mgmt 581. Strategic Planning and Environmental
Analysis. (3-0) Cr. 3. F. Prereq: 501 or permission of in-
tstructor. Discussion of concepts and techniques used in long range strategic planning. Examination of planning practices in business and not-for-profit organizations. Topics include environmental scanning, industry analysis, forecasting, corporate and competi-
tive strategies, and tactics.

Mgmt 582. Corporate Governance and Leadership.
(Cross-listed with Acct.) (3-0) Cr. 3. Prereq: 502 or per-
mission. Examination of top managers and corporate boards of directors in terms of roles, responsibilities and tasks. Examination of corporate governance structure and functioning. Topics include CEO tenure and compensation, board monitoring and composi-
tion, board responsibility and accountability, board structure and performance, CEO and board roles in strategic management, shareholder and stakeholder representation, corporate social responsibility, ethics and corporate governance, international governance, and executive leadership style.

Mgmt 583. Strategic Management of Innovation. (3-0) Cr. 3. Prereq: 501 or permission of instructor. Critical analysis of cases focused on strategic management of innovation. Assessment of a firm’s innovative capabilities and competitive dynamics to manage innovative processes. Practical applications through emphasis on implementation including internal corporate venturing, management of the corporate R&D function, and institutionalization of innovation.

Mgmt 584. Management Consulting. (3-0) Cr. 3.
Prereq: 501 or permission of instructor. Provides the opportunity for students to understand the role of the professional in consulting as facing the strategic management consulting industry, the competencies of various management consulting firms, the nature and form of strategic consulting engagements, and the nature and scope of strategic change in business firms. Students will learn about management consult-
ing functions and will practice the consultant role though cases and field studies.

Mgmt 590. Special Topics. Cr. art. Repeatable. F.S.SS. Prereq: Permission of instructor. For students wishing to do individual research in a particular area of management.

Courses for graduate students

Mgmt 601. Philosophy of Science. (3-0) Cr. 3.
Prereq: enrollment in the PhD program. This course provides a Philosophical introduction to the theoretical and empirical development of scientific knowledge. It focuses on a variety of basic problems common to the social sciences: the nature of explanation, the structure of theories, forms of knowledge, scientific laws, nature of theory and ethics. The purpose of the course is to help doctoral students define a research context by addressing the purposes, assumptions and primary components of scientific inquiry.

Mgmt 602. Organizational Theory. (3-0) Cr. 3.
Prereq: enrollment in the PhD program. This seminar involves the examination of the core theories and perspectives in organizational theory, as well as their applications and extensions. This material addresses the fundamental rationale for organizations in modern society, basic processes of organizing and organiza-
tional structure, a consideration of interorganizational relationships and the external environment, and a variety of factors that help determine organizational effectiveness.

Mgmt 603. Strategic Management of Technology
and Innovation. (3-0) Cr. 3. Prereq: Mgmt 501. This course offers a critical review of organizational decision making with respect to technology and inno-
vation. Students will learn how technological change can alter the basis of competition; how competitive strategy drives technology investment decisions; how market orientation could be the other backbone of technological innovation; and best practices of orga-
izing and managing the new product development process to achieve strategic goals.

Mgmt 604. Seminar in Organizational Behavior. (3-0) Cr. 3. Prereq: enrollment in the PhD program. The purpose of this seminar is to introduce behavioral science literature relevant to the study of behavior in organizational settings. The course will focus on the individual’s role within organizations and cover topics such as individual differences, motivation, leadership, decision-making, learning, risk taking, interpersonal relations, etc. Both theoretical and empirical contribu-
tions will be examined, with emphasis on integration of diverse theoretical perspectives.

Mgmt 650. Research Practicum I. (1-0) Cr. 1.
Prereq: enrollment in the PhD program. Preparation of a re-
search manuscript type report to be submitted to a peer-reviewed academic journal. Students will work with a faculty mentor on a research project.

Mgmt 651. Research Practicum. (1-0) Cr. 1. Prereq: enrollment in the PhD program. Preparation of a second research manuscript to be submitted to a peer-reviewed academic journal. Although students work under the supervision of a faculty mentor, the students will take independent responsibility for the research project.

Management Information Systems

(Administered by the Department of Logistics, Op-
erations and Management Information Systems)

Richard Poist, Chair of Department
Distinguished Professor (Emeritus): Baumen
Professors: Crum, Poist, Walter
Professors (Emeritus): Thompson, Voorhees
Associate Professors: Blackhurst, Johnson, Mennecke, Montabon, Nilakanta, Ruben, Suzuki, Tiwana, Townsend, Zhu
Assistant Professors: Jiang, Martens, Scheibe
Instructor (Adjunct): Choobineh
Lecturer: Helmer

Undergraduate Study

For undergraduate curriculum in business, major in management information systems, (MIS) see College of Business, Curricula.

The MIS Program is designed to provide students with a strong educational foundation that prepares them as information system (IS) professionals. The academic program consists of a specially designed curriculum that develops conceptual, analytical, technical and interpersonal skills. The major offers students comprehensive training in the application, use and management of information systems to prepare them to provide effective information services and support to organizations. The coursework is designed to provide the technical and conceptual skills associated with the use of information technology in business organizations. The program will: impart knowledge on existing and emerging information technologies and their impact on the IS function; train students to critically analyze business processes, identify inefficiencies and problems, assess information requirements, create business solutions and technical specifications for the supporting system; provide expertise in design and develop database applications using the latest database technologies; provide expertise in the latest telecommunication technologies; train in interpersonal and communication skills to effectively interact with various information systems’ clients; and provide managerial skills to manage IS projects.

The MIS major requires students to take seven courses. The required courses are: MIS 331, 432, 433, 435, and 438. In addition they will take two courses from an approved list. These courses are designed to provide the conceptual, technical, and management skills necessary to design and develop systems in organizations

The department also offers a minor for non-
Management Information Systems majors in the College of Business. The minor requires 15 credits from an approved list of courses, of which 9 credits must stand alone. The 15 credits must include either MIS 423 or 433. Students with declared majors have priority over students with declared minors in courses with space constraints.
MIS 330. Management Information Systems. (3-0) Prereq: Com S 207. The role of information technology in organizations. Overview of methodologies for design and development of systems including decision support systems, expert systems, data bases, end-user computing, etc. Computer applications relate concepts to practice. Lecture and laboratory work emphasizes the enabling role of IT in contemporary organizations.

MIS 331. File Structures and Programming. (3-0) Prereq: Credit or enrollment in Com S 207. Introduction to the concepts and use of data structures, file accesses and object oriented programming methodologies in contemporary business environments. Application development environments will be covered.

MIS 432. Information Systems for Managerial Decision Making. (3-0) Cr. 3. Prereq: MIS 330. Design development, modeling, and implementation of critical business processes that support global managerial decision making. Transforming and enhancing student understanding of business information systems. Topics include relational and/or object oriented databases, business intelligence, data mining, and knowledge management sources to develop alternative plans and comprehensive solutions to common business problems. Designed to complement a range of student business majors. Students will build a variety of business models, analyze case studies, and propose solutions to real world situations. Only one of MIS 423 or 433 may count towards graduation. Nonmajor graduate credit.

MIS 431. Software Development in Contemporary Languages. (3-0) Cr. 3. Prereq: MIS 331. Advanced software development and topics in contemporary programming languages. Topics include basic syntax, advanced programming techniques, file structures and management, database access, algorithm design, web forms and graphical user interfaces.

MIS 433. Database Management Systems. (3-0) Cr. 3. Prereq: Credit or enrollment in 331. Database design and development. Focus on data models, both classical and object oriented. Uses relational and/or object oriented database management systems. Only one of MIS 423 and 433 may count towards graduation. Nonmajor graduate credit.

MIS 435. Business Telecommunications. (3-0) Cr. 3. Prereq: 330. Overview of Internet and telecommunications technology used in business applications. Understand Internet and network protocols, network and application architectures, design, and implementation. Nonmajor graduate credit.

MIS 437. Project Management. (3-0) Cr. 3. Equips students with practical activities in the general project management environment and better manage their careers. Practical experience using project management techniques and tools. Course topics include project initiation and execution, risk assessment, estimating and contracts, planning, human factors, and standard methods. Nonmajor graduate credit.

MIS 438. Information Systems Development. (3-0) Cr. 3. Prereq: 432, 433, credit or enrollment in 435. Design of business systems using contemporary tools and methods such as SQL, CASE tools, OOD tools, etc. Focuses on synthesizing concepts from earlier MIS courses. Nonmajor graduate credit.

MIS 439. Topics in Management of Information Systems. (3-0) Cr. 3. Repeatable. Prereq: 330, permission of instructor. A variety of topics will be covered and topics may vary between semesters. Some of the topics are information resources management, electronic commerce, decision support systems, and expert systems.

MIS 440. Supply Chain Information Systems. (Cross-listed with LSCM, OSCM). (3-0) Cr. 3. Prereq: MIS 330, OSCM 320, LSCM 360. Internal and inter-organizational information systems necessary for a supply chain environment. Topics include: design, development, implementation and maintenance of supply chain information systems; enterprise resource planning; advanced planning and scheduling, manufacturing execution systems; and the interface between manufacturing planning and control processes, logistics processes, and the information system.

MIS 445. Advanced Data Communication. (3-0) Cr. 3. Prereq: 436. Contemporary theories, concepts, and practices in network infrastructure, network design, and information security. Design, install, and administer a complex network infrastructure. Study security threats and attacks and countermeasures. Investigate exposure to attacks, firewalls, and development of intrusion detection systems. Other security topics such as risk management, IT audit, and security regulations will also be addressed.

Courses primarily for graduate students, open to qualified undergraduate students

MIS 503. Management Information Systems. (2-0) Cr. 2. Prereq: Graduate classification. Current theories and practices of information processing and decision making. Focus on information technology and its uses in improving work practices, products, and tools for decision support. Use of artificial intelligence and other developments in technology. Competitive pressures and risks of information technology (IT). Setting IT strategy, information system planning and development of enterprise architecture. Focus on systems development and implementation.

MIS 531. Business Intelligence and Software. (3-0) Cr. 3. Prereq: 502. Focus on IT-enabled business intelligence systems. Conceptualize, design, and implement software applications that transform data into intelligence.

MIS 532. Advanced Business Software Development. (3-0) Cr. 3. Prereq: 531 or equivalent. A survey of business-oriented programming languages with emphasis on state-of-the-art development techniques for business software. Topics include object-oriented and Internet programming issues and methods.

MIS 533. Data Management for Decision Makers. (Cross-listed with Acct. (3-0) Cr. 3. Prereq: 503. Addresses data needs of functions such as marketing, finance, and production. Advanced skills needed to design, develop and use database, data warehousing and data mining systems for effective decision support. Emphasis on importance of contemporary technologies.

MIS 534. Electronic Commerce. (3-0) Cr. 3. Prereq: 502. Overview of how modern communication technologies including the internet and world wide web have revolutionized the way we do business. Provides an understanding of various internet technologies and how companies are using the internet for commercial purposes. Explores future use of these technologies and their impact on various industries and the Society.

MIS 535. Telecommunications Management. (3-0) Cr. 3. Prereq: 502. Issues involved in the management of telecommunications function. Overview of communications technology used in various business applications, local area network, wide area network, broadband network, wireless and voice networks. Internet technologies and protocols. Analyzing the strategic impact of these technologies on organizations. Strategic planning of telecommunications communications, including network planning and analysis.

MIS 537. Information Resource Management. (3-0) Cr. 3. Prereq: 503. Information Resource Management (IRM) is a popular concept of viewing information systems resources from a strategic resource perspective. Discuss the IRM concept as well as provide pragmatic tools for implementing this approach within the organization. Topics will include: IS outsourcing, total cost of ownership, IS planning and strategic analysis, justification for IT investment, management of IT human resources, traditional project management theory, and project management techniques derived from the Theory of Constraints (TOC).

MIS 538. Business Process Systems. (3-0) Cr. 3. Prereq: 503. Examine current and historical perspectives on business process management. Topics include
process identification, mapping, and improvement. Additional topics will address business process automation and integration, business process outsourcing. Investigate current and potential tools and methods for business process management. Include process management projects.

MIS 539, Topics in Management of Information Systems, (3-0) Cr. 3. Repeatable. Prereq: 503. A variety of topics may be offered in different semesters. Topics may include electronic commerce, information resources management, decision support systems, and expert systems.

MIS 590, Special Topics. Cr. arr. Repeatable. Prereq: Permission of instructor. For students wishing to do individual research in a particular area of MIS.

MIS 598, Research Seminar in Management Information Systems, (3-0) Cr. 3. Prereq: Graduate classification. Examines issues such as the nature and content of information systems research; aspects of starting and pursuing research topics in information systems; exploring and understanding relevant research methods and tools. Develop preliminary research proposals.

MIS 599, Creative Component. Cr. 3. Prereq: Graduate classification, permission of supervisory committee chair. Preparation and writing of creative component.

Courses for graduate students,

MIS 601, Behavioral Issues in IS Research, (3-0) Cr. 3. Prereq: MIS 503 or equivalent, enrollment in PhD program. The state of behavioral research in the IS function. MIS activities in an organization span the following three major areas: design and implementation of the MIS, use of the MIS, and management of the MIS function. Each of these processes is carried out at several levels: individual, group, organizational, and inter-organizational. Identify behavioral issues of relevance for the cells defined by the process and level dimensions. Reading and discussion of the research literature surrounding the development, use, and implications of information technology.

MIS 602, Current Issues in IS Research, (3-0) Prereq: MIS 503 or equivalent, enrollment in PhD program. Three fundamental areas of information Systems, namely, infrastructure, management, and processes. Infrastructure studies examine the IT architecture including computing, communication, data, and application. Management focuses on addressing the value added notion of IT. Finally processing addresses topics related to enabling role of IT in myriad of areas.

MIS 603, Seminar on IT Strategy and Structure, (3-0) Cr. 3. Prereq: MIS 503 or equivalent. Strategic issues in IT management. Address issues such as aligning IT strategy with corporate strategy and functional strategies, IT structure, valuation, governance and control, and related topics. Provide students with research skills related to the boundary between IT and the firm’s external environment.

MIS 604, Collaboration, Knowledge, and Intelligence in Organizations, (3-0) Cr. 3. Prereq: MIS 601. Research issues in the emerging areas of collaboration, knowledge management, and enterprise intelligence. Topics will include emerging and contemporary technologies of Data Mining, Knowledge Discovery from Databases, Web Mining, organizational memory, and knowledge management.

MIS 650, Research Practicum I, (1-0) Cr. 1. Prereq: enrollment in the PhD program. Preparation of a research manuscript to be submitted to a peer-reviewed academic journal. Students will work with a faculty mentor on a research project.

MIS 651, Research Practicum II, (1-0) Cr. 1. Prereq: enrollment in the PhD program. Preparation of a second research manuscript to be submitted to a peer-reviewed academic journal. Although students work under the supervision of a faculty mentor, the students will take independent responsibility for the research project.

MIS 655, Organizational and Social Implications of Human Computer Interaction, (Cross-listed with HCI). (3-0) Cr. 3. Prereq: Graduate classification. Examine opportunities and implications of information technologies and human computer interaction on social and organizational systems. Explore ethical and social issues appurtenant to human computer interaction, both from a prescriptive and descriptive perspective. Develop informed perspective on human computer interaction. Implications on research and development programs.

MIS 699, Research, Cr. arr. Repeatable. Prereq: Graduate classification, permission of dissertation supervisor. Research.

Marketing

Thomas Chacko, Chair of Department
Distinguished Professor (Emeritus): Teas
Professors: Agarwal, Lackniak, Ramaswami
Professors (Emeritus): Zober
Associate Professors: Kim, Palan, Wong
Assistant Professors: Brocato, Raju, Roy, Smarandescu, Walker
Lecturer: Folger

Undergraduate Study

For undergraduate curriculum in business, major in marketing, see College of Business, Curriculum.

The Department of Marketing offers a major in marketing. Students will complete the general education requirements (including business foundation courses), and business core requirements for the bachelor of science (B.S.) degree and 18 credits in the major.

Marketing is concerned with management decisions that deal with the satisfaction of customer needs and wants in the purchase and use of goods and services. The primary decision areas in marketing involve the identification of market segments and decisions dealing with product design, pricing, promotion (including personal selling and marketing communications), and distribution. A major in marketing prepares the student for careers in selling and sales management, marketing research, marketing management, retail management, marketing communications, promotion management, and/or international marketing. Each area of study may be applied to consumer, business-to-business, and/or services marketing environments in business and nonprofit organizations.

The instructional objective of the Marketing department is to provide knowledge of the marketing process and an understanding of its functions. The students are expected to develop decision-making skills, computational skills, and communication skills with appreciation for global marketplace and ethical concerns. In addition to the basic business foundation and core courses, marketing majors are required to complete 18 credits of marketing or department approved courses. Included in these 18 credits are three required courses: Mkt 443, 444, and 447.

The department also offers a minor for non-Marketing majors in the College of Business. The minor requires 15 credits from an approved list of courses, of which 9 credits must stand alone. Students with declared minors have priority over students with declared minors in courses with space constraints.

Graduate Study

The Department of Marketing participates in the following graduate programs: the M.S. in Business, the M.B.A. full-time and part-time programs, and the Ph.D. program in Business and Technology. The M.S. in business is a 30-credit curriculum culminating in a thesis or creative component. The M.B.A. program is a 48-credit, nonthesis, noncreative-component curriculum. Twenty four of the 48 credits are core courses and the remaining 24 are graduate electives. Within the M.B.A. program, students may develop an area of specialization in marketing. This specialization requires that 12 of the 24 credits of graduate electives be from marketing.

The Ph.D. program in Business and Technology with a Customer Management (CM) major is a 56 credit (minimum) curriculum designed around four inter-related areas—Core, CM major, Minor, and Research Methods—and dissertation. The focus of the CM major will be on customer management issues—selection of target customers, design of individualized customer programs, maximizing satisfaction, loyalty and retention and getting the maximum ROI out of customer investments.

Courses primarily for undergraduate students

Mkt 340, Principles of Marketing, (3-0) Cr. 3. F.S.S. Prereq: credit or current enrollment in Econ 101. The role of marketing in Society including marketing institutions, and marketing functions with emphases on product, price, marketing communication, and marketing channel decisions.

Mkt 343, Personal Sales, (3-0) Cr. 3. Prereq: 340. Analysis of the theory and practice of personal selling with the context of relationship marketing and sales force automation. Topics include: goal setting, prospecting, time/territory management, questioning, presentations, objections, commitment and customer service; simulations of selling situations.

Mkt 410, Promotional Strategy, (3-0) Cr. 3. F.S. Prereq: Credit or enrollment in 447 Principles, concepts, and problems involved in the development and implementation of promotional strategies. Coordination of a variety of promotional elements: advertising, sales promotion, direct marketing, public relations and publicity of web communications, and personal selling. Nonmajor graduate credit.

Mkt 442, Sales Management, (3-0) Cr. 3. F.S. Prereq: 440. Functional aspects of sales force management, personal selling methods; procedures for recruiting, selecting, and training new salespeople; compensation and expense control systems; problems of sales force motivation and supervision; methods of territorial and quota assignment; sales department budgets; distributor-dealer relations; other selected topics. Nonmajor graduate credit.

Mkt 443, Strategic Marketing Management, (3-0) Cr. 3. F.S. Prereq: 444, 447 Analysis of major elements of strategic marketing management. May include case studies or business simulations involving decision making using marketing tools from previous courses. (For marketing majors only.)

Mkt 444, Fundamentals of Marketing Research, (3-0) Cr. 3. F.S. Prereq: 340. Stat 226. Marketing research techniques: problem formulation, research design, questionnaire construction, sampling, data collection procedures, and analysis and interpretation of data related to marketing decisions. Nonmajor graduate credit.

Mkt 446, Retailing, (3-0) Cr. 3. F.S. Prereq: 340. Basic areas of retail management: buying, merchandising, retail promotion, store location, store layout, credit management, inventory control. Emphasis on practical application of retail management principles.

Mkt 448. Fundamentals of International Marketing. (3-0) Cr. 3. F. Prereq: 340. Introduction to terms used in international marketing and sources of information on international markets. Development of sensitivity toward foreign business environment and familiarity with operations of multinational corporations. Nonmajor graduate credit.

Mkt 449. Marketing Seminar. (3-0) Cr. 3. Prereq: 340. Analysis of current issues and problems in marketing with emphasis on new theoretical and methodological approaches and research. Additional seminars may be offered. Nonmajor graduate credit.

Mkt 451. Marketing Channels. (3-0) Cr. 3. F. S. Prereq: 340. Focuses on marketing channels, the downstream part of a value chain, companies that come together to bring products and services from their point of origin to the point of consumption. Topics include channel institutions, channel design, channel coordination and implementation. Highlights international and technological aspects of marketing channels so that students can Successfully develop and manage marketing channels in a contemporary business environment.

Mkt 453. Brand Management. (3-0) Cr. 3. F. S. Prereq: 447. Examines the role of brands and branding in market environments characterized by intense competition and consumer power. Covers issues relating to why brands are important to firms, what brands represent to consumers, and what should be done to manage them effectively.

Mkt 492. Comparative Marketing. (3-0) Cr. 3. S. S. Prereq: 340. Provides experience to students in culture, social, economic, and political environment of marketing in a foreign country. Students complete a term project (e.g., a marketing plan) based on information collected in the foreign country. Students attend briefings by experts/oficials of private and public organizations. Nonmajor graduate credit.

Courses primarily for graduate students, open to qualified undergraduate students

Mkt 504. Marketing. (2-0) Cr. 2. Prereq: Graduate classification. The scope of marketing and the identification and assessment of marketing opportunities. Consumer behavior and decision making process, organizational buyer behavior, and the role of research in the marketing planning process. Market definition and analysis, segmentation, competitor analysis, targeting and strategic decisions involved in developing the marketing program. Developing marketing mix strategies and relating them to the overall strategic marketing plan. Organizational design for marketing strategy implementation and control, and effectiveness.

Mkt 540. Marketing Management. (3-0) Cr. 3. F. S. Prereq: 504. Strategic marketing and decision making, with emphasis on cases utilizing qualitative and quantitative techniques and marketing models.

Mkt 541. International Marketing. (3-0) Cr. 3. F. Prereq: 504, 509. Scope and nature of global marketing operation; the context of international environment in which firms operate. Recent developments of international business activities, and a framework for better understanding of the basic forces driving international business and marketing operations. Development of market entry strategies and global marketing mix policies, as well as export operations. Organizational issues related to the globalization of the firm.

Mkt 542. New Product Development and Marketing. (3-0) Cr. 3. S. Prereq: 504. Principles and concepts of new product development and introduction; decision areas include market definition and structure, idea generation, concept evaluation, test marketing, launch tracking, and global product planning; models and techniques of new product evaluation used by consumer product companies.

Mkt 543. Marketing Research. (3-0) Cr. 3. S. Prereq: 504, Stat 328 or 401. Marketing research methods are examined with emphasis on the use of advanced research methods in business research. Application of advanced sampling, measurement, and data analysis methods in research on market segmentation, market structure, consumers’ perceptions and decision processes, marketing communication, new product development, and pricing.

Mkt 545. Integrated Marketing Communication. (3-0) Cr. 3. Prereq: 504. Introduces the student to the field of marketing communications. Covers a number of topics and areas essential for understanding how to design and evaluate communication strategies necessary for the successful marketing of products and services. An integrated marketing communications (IMC) perspective is employed in covering material, with a corresponding focus on various elements of an IMC strategy, including advertising, promotions, point-of-purchase communications, direct marketing techniques, and other topics.

Mkt 547. Consumer Behavior. (3-0) Cr. 3. S. Prereq: 504. The behavior of consumers. Intensive review of literature from relevant disciplines. Applications of concepts and methods of the behavioral sciences to marketing management decision making.

Mkt 549. Global Marketing Planning and Execution. (3-0) Cr. 3. Prereq: 501, 504, 509. Allows students to develop the ability to plan and execute a B2B business by integrating aspects of marketing with other business functions in the international context. Product strategy, innovation, foreign market entry, supply strategies for foreign markets, pricing strategy, market research, customer service, international operations, managing international subsidiaries, licensing, distribution strategy, and responding to changing international environmental conditions. Involves a simulation-based instruction in planning and managing an international B2B business.

Mkt 590. Special Topics. Cr. arr. Repeatable. Prereq: Permission of instructor. For students wishing to do individual research in a particular area of marketing.

Courses for graduate students

Mkt 601. Seminar in Consumer Behavior. (3-0) Cr. 3. Prereq: Mgmt 601. A rigorous foundation of the major conceptual and methodological paradigms in the consumer behavior literature. Seeks to aid students in understanding the psychological, sociological, and anthropological roots of consumer behavior research. Read the latest research in the area reported in leading consumer behavior/psychology journals.

Mkt 602. Marketing Strategy. (3-0) Cr. 3. Prereq: Mgmt 601. Review major contributions and recent developments in marketing strategy research and practice. Review commonly used modeling approaches and research methods to study strategic interaction between firms seeking to build competitive advantages. Provide an overview of empirical research regarding measurement, level and persistence of business success and implications of findings for theory and strategy development.

Mkt 603. Customer Management Strategy and Implementation. (3-0) Cr. 3. Prereq: Mkt 601. Addresses key strategy and implementation issues behind customer management. Topics such as typology of CRM strategies, antecedents and outcomes, environmental and managerial influences on customer information technology and impact on CM strategy; and value of CM strategy. Examine theories and concepts behind important CM issues such as customer satisfaction, customer loyalty and customer profitability.

Mkt 604. Marketing Issues in Inter-Organizational Relations. (3-0) Cr. 3. Prereq: Mgmt 602. Inter-firm and network competition; relationship among suppliers, distributors, alliance partners, external employees, and internal employees. Theories including agency theory, network theory, relationship marketing, channels of distribution theories on cooperation versus competition, IO5 theories.

Mkt 644. Research Methods. (3-0) Cr. 3. Prereq: Knowledge of introductory Statistics, Stat 401, enrollment in the PhD program. Introduction to methodological issues that arise when addressing a wide variety of research questions in organizational and consumer studies. Address measurement issues (scales, reliability and construct validity), design (for experiments, surveys, or qualitative studies), sampling, and analysis (univariate and multivariate Statistical procedures). Measurement issues in cross-cultural and international research will also be covered. It is assumed that students entering the course have knowledge of introductory Statistics.

Mkt 650. Research Practicum I. (1-0) Cr. 1. Prereq: enrollment in the PhD program. Preparation of a research manuscript to be submitted to a peer-reviewed academic journal. Students will work with a faculty mentor on a research project.

Mkt 651. Research Practicum II. (1-0) Cr. 1. Prereq: enrollment in the PhD program. Preparation of a second research manuscript to be submitted to a peer-reviewed academic journal. Although students work under the supervision of a faculty mentor, the students will take independent responsibility for the research project.

Materials Engineering

(Administered by the Department of Materials Science and Engineering)

Richard Lesar, Chair of Department

Distinguished Professors: Gschneidner, Pecharsky, Thié, Thompson, Trivedi

Distinguished Professors (Emeritus): Verhoeven

University Professors: S. Martin

Professors: Akinc, Chumbley, Genalo, Gleeson, King, Lesar, Levitas, Mallapragada, Rajan, Russell, Shechtman

Professors (Emeritus): Larsen, D. Martin, McGee, Patterson, J. Smith, Weichsler, Wilder

Professors (Adjunct): Anderson, McCullam

Professors (Collaborators): Jiles, Tsukruk

Associate Professors: Bowler, K. Constant, Napoli, Tano, X. Tan, Ustundag

Associate Professors (Adjunct): Athreya, Biner, Kramer

Assistant Professors: Beckman, Chaudhary, Hong, Kessler, Lin

Assistant Professors (Adjunct): Selby

Lecturer: A. Constant, M. Martin

2009-2011
Undergraduate Study

For the undergraduate curriculum in materials engineering leading to the degree of bachelor of science, see College of Engineering, Curriculum. This curriculum is accredited by the Accreditation Board for Engineering and Technology, Inc. (ABET). Materials engineering is a broad-based discipline relating the composition, structure, properties, environment, and processes of materials to their uses and uses. Materials engineering includes a variety of traditional and modern technologies involving metals, ceramics, polymers, composites, and electronic materials. Because of its interdisciplinary nature, career opportunities for materials engineers bridge all industrial and government sectors including: materials-based technologies (materials production), communication/information technologies (semiconducting materials, fiber optics), medical/environmental technologies (biomedical, energy production, waste containment), nanotechnologies consumer products (building and construction, durable goods), and transportation industries (automotive, aerospace).

The objectives of the materials engineering program are to produce graduates who

- practice materials engineering in a broad range of industries including materials production, semiconductors, medical/environmental, consumer products, and transportation products
- respond to environmental, social, political, ethical and economic constraints to improve the quality of life in Iowa and the world
- work independently and in teams and are proficient in written, oral and graphical communication
- engage in lifelong learning in response to the rapidly expanding knowledge base and changing environment of our world
- engage in advanced study in materials and related or complementary fields.

Graduates in materials engineering are able to apply scientific and engineering principles to select or design the best materials to solve engineering problems. They are also able to control the microstructure of materials through processing to optimize properties and performance. They are skilled in creative, independent problem solving under time and resource constraints. Graduates will have gained experience in materials engineering practice through cooperative work experience or internships in industry, national laboratories, or other funded research work. They will have hands-on skills with a broad range of modern materials processing and characterization equipment and methods.

A degree in materials engineering relies on a strong foundation of math, chemistry, and physics. The core materials courses include fundamentals of materials, kinetics and thermodynamics, mechanico-chemical properties, computational methods, design, and professional practice experience. Students tailor their programs to their professional interests and goals through the selection of two areas of specialization from the four available: ceramic materials, electronic materials, metallic materials, and polymeric materials. In lieu of the second specialty from the four listed, a student may propose an individualized designed, materials-related technical specialty to meet specific career goals. Students must have a 3.00 GPA and a B- in Mat E 215. Students may learn other requirements and procedures for applying in the Undergraduate Handbook or by speaking with their adviser. Approval of this proposal rests with the department chairman. Additional technical electives can be taken in other areas of interest. The breadth and depth of the program provide excellent preparation for both immediate entry into industry or further study in graduate school.

The department also offers a cooperative education program that combines classroom learning with work experience. (See College of Engineering Cooperative Programs).

Well qualified juniors in materials engineering who are interested in graduate study may apply for concurrent enrollment during their senior year in the Graduate College to simultaneously pursue both bachelor of science and master of science degrees. See Materials Science and Engineering for more information.

Courses Primarily for undergraduate students

Mat E 201. Materials Science and Engineering - Professional Planning. Cr. R. F. Prereq: Sophomore classification in Mat E. Preparation for a career in materials engineering: experiential learning, resumes, interviewing, Myers-Briggs Type Indicator, leadership, undergraduate research, internships, alternative career paths. Satisfactory-fail only.

Mat E 215. Introduction to Materials Science and Engineering I. (3-0) Cr. 3. F. Prereq: Chem 177 or 167. Materials Engineering majors only. Structure and properties of metallic, ceramic, electronic, polymeric, and metallic materials, emphasizing differences based on structure and bonding. Phase equilibria and phase transformations. Only one of Mat E 215, 272, or 392 may count toward graduation.

Mat E 298. Cooperative Education. Cr. R. F.S.S. Prereq: Permission of department and Engineering Career Services. First professional work period in the cooperative work experience program in the third year. Must register for this course before commencing work.

Mat E 332. Semiconductor Materials and Devices. (Cross-listed with E E). (3-0) Cr. 3. S. Prereq: Phys 222, and for Mat E majors only Mat E 334. Introduction to semiconductor material and device physics. Quantum mechanics and band theory of semiconductors. Charge carrier distributions, generation/recombination, transport properties. Physical and electrical properties and fabrication of semiconductor devices such as MOSFETs, bipolar transistors, laser diodes and LED’s. Nonmajor graduate credit.

Mat E 351. Introduction to Polymeric Materials. (3-0) Cr. 3. S. Prereq: 216. Introduction to polymeric materials, synthesis, structures, and properties. Relationship between polymer composition, processing and properties. Nonmajor graduate credit.
Mat E 362. Principles of Nondestructive Testing. (Cross-listed with E M). (3-0) Cr. 3. S. Prereq: Phys 112 or 222. Radiography, ultrasonic testing, magnetic particle inspection, eddy current testing, dye penetrant inspection, and other techniques. Physical bases of tests; material limitations, types of defects detectable; calibration standards, and reliability safety precautions. Nonmajor graduate credit.

Mat E 362L. Nondestructive Testing Laboratory. (Cross-listed with E M). (0-3) Cr. 1. S. Prereq: Credit or enrollment in 362. Application of nondestructive testing techniques and sizing of flaws in materials and to the characterization of material's microstructure. Includes are experiments in hardness, dye penetrant, magnetic particle, x-ray, ultrasonic and eddy current testing. Field trips to industrial laboratories. Nonmajor graduate credit.

Mat E 370. Toying with Technology. (Cross-listed with Cpr E). (2-2) Cr. 3. F.S. Prereq: C 1201, junior standing in non-engineering major. A project-based, hands-on learning course. Technology literacy, appreciation for technological innovations, principles behind many technological innovations, hands-on laboratory experiences based upon simple systems constructed out of LEGO's and controlled by small microcomputers. Future K-12 teachers will leave the course with complete lesson plans for use in their upcoming careers.

Mat E 388. Sustainable Engineering and International Development. (Cross-listed with A E, C E, E E, M E). (2-2) Cr. 3. F. Prereq: Junior classification in engineering. Multi-disciplinary approach to sustainable engineering and international development, sustainable development, appropriate design and engineering, feasibility analysis, international aid, business development, politics and philosophy of technology, and ethics in engineering. Engineering-based projects from problem formulation through implementation. Interactions with partner community organizations or international partners such as nongovernment organizations (NGOs). Course readings, final project/design report.

Mat E 391. Introduction to US Women's roles in Industry and Preparation for Summer Study. (3-0) Cr. 3. S. S. Introduction to the historical role of women as related to US industry, family and community with emphasis on the years 1830 - 1945, but also related to the current climate. Topics completed in 392 with arranged lectures at Brunel University. Orientation for Brunel summer study program. Credit for graduate credit only upon completion of Mat E 392. Satisfactory-fail only.

Mat E 392. Principles of Materials Science and Engineering. (3-0) Cr. 3. S. Prereq: Prereq: 391, Chem 167 or 177 Structure and properties of ceramic, electronic, polymeric and metallic materials, emphasizing differences based on structure and bonding, phase equilibria and phase transformations. Taught on Brunel University campus. Only one of Mat E 215, 272, or 392 may count toward graduation. Satisfactory-fail only.

Mat E 397. Engineering Internship. Cr. R. Repeatable. S. Prereq: Permission of department and Engineering Career Services; junior classification. Professional work period, one semester maximum per academic year.

Mat E 398. Cooperative Education. Cr. R. F.S.S.S. Prereq: 298, permission of department and Engineering Career Services. Second professional work period in the cooperative education program. Students must register for this course before commencing work.

Mat E 413. Materials Design and Professional Practice I. (2-1) Cr. 3. F. Prereq: Senior Status in Mat E. Fundamentals of materials engineering design, information sources, team behavior, professional preparation, quantitative design including finite-element method, optimization and selection, informatics and combinatorial methods. Analysis of design problems, development of solutions, selected case studies. Oral presentation skills. Preparations for spring project.

Mat E 414. Materials Design and Professional Practice II. (2-1) Cr. 3. Prereq: Senior Status in Mat E. Integration of materials processing, structure/property, composition and performance principles in materials engineering problems. Multi-scale design of materials, materials processing, case studies including cost analysis, ethics, risk and safety. Team projects specified by either industry or academic partners. Written and oral final project reports.

Mat E 442. Polymers and Polymer Engineering. (Cross-listed with Ch E). (3-0) Cr. 3. S. Prereq: Ch E 382 and Chem 331 or Mat E 351. Chemistry of polymers, addition polymerization, physical and mechanical properties, polymer rheology, production methods. Applications of polymers in the chemical industry. Nonmajor graduate credit.

Mat E 444. Corrosion and Failure Analysis. (2-2) Cr. 3. S. Prereq: 216 and credit or enrollment in 418. Corrosion and corrosion control of metallic systems. Corrosion fundamentals, classification of different types of metallic corrosion, corrosion properties of various engineering alloys. Failure analysis. Characteristics of common types of metallic failures, case studies of failures, designing to reduce failure risk. Nonmajor graduate credit.

Mat E 454. Polymer Composites and Processing. (Dual-listed with M S E 554). (3-0) Cr. 3. Prereq: 351. Basic concepts in polymer composites, blends, and block copolymers. Phase separation and miscibility, microstructures and mechanical behavior. Fiber reinforced and laminated composites. Viscosity, rheology, viscoelasticity of polymers. Polymer melt processing methods such as injection molding and extrusion, selection of suitable processing methods and their applications. Nonmajor graduate credit.

Mat E 456. Biomaterials. (Dual-listed with M S E 555). (3-0) Cr. 3. S. Prereq: 216 or 272 or 292. Presentation of the basic chemical and physical properties of biomaterials, including metals, ceramics, and polymers, as they are related to their manipulation by the engineer for incorporation into living systems. Role of microstructure properties in the choice of biomaterials and design of artificial organs, implants, and prostheses.

Mat E 466. Multidisciplinary Engineering Design. (Cross-listed with A E, Aer E, Cpr E, E E, Engr E, I E, M E). (1-4) Cr. 3. Repeatable. F.S. Prereq: Student must be within two semesters of graduation and receive permission of the instructor. Application of team design concepts to projects of a multidisciplinary nature. Concurrent treatment of design, manufacturing and life cycle considerations. Application of design tools such as CAD, CAM, and FEM. Design methodologies, project scheduling, cost estimating, quality control, manufacturing processes. Development of a prototype and appropriate documentation in the form of written reports, diagrams, computer models and engineering drawings.

Mat E 490. Independent Study. Cr. arr. Repeatable. Investigation of individual research or special topics.

Mat E 498. Cooperative Education. Cr. R. Repeatable. F.S.S.S. Prereq: 398, permission of department and Engineer and Career Services. Third and subsequent professional work period, as part of the cooperative education program. Students must register for this course before commencing work.

Materials Engineering 2009-2011
Materials Science and Engineering

Richard Lesar, Chair of Department

Distinguished Professors: Gschenneider, Pecharsky, Thiel, Thompson, Trivedi

Distinguished Professor (Emeritus): Verhoeven

University Professor: S. Martin

Professors: Akinc, Chumbley, Genalo, Gleeson, King, Lesar, Levitas, Mallapragada, Rajan, Russell, Shechtman

Professors (Emeritus): D. Martin, McGee, Patterson, J. Smith, Wechsler, Wilder

Professors (Adjunct): Anderson, McCullam

Professors (Collaborators): Jiles, Tsukruk

Associate Professors: Bowler, Constant, Napolitano, X. Tan, Ustundag

Associate Professors (Adjunct): Athreya, Biner, Kramer

Assistant Professors: Beckman, Chaudhary, Hong, Kessler, Lin

Assistant Professors (Adjunct): Selby

Lecturer: A. Constant, M. Martin

Graduate Study

The department offers work toward the following advanced degrees: Master of Science in Materials Science and Engineering and Doctor of Philosophy in Materials Science and Engineering.

Built on a foundation of thermodynamics, kinetics of phase transformations, mechanical behavior, physical properties, solid state science, and the structure and chemistry of materials, the graduate program offers advanced studies in many areas of materials science and engineering, including the design and control of materials for structural, electronic, photonic, magnetic, optical, and biological functionality. Graduates of the program have a fundamental understanding of the critical aspects of the field and how they are applied to real materials systems. The program is highly flexible and research-oriented, where students work carefully with their major professor in tailoring the various academic and research components to meet their interests.

With the ability to address complex problems in materials science while considering the various constraints inherent to both academic and industrial environments, our graduates are well prepared for a wide range of academic and research-related careers. They are skilled in carrying out independent and collaborative research, able to communicate effectively in formal and informal settings, and are proficient at writing persuasive technical articles and grant proposals.

The department boasts excellent facilities for academic materials research, maintaining a wide range of faculty laboratories across the ISU campus. In addition, departmental research is highly integrated with the operation of several Research Centers, such as the Ames Laboratory, the Center for Nondestructive Evaluation, the Microelectronics Research Center, and the Center for Advanced Technology Development. These laboratories offer excellent resources and opportunities for graduate student research.

Prerequisite to major graduate work is completion of an undergraduate curriculum in physical science, biological science, or engineering discipline. Graduate students from disciplines other than materials science and engineering may expect that supplemental coursework will be needed, in addition to the required graduate coursework. Well qualified students (juniors) enrolled in the undergraduate materials engineering program at Iowa State University can apply to the Graduate College for admission to the concurrent enrollment program, where students may simultaneously pursue both master of science and bachelor of sciences degrees.

The requirements for the M.S. and Ph.D. degrees are established by the student’s program of study committee within the established guidelines of the Graduate College. Minimum requirements include coursework, research, proposal, preliminary oral examination (Ph.D. only), dissertation, and a final oral examination. Academic coursework requirements include 18 credits for the M.S. degree and 24 credits for the Ph.D., with additional specific rules for choices available from the department.

There are no foreign language requirements for either of the graduate degrees administered by the Department of Materials Science and Engineering. Graduate students wishing to declare a formal minor in materials science and engineering will have at least one materials science and engineering faculty member serving on their program of study committee. For the M.S. and Ph.D. degrees, they will take a minimum of 8 and 12 materials science and engineering course credits, respectively.

Courses primarily for graduate students, open to qualified undergraduate students

M S E 520. Thermodynamics and Kinetics in Multicomponent Materials. (3-0) Cr. 3. F. Prereq: Mat E 311 or Chem 321, Math 266 or Math 267. A review of the fundamental principles of heat, work, basic thermodynamic relations, and criteria for equilibrium. Analytical treatments for the thermodynamic description of multicomponent chemical solutions and reacting systems are developed and employed to predict phase equilibria in materials systems. Builds on thermodynamic and kinetic concepts to treat kinetic models of chemical reactions and phase transformations. Topics include general first order and second order reactions transitions, along with chemical diffusion. Detailed examples involving nucleation and diffusion limited growth, spinodal decomposition, martensitic transformations, magnetic and electric transitions, and glass formation will be considered.

M S E 564. Fracture and Fatigue. (Cross-listed with E M E, M E.) (3-0) Cr. 3. F. Pre req: E M 324 and either Mat E 216 or 272 or 392. Undergraduates: Permission of instructor. Materials and mechanics approach to fracture and fatigue. Fracture mechanics, brittle and ductile fracture, fracture toughness, fatigue characteristics, fracture of thin films and layered structures. Fracture and fatigue tests, mechanics and materials designed to avoid fracture or fatigue.

M S E 570. Tying With Technology for Practicing Teachers. (Cross-listed with C I I. ) (2-0) Cr. 2. SS. Pre req: C I 201, non-engineering major. A project-based, hands-on learning course. Technology literacy, appreciation for technological innovations, principles behind many technological innovations, hands-on experiences based upon simple systems constructed out of LEGO's and controlled by small microcomputers. Other technological advances with K-12 applications will be explored. K-12 teachers will leave the course with complete lesson plans for use in their classrooms.

Courses primarily for graduate students

M S E 610. Academic Teaching Practices. (2-0) Cr. 2. Repeatable. F.S. Pre req: Permission of instructor. Provides instruction and directed experience in undergraduate level teaching practices. Students engage in lesson planning, classroom/laboratory teaching, course assessment, web-based lessons, and other aspects of academic course delivery.

M S E 697. Engineering Internship. Cr. R. Repeatable. F.S.SS. Pre req: Permission of department, graduate classification. One semester and one summer maximum per academic year professional work period. Satisfactory-fail only.

Mathematics

www.math.iastate.edu

Wolfgang Kliemann, Chair of Department

Distinguished Professors: Athreya, Levine

Distinguished Professors (Emeritus): R. Miller, Vinograd

University Professor (Emeritus): Cornette

Professors (Emeritus): Barnes, Cain, Carlson, Colwell, Fink, Gauetesen, Horner, Mathews, Pigozzi, Rudolph, Sanderson, Seifert, A. Steiner, E. Steiner, Tondra, Weiss, Wright

Professor (Collaborator): Driessel

Associate Professors: Alexander, Axenovich, D'Alessandro, Davidson, Hansen, Keinert, Ng, Poon, S. Song, Tidrini, J. Wilson

Associate Professor (Emeritus): Heimes

Associate Professor (Collaborator): Ashlock

Assistant Professors: Boshhaba, Long, R. Martin, Matzavinos, Su, Weber, Yan

Assistant Professor (Emeritus): Peake

Senior Lecturers: Bolles, G. Johnston

Lecturers: Allen, Chan, Diesslin, Ellis, Gaalswyk, B. Hall, Kramer, Pan, Roettger, Schultz, Wagner

Undergraduate Study

For the undergraduate curriculum in liberal arts and sciences, major in mathematics, leading to the degree bachelor of science, see Liberal Arts and Sciences, Curriculum. The program in mathematics offers training suitable for students planning to enter secondary school teaching, to work in mathematics and computation for industry or government, or to continue their studies in graduate school. The requirements for an undergraduate major in mathematics are designed so that the student may have opportunity for appropriate specialization to meet one or more of the foregoing objectives and, at the same time, obtain a thorough introduction to the mathematics underlying all of them. Graduates understand a broad range of mathematical topics and are familiar with a broad range of mathematical models. They have skills for solving problems in diverse situations. They can construct rigorous arguments to demonstrate mathematical facts. They can communicate their mathematical methods to others and can justify their assumptions.

The requirements for an undergraduate major include:

(a) Math 185, 166, 201, 265, 317, 301, 414, and either 266 or 267.

(b) 15 additional credits in mathematics courses at the 300 level or above.

(c) The courses used to satisfy a) and b) above must include one of the sequences 301, 302, 414, 415, 435, 436.

(d) In addition to the credits in b), either Math 492 or 2 credits of C I/LAS 480C. (C I/LAS 480C is available only for students seeking secondary school certification).

(e) Communication Proficieny requirement: The department requires a grade of C- or better in each of English 150 and 250 (or 250H) and an upper-level communication skills requirement that may be met by writing an acceptable undergraduate thesis (Math 491) or by taking at least one of Engl 302, 305, 314 or J I MC 201. A grade of C- or better is required.

The department strongly recommends that each student majoring in mathematics include in the program substantial supporting work beyond the minimum general education requirement of the college in one or more areas of application of mathematics, such as other mathematical sciences, engineering, or social science. In particular, it recommends that each student take Com S 207, 208; Phys 221, 222; and Stat 341, 342 (or Math 304). It also recommends that students contemplating graduate study in mathematics acquire a reading knowledge of French, German, or Russian. Credits earned in Mat 104, 105, 140, 141, 150, 151, 160, 181, 182, 195, 196, cannot be counted toward graduation by mathematics majors.

The department offers a minor in mathematics which may be earned by credit in Math 201, 265, (266 or 267), (307 or 317), and 301.

Graduate Study

The department offers programs leading to a master of science or doctor of philosophy degree in mathematics or applied mathematics, as well as minor work for students whose major is in another department. The department also offers a program leading to the degree of master of school mathematics (M.S.M.). Students desiring to undertake graduate work leading to the M.S. or Ph.D. degree should have at least 12 semester credits of work in mathematics beyond calculus. It is desirable that these credits include advanced calculus and abstract algebra.

The M.S. degree requires at least 30 credits and students must write a creative component or thesis and pass a comprehensive oral examination over their coursework and their creative component or thesis. See the department handbook for specific requirements.

The Ph.D. degree requires a student to take 54 hours of coursework in addition to research hours, pass written qualifying examinations, pass an oral preliminary exam, and perform an original research project culminating in a dissertation.
Math 142. Trigonometry and Analytic Geometry. (2-1) Cr. 3. F.S.SS. Prereq: Satisfactory performance on placement exam, 2 years of high school algebra, 1 year of high school geometry, or enrollment in 140. May be taken concurrently with 140. Trigonometric functions and their inverses, solving trigonometric identities and equations, graphing, polar coordinates, complex numbers, standard equations of lines and conic sections, parametric equations. Students in the College of Liberal Arts and Sciences may not count Math 140, 141, 142, or 195 toward Group III of the General Education Requirements. Only one of Math 141, 142 may count toward graduation.

Math 150. Discrete Mathematics for Business and Social Sciences. (2-1) Cr. 3. F.S.SS. Prereq: Satisfactory performance on placement exam, 2 years of high school algebra, 1 year of high school geometry. Linear equations and inequalities, matrix algebra, linear programming, discrete probability. Either Math 104 or 150 may be counted toward graduation, but not both.

Math 151. Calculus for Business and Social Sciences. (2-1) Cr. 3. F.S.SS. Prereq: Satisfactory performance on placement exam, 2 years of high school algebra, 1 year of high school geometry. Mathematical applications with emphasis on their mathematical topics selected from graphs, networks, matrices, expected value. Either Math 104 or 150 may be counted toward graduation, but not both.

Math 150. Discrete Mathematics for Business and Social Sciences. (2-1) Cr. 3. F.S.SS. Prereq: Satisfactory performance on placement exam, 2 years of high school algebra, 1 year of high school geometry. Linear equations and inequalities, matrix algebra, linear programming, discrete probability. Either Math 104 or 150 may be counted toward graduation, but not both.

Math 160. Survey of Calculus. (4-0) Cr. 4. F.S.SS. Prereq: Satisfactory performance on placement exam, 2 years of high school algebra, 1 year of geometry. Analytic geometry and calculus, derivatives of polynomial, rational, exponential, and logarithmic expressions, and inverses. Additional material of a theoretical, computational, or modeling nature. Some of the work may require more ingenuity than is required in Math 265. Preference will be given to students in the University Honors Program.

Math 266. Discrete Mathematics for Business and Social Sciences. (2-1) Cr. 3. F.S.SS. Prereq: Grade of C- or better in 160 or 166H. Analytic geometry and vectors, differential calculus of functions of several variables, multiple integrals, vector calculus. Additional material of a theoretical, computational, or modeling nature. Some of the work may require more ingenuity than is required in Math 265. Preference will be given to students in the University Honors Program.

Math 151. Calculus for Business and Social Sciences. (2-1) Cr. 3. F.S.SS. Prereq: Satisfactory performance on placement exam, 2 years of high school algebra, 1 year of high school geometry. Mathematical applications with emphasis on their mathematical topics selected from graphs, networks, matrices, expected value. Either Math 104 or 150 may be counted toward graduation, but not both.

Math 150. Discrete Mathematics for Business and Social Sciences. (2-1) Cr. 3. F.S.SS. Prereq: Satisfactory performance on placement exam, 2 years of high school algebra, 1 year of high school geometry. Linear equations and inequalities, matrix algebra, linear programming, discrete probability. Either Math 104 or 150 may be counted toward graduation, but not both.

Math 160. Survey of Calculus. (4-0) Cr. 4. F.S.SS. Prereq: Satisfactory performance on placement exam, 2 years of high school algebra, 1 year of geometry. Analytic geometry and calculus, derivatives of polynomial, rational, exponential, and logarithmic expressions, and inverses. Additional material of a theoretical, computational, or modeling nature. Some of the work may require more ingenuity than is required in Math 265. Preference will be given to students in the University Honors Program.

Math 266. Discrete Mathematics for Business and Social Sciences. (2-1) Cr. 3. F.S.SS. Prereq: Grade of C- or better in 160 or 166H. Analytic geometry and vectors, differential calculus of functions of several variables, multiple integrals, vector calculus. Additional material of a theoretical, computational, or modeling nature. Some of the work may require more ingenuity than is required in Math 265. Preference will be given to students in the University Honors Program.
Math 304. Introductory Combinatorics. (3-0) Cr. 3. F. Prereq: 166 or 166H. 201 or experience with proofs. Permutations, combinations, binomial coefficients, inclusion-exclusion principle, recurrence relations, generating functions. Additional topics selected from probability, random walks, and Markov chains. Nonmajor graduate credit.

Math 314. Graphs and Networks. (3-0) Cr. 3. S.S. Prereq: 166 or 166H. 201 or experience with proofs. Structure and external properties of graphs. Topics are selected from: trees, networks, colorings, paths and cycles, connectivity, planarity, Ramsey theory, forbidden structures, enumeration, applications. Nonmajor graduate credit.

Math 317. Theory of Linear Algebra. (4-0) Cr. 4. S.S. Prereq: 166; credit or enrollment in 201. Systems of linear equations, determinants, vector spaces, inner product spaces, linear transformations, eigenvalues and eigenvectors. Emphasis on writing proofs and results. Only one of Math 307, 317 may be counted toward graduation. Nonmajor graduate credit.

Math 342. Introduction to the Theory of Probability and Statistics II. (Cross-listed with Stat) (3-0) Cr. 3. S. Prereq: Stat 341; Math 307 or 317. Transformations of random variables; sampling distributions; confidence intervals and hypothesis testing; theory of estimation; maximum likelihood; linear model theory, enumerative data; use of the R statistical package for simulation and data analysis.

Math 350. Number Theory. (Cross-listed with Com S). (3-0) Cr. 3. S. Prereq: 166. Divisibility, integer representations, primes and divisors, linear diophantine equations, congruences, and multiplicative functions. Applications to cryptography. Nonmajor graduate credit.

Math 365. Complex Variables with Applications. (3-0) Cr. 3. S. Prereq. 265. Functions of a complex variable, including differentiation, integration and series expansions, residues, evaluation of integrals, conformal mapping. Nonmajor graduate credit.

Math 373. Introduction to Scientific Computation. (3-0) Cr. 3. S. Prereq: matrix and graphics programming in MATLAB for scientific applications. Algorithms for interpolation, systems of linear equations, least squares, nonlinear equations and optimization in one and several variables. Additional topics may include ordinary differential equations, symbolic calculation and the Fast Fourier Transform. Emphasis on effective use of mathematical software, and understanding of its strengths and limitations. Nonmajor graduate credit.

Math 397. Teaching Secondary Mathematics Using University Mathematics. (2-2) Cr. 3. S. Prereq: 201. Coursework in university mathematics including calculus, abstract algebra, discrete mathematics, geometry, and other topics as it relates to teaching mathematics in grades 7-12. Nonmajor graduate credit.

Math 398. Cooperative Education. Cr. R. Repeatable. F.S.S. Prereq. Permission of the department cooperative education coordinator; junior classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Math 415. Analysis II. (3-0) Cr. 3. S. Prereq: 414. Sequences and series of functions of a real variable, uniform convergence, power series and Taylor series, Fourier series, topology of n-dimensional space, implicit function theorem, calculus of the plane and 3-dimensional space. Additional topics may include metric spaces or Stieljes or Lebesgue integration. Nonmajor graduate credit.

Math 421. Logic for Mathematics and Computer Science. (3-0) Cr. 3. S. Prereq: Math 303 or 307 or Com S 330. Propositional and predicate logic. Topics selected from Horn logic, equational logic, resolution and unification, foundations of logic programming, reasoning about programs. Proof verification, model checking and binary decision diagrams, temporal logic and modal logic. Nonmajor graduate credit.

Math 435. Geometry I. (3-0) Cr. 3. F. Prereq. 307 or 317 or Euclidean geometry. Points, lines, circles, triangles, congruence, similarity, properties invariant under transformations, linear coordinates, metric axioms. Nonmajor graduate credit.

Math 436. Geometry II. (3-0) Cr. 3. S. Prereq: 435. Continuation of Euclidean geometry with topics from elliptic, projective, or hyperbolic geometry. Emphasis on analytic methods. Nonmajor graduate credit.

Math 489. History of Mathematics. (3-0) Cr. 3. S. Prereq: 8 credits in mathematics at the 300 level or above. Recommended credit or enrollment in 301, 414 or 435. History of mathematical ideas found in the undergraduate curriculum. It includes a discussion of the historical and cultural settings in which these ideas arose, and the influence of the culture on the type of mathematical ideas that developed. Some of the particular cultures and their mathematics that are studied include: Babylonian and Ancient Egyptian, Ancient Greek, Arabic, Indian, Western European and Chinese. Nonmajor graduate credit.

Math 490. Independent Study. Cr. arr. Repeatable. Prereq: 301 or 317; 6 credits in mathematics. No more than 9 credits of Math 490 may be counted toward graduation. H. Honors.

Math 491. Undergraduate Thesis. Cr. arr. Writing a formal mathematics paper. Upon approval by the department, the paper will satisfy the departmental advanced English requirement.

Math 492. Undergraduate Seminar. (2-0) Cr. 2. S. Prereq: Consent of instructor. Introduction to mathematics research, a participating seminar on advanced topics in mathematics. Mathematical literature search, reading a mathematical article with the guidance of the instructor, mathematical presentation. Seminar content varies.

Math 498. Cooperative Education. Cr. R. Repeatable. F.S.S. Prereq. Permission of the department cooperative education coordinator; senior classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Courses primarily for graduate students, open to qualified undergraduate students

Math 504. Abstract Algebra I. (3-0) Cr. 3. F. Prereq: 302. Algebraic systems and their morphisms, including groups, rings, modules, and fields.

Math 505. Abstract Algebra II. (3-0) Cr. 3. S. Prereq: 504. Continuation of Math 504.

Math 510. Linear Algebra. (3-0) Cr. 3. F. Prereq: 307 or 317. Advanced topics in linear algebra including canonical forms; unitary, normal, Hermitian and positive-definite matrices; variational characterizations of eigenvalues, and applications to other branches of mathematics.

Math 511. Functions of a Single Complex Variable. (3-0) Cr. 3. S. Prereq: 414 or 465 or 501. Theory of analytic functions, integration, topology of the extended complex plane, singularities and residue theory, maximum principle.

Math 517. Finite Difference Methods. (3-0) Cr. 3. S. Prereq: 461 or 503. Difference methods for partial differential equations, with emphasis on parabolic and hyperbolic equations, and other partial differential equations from application areas. Topics include convergence, stability and implementation issues.

Math 520. Methods of Applied Mathematics II. (3-0) Cr. 3. S. Prereq: 519. Continuation of Math 519.

Math 525. Numerical Analysis of High Performance Computing. (Cross-listed with Com S, Cpr E). (3-0) Cr. Math 301 or Cpr E 310 or Com S 330. Basic concepts of secure communication, DES and AES, public-key cryptosystems, elliptic curves, hash algorithms, digital signatures, applications. Relevant material on number theory and finite fields.

Math 535. Steganography and Watermarking. (Cross-listed with Cpr E, InfAa). (3-0) Cr. 3. S. Prereq: Cpr E 308, or one of Math 471, 481; experience in scientific programming; knowledge of FORTRAN or C. Development, analysis, and testing of efficient numerical methods for use on current state-of-the-art high performance computers. Applications of the methods to the students' areas of research.

Math 533. Cryptography. (Cross-listed with Cpr E, InfAa). (3-0) Cr. 3. S. Prereq: Cpr E 310 or one of Math 471, 481; experience in scientific programming; knowledge of FORTRAN or C. Development, analysis, and testing of efficient numerical methods for use on current state-of-the-art high performance computers. Applications of the methods to the students' areas of research.

Math 547. Discrete Mathematics and Applications. (4-0) Cr. 3. Prereq: Enrollment in the master of school mathematics program. Offered on a 3-year cycle, offered SS. 2009. Further development of the fundamental concepts of calculus and their applications with an emphasis on a constructivist approach to learning, cooperative groups, problem solving, the use of technology.

Math 546. Algorithms in Analysis and Their Computer Implementation. (2-2) Cr. 3. Prereq: 3 semesters in calculus or concurrent enrollment in 545 and enrollment in the master of school mathematics program. Offered on a 3-year cycle, offered SS. 2010. The use of technological tools with an emphasis on the exploration and implementation of algorithms.

Math 547. Discrete Mathematics and Applications. (4-0) Cr. 3. Prereq: Enrollment in the master of school mathematics program. Offered on a 3-year cycle, offered SS. 2009. Further development of the fundamental concepts of calculus and their applications with an emphasis on a constructivist approach to learning, cooperative groups, problem solving, the use of technology.

Math 549. Intermediate Geometry. (3-0) Cr. 3. Prereq: 435 or equivalent and enrollment in the master of school mathematics program. Offered on a 3-year cycle, offered SS. 2009. A study of geometry with emphasis on metrics, the group of isometries, the group of similarities, and the affine group. Specific spaces studied normally include the Euclidean plane, the 2-sphere, and projective 2-space. Emphasis on analytical methods.

Math 554. Introduction to Stochastic Processes. (Cross-listed with Stat). (3-0) Cr. 3. F. Prereq: Stat 542. Markov chains on discrete spaces in discrete and continuous time (random walks, Poisson processes, birth and death processes) and their long-term behavior. Optional topics may include branching processes, renewal theory, introduction to Brownian motion.

Math 557. Ordinary Differential Equations I. (3-0) Cr. 3. F. Prereq: 415 or 465 or 501. The initial-value problem, existence and uniqueness theorems, continuous dependence on parameters, linear systems, stability and asymptotic behavior of solutions, linearization, topics from dynamical systems and two-point boundary-value problems.

Math 590. Special Topics. Cr. arr. Repeatable.

Math 597. Introductory Computational Structural Biology. (Cross-listed with BCB). (3-0) Cr. 3. S. Prereq: 561 and 562. Mathematical and computational approaches to protein structure prediction and determination. Topics include molecular distance geometry, potential energy minimization, and molecular dynamics simulation.

Math 599. Creative Component. Cr. arr.

Courses for graduate students

Math 607 Modern (Structural) Graph Theory. (3-0) Cr. 3. Alt. F., offered 2009. Prereq: 504 or permission of instructor. Structural and extremal theory of graphs. Topics include basic structures (trees, paths and cycles), networks, coloring, connectivity, topological graph theory, Ramsey theory, forbidden graphs and minors, introduction to random graphs, applications.

Math 610. Seminar. Cr. arr.

Math 621. Topology. (3-0) Cr. 3. Alt. F., offered 2010. Prereq: Permission of instructor. Introduction to general topology. Topological spaces, continuous functions, compactness. Topics selected from countability and separation axioms, metrizability, and complete metric spaces.

Math 646. Mathematical Modeling of Complex Physical Systems. (3-0) Cr. 3. S. Prereq: Permission of instructor. Modeling of the dynamics of complex systems on multiple scales: Classical and dissipative molecular dynamics, stochastic modeling and Monte Carlo simulation; macroscopic nonlinear-dynamics and pattern formation.

Math 666. Finite Element Methods. (3-0) Cr. 3. F. Prereq: 503 or 516 or 520 or 566. Elements of functional analysis, Sobolev spaces: variational principles and weak formulations; approximation theory in finite element spaces; analysis of finite element methods; implementation issues; applications.

A. Algebra
B. Functional Analysis
C. Control Theory
D. Approximation Theory
E. Linear Algebra
G. Number Theory
H. Harmonic Analysis
I. Combinatorics and Graph Theory
J. Mathematical Biology and Bioinformatics
K. Mathematics Education
L. Logic and Foundations
M. Complex Analysis
N. Numerical Analysis
O. Ordinary Differential Equations
P. Partial Differential Equations
Q. Group Theory
R. Applied Mathematics
S. Set Theory
T. Topology
U. Automata Theory
V. Optimization Theory
W. Probability and Stochastic Processes
Y. Special Functions
Z. Ring Theory

Mechanical Engineering
Jonathan Wickert, Chair of Department

Distinguished Professors: Bernard, R. Brown

Distinguished Professor (Emeritus): Serowy
University Professor (Emeritus): Bahadur

Professors: Chandra, Heindel, Keikar, Levitas, Molian, Nelson, Oliver, Vardhan

Professors (Emeritus): Bathie, Baumgarten, Colver, Cook, Danofsky, De jong, Eide, Hall, Hendrickson, Henkin, Junkhan, Kavanagh, Mischke, Okishi, Pate, Peters, Pieter, Roberts, Shapiro, Spinrad, Wechsler

Associate Professors: Anex, Bastawros, Bryden, Luecke, Mann, Maxwell, Olsen, Subramanian, Sun, Dararajan, Wang

Associate Professors (Emeritus): Joensen, Vannatter

Associate Professor (Adjunct): Gray

Assistant Professors: Bigelow, Fa idley, Ganapathy, Subramanian, Kim, Kong, Meyer, Shrotriya, Stone, Winer, Zhang, Zou

Senior Lecturer: Starns
Lecturer: Feve, Heise

Undergraduate Study

For the undergraduate curriculum in mechanical engineering leading to the degree bachelor of science, see Computer Engineering Curriculum. This curriculum is accredited by the Engineering Accreditation Commission of ABET.

Mechanical engineers are typically involved with such activities as:

- generation, distribution, and use of energy
- development and application of manufacturing systems and processes
- automation and control of mechanical and thermal systems

- design of various products for consumer and commercial markets

About one-fifth of all engineers practicing today have been educated as mechanical engineers. Their activities include research, development, design, testing, production, technical sales, and technical management.

Mechanical engineers are characterized by personal creativity, breadth of knowledge, and versatility. For these reasons they are found to function and thrive as valuable members and leaders of multidisciplinary teams. Through clever use of analysis, modeling, design, synthesis, and interpersonal skills they solve important problems to improve our world.

To ensure the success of students completing the curriculum in mechanical engineering, the department has established the following educational objectives:

1. The department provides a sound foundation for graduates to pursue a variety of careers. Most graduates will find immediate employment in industry, government laboratories or consulting, but some will pursue graduate or professional studies in such fields as engineering, business, law or medicine.

2. Graduates will apply the problem solving skills they have learned at Iowa State University to meet the challenging demands and increasing responsibilities of a successful career.

3. Graduates will continue to learn as they grow in their profession, using modern technology and communication skills to contribute as team members or leaders in solving important problems for their employers and for society.

The mechanical engineering curriculum is organized to provide students with a broad foundation in mathematics and the sciences of physics and chemistry.

Through courses in these subjects, students will attain the basic knowledge required to understand and analyze mechanical engineering systems. This background is extended and organized through studies in mechanics, dynamics, thermo-fluids, materials, manufacturing, and design.

Upon completion of courses in these areas of the curriculum, students will be able to apply engineering principles to create, analyze or improve processes, devices or systems to accomplish desired objectives. A major focus throughout the mechanical engineering curriculum is a series of experiences that emphasize engineering design.

Students will develop engineering judgment through open-ended problems that require establishment of reasonable engineering assumptions and realistic constraints.

In addition, a sequence of courses emphasizing engineering design begins in the first year and culminates with a capstone design experience.

Students will not only be able to apply their engineering knowledge to real-life design problems but also to critically evaluate the solutions.

Development of skills needed to be independent, creative thinkers, effective communicators, and contributing team members is emphasized throughout the curriculum.

Students will learn to effectively work in multidisciplinary teams to solve engineering problems subject to technical and business constraints through critical thinking that crosses content boundaries.

Students will develop an understanding of the societal context in which they will practice engineering. They will include ethical, legal, and
Courses primarily for undergraduate students

M E 190. Learning Communities. (1-0) Cr. 1. Repeatable. F.S. Enrollment in M E learning communities.

M E 231. Engineering Thermodynamics I. (3-0) Cr. 3. F.S. Prereq: Math 265, Chem 167, Phys 222. Fundamental concepts based on zeroth, first and second laws of thermodynamics. Credits for processes involving ideal gases and solid-liquid-vapor phases of pure substances. Applications to vapor power cycles. Credit for either M E 231 or 330, but not both, may be applied toward graduation.

M E 270. Introduction to Mechanical Engineering Design. (1-0) Cr. 3. F.S. Prereq: Engr 170, Phys 221. Introduction to fundamental concepts of mechanical engineering design with applications to thermal and mechanical systems. Examination of existing machines and systems. Team-based projects, open-ended problems and prototyping. Application of engineering tools. Oral and written reports required.

M E 298. Cooperative Education. Cr. R. F.S.S. Prereq: Permission of department. First professional work period in the cooperative education program. Students must register for this course before commencing work.

M E 324. Manufacturing Engineering. (3-2) Cr. 4. F.S. Prereq: 270, E M 324, Mat E 272. Plastic deformation and manufacturing processes. Emphasis on equipment and its components including forming, machining, casting and welding with emphasis on manufacturing considerations in design. Modern manufacturing practices. Laboratory exercises will be an integral component of the course. Nonmajor graduate credit.

M E 330. Thermodynamics. (3-0) Cr. 3. F.S. Prereq: Phys 222. For students electing one course in engineering thermodynamics. First and second laws of thermodynamics. Properties and processes for pure substances. Selected applications including cycles for power and refrigeration, thermodynamic analysis. Credit for either M E 231 or 330, but not both, may be applied toward graduation. Majors in mechanical engineering may not apply M E 330 toward a degree in mechanical engineering.

M E 335. Fluid Flow. (3-2) Cr. 4. F.S. Prereq: Credit or enrollment in 332 and 370, E M 345, Math 266 or 267, Incompressible and compressible fluid flow fundamentals. Dimensionless analysis and similarity. Internal and external flow applications. Lab experiments emphasizing concepts in thermodynamics and fluid flow. Written reports are required. Nonmajor graduate credit.

M E 388. Sustainable Engineering and International Development. (Cross-listed with A E, C E, E E, Mat E). (2-2) Cr. 3. F. S. Prereq: Junior classification in engineering. Multi-disciplinary approach to sustainable engineering and international development. Sustainable development, appropriate design and engineering, feasibility analysis, international aid, business development, philosophy and politics of technology, and ethics in engineering. Engineer-based projects from problem formulation through implementation. Interaction with partner community organizations or international partners such as non-government organizations (NGOs). Course readings, final project/design report.

M E 410. Mechanical Engineering Applications of Mechatronics. (2-2) Cr. 3. S. Prereq: E E 442, 448, credit or enrollment in 421. Fundamentals of sensor characterization, signal conditioning and motion control, coupled with concepts of embedded computer control. Digital and analog components used for interfacing with computer controlled systems. Mechanical system analysis combined with various control approaches. Focus on automation of hydraulic actuation processes. Laboratory experiences provide hands-on development of mechanical systems. Nonmajor graduate credit.

M E 412. Ethical Responsibilities of a Practicing Engineer. (3-0) Cr. 3. F. Prereq: Credit or enrollment in 325, senior classification in engineering. Failure modes associated with product environment. Interaction between the legislative, legislative bodies, standards and the design engineer, using a case study approach in design applications. Litigation involving designs, standards, and laws applicable to specific designs surveyed. The influence of laws and standards upon design. Nonmajor graduate credit.

M E 414. Hydraulic Systems and Control. (3-0) Cr. 3. F. Prereq: 421, 335. Characteristics of hydraulic motors and pumps, system components, system analysis, feedback control and stability, control circuits, computer simulation. Nonmajor graduate credit.

M E 415. Mechanical Systems Design. (0-6) Cr. 3. F.S. Prereq: 324, 325. Solution of a total design problem involving a mechanical system, documenting decisions concerning form and function, material specification, manufacturing methods, safety, cost, and compliance with codes and standards. Solution description includes oral and written reports. Nonmajor graduate credit.

M E 418. Mechanical Considerations in Robotics. (3-0) Cr. 3. S. Prereq: 421. Three dimensional kinematics, dynamics, and control of robot manipulators, hardware elements and sensors. Laboratory experiments using industrial robots. Nonmajor graduate credit.

M E 423. Creativity and Imagination for Engineering and Design. (3-0) Cr. 3. F. Prereq: Junior classification in mechanical engineering. Historical examples of technical innovations based on creativity and imagination. Introduction to the psychology and theory of creativity and imagination. Background and simplified exercises in the creative arts, including poetry (both free verse and prose) and the visual arts (both two and three dimensional), for skill strengthening. Additional exercises in creative and imaginative thinking. Application of creative and imaginative skills for formulating conceptual design solutions. Additional applications related to technology including problem solving and inventing.

M E 425. Optimization Methods for Complex Designs. (Dual-listed with 525). (3-0) Cr. 3. S. Prereq: Engr 160, Math 265. Optimization techniques including unconstrained and constrained minimization, linear programming and other control system optimization. Both the theory and methods and the application to complex designs will be presented. Nonmajor graduate credit.

M E 433. Alternative Energy Conversion. (3-0) Cr. 3. F. Prereq: Phys 221/222 and Chem 167. Basic principles, thermodynamics, and performance of alternative energy conversion systems such as direct energy conversion (fuel cells, photovoltaics, magnetohydrodynamics), wind energy, biomass energy, non-combustion thermal sources (geocentric, geothermal and nuclear) and conventional environmental energy sources (ocean tides and currents), and finally other alternative approaches (molecular motors, cryo-engines, and solar sailing). Performance analysis and operating principles of systems and components, economic analysis for system design and operation. Nonmajor graduate credit.

M E 441. Fundamentals of Heating, Ventilating, and Air Conditioning. (3-0) Cr. 3. F. Prereq: Credit or enrollment in 436. Space conditioning and most air processes. Application of thermodynamics, heat transfer, and fluid flow principles to the analysis of heating, ventilating, and air conditioning components and systems. Performance and specification of components and systems. Nonmajor graduate credit.

M E 444. Elements and Performance of Power Plants. (3-0) Cr. 3. S. Prereq: 322, credit or enrollment in 335. Basic principles, thermodynamics, engineer- ing analysis of power plants. Topics include existing power plant technologies, the advanced energyplex systems of the future, societal impacts of power production, and environmental and regulatory concerns. Nonmajor graduate credit.

M E 446. Power Plant Design. (2-0) Cr. 3. F. Prereq: 322, credit or enrollment in 335. Design of a power plant to meet regulatory, cost, fuel, and output needs. Selection and synthesis of principal components. Oral and written reports required. Nonmajor graduate credit.

M E 448. Fluid Dynamics of Turbomachinery. (Cross-listed with Aer E). (3-0) Cr. 3. Prereq: E M 335 or equivalent. Applications of fluid mechanics and thermodynamics in performance analysis and design of turbomachines and related fluid system components. Nonmajor graduate credit.

M E 450. Engineering Vibrations. (Cross-listed with E M). (3-0) Cr. 3. F. Prereq: E M 324 and 345. Elementary vibration analysis, single and multiple degrees of freedom, energy methods, free and forced vibrations, viscous and other forms of damping transform methods and response to periodic and random force inputs, numerical methods of solution, eigenvalues and modal analysis, energy methods, vibration isolation and suppression, string or cable dynamics, beam bending dynamics, application problems in aerospace and mechanical engineering (as relevant). Nonmajor graduate credit.

M E 466. Multidisciplinary Engineering Design. (Cross-listed with A E, Aer E, Ele E, Eng I, Mat E). (1-0) Cr. 3. Repeatable. F.S. Prereq: Student must be enrolled in two semesters of graduation and permission of instructor. Application of team design concepts to projects of a multidisciplinary nature. Concurrent treatment of design, manufacturing and life cycle considerations. Application of design tools such as CAD, CAE, and FEM. Design methodologies, project scheduling, cost estimating, quality control, manufacturing processes. Development of a prototype and appropriate documentation in the form of written reports, oral presentations, computer models and engineering drawings.

M E 475. Modeling and Simulation. (3-0) Cr. 3. S. Prereq: 421, credit or enrollment in 436. Introduction to computer solution techniques required to simulate fluid, thermal, and mechanical systems. Methods of solving ordinary and partial differential equations and systems of algebraic equations; interpolation, numerical integration, finite difference and finite element methods. Nonmajor graduate credit.

M E 484. Technology, Globalization and Culture. (Dual-listed with 584). (Cross-listed with WLC). (3-0) Cr. 3. F. Prereq: senior classification for 484; credit or enrollment for 584. Cross-disciplinary examination of the present and future impact of globalization with a focus on preparing students for leadership roles in diverse professional, social, and cultural contexts. Facilitates an understanding of the value and opportunities inherent in the globalization process as they are perceived by practicing professionals and articulated in debates on globalization. Use of a digital forum for presenting and analyzing globalization issues by on-campus and off-campus specialists.

M E 486. Appropriate Technology Design. (3-0) Cr. 3. F. Prereq: 281, current enrollment in 336. Hands-on design experience utilizing knowledge acquired in core mechanical engineering courses. Emphasis with engineering problem formulation and solution, oral and written communication, team decision-making and ethical conduct. Design projects include engineering considerations in appropriate technology which have multidisciplinary components in economics and sociology.

M E 490. Independent Study. Cr. arr. Repeatable. Prereq: Senior classification. Investigation of topics holding special interest for student and faculty. Election of course and topic must be approved in advance by supervising faculty.

M E 498. Cooperative Education. Cr. R. Repeatable. F.S.SS. Prereq: 298, permission of department and Engineering Career Services. Third and subsequent professional work periods in the cooperative education program. Students must register for this course before commencing work.

Courses primarily for graduate students, open to qualified undergraduate students

M E 511. Advanced Control Design. (3-0) Cr. 3. S. Prereq: 411. Application of control design methods using continuous, discrete, and frequency-based models. Approaches include classical, pole assign- ment, model reference, internal model, and adaptive control methods. Mechanical design projects.

and mechanics of fiber and fiber reinforced composites. Mechanical properties and failure mechanisms. Material selection and designing with polymers. Processing of polymer and composite parts.

M E 525. Optimization Methods for Complex Designs. (Dual-listed with 425). (Cross-listed with HCI). (3-0) Cr. 3. S. Prereq: Engr 180, Math 265. Optimization techniques including unconstrained and constrained minimization, linear programming, and particle swarm optimization. Both the theory and methods and the application to complex designs will be presented.

M E 528. Micro/Nanomanufacturing. (3-0) Cr. 3. Alt. S., offered 2010. Prereq: 324. Introduction and scaling laws; SEM; SEM/AFM microscopes; top-down-beam machining; top-down-mechanical and electrical machining; synthesis of powders, tubers, and wires; bottom-up molecular manufacturing; applications of molecular manufacturing.

M E 535. Thermochemical Processing of Biomass. (Cross-listed with BRT). (3-0) Cr. 3. S. Prereq: Undergraduate course work in thermodynamics and transport phenomenon to thermal and catalytic processes for the conversion of biomass to biofuels and other bio-based products. Topics include gasification, fast pyrolysis, hydrothermal processing, syngas to synfuels, and bio-oil upgrading. Application of thermodynamics, heat transfer, and fluid dynamics to bioenergy and biofuels.

M E 538. Advanced Fluid Flow. (3-0) Cr. 3. F. Prereq: Credit or enrollment in 436. Detailed analysis of incompressible/compressible, viscous/inviscid, laminar/turbulent, unsteady fluid flows on a particle/point control volume basis.

M E 546. Computational Fluid Mechanics and Heat Transfer I. (Cross-listed with Aer E). (3-0) Cr. 3. F. Prereq: Credit or enrollment in 538 or Aer E 541. Introduction to finite difference and finite volume methods used in modern engineering. Basic concepts of discretization, numerical analysis, and stability. Applications of numerical methods to selected model partial differential equations.

M E 547. Computational Fluid Mechanics and Heat Transfer II. (Cross-listed with Aer E). (3-0) Cr. 3. S. Prereq: M E 546. Application of computational methods to complex geometries and flow heat transfer. Methods for solving the Navier-Stokes and reduced equation sets such as the Euler, boundary layer, and parabolized forms of the conservation equations. Introduction to relevant aspects of grid generation and turbulent modeling. Solution of incompressible fluids. Computer simulation of ride, braking, and directional response.

M E 561. Scanning Probe Microscopy. (2-1) Cr. 3. Alt. F., offered 2010. Prereq: First year physics, chemistry, and mathematics. Introduction to the scanning probe microscope (SPM, also known as atomic force microscope or AFM) and associated measurement techniques. Overview or instrument system, basic principles of operation, probe-sample interaction and various operational modes to obtain micro/nanoscale structural and topographic information. Stability and performance robustness to uncertainty. Solutions to the Hz, Hoo, and 11 control problems. Tools for robustness analysis and synthesis.

M E 584. Technology, Globalization and Culture. (Dual-listed with 484). (Cross-listed with WLC). (3-0) Cr. 3. F. Prereq: senior classification for 484; graduate classification for 884. Cross-disciplinary examination of the present and future impact of globalization with a focus on preparing students for leadership roles in diverse professional, social, and cultural contexts. Facilitate an understanding of the threats and opportunities inherent in the globalization process as they are perceived by practicing professionals and articulated in debates on globalization. Use of a digital forum for presenting and analyzing globalization issues by on-campus and off-campus specialists.

Students graduating in microbiology find career opportunities in a wide variety of areas including: hospital and clinical laboratories; federal, state, and local government agencies; research and development; dairy and food processing industries; and the pharmaceutical and fermentation industries.

The undergraduate program for the major in microbiology requires the following basic courses: 110, 302, 310, 320, 430 or 477, 450, 451, and lab including 302L, 310L, and 440. In addition, students must take 9 credits of elective microbiology courses from an approved list. Aspects of these courses emphasize communication skills, environmental issues, problem solving, and laboratory techniques. Courses in the following areas are required as supporting work: biology, chemistry, biochemistry, genetics, mathematics and physics.

For additional details on the undergraduate curriculum in Microbiology see College of Agriculture, Curricula. Students are encouraged to participate in independent studies, internship opportunities, and international experiences.

Preventative preparation may be accomplished through the curriculum major in this program (see College of Veterinary Medicine, Admission Requirements).

The program offers a minor in microbiology which may be earned by accumulating a minimum of 15 credits of microbiology courses.

**Graduate Study**

The program offers work for the degrees master of science and doctoral of philosophy in microbiology and for a minor for students majoring in other programs. The interdepartmental microbiology major is offered through faculty housed in twelve departments, including Agronomy; Animal Science; Biochemistry, Biophysics and Molecular Biology; Civil, Construction and Environmental Engineering; Entomology; Food Science and Human Nutrition; Genetics, Developmental and Cell Biology; Geological and Atmospheric Sciences; Plant Pathology; Veterinary Diagnostic and Production Animal Medicine; Veterinary Microbiology and Preventive Medicine; and Veterinary Pathology. Faculty coordinate graduate education and research in a wide range of topics fundamental to the discipline of microbiology. Specific information about individual faculty and their research areas is available at www.micro.iastate.edu.

Prerequisites to graduate study include a sound undergraduate background in chemistry, mathematics and biology, including microbiology and genetics.

All M.S. and Ph.D. students complete coursework that is comprised of one year of modular courses in microbiology (Micro 551, 552, 553, 554, 555, 556). Students also take at least 3 credits (M.S.) or 9 credits (Ph.D.) of coursework from an approved list of microbiology courses, one year of biochemistry (BBMB 404 and 405, or the equivalent), one course (0.5) credits in ethics (Micro 565A), and 3 credits (M.S.) or 5 credits (Ph.D.) of seminar (Micro 604).

Graduates of the Microbiology Graduate program have a broad-based knowledge in the fundamentals of microbiology as well as advanced knowledge in specific areas as determined by their areas of research focus. Students completing the dissertation have the technical, research, critical-thinking, problem-solving, and computer skills to design, implement, and conduct research using a variety of current techniques and equipment. They are also able to communicate research results effectively with scientific peer groups in both oral and written formats.
Courses primarily for undergraduate students

Micro 110. Orientation in Microbiology. (1-0) Cr. 0.5. F Orientation to the discipline of microbiology, the curriculum in microbiology, and educational research opportunities within the department. Satisfactory-fail only.

Micro 201L. Introductory Microbiology Laboratory. (0-2) Cr. 1. F, S. Prereq: Credit or enrollment in 201 or 302. Basic microbiology laboratory techniques for non-microbiology majors. Credit for either Micro 201L or 302L, but not both, may be applied toward graduation.

Micro 302. Biology of Microorganisms. (3-0) Cr. 3. F, S. Prereq: Biol 211, credit or enrollment in Biol 212; 1 semester of chemistry. Basic cell biology, physiology, metabolism, genetics and ecology of microorganisms, with an emphasis on prokaryotes and viruses, as well as the roles of microorganisms in the environment, disease, agriculture, and industry.

Micro 302L. Microbiology Laboratory. (0-3) Cr. 1. F, S. Prereq: Credit or enrollment in 302. Basic microbiology laboratory techniques for majors in microbiology, biological sciences and related fields. Credit for either Micro 302 or 302L, but not both, may be applied toward graduation.

Micro 310. Medical Microbiology. (3-0) Cr. 3; F, S. Prereq: 302 or (201 if a B or better was obtained). Study of infection and immunity by bacterial and viral pathogenic agents of humans. Nonmajor graduate credit.

Micro 310L. Medical Microbiology Laboratory. (0-3) Cr. 1. F, S. Prereq: 302L or 302, 302L or 321L, credit or enrollment in 310. Isolation and identification of human bacterial pathogens using basic staining techniques and biochemical tests. Brief introduction to techniques in cell culture and virology.

Micro 320. Microbial Physiology and Genetics. (4-0) Cr. 4; S. Prereq: 302, Biol 313, credit or enrollment in Chem 332. Introductory course in microbial physiology and genetics with special emphasis on prokaryotes. Topics include the structure, function, and assembly of cell components, bioenergetics, metabolic diversity, environmental stress tolerance, regulation of gene expression, genetic adaptation, and growth and cellular differentiation.

Micro 374. Insects and Our Health. (Cross-listed with Ent). (3-0) Cr. 3. S. Prereq: 3 credits in biological sciences. Bartholomay. Identification, biology, and significance of insects and arthropods that affect the health of humans and animals, particularly those that are vectors of disease. Nonmajor graduate credit.

Micro 374L. Insects and Our Health Laboratory. (Cross-listed with Ent). (0-3) Cr. 1. S. Prereq: offered 2010. Prereq: Credit or enrollment in Ent 374. Bartholomay. Laboratory and field techniques for studying medical or public health entomology, including: collection, identification, and maintenance of medically significant arthropods and experimental design and execution related to the biology of arthropods or arthropod-pathogen interactions.

Micro 381. Environmental Systems I: Introduction to Environmental Systems. (Cross-listed with Biol, EnSci, Env Sl) (2-4) Cr. 4. F. Prereq: 12 credits of natural science including Biology and chemistry. Introduction to the structure and function of natural environmental systems. Systems approach to the analysis of material and energy flows in natural environmental systems and the primary environmental factors controlling these systems. Nonmajor graduate credit.

Micro 402. Microbial Genetics. (Dual-listed with 502). (3-0) Cr. 3; Alt. F, offered 2010. Prereq: 302, Biol 313. The fundamental concepts of bacterial and bacteriophage genetics including mutationesis, mechanisms of both vertical and horizontal genetic information transfer, gene regulation, and genetic approaches to study complex cellular processes. Review and discussion of research literature to examine experimental design, methodology, and interpretation of both historical and contemporary relevance to microbial genetics.

Micro 407. Microbiological Safety of Foods of Animal Origins. (Dual-listed with 507). (Cross-listed with FS HN). (3-0) Cr. 3. S. Prereq: 420. Examination of the various factors in the production of foods of animal origin, from animal production through processing, distribution and final consumption which contribute to the overall microbiological safety of the food. The two modules of this course will be 1) the procedures and processes which can affect the overall microbiological safety of the food, and 2) the Hazard Analysis Critical Control Point (HACCP) systems.

Micro 408. Virology. (Dual-listed with 508). (Cross-listed with BBMB). (3-0) Cr. 3. Alt. F. Prereq: Permission of an instructor. Bonning, Bartholomay. Overview of insect-virus interactions including insect immunity to viruses, genetic enhancement of viral insecticides, transgenic mosquitoes, disruption of virus transmission, and the role of insect and viral genomics in combating viral diseases of both human and agricultural importance.

Micro 420. Food Microbiology. (Cross-listed with FS HN, Tox). (3-0) Cr. 3. F, S. Prereq: 201 or 302. Effects of microbial growth in foods. Methods to control, detect, and enumerate microorganisms in food and water. Foodborne infections and intoxications. Nonmajor graduate credit.

Micro 421. Food Microbiology Laboratory. (Cross-listed with FS HN). (3-0) Cr. 3; F, S. Prereq: Micro 201 or 302, 302L. Credit for either Micro 421L or 420L. Standard techniques used for the microbiological examination of foods. Independent and group projects resulting in health and disease. Micro 420L optional. Credit for either Micro 475 or V MPM 520, but not both, may be applied to graduation.

Micro 475. Immunology Laboratory. (1-4) Cr. 1. S. Prereq: Credit or enrollment in 475 or 575. Techniques in primary culture and tumor cell growth, measures of lymphocyte function, and flow cytometry. Half semester course.

Micro 477. Bacterial-Plant Interactions. (Dual-listed with 577). (Cross-listed with Pl P). (3-0) Cr. 3; Alt. S., offered 2010. Prereq: 3 credits in microbiology or plant pathology. Focuses on plant-associated bacteria in terms of their ecology, diversity, and the physiological and molecular mechanisms involved in their interaction with plants; covers symbiotic nitrogen fixation, plant pathogenesis, plant growth promotion, and biological control.

Micro 487. Microbial Ecology. (Dual-listed with 587) (Cross-listed with Biol, EnSci). (3-0) Cr. 3; F, S. Prereq: Six credits in biology and Chemistry. Bartholomay. Introduction to major functional groups of autotrophic and heterotrophic microorganisms and their roles in natural systems. Nonmajor graduate credit.

Micro 490. Independent Study. Cr. arr. Repeatable. F, S. Prereq: A minimum of 6 credits of 300-level or above coursework in microbiology, permission of instructor. A maximum of 8 credits of Micro 490 may be used toward the total of 128 credits required for graduation. H. Honors.

Micro 495. Internship. Cr. arr. F, S. Prereq: At least 6 credits of 300-level or above coursework in microbiology and approval of academic adviser. Participation in the Cooperative Extension Intern Program or an equivalent work experience. Written report of activities required. Satisfactory-fail only.

Courses primarily for graduate students, open to qualified undergraduate students

Micro 502. Microbial Genetics. (Dual-listed with 402). (3-0) Cr. 3; Alt. F, offered 2010. Prereq: 302, Biol 313. The fundamental concepts of bacterial and bacteriophage genetics including mutagenesis, mechanisms of both vertical and horizontal genetic information transfer, gene regulation, and genetic approaches to study complex cellular processes. Review and discussion of research literature to examine experimental design, methodology, and interpretation of both historical and contemporary relevance to microbial genetics.
Micro 507. Microbial Safety of Foods of Animal Origins. (Dual-listed with 407). (Cross-listed with FS HN). (3-0) Cr. 3. S. Prereq: 420. Examination of the various factors in the production of foods of animal origin, from animal production through processing, distribution and consumption which contribute to the overall microbiological safety of the food. The two modules of this course will be 1) the procedures and processes which can affect the overall microbiological safety of the food, and 2) the Hazard Analysis Critical Control Point (HACCP) system.

Micro 530. Prokaryotic Diversity and Ecology. (Dual-listed with 430). (Cross-listed with BBMB). (3-0) Cr. 3. Alt. S., offered 2011. Prereq: 302, 302L. Survey of the diverse groups of procaryotes emphasizing important and distinguishing metabolic, phylogenetic, morphological, and ecological features of members of those groups.

Micro 551. Microbial Diversity and Phylogeny. (1-0) Cr. 1. F. Prereq: 302, Biol 313. Comparisons among the three kingdoms of life (Bacteria, Archaea, and Eukarya). Topics will include metabolism, adaptation, methods of phylogenetic analysis, and comparative genomics.

Micro 553. Pathogenic Microorganisms. (1-0) Cr. 1. F. Prereq: 302, Biol 313. Review and contrast/comparison of common bacterial pathogens of plants and animals and their mechanisms of virulence, including toxins, protein secretion, host invasion and iron acquisition strategies. An overview of eukaryotic cell biology that is relevant to pathogenesis will also be included.

Micro 554. Virology. (1-0) Cr. 1. S. Prereq: 302, Biol 313. Review and contrast/comparison of insect, animal and plant viruses and bacteriophage. Growth dynamics, replication of model viruses, and the role of specific viruses in disease will also be included.

Micro 556. Microbial Ecology and Environmental Monitoring. (1-0) Cr. 1. S. Prereq: 302, Biol 313. Examination of microorganisms in their natural habitats, including aquatic, terrestrial and extreme environments, community and biofilm development, microbe-microbe interactions, and current and traditional methods of microbial analysis in natural environments.

Micro 556. Professional Practice in the Life Sciences. (Cross-listed with PI P, Agron An S, BC B, Hort, V MPm). Cr. arr. S. Prereq: Graduate classification. Professional discourse on the ethical and legal issues facing science researchers. Offered in modular format; extension model to be used.

Micro 557. Immunology. (Dual-listed with 475). (3-0) Cr. 3. S. Prereq: 310. An examination of humoral and cellular immune function as well as the interaction of the cells and factors of the immune system that result in health and disease. Micro 475L optional. Credit for either Micro 575 or V MPm 520, but not both, may be applied toward graduation.

Micro 586. Medical Microbiology. (Cross-listed with V MPm). (4-0) Cr. 4. F. Prereq: 310. Bacteria associated with diseases of vertebrates, including virulence factors and interaction of host responses.

Micro 590. Special Topics. Cr. arr. Repeatable. F.S.S.S. Prereq: Permission of instructor.

Courses for graduate students

Micro 604. Seminar. (1-0) Cr. 1. Repeatable. F.S. Course will expose students to the breadth of subdisciplines within microorganisms and offer opportunities for direct interaction between the students and the faculty members within the Interdepartmental Microbiology Graduate Program, and promote interactions among the students within the program. Satisfactory-fail only.

Micro 608. Molecular Virology. (Cross-listed with V MPm, PI P). (3-0) Cr. 3. Alt. F., offered 2010. Prereq: BBMB 426 or BBMB 425 or Gen 411 or Micro 402 or course in molecular biology. Bogdanove, Whitham. Seminar and current research in molecular and physiological aspects of plant interactions with pathogens, including mechanisms of pathogenesis, host-pathogen recognition and host defense, with an emphasis on critical evaluation of primary literature. Students also complete an interinstitutional research proposal writing and peer review exercise.

Micro 624. Advanced Food Microbiology. (Cross-listed with FS HN, Tox). (3-0) Cr. 3. Alt. S., offered 2011. Prereq: FS HN 420 or 421 or 504. Topics of current interest in food microbiology, including new foodborne pathogens, rapid identification methods, effect of food preparation on microbial population, and optimization techniques on microbial growth, and mode of action of antimicrobials.

Micro 692. Molecular Biology of Plant-Pathogen Interactions. (Cross-listed with PI Pi). (3-0) Cr. 3. Alt. F., offered 2010. Prereq: BBMB 406 or BBMB 405 or Gen 411 or Micro 402 or course in molecular biology. Bogdanove, Whitham. Seminar and current research in molecular and physiological aspects of plant interactions with pathogens, including mechanisms of pathogenesis, host-pathogen recognition and host defense, with an emphasis on critical evaluation of primary literature. Students also complete an interinstitutional research proposal writing and peer review exercise.

Micro 697. Graduate Research Rotation. Cr. arr. Repeatable. F.S. Graduate research projects performed under the supervision of selected faculty members in the Interdepartmental Microbiology major.

Micro 698. Seminar in Molecular, Cellular, and Developmental Biology. (Cross-listed with MCD, GDCB, BBMB, V MPm). (2-0) Cr. arr. Repeatable. F.S. Student and faculty presentations.

Military Science
www.public.iastate.edu/~armyrotc/
Lt. Col. John Soupene, Chair of Department

Professor: Soupene
Assistant Professor (Adjunct): Meyer
Instructors (Adjunct): Bower, Gledhill, Porter, Scott, Stephenson, Taylor, White

The Military Science Department does not offer an academic degree and is embedded within the College of Liberal Arts and Sciences as an interdisciplinary program. The mission of the department is derived directly from regulations governing Army Reserve Officers’ Training Corps (AROTC), which are issued by the Army Cadet Command and Army Training and Doctrine Command and cannot be modifiable by this department.

Freshmen Year Learning Outcomes: The student will have a working knowledge of the following areas: The Role of the Army, Roles and Origins of the Army, Army Customs and Traditions, Branches (Jobs) in the Army and Military Operations and Tactics.

Sophomore Year Learning Outcomes: The student will have a working knowledge of the following areas: The Role of an Officer, Role of the Officer and Noncommissioned Officer, communications, code of conduct, first aid, principles of war and military operations and tactics.

Junior Year Learning Outcomes: The student will have a working knowledge of the following areas: Small Unit Training, Command and Staff Functions, Nuclear, Biological and Chemical Warfare, Law of War, Weapons, Human Behavior, Math Reasoning, Computer Science and Military Operations and Tactics.

Senior Year Learning Outcomes: The student will have a working knowledge of the following areas: Transition to Becoming an Officer, Military Justice, Intelligence and Electronic Warfare, Army Personnel Management, Army Logistics, Post and Installation Support and Military Operations and Tactics.

The mission of the Army Reserve Officers’ Training Corps (AROTC) is to commission the future leaders of the United States Army. Since ROTC produces over 65 percent of the Army’s Officer Corps, our task is one of the most important undertakings in the Army and our country today. We seek top quality college students. We train these potential leaders, assess their abilities, and challenge them with the highest standards of profession/professionalism. Those who successfully complete the program, receive a commission as a second lieutenant in the U.S. Army. A commission as an Army officer affords the opportunity to pursue a profession in one or several of the 300 different jobs held by Army officers. Students may request to serve as an officer in either the active army, or part time in the Army Reserve or National Guard. Regardless of the method of service, officers in today’s Army can be proud to know that they are doing their share in the defense of the United States of America.

The ISU Military Science program is divided into two segments, the basic program and the advanced program. The basic program (courses numbered 101-290) is designed primarily for freshmen and sophomores. No military obligation is incurred by a person participating in the basic program. The basic program is designed to be informative and to acquaint students with the military as a profession. The basic program or an allowed substitute is designed to be informative and not to be applied toward graduation. Each scholarship cadet in the Basic Program receives a monthly allowance (freshmen $300; sophomore $350) for up to 10 months. The curriculum is designed to train freshmen and sophomores in individual and team skills. It also helps the Professor of Military Science identify individual leader developmental needs.

Advanced Program
These courses are for students who have completed the basic program (or received equivalent credit) and are mandatory for potential commissioning upon contracting at the beginning of their junior year. Each cadet receives a monthly allowance (junior $450; senior $500) for up to 10 months. This schedule is given during the junior and senior years. These courses are primarily taught to academic juniors and seniors.

Successful completion normally obligates the student to military service on active or reserve duty. In addition to the advanced program of study, a student (cadet) will be expected to pass the Army Physical Fitness Test (precondition for commissioning) each semester and continually maintain military appearance standards in both personal grooming and uniform. Physical fitness training is regularly conducted outside of class and laboratory hours in a separate course, M S 150 “Army Physical Readiness.” Students are encouraged to attend and participate in this class.

Professional Military Science Education (PMSE) coursework outside of the military science curriculum is also a pre-condition to commissioning. The PME component consists of Basic Academic proficiency standards. These standards are explained to prospective students as they consider enrollment in the advanced program. Army Uniforms will be worn at least once a week. The 300-level courses are designed to prepare cadets for the Leader Development and Assessment Course, missions and which is a 32-day summer internship/training program where cadets are trained to Army standards, develop leadership skills, and have their officer potential evaluated. The 400-level courses are the final preparation for commissioning as a second lieutenant in the United States Army. Students must meet academic alignment criteria and receive basic program credit before entering the advanced program.

The College of Liberal Arts and Science offers a minor in Military Studies. Requirements for the minor include taking a minimum of 15 credits of ROTC instruction, which may be taken from one or a number of the ROTC programs. At least 6 credits must be in courses numbered 300 or above.

Courses primarily for undergraduate students

Basic Program
M S 101. Introduction to Military Science. (1-0) Cr. 1. F. Prereq: Concurrent enrollment in M S 101 required. Examines the role of a Cadet in the Army Reserve Officer Training Corps and a Lieutenant in the United States Army. The course explores a military culture whose ultimate success is determined by the character and proficiency of its leadership. Instruction introduces students to the cultural heritage and history of the U.S. Army. Students will begin to understand the structure of the U.S. Army and how it functions as an organization and institution. The curriculum promotes the development of students’ communication skills to enhance their ability to transmit ideas. The course examines how the Army’s cultural values drive the development of leadership in the Officer Corps. Hands-on activities enable students to gain insight on the skills and abilities required of cadets and officers interacting with civilians and soldiers.

M S 101L. Basic Leadership Laboratory I. (0-2) Cr. 1. F. Prereq: Concurrent enrollment in M S 101L required. Uses basic military training, missions and scenarios to provide a hands-on method of developing confidence and leadership skills. Students observe and participate in the rotation through various levels of leadership positions and squad level within the Army command structure. This course provides a constant learning environment as they learn to communicate effectively and work as a team while assigned to positions at various levels within the organization. Marching, rifle firing, and tactical patrolling; students gain confidence through rappelling and construction/usage of rope bridges; and increase professional knowledge in areas such as first aid, water survival, personal physical fitness, and land navigation. Teaching locations include the ISU Armory, Camp Dodge (National Guard Facility), Pammel Woods (ISU campus), and ISU fitness centers. Full participation in all events will be determined based on students’ physical and medical eligibility.

M S 102. Structure and Function of the U.S. Army. (1-0) Cr. 1. F. Prereq: Concurrent enrollment in M S 102L required. Instructs students on the fundamental skills and proficiencies required of Cadets in the Army Reserve Officer Training Corps and Officers in the United States Army. Allows students to explore the Army culture whose ultimate success is determined by the character and proficiency of its leaders. Students will gain an insight to the effects of human behavior and communication on the function of the Army’s basic unit structures. Special focus is given to the emphasis the Army puts on the development and character of the leader and how that affects the culture and operation of the Army as an institution. Students will develop an understanding of the role that morals and ethics play in becoming an Army Officer and leading American Soldiers. Introduction to basic officer/soldier skills will illuminate the complex role of the Officer in the modern Army.

M S 102L. Basic Leadership Laboratory II. (0-2) Cr. 1. F. Prereq: Concurrent enrollment in M S 102L required. Uses basic military training, missions and scenarios to provide a hands-on method of developing confidence and leadership skills. Rotation through various levels of leadership positions at the platoon and squad level within the Army command structure. Provides a constant learning environment as they learn to communicate effectively and work as a team while assigned to positions at various levels within the organization. Students also learn various military tasks such as marching, rifle firing, and tactical patrolling; gain confidence through rappelling and construction/usage of rope bridges; and increase professional knowledge in areas such as first aid, water survival, personal physical fitness, and land navigation. Teaching locations include the ISU Armory, Camp Dodge (National Guard Facility), Pammel Woods (ISU campus), and ISU fitness centers. Full participation in all events will be determined based on students’ physical and medical eligibility.

M S 150. Army Physical Readiness. (0-3) Cr. 1. Repeatable. F.S. Prereq: None. This lab is designed to use basic military skills and training to develop confidence, leadership, and physical fitness. The team approach is utilized in the instruction and application of Army physical fitness requirements. Students will learn various Army physical fitness techniques as well as how to conduct physical fitness sessions. Teaching locations include Lied Recreation Center, Beyer Hall, State Gym as well as around campus. Full participation in all events will be determined based on

Military Science
students physical and medical eligibility. No more than 10 credits in MS 100 and 200-level courses may be applied toward graduation. Satisfactory-fail only.

M S 201. Principles of Leadership and Communication Skills. (2-0) Cr. 2. F. Prereq: Concurrent enrollment in M S 201L required. Explores the development of leadership and communication skills by understanding and studying the principles, traits, and dynamics of leadership and effective communication techniques. These include: leadership dimensions, human behavior, time management skills, stress management on personal and professional ethics, decision-making processes, decision problem solving skills, team building exercises, communication techniques, briefing skills, delegating, nutrition, fitness, and counseling. Leadership assessment programs, role playing, active class participation, small group discussions, and videos clips are used to enhance and reinforce the instruction.

M S 201L. Basic Leadership Laboratory III. (0-2) Cr. 1. F. Prereq: Concurrent enrollment in M S 201 required. Uses basic military training, missions and scenarios to provide a hands-on method of developing confidence and leadership skills. Students observe and participate in the rotation through various levels of leadership positions at the platoon and squad level within the Army command structure. Learn to communicate effectively and work as a team while assigned to positions at various levels within the organization. Students also learn various military tasks such as marching, rifle firing, and tactical patrolling; gain confidence through rappelling and construction/use of rope bridges; and increase professional knowledge in areas such as first aid, water survival, personal physical fitness, and land navigation. Teaching locations include the ISU Armory, Camp Dodge (National Guard Facility), Pammel Woods (ISU campus), and ISU fitness centers. Full participation in all events will be determined based on students' physical and medical eligibility.

M S 202. Map Reading and Land Navigation. (2-0) Cr. 2. F. Prereq: Concurrent enrollment in M S 202L required. Class focuses on the characteristics and features of the earth's land mass and how to apply different methods of conducting navigation on land. These methods include: by use of topographical maps, compasses, aerial photographs, military maps, symbols, and all their practical application. These navigation techniques are used in class in conjunction with the instruction in classroom and squad movement exercises. Students will utilize verbal and non-verbal communication, communication techniques, and briefing techniques during this class. Students are also assigned to a professional book from the Army Reading List and complete a written review of the book in the Army writing style.

M S 202L. Basic Leadership Laboratory IV. (0-2) Cr. 1. S. Prereq: Concurrent enrollment in M S 202 required. Uses basic military training, missions and scenarios to provide a hands-on method of developing confidence and leadership skills. Students observe and participate in the rotation through various levels of leadership positions at the platoon and squad level within the Army command structure. Learn to communicate effectively and work as a team while assigned to positions at various levels within the organization. Students also learn various military tasks such as marching, rifle firing, and tactical patrolling; gain confidence through rappelling and construction/use of rope bridges; and increase professional knowledge in areas such as first aid, water survival, personal physical fitness, and land navigation. Teaching locations include the ISU Armory, Camp Dodge (National Guard Facility), Pammel Woods (ISU campus), and ISU fitness centers. Full participation in all events will be determined based on students' physical and medical eligibility.

M S 290. Independent Study: Basic Military Study. Cr. Arr. Repeatable. F.S.SS. Prereq: Permission of the Chair of the Military Science Department. Investigation of an approved topic, in a professional journal worthy paper on ethics, current military issues, interpersonal communications, or leadership development. No more than 10 credits in MS 100- and 200-level courses may be applied toward graduation.

M S 301. Methods of Instructing Military Skills. (3-0) Cr. 3. F. Prereq: Completion of the basic Military Science program, concurrent enrollment in MS 301L, and permission of the Chair of the Military Science Department. Develops student proficiency in analyzing, planning, and executing military training within a military organizational structure. Students are given situational opportunities and then measured on their leadership abilities through systematic feedback. Students will evaluate their leadership dimensions within the realms of values, attributes, skills, and actions. Students develop an understanding of human cultural heritage and history, as it pertains to the armed forces.

M S 301L. Advanced Leadership Laboratory I. (0-4) Cr. 1. F. Prereq: Completion of the basic program, concurrent enrollment in MS 301 and permission of the Chair of the Military Science Department. The lab complements M S 301 by providing opportunities to practice the lessons from class. On-the-job training and evaluation provided by the ROTC cadre. Developing training programs, structuring laboratories, presenting classes, planning various events, and accepting responsibility for the leadership labs. Participating in the Water Survival test, Army Physical Fitness test and the Land Navigation test are required.

M S 302. Applied Leadership. (3-0) Cr. 3. S. Prereq: Completion of the basic course, concurrent enrollment in MS 302L and permission of the Chair of the Military Science Department. Prepares students to attend the Leadership Develop and Assessment Course at Fort Lewis, Washington in which they will be assigned specific and situational tasks to accomplish by providing purpose, motivation, and direction to fellow students across the nation. Students will learn how to identify sixteen leadership dimensions and provide specific feedback on their leadership behaviors. Students will develop their oral communication skills about the plans developed by the class, through small group presentation settings. Students will develop methods of studying human behavior.

M S 302L. Advanced Leadership Laboratory II. (0-4) Cr. 1. S. Prereq: Completion of the basic program, concurrent enrollment in MS 302 and permission of the Chair of the Military Science Department. The lab complements M S 302 by providing opportunities to practice the lessons from class by demonstrating the indelible link between personal values and successful leadership. On-the-job training and evaluation provided by the ROTC cadre. Developing training programs, structuring laboratories, presenting classes, planning various events, and accepting responsibility for the leadership labs.

M S 310. Practicum: Advanced Military Skills. (0-3) Cr. 1. Repeatable. S. Prereq: Permission of the Chair of the Military Science Department. An annual 72-hour military field training exercise that requires weeks of planning, participation, and ROTC cadre evaluation. Designed for advanced ROTC cadets preparing for being commissioned as officers in the U.S. Army. Actual military conditions are simulated; detailed instruction in weapons training and execution of a simulated operation order in accomplishing a specific military mission conducted at Camp Dodge (National Guard Facility). Satisfactory-fail only.

M S 401. Seminar: The Military Team. (3-0) Cr. 3. F. Prereq: Completion of the basic programs, concurrent enrollment in MS 401L and permission of the Chair of the Military Science Department. Develops student proficiency in analyzing and evaluating leadership behaviors, such as values, ethics, decision-making processes, and characteristics. Students are given situational opportunities to assess leadership and provide feedback to other students placed in leadership roles. Students will be measured by their ability to both give and receive systematic and specific feedback on leadership behaviors. Students will develop their ability to communicate thoughts and ideas orally through small group presentations and group discussions. Students will supervise and evaluate the planning and execution of complex operations within a military organizational structure.

M S 402L. Advanced Leadership Laboratory III. (0-4) Cr. 1. F. Prereq: Completion of the basic program, concurrent enrollment in MS 401L and permission of the Chair of the Military Science Department. The lab complements the instruction from class by demonstrating the indelible link between personal values and successful leadership. On-the-job training and evaluation provided by the ROTC cadre. Developing training programs, structuring laboratories, presenting classes, planning various events, and accepting responsibility for the leadership labs.

M S 410. Seminar: The Professional Military Officer. (3-0) Cr. 3. S. Prereq: Completion of the basic program, concurrent enrollment in MS 402L and permission of the Chair of the Military Science Department. Explores the dynamics of leading in the complex situations of current military operations in a contemporary world. Students will examine the differences in customs, courtesies and operational principles in the face of international terrorism. Students will also explore aspects of interaction with non-military organizational systems, such as government, businesses, and citizens in a war zone and foreign national governments. The course uses case studies, scenarios, and practical exercises, which prepare the student to face complex ethical and practical demands of leading soldiers, sailors and airmen in a military organizational structure.

M S 402L. Advanced Leadership Laboratory IV. (0-4) Cr. 1. S. Prereq: Completion of the basic program, concurrent enrollment in MS 402L and permission of the Chair of the Military Science Department. The lab complements the instruction from class by demonstrating the indelible link between personal values and successful leadership. On-the-job training and evaluation provided by the ROTC cadre. Developing training programs, structuring laboratories, presenting classes, planning various events, and accepting responsibility for the leadership labs.

M S 410. Practicum: Military Skills Leadership. (3-0) Cr. 3. S. Prereq: Permission of the Chair of the Military Science Department. An annual 72-hour military field training exercise that requires weeks of planning, participation, and ROTC cadre evaluation. Designed for advanced ROTC cadets preparing for being commissioned as officers in the U.S. Army. Actual military conditions are simulated; detailed instruction in weapons training and execution of a simulated operation order in accomplishing a specific military mission conducted at Camp Dodge (National Guard Facility). Satisfactory-Fail only.

M S 490. Independent Study: Advanced Military Study. (1-0) Cr. 1. Repeatable. F.S.S. Prereq: M S 301, 302, 401 and 402 and permission of the Chair of the Military Science Department. Investigation of an approved topic. Must result in a professional journal worthy paper on ethics, current military issues, interpersonal communications, or leadership development.

Military Studies

(Interdepartmental Minor)

Advisory Committee: Lieutenant Colonel Soupene, Captain Waring, Colonel Cramp

The Military Studies program is designed for students interested in learning about military skills and careers. The mission of the Reserve Officers' Training Corps (ROTC) programs is threefold. First, students are developed mentally, morally, and physically in order to make them strong leaders. Second, a desire for development in mind and character is instilled in students so they may assume the highest responsibilities of command, citizenship, and government. Finally, students are imbued with the highest ideals of duty, honor, and
loyalty in order to graduate with a basic professional background and motivation toward their careers.

The Military Science, Naval Science and Air Force Aerospace departments accomplish this mission through detailed courses of instruction occurring throughout a typical student’s college career. All academic courses offered by these departments focus on the development of professional military skills and their application. Each department offers courses unique to its branch of the military. Students in Army ROTC classes gain an appreciation for ground warfare and doctrine, while the Naval Science program develops basic seamanship skills such as navigation and marine propulsion. The Air Force Aerospace Studies curriculum familiarizes students with Air Force structure and doctrine. On a broader scale, all three departments offer courses promoting leadership and sound management practices that investigate the military’s role in American domestic and foreign policy, and can be employed in any career path.

Military Science, Naval Science and Air Force Aerospace courses are offered in the interdepartmental Military Studies program in the following participating departments: Military Science, Naval Science and Air Force Aerospace.

Undergraduate Study

Undergraduate study in this program provides the student with an opportunity to develop a minor in Military Studies. The three Iowa State University ROTC programs offer over 64 credits of specialized coursework. The minor in Military Studies is open to any Iowa State University student.

Undergraduate students may minor in Military Studies by taking 15 credits of coursework from a combination of any of the three ROTC programs regardless of whether or not a commission in the Armed Forces is tendered. At least 6 of the 15 credits must be in courses numbered 200 or above.

Courses primarily for undergraduate students

Military Science - See Military Science.

Naval Science - See Naval Science.

Molecular, Cellular, and Developmental Biology

www.mcdb.iastate.edu

(Interdepartmental Graduate Major)

Program Executive Committee: Jeff Beetham, Chair; F. C. Minion Associate Chair; W. A. Miller, and James Reecy

Undergraduate Study

A special program in molecular, cellular, and developmental biology is designed for the baccalaure- ate. Undergraduates wishing to prepare for gradu- ate study in molecular, cellular, and developmental biology should elect courses in biochemistry, biology, genetics, microbiology; and mathematics through calculus; chemistry through organic; and one year of physics. Biol 313, 313L, 314, and 314L are recommended for undergraduates desiring an introduction to this area.

Graduate Study

Work is offered for the master of science and doctor of philosophy degrees with a major in molecular, cellular, and developmental biology in several cooperating departments: Agronomy; Animal Science; Biochemistry; Biophysics & Molecular Biology; Biomedical Sciences; Entomology; Food Science and Human Nutrition; Genetics, Development and Cell Biology; Horticulture; Physics & Astronomy; Plant Pathology; Veterinary Microbiol- ogy & Preventive Medicine; Veterinary Pathology. Facilities and quota are available in these departments for conducting fundamental research in the various aspects of molecular, cellular, and developmental biology. Ongoing research projects include molecular and cellular studies of viral, prokaryotic, plant, and animal systems.

Students may enter the MCB program in one of two ways: they may apply to and be accepted into the major directly or they may formally apply to the major after being accepted by a participating department. Students admitted into MCB will take MCB 697 (Graduate Research Rotations) in their first two semesters and choose a major professor by the end of their second semester. Students admitted by a department will choose a major professor from the participating faculty in that department. All Ph.D. students take a core curriculum consisting of the following courses: Molecular biology (MCDB 511, 520, or 545 or Micro 502 or MCB 676 or V MPM 608). In seminar, students will make journal and research presentations and attend MCDB seminars. M.S. students take the above core but may delete either the molecular genetics, cell biology, or developmental biology component. Additional coursework is selected to meet departmental requirements and to satisfy individual student research interests. All graduate students are required to teach as part of their training for an advanced degree.

Students minoring in molecular, cellular, and developmental biology at the Ph.D. level must meet the following research requirements: one year of biochemistry (BBMB 404, 405, or BBMB 501, 502; one course in each of two of the above three areas molecular biology (MCDB 511, 520, or 545 or Micro 502 or MCB 676 or V MPM 608).

Courses primarily for graduate students

MCDB 511. Molecular Genetics. (Cross-listed with GDCB). (3-0) Cr. 3. S. Prereq: Biol 313 and BBMB 405. The principles of molecular genetics: gene structure and function at the molecular level, including regula- tion of gene expression, genetic rearrangement, and the organization of genetic information in prokaryotes and eukaryotes.

MCDB 512. Plant Growth and Development. (Cross-listed with GDCB, PiBiol). (2-0) Cr. 3. S. Prereq: Biol 330 or a course in developmental biology. GDCB 545 or BBMB 404, 405 or GDCB 520. Plant growth and development and its molecular genetic regula- tion. Hormone biosynthesis, metabolism, and action. Signal transduction in plants.

MCDB 520. Genetic Engineering. (Cross-listed with GDCB, BBMB). (3-0) Cr. 3. Alt. F. offered 2009. Prereq: GDCB 411 or BBMB 411. Methods and means of gene cloning, restriction endonuclease mapping, southern hybridization, isolation and manipulation of plasmid DNA, and detection of specific genes in bacteria.

MCDB 590. Special Topics. Cr. arr. Repeatable.

b. seven credits from the following technology and music electives: Com S 107, 207, 208, 227, 228, 229, 309; Cpr E 329; E E 201, 224, 324, 424; M E 451; Phys 198; S E 319; Music 101 or 105, 102, 118, 120 or 302, 221, 222, 231, 232, 304, 318, 321, 322, 327, 338, 395, 396, 472, 4901, 5931.

Music Majors may use the following music courses toward the music technology minor: 246, 346, 446, 4901, 5901.

Bachelors of Music students may not count Phys 196 in the Music Technology minor.

At least six of the fifteen credits must be taken at Iowa State University in courses numbered 300 or above with a grade of C or higher. The minor must include at least nine credits not used to meet any other department, college, or university requirement. Students pursuing a minor in music technology must meet the audition requirements and/or prerequisites for all music courses they wish to take.

Curricula Available to Music Majors

Students interested in pursuing an emphasis in music theater should see Index, Theater and Performing Arts.

Bachelor of Music

This curriculum leads to the degree bachelor of music. This degree is more specialized and contains fewer general education requirements than the bachelor of arts degree with a major in music. Students in this curriculum choose between options in education, performance, and composition. To obtain a bachelor of music degree, a student must earn a minimum of 124.5-146 credits (depending on the option chosen) including a minimum of 32 credits in residence at Iowa State University and a minimum of 45 advanced credits in courses numbered 300 and above and must meet all of the requirements specified below.

Courses taken on a pass/not pass basis may be counted toward the required total credits, and may be used to meet the advanced credit requirement, if appropriate, but may not be used to satisfy any other graduation requirement.

Bachelor of Arts—Music Major

A more general degree than the bachelor of music, the bachelor of arts degree requires no formal specialization. It includes more general education requirements and provides a broader course of academic study.

For the undergraduate curriculum in Liberal Arts and Sciences, major in music, leading to the degree bachelor of arts, see Liberal Arts and Sciences, Curriculum.

Candidates for the degree bachelor of arts with a music major will normally complete 48 credits of music including the following required courses: 119, 120, 219, 221, 222, 231, 232, 319, 331, 332, 337, 338, 383, 384, 4 credits from: 111, 113, 115, 141, 151, 161, 181, 321.

Bachelor of arts students whose chief professional interest lies in research are encouraged to minor in world languages and cultures, history, literature, or philosophy.

General Requirements

Prior to being accepted as a music major, students are required to audition for applied faculty in their performance area (piano, organ, woodwinds, strings, percussion, brass, or voice), and must successfully demonstrate performance skills appropriate for college level instruction. Once accepted, a student must complete a placement examination in keyboard skills. This examination will be given by members of the departmental faculty during summer orientation, the week preceding the opening of classes for fall semester, or by appointment.

Seminars and Recitals. All music majors enrolled for applied music courses will attend a weekly 1-hour seminar in their areas and departmental recitals each semester.

Ensemble Requirement. All bachelor of music students must register for an ensemble course (111, 115, 141, 151, 161, 181) and one semester of chamber music ensemble (113, 161, 301, 321). Instrumental music education students may count one semester of 114A as a large ensemble. All full-time Bachelor of Music students in options other than music education must include among their ensembles at least two semesters of large ensemble (111, 115, 141, 151, 161, 181) and one semester of chamber ensemble (113, 161, 301, 321).

Continuation Examination. To be approved for continuation as a music major on the junior level, a student must pass a continuation examination taken normally at the end of the fourth semester. Before taking this examination, the student must fill out the requisite forms as well as write an essay including: (1) his/her personal goals, (2) a self-assessment of his/her progress thus far, and (3) an assessment of what he/she expects to accomplish before graduation.

The student taking the Continuation Examination performs for a Continuation Examination Committee. Requirements include the performance of three works representing different periods or styles selected by and studied with the applied teacher, a self-prepared piece, and sight reading. The student must demonstrate acceptable solo ability and performance techniques in at least one of the applied areas. A written evaluation will be given each student following his/her performance. This evaluation will include a candid assessment of the student’s potential to achieve his/her goals.

In addition, the student may arrange to meet with members of the Continuation Examination Committee at a later date to discuss the results of his/her Continuation Examination.

All music majors must demonstrate proficiency in piano as a part of the continuation examination. Proficiency will normally be demonstrated by completing Music 228 or, for keyboard majors, by completing Music 327. The student must pass all parts of the continuation examination in order to enroll in Music 319 or 419. Applied Music. Details and forms available at: www.music.iastate.edu.

Graduation Proficiency. To be recommended for graduation, a music student should demonstrate to the music faculty mature acquaintance with performance styles, technique, and repertoire. All music majors will participate in departmental recitals to the satisfaction of the department. Candidates for the bachelor of music degree will present a graduation recital.

Communication Proficiency requirement: The department requires a grade of C– or better in each of Engl 150 and 250 (or 250H). In addition the Communication Proficiency must be certified through one of the following options:

1. Certification of writing skills, by the instructor, after completion of Music 120, 383, 384, 472, 473, or 475. (Passing one of these courses does not automatically satisfy the requirements for Communication Proficiency.)
2. Satisfactory completion of an advanced writing course (e.g., English 302, 305, or 314.)

Learning Outcomes and Assessment

Music graduates will understand and demonstrate: (1) Knowledge of music cultural heritage and history, (2) Appreciation for musical creativity, reasoning, and the aesthetic value of music, (3) Knowledge of organization and structures of music, (4) Analytical skills necessary for listening, performing, and teaching, (5) Skills necessary to perform music from a variety of periods, styles, and genres, (6) Necessary abilities to communicate ideas musically, verbally, and in writing, (7) Awareness of the diversity of musical ideas throughout the world’s cultures, and (8) For Music Education students: success in meeting the ISU Teaching Standards as outlined by the University Teacher Education Program. Assessment measures include the continuation examination, graduating senior surveys and exit interviews, public performances, senior projects, course grades, teacher certification (for music education students), and the National Association of Schools of Music accreditation review.

Courses primarily for undergraduate students

Music 101. Fundamentals of Music. (1-2) Cr. 2. F.S. Prereq: Ability to read elementary musical notation. Notation, recognition, execution and analysis of scales, intervals, triads, and rhythm; key signatures; time signatures; transposition. Open to non-majors only.

Music 102. Introduction to Music Listening. (3-0) Cr. 3. F.S. S.S. Expansion of the music listening experiences for the general student through greater awareness of differences in techniques of listening, performance media, and materials of the art. The course focuses on the elements of music: rhythm, melody, tone color, form, and style, and how these elements are used in music of different cultures and time periods. Ability to read or perform music not required.

Music 105. Basic Musicianship. (1-4) Cr. 3. S. Prereq: Performing arts major classification. Beginning keyboard techniques, sight-reading, and ear training. Basic materials of music: notation, scales, intervals, key signatures, time signatures, rhythm, and harmony.

Music 111. Wind Ensemble. (0-3) Cr. 1. Repeatable. F.S. Prereq: Open to all students by audition. Emphasis on significant extended compositions for wind and percussion instruments. Performances include formal concerts on campus and the annual tour.

Music 112. Concert Band. (0-3) Cr. 1. Repeatable. F.S. Prereq: Open to all students who have performed on a wind or percussion instrument in high school band or orchestra. Repertoire includes the broad spectrum of band music. Two concerts are presented each semester.

Music 113. Jazz Ensemble. (0-2) Cr. 1. Repeatable. F.S. Prereq: Open to all students by audition. Designed to explore various styles and trends in contemporary jazz.

Music 114. Marching and Pep Bands. (0-5) Cr. 1. Repeatable. A. Marching Band. F. Membership determined by audition and band application. Auditions held for woodwind, brass, percussion, flag, and twirler positions. Presentation of pre-game and half time shows at each home football game; additional performances are also scheduled on and off campus. Audition information is listed on the band website (www.music.iastate.edu/org/marching). B. Pep Band. S. Prereq: Students selected by audition from current members of 114A. Performances at basketball games.

Music 115. Symphonic Band. (0-3) Cr. 1. Repeatable. F.S. Prereq: Open to all students by audition. Stresses high quality wind literature. Performances include formal concerts on campus.

Music 118. Applied Music: Non-majors. (0-5) Cr. art. Repeatable. F.S.S. Prereq: Audition, permission of instructor. (5-0) for 1 cr. (1-0) for 2 cr. Applied music for the general student. Open only to non-majors. Will not satisfy applied music requirements for music majors.

A. Voice
B. Piano
C. Organ
D. Strings
E. Clarinet
F. Woodwinds
G. Brass
I. Percussion
K. Harpsichord

Music 119. Applied Music: Majors. (0.5-2) Cr. art. Repeatable. F.S.S. Prereq: Audition, permission of instructor; restricted to music majors. (5-0) for 1 cr. (1-2) for 2-3 cr. Minimum weekly practice of 5 hours per credit is expected. Weekly seminar required.

A. Voice
B. Piano
C. Organ
D. Strings
E. Clarinet
F. Woodwinds
G. Brass
I. Percussion
K. Harpsichord

Music 120. Introduction to Music Literature and Styles. (3-0) Cr. 3. S. Prereq. 221. Directed studies via aural analysis for music majors with emphasis on the materials of music, form and aesthetic issues. Introduction to style and literature of the major performance media in context of historical chronology. Fundamentals of score reading and performance terminology. Only one of Music 120 and 302 can count toward graduation.

Music 127. Class Study in Piano I. (0-2) Cr. 1. F.S. Prereq: 101 or audition, and permission of instructor. Beginning keyboard technique, transposition, harmonization, ensemble and solo repertory, and sight-reading skills.

Music 315
Music 128. Class Study in Piano II. (0-2) Cr. 1. F.S. Prereq: 127 or audition, and permission of instructor. Continuation of beginning keyboard technique, transposition, harmonization, and sight-reading skills.

Music 131. Vocal Jazz Ensemble: “Off the Record.” (0-2) Cr. 1. Repeatable. Prereq: Open by audition and permission of instructor; concurrent enrollment in one of the following: 141, 151, 161. Small mixed chorus specializing in advanced vocal jazz techniques. Performances on and off campus.

Music 141. Lyrica Women’s Choir. (0-3) Cr. 1. Repeatable. F.S. Prereq: Open to all female students by audition. Large chorus; emphasis on fundamental vocal and choral skills, wide variety of literature. Campus concerts each semester.

Music 151. Oratorio Chorus. (0-3) Cr. 1. Repeatable. F.S. Prereq: Open to all students by audition. Advanced skills required, high quality literature. Campus concerts, annual spring tour.

Music 219. Applied Music: Majors. (0.5-2) Cr. arr. Repeatable. F.S.S. Prereq: Audition, permission of instructor; restricted to music majors. (0-2) for 1 cr. (1-2) for 2-3 cr. Minimum weekly practice of 5 hours per credit is expected. Weekly seminar required.

Music 221. Introduction to Music Theory. (3-0) Cr. 3. F. Prereq:免除 major status or permission of instructor; concurrent enrollment in 222 recommended. Fluent identification and application of the elements of music and music notation. The study of two-voice species counterpoint as an introduction to voice-leading principles in common practice period music.

Music 222. Introduction to Aural Theory and Music Technology. (0-4) Cr. 2. F. Prereq: Music major status or permission of instructor; concurrent enrollment in 221 recommended. Aural discrimination of musical elements and patterns as demonstrated by proficiency in ear training, sight singing, and related musicianship skills. Introduction to technological equipment and software used in the study of music.

Music 227. Class Study in Piano III. (0-2) Cr. 1. F.S. Prereq: 128 or audition and permission of instructor. Intermediate keyboard technique, transposition, harmonization, improvisation, repertory, and sight-reading skills. Introduction to score reading, hymn playing, and accompanying at the piano.

Music 228. Class Study in Piano IV. (0-2) Cr. 1. F.S. Prereq: 227 or audition and permission of instructor. Continuation of intermediate keyboard technique, transposition, harmonization, improvisation, repertory, score reading, hymn playing, and accompanying at the piano.

Music 319. Applied Music: Majors. (0.5-2) Cr. arr. Repeatable. F.S.S. Prereq: Audition, permission of instructor; restricted to music majors. (0-2) for 1 cr. (1-2) for 2-3 cr. Minimum weekly practice of 5 hours per credit is expected. Weekly seminar required.

Music 324. English and Italian Diction for Singing. (2-0) Cr. 2. Alt. F. offered 2010. Prereq: Credit or enrollment in 118A or 119A. The international phonetic alphabet and its application to correct pronunciation of English and Italian in singing.

Music 325. French and German Diction for Singing. (2-0) Cr. 2. Alt. S., offered 2011. Prereq: Credit or enrollment in 118A or 119A. The international phonetic alphabet and its application to correct pronunciation of French and German in singing.

Music 327. Functional Piano. (0-3) Cr. 2. S. Prereq: 228 or audition and permission of instructor. Emphasis on sight reading, three and four-part score reading, improvisation, accompanying, and advanced harmonization. A. Keyboard majors B. Vocal/choral majors

Music 331. Materials of Music II. (3-0) Cr. 3. F. Prereq: 231. Harmonic, melodic, and rhythmic materials of the common practice period. Application of these materials in analysis and writing. Techniques of melodic construction, formal design, and harmonization.

Music 332. Aural Theory II. (0-2) Cr. 1. F. Prereq: 322. Development of sight singing, ear training, and related musical skills with emphasis on melodic, harmonic and rhythm materials from the nineteenth and twentieth centuries.

Music 337. Materials of Music III. (3-0) Cr. 3. S. Prereq: 331. Writing and analysis based on musical styles since 1900.

Music 338. Aural Theory III. (0-2) Cr. 1. S. Prereq: 322. Development of sight singing, ear training, and related musical skills with emphasis on melodic, harmonic and rhythm materials from the nineteenth and twentieth centuries.
Music 346. MIDI and Digital Audio Techniques. (3-0) Cr. 3. S. Prereq: 246 or permission of instructor. MIDI theory and programming applications, sampling/synthesis control, digital signal processing techniques. Composition projects using integrated audio/MIDI sequencing applications. Nonmajor graduate credit.

Music 353. Instrumental Techniques: Trumpet, Horn, Tuba, Tuba. (0-2) Cr. 1. S. Prereq: 352 or permission of instructor. Concurrent enrollment in 358B. Limited to music majors. Techniques and skills required for teaching of instruments. Examination of materials for school use. Intended for instrumental music education students.

Music 354. Instrumental Techniques: Trombone, Baritone, Tuba. (0-2) Cr. 1. F. Prereq: 253 or permission of instructor. Concurrent enrollment in 358B. Limited to music majors. Techniques and skills required for teaching of instruments. Examination of materials for school use. Intended for instrumental music education students.

Music 358. Lab Ensemble. Cr. R. Repeatable. Review and selection of appropriate literature for ensembles of differing levels and abilities; conducting and rehearsal experience.

Music 366. Methods of Music Education. (2-0) Cr. 2. F. Prereq: Concurrent enrollment in 480K and Sp Ed 450; 266 and admission into teacher education. Music education strategies and materials including development of appropriate objectives and plans for general music classes utilizing traditional and multicultural musics, evaluating musical learning; overview of Orff Schulwerk, Kodaly, and Dalcroze approaches; music in special education; required teaching in lab settings and observations in area schools.

Music 367. Choral Literature. (2-0) Cr. 2. Alt. S., offered 2010. Prereq: 361 recommended. Overview of choral repertoire from the sixteenth century to the present, including accessible works for the young conductor.

Music 368. Marching Band and Jazz Ensemble Techniques. (2-0) Cr. 2. Alt. S., offered 2011. Prereq: Credit or enrollment in 362B recommended. Techniques and materials for teaching marching band in the high school; philosophy, computer assisted drill design, music analysis, band set up, and other related skills. Jazz style, articulation, phrasing, materials and teaching techniques for secondary school jazz ensembles.

Music 383. History of Music I. (3-0) Cr. 3. F. Prereq: 120. History of the stylistic and cultural development of music: Middle Ages through Baroque.

Music 417. Student Teaching. (Cross-listed with CI). Cr. arr. F.S. Prereq: Admission to teacher education, approval of coordinator during semester before student teaching. Evaluation of instruction, lesson planning, and teaching in the liberal arts and sciences.

Music 420. Seminar in Music Theory. (3-0) Cr. 3. S. Prereq: 373, 378. Various topics in music theory including analysis, counterpoint, arranging, pedagogy, and psychology of music. Content will vary. Contact the Department of Music for the current year offering. Nonmajor graduate credit.

Music 446. Electronic Music Synthesis. (3-0) Cr. 3. F. Prereq: 246 or permission of instructor. Techniques of digital sound synthesis, software synthesizer design, and electronic music composition. Nonmajor graduate credit.

Music 466. Program Development and Evaluation in Music Education. (2-1) Cr. 2. F. Prereq: Continuation Examination passed, 362, 366, concurrent enrollment (1 cr.) in 480K. Developing a rationale for music education; program development; evaluation of music curricula, programs and facilities; professional growth of the teacher; preparation for student teaching and the job market. Required observations in area schools.

Music 471. The Tones of Florence - A Study of Humanism. Cr. 3. S. Prereq: Application through the Study Abroad Program; interview with instructor; sophomore classification. A survey of the masterpieces of music, literature, painting, sculpture, architecture, mathematics and theology that made Florence the major European center of humanism in the Renaissance.

Music 472. History of American Music. (3-0) Cr. 3. Prereq: Ability to read music; 9 credits from music, American literature, American history, art history. Offered F. History and development of the sacred and secular music in North America from approximately 1600 to the present, exploring the diverse cultural backgrounds that have contributed to the variety of contemporary musical styles. Nonmajor graduate credit.

K. Music

Courses primarily for graduate students, open to qualified undergraduate students

Natural Resource Ecology and Management

Richard Hall, Interim Chair of Department

University Professors (Emeritus): Athoson, Hinz, McNabb

Professors: Callcott, Hall, Harrington, Jungst, Payne, Schultz

Professors (Emeritus): M. Bachmann, R. Bachmann, Best, Countryman, J. Dinsmore, Hart, Klaas, Manwiller, Menzel, Moorman, Prestemon, Summerfeldt, Wray

Professors (Collaborators): Brandle, Burger, Engle, Isebrands, Otis

Associate Professors: Asbjornsen, S. Dinsmore, Fairbanks, Isenhart, Kuo, Morris, Rule, Thompson

Associate Professors (Emeritus): Pease

Associate Professors (Collaborators): Deutsch, Guntenpergen, Manson, Palik, Rickenbach, Toner

Assistant Professors: Blanchong, Kim, Quist, Randall, Schulte, Stewart, Tyndall

Assistant Professors (Adjunct): Harris, McMullen, Merrick, Pritchard, Roe

Assistant Professors (Collaborators): Koford, Kolka, Miller, Negrieros-Castillo, Pierce, Thogmartin, Westphal

Senior Lecturer: Stokke, Wiersema

Lecturer: O’Brien

The department addresses a broad spectrum of natural resource and environmental issues in a holistic approach to learning, discovery and engagement. Our vision of and understanding of informed protection and management of natural resources involves an integration of biological, economic, and social considerations. Such an integrated and comprehensive approach to the education of future generations of natural resource managers and scientists is needed in order to sustain viable landscapes, facilitate strong communities, and produce desired goods, services, and functions from our natural resources.

Our educational mission for the undergraduate and graduate programs is to provide those learning experiences and opportunities that will ensure students can learn to function effectively in their chosen fields. Central to that effective functioning are the abilities to:

- Identify, explain and critically evaluate their own beliefs, values and actions in relation to professional and societal standards of ethics.
- Anticipate, analyze and evaluate natural resource issues and opportunities, explaining the ecological, economic, and social consequences of natural resource actions at various scales and over time.
- Actively seek the input and perspectives of diverse stakeholders regarding natural resource problems and issues.
- Assess, analyze, synthesize, and evaluate information fairly and objectively.
- Work effectively, both individually and with others, on complex, value-laden natural resource problems that require holistic problem solving approaches.
- Communicate clearly and effectively with all audiences using appropriate oral, visual, electronic, and written techniques.
- Recognize and interpret resource problems and opportunities across spatial scales from local to global.
- Appreciate cultural diversity and understand the impact of the global distribution of people and wealth on natural resource use and valuation.
- Exercise leadership skills as professionals and engaged citizens.
- Demonstrate creativity and innovation in identifying and pursuing opportunities that produce environmental, social, or economic value.
- Exercise life-long learning skills developed before graduation.

Undergraduate Study

The Department of Natural Resource Ecology and Management offers work for the bachelor of science degree with majors in animal ecology or forestry (see College of Agriculture and Life Sciences, Curricula). The department participates in interdisciplinary programs in biology, environmental studies, international studies, and pest management. By proper selection of free and restricted elective courses, students can obtain a minor or a second major in journalism (see Index, Journalism and Communication, Courses and Programs), computer science, or wildlife. Majors preparing for graduate study should consult with their academic adviser concerning appropriate coursework.

Students seeking certification to teach biology in secondary schools must meet requirements of the College of Human Sciences as well as those of the Animal Ecology curriculum. In addition, they must apply formally for admission to the teacher education program (see Index, Teacher Education Program). Students with an interest in careers in outdoor writing are encouraged to obtain a minor in animal ecology (see Index, Journalism and Communication, Courses and Programs). Students who wish to pursue a job as a conservation officer may wish to minor in criminal justice (see Index, Criminal Justice Studies).

The department offers a minor in animal ecology that may be earned by taking 15 credits in the department including 312, 365, NREM 120, plus four additional credits of Animal Ecology courses at the 300 level or above.

Forestry (For)

The forestry curriculum offers courses dealing with the management of forest ecosystems for multiple benefits including wood and fiber products, biodiversity, recreation, water, wilderness, and wildlife. Conservation and preservation of natural resources are emphasized. The department offers work for the bachelor of science degree with a major in forestry and options in forest ecosystem management, interpretation of natural resources, urban and community forestry, sustainable materials science and technology. All options lead to professional degree in...
Graduates understand and can apply scientific principles associated with forests, forest ecosystem management, and wood and non-wood products. Graduates are able to communicate effectively and work well in teams. They are capable of preparing and delivering effective oral and written communication to non-scientific and technical decision makers and lay audiences. They are proficient in technical skills such as measurements, computer usage, inventory, economic analysis, data and situation analysis, and ecosystem assessment. They recognize the importance of ethics in forestry and are sensitive to cultural diversity and broad environmental concerns.

Graduates of the forest ecosystem management option are skilled at understanding how forests function and how forests can be managed to produce desired goods (wood, fiber, recreation, wildlife habitat) and services (clean water, carbon sequestration, wilderness) in the long-run. They are skilled at interpretation of interactions and effects of abiotic and biotic factors in forests and quantification of bio-physical, social, and economic outputs from forest ecosystems. They are skilled at complex decision-making involving private and public forest resources where ethical, social, economic, and ecological dimensions are explicitly considered.

Graduates of the interpretation of natural resource management option are skilled at communicating with the public about the values associated with forest ecosystems and providing educational programs for all ages.

Graduates of the urban and community forestry option are able to combine biological, social, legal, and economic expertise to effectively manage trees or forests in an urban setting. They are skilled at decision-making related to site assessment, and long-term management of urban trees and forests to achieve multiple goals.

Graduates of the natural resource conservation and restoration option are skilled at assessing the natural functions of the environment and human impacts. They are skilled at interpretation of forest and other natural environments and making decisions relating to their conservation and preservation.

Graduates of the sustainable materials science and technology option understand the anatomical, physical, and chemical properties of wood and other bio-renewable materials and know wood processing operations involved in drying, composite materials manufacturing, and chemical treatment. Elective courses related to the forest ecosystem management option can be selected to emphasize plant health, policy and planning, ecology, hydrology, sociology, business administration, or horticulture/design. Elective courses related to the natural resource conservation and restoration option can be selected to emphasize, ecology, wildlife, recreation, nature interpretation, landscape design, sociology and ethics of conservation and preservation. Similarly, elective courses in the sustainable materials science and technology option can be selected to emphasize wood production, bio-renewable materials, wood fiber, business and marketing, and quality assurance. Elective courses in the interpretation of natural resources option can be selected to emphasize natural history, animal ecology, and environmental education.

Many private firms as well as national, regional, state, and local agencies seek forestry graduates to fill positions in management of natural resource processes and to continue the benefits. Graduates in forestry are prepared to be involved with evolving forestry systems, such as agroforestry and urban forestry. Wood processing industries, such as composite products, plywood, particle board, lumber, and pulp and paper offer professional opportunities in production, product development, quality control, and marketing. With advanced graduate study, the range of professional job opportunities for a person with a B.S. in forestry is expanded. Opportunities include research and education as well as more specialized managerial and administrative positions with private firms and public agencies.

During fall semester of the second year of study (sophomore year, typically), forestry students are required to enroll in the department’s integrated forestry modules consisting of 201, 202, 203, 204, 205, and 206. That semester, consisting entirely of forestry coursework, is designed to give students an early understanding of the many aspects of forestry and how they are interrelated. In addition to work in the classroom, students will spend time in laboratory and field work each week. A 3-week off-campus fall camp during the semester will reinforce concepts learned both in the classroom and during laboratory/field sessions. Transfer students should check with the department for counsel on timing the completion of the integrated forestry modules.

The department offers a minor in forestry which can be earned by completion of a minimum of 15 credits in forestry courses. Students wishing to emphasize management and environmental aspects of forestry must select at least 15 credits from the following courses: 302, 356, 451, NREM 120, 301, 345, 390, 407, and 472. Students wishing to emphasize wood products and wood utilization must complete 280 and an additional 12 credits from the following courses: 488, 481, 483, 485, 486, 487, and 490B.

Graduate Study

The Department of Natural Resource Ecology and Management offers work for the degrees of master of science and doctor of philosophy with majors in fisheries biology, forestry, and wildlife ecology. A non-thesis master’s degree is available for students desiring a general degree program without thesis research. Students may also major in interdepartmental graduate majors in bioweb- able resources technology, ecology and evolution- ary biology, environmental science, genetics, plant physiology, sustainable agriculture, or toxicology (see Index). All students are required to teach and conduct research as part of their training for the Ph.D. degree.

Fisheries Biology and Wildlife Ecology

Graduates have a broad understanding of the basic principles of animal biology, ecology and management, and relevant aspects of basic mathematics and natural sciences, computing applications, and personal and professional development. They are able to execute rigorous independent research, have developed problem-solving and critical-thinking skills, and can communicate effectively with scientific colleagues and the general public in both formal and informal settings. Personnel of the U.S. Geological Survey’s Iowa Cooperative Fish and Wildlife Research Unit contribute significantly to the graduate program of the department through teaching and research.

Governmental agencies such as the U.S. Fish and Wildlife Service, Natural Resources Conservation Service and the Iowa Department of Natural Resources, and non-governmental agencies such as The Nature Conservancy and the Iowa Natural Heritage Foundation also contribute to the graduate program by funding research, providing in-kind support, and providing numerous formal and informal mentoring relationships.

No more than two dual-listed animal ecology courses may be applied for major graduate credit. Additional work is expected of students taking a dual-listed course for credit at the 500 level.

Forestry

The department offers programs leading to the degrees of master of science and doctor of philosophy with a major in forestry and minor work to students taking major work in other departments.

Graduates are skilled at defining a research problem in forestry, applying scientific principles and appropriate methods, and analyzing the results. They are capable of understanding the many facets of forest and wood science and are very knowledgeable in specific areas in forestry. They are able to deal with complex forestry problems, and where appropriate, they are capable of blending ecological, social, ethical, legal, and economic factors in the research process. They are very skilled at communicating, both in written and oral form, research results to professional and lay audiences. They are sensitive to cultural diversity and work effectively with peers, natural resource professionals, and the public.

The graduate program is open to, and suitable for, students who have majored in forestry or related natural resource fields. A non-thesis master’s option is available.

The department participates in the Masters in Business Administration (M.B.A.), with specialization in the agriculture program administered by the College of Business, providing an opportunity to obtain an M.B.A. degree while taking advanced courses in forestry and maintaining contact with the profession of forestry.

Animal Ecology (A Ecl)

Courses primarily for undergraduate students

A Ecl 312. Ecology. (Cross-listed with Biol, EnSciCl. G-3: Gr. 4. F.SS. Pre req: Biol 211L and 212L. Fundamental concepts and principles of ecology dealing with organisms, populations, communities and ecosystems. Laboratory and field exercises examine ecological principles and methods as well as illustrate habitats.)

A Ecl 312L. Ecology. (Cross-listed with La LL, EnSciCl. Cr. 4. S.S. An introduction to the principles of ecology at the population, community and ecosystem level. Field studies of local lakes, wetlands and prairies are used to examine factors controlling distributions, interactions, and roles of plants and animals in native ecosystems.)
A Ecl 321. Fish Biology. (2-3) Cr. 3. S. Prereq: 365. Biology, ecology, and evolution of fishes. Emphasis on structure, physiology, and behavior, including a focus on the conservation and management of fishes and their habitats. Laboratory focus on fish morphology, survey methods, identification, distribution, habits, and habitats of fishes. 

A Ecl 326I. Ornithology. (Cross-listed with la LL) Cr. 4. SS. The biology, ecology, and behavior of birds with emphasis on field studies of local avifauna. Group projects stress techniques of population analysis and methodology for population studies.

A Ecl 386. Natural History of Iowa Vertebrates. (2-3) Cr. 3. S. Prereq: Biol 211, 211L, 212, 212L, Vertebrate fauna of Iowa, including fishes, amphibians, reptiles, birds, and mammals. Species identification, habitat requirements, community structure and assessment, conservative issues, historical population changes and value of wild animals to the region's ecological and economic health.

A Ecl 371. Ecological Methods. (Cross-listed with Biol) (2-1) Cr. 3. F. Prereq: 321, Stat 101 or 104. Quantitative techniques used in management of natural resources with emphasis on inventory and manipulation of habitat and animal populations. Nonmajor graduate credit.

A Ecl 401. Introductory Aquatic Animal Health and Medicine. (Cross-listed with B M S I) (2-1) Cr. 1. S. 8 weeks. Introductory course with focus on fin fish production, health and medicine. Course content will help define culture roles for veterinarians, producers, and service providers. Emphasis will be placed on anatomy, pathology, infectious diseases, nutrition, regulatory constraints in production, food safety, and current research. Field trip to aquaculture facility.

A Ecl 404I. Behavioral Ecology. (Cross-listed with la LL) Cr. 4. Alt. SS., offered 2010. Prereq: Two semesters of biology. Animal colonization, courtship, territoriality, predator defense, habitat selection, foraging, mating systems, and parental care will be examined in the field in order to evaluate various ecological and evolutionary theories of animal behavior.

A Ecl 418. Stream Ecology. (Dual-listed with Biol) (2-3) Cr. 3. S. Prereq: 212. Evolution, biology, and classification of fish, amphibians, reptiles, birds, and mammals. Emphasis on a comparative analysis of the structure and function of organ systems, including culture systems, water quality, nutrition, genetics, diseases, and marketing.

A Ecl 442. Aquaculture. (Dual-listed with 541) (2-3) Cr. 3. Alt. S., offered 2010. Prereq: 365, 312 or graduate standing. Concepts related to the culture of aquatic organisms including culture systems, water quality, nutrition, genetics, diseases, and marketing.

A Ecl 441. Fisheries Techniques. (Dual-listed with 541) (2-3) Cr. 3. S. Prereq: 212 and Stat 104. Overview of field, laboratory, and analytical techniques associated with managing fisheries and aquatic resources. Specific topics include experimental design, fish and habitat sampling techniques, structural indices, age and growth, and biometry.

A Ecl 455. International Wildlife Issues. (3-0) Cr. 3. Alt. F. Prereq: 365, 312 or graduate standing; NREM 120. Biological, political, social, and economic factors affecting the management of international natural wildlife resources. Nonmajor graduate credit.

A Ecl 457. Herpetology. (Dual-listed with 557) (2-3) Cr. 3. F. Prereq: 436 or Biol 365 or Biol 365I. Biology, ecology, and evolution of amphibians (salamanders, frogs, caecilians) and reptiles (lizards, snakes, tuataras, turtles, crocodilians). Emphasis on structure, physiological adaptation to different environments, behavior, reproduction, roles of amphibians and reptiles in ecosystems, and conservation. Laboratory focus on survey methods, identification, relationships, distribution, habits, and habitats of amphibians and reptiles.

A Ecl 458. Ornithology. (Dual-listed with 558) (2-3) Cr. 3. F. Prereq: A Ecl 365 or Biol 365I. Biology, evolution, ecology and taxonomy of birds. Emphasis on structure, physiology, behavior, communication, navigation, reproduction, and conservation. Laboratory exercises complement lecture topics, emphasize identification and distribution of Midwest birds, and include field trips.

A Ecl 459. Mammalogy. (Dual-listed with 559) (2-3) Cr. 3. S. Prereq: Biol 361 or A Ecl 365. Biology, ecology, and evolution of mammals. Emphasis on structure, physiological adaptation to different environments, behavior, reproduction, roles of mammals in ecosystems, and conservation. Laboratory focus on identification, distribution, habits, and habitats of mammals.

A Ecl 480. Studies in Marine Biology. Cr. arr. Repeatable. SS. Courses taken at Gulf Coast Research Laboratory and other marine biological stations are transferred to Iowa State University under this number.

A Ecl 486. Aquatic Ecology. (Cross-listed with Biol, EnSci) (3-0) Cr. 3. F. Prereq: Biol 312 or EnSci 381 or EnSci 402 or NREM 301. Structure and function of aquatic ecosystems with application to fishery and pollution problems. Emphasis on ecosystem basis of marine and wetland ecology. Nonmajor graduate credit.

A Ecl 486L. Aquatic Ecology Laboratory. (Cross-listed with Biol, EnSci) (0-3) Cr. 1. F. Prereq: Concurrent enrollment in 486. Field trips and laboratory exercises to accompany 486. Hands-on experience with aquatic research and monitoring techniques and concepts. Nonmajor graduate credit.

Courses primarily for graduate students, open to qualified undergraduate students

A Ecl 515. Ecology of Freshwater Invertebrates, Plants, and Algae. (2-3) Cr. 3. F. Prereq: 312. Emphasis on structure, physiology, and ecological requirements of freshwater invertebrates, plants and algae. Additional emphasis on community sampling methods and analysis, and use of organisms as tools for aquatic ecosystem health assessment.

A Ecl 518. Stream Ecology. (Dual-listed with 418) (Cross-listed with EnSci) (2-3) Cr. 3. Alt. F. Prereq: 486. Biological, chemical, physical, and geological processes that determine the structure and function of flowing water ecosystems. Current ecological theories as well as applications to stream management for water quality and fisheries.

A Ecl 523. Fish Ecology. Cross-listed with la LL. Cr. 4. Alt. SS., offered 2010. Basic principles of fish interaction with the biotic and abiotic environment. Field methods, taxonomy, and biology of fish with emphasis on the fish fauna of northeastern Iowa.

A Ecl 525. Aquatic Insects. (Dual-listed with 425) (Cross-listed with Ent) (2-3) Cr. 3. Alt. S., offered 2011. Prereq: Biol 312 or equivalent. Morphology, ecology, diversity and significance of aquatic insects, with emphasis on the collection, curation and identification of taxa in local streams and lakes.

A Ecl 526I. Advanced Field Ornithology. (Cross-listed with la LL) Cr. 2. SS. Prereq: Concurrent registration in la LL 326I. Field study of birds of the upper Midwest; extended field trip to Minnesota and Wisconsin; individual or group project.

A Ecl 531. Conservation Biology. (Cross-listed with EEOB) (3-0) Cr. 3. Alt. S., offered 2010. Prereq: Biol 312 or equivalent. Morphology, ecology, diversity and significance of aquatic insects, with emphasis on the collection, curation and identification of taxa in local streams and lakes.

A Ecl 540. Fishery Management. (Dual-listed with 448) (2-3) Cr. 3. F. Prereq: 312, 321; credit or enrollment in 321. Concepts related to the culture of aquatic organisms including culture systems, water quality, nutrition, genetic, diseases, and marketing.

A Ecl 541. Fisheries Techniques. (Dual-listed with 441) (2-3) Cr. 3. F. Prereq: 321 and Stat 104. Overview of field, laboratory, and analytical techniques associated with managing fisheries and aquatic resources. Specific topics include sampling design, fish and habitat sampling techniques, structural indices, age and growth, and biometry.

A Ecl 542. Aquaculture. (Dual-listed with 442) (3-0) Cr. 3. Alt. S., offered 2010. Prereq: 485, credit or enrollment in 321. Concepts related to the culture of aquatic organisms including culture systems, water quality, nutrition, genetic, diseases, and marketing.

A Ecl 557. Herpetology. (Dual-listed with EOB 457). (Cross-listed with EEOB). (2-3) Cr. 3. S. Prereq: A Ecl 365 or Biol 351. Biology, ecology, and evolution of amphibians (salamanders, frogs, caecilians) and reptiles (lizards, snakes, tuataras, turtles, crocodilians). Emphasis on structural and functional adaptation to different environments, behavior, reproduction, roles of amphibians and reptiles in ecosystems, and conservation. Laboratory focus on survey methods, identification, relationships, distribution, habits, and habitats of amphibians and reptiles.

A Ecl 559. Ornithology. (Dual-listed with EOB 459). (Cross-listed with EEOB). (2-3) Cr. 3. S. Prereq: A Ecl 365 or Biol 351. Biology, evolution, ecology and taxonomy of birds. Emphasis on structure, physiology, behavior, communication, navigation, reproduction, and conservation. Laboratory exercises complement lecture topics, emphasize identification and distribution of Midwest birds, and include field trips.

A Ecl 570. Landscape Ecology. (Cross-listed with EEBO). (2-3) Cr. 3. Alt. F., offered 2010. Prereq: Permission of instructor; EEOB 588: A course in calculus. The study of ecological and evolutionary processes within a spatial context with emphasis on behavior, population, and community dynamics.

A Ecl 573. Techniques for Biology Teaching. (Cross-listed with la LL, EEOB). Cr. arr. Repeatable. SS. Emphasis on teaching strategies and strategies for teaching undergraduate biology. Laboratory exercises are designed to improve teaching strategies.

A Ecl 589. Population Ecology. (Cross-listed with EEBO). (2-1) Cr. 3. F. Prereq: Biol 312, Stat 101 or 104, a course in calculus, or graduate standing. Concepts and theories of population dynamics with emphasis on models of growth, predation, competition, and regulation.

A Ecl 5901. Graduate Independent Study. (Cross-listed with la LL, EEOB, Anth). Cr. arr. Repeatable. SS. Prereq: Graduate classification and permission of instructor.

A Ecl 599. Creative Component. Cr. arr. Prereq: Nonthesis M.S. option only. Courses primarily for graduate students

A Ecl 600. Seminar. (2-0) Cr. 1. Repeatable. FS. Current topics in ecological research, fish and wildlife management, and environmental issues related to fish or wildlife resources.

Forestry (For)

Courses primarily for undergraduate students

For 201. Forest Biology. (2-0) Cr. 2. F. Prereq: Concurrent enrollment in 202, 203, 204, 205, and 206. Discussion of ecological concepts, individual tree structure and growth, variation and diversity in tree populations. Physical environment of trees and forests, ecological processes in forest communities, and introduction to different regional forest communities.

For 202. Wood Utilization. (2-0) Cr. 2. F. Prereq: Concurrent enrollment in 201, 203, 204, 205, and 206. Processing of sustainable materials including wood into products and general properties and proper use of these products.

For 204. Forest Ecosystem Decision-Making. (2-0) Cr. 2. F. Prereq: Concurrent enrollment in 201, 202, 203, and 205. Methods of decision-making related to forest ecosystems including communications, teams and conflict resolution. Current issues relating to public, private, and urban forests; quantification of processes, services, and goods produced by the forest and expected by the public such as wildlife, water, range, recreation, wilderness, biodiversity, as well as wood and fiber products.

For 205. Integrated Forestry Laboratory. (0-0) Cr. 3. F. Prereq: Concurrent enrollment in 201, 202, 203, 204, and 206. Field and laboratory exercises integrating the evaluation and management of forest goods, services, and the processing of wood products.

For 206. Fall Forestry Camp. Cr. 4. F. Prereq: Concurrent enrollment in 201, 202, 203, 204, and 205. Three-week field camp to address topics and issues covered in 201, 202, 203, 204, and 205.

For 280. Wood Properties and Identification. (3-3) Cr. 4. S. Properties of wood and how they relate to its successful use. Comparative anatomical characteristics, scientific nomenclature, and hand lens identification of commercially important North American woods.

For 283. Pesticide Application Certification. (Cross-listed with Ent, Agron, Hort). (2-0) Cr. 2. S. Prereq: Core background and specialty topics in agricultural, and horticultural pesticide applicator certification. Students can select certification categories and have the opportunity to obtain pesticide applicator certification at the completion of the course. Commercial pesticide applicator certification is emphasized.

For 302. Silviculture. (2-3) Cr. 3. S. Prereq: 201. Manipulation of forest vegetation based on ecological principles for the production of fiber and wood. Nonmajor graduate credit.

Methods for assessing tree growth and reconstructing past stand development. Applications to forest and savanna management. Nonmajor graduate credit.

For 416. Forest Insect and Disease Ecology. (Cross-listed with PI P). (3-3) Cr. 4. S. Prereq: 8 credits in biology, forestry, or environmental science. Identification of insects and pathogens of forest and shade trees; their role in the dynamics of natural and managed forest ecosystems; and the management of indigenous and exotic pests. Nonmajor graduate credit.

For 451. Forest Resource Economics and Quantitative Methods. (3-3) Cr. 4. S. Prereq: Econ 203, Econ 101, Math 150. Application of economic principles to forest resource management considering both market and non-market goods and services. Methods of identifying and specifying problems in the management and use of forest resources. Development of mathematical and statistical models to the solution of managerial problems. Nonmajor graduate credit.

For 452. Ecosystem Management. (Cross-listed with NREM). (2-3) Cr. 3. F. Prereq: Junior classification, and NREM 301 or A Ecl 312. Principles of planning, regulating, and decision-making associated with public and private lands, with consideration of forest, grassland, wetland, and freshwater aquatic ecosystems. Integrated natural resources management within ecological, social, economic and policy constraints. Nonmajor graduate credit.

For 453. Forest Resource Policy and Administration. (3-3) Cr. 3. S. Prereq: Junior or senior classification. Forest and related natural resource policies and contemporary policy issues. Integration of elements of policy development processes, various participants in these processes, and resulting programs. Ethics in professional forestry and natural resource conservation, and conflict resolution. Participation in the policy process involving communication with policy makers and natural resource professionals, study of current issues, promotion of issues with students as issue educators. Participation in policy meetings to identify/determine various elements and applications of strategies associated with the policy development process. Nonmajor graduate credit.

For 454. Forestry Practicum. (1-4) Cr. 3. S. Prereq: 20 credits in student’s major at 300 level or above. Internship designed to provide the opportunity to work in positions related to the management, preservation of private and public forests, wildlands, urban/community forests, and/or the production and utilization of wood products. Student teams work with a client and develop management plans that incorporate ecological, social, economic, ethical, and institutional/policy factors. Effective teamwork, written/oral/visual communication, and problem-solving stressed. Multiple trips to project site and client. Nonmajor graduate credit.

For 475. Urban Forestry. (Cross-listed with Hort). (2-3) Cr. 3. F. Prereq: Junior or senior classification, 3 credits in biology. Discussion of establishment and management of woody perennials in community-owned urban greenspaces, consideration of urban site and soil characteristics, plant physiology, plant culture, urban forest value, inventory methods, species selection, and urban forest maintenance (health care and pest management). Nonmajor graduate credit.

Courses primarily for graduate students, open to qualified undergraduate students

For 599. Creative Component. Cr. arr. Repeatable. A. Forest Biology
B. Forest Biometry
C. Forest and Recreation Economics
D. Forest Management and Administration
E. Wood Science

Courses for graduate students

For 603. Plant Physiological Ecology. (4-0) Cr. 4. Alt. F., offered 2010. Prereq: NREM 301 or a course in plant physiology. Structural and functional adaptations in woody and herbaceous plant species to environmental variables, with an emphasis on understanding relationships between physiological processes at the whole plant scale with ecosystem processes related to nutrient, water, and carbon cycling. Plant physiological responses to natural disturbances, management practices, global climate change, and other forces of environmental change.

For 699. Research. Cr. arr. Repeatable. A. Forest Biology - Wood Science
B. Forest Biometry
C. Forest Economics
D. Forest Management and Administration
E. Wood Science
F. Plant Physiology

Natural Resource Ecology and Management (NREM)

Courses primarily for undergraduate students

NREM 104. Practical Work Experience. Cr. R. Three months of relevant work experience in natural resources, animal husbandry. Study at a summer biological station may be applicable. See adviser for specific requirements and approval process.

NREM 111. NREM Transitions Learning Community Seminar. (1-0) Cr. 1. F.S. Enrollment limited to members of the NREM Transitions Learning Community. Designed to assist new transfer students and continuing sophomore students with their transition to the academic expectations and professional development aspects of the natural resource program. Satisfactory-fail only.

NREM 112. Orientation to Learning and Productive Team Membership. (Cross-listed with A E, F S HN, Hort, TSM). (2-0) Cr. 2. F. Introduction to developing intentional learners and worthy team members. Learning as the foundation of human enterprise; intellectual curiosity; ethics as a personal responsibility; everyday leadership; effective team and community interactions including team learning and the effects on individuals; and growth through understanding self, demonstrating ownership of own learning, and internalizing commitment to helping others. Intentional mental processing as a means of enhancing learning. Interconnectedness of the individual, the community, and the world.

NREM 114. Developing Responsible Leaders and Effective Leaders. (Cross-listed with F S HN, Hort, TSM). (2-0) Cr. 2. S. Focus on team and community. Application of fundamentals of human learning; evidence of development as a responsible learner; intentional mental processing as a habit of mind; planning and facilitating learning opportunities for others; responsibility of the individual to the community and the world; leading from within; holding self and others accountable for growth and development as leaders and learners.

NREM 120. Introduction to Renewable Resources. (Cross-listed with Agron, Env S). (3-0) Cr. 3. F.S. Overview of soil, water, plants, and animals as renewable natural resources in an ecosystem context. History and organization of resource management. Concepts of integrated resource management.

NREM 130. Natural Resources and Agriculture. (Cross-listed with Env S). (3-0) Cr. 3. S. Survey of the ecology and management of fish, forest, and wildlife resources in areas of intensive agriculture, with emphasis on Iowa. Conservation and management practices for private agricultural lands. Designed for nonmajors.

NREM 211. Careers in Natural Resources. Cr. 1. F.S. Prereq: Sophomore classification. Career planning exploration in natural resources. Discussion of the job application process, including techniques for successful interviewing and development of an effective resume. Satisfactory-fail only.

NREM 256. Midwestern Prairie Plants. (1-2) Cr. 1. F. Offered 1st half semester only. Survey of the major plant families, genera, and representative species of Midwestern prairies with emphasis on plant identification and use of keys. Prairie restoration, conservation, and management techniques will also be considered.

NREM 285. The Natural Parks: Culture and Nature. (Cross-listed with L A). (2-0) Cr. 1. F. Offered 2010. Reviews cultural setting for park establishment and management, ideas about wilderness, and philosophy of parks as types of land use. History of landscape architecture in the National Park Service, the development of American parks, the history of park wildlife management and nature interpretation. Recent initiatives in ecosystem management, community conservation, and international points of comparison. Readings, discussion, exercises.

NREM 301. Natural Resource Ecology and Soils. (Cross-listed with EnSci). (3-3) Cr. 4. F. Prereq: Biol 211, 211L, For 201 or a second course in biology. Effects of environmental factors on ecosystem structure and function using forest, prairie and agricultural ecosystems as models. Special emphasis is given to soil-forming factors and the role of soil in nutrient and water cycling and ecosystem dynamics. Additional emphasis is given to human influences on natural ecosystems and the role of perennial plant communities in agricultural landscapes. Nonmajor graduate credit.

NREM 303. Internship. Cr. arr. Repeatable. F.S.S. Prereq: Permission of instructor and sophomore standing. Placement with county conservation boards, camps, zoos, parks, etc., for experience as interpreters, rangers, and technicians.

NREM 303I. Undergraduate Internship. (Cross-listed with la LL). Cr. arr. Repeatable. F.S. Prereq: Permission of instructor. Current topics in natural resources or related issues.

NREM 330. Interpretation of Natural Resources. (2-3) Cr. 3. S. Prereq: 6 credits in biological sciences. History, objectives, forms, and techniques of natural resource interpretation in the settings of county, state, national parks, and zoos.

NREM 390. Fire Ecology and Management. (3-0) Cr. 3. F. Characteristics and role of fire in forest ecosystems. Major topics covered include fuels, fire weather, fire behavior, fire danger rating systems, fire control, prescribed burning, and fire dynamics in major ecosystem types. Nonmajor graduate credit.

NREM 402. Watershed Hydrology. (Cross-listed with Agron, Geol, Meteor). (3-0) Cr. 4. F. Prereq: Four courses in physical or biological sciences or engineering; junior standing. Examination of watersheds as systems, emphasizing the surface components of the hydrologic cycle. Combines qualitative understanding of hydrologic processes and uncertainty with quantitative representation. Laboratory emphasizes field investigation and measurement of watershed processes. Nonmajor graduate credit.

NREM 430. Media Techniques in Natural Resources Interpretation. (3-0) Cr. 3. Alt. F., offered 2009. Prereq: 330. Media techniques used by interpreters for teaching the public about natural resources. Nonmajor graduate credit.

NREM 446. Integrating GPS and GIS for Natural Resource Management. (Dual-listed with 446.) (Cross-listed with EnSc). (2-2) Cr. 3. S. Prereq: 12 credits in student’s major at 300 level or above, NREM 345 or equivalent experience with ArcGIS. Emphasis on the use of GPS as a data collection tool for GIS. Basic theory of GPS. Use of Global Positioning System technology for spatial data collection and navigation. Post-processing and real-time correction of GPS data. GPS data transfer to GIS for mapping applications. Use of GIS to construct waypoints for use in GPS navigation.

NREM 454. Ecosystem Management. (Cross-listed with Forl. (2-2) Cr. 3. S. Prereq: Junior classification, and NREM 301 or A Ec 312. Principles of planning, regulating, and decision-making associated with public and private lands, with consideration of forest, grassland, wetland, and freshwater aquatic ecosystems. Integrated natural resources management within ecological, social, economic and policy constraints. Nonmajor graduate credit.

NREM 460. Controversies in Natural Resource Management. (Cross-listed with Env S). (3-0) Cr. 3. F S. Prereq: 120, and A Ec 312 or NREM 301; and Junior classification. Analysis of controversial natural resource issues using a case approach that considers uncertainty and adequacy of information and scientific understanding. Ecological, social, political, economic, and ethical implications of issues will be analyzed. Nonmajor graduate credit.

NREM 465. Landscape Change and Conservation. (Dual-listed with 565.) (Cross-listed with LA). (3-0) Cr. 3. F. Prereq: LA 202. Exploration of issues in landscape ecology and conservation biology relevant to landscape change, design, and planning. Examination of foundational principles and their applications across a continuum of land uses, from wilderness to urban areas.

NREM 472. Landscape Ecology and Natural Resource Management. (Dual-listed with 572). (2-2) Cr. 3. F. Prereq: NREM 301 or A Ec 312 or equivalent and NREM 345 or CR F 451 or equivalent. Analysis and management of spatial patterns and processes in populations, communities, and ecosystems with emphasis on broad spatial scales. Human influences on natural systems are strongly considered.

NREM 490. Independent Study. Cr. arr. Repeatable. Prereq: Junior or senior classification, permission of instructor. A Animal Ecology B Forestry E Entrepreneurship H Honors Program

NREM 490I. Undergraduate Independent Study. (Cross-listed with la LL). Cr. arr. Repeatable. Prereq: Junior or senior classification and permission of the instructor.

NREM 493. Workshop. Cr. arr. Repeatable. Prereq: Permission of instructor. Ecological concepts and management practices for landowners, teachers and others. Not for students majoring in animal ecology or forestry. NREM 493 may be taken more than once for graduation credit.

NREM 496. Travel Course. (Dual-listed with 596). Cr. arr. Repeatable. Prereq: Permission of instructor. Limited enrollment. Extended field trips to study ecological and management topics in varied environments. Location and duration of trips will vary. Pre-trip sessions arranged. Trip expenses paid by students. A International B Domestic

NREM 498. Cooperative Education. Cr. arr. Prereq: Permission of departmental chair. Required of all cooperative education students. Students must register prior to commencing each work period.

Courses primarily for graduate students, open to qualified undergraduate students

NREM 501. Genealogy. (3-0) Cr. 3. Alt. F., offered 2009. Prereq: Gen 320 or Biol 313. Genealogy principles and concepts applied to approved populations of plants and animals. Genetic systems as they interact with long-term natural selection to produce clonal or ecotypic variation. The impact of current environments and genetic modifications of domesticated organisms on short-term selection pressures. Special coverage of species of interest to students enrolled in the course.

NREM 504. Forest Landscapes, Wildlife, and Silviculture. (3-3) Cr. 4. Alt. F., offered 2010. Prereq: 301. Detailed analysis of factors and processes underlying forest distribution and stand growth and development. Applications of this knowledge to forest culture to support a diversity of use and protection objectives. Discussions of regional silviculture, tropical forests, and experimentation in forest biology.

NREM 505. Seminar. (2-0) Cr. 1. Repeatable. F S. Prereq: Permission of instructor or graduate classification. Current topics in natural resources research and management.

NREM 507. Watershed Management. (Dual-listed with 407). (Cross-listed with EnSc). (3-3) Cr. 4. S. Prereq: A course in general biology. Managing human impacts on the hydrologic cycle. Field and watershed level management practices for modifying the impacts on water quality, quantity and timing are discussed. Field project includes developing a management plan using landscape buffers.

NREM 508I. Aquatic Ecology. (Cross-listed with la LL, EnSc). Cr. 4. SS. Prereq: Courses in ecology, chemistry, and physics. Analysis of aquatic ecosystems; emphasis on basic ecological principles; ecological theories tested in the field; identification of common plants and animals.

NREM 529. Publishing in Biological Sciences Journals. (Cross-listed with Agron, Hort). (2-0) Cr. 2. S. Prereq: Permission of instructor; evidence of a publishable unrefereed research data. Process of preparing a manuscript for submission to a refereed journal in the biological sciences. Emphasis on publishing self-generated data from thesis or dissertation research.

NREM 532. Human Dimensions of Natural Resource Management. (3-3) Cr. 3. Alt. F., offered 2010. Prereq: A Ec 312 or equivalent plus 6 credits of biological sciences; permission of instructor. Exploration of institutions that help shape natural resource management and policies. Current research on interaction of humans with natural resources. Roles of social forces, politics and economics in natural resource management.

NREM 535. Restoration Ecology. (Cross-listed with EnSc, EEOB). (2-3) Cr. 3. F S. Prereq: Biol 366 or 474 or graduate standing. Theory and practice of restoring animal and plant diversity and function of disturbed ecosystems. Restored freshwater wetlands, forests, prairies and reintroduced species populations will be used as case studies.

NREM 545. Integrating GPS and GIS for Natural Resource Management. (Dual-listed with 446). (Cross-listed with EnSc). (2-3) Cr. 3. S. Prereq: 12 credits in student’s major at 300 level or above, NREM 345 or equivalent experience with ArcGIS. Emphasis on the use of GPS as a data collection tool for GIS. Basic theory of GPS. Use of Global Positioning System technology for spatial data collection and navigation. Post-processing and real-time correction of GPS data. GPS data transfer to GIS for mapping applications. Use of GIS to construct waypoints for use in GPS navigation.

NREM 565. Landscape Change and Conservation. (Dual-listed with 465). (Cross-listed with LA). (3-0) Cr. 3. F S. Prereq: LA A 202. Exploration of issues in landscape ecology and conservation biology relevant to landscape change, design, and planning. Examination of foundational principles and their applications across a continuum of land uses, from wilderness to urban areas.

NREM 572. Landscape Ecology and Natural Resource Management. (Dual-listed with 472). (2-2) Cr. 3. F S. Prereq: NREM 301 or A Ec 312 or equivalent and NREM 345 or CR F 451 or equivalent. Analysis and management of spatial patterns and processes in populations, communities, and ecosystems with emphasis on broad spatial scales. Human influences on natural systems are strongly considered.

NREM 580. Research Orientation. (2-0) Cr. 2. F S. Prereq: 20 credits in biological sciences and a course in statistics. Research design, proposal preparation, and technical writing.

NREM 581. Methods for Presenting Scientific Re-sults. (2-0) Cr. 2. S. Prereq: Permission of instructor. Techniques of proper platform presentation. Discussion of effective audiovisual aids or presentation of research findings. Practice in development of overheads and slides. Use of computer generated and projected visuals. Practice in oral presentation with critical review. Development of effective posters for scientific presentation.

Further information is available from the Professor of Naval Science, Iowa State University. While in the NROTC Program, students will participate with pay) in summer at-sea training cruises. Students are also exposed to regular and extracurricular activities that teach leadership principles and help them decide which field of the Navy or Marine Corps they wish to enter. These activities also include weekly leadership laboratory periods and opportunities for involvement in several student societies.

Undergraduate Study

Navel science courses are primarily for those students in the NROTC program, however, other university students may also enroll. Students enrolled in the NROTC program must fulfill the following requirements:

2. All NROTC students must complete one course in American military history or national security policy. A course in non-western culture or religion is also required of all Navy-option students.
3. All Navy option scholarship students must successfully complete Math 165 and 166 by the end of the sophomore year and Phys 221 and 222 by the end of the junior year.
4. In addition to the normal Naval Science courses, all NROTC students are required to participate in laboratory periods that supplement the various academic courses. The Leadership Lab emphasizes human relations, teaches basic military formations, movements, commands, courtesies, and honors, and provides practice in unit leadership. Non-NROTC program students enrolled in Naval Science courses are not required to participate in laboratory periods.
5. Navy option scholarship students are encouraged to major in engineering and physical sciences to meet the technological requirements of the modern Navy. Students with a Navy-option scholarship and Marine Corps-option students may pursue any major leading to a Bachelor’s Degree.
6. The College of Liberal Arts and Sciences offers a minor in military studies. Requirements for the minor include taking a minimum of 15 credits of ROTC instruction, which may be taken from any of the three ROTC programs offered on campus. At least 6 credits must be in courses numbered 300 or above.

Courses primarily for undergraduate students

N S 111. Introduction to Naval Science. (3-0) Cr. 3. F. Introduction to the organization, regulations, and capabilities of the Navy, with emphasis on mission and principal warfare components.
N S 212. Seapower and Maritime Affairs. (3-0) Cr. 3. S. Requests to waive this prerequisite must be approved by Naval Science Department. Development of concept of seapower including the historical perspective of the Merchant Marine; role of various warfare components of the Navy in supporting the Navy’s mission; implementation of seapower as an instrument of national policy; evolution and network-centric warfare and review of Cold War naval strategy.
N S 220. Leadership and Management. (3-0) Cr. 3. S. Experiential approach to learning the principles of leadership and management by examining business management theories and their applications. Skills are developed in the areas of communication, counseling, control, direction, management, and leadership through active guided participation.
N S 320. Navigation. (3-0) Cr. 3. S. Prereq: Sophomore classification. Requests to waive this prerequisite must be approved by Naval Science Department. Study of the fundamentals of marine navigation used by ships at sea; in-depth practical exercises in piloting using visual and electronic means. In-depth discussion of laws that govern conduct of vessels in national/international waters. Course is supplemented with review/analysis of case studies involving actual navigation incidents.
N S 320. Naval Ship Systems I (Engineering). (3-0) Cr. 3. F. Prereq: Physics 221, sophomore classification. Requests to waive this prerequisite must be approved by Naval Science Department. An introduction to naval engineering with emphasis on the equipment and machinery involved in the conversion of energy for propulsion and other purposes aboard the major ship types of the U.S. fleet. Basic concepts of the theory and design of steam, gas turbine, diesel, and nuclear propulsion. Introduction to ship design, stability, hydrodynamic forces, compartmentation, electrical and auxiliary systems.
N S 321. Evolution of Warfare. (3-0) Cr. 3. Alt. F. offered 2009. Prereq: Sophomore classification. Requests to waive this prerequisite must be approved by Naval Science Department. Evolution of warfare from 3500 B.C. to contemporary times; analysis of the impact of historical precedents on modern military thought and action; emphasis on the historical development of military tactics, strategy, and technology.
N S 330. Naval Ship Systems II (Weapons). (3-0) Cr. 3. S. Prereq: Physics 221, sophomore classification. Requests to waive this prerequisite must be approved by Naval Science Department. Introduction to the theory and principles of operation of naval weapon systems. Included coverage of types of weapons and fire control systems, capabilities and limitations; theory of target acquisition, identification and tracking; basics of naval ordnance.
N S 410. Naval Operations and Seamananship. (3-0) Cr. 3. F. Prereq: Senior classification. Requests to waive this prerequisite must be approved by Naval Science Department. Study of naval tactical operations; employs practical use of maneuvering boards together with shipping and sailing principles to arrive at tactical shipboard maneuvering solutions for single ship and formation operations. Study also of command and control, leadership, and ethics issues associated with surface naval operations.
N S 412. Leadership and Ethics. (3-0) Cr. 3. S. Prereq: For NROTC students only - N S 111, N S 212 or Hist 389, N S 220, N S 230, N S 320, N S 330 and N S 410. Requests to waive this prerequisite must be approved by Naval Science Department. Basic background concerning the duties and responsibilities of the junior naval officer and division officer in the areas of integrity and ethics, human resources management, personnel management, material management, and the administration of discipline. Preparation for responsibilities encountered immediately upon commissioning.
N S 421. Evolution of Amphibious Warfare. (3-0) Cr. 3. Alt. F. offered 2010. Prereq: Sophomore classification. Requests to waive this prerequisite must be approved by Naval Science Department. Defines the concept of amphibious operations, origins, development from 600 B.C.
N S 440. Senior Naval Science Seminar. (1-0) Cr. 1. F. Prereq: Senior classification. Requests to waive this prerequisite must be approved by Naval Science Department. Current leadership issues in the Navy which will challenge the newly commissioned officer. Opportunities to analyze, provide solutions, and discuss actions related to a variety of real world situations.
N S 490. Independent Study. Cr. arr. Repeatable. Prereq: Senior classification and prior approval of Naval Science Department Chair; 6 credits in naval science. No more than 9 credits of N S 490 may be counted toward graduation.

Neuroscience
www.neuroscience.iastate.edu/  
(Interdepartmental Graduate Program)  
Co-Chairs: D. Sakaguchi, R. Martin  

Graduate Study
Work is offered for the master of science and doctor of philosophy degrees with a major in neuroscience. Cooperating departments include Animal Science; Biochemistry, Biophysics and Molecular Biology; Biomedical Sciences; Chemical and Biological Engineering; Chemistry; Ecology, Evolution and Organismal Biology; Genetics, Development and Cell Biology; Kinesiology; and Psychology.
Facilities and faculty are committed to research in the following areas: neuronal membrane functions, signal transduction, neuroanatomy, neurodegenerative diseases, neuroendocrinology, neurotoxicology, neuropathology, developmental neurobiology, neurogenetics, computational neuroscience, neural networks, and behavioral neuroscience.

An undergraduate or advanced degree in the sciences is ordinarily a prerequisite for admission to the program. A student majoring in neuroscience will select a major professor from the faculty participating in the program. All students take a core curriculum consisting of Neuro 556, 557, 661, 690, 696, BBMB 404, and Stat 401. All students are also expected to take elective neuroscience courses from the following: B M S 537, 575; Com S 474; E E 545; Psych 517, 519; and Tox 501.

Courses for graduate students

Neuro 556. Cellular, Molecular and Developmental Neuroscience. (Cross-listed with GDCB, B M Sl. Cr. arr. F. Prereq: Biol 335 or Biol 436; physics recommended. Fundamental principles of neurosci- ence including cellular and molecular neuroscience, nervous system development, sensory, motor and regulatory systems.

Neuro 661. Current Topics in Neurobiology. (Cross-listed with GDCB, BBMB). Cr. arr. Repeatable. Prereq: Permission of instructor. Topics may include communi- cation, hormones and behavior, neural integration, membrane biophysics, molecular and cellular neurosci- ence, developmental neurobiology, neuroanatomy and ultrastructure, sensory biology, social behavior, techniques in neuroscience and behavior.

Neuro 690. Journal Club in Neuroscience. (1-0) Cr. 1. Repeatable. Prereq: Neuro 556. Students are required to attend and make at least one presentation at a weekly journal club focusing on current topics.

Neuro 696. Neuroscience Seminar. (1-0) Cr. 1. Repeatable. F.S. Prereq: 556. Presentations and discussion of research by students, faculty, and visiting scholars.

Nuclear Engineering
www.iastate.edu/~nuclearengineering

Minor administered by Mechanical Engineering

The nuclear engineering undergraduate minor allows engineering students to acquire a formal background in nuclear engineering topics that will not only benefit them, but also fulfill a societal need for future hiring of engineers. Through this program, students can enroll in a formal minor that enables them to acquire a basic and funda- mental knowledge of nuclear sciences and engi- neering, thus enabling them to pursue employ- ment in any one of a number of fields associated with the construction, operation or regulation of nuclear power generation.

Students completing this minor acquire a body of knowledge in the fundamentals of nuclear science and engineering. The required courses selected ensures that all graduates of the nuclear engineer- ing minor obtain a minimum body of knowledge in nuclear science and engineering that would allow them to apply their specialized field of engineering knowledge to nuclear-related applications, such as nuclear plant and site construction, nuclear power plant operations, nuclear safety and radiation protection.

The supporting courses that are listed in this program provide an opportunity for students to build upon the knowledge gained in the required courses by taking either more advanced courses or more specialized courses dealing with specific areas of nuclear engineering.

Undergraduate Study

Students interested in completing the nuclear engi- neering minor must be enrolled in the College of Engineering at Iowa State University. They should complete and submit the “Request for Minor” form. The selection process is based on approval by the administering department, Mechanical Engineering.

The course requirements for the undergrad- ate minor in nuclear engineering are: Required courses (6 credits) – Nuc E 401, 3 cr., Nuc E 402, 3 cr., and Nuc E 409, 3 cr.; Supporting courses (select two for 6 credits)– Nuc E 410, 3 cr., Nuc E 411, 3 cr. Nuc E 490, 3 cr., or M E 433, 3 cr. The minor must include at least nine credits which are beyond the total used to meet cur- riculum requirements for the bachelors degree in engineering.

Interinstitutional Program: Contact: Gregory Maxwell
Participating Faculty: Iowa State University
Gregory Maxwell, gmmaxwell@iastate.edu
Carolyn Heising, cheising@iastate.edu

Kansas State University
William Dunn, dunn@ksu.edu
Kenneth Shultis, jks@ksu.edu

University of Missouri Columbia
Mark Prels, PrelasM@missouri.edu

University of Texas at Austin
Sheldon Landsberger, s.landsberger@mail.utexas.edu

Nuclear engineering courses are provided through an inter-institutional distance education program offered through the Web. Some of the courses that comprise this minor are offered at Iowa State University, while others are offered through four of the Big 12 Engineering Consortium universities that have formal nuclear engineering depart- ments or programs. The four universities offering an assortment of nuclear engineering courses via web-based distance education are Texas A & M (TAMU), the University of Missouri Columbia (UMC), Kansas State University (KSU) and the University of Texas at Austin (UTA).

Courses primarily for undergraduate students

Nuc E 405. Radiation Protection and Shielding. (3-0) Cr. 3. Prereq: 401. WWW only. Basic principles and concepts of radiation protection and design: dosimetric units and response functions, hazards of radiation dose, radiation protection, basic methods for dose evaluation, and shielding design techniques for photons and neutrons.

Nutritional Sciences
(Interdepartmental Graduate Major)
Advisory Committee: K. Schalinske, Chair; D. Beit, M. Spurlock, M. Reddy, W. White
Participating Faculty: Faculty mainly from Food Science and human Nutrition and Animal Science and also from other departments such as Kinesiology; Biochemistry, Biophysics, and Molecular Biology; Agronomy; Human Development and Family Studies, Sociology; Agricultural and Biosystems Engineering, and Statistics

Graduate Study
The Interdepartmental Graduate Program in Nutri- tional Sciences (IGPNS), administered through the Graduate College, under the auspices of the Chairs of Food Science and Human Nutrition (F5 HN) and Animal Science, will provide the structure for coordinating and enhancing interdisciplinary nutrition research and graduate education. M.S. and Ph.D. degrees in Nutritional Sciences will be offered with three specializations: Animal Nutrition, Human Nutrition, or Molecular/Biochemical Nutrition.

The following undergraduate course work is recom- mended of all applicants who are applying to the IGPNS, but may be modified depending upon the student’s area of emphasis. Recommended course work includes organic chemistry
with laboratory, physics, analytical chemistry, a nutrition course that requires biochemistry or organic chemistry as a prerequisite, and a course in biology/physiology or anatomy. Under certain circumstances students can be admitted or provisionally admitted with course work deficiencies. Students with an undergraduate degree will be granted admission into the M.S. program and upon completion, they can then apply for admission into the Ph.D. program. However, exceptional students with experience can apply directly to the Ph.D. program.

The general requirements of the Nutritional Sciences degree at the MS level, in addition to those of Graduate College, are: NutrS 501; NutrS 502; a minimum of 4 additional credits of graduate-level advanced nutrition; 3 additional credits of graduate-level biochemistry; 3 credits of graduate-level statistics (STAT 401); graduate student orientation course (FS HN 580 or An S 501); seminar attendance in Food Science and Human Nutrition (FS HN 581) or Animal Science (An S 603); seminar presentation course (FSHN 681 or An S equivalent); one seminar credit of seminar pertaining to student's research; Teaching assistant requirement (FS HN 590C or AnS 590L), summer lecturership (NutrS 505) and successful completion of a thesis and defense of the thesis. They are expected to complete the course work established by the Program of Study (POS) committee based on specialization with a minimum of 30 graduate-level semester credits, not less than 22 of which must be earned at Iowa State University.

The general requirements of the Nutritional Sciences degree at the PhD level, in addition to those of the Graduate College, are: completion of all requirements for the MS degree in Nutritional Sciences; 3 additional credits in each of graduate-level biochemistry, graduate-level statistics (Stat 402), and systemic physiology; and one additional graduate-level course in the field of study as deemed appropriate by the POS Committee and additional teaching assistant requirements (FS HN 590C or An S 690L). Satisfactory completion of a preliminary examination, a written dissertation, seminar presentation of dissertation research, and defense of the dissertation is also required. Overall a minimum of 72 graduate-level semester credits, not less than 36 of which must be earned at Iowa State University.

Courses for graduate students

NutrS 501. Biochemical and Physiological Basis of Nutrition: Macronutrients. (3-0) Cr. 3. F. Prereq: Credit or enrollment in BBMB 404 or BBMB 420. Integration of the molecular, cellular, and physiologic aspects of macronutrient and energy metabolism in mammalian systems. Dietary energy, carbohydrates, fiber, lipids, proteins, vitamins, mineral conseqquences, and major research methodologies.

NutrS 502. Biochemical and Physiological Basis of Nutrition: Vitamins and Minerals. (3-0) Cr. 3. S. Prereq: BBMB 404 or BBMB 420, and credit or enrollment in BBMB 405. Integration of the molecular, cellular, and physiologic aspects of vitamin and mineral metabolism in mammalian systems. Interactions among nutrients, metabolic consequences of deficiencies or excesses, relevant polymorphisms, major research methodologies, and current topics related to micronutrients.

NutrS 503. Biology of Adipose Tissue. (2-0) Cr. 2. S. Prereq: Undergraduate consent of instructor. Graduate. NutrS 501. Principles regarding the development of adipose tissue and its role in energy balance, and will consider especially on endocrine and immune actions of the adipocyte. Course material will be in lecture format, including handouts and selected journal articles. Students will be asked to lead critical discussions of key research findings as summary material for a given topic. Species differences will be highlighted, particularly as they relate to research models.

NutrS 505. Short Course. Cr. arr. F, S, SS. Prereq: Permission of instructor.

NutrS 519. Food Toxicology. (Cross-listed with FS HN, Tox.) (3-0) Cr. 3. Alt. F., offered 2010. Prereq: A course in biochemistry. Basic principles of toxicology. Toxins in the food supply; modes of action, toxicologic defense and escape mechanisms, interactions, risk assessment. Only one of NutrS 419 and 519 may count toward graduation.

NutrS 542. Introduction to Molecular Biology Techniques. (Cross-listed with B M S, BCB, BBMB, EEOB, FS HN, GDCB, Hort, NREM, V MP, VDPM, WCI), Cr. 1. Repeatable. F, S, SS. Prereq: Graduation class. Workshops in basic molecular biology techniques and related academic courses for graduate students.

A. DNA Techniques. Includes genetic engineering procedures, sequencing, PCR, and genotyping. (F, S, SS.)

B. Protein Techniques. Includes fermentation, protein isolation, protein purification, SDS-PAGE, Western blotting, NMR, confocal microscopy and laser microscopy, immunophenotyping, and monoclonal antibody production. (S, SS.)

C. Cell Techniques. Includes immunophenotyping, ELISA, flow cytometry, microscopic techniques, and image analysis. (S, SS.)

D. Plant Transformation. Includes Agrobacterium and particle gun-mediated transformation of tobacco, Arabidopsis, and maize, and analysis of transformants. (S, SS.)

E. Proteomics. Includes two-dimensional electrophoresis, laser scanning, mass spectrometry, and database searching. (F, SS.)

NutrS 561. Medical Nutrition and Disease I. (4-0) Cr. arr. F. Prereq: FS HN 380, 3 credits in physiology at 300 level or above. (Dual listed with FS HN 461I) Pathophysiology of selected chronic disease states and their associated medical problems. Specific attention will be directed to medical nutrition needs of patients in the treatment of each disease state. Recitation section (1 cr.) will focus on refinement of assessment skills, diagnosis of nutritional problems, nutrition care, and documentation. Course must be taken for 4 credits if Didactic Program in Dietetics (DPD) verification statement of completion is desired. Nutritional science undergraduates and graduate students may take the 3 credit lecture portion without the recitation section.

NutrS 564. Medical Nutrition and Disease II. (4-0) Cr. arr. S. Prereq: FS HN 360, FS HN 461I, or NutrS 561. 3 credits in physiology at 300 level or above. (Dual listed with FS HN 464.) Pathophysiology of selected acute and chronic disease states and their associated medical problems. Specific attention will be directed to medical nutrition needs of patients in the treatment of each disease state. Recitation section (1 cr.) will focus on refinement of assessment skills, diagnosis of nutritional problems, nutrition care, and documentation. Course must be taken for 4 credits if Didactic Program in Dietetics (DPD) verification statement of completion is desired. Nutritional science undergraduates and graduate students may take the 3 credit lecture portion without the recitation section.

NutrS 680. Grant Proposal Writing. (Cross-listed with FS HN) (1-0) Cr. 1. F. Prereq: 3 credits of graduate course work in food science and/or nutrition. Grant proposal preparation experiences including writing and critiquing of proposals and budget planning. Formation of grant writing teams in food science and/or nutrition. Satisfactory-fail only.

Officer Education Programs

Iowa State University offers Reserve Officers Training Corps (ROTC) programs for the professional training of officers for the Army, Air Force, Navy and Marines.

The purpose of these programs is to provide an avenue for interested students to become reserve or regular officers in one of the United States military services, and the university regards this training as the foundation for possible careers in the military. The Air Force and the Navy require a period of active duty service upon completion of the ROTC program. Graduates from Army ROTC serve in either active Army, the Army Reserve, or the National Guard.

All students enrolled in advanced ROTC programs receive financial allowances, which are described under Student Financial Aid. Scholarships are also available for all services as outlined in the section on financial aid.

For specific courses and programs see also Air Force Aerospace Studies, Military Service, and Naval Science.

Operations and Supply Chain Management

(Administered by the Department of Logistics, Operations and Management Information Systems)

Richard Poist, Chair of Department

Distinguished Professor (Emeritus): Baumeil

Professors: Cum, Post, Walter

Professors (Emeritus): Thompson, Voorhees

Associate Professors: Blackhurst, Johnson, Mencke, Montabon, Nilakanta, Ruben, Suzuki, Tiwana, Townsend, Zhu

Assistant Professors: Jiang, Martens, Scheibe

Instructors (Adjunct): Chooibineh

Lecturer: Helmer
Undergraduate Study
For undergraduate curriculum in business, major in Operations and Supply Chain Management, see College of Business, Curricula.

Operations and Supply Chain Management is a program of study concerned with the efficient and timely flow of materials, products, and information within and among organizations. Operations management encompasses the planning, control and implementation of the processes used to transform inputs into finished goods and services.

Supply chain management involves the integration of business processes across organizations, from material sourcing and suppliers through manufacturing and processing to the final customer. Operations management is, thus, taught in the context and framework of inter-organizational supply chain systems.

The study of Operations and Supply Chain Management prepares students for professional careers with manufacturers, distributors, logistics service providers and consulting firms. The curriculum provides the required theoretical/conceptual base and analytical methods for making sound operational and strategic business decisions.

The requirements for the Operations and Supply Chain Management major are met by completion of the following courses: OSCM 422, 424, 485, 486, 487, plus one course from an approved list. The department also offers a minor for non Operations and Supply Chain Management majors in the College of Business. The minor requires 15 credits from an approved list of courses, of which 9 credits must stand alone. Students with declared majors have priority over students with declared minors in courses with space constraints.

Graduate Study
For graduate study options, including the Ph.D. degree, see the Supply Chain Management listing.

Courses primarily for undergraduate students
OSCM 320. Production/Operations Management. (3-0) Cr. 3. Prereq: Stat 226. Introduction and analysis of the basic concepts in production/operations management. Topics include: forecasting, aggregate planning, scheduling, shop floor control, total quality management, inventory management, facility layout, and project management.

OSCM 422. Manufacturing Planning and Control. (3-0) Cr. 3. Prereq: OSCM 320. Advanced treatment of manufacturing planning and control procedures. Master production scheduling, material requirements planning, enterprise resource planning, capacity planning, shop floor control, just-in-time, and competitive analyses of modern manufacturing systems. Nonmajor graduate credit.

OSCM 428. Special Topics in Operations Management. (3-0) Cr. 3. Prereq: OSCM 320. In-depth analysis of current issues, problems, and systems in operations management with emphasis on new theoretical and methodological developments. Topics may include in different semesters, supply chain management, productivity and quality improvement, management of technology and innovation, information technology in operations management, quick response manufacturing, and service operations management. Nonmajor graduate credit.

OSCM 440. Supply Chain Information Systems. (Cross-listed with MIS, LSCM). (3-0) Cr. 3. Prereq: MIS 330, OSCM 320, LSCM 360. Internal and inter-organizational information systems necessary for a supply chain to achieve competitive advantage. Topics include: design, development, implementation, and maintenance of supply chain information systems; enterprise resource planning; advanced planning and scheduling, manufacturing execution systems; and the interface between manufacturing planning and control processes, logistics processes, and the information system.

OSCM 485. Demand Planning and Management. (Cross-listed with LSCM). (3-0) Cr. 3. Prereq: LSCM 360, OSCM 320. Demand planning process which synchronizes demand with manufacturing and distribution. Addresses linking business plans and demand forecasts both horizontally and vertically within the organization and collaboratively among supply chain partners. Forecasting, customer relationship management, sales and operations planning, customer service, distribution channels, e-fulfillment, and information systems requirements. Nonmajor graduate credit.

OSCM 486. Principles of Purchasing and Supply Management. (Cross-listed with LSCM). (3-0) Cr. 3. Prereq: LSCM 360, OSCM 320. Sourcing strategies, concepts, tools and dynamics in the context of the integrated supply chain. Make or buy decision, supplier evaluation and selection, global sourcing, the total cost of ownership, contracts and legal terms, negotiation, purchasing ethics, and information systems requirements. Nonmajor graduate credit.

OSCM 487. Strategic Supply Chain Management. (Cross-listed with LSCM). (3-0) Cr. 3. Prereq: OSCM 422 or OSCM 424 or LSCM 460; OSCM 485 or OSCM 486. Capstone course in supply chain management. Integrating and applying the theories, concepts, and methods covered in the prerequisite courses through the use of readings, case studies, projects, and industry speakers. Nonmajor graduate credit.

Courses primarily for graduate students, open to qualified undergraduate students
The department offers graduate courses under the heading of Supply Chain Management. These courses include SCM 502, 520, 522, 524, 660, 561, 563, 585, and 590. For descriptions of these courses, see Supply Chain Management.

Courses for graduate students
The department offers graduate courses under the heading of Supply Chain Management. These courses include SCM 601, 602, 603, 604, 605, 650, 651, and 689. For descriptions of these courses, see Supply Chain Management.

Philosophy and Religious Studies
Tony Smith, Chair of Department
University Professor: Kupfer
Professors: Avals, Hollinger, Kirschennann, Robin- son, Sawyer, Smith, Wilson
Professors (Emeriti): Pollenbach, Vaniten
Associate Professors: Bado-Fralick, T. Butler, Clifford, De Laplante, Fehr, Geirsson, Holmgen, Wolf
Assistant Professors: Alexander, A. Butler, Kelley, Padgett-Walsh, Qj
Senior Lecturer: Northway
Lecturer: Bevin, Wirth

Philosophy
Undergraduate Study
Philosophy tries to make sense of human experience and reality through critical reflection and argument. The questions it treats engage and provoke all of us, and they occupy an important place in our intellectual tradition: Are there objective standards for deciding what is right and wrong, or is morality merely a subjective matter? Is capitalism morally acceptable? Do I have a will, and is it free? How do my words and thoughts come to be about the world? Does God exist? Can machines think? How are mind and body related? Students in philosophy classes will be exposed to arguments on both sides of such questions, and they will be encouraged to develop and rationally defend their own positions.

Philosophy is not an isolated discipline. It enjoys mutually beneficial exchanges with many fields of study within the humanities and sciences. Philosophers develop tools that allow them to examine critically the assumptions and implications of the social and natural sciences, religion, and law.

The study of philosophy provides several benefits. It emphasizes rigorous understanding of problems, together with careful analysis of the strengths and weaknesses of the available solutions. It encourages clarity in the presentation of one’s own ideas, as well as sensitivity in the consideration of the ideas of others. The study of philosophy therefore encourages one to develop skills and habits that are useful not only in philosophy, but in other areas as well. Philosophy students historically do well, for example, in law and medical schools.

However, one should not think that philosophy is only valuable in academic settings. Philosophical questions arise in many areas of family, business, and civic life. Philosophers strive to face these questions with the kind of intellectual honesty that leads to respect for the views of others, and continual reassessment of their own. In this way, the study of philosophy fosters values and attitudes that are helpful for responding to a lifetime of intellectual challenges.

The degree program in philosophy requires a minimum of 33 credits, plus the zero credit 492 core course. The following courses compose the core program of the major from which 15 credits shall be chosen. Additionally, two courses at the 400 level or above (other than 490 and 492) are required.

a. Ethical theory: One course required. Choose from 330 (Ethical Theory), 335 (Social and Political Philosophy), 535 (Contemporary Political Philosophy).

b. History: Two courses required, namely, 310 (Ancient Philosophy) and either 314 (17th Century Philosophy) or 315 (18th Century Philosophy).

d. Logic: 207 (Introduction to Symbolic Logic) is required.

The department offers a minor in philosophy which may be earned by completing a total of 15 credits in philosophy. At least 9 credits must be in courses numbered 300 or above. Students may want to emphasize specific areas by taking 15 hours of courses chosen from the following:

- Philosophy of Science: 201, 206 or 207, 314, 315, 380, 381, 480, 483, 485
History of Philosophy: 201, 310, 314, 315, 316, 317, 318, 460

Communication Proficiency requirement: The department requires a grade of C+ or better in each of Engl 150 and 250 (or 250H), and approval of writing by instructor of any philosophy course 300 level or above, to be designated by the student.

Graduate Study

The department offers work for a graduate minor in philosophy. For those taking the M.A. or M.S., the minor requirement is two courses above 300 but not all of one course (but not 600) (or 250H). For those taking the Ph.D., the requirement is four courses above 300, at least one of which is above 400 (but not 490) each taken in conjunction with 590. Interested students should ask the chair to assign a minor adviser.

The department participates in the interdepartmental program in general graduate studies. (See Index.)

Courses primarily for undergraduate students

Phil 201. Introduction to Philosophy. (3-0) Cr. 3. F.S.S.S. It has been rumored that the unmourned life is not worth living, an attempt to begin examining life by considering such questions as: What makes us human? What is the world ultimately like? How should we relate to other people? Is there a god? How can we know anything about these questions? Understanding questions of this kind and proposed answers to them is what this course is all about.

Phil 206. Introduction to Logic and Scientific Reasoning. (3-0) Cr. 3. F.S.S.S. Basic principles of critical reasoning and argument evaluation. A consideration of basic forms of argumentation in science and everyday life. Application to contemporary issues and controversies.

Phil 207. Introduction to Symbolic Logic. (Cross-listed with Ling). (3-0) Cr. 3. Introduction to fundamental logical concepts and logical symbolism. Development of natural deduction through basic predicate logic with identity. Applications to arguments in ordinary English and to philosophical issues. Majors should take Phil 207 as early as possible.

Phil 230. Moral Theory and Practice. (3-0) Cr. 3. F.S.S.S. Investigation of moral issues in the context of major ethical theories of value and obligation; e.g., punishment and economic justice, job discrimination, world hunger, and sexual morality. Emphasis on critical reasoning and argument analysis.

Phil 235. Ethical Issues in a Diverse Society. (3-0) Cr. 3. S. This course will examine a range of arguments on diversity issues. Topics will include: the social status of women, the moral status of sexuality and homosexuality, the nature and role of racism in contemporary society, the relationship between biology, gender roles and social status, and various proposals for change from a variety of political perspectives.

Phil 310. Ancient Philosophy. (Cross-listed with Cl St). (3-0) Cr. 3. F. Prereq: 201. Survey of ancient Greek philosophy, focusing on the pre-Socratics, Plato, and Aristotle. Questions concerning being, knowledge, language, and the good life are treated in depth. Nonmajor graduate credit.

Phil 315. 18th Century Philosophy. (3-0) Cr. 3. Alt. S., offered 2011. Prereq: 201. Readings from philosophers such as Berkeley, Hume, and Kant. Development of Enlightenment thought. Issues include idealism, causation, freedom, and knowledge regarding science, ethics, and deities. Nonmajor graduate credit.

Phil 316. 19th Century Continental Philosophy. (3-0) Cr. 3. Alt. F., offered 2009. Prereq: 201. The thought of Hegel, Marx, Nietzsche, and contemporaries. Various perspectives on the philosophy of history, the nature of reason and subjectivity, the contrast between dialectical and nondialectical philosophy, and the relationship between philosophy and society. Nonmajor graduate credit.

Phil 317. 20th and 21st Century Continental Philosophy. (3-0) Cr. 3. Alt. F., offered 2010. Prereq: 201. Major movements of 20th and 21st century thought, such as Phenomenology, Critical Theory, Post-structuralism, Postmodernism, and Feminism. Issues include the assumptions and limits of Western metaphysics, the nature of reason, the relationship between language and power. Nonmajor graduate credit.

Phil 318. 20th and 21st Century Anglo-American Philosophy. (3-0) Cr. 3. S. Prereq: 201. Major movements in recent and contemporary philosophy such as realism, logical-ordinary language philosophy, and naturalism. Russell, Wittgenstein, Quine and other leading figures. Topics include knowledge of the material world, mind, language, values, and philosophical method. Nonmajor graduate credit.

Phil 330. Ethical Theory. (3-0) Cr. 3. F. Prereq: 201 or 230. Major theories in normative ethics and metaethics. Includes such subjects as utilitarianism, absolutism. Comparison of ethics with science and how moral judgments are justified. Nonmajor graduate credit.

Phil 331. Moral Problems in Medicine. (3-0) Cr. 3. Alt. S., offered 2011. Prereq: 230 or junior classification. In-depth study of some of the central moral problems arising in medicine, e.g., abortion, euthanasia, patients' rights, health care professionals' duties and responsibilities, allocation of medical resources. Major moral theories will be examined and applied. Nonmajor graduate credit.

Phil 332. Philosophy of Law. (Cross-listed with CJ St.). (3-0) Cr. 3. F.S. Prereq: 201 or 230. Examination of our obligation to obey the law; what constitutes just punishment; how much of the immoral should be made illegal? Relation of these questions to major theories of law and the state. Discussion of such concepts as coercion, equality, and responsibility. Nonmajor graduate credit.

Phil 334. Environmental Ethics. (Cross-listed with Env Sc). (3-0) Cr. 3. Prereq: 3 credits in philosophy or junior classification. Thorough study of some of the central moral issues arising in connection with human impact on the environment, e.g., human overpopulation, species extinction, forest and wilderness management, pollution. Several world views of the proper relationship between human beings and nature will be explored. Nonmajor graduate credit.

Phil 335. Social and Political Philosophy. (3-0) Cr. 3. Alt. S., offered 2011. Prereq: 201. Foundations of social and political philosophy. The basis of political organization, the nature of social and political institutions, rights and authority, justice. Original texts. Nonmajor graduate credit.

Phil 336. Bioethics and Biotechnology. (3-0) Cr. 3. Prereq: Phil 201 or 230 or 235. In-depth study of some of the moral issues in the life sciences, e.g., genetic screening and testing, genetically engineered plants and animals, risk analysis, biotechnology patents, research ethics, the impact of biotechnology on society and the environment. Major moral theories will be discussed and applied. (Phil 336 contains almost no similarities to Phil 331). Nonmajor graduate credit.

Phil 338. Feminist Philosophy. (Cross-listed with W S). (3-0) Cr. 3. F. Prereq: 2 credits in philosophy or women's studies recommended. A critical, theoretical examination of the oppression of women, especially as it relates to issues of race, class, and sexual orientation. How concepts such as sex and gender, self and other, nature and nurture, understandings of what it means to be a woman. Historical and contemporary feminist philosophers addressing topics such as violence, sexuality, pornography, political power, family structure and women's paid and unpaid labor. Nonmajor graduate credit.

Phil 340. Aesthetics. (3-0) Cr. 3. F. Prereq: 201 or 230. Is liking all there is to appreciating works of art or natural beauty? We will examine our aesthetic experiences, talk about such experiences (e.g., art criticism), and what makes them valuable. Do the different arts have common values? How do the different arts have common values? How do they differ? Nonmajor graduate credit.

Phil 343. Philosophy of Technology. (Cross-listed with T Sc). (3-0) Cr. 3. F.S. Prereq: 6 credits of social science or T Sc 341 and 3 credits of social science. Moral and other philosophical problems related to developments in technology. Topics may include conditions under which technological innovations contribute to human emancipation, relationship of technology and democracy, utility and limits of technical rationality, and problems of ensuring that benefits of technological advances are widely shared. Topics discussed with reference to such issues as contemporary developments in microelectronics, technology transfer to the Third World, etc. Nonmajor graduate credit.

Phil 350. Philosophy of Religion. (Cross-listed with Relig). (3-0) Cr. 3. F. Prereq: 201. The value and truth of religious life and belief. Mystical experience, religious faith and language; arguments for God's existence; the problem of evil; miracles; and religion and morality. Historical and contemporary readings. Nonmajor graduate credit.

Phil 364. Metaphysics: God, Minds, and Matter. (3-0) Cr. 3. Prereq: 3 credits in philosophy. A survey of classical and contemporary views on some basic metaphysical issues. Issues discussed include: Does God exist? Do you have a mind and, if so, how does it relate to your body? What is the nature of cause and effect? Do objects have any essential properties? How can we account for properties objects have in common? Nonmajor graduate credit.

Phil 366. Truth, Belief and Reason. (3-0) Cr. 3. F. Prereq: 201 or permission of instructor. This course focuses on significant topics in theory of knowledge, including the value of truth and the role of sense experience in supporting our theoretical views, and the place of reason in human nature. Historical and contemporary views will be considered.

Phil 380. Philosophy of Science. (3-0) Cr. 3. F. Prereq: 201 or 6 credits in a science. Introduction to the philosophy of science. A variety of basic problems common to the natural and social sciences: the nature of explanation, the structure of theories, the unity of science, and the distinction between science and nonscience. Nonmajor graduate credit.

Phil 381. Philosophy of the social and Behavioral Sciences. (3-0) Cr. 3. S. Prereq: 201 or 6 credits in the social sciences, ideological, and doctrinal issues about the social and behavioral sciences against the background of influence of the natural sciences. Focus is on the historical and cultural background of 19th and 20th century western thought. Nonmajor graduate credit.
Phil 398. Cooperative Education. Cr. R. F.S.S. Prereq: Permission of the department cooperative education coordinator; junior classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period. Nonmajor graduate credit.

Phil 430. Value-Theory. (3-0) Cr. 3. Repeatable. S. Prereq: 220. Theoretical and normative issues in ethics, aesthetics, religious thought, or political philosophy. Topics vary each time offered. Nonmajor graduate credit.

Phil 450. Persons and Causes. (3-0) Cr. 3. Repeatable. F. Prereq: 3 credits in philosophy; 207 strongly encouraged. Personal identity, agency, free will, moral responsibility, causation, future contingents, and time will be discussed. What makes a person the same person over time? Do humans have free will? Are we not morally responsible if our actions are inevitable consequences of the past and the laws of nature? What distinguishes causes from non-causes? Are there facts about the future? Nonmajor graduate credit.

Phil 460. Epistemology and Metaphysics. (3-0) Cr. 3. Repeatable. S. Prereq: 6 credits in philosophy. Issues in epistemology and metaphysics. Topics vary each time offered. Nonmajor graduate credit.

Phil 465. Brains, Minds, and Computers. (3-0) Cr. 3. F. Prereq: 201. Examination of concepts such as computability, intelligence, programming, and free will; and of arguments about whether any human capacity is forever beyond realization in a machine. Nonmajor graduate credit.

Phil 480. Controversies in Science. (3-0) Cr. 3. Repeatable. S. Prereq: 3 credits in philosophy or 6 credits in a natural or social science. Philosophical treatment of a branch of science that has (or has had) significant social, political, religious and/or moral implications. Possible topics include: the IQ debate, implications of Darwinism, the Galileo affair, the role of values in science, critical analysis of current science policy (e.g., the Human Genome Project). Topics will be arranged to meet the needs of interested students. Often taught by a philosopher and a scientist from the relevant discipline. Nonmajor graduate credit.

Phil 483. Philosophy of Biology. (3-0) Cr. 3. S. Prereq: 3 credits in philosophy or 3 credits in biology. Biology is powerful, both as a science and in its effects on our culture. Philosophy of biology evaluates this power. Possible topics include: What makes sciences such as evolutionary theory, ecology or molecular biology so good at explaining things? What is life? Can evolution account for design? What role does chance play in evolution? Can science explain the evolution of life on earth? What can sociobiology tell us about human nature, behavior and culture? Nonmajor graduate credit.

Phil 485. Philosophy of Physics. (3-0) Cr. 3. Prereq: 3 credits in Philosophy or 3 credits in Physics. S. Conceptual and philosophical issues relating to the interpretation of theories in classical and modern physics. May include one or more of the following topics: the relationship between mathematics and the physical world; Newtonian physics (determinism and predictability); thermodynamics and statistical physics (the nature of probability, entropy and the direction of time); relativistic physics (indeterminism; realism and nonlocality; consciousness and the role of the observer). Nonmajor graduate credit.

Phil 490. Independent Study. Cr. Arr. Repeatable. Prereq: 6 credits in philosophy; permission of instructor; approval of chair. Guided reading and research on special topics selected to meet needs of advanced students. No more than 9 credits of Phil 490 may be counted toward graduation. H. Honors

Relig 220. Introduction to the Bible. (3-0) Cr. 3. F.S. Basic overview of the contents of the Old and New Testament in light of their ancient socio-historical background, and with attention to a variety of interpretations and relevance to modern American society.

Relig 242. History of Christianity. (3-0) Cr. 3. F.S.SS. An introduction to Christian thought and practice from an historical point of view, stressing the development of belief, spirituality, and organization, and the changes and changes involved in these developments. A. The Early Church through the Medieval period. B. The Reformation period to the present time.

Relig 280. Introduction to Catholicism. (3-0) Cr. 3. F. An explanation of the spirit, and the practices of Roman Catholicism, including its understanding of God, sacramentality, the human person, and community, and its relationship to other forms of Christianity and other world religions.

Relig 321. Old Testament. (3-0) Cr. 3. F. An in-depth study of the literature and religion of ancient Israel in light of recent archaeological discoveries, research about the ancient Near East, and a variety of interpretations. Nonmajor graduate credit.

Relig 322. New Testament. (3-0) Cr. 3. S. A detailed survey of the sacred scriptures of Christianity in light of recent archaeological discoveries and historical research about their Greco-Roman and Jewish background. Nonmajor graduate credit.

Relig 323. Science and Religion. (Cross-listed with Hist.) (3-0) Cr. 3. Prereq: Sophomore classification. History of changing interplay of science and religion in our understanding nature, from the trial of Galileo to the reception of Darwin.

Relig 328. American Indian Religions. (Cross-listed with Am St.) (3-0) Cr. 3. F. An introduction to the beliefs and rituals of Native American religious traditions, with attention to cultural and historical contexts and implications. Nonmajor graduate credit.

Relig 333. Introduction to Judaism. (3-0) Cr. 3. An introduction to basic Judaism. Special attention is given to Jewish sacred texts, rituals, social practices, and modern forms.

Relig 334. African American Religious Experience. (Cross-listed with Af Am.) (3-0) Cr. 3. F. Prereq: Prior course work in Religious Studies or African American Studies required. Examination of the African American experience from the perspective of black religion and the black church, with attention to political, economic, and social, as well as spiritual, concerns. Nonmajor graduate credit.

Relig 336. Women and Religion. (Cross-listed with W St.) (3-0) Cr. 3. F. Prereq: 105, 210 or W S 201 recommended. Examines the status of women in various religions, feminist critiques of religious structures and belief systems, and contemporary women’s spirituality movements. Nonmajor graduate credit.

Relig 339. Goddess Religions. (Cross-listed with W St.) (3-0) Cr. 3. Prereq: Relig 205 recommended. Exploration of the foundational myths of Goddess spirituality, including historical and cross-cultural female images of the divine and their modern usage by American women. Nonmajor graduate credit.

Relig 340. Magic, Witchcraft, and Religion. (Cross-listed with Anth.) (3-0) Cr. 3. S. Prereq: Anthr 201 or 306. Origin and development of indigenous magico-religious systems; myth and ritual; therapeutic aspects; symbols and meanings; religion and socio-cultural change, including acculturation, nativistic, and revitalization movements.

Relig 348. Psychology of Religion. (Cross-listed with PSYCH.) (3-0) Cr. 3. Prereq: Nine credits in psychology. Survey of psychological theory and research investigating religious and spiritual attitudes, beliefs and practices.

Relig 350. Philosophy of Religion. (Cross-listed with Phil.) (3-0) Cr. 3. F. Prereq: Phil 201. The value and truth of religious life and belief. Mystical experience; religious faith and language; arguments for God’s existence; the problem of evil; miracles; and religion and modernity. Historical and contemporary readings. Nonmajor graduate credit.

Relig 352. Religious Traditions of India. (3-0) Cr. 3. Prereq: Prior course work in Asian, Asian-American or Religious Studies or Anthropology required. Examines the religious traditions of India, including Hinduism, Jainism, and Sikhism, through text, ritual, and contemporary practice. Nonmajor graduate credit.

Relig 353. Buddhism. (3-0) Cr. 3. S. The various Buddhist paths to realize enlightenment and freedom. Special attention to meditation and yoga and their relationship to altered states of consciousness and to social contexts. Nonmajor graduate credit.

Relig 356. African Religions. (3-0) Cr. 3. Prereq: Prior course work in African, African-American or Religious Studies or Anthropology required. An introduction to the teachings, practices, and history of the religions that originated in Africa and other religions which have gained substantial followings among African peoples. Nonmajor graduate credit.

Relig 358. Introduction to Islam. (3-0) Cr. 3. An introduction to Islamic religious culture and society from 700 to the present. Nonmajor graduate credit.

Relig 360. Religious Ethics. (3-0) Cr. 3. Investigates different religious ethical theories and traditions of reasoning about practical moral issues (e.g., abortion, the just distribution of wealth, environmental ethics). Explores, in detail the relationship between religious beliefs and moral practice.

Relig 367. Christianity in the Roman Empire. (Cross-listed with Cl St.) (3-0) Cr. 3. An historical introduction to the rise of Christianity in the Roman empire, with special attention to the impact of Greco-Roman culture on the thought and practice of Christians and the interaction of early Christians with their contemporaries. Nonmajor graduate credit.

Relig 370. Religion and Politics. (Cross-listed with Pol St.) (3-0) Cr. 3. Prereq: Relig 105 or 210 recommended. The interaction of religion and politics in the U.S. from both an historical and contemporary perspective, as well as the role of religion in politics internationally. Nonmajor graduate credit.

Relig 376. Classical Archaeology. (Cross-listed with Cl St. Hist.) (3-0) Cr. 3. Repeatable. S. Chronological survey of the material culture of the ancient Greece-Roman world and the role of archaeological context in understanding the varied aspects of ancient Greek or Roman culture. Among other topics, economy, architecture, arts and crafts, trade and exchange, and religion and burial customs will be explored. A. Bronze Age (Minoan and Mycenaean palatial culture) and Early Iron Age Greece. (ca 3000-700 BC). B. Archaic through Hellenistic Greece (ca 700-300 BC).

Relig 377. Social Dimensions of Religion. (Cross-listed with Soci.) (3-0) Cr. 3. Prereq: Prior course work in Religious Studies or Sociology required. The influence of religion in society, both as a conservator of values and as a force for social change. Nonmajor graduate credit.

Relig 380. Catholic Social Thought. (3-0) Cr. 3. S. Examines the broad roots of and major developments in Catholic social thought. Contemporary issues such as human rights, economic justice, the environment, and war and peace will be treated using principles of Catholic ethics, social change, official church documents, and contributions of notable scholars and activists. Nonmajor graduate credit.

Relig 384. Religion and Ecology. (Cross-listed with Env St.) (3-0) Cr. 3. Introduction to concepts of religion and ecology as they appear in different religious traditions, from both a historical and contemporary perspective. Special attention to religious response to contemporary environmental issues. Nonmajor graduate credit.

Relig 385. Theory and Method in Religious Studies. (3-0) Cr. 3. Prereq: 6 credits in Religious Studies or permission of instructor. Examines the variety of theories and methods employed in the study of religion. Application of these methods to various religions of the world. Nonmajor graduate credit.

Relig 475. Seminar: Issues in the Study of Religion. (3-0) Cr. 3. Prereq: 6 credits in religious studies. Topic changes each time offered. Closed to freshmen. Sophomores must have approval of instructor. Nonmajor graduate credit.

Relig 490. Independent Study. Cr. arr. Repeatable. Prereq: 6 credits in religious studies, and permission of instructor, approval of professor in charge of program. Guided reading and research on special topics selected to meet the needs of advanced students. No more than 9 credits of Relig 490 may be counted toward graduation. H. Honors

Relig 491. Senior Thesis. Cr. 3. Written under the supervision of a Religious Studies faculty advisor.

Relig 495. Peace and Justice Internship. Cr. arr. Repeatable. Prereq: 3 credits in religious studies, permission of faculty internship coordinator. Supervised placement with a peace and justice agency; structured reflection on the relation of religion and practical social issues. Satisfactory-fail only.

Courses primarily for graduate students, open to qualified undergraduate students

Physics and Astronomy

www.physics.iastate.edu/

Joseph Shinar, Chair of Department

Distinguished Professors: Carfield, Goldman, Harman, Ho, Johnston, Soukoulis

Distinguished Professors (Emeritus): Clemen, Finnemore, Lynch, Svenson

University Professor: Willson

Professors: Anderson, Carpenter, Lewis, Crawley, Hauptman, Hill, Kawaler, Krennrich, Lajoie, Luban, Ogilvie, Qiu, Rosenberg, Schmalian, Shinar, Struck, Trindges, Valencia, Vary, Whisnant, Wolfford

Professors (Adjunct): Meyer, Vaknin

Professor (Collaborator): Womersley

Associate Professors: Cochran, McQueeney, Pohl, Prem, Rosati, Travesset-Casas

Associate Professors (Adjunct): Biswas, Budko, Kogan

Assistant Professors: Kaminski, Kerton, Prozorov, Sivasanker, Tuchin, Wang, Yu

Assistant Professor (Adjunct): Kreyssig

Senior Lecturers: Atwood, Herrera-Siklody

Lecturers: Fretwell, Frishman, Levin, Meyers, Schuler, Shirokov

Undergraduate Study

For the undergraduate curriculum in liberal arts and sciences, major in physics, leading to the degree bachelor of science, see Liberal Arts and Sciences, Curriculum.
and technological areas. Graduates are proficient in the methods of rigorous scientific analysis, relevant mathematical techniques, and modern computational and laboratory methods. They have a broad knowledge of physics, including mechanics, electricity and magnetism, thermodynamics, and modern physics. They are able to communicate clearly and effectively at general and technical levels. They are prepared to pursue a wide range of careers as a professional physicist, astronomer, or science educator. They are also prepared to pursue advanced studies and careers in areas as diverse as engineering, medicine, law, and business administration.

Many opportunities exist for students who terminate their studies with a bachelor’s degree, especially when combined with 20 credits in other areas. Students who meet the necessary scholastic standards often continue their studies in a graduate college, exploring and contributing to new developments in the field.

The department normally expects each student majoring in physics to complete at least the following courses: Phys 221, 222, 321, 321L, 322, 322L, 304, 306, 361, 362, 364, 365, and three credits of laboratory work chosen from 310, 311, 311T, 470L, or Astro 344L. All students are required to earn at least 5 credits in laboratory work in physics in addition to the laboratory components of Phys 221 and 222. These 5 credits must be in courses numbered 300 or higher or in approved electives. All students must earn at least 20 credits in physics and astronomy courses numbered 304 or higher. The basic list of expected courses is not a rigid requirement and changes in this basic list will be approved by the department curriculum committee on recommendation of the student’s adviser when such changes will better serve the student’s needs. In particular, students planning a physics major and also seeking certification for high school teaching may, with the approval of their adviser, follow a significantly different program designed to meet their particular needs; these students should consult the department for further information. Further information concerning programs of study, including sample degree programs, is available from the department.

Students majoring in physics who wish an emphasis in astronomy/astrophysics should consider a minor in astronomy (see below). Those planning graduate work in physics or astronomy/astrophysics should add to the basic list the courses Phys 480 and 481. Other useful courses include Phys 496, Math 365, 426, and 471, and Stat 447. One or more of Astro 405, Phys 511 or 526 may also be added according to interest.

The department offers a minor in physics which may be earned by completing 20 credits in physics courses chosen as follows: Phys 221, 222, 321; at least one credit of laboratory chosen from 321L, 322L, 310, 311, 311T. Other acceptable courses are 304, 306, 321, 361, 362, 364, 365, 480, 481, and 496.

The department offers a minor in astronomy which may be earned by completing 15 credits chosen as follows: a total of 12 or more credits in Astro courses (must include Astro 344L, and may include one of the courses Astro 120, Astro 150 or Astro 250, and one of 265L, 272), plus one additional 3 credits (if applicable) chosen from among Physics 304, 321, 361, 362, 364, 365, 480, 481, or 496; 12 or more credits must be at the 300 level or higher. Note that the same course may not be used to satisfy both the requirements of a physics major and an astronomy minor.

Communication Proficiency Requirement: The department requires a grade of C or better in each of Engl 150 and 250 (or 250H), and a C– or better in Engl 302, 305, 309 or 314. Students are also encouraged to study at least one foreign language.

The expected outcomes for students in these programs are: (1) a broad knowledge of physics, including mechanics, electricity and magnetism, thermodynamics, wave motion and modern physics; (2) proficiency in laboratory physics; (3) proficiency in modern scientific computational methods; and (4) a sound foundation in the liberal arts including proficiency in communication skills.

In addition to the performance on exams and course grades, information on evaluating of the success in meeting these goals is obtained by: (1) an annual written survey of all students majoring in the program; (2) an annual written survey of all graduating students; (3) a post-graduate survey of program alumni; (4) student evaluations of all courses; (5) adviser evaluations; and (6) a bimonthly meeting of program majors with the department chair.

Graduate Study

The department offers studies for the degrees master of science and Ph.D. in astronomy with philosophy with majors at both levels in applied physics, astrophysics, condensed matter physics, high energy physics, nuclear physics, and physics; and minor credit courses for students majoring in other departments.

Facilities of various research groups of the department, the Ames Laboratory, and the Applied Science Center, including the Microelectronics Research Center, are available for research.

Students with bachelor’s degrees in physics or astronomy from other institutions ordinarily will qualify for graduate study at Iowa State provided they have satisfactorily completed course work similar to that suggested for undergraduate majors here intending to go on to graduate school. In some cases additional instruction at the intermediate level may be required.

Graduates have a broad understanding of physical science, as well as mastery of state-of-the-art methods in their specialization. They are able to communicate effectively to a wide range of audiences, from the general public to research colleagues. Their skills in rigorous scientific thinking prepare them for leadership in the broader community. They are skilled in carrying out research, communicating research results, and solving research problems. They have considerable teaching experience. They have developed problem solving skills that prepare them for careers in either industry or academia.

All candidates for an advanced degree in physics are expected to complete Phys 531, 564, 571, 572, 591 and 592. Candidates for an advanced degree in applied physics are expected to complete Phys 571, 591, 470L, (or 470), 693 (or 699), and either 572. Candidates for an advanced degree in astrophysics should complete Phys 531 and/or 564, Phys 571, Phys 591, Astro 505, and Astro 510. Astrophysics Ph.D. candidates must take at least three of the 580 level Astro courses, while candidates for the Research Masters must take at least two 580 level Astro courses.

Except for the applied physics major where a thesis is always required, the degree master of science is offered both with and without thesis. For all areas of study except applied physics the basic requirements for the M.S. are the same: at least 30 credits of acceptable graduate work must be completed, not less than 21 of which must be in physics or astronomy. Students must complete not less than 6 credits from outside their major area, with 3 credits being required from outside the department, and 3 credits from a 500 or 600 level course in another area of specialization. Students choosing a M.S. degree with thesis may apply up to 8 credits of 699 but no credits of 599 toward the minimum 30 credits. Students choosing a degree without thesis should apply 2 credits of 599, but may not apply any credits of 699 toward the minimum 30 credits.

Students whose major area is applied physics must complete at least 30 credits of acceptable graduate work for the M.S. degree and not less than 19 credits of these must be in the required courses listed above; the remaining 11 credits of the credit minimum may be chosen freely either from within the student’s major area or from without and either from the department or outside, but it should be noted that not more than 3 credits of Phys 699 may be applied toward the 30 credit minimum.

In addition to course work in the major area of study, all candidates for the Ph.D. degree must complete 12 credits from outside the area. Of these 6 must be taken from other departments and 6 must be taken from the department with the additional constraint that this latter 6 must include at least one 500 or 600 level introductory course in another area of specialization. Each candidate for the Ph.D. degree is required to teach one year of elementary physics or astronomy.

Graduate students interested in a physics minor should contact the department for requirements.

Astronomy and Astrophysics (Astro)

Courses primarily for undergraduate students

Astro 102. North Star Astronomy. Cr. 1. F.S. An entirely WEB-based course covering topics in observing the sky and navigation by the stars for students with little or no previous experience. The course combines material on common naked-eye phenomena, such as daily and seasonal variations in the sky, with information on how these helped navigators determine where they are on Earth. The course “lectures” are on-line, interactive units with built-in exercises, hands-on (offline) activities and layers of help. Graded homework and quizzes are administered via Web-CT. Students who take Astro 120 may count credit in only one of Astro 102 or 103 toward graduation.

Astro 103. Evening Star. Cr. 1. F.S. An entirely web-based course covering topics in observing the sky: constellations, motions of the sun, moon, and planets; seasons and the calendar; eclipses. The solar system: origin and evolution; characteristics of the sun, planets, satellites, comets, meteors, and asteroids. Extensive use of the planetarium is included. Students who take Astro 120 may count credit in only one of Astro 102 or 103 toward graduation.

Astro 120. The Sky and the Solar System. (3-0) Cr. 3. F.S. SS. For the nonscience student. The sky: constellations, motions of the sun, moon, and planets; seasons and the calendar; eclipses. The solar system: origin and evolution; characteristics of the sun, planets, satellites, comets, meteors, and asteroids. Extensive use of the planetarium is included. Students who take Astro 120 may count credit in only one of Astro 102 or 103 toward graduation.

Astro 125L. The Sky and the Solar System Laboratory. (0-2) Cr. 1. F.S. Prereq: Concurrent or previous enrollment in Astro 120. Laboratory course to accompany Astro 120. Students carry out practical exercises involving naked eye and telescope observing to explore and reinforce ideas covered in Astro 120. Activities based on a sky-simulation computer program and other weather-independent exercises are also included.

Phys 306. Physics of Wave Motion. (3-0) Cr. 3. S. Prereq: 222, credit or enrollment in Math 267. Oscillating systems including damped and forced oscillations; fluids, geometric optics, water waves, the wave equation, Fourier and Laplace transforms, non-uniform media, cylindrical and spherical waves, polarization, interference and diffraction, transmission lines, non-linear waves.

Phys 310. Electronic Instrumentation for Experimental Physics. (2-4) Cr. 4. F. Prereq: 222, Math 166. Common electrical instruments; power supplies, transducers; passive and active devices, analog integrated circuits, including filters and amplifiers; digital integrated circuits; signal transmission and enhancement. Nonmajor graduate credit.

Phys 319T, Intermediate Laboratory. (0-0) Cr. 3. S. Prereq: 112 or 222. Experiments in classical and modern physics performed independently by each student. For students preparing for a career in high school teaching. Nonmajor graduate credit.

Phys 321. Introduction to Modern Physics I. (3-0) Cr. 3. S. Prereq: 222, credit or enrollment in Math 266. Quantum nature of matter: phonons, de Broglie’s postulate: wave-like properties of matter; Bohr’s model of hydrogen atom; Schrodinger equations in one dimension: energy quantization; detailed solutions for potential step bars, and wells; one-electron atoms, spin and magnetic interactions; ground states, optical and x-ray excitations of multi-electron atoms.

Phys 322. Introduction to Modern Physics II. (3-0) Cr. 3. S. Prereq: 321. Quantum statistics; lasers; physics of molecules. Properties of solids, including electron band structure, superconductivity and magnetism. Nuclear physics, including nuclear sizes and masses, stability, decay modes, reactions, fission and fusion. Elementary particles, including strangeness, charm, and quarks. Fundamental forces of nature.

Phys 322L. Introductory Laboratory in Modern Physics II. (2-2) Cr. 1. F. Prereq: Credit or enrollment in 322L. Experiments related to the foundations of modern physics. Radioactive decay, elementary particles, Hall effect, quantization, spectroscopy, statistics and instrumentation.

Phys 362. Intermediate Mechanics. (3-0) Cr. 3. S. Prereq: 361. Rigid body motion; small oscillations, normal modes. Special relativity including length contraction, time dilation, Lorentz transformation, 4-vector covariant formalism, relativistic mechanics. Nonmajor graduate credit.

Phys 364. Electricity and Magnetism I. (3-0) Cr. 3. F. Prereq: 222, Math 385 or Math 395. Static electric and magnetic fields, potential theory; electromagnetism, Maxwell’s equations. Nonmajor graduate credit.

Phys 365. Electricity and Magnetism II. (3-0) Cr. 3. S. Prereq: 364. Relativistic electromagnetic theory; radiation and propagation of electromagnetic waves; interaction with matter; nonmajor graduate credit.

Phys 389. Seminar. Cr. S. R. S. (1-0) Required of all junior physics majors. Career opportunities: graduate school programs and application, job placement, alternative careers, basic skills needed for the job market competition. Satisfactory-fail only.

Phys 398. Cooperative Education. Cr. R. F.S.S. Prereq: Permission of the department cooperative education coordinator; senior classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Phys 432. Molecular and Cell Biophysics. (Dual-listed with 532). (3-0) Cr. 3. S. Prereq: 304 or Chem 325. Quantitative description of biological systems using basic physical laws, including a brief discussion of a variety of biophysical techniques. Topics include: thermodynamics, chemical equilibrium, gene expression, structure and physical properties of nucleic acids and proteins, folding of nucleic acids and proteins, chemical kinetics, catalysis, allosteric enzymes, cell membrane structure and physical properties, and machines in cell membranes. Nonmajor graduate credit.

Phys 450L. Undergraduate Research. Cr. arr. Repeatable. F.S.SS. Prereq: 311, permission of instructor. Laboratory project under supervision of physics faculty.

Phys 470L. Applied Physics Laboratory. Cr. arr. Repeatable. F.S.SS. Prereq: 322 and permission of instructor. Studies in modern experimental techniques via experimentation and simulation in various areas of applied physics, e.g. opto-electronics, x-ray spectroscopy, nuclear magnetic resonance, electron spin resonance, x-ray diffraction, and computation of electronic and structural properties of matter.

Phys 480. Quantum Mechanics I. (3-0) Cr. 3. F. Prereq: 322, Math 385. First semester of a full-year course. A systematic development of the formalism and applications of quantum mechanics. Solutions to the time independent Schrodinger equation for various one-dimensional potentials including the harmonic oscillator; operator methods; Heisenberg picture; angular momentum; the hydrogen atom; spin; symmetry and momentum conservation. Nonmajor graduate credit.

Phys 481. Quantum Mechanics II. (3-0) Cr. 3. S. Prereq: 480. Continuation of 480. Addition of angular momentum; charged particles in electromagnetic fields; time-independent perturbation theory; variational principles; WKBJ approximation; interaction picture; time-dependent perturbation theory; adiabatic approximation; scattering; selected topics in radiation theory; quantum paradoxes. Nonmajor graduate credit.

Phys 490. Independent Study. Cr. arr. Repeatable. F. Prereq: 8 credits in physics, permission of instructor. No more than 9 credits of Phys 490 may be counted toward graduation.

Phys 496. Modern Optics. (Cross-listed with E E) (3-0) Cr. 3. Prereq: Credit or enrollment in Phys 322 and 365. Review of wave and electromagnetic theory; topics selected from: reflection/refraction, interference, geometrical optics, Fourier analysis, dispersion, coherence, Fraunhofer and Fresnel diffraction, holography, quantum optics, nonlinear optics. Nonmajor graduate credit.

Phys 498. Cooperative Education. Cr. R. F.S.S. Prereq: Permission of the department cooperative education coordinator; senior classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Coursed primarily for graduate students, open to qualified undergraduate students.

Phys 501. Oral Communication of Physics Seminar. (2-0) Cr. 1. Repeatable. F. A practical introduction to communication methods in physics and astronomy classrooms and professional settings. For graduate physics majors only. Satisfactory-fail only.

Phys 502. Introductory Research Seminar. Cr. R. F. One-credit research seminar. Areas of research, expected thesis research work, and opportunities in the field. For graduate physics majors only. Satisfactory-fail only.

Phys 511. Condensed Matter Physics I. (3-0) Cr. 3. S. Prereq: 304, credit or enrollment in 481. First semester of a full-year course. First electron model; crystal symmetry; band theory of solids; transport properties; Fermi surfaces; conduction electrons; quantum statistics; crystal surfaces; magnetism; superconductivity.

Phys 512. Condensed Matter Physics II. (3-0) Cr. F. Prereq: 511. Continuation of 511. First electron model; crystal symmetry; band theory of solids; transport properties; Fermi surfaces; conduction electrons; crystal surfaces; magnetism; superconductivity.

Phys 526. Particle and Nuclear Physics. (4-0) Cr. 4. S. Prereq: Credit or enrollment in 481. Basic properties and structures of nuclei, hadrons, and elementary particles; weak and strong interactions; the Standard Model; accelerators and detectors; nuclear models; nuclear decay and stability; nuclear astrophysics; the Higgs mechanism; the CKM matrix; running coupling constants; relativistic heavy-ion collisions; selected topics beyond the standard model such as SUSY and grand unification.

Phys 531. Statistical Mechanics. (3-0) Cr. 3. S. Prereq: 304 and credit or enrollment in 481. Basic properties and structures of nuclei, hadrons, and elementary particles; weak and strong interactions; the Standard Model; accelerators and detectors; nuclear models; nuclear decay and stability; nuclear astrophysics; the Higgs mechanism; the CKM matrix; running coupling constants; relativistic heavy-ion collisions; selected topics beyond the standard model such as SUSY and grand unification.

Phys 532. Molecular and Cell Biophysics. (Dual-listed with 432). (3-0) Cr. 3. S. Prereq: 304 or Chem 325. Quantitative description of biological systems using basic physical laws, including a brief discussion of a variety of biophysical techniques. Topics include: thermodynamics, chemical equilibrium, gene expression, structure and physical properties of nucleic acids and proteins, folding of nucleic acids and proteins, chemical kinetics, catalysis, allosteric enzymes, cell membrane structure and physical properties, and machines in cell membranes.

Phys 534. Symmetry and Group Theory in Physics. (3-0) Cr. 3. S. Prereq: Credit or enrollment in 481. Theory of groups and group representations. Introduction to both point and continuous groups, and their applications in physics.

Phys 535. Physics of Semiconductors. (Cross-listed with E E) (3-0) Cr. 4. Prereq: E E 311 and E E 332. Basic elements of quantum theory, Fermi statistics, motion of electrons in periodic structures, crystal structure, energy bands, equivalent carrier concentration and doping, excess carriers and recombination, carrier transport at low and high fields, phonons, optical properties, amorphous semiconductors, heterostructures, and surface effects. Laboratory experiments on optical properties, carrier lifetimes, mobility, defect density, doping density.

Phys 541. General Relativity. (3-0) Cr. 3. F. Prereq: 362 or Math 466. Tensor analysis and differential geometry developed and used to formulate Einstein field equations. Schwarzschild and Kerr solutions. Other advanced topics may include gravitational radiation, particle production by gravitational fields, alternate gravitational theories, attempts at unified field theories, cosmology.

Phys 551. Computational Physics. (0-4) Cr. 2. S. Prereq: 365. credit or enrollment in 481. Use of modern computational techniques to analyze topics in classical and modern physics. Satisfactory-fail only.

Phys 572. Electricity and Magnetism II. (3-0) Cr. 3. S. Prereq: 571. Special theory of relativity, least action and motion of charged particles in electromagnetic fields, radiation, collisions between charged particles, multipole fields, radiation damping.

A. Nuclear Physics
B. Condensed Matter Physics
C. High Energy Physics
D. Physics
E. Applied Physics
F. Biophysics

Phys 591. Quantum Physics I. (4-0) Cr. 4. F. Prereq: 481. First semester of a full-year course. Postulates of quantum mechanics; time-dependent and time-independent Schrodinger equations for one-, two-, and three-dimensional systems; theory of angular momentum; Rayleigh-Schrödinger time-independent perturbation theory.

Phys 592. Quantum Physics II. (4-0) Cr. 4. S. Prereq: 591. Continuation of 591. Variational theorem and WKB method; time-dependent perturbation theory; method of partial waves and Born approximation for scattering by central potentials; identical particles and symmetry; Dirac and Klein-Gordon equation for free particles; path integral formalism.

Phys 599. Creative Component. Cr. arr. Prereq: Permission of instructor. Individually directed study of research-level problems for students electing the nonthesis M.S. degree option.

Courses for graduate students

Phys 601. Oral Communication of Physics Seminar. (2-0) Cr. 1. Repeatable. F. A practical introduction to communication methods in physics and astronomy classrooms and professional settings. For graduate physics majors only. Satisfactory-fail only.

Phys 602. Introductory Research Seminar. Cr. R. F. (1-1) Discussion by research staff of their research areas, expected thesis research work, and opportuni-ties in the field for graduate physics majors only. Satisfactory-fail only.

Phys 511. Condensed Matter Physics I. (3-0) Cr. 3. S. Prereq: 304, credit or enrollment in 481. First semester of a full-year course. Free electron model; crystal symmetry; band theory of solids; transport properties; Fermi surface; phonons; semiconductors; crystal surfaces; magnetism; superconductivity.

Phys 512. Condensed Matter Physics II. (3-0) Cr. 3. F. Prereq: 511. Continuation of 511. Free electron mod-el; crystal symmetry; band theory of solids; transport properties; Fermi surface; phonons; semiconductors; crystal surfaces; magnetism; superconductivity.

Phys 526. Particle and Nuclear Physics. (4-0) Cr. 4. S. Prereq: Credit or enrollment in 481. Basic proper-ties and structures of nuclei, hadrons, and elementary particles; weak and strong interactions; the Standard Model; accelerators and detectors; nuclear models; nuclear decay and stability; nuclear astrophysics; the Higgs mechanism; the CKM matrix; running coupling constants; relativistic heavy-ion collisions; selected topics beyond the standard model such as SUSY and grand unification.

Phys 531. Statistical Mechanics. (3-0) Cr. 3. S. Prereq: 304 and credit or enrollment in 481, Math 465, credit or enrollment in Math 385 or 426. Thermodynamic properties of systems of many particles obeying Boltzman, Fermi-Dirac, and Bose-Einstein statistics; microcanonical, canonical, and grand canonical ensembles and their application to physical problems; density matrices; introduction to phase transitions; renormalization group theory; kinetic theory and fluctuations.

Phys 532. Molecular and Cell Biophysics. (Dual-listed with 432). (3-0) Cr. 3. S. Prereq: 304 or Chem 325. Quantitative description of biological systems using basic physical laws, including a brief discussion of a variety of biophysical techniques. Topics include: thermodynamics, chemical equilibrium, gene expression, structure and physical properties of nucleic acids and proteins, folding of nucleic acids and proteins, chemical kinetics, catalysis, allosteric enzymes, cell membrane structures, and physical properties, and machines in cell membranes.

Phys 534. Symmetry and Group Theory in Physics. (3-0) Cr. 3. S. Prereq: Credit or enrollment in 481. Theory of groups and group representations; introduction to both point and continuous groups, and their applications in physics.

Phys 553. Physics of Semiconductors. (Cross-listed with E E). (3-0) Cr. 4. F. Prereq: 511. Basic elements of quantum theory, Fermi statistics, motion of electrons in periodic structures, crystal structure, energy bands, equilibrium carrier concentra-tion and doping, excess carriers and recombination, carrier transport in microscopic fields; quantum optical properties, amorphous semiconductors, heterostructures, and surface effects. Laboratory experiments on optical properties, carrier lifetimes, mobility, defect density, doping density.

Phys 541. General Relativity. (3-0) Cr. 3. F. Prereq: 362 or Math 465. Tensor analysis and differential geometry developed and used to formulate Einstein field equations. Schwarzschild and Kerr solutions. Other advanced topics may include gravitational radiation, particle production by gravitational fields, alternate gravitational theories, attempts at unified field theories, cosmology.

Phys 551. Computational Physics. (0-4) Cr. 2. S. Prereq: 365. credit or enrollment in 481. Use of modern computational techniques to analyze topics in classi-cal and modern physics. Satisfactory-fail only.

Phys 572. Electricity and Magnetism II. (3-0) Cr. 3. S. Prereq: 571. Special theory of relativity, least action and motion of charged particles in electromagnetic fields, radiation, collisions between charged particles, multipole fields, radiation damping.

A. Nuclear Physics
B. Condensed Matter Physics
C. High Energy Physics
D. Physics
E. Applied Physics
F. Biophysics

Phys 591. Quantum Physics I. (4-0) Cr. 4. F. Prereq: 481. First semester of a full-year course. Postulates of quantum mechanics; time-dependent and time-independent Schrodinger equations for one-, two-, and three-dimensional systems; theory of angular momentum; Rayleigh-Schrödinger time-independent perturbation theory.

Phys 592. Quantum Physics II. (4-0) Cr. 4. S. Prereq: 591. Continuation of 591. Variational theorem and WKB method; time-dependent perturbation theory; method of partial waves and Born approximation for scattering by central potentials; identical particles and symmetry; Dirac and Klein-Gordon equation for free particles; path integral formalism.

Phys 599. Creative Component. Cr. arr. Prereq: Permission of instructor. Individually directed study of research-level problems for students electing the nonthesis M.S. degree option.

Phys 624. Advanced Nuclear Physics. (3-0) Cr. 3. Prereq: 526 and 592. Microscopic few-body and many-body theory; theory of effective Hamilton- ics; relativistic nuclear physics; nuclear effects in hadron-nucleus, lepton-nucleus, and nucleus-nucleus reactions.

Phys 625. Physics of Strong Interactions. (3-0) Cr. 3. Prereq: 681. Quark model; Quantum Chromo-dynamics (QCD), perturbation methods for QCD; effective field theories for pions and nucleons; finite temperature field theories; quark-gluon plasma; phase transitions in QCD.

Phys 650. Advanced Seminar. (1-0) Cr. 1. Repeat- able. F. Topics of current interest. Satisfactory-fail only.

A. Nuclear Physics
B. Condensed Matter Physics
C. High Energy Physics
D. Physics
E. Applied Physics
F. Biophysics

2009-2011
Phys 681. Quantum Field Theory I, (3-0) Cr. 3. F. Prereq: 564, 572, 592. Quantization of fields (canonical and path integral); Feynman rules; introduction to gauge theories; Quantum Electrodynamics; radiative corrections; renormalization and renormalization group.

Plant Biology (Interdepartmental Graduate Major)

www.agron.iastate.edu/pft/ipmm/home.asp

Supervisory Committee: K. Wang, Chair; D. Hannapel, Interim Associate Chair; M. Bhattacharya, M. James, R. Thornburg (ex-officio), S. Whitham

The Interdepartmental Plant Physiology Major (IPPM) coordinates graduate education and research in the areas of plant biology including but not limited to plant biochemistry, plant cellular and molecular biology and plant physiology. Graduate study in IPPM, leading to the M.S. and Ph.D. Degrees, is offered through seven participating departments: Agronomy, Biochemistry, Biophysics & Molecular Biology, Chemical and Biological Engineering, Ecology, Evolution and Organismal Biology, Genetics Development & Cell Biology, Horticulture, and Plant Pathology.

Research conducted by the faculty and students of the major represents basic plant physiology, biochemistry and molecular biology. The experimental approaches represented in the major span the range from complexity from molecular studies, to cellular, organismal and the ecological level (crop monocultures and natural populations). Graduates have a broad understanding of basic, functional plant biology with emphases on fundamental biophysical, biochemical, and molecular biology. They are able to address complex research and policy problems in agriculture, biotechnology, and basic plant biology.

All M.S. candidates take a core curriculum comprising courses recommended from the following four categories, attend research seminars, research credits (PlBio 699), annual Loomis Lecture and mini-symposium and retreats. Students will take additional courses of interest as directed by their Program of Study (POS) Committee members.

A total of 36 credits including a minimum of 16 course credits are required for a M.S.

(1) Complete the following core courses:
   a) Stat 401; b) BBMB 404 or BBMB 501; c) GDCB 513; d) Agron/Gen/PI P 565; e) Make four seminar presentations and enroll each term in the Interdepartmental Plant Physiology seminar PlBio 696P or its listed equivalent. The first seminar must be during the student's first year and is a 20 minutes seminar. The last presentation must be an exit seminar.

   (2) Take one course from the following courses:
      a) BBMB 405; b) BBMB 502; c) GDCB 511; d) GDCB 545

   (3) Take one course from the following courses:
      a) GDCB 512; b) GDCB 529

   (4) Take additional courses from the following list:
      Agron 516; Agron 527; Agron/Hort/NREM 529; Agron 616; Agron 625; BBMB 405; BBMB 451; BBMB 500; BBMB 607; BBMB 645; BBMB 660; BBMB 675; BBMB 676; BCB 551; BCB 596; Biol 454; Biol 474; EEOB 563; EEOB 566; EEOB 595; GDCB 510; GDCB 512; GDCB 528; GDCB 529; GDCB 545; GDCB 640; GDCB 679; GDCB 680; GDCB 681.

   All Ph.D. candidates take a core curriculum comprising courses recommended from the following categories, attend research seminars, research credits (PlBio 699), annual Loomis Lecture and mini-symposium and retreats. Students will take additional courses of interest as directed by their Program of Study (POS) Committee members.

   A total of 72 credits including a minimum of 24 course credits are required for a Ph.D.

   (1) Complete the following core courses:
      a) Stat 401; b) BBMB 404 or BBMB 501; c) GDCB 513; d) Agron/Gen/Pl P 565; e) Make four seminar presentations and enroll each term in the Interdepartmental Plant Physiology seminar PlBio 696P or its listed equivalent. The first seminar must be during the student's first year and is a 20 minutes seminar. The last presentation must be an exit seminar.

   (2) Take one course from the following courses:
      a) BBMB 405; b) BBMB 502; c) GDCB 511; d) GDCB 545

   (3) Take one course from the following courses:
      a) GDCB 512; b) GDCB 529

   (4) Take additional courses from the following list:
      Agron 516; Agron 527; Agron/Hort/NREM 529; Agron 616; Agron 625; BBMB 405; BBMB 451; BBMB 500; BBMB 607; BBMB 645; BBMB 660; BBMB 675; BBMB 676; BCB 551; BCB 596; Biol 454; Biol 474; EEOB 563; EEOB 566; EEOB 595; GDCB 510; GDCB 512; GDCB 528; GDCB 529; GDCB 545; GDCB 640; GDCB 679; GDCB 680; GDCB 681.

   Requirements for students seeking Plant Physiology as Minor:

   (1) Prerequisite courses:
      Stat 401; BBMB 404 or BBMB 501.

   (2) Take a minimum of nine credits from the following courses:
      Agron 516; Agron 527; Agron/Hort/NREM 529; Agron 616; Agron 625; BBMB 405; BBMB 451; BBMB 500; BBMB 607; BBMB 645; BBMB 660; BBMB 675; BBMB 676; BCB 551; BCB 596; Biol 454; Biol 474; EEOB 563; EEOB 566; EEOB 595; GDCB 510; GDCB 512; GDCB 528; GDCB 529; GDCB 545; GDCB 640; GDCB 679; GDCB 680; GDCB 681.

   Courses for graduate students

   PlBio 512. Plant Growth and Development. (Cross-listed with GDCB, MDCB). (2-0) Cr. 2. S. Pre req: Biol 330 or a course in developmental biology; GDCB 545 or BBMB 404. 405 or GDCB 520. Plant growth and development and its molecular genetic regulation. Hormone biosynthesis, metabolism, and action. Signal transduction in plants.

Plant Pathology

www.plantpath.iastate.edu

Thomas Baum, Chair of Department

Distinguished Professors (Emeritus): Tiffany University Professors (Emeritus): McNabb

Professors: Baum, Braun, Bronson, Gleason, Harrington, Hill, Miller, Nutter, Tyka, Yang

Professors (Emeritus): Durand, Epstein, Hodges, Mcgee, Stewart

Professor (Collaborator): Wise

Associate Professors: Beattie, Bogdanove, Munikovith, Whitham

Assistant Professors: Halverson, Leandro, Robertson

Assistant Professors (Collaborators): Block, Lauder

Undergraduate Study

The department participates in the interdepartmental undergraduate Microbiology major; see Agriculture, Curricula

Graduate Study

The department offers studies for the degrees master of science and doctor of philosophy with a major in plant pathology, and minor work for students majoring in other departments or programs. A master of science nonthesis option is available. The department also participates in the interdepartmental majors in microbiology; toxicology; genetics; plant physiology; molecular, cellular, and developmental biology, ecology and evolutionary biology; and sustainable agriculture.

Students entering graduate programs in the department need a sound background in the physical, biological, and mathematical sciences as well as adequate preparation in English.

Graduates have a broad understanding of the biology and management of plant pathogenic microorganisms and the interactions of pathogens with their host plants. They understand the relationship between plant pathology and allied disciplines and are able to communicate effectively with scientific colleagues and the general public in both formal and informal settings. Graduates are able to address complex plant disease problems facing agricultural and bioscience professionals, taking into account the related ethical, social, legal, and environmental issues. They are skilled in research procedures, communicating research results, and writing concise and persuasive grant proposals.

Courses primarily for undergraduate students

PI P 391. Practical Plant Health. (0-4) Cr. 2. F. Pre req: 6 credits in biological sciences. Diagnosis of all types of plant health problems caused by diseases, insects, weeds, nutrient deficiencies and toxicities, herbicide injury, and environmental stress. Emphasis is on acquiring practical skills. Students will gain experience in written and oral communication.

Courses primarily for graduate students, open to qualified undergraduate students

PI P 511. Integrated Management of Tropical Crops. (Cross-listed with Ent, Hort). (3-0) Cr. 3. S. Prereq: 2011. Prereq: Ent 370 or Hort 221. Munkvold, Lewis, Nonnecke. Applications of Integrated Crop Management principles (including plant pathology, entomology, and horticulture) to tropical cropping systems. Familiarization with a variety of tropical agroecosystems and Costa Rican culture is followed by 10-day tour of Costa Rican agriculture during spring break, then writheup of individual projects. Tupe expenses paid by students.

PI P 530. Ecologically Based Pest Management Strategies. (Cross-listed with Agron, Ent, SusAg). (3-Cr) Cr. 3. F. Prereq: 2010. Prereq: SusAg 509. Durable, least-toxic strategies for managing weeds, pathogens, and insect pests, with emphasis on underlying ecological processes.

PI P 543. Ecology and Epidemiology of Plant Diseases. (2-0) Cr. 4. F. Prereq: 2009. Prereq: 408 or 416. Nutter. Theory and practice related to the ecology and epidemiology of plant disease epidemics. Interactions among host and pathogen populations as affected by the environment are quantified with respect to time and space. Analysis of ecological and host and pathogen genetic factors that alter the course of plant disease epidemics. Risk assessment theory, disease forecasting, and modeling the impact of biotic plant stresses on yield and quality are also emphasized.

PI P 566. Professional Practice in the Life Sciences. (Cross-listed with Agron, An S, BCB, Hort, V MPM, Micro). Cr. arr. S. Prereq: Graduate classification. Professional discourse on the ethical and legal issues facing life science researchers. Offered in modular format; each module is four weeks. A. Professional Practices in Research. (Cr. 1.0). Good scientific practices and professional ethics in the life sciences. B. Intellectual Property and Industry Interactions. (Cr. 0.5). Ethical and legal issues facing life scientists involved in research interactions with industry.

PI P 490. Independent Study. Cr. arr. Repeatable. F.S.S.S. Prereq: Junior or senior classification, 7 credits in biological sciences, permission of instructor. A maximum of 6 credits of PI P 490 may be used toward the total of 128 credits required for graduation.

A. Plant Pathology
H. Honors

PI P 494. Seed Pathology. (Dual-listed with 594). (2-3) Cr. 3. S. Prereq. 2011. Prereq: 408. Munkvold. Significance of diseases on the major phases of seed production; growing, harvesting, conditioning, storing, and planting seed. Pathogens considered include fungi, bacteria, viruses, nematodes, and abiotic agents. Emphasis on epidemiology, management, host-pathogen relationships, seed transmission, and seed health testing. Credit may not be obtained for both PI P 494 and STBP P 592.

Courses for graduate students

PI P 691. Field Plant Pathology. (2-0) Cr. 2. Repeatable. Prereq: 408 or 416. Prereq: for instructor. Advanced topics in plant pathology, including biological control, cultural control, resistance gene deployment, genetic engineering for disease resistance, chemical control, integrated pest management, emerging diseases, fungal genetics, insect vector biology, professional communications, etc.

PI P 698. Seminar. Cr. 1. Repeatable. F.S.

Political Science

Distinguished Professors (Emeritus): Rasmussen
University Professors: Schmidt, Shelley
Professors: Dobratz, Mansbach, McCormick, Smith
Professors (Emeritus): Dearin, Kihl, Lee, Maney, Moses
Associate Professors: Hutter, Potsoki, Tuckness, Wolf
Associate Professor (Emeritus): Whittmer
Associate Professor (Adjunct): Waggoner
Assistant Professors: Birkky, Conger, D. Cunningham, N. Cunningham, Urbatsch
Assistant Professor (Adjunct): Bystrom
Senior Lecturer: Deam

Undergraduate Study

For the undergraduate curriculum in Liberal Arts and Sciences, with major in political science, leading to the degree of Bachelor of Arts, see Liberal Arts and Sciences, Curriculum.

The study of political science is designed to enable students to understand the nature of politics, public values, and the institutions and processes of politics in their various forms. Students completing a major in political science will understand and be able to interrelate the leading theories, literature, and approaches in the subfields of American government, political theory and methods, international relations, and comparative politics. Students can analyze and formulate effective argumentation in written and oral forms, including the ability to appreciate and
accommodate diverse political ideas, and the ability to collect and critique information and ideas of others in support of original arguments. Graduates appreciate the knowledge and civic responsibilities required for effective participation in political life.

The political science major is often chosen by students preparing for a career in law. Students with this goal should consult with the department in selecting courses. See also Preprofessional Study.

Several internship options are available to the political science major, offering students the opportunity to experience practical application of the knowledge learned in academic courses.

Requirements for the Major:

For the purpose of defining undergraduate requirements in the Department of Political Science, the Department employs four subfields within the discipline, with the following courses in each:

To complete the major in Political Science a student must earn 33 semester credits of courses in Political Science subject to the following conditions:

a. Students must satisfactorily complete Pol S 101, 301, and 302.

b. Students must complete at least 3 credits in each of the four subfields listed above. Students may apply only one half-semester mini-course (Pol S 312, 313, 314, 315) in each group.

c. Political Science courses in which a student has a grade of D+ or lower will not count for the major but can be counted as electives.

d. At least 18 credits of Political Science courses must be numbered 300 or above.

e. Students must pass one statistics course from among Stat 101, 104, 226 or 231.

f. No more than six credits of Pol S 490 or 499 (alone or in combination) can be used to fulfill any of these requirements. A maximum of three credits of Pol S 490 can be applied to meet any of the four subfield requirements.

g. A maximum of six credits from half-semester mini-courses (Pol S 312, 313, 314, 315) can be applied to satisfy the above requirements.

h. At least 15 credits of Political Science coursework must be earned at Iowa State University.

i. Advanced Communication Skills: Majors must earn at least a C+ in each of Engl 150 and 250. Those who do not must complete Engl 309 or 314 with a grade of C or higher. Majors must also complete Pol S 302.

The department offers a minor in political science that may be earned by completing 15 credits beyond the 100-level of coursework in political science, nine of which must be at the 300 level or above. A student minoring in Political Science normally will be expected to take at least 9 credits in Political Science coursework at Iowa State University. Only 3 credits of Pol S 490 or Pol S 499, alone or in combination, and only 2 credits of Pol S 312-315 may be included in the total of 15 credits required for the minor. All minors in the College of Liberal Arts and Science require a minimum of 6 credits in courses numbered 300 and above taken at ISU with a grade of C or higher. Credits earned in Pol S 499, offered on a satisfactory/fail basis only, will not fulfill this requirement.

Graduate Study

The department offers work for a Master of Arts degree (M.A.), with a major in political science, and minor for students in other departments. The department offers a Master of Public Administration (MPA) degree or a Graduate Certificate of Public Management (GCPM) for those interested in an educational certificate program that requires less work than a full masters program. In addition, the Political Science Department offers work for the Master of Science in Information Assurance. Information with detailed requirements for all graduate degrees may be obtained at the department's web page at www.pol.iastate.edu/gradhome.shtml.

The M.A. program is designed to enable its graduates to engage in governmental research, enter public service or private industry, teach, or pursue further graduate study. Graduate students may also wish to work for certification for high school or junior college teaching. A thesis is required for this degree. The department also has a joint Master of Arts/Juris Doctor (M.A./J.D.) program with the Law School of Drake University. Detailed information for the M.A./J.D. can be found at the ISU Political Science web page as well as the Drake Law School website (under Joint Degree): www.law.drake.edu/admissions/specializations.html. Students wishing to pursue this joint degree must submit separate applications to both Drake University and Iowa State University and be accepted by both institutions.

M.A. graduates have a broad substantive understanding of the political process and the academic study of politics. They also have in-depth knowledge of one or more subfields in political science. Graduates are skilled at conducting research and preparing thorough research summaries. They are able to identify and address complex political questions, taking into account related ethical, legal, economic, and social issues.

The usual prerequisites for major graduate work in the M.A. program normally are completion of at least 15 credits in political science, the GRE (Graduate Record Examination), one year of a foreign language (equivalent to 8 semester hours) and a course in basic statistics (equivalent to Stat 101). If the basic statistics requirement has not been met, the student may remedy the deficiency by passing equivalent courses, for which no graduate credit will be received. During their program of study, all students are expected to complete Stat 401, Pol S 502, and a thesis. Students normally do concentrated course work in at least one of the following three areas: international relations, comparative politics, or American politics. The student's program of study committee may require additional work.

Students in other graduate programs may obtain a minor in political science by completing at least 9 credits of political science courses, including one of the preseminar. Interested students should consult the Graduate College Handbook for additional information on graduate minors.

The Master of Science in Information Assurance (MSIA) is a multi-disciplinary program designed to provide students with diverse backgrounds and interests the opportunity to obtain professional training in the emerging field of information assurance. The core of the MSIA program is built around a series of courses taught in Electrical and Computer Engineering, Mathematics, and Computer Science that introduce students to software and hardware aspects of cryptography and computer security. The program also recognizes, however, that information assurance-defined in terms of security, privacy, access, and reliability-is not simply a technical problem but also involves important societal dimension, including policy, education, ethics, and management. Recognizing that political science is adjacent to potential intersections with information assurance (e.g., public sector management of information technology; forensics and computer crime; information technology policy and law; information technology and international relations; information warfare; state, and local levels of government, and non-profit sector management. The program also recognizes, however, that information assurance-defined in terms of security, privacy, access, and reliability-is not simply a technical problem but also involves important societal dimension, including policy, education, ethics, and management. Recognizing that political science is adjacent to potential intersections with information assurance (e.g., public sector management of information technology; forensics and computer crime; information technology policy and law; information technology and international relations; information warfare; state, and local levels of government, and non-profit sector management.

Graduate requirements generally follow the same guidelines as the M.A. or MPA in Political Science. Degree requirements are specified by the MSIA program in cooperation with Political Science. More in-depth information on the program can be found at: http://www.issi.iastate.edu/infas.html.

Public Policy and Administration

The Public Policy and Administration program offers work for the professional Master of Public Administration degree (MPA). The program is designed to educate and train students for careers in management and policy analysis at the federal, state, and local levels of government, and non-profit sector management. The program serves a diverse student body, including pre-service students and in-service employees in government and nonprofit organizations. The curriculum covers a broad range of public administration and policy topics, including organizational and administrative processes, eGovernment, leadership, organizational change dynamics, human resource management, budgeting, cost benefit analysis, financial management, policy analysis, and ethics. The program offers three concentrations: Public Management, eGovernment and Management of Information Technology, and Policy Analysis.

The MPA degree requires 37 credits, which includes (a) 15 credits in core competency, (b) 9 credits in one of the concentration areas, (c) 4 credits in other required courses, (d) up to 7 credits of electives, and (e) 3 credits of creative component (a capstone project) or a minimum of 3 credits of research (thesis). Pre-service students are encouraged to obtain an internship for 3 credits.
The Program also offers a Graduate Certificate of Public Management program (GCPM), which requires a completion of 15 credits: 9 credits in the core, and two additional courses in the area of student interest. Some classes are available via videoconferencing, streaming video, one week and executive weekend formats, and online.

The Program also offers joint master’s degrees with the Department of Community and Regional Planning (25 credits in each program plus a six credit thesis), and the interdisciplinary Information Assurance program (30 credits). The requirement for all double degrees consists of 22 credits from each discipline for a total of 54 credits. Under the rules of the Graduate College a graduate student may pursue a joint degree between any two disciplines of their interest. Interested students are encouraged to consult the ISU’s Graduate Handbook. The minimum requirements for all double degrees consist of 22 credits from each program.

Requirements for admission are a graduate school application, an essay stating purposes for study, college transcripts, the GRE (waived for those with five or more years of public or nonprofit sector experience), three letters of recommendation, and the TOEFL for international students.

The department cooperates in the interdepartmental majors in transportation and water resources, and an interdepartmental minor in gerontology (see Oncology). Refer to the Schedule of Classes (www.iastate.edu/~catalog) or consult the Public Policy and Administration (MPA) web page (http://mpa.las.iastate.edu) for up-to-date scheduling information.

Courses primarily for undergraduate students

Pol 510. Orientation to Political Science. (2-0) Cr. 1. F.S. or Prereq: Political Science and Open Option majors only or permission of the instructor. Introduction to the discipline and sub-fields of Political Science, including an introduction to analytical thinking, and research skills relevant to political science. Orientation to university, college, and departmental structure, policies, student roles and responsibilities; degree planning and career awareness. Satisfactory-fail only.

Pol 515. Introduction to American Government. (3-0) Cr. 3. F.S.S. Fundamentals of American democracy; constitutionalism; federalism; rights and duties of citizens; executive, legislative, and judicial branches of government; election, public opinion, interest groups, and political parties.

Pol 525. Introduction to Ethics and Politics. (3-0) Cr. 3. F.S. Prereq: Sophomore standing. Introduction to moral controversies surrounding political issues such as violence, deception, corruption, civil disobedience, democracy, justice, equality, and freedom. Students will read classic and contemporary texts and consider political applications. This course serves as an introduction to advanced courses in political theory.

Pol 524. Introduction to Comparative Government and Politics. (3-0) Cr. 3. F.S. Basic concepts and major theories; application to selected political systems, including non-western political systems.

Pol 525. Introduction to International Politics. (3-0) Cr. 3. F.S. Dynamics of interstate relations pertaining to nationalism, the nation state; peace and war; foreign policy making; the national interest; military capability and strategy; case studies of transnational issues, such as population, food, energy, and terrorism.

Pol 529. Cooperative Education. Cr. R. F.S.S. Prereq: Permission of department cooperative education coordinator; sophomore classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Pol 530. Introduction to Empirical Political Science Research. (3-0) Cr. 3. F.S.S. Prereq: 3 credits in political science; one statistics course required; sophomore classification. Techniques of quantitative and qualitative political research and analysis. Development and understanding of major theories; methods of data collection, research design, and critical thinking. Applications of statistics to political research.

Pol 530. Politics of Writing, Speaking, and Reading. (3-0) Cr. 3. F.S. Prereq: English 250; 3 credits in Political Science. Political Science majors only. Focus on the connections between communicative and rhetorical skill and effective civic understanding and participation. Techniques of effective communication and persuasion in writing and speaking. Development of skills of critical and rhetorical analysis in reading.

Pol 530. Political Behavior. (3-0) Cr. 3. F. Prereq: Sophomore classification. Empirical theories and descriptions of political behavior, including decision-making, opinion, and attitudes, with an emphasis on groups and political elites.

Pol 531. State and Local Government. (3-0) Cr. 3. S. Prereq: 3 credits in political science. Role of state and local government in the federal system. Structures of participation: political parties, elections, interest groups. Major governmental institutions; legislative, executive, and judicial. Structure and functions of local governments.

Pol 531. Municipal Government and Politics. (3-0) Cr. 3. Alt., F., offered 2009. Legal position of municipal corporation; forms of organization; administration of municipal services; problem-solving in municipal government; urban and metropolitan political process; implications of federal urban policies.

Pol 532. Minicourse in American Government and Politics. (3-0) Cr. 2. F.S. Prereq: Sophomore classification. Half-semester course on selected topical issues in American government and politics. Designated repeat in Pol 532 is not permitted. Use of Pol 532 credit in Pol S major and minor is limited. See Undergraduate Study for information.

Pol 532. Minicourse in Theory and Methods. (3-0) Cr. 2. F.S. Prereq: Sophomore classification. Half-semester course on selected topical issues in theory and methods in political science. Designated repeat in Pol 532 is not permitted. Use of Pol 532 credit in Pol S major and minor is limited. See Undergraduate Study for information.

Pol 534. Public Policy. (3-0) Cr. 3. F. Prereq: Sophomore standing. Introduction to the policy-making process, forces molding policy choices, and the impact of such choices.

Pol 536. European Politics. (3-0) Cr. 3. S. Prereq: Sophomore standing. Introduction to the policy-making process, forces molding policy choices, and the impact of such choices.

Pol 537. African Politics. (3-0) Cr. 3. F. F. Prereq: Sophomore standing. Introduction to the policy-making process, forces molding policy choices, and the impact of such choices.

Pol 538. Latin American Government and Politics. (3-0) Cr. 3. F. Prereq: Sophomore standing. Introduction to the policy-making process, forces molding policy choices, and the impact of such choices.

Pol 539. Politics and Society. (Cross-listed with Pol Sc 539). (3-0) Cr. 3. F. Prereq: Admission by permission of instructor. Introduction to the political science and political philosophy of societies in which the roles of the state and society are central. Topics include democracy, political philosophy, and the role of religion in politics.

Pol 540. Politics of Developing Areas. (3-0) Cr. 3. F. Prereq: Sophomore standing. Introduction to the political science of developing areas including the impact of economic development as they relate to the political processes of developing countries. Overview of the political systems of developing countries. Some case studies.

Pol 541. Politics of Asia. (3-0) Cr. 3. F. Prereq: Sophomore standing. Introduction to the political science of Asia including the impact of economic development as they relate to the political processes of developing countries. Overview of the political systems of developing countries. Some case studies.

Pol 542. Politics of Europe. (3-0) Cr. 3. F. Prereq: Sophomore standing. Introduction to the political science of Europe including the impact of economic development as they relate to the political processes of developing countries. Overview of the political systems of developing countries. Some case studies.

Pol 543. Politics of Russia and the Soviet Union. (3-0) Cr. 3. F. Prereq: Sophomore standing. Introduction to the political science of Russia and the Soviet Union including the impact of economic development as they relate to the political processes of developing countries. Overview of the political systems of developing countries. Some case studies.

Pol 544. European Union. (3-0) Cr. 3. F. Prereq: Sophomore standing. Introduction to the political science of the European Union including the impact of economic development as they relate to the political processes of developing countries. Overview of the political systems of developing countries. Some case studies.

Pol 545. African Union. (3-0) Cr. 3. F. Prereq: Sophomore standing. Introduction to the political science of the African Union including the impact of economic development as they relate to the political processes of developing countries. Overview of the political systems of developing countries. Some case studies.

Pol 546. Politics of Islam. (3-0) Cr. 3. F. Prereq: Sophomore standing. Introduction to the political science of Islam including the impact of economic development as they relate to the political processes of developing countries. Overview of the political systems of developing countries. Some case studies.
Pol S 357. International Security Policy. (3-0) Cr. 3. F.
The major theoretical approaches in security policy—strategy and deterrence, game theory, bargaining theory, compliance, and coercive diplomacy, and crisis diplomacy—are illustrated through various case studies.

Pol S 358. United States Foreign Policy. (3-0) Cr. 3. F. Prereq: 215 or 251, or Hist 467 or 470 or 471. U.S. foreign policy since World War II with an emphasis on changing American values in foreign policy, the role of the President, collective interests, and the bureaucracy in policy making, and a survey of current foreign policy issues and problems.

Pol S 359. Current Issues in American Foreign Policy. (3-0) Cr. 3. S. Prereq: 215, 251, or 358. Examination of contemporary U.S. foreign policy issues (e.g., U.S. policy in the Middle East; defense budgeting in the post-Cold War era; conventional and nuclear arms control policy). The course will explore specific topics to analyze policy with an emphasis on policy analysis. The course will explore recent issues of defense and foreign policy.

Pol S 360. American Institutions: Congress. (3-0) Cr. 3. S. Prereq: 215. Theory and practice of representation and deliberation in the legislative branch of the U.S. government; operations of Congress in terms of its committees, leadership, legislative language, oversight processes, partisan politics, electoral campaigns, service to local and special electoral campaigns, service to local and special interests, and interactions with the President.

Pol S 363. American Institutions: Media. (3-0) Cr. 3. S. Prereq: Sophomore standing. Course surveys the influence of media, radio, television, and film in America. The course will explore the role of media in the political process, exploring the extent to which media promotes or discourages political participation. Topics will examine the influence and role of news coverage, advertising, public relations, and how media shapes political issues.

Pol S 370. Religion and Politics. (Cross-listed with Relig.) (3-0) Cr. 3. S. Prereq: Relig 105 or 210 recommended. The interaction of religion and politics in the United States and the impact of religion on political institutions. Nonmajor graduate credit.

Pol S 371. Introduction to Public Administration. (3-0) Cr. 3. F. Prereq: Sophomore standing. A survey of the historic and contemporary administrative realities that contribute to the unique challenges of public administration in the United States. The course will explore the role of public administration in the social, economic, political, and cultural development of the United States.

Pol S 381. International Political Economy. (3-0) Cr. 3. S. Introduction to the theoretical perspectives on international political economy. Exploration of specific issues such as the changing international trade regime, international financial system, and Third World development under conditions of globalization.

Pol S 385. Women in Politics. (Cross-listed with W S). (3-0) Cr. 3. S. Examination of the entry and participation of women in politics in the United States and other countries including a focus on contemporary issues and strategies for change through the political process.
Pol S 487. Electronic Democracy. (2-1) Cr. 3. F. Prereq: Sophomore standing or instructor approval. The impact of computers, the Internet, and the World Wide Web on politics and policy. The positive and negative effects on information technology (IT) on selected topics such as freedom, power and control, privacy, civic participation, the sense of “community,” virtual cities, interest group behavior, the new media, campaigns, elections, and voting will be examined. Nonmajor graduate credit.

Pol S 490. Independent Study. Cr. arr. Repeatable. F.S. Prereq: 6 credits in political science. Special studies in the political institutions, processes and policies of American, foreign, and international governments. Also, studies in traditional and behavioral political theory. Use of credit in Pol S major and minor is limited. See Undergraduate Study for information. No more than 9 credits of Pol S 490 may be counted toward graduation.

A. American Government and Politics
B. Theory and Method
C. Comparative Politics
D. International Relations
E. Extended credit. The student may earn an additional or 2 credits for extra study done for any 300- or 400-level course, with instructor’s approval.

G. Catt Center Project
H. Honors

Pol S 491. Senior Thesis. Cr. 3. Prereq: 21 credits of Pol S and permission of instructor. Written under the supervision of a Political Science faculty advisor.

Pol S 495. Capstone Project in Political Science. (3-0) Cr. 3. S. Prereq: 21 credits in political science and permission of instructor. Capstone project for political science majors; integrating research, analysis and participation.

Pol S 498. Cooperative Education. Cr. R. F.S.S. Prereq: Permission of cooperative education coordinator; senior classification. Required of all cooperative education students. Students must register for this course prior to beginning each work period.

Pol S 499. Internship in Political Science. Cr. arr. F.S.SS. Prereq: 6 credits in political science; junior or senior classification; and permission of internship coordinator. Work experience with a specific nongovernmental or governmental agency at the local, state, national, or international level, combined with academic work under faculty supervision. Use of credit in Pol S major and minor is limited. See Undergraduate Study for information. Satisfactory-fail only.

Courses primarily for graduate students, open to qualified undergraduate students

Pol S 504. Proseminar in International Politics. (3-0) Cr. 3. S. Prereq: 6 credits in political science or graduate standing. An overview of the major theoretical and empirical works in the study of international politics and foreign policy. Among the major theoretical approaches surveyed and applied to international politics are realism, neo-realism, liberalism, functionalism, rational choice theory, game theory, and decision-making theory. Seminar writings by leading scholars will be reviewed.

Pol S 505. Proseminar in Comparative Politics. (3-0) Cr. 3. F. Prereq: 6 credits in political science or graduate standing. Major theoretical approaches to the study of comparative politics – varying concepts and definitions of society and policy, administrative traditions, institutional arrangements, political behavior, etc. Contrasting research method designs.

Pol S 506. Proseminar in American Politics. (3-0) Cr. 3. S. Prereq: 6 credits in political science or graduate standing. A presentation of the major theories and research on American government and politics. Substantive topics include modern democratic theory, institutionalism, and mass political behavior. A variety of research methodologies are examined, including normative theory, behavioralism, and rational choice analysis.

Pol S 510. State Government and Politics. (3-0) Cr. 3. S. Prereq: 310. Comparative analysis of state political systems. Role of interest groups, political parties, legislatures, courts, and governors in state politics. Possible determinants of public policy outputs at the state level.

Pol S 513. Intergovernmental Relations. (Dual-listed with 413). (3-0) Cr. 3. S. Prereq: 6 credits of American government. Theories and practices of the American federal system, making government, among federal, state, and local governments.

Pol S 525. Mass Political Behavior. (3-0) Cr. 3. Prereq: 6 credits in Political Science or graduate standing. An in-depth survey of the theoretical, empirical, and methodological works concerning mass political behavior in the United States. Substantive topics include political attitudes and ideologies, public opinion and voting behavior, and political psychology. Methods for studying mass behavior include survey research and experimental approaches.

Pol S 531. Early Modern Political Thought. (Dual-listed with 431). (3-0) Cr. 3. Prereq: 6 credits in political science, philosophy, or European History. Study of original texts in political thought ranging from the Reformation to the French Revolution and its aftermath; Topics such as justice, freedom, rights, democracy, toleration, property, power, skepticism, and normative views of international politics.

Pol S 534. Legal and Ethical Issues in Information Assurance. (Cross-listed with Cpr E 457). (3-0) Cr. 3. S. Prereq: Graduate classification; Cpr E 531 or InfoS S 531. Legal and ethical issues in computer security. State and local codes and regulations. Privacy issues.

Pol S 535. Contemporary Political Philosophy. (Cross-listed with Phi). (3-0) Cr. 3. S. Prereq: offered 2011. Prereq: 6 credits of philosophy or political science. Examination of theories of justice proposed by contemporary political philosophers. Analysis of the philosophical foundations of perspectives such as liberalism, libertarianism, communitarianism, socialism, feminism. Normative assessments of socio-political institutions.

Pol S 541. Strategic Public Management. (40-0) Cr. 3. S. Theory and practice of strategic planning and implementation in the public sector. Alignment of planning with other strategic systems. Discussion of fundamental strategic management issues and concepts. Introduction of alternatives to the bureaucratic paradigm. Includes group exercises and guidance for strategic management facilitation. Course is one-week intensive format.

Pol S 542. The Policy and Politics of Coastal Areas. (Dual-listed with 442). (3-0) Cr. 3. S. Exploration of political implications of coastal policy. Issues include: “Carrying capacity,” zoning, regulation of human development activities, tradeoffs between conservation and jobs, the quality of coastal lifestyle, ways in which citizens participate in policy for coastal areas.

Pol S 544. Comparative Public Policy. (3-0) Cr. 3. Prereq: 6 credits in political science. Examines how, why, and to what effect governments deal with substantive policy problems differently. Environmental factors, ideolgies, cultures, domestic policy making processes, and interest groups.

Pol S 547. Political Leadership and Elites. (3-0) Cr. 3. Prereq: 6 credits in political science. Various forms of leadership and leader-follower relations. Obligations, exchanges, incentives, coercion, corruption, bossism in both the U.S. and foreign experience.

Pol S 552. Comparative Foreign Policy. (Dual-listed with 452). (3-0) Cr. 3. S. Prereq: 251. Various theoretical approaches to explain foreign policy making and behavior through the use of case studies of selected nations.

Pol S 559. International Relations Theory. (3-0) Cr. 3. F. Prereq: 6 credits in international studies. Selected theoretical writings, both classical and contemporary, on world politics. Realism, war and conflict, peace and cooperation, political economy, crisis decision making, and transnational relations.

Pol S 560. American Political Institutions. (3-0) Cr. 3. Prereq: 6 credits in American government. Examination of policy-making and governance in a separation of powers system. Interaction between the chief executive, the legislature, administrative agencies, and the public. How political and legal forces affect policy makers and are reflected in public policies and programs.

Pol S 569. Foundations of Public Administration. (3-0) Cr. 3. F. Prereq: Graduate classification. An examination of the social, political, intellectual, and environmental factors contributing to the historical development and central issues of American Public Administration. Exploration of classical and contemporary texts of public administration emphasizing constitutional and civic roles of public servants, administrative responsibility in democratic governance and justice, and essential frameworks to identify managerial skills, perspectives, and resources for effective, equitable public service.

Pol S 570. Politics and Management of Nonprofit Organizations. (3-0) Cr. 3. S. Prereq: Graduate classification. Major theories of administrative organization, including motivations of administrative organizations, comparisons of organizational arrangements, factors affecting organizational arrangements, and formal and informal decision-making structures.

Pol S 572. Public Finance and Budgeting. (3-0) Cr. 3. S. Prereq: Graduate classification. Topics such as the fiscal role of governments in the modern economy; evaluation of sources of public revenue and credit; administrative, political, and institutional aspects of the budget and the budgetary process; alternative budget formats; skills required to analyze public revenue and spending. Spreadsheet use required.

Pol S 573. Public Personnel Administration. (3-0) Cr. 3. S. Prereq: Graduate classification. Course discusses the history and development of high performance personnel administration in the public and nonprofit sectors regarding strategic planning, employee rights and responsibilities, performance assessment, collective bargaining, and civil service systems. Emphasizes basic competencies in the essential human resource management tools in the areas of recruitment, retention, employee development, compensation, discipline, and conflict resolution.

Pol S 574. Policy and Program Evaluation. (3-0) Cr. 3. F. Prereq: Graduate classification. Integration, application, and utilization of public administration and public policy concepts in the interpretation of results and effectiveness of public programs and the prediction of consequences for policymakers and administrators.

Pol S 575. Management in the Public Sector. (Dual-listed with 475). (3-0) Cr. 3. S. Prereq: 6 credits in political science. Literature and research on organization behavior and management. Theory with emphasis on applied aspects of managing contemporary
public sector organizations. Topics include distinctions between public and private organizations, leadership, productivity, employee motivation, organizational structure, and organizational change.

Pol S 577. Government, Business, and Society. (Dual-listed with 477). (3-0) Cr. 3. F. Prereq: Graduate classification. Diverse perspectives on the changing roles and relationships of government and society as to open the way for more effective policy decisions on corporate-government affairs. Topics may include the changing economy; transformation of workplace and community conditions; consumerism; social responsibilities of businesses; economic policies and regulations; and politics in the business-government relationship.

Pol S 579. Public Revenues and Cost Analysis. (3-0) Cr. 3. S. Prereq: Graduate classification. Provides an overview of public revenue policies and administration, and concepts and techniques of cost analysis. Examines topics such as administration and policies of property taxes, income taxes, sales taxes, and user charges. Provides an introductory understanding of different cost analysis techniques such as average cost and marginal cost analysis and activity-based costing. Spreadsheet use required.

Pol S 580. Ethics and Public Affairs. (Dual-listed with 480). (3-0) Cr. 3. F. Prereq: 6 credits in political science. Study of decision making approaches and application to case studies. Topics such as the different roles of public officials, proper scope and use of administrative discretion, and the admissibility of religious, political, and philosophical commitments in governmental decision making.

Pol S 581. International Political Economy. (3-0) Cr. 3. F. Prereq: 6 credits in political science. An overview of the international political economy since the end of World War II. Special emphasis on national (primarily U.S.) development assistance and agricultural/food policies and policies, and those of the international food organizations, the World Bank, and the regional development banks.

Pol S 582. Environmental Politics and Policies. (Dual-listed with 482). (3-0) Cr. 3. F. Prereq: 3 credits in political science or 3 credits in Environmental Studies; graduate classification. Major ideologies relating to conservation and ecology. Processes, participants, and institutions involved in state, national, and global environmental policies. Case studies of environmental controversies and proposals for policy reform.

Pol S 583. Law and Management. (Dual-listed with 483). (3-0) Cr. 3. F. Emerging constitutional/legal doctrines and requirements in public management: concept of new property rights in public employ-ment/public service delivery; procedural due process requirement; scope of free speech and liberty protected in the conduct of public management; equal employment opportunity requirements; and the scope of official and personal immunities and liability in public affairs.

Pol S 585. Comparative Public Administration. (Dual-listed with 485). (3-0) Cr. 3. Comparison of government bureaucracies in major world regions; trends and issues of administrative and management reforms; globalization and other contemporary challenges to state administrative structures and policies; skills needed to evaluate and implement public management reforms.

Pol S 598. Public Administration Internship. Cr. arr. F.S. Prereq: 15 credits in political science, permission of the instructor. Supervised internship with admin-istrative personnel of local, state, or national agencies, judicial branch offices, and nonprofit groups.

Pol S 599. Creative Component. Cr. arr. Courses for graduate students

Preprofessional Study

Requirements for admission to most professional academic programs can be met by study at Iowa State University. These requirements may be met in the course of obtaining a bachelor’s degree from Iowa State or at a level below that of a degree, depending on the intended field of study. The specific courses taken in a preprofessional program will depend primarily upon the admission requirements of the professional schools to which a student wants to apply. In some programs requiring three years of preprofessional work, a student may, by careful planning, complete requirements for the bachelor’s degree upon transferring to Iowa State up to 32 semester credits of professional coursework. Generally these credits will be counted as electives, but a maximum of 24 may be used as major credits in interdisciplinary studies and a smaller number as major credits in appropriate departments.

Students who have not declared a major upon entry should enter as preprofessional students, i.e., premedical, prelaw, PHP (preprofessional coursework). Generally these credits will be counted as electives, but a maximum of 24 may be used as major credits in interdisciplinary studies and a smaller number as major credits in appropriate departments.

Information about preprofessional program admissions requirements and career opportunities in human health or law may be obtained in the Liberal Arts and Sciences Advising Center. Information about veterinary medicine admissions requirements and career opportunities may be obtained from the coordinator of the preveterinary program in the Office of the Dean of the College of Veterinary Medicine.

Clinical Laboratory Science/Medical Technology

Clinical laboratory scientists, still commonly referred to as medical technologists, are important members of health-care teams. They perform the chemical, microscopic, radio-assay, and microbiological tests that are necessary in disease diagnosis, and they type and cross-match blood samples to facilitate blood transfusions. They usually work under the supervision of a physician in a hospital or clinic laboratory, but may also be employed by pharmaceutical companies of business, government, or manufacturers of analytical instruments. The professional training requires 12 months in a hospital-based MLS/MIT program following at least 3 years of college study that emphasizes chemistry and the biological sciences. Students may earn a bachelor’s degree by completing the admissions requirements of the MLS/MIT program and most of the degree requirements in 3 years on campus, then spending their fourth year in one of the hospital programs that are affiliated with Iowa State University. Before beginning the off-campus studies, students must earn at least 88 credits; the 32 most recent credits must have been earned in residence at ISU. A maximum of 32 semester credits earned in professional MLS/MIT school can be used to partially fulfill the requirements for the bachelor’s degree. Students who complete all degree requirements in residence at the university may apply to any school of medical technology for which the admission requirements have been met. The following MLS/MIT programs are affiliated with Iowa State University:

Mercy College of Health Sciences Clinical Laboratory Science Program, Des Moines, Iowa. Program Director: Kyla Deibler.

Dentistry

Dentists diagnose, treat, and try to prevent diseases and injuries of the teeth, jaws, and mouth. Usually a general practitioner will have spent 3 or 4 years taking preprofessional courses at the undergraduate level and 4 years in dental school earning the degree of doctor of dental surgery (D.D.S.) or doctor of dental medicine (D.M.D.). Learning a specialty requires at least 2 more years. The courses necessary for admission to most dental schools include English, biology, general and organic chemistry, and physics. Students may earn a degree in any major that Iowa State University offers as the preprofessional coursework. Usually a general practitioner will have spent 3 or 4 years taking preprofessional courses at the undergraduate level and 4 years in dental school earning the degree of doctor of dental surgery (D.D.S.) or doctor of dental medicine (D.M.D.). Learning a specialty requires at least 2 more years. The courses necessary for admission to most dental schools include English, biology, general and organic chemistry, and physics. Students may earn a degree in any major that Iowa State University offers as the preprofessional coursework. Dental practitioners (R.R.A.) must have completed a program leading to a bachelor’s degree in medical record administration. Most professional programs are 2 years in length and follow 2 years of college study in chemistry, biology, the humanities, social sciences, languages, and philosophy. Students may take the preprofessional courses at Iowa State University and then transfer to a university offering the professional program or they may earn a bachelor’s degree at Iowa State University after entering a health information management program.

Hospital and Health Administration

Administrators of health care organizations manage and guide the varied activities in hospitals, clinics, nursing homes, and other healthcare institutions. Certified registered record administrators (R.R.A.) must have completed a program leading to a bachelor’s degree in medical record administration. Most professional programs are 2 years in length and follow 2 years of college study in chemistry, biology, the humanities, social sciences, languages, and philosophy. Students may take the preprofessional courses at Iowa State University and then transfer to a university offering the professional program or they may earn a bachelor’s degree at Iowa State University before entering a health information management program.
Human Medicine
Physicians study, diagnose, and treat illness and injury. They may work in offices, clinics, hospitals, or laboratories, in private practice or for government or industry. Their professional training usually consists of 4 years of study in a college of medicine to earn the doctor of medicine (M.D.) degree, after completing a hospital residency learning a specialty such as family medicine, pediatrics, surgery, obstetrics, or psychiatry. A degree of doctor of osteopathy (D.O.) is awarded to those students who complete 4 years in a college of osteopathic medicine before their residency. All medical schools recommend a broad preprofessional education that includes courses in biology, chemistry, physics, mathematics, English, the social sciences, arts, and humanities. The degree of a premedical student can be from any college and in any curriculum or major offered by the university. The major should reflect the student's interests and provide appropriate preparation for an alternative career.

Law
An attorney offers assistance, often where a third-party neutral arbiter is required to resolve conflicts. Many attorneys work in private practice, but others secure positions in the public sector, e.g., federal or state governmental agencies. At least 3 years of college is completed in 3 years, with 90 credits. It may be completed earlier if the student attends summer school are needed to complete a law degree, a Doctor of Jurisprudence (J.D.). A bachelor's degree is required for admission to all accredited law schools. A student planning to enter may major in any discipline. Courses taken as an undergraduate should be designed to assist the student in the development of critical thinking skills, including analytical written and oral skills. An understanding of social structures and institutions is invaluable. Perhaps most valuable are courses in philosophy, English language and literature, the social sciences, including political science, psychology, criminal justice, economics, and history. Courses in mathematics, particularly statistics, are also helpful in developing analytical skills.

Library and Information Science
Librarians are essential in educational institutions, medical facilities, government agencies, industries, and the general public. The professional preparation for library administration is provided by master's degree programs. Admission requirements for the University of Iowa's program, for example, include a bachelor's degree with at least 85 semester credits in the arts and humanities and the natural and social sciences. Iowa State students may choose majors that reflect their own interests and that may provide a foundation for working in medical, law, or other specialized libraries.

Nursing
A professional nurse may do clinical nursing, teaching, or research, in hospitals, private practice, public health centers, schools, or industry. Although becoming a registered nurse (R.N.) does not require a bachelor's degree, the student who completes the bachelor of science degree in nursing (B.S.N.) has college-level preparation for clinical nursing and an essential base for graduate study. Iowa State University does not offer a nursing degree. Students may take prenursing courses for two years at Iowa State University, if accepted, transfer to the BSN program at another college or university.

Occupational Therapy
Occupational therapists provide purposeful activities to help those who have been disabled by physical illness or injury, birth defects, or emotional disorder, aging, drug abuse, or other problems to learn to cope with everyday living. Therapists treat patients in hospitals, school systems, and rehabilitation centers. Students may complete a bachelor's degree in a related area at Iowa State University, and then enter a certification, master's or doctoral degree program at another university; or complete specialized therapy courses at Iowa State and then transfer to another university to complete the requirements for a bachelor's degree in occupational therapy. The prerequisites for admission to an occupational therapy program usually include English, art, biology, chemistry, physics, psychology, sociology, anthropology, and statistics, but vary from one school to another.

Optometry
Optometrists examine, diagnose, treat and manage diseases of the visual system, the eye and associated structures. Treatment may include corrective glasses or contacts, vision therapy and therapeutic drugs. Optometrists usually set up their own offices or work in group practice. Professional study requires 4 years in a school or college of optometry and leads to the doctor of optometry (O.D.) degree. All optometry schools require at least 90 semester credits of preprofessional courses, including biology, chemistry, physics, mathematics, and English. Certain optometry schools require a bachelor's degree. Students wishing to earn the bachelor's degree from Iowa State University may choose any major and take the courses required for graduation with that major as they take the courses required for admission to a professional optometry program.

Pharmacy
Pharmacists prepare and dispense therapeutic drugs; educate health care professionals, patients and the general public about the appropriate use of drugs; conduct pharmaceutical research and work in industrial settings which involve the manufacture, marketing and advertising of pharmaceuticals. Students may complete prepharmacy courses within two years at Iowa State University. Upon admission, the student will then transfer to a Pharm. D. program of study which will entail three or four years of study.

Physical Therapy
Physical therapists work with people who have been disabled by injury, illness, or birth defects. They assist in evaluating the physical problems and administer therapeutic agents such as massage and exercise, heat, baths, ultrasounds, and electricity; they work in hospitals, clinics, nursing homes, schools, rehabilitation centers, and private practice. Students may complete three years of undergraduate courses including prerequisites before transferring to a three-year professional curriculum such as the master's degree program at St. Ambrose University or the doctoral degree program at Creighton University. Usually, students earn a bachelor's degree in a related field at ISU before entering professional school to earn a master's degree or doctoral. Admission to the master's degree program at the University of Iowa requires a bachelor's degree. The bachelor's degree from ISU may be earned in any department, provided that the physical therapy prerequisites are completed. Earning a bachelor's degree prior to entering professional school allows a student to apply to a range of graduate level programs and builds a strong liberal arts foundation. Courses required for admission to a professional program include biology, chemistry, physics, psychology, mathematics, and statistics.

Physician Assistant
A physician assistant provides medical services under the supervision of a licensed physician. PAs conduct physical examinations, order and interpret laboratory tests, make diagnostic and treatment decisions, and are allowed to prescribe medication in most states. Certification as a physician assistant requires 2 years in a professional program at the master's or bachelor's degree level. Students applying to a bachelor's degree program must have completed at least 24 credits of college work including general and organic chemistry, zoology, behavioral science, and humanities. Applicants who have had health-care experience with direct patient contact are preferred. Admission to a master's degree program requires similar coursework and clinical experience in addition to a bachelor's degree.

Podiatry
Podiatrists diagnose, and treat diseases and disorders of the human foot and ankle. They treat patients in private and group practice, hospitals, and, increasingly, in industrial and sports-related positions. Professional training requires 4 years in a college of podiatric medicine and leads to the degree of doctor of podiatric medicine (D.P.M.). This is usually followed by 1 to 3 years in a hospital residency. All podiatric colleges require at least 3 years of preprofessional study, including courses in biology, general and organic chemistry, physics, and English. Most entrants have a bachelor's degree, which may be in any major. A few students may complete the admission requirements and most of the bachelor's degree requirements in 3 years. If so, a maximum of 32 semester credits may be transferred to Iowa State University from the first year in an accredited podiatric college in order to complete the requirements for the bachelor's degree.

Theology or Religious Studies
The professional education of a student of religion can follow one of two paths. The path to a profession as a pastor, priest, rabbi or other leadership position in a religious tradition usually requires 3 years in a program leading to the master of divinity (M.Div.) offered at a school of divinity or of theology. The path to a profession as a teacher of religious studies at the college level requires 4-7 years in a program leading to the Ph.D. at a graduate school of Religious Studies. Both seminaries and graduate schools require a bachelor's degree for admission. The American Association of Theological Schools recommends the following areas of study as the best preparation for theological studies: English language and literature; history, including non-Western culture; philosophy; natural sciences, social sciences, especially psychology, sociology and anthropology; the fine arts; Biblical and modern languages; and religion, both Western and Eastern. Although students in a variety of major fields may qualify for admission to a theological school, interested persons are advised to review their proposed programs with a representative of the Religious Studies Program in the Department of Philosophy and Religious Studies.

Veterinary Medicine
About 75% of all veterinarians are engaged in private practice. In a mixed practice, they diagnose and treat health problems among a variety of animals. Others specialize in one species (e.g., feline, pet bird) and still others specialize in a specific discipline within veterinary medicine (e.g., cardiology, ophthalmology). Veterinarians may also choose public and corporate practice (e.g., public health, education, research, safety, industry, laboratory animal medicine, aquatic animal medicine, poultry medicine, and military veterinary medicine).

The professional program requires four years at a college of veterinary medicine and leads to the doctor of veterinary medicine degree (D.V.M.).
Admission to a veterinary college involves at least two years of preprofessional college education. Candidates must take courses in biology, chemistry, genetics, physics, English, humanities, social sciences, speech, anatomy and physiology, and biochemistry. (For Iowa State University see Veterinary Medicine, Admission Requirements; for most recent information, consult the College of Veterinary Medicine Web site: www.vetmed.iastate.edu/)

Students may pursue their preprofessional preparation in any college at Iowa State University. A major (preveterinary medicine is not a major) should be selected that is allied to each student’s vocational interests in veterinary medicine or that otherwise offers vocational satisfaction in the event that plans for entry into the College of Veterinary Medicine change. Students are encouraged to pursue a bachelor’s degree; the most effective progress toward a bachelor’s degree is made when a major is selected upon entry and no change occurs before graduation. However, students who have not even considered a career other than veterinary medicine may need some time to explore possibilities before selection of a major.

To assist students who have indicated interest in the preprofessional program for the College of Veterinary Medicine and are undecided about a major, an advising category is available known as GENPV (General Undergraduate Studies Pre Vet). Orientation and advising services for these students are designed to help students fulfill preprofessional course requirements, to introduce available majors and careers allied to veterinary medicine, and to introduce career options in veterinary medicine. GENPV students must select a major by the end of their second semester. Some Iowa State University majors allow, by careful planning, the opportunity for a student to earn the bachelor’s degree by combining credits from three years of preprofessional study and one year of professional study in the College of Veterinary Medicine.

Professional Agriculture

www.proag.iastate.edu/

(Interdepartmental Program administered by the Department of Agricultural Education and Studies)

Graduate Study

The Professional Agriculture major is an off-campus non-thesis program leading to the Master of Agriculture (M.Ag.) degree. It is available to students wishing to pursue graduate studies in agriculture, or natural resources through distance education. It is considered to be a professional degree and not preparation for a doctoral program. The program emphasizes agriculture/natural resource information and technology transfer in a variety of settings including education, extension, agencies, and industry training/development.

Students seeking a graduate major in psychology, the department offers a minor in gerontology (see Index). They have the ability to communicate effectively and make decisions based on knowledge. To earn the 32 credits necessary for graduation, students must complete 28 semester credits of formal coursework, and 4 credits of creative component. Courses are delivered through distance education via the WWW and DVD. On-campus workshops are offered during summer sessions. Specific courses offered in the program are listed on the College of Agriculture’s distance education website: www.agde.iastate.edu/.

Psychology

www.psychology.iastate.edu/

Douglas Bonett, Chair of Department

Distinguished Professors: Anderson, Wells

Distinguished Professor (Emeritus): Ahmann

University Professor: Lorenz

University Professor (Emeritus): Brown

Professors: Andre, D. Bonett, Cutrona, Dark, Larson, Phye, Prieto

Professors (Collaborators): Conger, Gerard

Associate Professors: Cooper, Cross, Cunnick, Madon, Scott, Venkatagiri, Vogel, Wei, West

Assistant Professors: Armstrong, Blankenship, Carpenter, Chan, Gentile, Guyll, Krizan, Morris, Wade, Weber

Assistant Professor (Adjunct): Mason

Assistant Professor (Collaborators): Day

Senior Lecturers: R. Bonett, Hanisch, Konar, Phillips, Scheel

Lecturers: Gilbert, Harms, Jenks, Shi, Sweet

Undergraduate Study

For college-level requirements in undergraduate curricula leading to the degrees of bachelor of arts and bachelor of science, see Liberal Arts and Sciences, Curriculum.

An undergraduate major in psychology may be taken as liberal arts education, as preparation for graduate study in psychology, or as background for professional education in law and in the health professions. A student with a bachelor’s degree in psychology may qualify for a variety of positions including those in social sciences, mental health, corrections, rehabilitation, developmental disability centers, business, management, and public opinion surveying. Depending on professional goals, a minor in another discipline may be desirable. Students should consult with their academic advisors early in the undergraduate curriculum. The requirements of the program enable graduates to understand and apply the scientific principles, facts, and basic methods of psychology in their personal and professional activities. Graduates learn to think scientifically about human behaviors and mental processes. They can communicate effectively in speech and in writing, respect individual and cultural differences in behaviors, and appreciate ethical issues in both the science and practice of psychology. Professional work with a job title of psychologist in academic, business, clinical, government, and school settings requires graduate degrees.

The major must include the following psychology courses: 101, 102, 111, 201, 301, and 440, each with a minimum grade of C-. The major also must include four courses distributed across at least four of the following five areas: Area A – 230, 250; Area B – 280, 380; Area C – 310, 315; Area D – 312, 313, 316, 318(b); Area E – 360, 460. Three additional 3-credit courses in psychology must be taken. Area course may be used to meet this requirement, but variable credit courses (470, 490, 491, and 492) may not. In accordance with college requirements, a C or better average is required in the courses used to satisfy the major.

Departmental requirements for the B.A. and B.S. include the following supporting courses: six credits in philosophy including 201; two of the following: Biol 101, 155 or 211; Chem 163; Gen 260 or Biol 258; one of the following: Stat 101, 104 or 226, with a minimum grade of C-; and a Math course, excluding 105, acceptable in LAS General Education Natural Sciences and Mathematics Discipline Area.

Students electing a B.S. degree also must complete Psych 302 with a minimum grade of C- and a minimum of 10 additional supporting credits in supporting courses from the list of courses in the LAS Gen Ed Natural Sciences and Mathematical Disciplines Area (or approved departmental list) as follows: three credits in mathematics, six credits in natural sciences, and one additional credit in a laboratory course.

Students electing a B.A. degree also must complete an ISU approved minor.

The department offers a minor in psychology. The minor requires completing 18 credits in psychology, including 101 and 301, each with a minimum grade of C-. At least 9 of the 18 credits must be in 300 level courses (or above), but no more than three credits total may be from Psych 490, 491, and 492. A C- or better is required in each course used to satisfy the minor and a C average or better is required in courses used to satisfy the minor. Contact the psychology advising office for more information.

Communication Proficiency Requirement: The department requires a grade of C- or better in Eng150 and in Eng150 (or 250H) and a C- or better in Psych 302 or Psych 490 (2 credits minimum) or Eng302, 309, or 314.

Graduate Study

The department offers work for the degrees master of science and doctor of philosophy in psychology, and for a minor for students with a major in other departments.

Within the major of psychology, the department offers a doctoral specialization in counseling psychology (APA accredited) and doctoral areas of concentration in cognitive psychology and social psychology.

Students seeking a graduate major in psychology must have graduated from an accredited college in a curriculum substantially equivalent to the undergraduate curriculum in Liberal Arts and Sciences at Iowa State University. Prerequisite to admission is at least 15 credits of basic psychology, which should include a laboratory course, a measurement course, and a statistics course.

Graduates function as academic psychologists in higher education or as professional psychologists in applied settings. They have an extensive knowledge of psychological principles and the conceptual and quantitative skills to conduct psychological research, communicating the results to the scientific community, students in the classroom, and the general public. Graduates in applied programs have specialized knowledge in counseling and program development. They are skilled in delivering such programs and services to diverse clientele in a variety of settings.

The department also participates in the interdepartmental programs in human computer interaction and neuroscience, and in the interdepartmental minor in gerontology (see Index).

A formal class and a supervised practicum in the teaching of psychology is recommended for all doctoral students whose future plans may include teaching at the college level. A 12-month internship in a training site or agency approved by the faculty is required of all doctoral students in counseling psychology.
Psych 302. Research Methods in Psychology. (2-2) Cr. 3. F.S. Prereq: 301. Discussion of and experience in designing research studies, collecting and analyzing data, and preparing research reports in psychology.

Psych 310. Brain and Behavior. (3-0) Cr. 3. F.S. Prereq: 101. Survey of basic concepts in the neurosciences with emphasis on brain mechanisms mediating sensory processes, arousal, motivation, learning, and abnormal behavior.

Psych 312. Sensation and Perception. (3-0) Cr. 3. F.S. Prereq: 101. Survey of the physiology and psychology of human sensory systems including vision, audition, smell, taste, the skin senses, and the vestibular senses.

Psych 313. Learning and Memory. (3-0) Cr. 3. F.S. Prereq: 101. Fundamental concepts and theories of learning and memory derived from human and animal research.

Psych 314. Motivation. (3-0) Cr. 3. F.S. Prereq: 101. Concepts and topics of motivation including curiosity, pain, emotion, sex, aggression, love, play, addiction, sleep, fatigue, and work.

Psych 315. Drugs and Behavior. (3-0) Cr. 3. F.S. Prereq: 101. Biology of drug-taking behavior and pharmacology of both regulatory and non-regulatory psychopharmacological systems. Discussion of the dependence liability of both legal and non-legal agents of abuse.

Psych 316. Cognitive Processes. (3-0) Cr. 3. F.S. Prereq: 101. The study of the human mind, addressing the processes by which people perceive the world, remember information, access and use knowledge, understand language, make decisions, reason, learn and solve problems.

Psych 333. Educational Psychology. (Cross-listed with C I). (3-0) Cr. 3. F.S. Prereq: Psych 230 or HD FS 102, application to the teacher education program or major in psychology. Classroom learning with emphasis on the cognitive, affective, and instructional techniques. Major emphasis on measurement theory and the classroom assessment of learning outcomes.

Psych 346. Psychology of Women. (Cross-listed with W S). (3-0) Cr. 3. S. Prereq: 2 courses in psychology including 101. Survey of psychological literature relating to biological, developmental, interpersonal, and societal determinants of the behavior of women.

Psych 348. Psychology of Religion. (Cross-listed with Relig). (3-0) Cr. 3. F.S. Prereq: Nine credits in psychology. Survey of psychological theory and research investigating religious and spiritual attitudes, beliefs and practices.

Psych 380. Social Cognition. (3-0) Cr. 3. Prereq: 101 or 280. How people understand themselves and others, including attribution, social categories and schemas, the self, social inference, stereotypes, and prejudice.

Psych 401. History of Psychology. (3-0) Cr. 3. F.S. Prereq: 4 courses in psychology. Philosophy and scientific backgrounds of psychology. Development of theories and causes of events in academic and applied psychology. Nonmajor graduate credit.

Psych 411. Evolutionary Psychology. (3-0) Cr. 3. S. Prereq: Junior classification, three courses in psychology; biology 211. This course examines the application of the principles of evolutionary biology to the understanding of human behavior. Evolutionary processes are developed in research and applied psychology. Nonmajor graduate credit.

Psych 413. Psychology of Language. (Cross-listed with Ling). (3-0) Cr. 3. Prereq: Psych 101. Introduction to psycholinguistics. Topics may include origin of language, speech perception, language comprehension, reading, bilingualism, brain bases of language, and computational modeling of language processes. Nonmajor graduate credit.

Psych 422. Counseling Theories and Techniques. (3-0) Cr. 3. F. Prereq: 3 courses in psychology. Overview of the major counseling theories and techniques, with emphasis on the key concepts of each theory, the role of the counselor, therapeutic goals, and the main techniques derived from each theory. Nonmajor graduate credit.

Psych 422L. Laboratory in Counseling Theory and Techniques. (0-2) Cr. 1. F. Prereq: Three classes in psychology and credit or enrollment in Psych 422L. Learn basic counseling skills such as active listening, reflecting feelings, empathy, confrontation, immediacy and self-disclosure. Supervised practice using basic counseling techniques.

Psych 450. Industrial Psychology. (3-0) Cr. 3. F.S.SS. Prereq: 2 courses in psychology including 101, Stat 101. Content and methods of industrial psychology including the different approaches used to select employees, how to conduct performance appraisals, and how to train employees in organizations. Work attitudes and behaviors of employees, work schedules, safety and human factors as well as relevant legal issues are discussed. Statistics including regression and correlation are used in the course. Nonmajor graduate credit.

Psych 460. Abnormal Psychology. (3-0) Cr. 3. F.S.SS. Prereq: 3 courses in psychology including 101. Description of major forms of maladaptation including anxiety, mood disorders, personality disorders, substance dependence, and schizophrenia. Factors in the development of behavior deviations. Research pertinent to the description, development, and maintenance of abnormal behavior. Nonmajor graduate credit.

Psych 484. Psychology of Close Relationships. (3-0) Cr. 3. Prereq: 9 credits in psychology including 280. Theories and research concerning the functions, development, and deterioration of close relationships. Influence of psychological processes on friendship, romantic, marital, and familial relationships. Topics include mate selection, interdependence, trust and commitment, power and dominance in relationships, sexuality, divorce, gender roles, and family interaction. Nonmajor graduate credit.

Psych 485. Health Psychology. (3-0) Cr. 3. F. Prereq: Junior classification, 6 credits in psychology. Application of psychological theory and research methods to issues in physical health. Psychological factors in illness prevention, health maintenance, treatment of illness, recovery from injury and illness, and adjustment to chronic illness. Nonmajor graduate credit.

Psych 488. Cultural Psychology. (3-0) Cr. 3. Prereq: 280 and 301; junior classification. Examination of the ways that cultural beliefs, values, and ideologies shape cognitive, developmental, social and other psychological phenomena. Nonmajor graduate credit.

Psych 490. Independent Study. Cr. arr. Repeatable. F.S.SS. Prereq: Junior classification, 6 credits in psychology, and permission of instructor. Supervised reading in an area of psychology. Writing requirement.
Psych 491. Research Practicum. Cr. arr. Repeatable. F.S.S. Prereq: Junior classification, permission of instructor, and credit or enrollment in 301. Supervised research in an area of psychology. Primarily for students intending to pursue graduate education. No more than 9 credits of Psych 491 may be counted toward a degree in psychology.

Psych 492. Fieldwork Practicum. Cr. arr. Repeatable. F.S.S. Prereq: Junior classification, 12 credits in psychology, and permission of instructor. Supervised fieldwork in a human service agency or other appropriate setting. No more than 9 credits of Psych 492 may be counted toward a degree in psychology. Satisfactory-fail only.

Courses primarily for graduate students, open to qualified undergraduate students

Psych 512. Advanced Perception. (3-0) Cr. 3. Prereq: 312. Survey of current theory and research in perception with an emphasis on research issues.

Psych 514. Advanced Human Learning and Memory. (3-0) Cr. 3. Prereq: 313 or 316 and Stat 101. Theoretical and empirical research in human learning and memory.

Psych 516. Advanced Cognition. (3-0) Cr. 3. F.S. Prereq: 316. Theoretical models and empirical research in human cognition within the domains of perception, attention, memory, language, concepts/categorization, and spatial cognition.

Psych 517. Psychopharmacology. (3-0) Cr. 3. Prereq: 310, 315, or equivalent and permission of instructor. Fundamentals of drug-behavior interactions with emphasis on psychoactive drugs and their use in experimental, therapeutic, and social settings.

Psych 521. Cognitive Psychology of Human Computer Interaction. (Cross-listed with HCI). (3-0) Cr. 3. Prereq: Graduate classification or instructor approval. Biological, behavioral, perceptual, cognitive and social issues relevant to human computer interactions.

Psych 530. Advanced Developmental Psychology. (3-0) Cr. 3. Prereq: Psych 230, 301, 302 and Stat 401, or graduate classification. Theory and research on infant and child development, with an emphasis on perceptual development, cognitive development and social development.

Psych 533. Educational Psychology of Learning Cognition, and Motivation. (Cross-listed with C/L). (3-0) Cr. 3. F. Prereq: 333 or teacher licensure. Learning, cognition, and memory in educational/training settings.

Psych 560. Advanced Personality Psychology. (3-0) Cr. 3. Prereq: 4 courses in psychology, including 360. Analysis of theories of personality, concepts, methods, and current research issues.

Psych 561. Psychopathology and Behavior Deviations. (3-0) Cr. 3. Prereq: 460. Examination of theoretical perspectives and current research pertinent to the major forms of adult dysfunction including adjustment, anxiety and neuroses. Graduate level. Prerequisites: dissociative, sexual and gender identity, personality, schizophrenic, eating, and substance abuse disorders.

Psych 562. Personality Assessment. (3-0) Cr. 3. Prereq: 360, 440, 542, and Stat 401 and admission to the PhD program in counseling psychology. Principles, concepts, and methods of personality assessment. Though not a practicum course, exposure is given to a variety of objective, projective, and situational tests.

Psych 563. Developmental Psychopathology. (3-0) Cr. 3. Prereq: 230 and 460 or graduate classification. Theory and research related to major disorders of childhood and adolescence with an emphasis on assessment, etiology, and developmental processes, and multimodal interventions.

Psych 580. Advanced Social Psychology: Psychological Perspectives. (3-0) Cr. 3. Prereq: 4 courses in psychology, including 280. Current theories, methods, and research in social psychology with an emphasis on group processes, interpersonal processes such as attribution, social cognition, attitude change, attraction, aggression, and social comparison.

Psych 581. Applications of social Psychology Theories. (3-0) Cr. 3. Prereq: 12 credits in psychology, including 280. Application of social psychological theory to various applied topics, including physical and mental health, stress, and coping.

Psych 586. Research Methods in Social Psychology. (3-0) Cr. 3. Prereq: Stat 402 and permission of instructor. Ethical issues, generating testable hypotheses, operationalizing independent and dependent variables, sampling and design issues, laboratory procedures, and interpretation of results in experimental research. Issues in analysis of variance, Bayesian reasoning, and effect size estimation will be emphasized, as will writing and publication strategies.

Psych 590. Special Topics. Cr. arr. Repeatable. Prereq: 12 credits in psychology, and permission of instructor. Guided reading on special topics or individual research projects. A. Counseling B. Cognitive C. Social D. General

Psych 592. Seminar in Psychology. (1-0) Cr. arr. Repeatable. Prereq: 360 or permission in psychology. Psych 592A also requires admission into the doctoral program in counseling psychology.

A. Counseling

B. Industrial-Organizational

M. Professional Issues and Ethics

P. Research Methods and Psychometrics

Q. Cognitive

R. Social

Z. General

Psych 597. Internship in Psychology. Cr. R. Prereq: M.S. degree candidacy; permission of instructor. Full-time, non-clinical, supervised experience in a setting relevant to psychology. Intended for master’s degree level internships.

Psych 599. Creative Component. Cr. arr. Satisfactory-fail only.

Courses for graduate students

Psych 601. History of Philosophy of Psychology. (3-0) Cr. 3. Prereq: 4 courses in psychology. Origins of psychology in philosophical, medical, and related thought. Development as an independent discipline in the nineteenth and twentieth centuries as a science and as a practice including traditional and contemporary theory and philosophy.

Psych 621. Psychological Counseling: Theory and Practice. (3-0) Cr. 3. F. Prereq: 691A or 691B. An introduction to psychological counseling. Overview of major counseling theories with emphases upon: key concepts of theories, the role of the counselor, and applications of theory in fostering client change.

Psych 621L. Techniques in Counseling. (0-6) Cr. 3. F. Prereq: 621 or concurrent enrollment in 621 and admission into the doctoral program in counseling psychology. Development of basic counseling skills and techniques through observation, role-playing, case studies, and supervised counseling sessions.

Psych 623. Vocational Behavior. (3-0) Cr. 3. Prereq: 3 courses in psychology and admission to the PhD program in counseling psychology. Theoretical views, research, and issues in career development through the life span. Methods of career counseling, including appraisal interviewing, assessment, test interpretation, and use of information sources.

Psych 626. Group Counseling. (2-2) Cr. 3. Prereq: 621L, 691A and admission to the PhD program in counseling psychology. Theory, research, ethical issues, and therapeutic considerations relevant to group counseling. Participation in lab exercises for development of group counseling skills and observation of ongoing groups.

Psych 633. Teaching of Psychology. (3-0) Cr. 3. Prereq: Enrollment in doctoral degree program in psychology. Completion of at least 1 year of graduate study. Permission of instructor. Orientation to teaching of psychology at college level: academic issues and problems, instructional and evaluative techniques.

Psych 635. Interventions with Children and Adolescents. (3-0) Cr. 3. Prereq: Graduate classification. Research and theory underlying application of behavioral and cognitive psychology to the treatment of childhood and adolescent psychopathology with an emphasis on internalizing disorders, developmental processes, and multimodal interventions.

The Graduate Program in Seed Technology and Business is designed to allow the students with work and other commitments to participate. Graduates will be prepared for roles in management and leadership within seed related organizations, private and public.

The program offers two graduate certificates: a graduate certificate in Seed Science and Technology, which consists of 9 courses (STB/Agron 535, STB/Agron 536, STB/Agron 510, STB/Hort 543, STB/P I 592, STB/Agron 547, STB/Agron 534, STB/Agron 506), and a graduate certificate in Seed Business Management, which consists of 7 courses (STB/Agron 535, BusAd 501, BusAd 503, BusAd 504, BusAd 507, BusAd 508, and BusAd 509). Graduate certificate courses may be applied to the Master of Science in Seed Technology and Business. Those interested in these graduate certificates should contact the Program for details.

Information on application procedures and specific requirements of the major can be obtained from the following internet addresses: http://www.seedgrad.iastate.edu/ or by writing to seedgrad@iastate.edu.

Courses for graduate students

STB 510. Crop Improvement. (Cross-listed with Agron.) (3-0) Cr. 3. Prereq: Admission to the Seed Technology and Business Master's Degree Program or approval of the instructor. A study of the basic principles and methods in the genetic improvement of crop plants. Methods used in manipulating genomes through the use of biotechnology. Methods of cultivar development. Quantitative procedures for describing response to selection. Analysis of the relationship of reproductive characters and growth characteristics to response to selection.

STB 534. Seed and Variety, Testing and Technology. (Cross-listed with Agron.) (2-0) Cr. 2. Prereq: Admission to the Seed Technology and Business Master's Degree Program or approval of the instructor. The components of seed quality and how they are assessed in the laboratory, including traits derived from modern biotechnology. The impact of new technologies on seed quality testing. Variety maintenance procedures and breeder seed. Variety identification: phenotype and grow-out trials, isoezyme testing, and DNA marker testing. Procedures for evaluating varieties. The variance tests appropriate for fixed effects analysis of variance. Statistical inference and stratification for yield trials. Use of strip plot testing.

STB 535. Introduction to the Seed Industry. (Cross-listed with Agron.) (1-0) Cr. 1. Prereq: Curriculum requires undergraduate specialization in a business or biological science. An analysis of the defining characteristics of the seed industry and introduction to the Master in Seed Technology and Business curriculum. The tasks of crop improvement and seed production will be analytically related to basic management functions and classifications of management activities that are used in the study of business administration. Management tasks and roles will be analyzed in relation to the public policy issues that shape the industry, including ethical and economical approaches to biotechnology, intellectual property, and corporate responsibility.

STB 536. Quantitative Methods for Seed. (Cross-listed with Agron.) (1-0) Cr. 1. F. Prereq: Admission to the Seed Technology and Business Master's Degree Program or approval of the instructor. Quantitative Methods for analyzing and interpreting agronomic and business information for the seed industry. Principles of experimental design, data analysis, regression, correlation and graphical representation of data. Use of spreadsheets for manipulating, analyzing and presenting data.

STB 539. Seed Conditioning and Storage. (Cross-listed with Agron.) (2-0) Cr. 2. Prereq: Admission to the Seed Technology and Business Master's Degree Program or approval of the instructor. The technical operations which may be carried out on a seed lot from harvest until it is ready for marketing and use.

The opportunities for quality improvement and the risks of deterioration which are present during that time. Analysis of the costs of and benefits of operations. Evaluation of equipment based on benefits to the customer and producer. Interpretation of the role of the conditioning plant as a focal point within the overall operations of a seed company.

STB 543. Seed Physiology. (Cross-listed with Hort.) (2-0) Cr. 2. F. Prereq: Admission to the Graduate Seed Technology and Business Program or approval of the instructor. Introduction to plant physiology. Physiological aspects of seed development, maturation, longevity, dormancy and germination. Links between physiology and seed quality.

STB 547. Seed Production. (Cross-listed with Agron.) (2-0) Cr. 2. Prereq: Admission to the Seed Technology and Business Master’s Degree Program or approval of the instructor. Survey of crop production, including management of soil fertility and organic matter, crop rotations, weed control, and insect control. Analysis of the principles of seed multiplication and the key practices which are used to ensure high quality in the products. Field inspection procedures and production aspects that differ from other crop production. Foundation seed production. Analysis of the typical organization of field production tasks. Resources and capabilities required. Survey of differences in seed production systems between crops and impact of differences on management of seed production.

STB 592. Seed Health Management. (Cross-listed with PI PI) (2-0) Cr. 2. F. Prereq: Admission to the Graduate Program in Seed Technology and Business/Consent of instructor. Occurrence and management of diseases during seed production, harvest, conditioning, storage, and planting. Emphasis on epidemiology, disease management in the field, seed treatment, effects of conditioning on seed health, and seed health testing.

STB 595. Seed Quality, Production, and Research Management. (Cross-listed with Agron.) (3-0) Cr. 3. Prereq: Admission to the Seed Technology and Business Master’s Degree Program or approval of the instructor. Advanced survey of the organization, staff capabilities and management characteristics typical in seed production and crop improvement in seed enterprises. Analysis of the use of quality information in the management of seed operations and sales. Process management applications for seed production planning for existing capacity. Analysis of the manager’s tasks in the annual cycle and how the tasks of these managers relate to the general categories of leadership roles in management. Difference in management strategies used with different situations and groups of employees.

STB 599. Creative Component. Cr. arr. Prereq: Admission to the Master’s in Seed Technology and Business degree program or permission of the instructor. A written report based on research, library readings, or topics related to the student’s area of specialization and approved by the student’s advisory committee.

On-Line Graduate Study

The Graduate Program in Seed Technology and Business offers students advanced study in the seed science and technology and business management appropriate for application in the seed sector. The program is offered by nine departments in the Colleges of Business and Agriculture and Life Sciences: Accounting; Agronomy; Finance; Horticulture; Logistics, Operations, and Management Information Systems; Management; Marketing; and Plant Pathology. This multidisciplinary program offers a focused on-line curriculum for a Master of Science in Seed Technology and Business, along with Graduate Certificates in Seed Science and Technology and in Seed Business Management. Courses are available to students in other majors.

The curriculum offers a set of scientific and technical courses that are focused on seed, with a set of basic management courses, similar to those in the core courses of an MBA program. The business courses will use examples drawn from the seed industry. A creative component is required for the Master of Science degree.

Prerequisite for the program is a bachelor’s degree in business, agriculture, other biological discipline, or related degrees. Graduate training in these disciplines will also be considered.

Graduates of the Graduate Program in Seed Technology and Business will be prepared for roles in management and leadership within private and public seed and seed-related organizations.

All of the courses listed below are required for the Master of Science degree, and the students are expected to go through the curriculum in order.

The pace of the course sequence is designed to allow the students with work and other commitments to participate. Students will complete the creative component under the guidance of their Program of Study Committee. In many cases, the creative component topic will be associated with the student’s work.
The department offers course work leading to either a bachelor of arts or bachelor of science in sociology. Additionally, a bachelor of science in Public Service and Administration in Agriculture is offered. The department offers course work for the Interdisciplinary Studies major in Criminology and Criminal Justice and a minor in Criminal Justice Studies. Programs of study in sociology offered in both the College of Agriculture and the College of Liberal Arts and Sciences are outlined in this section. For the undergraduate curriculum in Liberal Arts and Sciences, with a major in sociology leading to the degrees of bachelor of arts and bachelor of science, see Liberal Arts and Sciences, Curriculum. For the undergraduate curriculum in agriculture, with a major in public service and administration in agriculture, leading to the degree bachelor of science, see Agriculture, Curriculum in Public Service and Administration in Agriculture. For the undergraduate curriculum in Liberal Arts and Sciences, with a minor in criminal justice studies, see Liberal Arts and Sciences, Curriculum.

College of Liberal Arts and Sciences—Sociology

A major in sociology can serve as a liberal arts education; as preparation for various positions in social service and related occupations in business and industry; as background for professional education in such areas as law and theology or as a basis for graduate professional training as a sociologist in academic, government, business, and industrial settings.

Departmental requirements for sociology majors include the following supporting course: Philosophy including 230 and one upper level Philosophy course; English 302 or 309 or 314; One of the following courses: Statistics 101 or 104; At least three additional credits with a Mathematics designator.

A program of study that meets the needs and interests of the student and department requirements will be developed in consultation with the major adviser. Programs of study will include 115; 130 or 134; 202; three credits from 310, 380 or 420; 302; 306; three credits from 327, 330, 331 or 332; 420; 9 credits of upper level elective courses.

Majors must receive grades of C or better in English 150 and 250, and a grade of C or better in either English 302 or 309 or 314. Programs leading to a bachelor of arts degree will emphasize additional coursework in groups I, II and IV of the general education requirements. Programs leading to a bachelor of science degree will emphasize additional coursework in groups III and IV of the general education requirements. Some of the possible fields of concentration are criminal justice systems, community (urban and rural) sociology, family sociology, sociology of work, social science teaching, research methods and statistics, social change and development, complex organizations, human population and ecology, social inequality, social psychology, and sociological theory.

In consultation with their advisers, students may gain work experience and develop their skills in their field of concentration through the field observation and practice options of 460.

The department offers a minor in sociology which may be earned by completing 15 credits in sociology including: Sociology 130 or 134; 3 credits from 310, 380 or 420; 3 credits from 264, 305 or 361; an additional 6 credits in sociology courses. At least 6 of the 15 credits must be at the 300 level or higher, of these 6 credits must be taken at ISU with a minimal grade of C.

College of Agriculture—Public Service and Administration in Agriculture

The curriculum in public service and administration in agriculture is designed for students who desire an interdisciplinary education to pursue a career with agriculturally related governmental and nonprofit agencies, or with businesses and industries that are concerned with public services in agriculture, natural resources or rural communities. Students will explore the planning and implementing of rural and agriculturally related programs in organizations, communities (town, city, or county), multicounty areas, states, regions, and at the federal level.

The curriculum has a broad base of general education subjects including credits in communications, mathematics, physical and biological sciences, social sciences, and humanities. The technical subjects represent a combination of sociology, economics, public administration and agriculture, with emphases on social and economic change, history of public services, complex organizations, interagency relationships, community leadership, community action, adoption and diffusion, group dynamics, and political and legal behavior as they relate to agriculture and rural areas. For the Interdisciplinary Studies major in Criminology and Criminal Justice, see Liberal Arts and Sciences, Curriculum.

Graduate Study

The department offers work for the degrees master of science and doctor of philosophy with majors in sociology and rural sociology and minor work for students majoring in other departments. For M.S. and Ph.D. departmental requirements, see Program of Graduate Study for Degrees in Sociology and Rural Sociology, available from the department office. The department offers concentrations in numerous areas, including: sociological studies and development; sociology of families; inequality, food systems, agriculture and environment; methodology; social change and development; criminology; the economy, organizations and work; and social psychology. The Department of Sociology does not offer a nonthesis master's program.

Graduates have a broad understanding of sociology, address complex societal problems, and communicate effectively with scientific colleagues and the general public in both formal and informal settings. They understand sociological theory, conduct research, and are prepared to educate college students and contribute to public policy. Although the department stipulates no language requirement for either the degree master of science or the degree doctor of philosophy, specifying competence in one or more languages may be desirable in some instances.

The department also participates in the interdepartmental program in interdepartmental majors in sustainable agriculture, transportation and water resources, and interdepartmental minors in gerontology (see Index).

Courses primarily for undergraduate students

Soc 110. Orientation to Public Service and Administration in Agriculture. Cr. R. Survey of public service and administration in agriculture. Exploration of career tracks and career planning. Recommended during first semester of freshman year or as soon as possible after transfer into the department.

Soc 130. Rural Institutions and Organizations. (3-0) Cr. 3. F. Social interaction and group behavior with emphasis on the scientific study of contemporary U.S. society, including issues relating to socialization, inequality, and changing rural and urban communities. Analysis of relationships among the institutions of family, religion, political participation, work, and leisure. Credit for only Soc 130 or 134 may be applied toward graduation.

Soc 134. Introduction to Sociology. (3-0) Cr. 3. F. Social interaction and group behavior with emphasis on the scientific study of contemporary U.S. society, including issues relating to socialization, inequality, and changing rural and urban communities. Analysis of relationships among the institutions of family, religion, political participation, work, and leisure. Credit for only Soc 130 or 134 may be applied toward graduation.

H. Honors.

Soc 202. Introduction to Research Methods. (3-0) Cr. 3. F. Research design and methodologies used in sociology. Satisfactory-fail only.

Soc 219. Sociology of Intimate Relationships. (3-0) Cr. 3. F. Sociology of intimate relationships among couples using a sociological perspective. Attention is given to singleness; dating and courtship; sexuality; mate selection, cohabitation, and marriage. Relationship quality, communication, conflict and dissolution of these types of relationship will also be explored.

Soc 235. Social Problems and American Values. (3-0) Cr. 3. F. Sociology of social problems and values in American society. Social problems discussed may include crime, substance abuse, income inequalities, discrimination, poverty, race relations, health care, family issues, and the environment. How American culture and values shape societal conditions, public discourse and policy.

Soc 241. Youth and Crime. (Cross-listed with CJ Sb). (3-0) Cr. 3. F. Sociology of delinquency that focuses on the study of youth between youth as victims and as offenders, social and etiological features of delinquency, the role of the criminal justice system, delinquents' rights, and traditional and alternative ways of dealing with juvenile crime.

Soc 264. Small Group Dynamics. (3-0) Cr. 3. Survey of group processes in small groups. Group decision-making, coalitions, conformity, intergroup relations, status and role effects, leadership, group development and group conflict. Includes student participation in small group processes.

Associate Professor (Adjunct): Waggoner
Assistant Professors: Arudkke, Bain, Downing-Matibag, Krier, Maldonado-Pabon, Monahan, Peters, Prokos
Assistant Professor (Adjunct): Emery
Lecturer: Conis, Reger
Soc 302. Advanced Research Methods. (3-0)
Cr. 3. F.S. Alt. SS., offered 2010. Prereq: 202; Stat 101; Sociology or PSA Major. Experience in designing research projects, collecting and analyzing data and reporting results.

Soc 305. Social Psychology: A Sociological Perspective. (3-0) Cr. 3. F.S.SS. Prereq: 130 or 134. Examination of human behavior in a social environment with emphasis on development of the self, interpersonal relations, attitudes, and small groups.

Soc 310. Community. (3-0) Cr. 3. F.S. Prereq: 130 or 134. Analysis of evolving theory and research of community as an ideal type, an ecological system, a political economy, and an interactional field; examination of the impact of economic, cultural, social and political infrastructures on community power structures and change processes in a global era.

Soc 325. Transition in Agriculture. (3-0) Cr. 3. S. Prereq: 130 or 134 or permission of instructor. The impacts of agricultural changes on farm families, rural communities, and consumers. Past, present, and future trends in family farms and their social implications.

Soc 327. Sex and Gender in Society. (Cross-listed with W St) (3-0) Cr. 3. F.S.SS. Prereq: 130 or 134. How the biological fact of sex is transformed into a system of gender stratification. The demographics and social positions of women and men in the family, education, media, politics, and the economy. Theories of the social-psychological and sociological bases for behavior and attitudes of women and men. The relationship between gender, class, and race.

Soc 328. Sociology of Masculinities and Manhood. (Cross-listed with W St) (3-0) Cr. 3. S. Prereq: Soc 130, 134, or W S 201. Examination of socially constructed and idealized images of manhood, the nature of social hierarchies and relations constructed on the basis of imagery, ideologies, and norms of masculinity. Theories on gender (sociological, psychological, and biological). Particular attention given to theory and research on gender variations among men by race, class, ethnicity, sexual orientation, physical ability and age.

Soc 330. Ethnic and Race Relations. (Cross-listed with Af Am) (3-0) Cr. 3. F.S.SS. Prereq: 130 or 134. Analysis of ethnic and race relations, particularly in America; emphasis on the sociology and psychology of race and ethnic relations.

Soc 331. Social Class and Inequality. (3-0) Cr. 3. F.S.SS. Prereq: 130 or 134. Social stratification and processes resulting in social and economic inequalities; implications of status, class, and poverty for people of different races, ethnicities, and gender.

Soc 332. The Latino/Latina Experience in U.S. Society. (3-0) Cr. 3. F. Prereq: 130 or 134. Examination of the social, historical, economic and political experience of varied Latino ethnic groups in the U.S. - primarily focusing on Mexican, Puerto Ricans, and Cubans.

Soc 334. Politics and Society. (Cross-listed with Pol S) (3-0) Cr. 3. F.S. Prereq: A course in political science. Socialization, identification, and research from an interdisciplinary, social psychological perspective.

Soc 337. Social Dimensions of Religion. (Cross-listed with Relig) (3-0) Cr. 3. Prereq: Prior course work in Religious Studies or Sociology required. The influence of religion in society, both as a conservator of values and as a force for social change. Nonmajor graduate credit.

Soc 380. Sociology of Work. (3-0) Cr. 3. F.S. Prereq: 130 or 134. Inequalities (gender, race, class) related to jobs, occupational firms, and industries. Satisfaction, rewards, alienation, discrimination, and other topics of importance to workers are examined.

Soc 381. Social Psychology of Small Group Behavior. (Cross-listed with Psych) (3-0) Cr. 3. S. Prereq: Soc 305 or Psych 280. A survey of small group theory and research from an interdisciplinary, social psychological perspective.

Soc 382. Environmental Sociology. (Cross-listed with Env S) (3-0) Cr. 3. F.S. Prereq: Soc 130, 134 or 3 credits of Env S. Environment-society relations; social construction of nature and the environment; social and environmental impacts of resource extraction, production, and consumption; environmental inequality; environmental mobilization and movements; U.S. and international examples.

Soc 401. Contemporary Sociological Theories. (3-0) Cr. 3. F.S.SS. Prereq: 9 credits in sociology. Both historical and modern social theories as applied to understanding and researching the social world. Nonmajor graduate credit.

Soc 402. White-Collar Crime. (Cross-listed with CJ St) (3-0) Cr. 3. S. Prereq: Soc 241 or CJ St 240. Introduction and overview of white-collar crime as a form of deviance. Theory and research on occupational, corporate, and organizational offending; prevalence, costs, and consequences of white-collar crime; predictors and correlates of white-collar crime; and political, business, and public policy responses to white-collar crime.

Soc 411. Social Change in Developing Countries. (3-0) Cr. 3. S. Prereq: 130 or 134 plus 3 credits in social sciences. Environmental change, development in developing countries; international interdependence; causes and consequences of persistent problems in agriculture, city growth, employment, gender equality, basic needs; local and worldwide efforts to foster social change and international development. Nonmajor graduate credit.

Soc 412. Senior Seminar on Career Development. (1-0) Cr. 1. F. Prereq: Most of major core courses, senior classification. Transition from student to professional. Career development including self-assessment, short- and long-term goals, strategies for the job search, development of contacts and sources, resumes and interviews. Enrollment preferred in first semester as senior. Satisfactory-fail only.

Soc 415. Sociology of Technology. (3-0) Cr. 3. F. Prereq: 130 or 134 plus 3 credits in social sciences. Review of physical, biological and social approaches to technology evaluation. Examination of public responses to complex and controversial technology. Strategies for gaining adoption/rejection of technology. Applications to topics in agriculture, development, and marketing. Credit for only 415 or 416 may be applied toward graduation. Nonmajor graduate credit.

Soc 420. Complex Organizations. (3-0) Cr. 3. F.S. Prereq: 130 or 134 plus 3 credits in social sciences. Study of bureaucracies and other large organizations as social systems through the perspective of basis social processes and structural variables. Incorporates topics of organizational effectiveness, power and change. Nonmajor graduate credit.

Soc 431. Chicano/Chicanas in Contemporary Society. (3-0) Cr. 3. S. Prereq: 130 or 134. An interdisciplinary examination of Chicano/as, the largest U.S. Latino ethnic group. Special attention will be given to social conflict and social transformation. Special emphasis relates to contemporary Chicanos/as issues, particularly in the Midwest.

Soc 435. Urban Society. (3-0) Cr. 3. Alt. S., offered 2010. Prereq: 130 or 134 plus 3 credits in social sciences. Development of cities and urban systems; human and spatial ecology; urban transformation, decline, and revitalization; poverty; immigration; homelessness; residential segregation; housing policy; urban social movements; local governance; alternative solutions and planning for cities; international comparisons.

Soc 460. Criminal and Juvenile Justice Practicum. (Cross-listed with CJ St, Cr. arr. Repeatable. F.S.SS. Prereq: Junior or senior classification; permission of criminal justice studies coordinator; major or minor in sociology, or criminal justice studies minor. Study of the criminal and juvenile justice systems and social control processes. Supervised placement in a police department, prosecutor’s office, court, probation and parole department, penitentiary, juvenile correctional institution, community-based rehabilitation program, or related agency. Not more than 12 credits will count toward graduation. No credits in Soc 460 may be used to satisfy minimum sociology requirements for sociology majors. Satisfactory-fail only.

Soc 484. Topical Studies in Criminal and Juvenile Justice. (3-0) Cr. 3. Alt. S., offered 2011. Prereq: 6 credits in sociology and permission from instructor. Thematic or topical issues and studies dealing with the sociology of police, judiciary, institutional and community-based corrections, community policing and crime/delinquency, criminal and delinquent gangs, and crime and delinquency prevention.

Soc 485. Sociology of the Family. (3-0) Cr. 3. S. Prereq: 6 credits in sociology. The contemporary family in developing, industrial, and post-industrial societies. Effects of modernization and industrialization on family, social, and political policies on family dynamics, structures, and functions.

Soc 490. Independent Study. Cr. arr. Repeatable. Prereq: 6 credits in sociology and permission from instructor. Students in the College of Agriculture must be of junior or senior classification and may use no more than 6 credits of Soc 490 toward the total of
Soc 607. Contemporary Sociological Theory. (3-0) Cr. 3. Sr. Prereq: 6 graduate credits in sociology. Provides a review of modern sociological thought, issues, and controversies as they affect current research and discourse in the discipline.

Soc 610. Foundations of Sustainable Agriculture. (Cross-listed with SusAg. A E. Agron, Anthr. 3-0) Cr. 3. Sr. Prereq: Graduate classification, permission of instructor. Historical, biophysical, socioeconomic, and ethical dimensions of agricultural sustainability. Strategies for evaluating existing and emerging systems of agriculture in terms of core concepts of sustainability and their theoretical contexts.

Software Engineering

www.se.iastate.edu

(A joint program administered by the Department of Electrical and Computer Engineering and the Department of Computer Science.)

Undergraduate Study

For the undergraduate curriculum in software engineering leading to the degree bachelor of science, see College of Engineering and College of Liberal Arts and Sciences.

This curriculum is jointly administered by the Electrical and Computer Engineering Department and the Computer Science Department at Iowa State University and it provides undergraduate students with the opportunity to learn software engineering fundamentals, to study applications of the state-of-the-art software technologies, and to prepare for the practice of software engineering. The student-faculty interaction necessary to realize this opportunity occurs within an environment that is motivated by the principle that excellence in undergraduate education is enhanced by an integrated commitment to successful, long-term research and outreach programs.

The software engineering curriculum offers emphasis areas in software engineering principles, process, and practice. Students may also take elective courses in computer engineering and computer science.

The objective of the software engineering program at Iowa State University is that its graduates should demonstrate expertise, engagement, learning, leadership, and teamwork within five years after graduation.

- Expertise: Graduates should establish peer-recognized expertise together with the ability to articulate that expertise and use it for problem solving in the planning, design, development, validation, and evolution of software using contemporary practices.

- Engagement: Graduates should be engaged in the professional practice, locally and globally, contributing through the ethical, competent, and creative practice of Software engineering in industry, academia, or the public sector, or graduates may use the program as a foundation for interdisciplinary careers in business, law, medicine, or public service.

- Learning: Graduates should demonstrate sustained learning through graduate work or professional improvement opportunities and through self-study, and they should demonstrate the ability to adapt to rapid technological changes.

- Leadership: Graduates should exhibit leadership and initiative in professional and organizational goals, facilitate the achievements of others, and obtain results.

- Teamwork: Graduates should demonstrate effective teaming and commitment to working with others of diverse cultural and interdisciplinary background by applying software engineering abilities, communication skills, and knowledge of contemporary and global issues.

As a complement to the instructional activity, the Electrical and Computer Engineering and Computer Science Departments provide opportunities for each student to have experience with broadening activities. Through the cooperative education and internship program, students have the opportunity to gain practical industry experience. See College of Engineering, Cooperative Programs. Students have the opportunity to participate in advanced research activities; and through international exchange programs, students learn about engineering practices in other parts of the world.

Courses primarily for undergraduate students

S E 101. Software Engineering Orientation. Cr. R. Introduction to the procedures, policies, and resources of Iowa State University and the department of Computer Science and Electrical and Computer Engineering. Information on engineering and computer-based professions.

S E 166. Careers in Software Engineering. Cr. R. Overview of the nature and scope of the software engineering profession. Relationship of coursework to careers. Departmental rules, student services operations, degree requirements, program of study planning, career options, and student organizations.

S E 185. Problem Solving in Software Engineering. (3-1) Cr. 3. Prereq: Credit or enrollment in Math 142. Introduction to software engineering and computer programming. Systematic thinking process for problem solving in the context of software engineering. Group problem solving. Solving software engineering problems and presenting solutions through computer programs, written documents and oral presentations. Introduction to principles of programming, software design, and extensive practice in design, writing, running, debugging, and reasoning about programs.

S E 298. Cooperative Education. Cr. R. F.S.S. Prereq: Permission of department and Career Services. First professional work period in the cooperative education program. Students must register for this course before commencing work.

S E 397. Software Engineering Internship. Cr. R. Repeatable. FS. Prereq: Permission of department and Career Services. One semester maximum per academic year professional work period.

S E 398. Cooperative Education. Cr. R. F.S.S. Prereq: 298, permission of department and Career Services. Second professional work period in the cooperative education program. Students must register for this course before commencing work.

S E 409. Software Requirements Engineering. (Cross-listed with Com S). (3-0) Cr. 3. Prereq: Com S 309, 319. The requirements engineering process, including identification of stakeholders, requirements elicitation techniques such as interviews and prototyping, analysis fundamentals, requirements specification, and validation. Use of Models: State-oriented, Function-oriented, and Object-oriented. Documentation for Software Requirements. Informal, semi-formal, and formal representations. Structural, informational, and behavioral requirements. Non-functional requirements. Use of requirements repositories to manage and track requirements through the life cycle. Case studies, software projects, written reports, and oral presentations will be required. Nonmajor graduate credit.

S E 416. Software Evolution and Maintenance. (Cross-listed with Cpr E). (3-0) Cr. 3. Prereq: Com S 309, 319. Fundamental concepts in software evolution and maintenance; practical software evolution processes; legacy systems, program comprehension, impact analysis, program migration and transformation, refactoring. Tools for software evolution and maintenance. Case studies, experimental software projects. Written reports and oral presentation. Nonmajor graduate credit.

S E 417. Software Testing. (Cross-listed with Com Sl). (3-0) Cr. 3. Prereq: Com S 309, 319. Comprehensive study of software testing, principles, methodologies, management strategies and techniques. Test models, test design techniques (black box and white-box testing techniques), integration, regression, system testing methods, and software testing tools. Nonmajor graduate credit.

S E 491. Senior Design Project I and Professionalism. (2-3) Cr. 3. Prereq: 329, completion of 29 credits in the S E core professional program. Engr 314. Preparing for entry to the workplace. Selected professional topics. Use of technical writing skills in developing project plan and design report; project poster. First of two-semester team-oriented, project design and implementation experience.

S E 492. Senior Design Project II. (1-3) Cr. 2. Prereq: 491. Second semester of a team design project experience. Emphasis on the successful implementation and demonstration of the design completed in S E 491 and the evaluation of project results. Technical writing of final project report; oral presentation of project achievements.

S E 498. Cooperative Education. Cr. R. Repeatable. FS.SS. Prereq: 398, permission of department and Career Services. Third and subsequent professional work periods in the cooperative education program. Students must register for this course before commencing work.
Undergraduate Study

The cross-disciplinary program in speech communication offers introductory courses designed for all students as part of their general education and as a complement to professional training. It also offers a major or minor in speech communication as well as an additional endorsement for secondary teachers who already have an endorsement in another content area.

Students who major or minor in speech communication will prepare themselves for a wide variety of employment opportunities in business, industry and government, as well as in non-profit and educational organizations. With their effective oral communication, listening, teamwork, problem-solving and leadership skills, speech communication students find positions in general business management: human resources, benefits, sales and marketing and serve various organizations as recruiters, trainers, promotions managers, communication specialists, community outreach personnel and event planners. The program also prepares students for the study of law, theology, and for graduate level work in speech communication or related disciplines.

The program participates in the following inter-disciplinary undergraduate minor programs: the interdisciplinary program in linguistics and the interdisciplinary program in technology and social change.

Speech Communication Major

A student electing to major in speech communication must earn at least 120 credits with 45 credits at the 300-400 level. A minimum of 33 of those credits must be earned in Speech Communication courses where the student earns a grade of C or better. Our flexible curriculum with few prerequisites can help you meet the 33 hour requirement in a timely way.

Core Requirements (18 credits)

- ComSt 101 Intro to Communication
- Sp Cm 212 Fundamentals of Public Speaking
- Sp Cm 305 Language, Thought and Action
- Sp Cm 327 Persuasion
- Sp Cm 412 Rhetorical Criticism
- Sp Cm 497 Capstone Course

Additional Coursework (Choose at least 5 of the following for 15 credits)

- Sp Cm 110 Listening
- Sp Cm 205 Popular Culture Analysis
- Sp Cm 213 Computers in the Study of English—NO LONGER OFFERED (2-9)
- Sp Cm 312 Business and Professional Speaking
- Sp Cm 313 Communication for the Classroom Teacher
- Sp Cm 322 Argumentation, Debate and Critical Thinking
- Sp Cm 323 Gender and Communication
- Sp Cm 324 Legal Communication
- Sp Cm 325 Nonverbal Communication
- Sp Cm 350 Rhetoric and the History of Ideas
- Sp Cm 410 Persuasion in the Athenian Democracy
- Sp Cm 416 American Public Address
- Sp Cm 417 Campaign Rhetoric

Credits in Sp Cm 290, 499, or 590 cannot be applied toward the minimum required credits for the major.

The Communication Proficiency requirement may be met by (1) completion of Engl 150, 250 (or 250H), or its equivalent, with a grade in each of C or better; (2) one additional writing course beyond Engl 250 with a grade of C or better from the following approved list: Engl 302, 303, 304, 305, 309, 314, 415; Jl MC 201.

Speech Communication Minor

The area’s courses also provide a minor concentration for students in various majors such as business, English, journalism, world languages and cultures, and the social sciences. The requirements for a minor in speech communication may be fulfilled by credit in Sp Cm 212 plus at least 15 additional hours from the lists above, of which 9 credits are in courses numbered 300 or above. No credits in 290, 490, 499, and 590 may apply toward the minor.

Speech Communication Education

Students seeking a secondary endorsement in speech communication as an additional area prepare to teach speech, dramatic arts, and media at the secondary school level. In addition, they prepare to direct co-curricular and extra-curricular activities such as drama, speech and debate.

Each student seeking an additional endorsement in speech communication must meet a 29 hour requirement by taking the following courses: Sp Cm 110 or ComSt 102, Sp Cm 212, Sp Cm 313, Sp Cm 322, Sp Cm 412, Sp Cm 495A, Sp Cm 495B, Thtrre 255, Thtrre 358 and Jl MC 101.

Graduate Study

The program offers courses for a graduate minor in speech communication as well as supporting work for other disciplines. The Program of Speech Communication also participates in the interdisciplinary program leading to a master’s degree in Interdisciplinary Graduate Studies.

Courses open for nonmajor graduate credit: Sp Cm 305, 323, 324, 327, 412, 416, and 417.

Speech Communication (Sp Cm)

Courses primarily for undergraduate students

Sp Cm 110. Listening. (3-0) Cr. 3. F.S.SS. Theory, principles, and competency development in comprehensiveness, therapeutic, critical, consumer, and appreciative listening. The impact of listening in relationships and partnerships.

Sp Cm 205. Popular Culture Analysis. (Cross-listed with Engl). (3-0) Cr. 3. F.S. Prereq: Credit in or exemption from Engl 150. Analysis of how information and entertainment forms persuade and manipulate audiences. Study of several forms that may include newspapers, speeches, television, film, advertising, fiction, and magazines. Special attention to verbal and visual devices.

Sp Cm 212. Fundamentals of Public Speaking. (3-0) Cr. 3. F.S.SS. Theory and practice of basic speech communication principles applied to public speaking. Practice in the preparation and delivery of extemporaneous speeches.

Sp Cm 223. Intercollegiate Debate and Forensics. Cr. 1. Repeatable. F.S. Prereq: Permission of instructor. Participation in intramural and intercollegiate debate and other forensic events.

Sp Cm 290. Special Projects. Cr. arr. Repeatable. F.S.SS. Prereq: 3 credits in speech communication; permission of department chair.

Sp Cm 305. Language, Thought and Action. (Cross-listed with Ling, ComSt). (3-0) Cr. 3. F.S.SS. Prereq: Engl 250. The study of symbolic processes and how meaning is conveyed in words, sentences, and utterances; discussion of modern theories of meaning; and an exploration of relationships among language, thought and action. Nonmajor graduate credit.

Sp Cm 312. Business and Professional Speaking. (3-0) Cr. 3. F.S.SS. Prereq: 212. Theory, principles, and competency development in the creation of coherent, articulate business and professional oral presentations.

Sp Cm 313. Communication for the Classroom Teacher. (3-0) Cr. 3. F.S. Prereq: 212. Communication in the teaching profession; training in classroom-oriented communication activities; use of video recorder for analysis of presentation.

Sp Cm 322. Argumentation, Debate, and Critical Thinking. (3-0) Cr. 3. Prereq: 212. Practice in preparing and presenting argumentative and debate speeches with an emphasis on critical thinking and ethical and logical duties of the advocate; analysis, evidence, reasoning, attack, defense, research, case construction, and judging.

Sp Cm 323. Gender and Communication. (Cross-listed with W S, ComSt). (3-0) Cr. 3. Prereq: 212. The rhetoric of strategies women and men use to succeed in oral communication; the theory, principles, and practice of effective gender communication in a variety of settings. Nonmajor graduate credit.

Sp Cm 324. Legal Communication. (3-0) Cr. 3. Prereq: 212. Speech communication in the legal system inside and outside the trial process: interviewing and counseling, negotiating and bargaining, voir dire, opening statements, examination of witnesses, closing arguments, judge’s instructions, jury behavior, and appellate advocacy. Nonmajor graduate credit.

Sp Cm 325. Nonverbal Communication. (Cross-listed with ComSt). (3-0) Cr. 3. Prereq: ComSt 101 or 102, 203, 301. Theory and research in nonverbal communication; exploration of nonverbal subcodes; function of nonverbal communication in various contexts; student-designed investigations.

Sp Cm 327. Persuasion. (3-0) Cr. 3. F.S.SS. Prereq: 212. Examination of persuasive theories, strategies and research in persuasion. Emphasis on application and analysis; logical, emotional, and ethical proofs. Nonmajor graduate credit.
Speech Communication

Sp Cm 350. Rhetorical Theories and Issues in Context. (Cross-listed with Engl, Cl St). (3-0) Cr. 3. S. Prereq: Engl 250. Ideas about the relationship between rhetoric and society in contemporary and historical contexts. An exploration of classical and contemporary rhetorical theories in relation to selected topics that may include politics, gender, race, ethics, education, science, or technology.

Sp Cm 404. Seminar. (Dual-listed with 504). Cr. 3. Repeatable. Prereq: 15 credits in speech communication. A. Speech Communication B. Speech Education

Sp Cm 412. Rhetorical Criticism. (3-0) Cr. 3. S. Prereq: 212 and 6 credits in speech communication. Development of rhetorical theory and practice from Corax to modern times. Application of principles of criticism to current public speaking practices. Nonmajor graduate credit.

Sp Cm 416. American Public Address. (3-0) Cr. 3. S. Relationship between public persuasions and leaders; process of preparing major public addresses; selected speakers and speeches as linked with political or historical events. Nonmajor graduate credit.

Sp Cm 417. Campaign Rhetoric. (Cross-listed with Pol S). (3-0) Cr. 3. Alt. F., offered 2010. Prereq: Sp Cm 212. Backgrounds of candidates for state and national elections; selected speeches and issues; persuasive strategies and techniques of individual speakers. Nonmajor graduate credit.

Sp Cm 490. Independent Study. Cr. arr. Repeatable. F.S.S. Prereq: Study of speech communication, junior classification, permission of department chair. Only one independent study enrollment is permitted within the department per semester.

Sp Cm 495A. Directing Speech Activities. (1-0) Cr. 1. S. Prereq: C I 301; 9 credits in speech communication; minimum grade point of 2.5 in speech communication courses. Problems, methods, and materials related to directing speech activities in secondary schools.

Sp Cm 495B. Teaching Speech. (Cross-listed with C I I). (3-0) Cr. 3. F. Prereq: Sp Cm 313; 9 credits in speech communication; minimum grade point average of 2.5 in speech communication courses. Problems, methods, and materials related to teaching speech, theatre, and media in secondary schools.

Sp Cm 497. Capstone Seminar. (3-0) Cr. 3. Prereq: 15 credits in speech communication; junior or senior classification. Students synthesize relevant theory and research culminating in a capstone project/paper.

Sp Cm 499. Communication Internship. Cr. arr. Repeatable. F.S.S. Prereq: 18 credits in speech communication courses, other courses deemed appropriate by faculty adviser; 2nd semester junior or senior standing; cumulative GPA of at least 2.5 overall and 3.0 in speech communication; and permission of the internship committee. Applications should be submitted in the term prior to the term in which the internship is desired. Supervised application of speech communication in professional settings.

Courses primarily for graduate students, open to qualified undergraduate students

Sp Cm 504. Seminar. (Dual-listed with 404). (3-0) Cr. 3. Repeatable. F.S.S. Topics may include the following:

A. Speech Communication B. Speech Education

Statistics

www.stat.iastate.edu

Kenneth Koehler, Chair of Department

Distinguished Professors: Athreya, Meeker

Distinguished Professors (Emeritus): H. A. David, Fuller

University Professors: Koehler, Lorenz, Shelley, Stephenson, Vardeman

University Professors (Emeritus): D. Cox, Herbert T. David, Groenevelt, Hinz

Professors: Bailey, Bonett, Brendel, Carrquiry, Chen, Cook, Dixon, Isaacson, Kaiser, Morris, Nettleton, Nusser, Rollins

Professors (Emeritus): C. Cox, Harville, Hickman, Hotchkiss, Kennedy, Pollak, Strahan, Wolins

Professor (Collaborator): Therneau

Associate Professors: Adams, Dorman, Froelich, Hofmann, Kim, Larsen, Malti, Mastra, Marasinghe, Roberts, Shao, Sherman, Wilson, Wu

Associate Professor (Emeritus): Sukhatme

Assistant Professors: Caragea, Ghosh, Liu, Nordman, Roy, Yu

Assistant Professors (Collaborators): Sargent, Sloan

Lecturers: Bhattacharyya, Genschel, Meyers

Undergraduate Study

For the undergraduate curriculum in liberal arts and sciences, major in statistics, leading to the degree bachelor of science, see Liberal Arts and Sciences, Curriculum.

The curriculum in liberal arts and sciences with a major in statistics is designed to prepare students for (1) entry level statistics positions requiring the B.S. degree in statistics in business, industry or commerce, nonprofit institutions, and in state or federal government; (2) graduate study in statistics. Entry-level positions include the following types of work: statistical design, analysis and interpretation of experiments and surveys; data processing and analysis using modern computerization facilities and statistical computing systems; application of statistical principles and methods in commercial areas such as finance, insurance, industrial research, marketing, manufacturing, and quality control. Nonprofit organizations such as large health study institutions have entry-level positions for B.S. graduates in statistics. Also, there are opportunities for work in statistics that require a major in a subject-matter field and a minor in statistics.

Students completing the undergraduate degree in statistics should have a broad understanding of the discipline of statistics. They should have a clear comprehension of the theoretical basis of statistical reasoning and should be proficient in the use of modern statistical methods and computing. Such graduates should have an ability to apply and convey statistical concepts and knowledge in oral and written form. They should be aware of ethical issues associated with polling and surveys and in the summarization of the outcomes of statistical studies.

Undergraduate majors in this department usually include in their programs: (a) Statistics 101 or an alternative introductory course (104 or 226), (b) Mathematics 165, 166, 265 (or 165H, 166H, 265H), 307 (or 317) and Computer Science 207, and (c) Statistics 341, 342, 401, 402, 421, 479, 480.

These courses plus at least two additional courses in statistics at the 400 level or above constitute the major. With the permission of the department, I E/Stat 361 may be substituted for one of these 400 level courses. It is advisable to have a minor in a field of application.

The department offers a minor in statistics which may be earned by completing an introductory course in statistics plus additional courses from 341, 342, 361, and 400 level or above to yield a total of at least 15 credits in statistics courses.

English and Speech proficiency requirement: The department requires a grade of C– or better in each of Engl 150 and 250 (or 250H), and completion of one of Engl 302 or 314 with a grade of C– or better. The department requires a passing grade in ComSt 102 or Sp Cm 212.

Students intending to do graduate work in statistics normally will take additional courses in mathematics.

Graduate Study

The department offers work for the degrees master of science and doctor of philosophy with a major in statistics, and for a minor for students majoring in other departments. Within the statistics major the student chooses to emphasize topics such as experimental design, probability, statistical methods, statistical theory, statistical computing, survey sampling, quality control, spatial statistics, time series, reliability, or applied statistics (e.g., bioinformatics, biometrics, econometrics, environmental statistics, psychometrics, sociometrics, etc.). A major in operations research leading to a master of science degree is offered in cooperation with the Department of Industrial and Manufacturing Systems Engineering. The doctor of philosophy degree is offered as a co-major with other graduate programs. Such programs have included graduate majors in Agronomy, Animal Ecology, Animal Science, Bioinformatics, Chemical and Biological Engineering, Computer Science, Electrical Engineering, Ecology, Evolution and Organismal Biology (EEOB), Economics, Educational Leadership and Policy Studies, Food Science and Human Nutrition, Genetics, Development and Cell Biology (GDCB), Industrial and Manufacturing Systems Engineering, Mathematics, Meteorology, Psychology and Sociology.

M.S. graduates have a basic understanding of statistical theory and methods. Elective courses in statistics provide the opportunity for the student to emphasize particular areas within the field of statistics, based on interest and future career goals. Communication skills are developed through course projects, assistantship duties and creative components. Ph.D. graduates study advanced theory and methods and are able to do independent research in statistics and collabora-
tive research outside of statistics.

Prerequisite to major graduate work is the completion of an undergraduate curriculum essentially equivalent to the curriculum in liberal arts and sciences at this institution including at least a year of calculus.

The degree master of science may be earned on either a thesis or nonthesis basis. The nonthesis option requires the completion of at least 34 credits of acceptable graduate work, including the completion of a creative component and satisfactory performance on a written examination. The thesis option requires the completion of 30 credits of acceptable graduate work, including the completion of a thesis and satisfactory performance on a written examination. Ph.D. candidates must complete at least 60 semester hours of graduate level work or more from Iowa State with a minimum 3.0 (B) average and submit an original thesis represent-
ing a substantial contribution to statistics as a science.
The department encourages students to prepare themselves in foreign languages and in computer languages, but specific requirements for the degrees master of science and doctor of philosophy are at the discretion of the student's advisory committee.

The department participates in the interdepartmental program in bioinformatics and computational biology, and in the interdepartmental program in forensic research, genetics, human computer interaction, and nutrition.

**Courses primarily for undergraduate students**

Stat 100. Orientation in Statistics. (1-0) Cr. F. Opportunity, challenges, and the scope of the curriculum in statistics. For students planning or considering a career in this area.

Stat 101. Principles of Statistics. (3-2) Cr. F. S.S. Prereq: 1 1/2 years of high school algebra. Statistical concepts in modern society; descriptive statistics and graphical displays of data; the normal distribution; data collection (sampling and designing experiments); elementary probability; elements of statistical inference; estimation and hypothesis testing; linear regression and correlation; contingency tables. Credit for only one of the following courses may be applied toward graduation: Stat 101, 104, 105, 226.

Stat 104. Introduction to Statistics. (2-2) Cr. F. S.S. Prereq: 1 1/2 years of high school algebra. Statistical concepts and their use in science; collecting, organizing, and drawing conclusions from data; elementary probability; binomial and normal distributions; regression; estimation and hypothesis testing. For students in the agricultural and biological sciences. Credit for only one of the following courses may be applied toward graduation: Stat 101, 104, 105, 226.

Stat 105. Introduction to Statistics for Engineers. (3-0) Cr. 3. S. Prereq: Math 165 or (165H). Statistical concepts with emphasis on engineering applications. Data collection; descriptive statistics; probability distributions and their properties; elements of statistical inference; regression; statistical quality control charts; use of statistical software; team project involving data collection, description and analysis. Credit for only one of the following courses may be applied toward graduation: Stat 101, 104, 105, 226. Credit for both Stat 105 and 305 may not be applied for graduation.

Stat 226. Introduction to Business Statistics I. (3-0) Cr. 3. S. Prereq: Math 150 or 165. Obtaining, presenting, and organizing statistical data; measures of location and dispersion; the Normal distribution; sampling and sampling distributions; elements of statistical inference; estimation and confidence intervals; hypothesis testing; inference for simple linear regression analysis; use of computers to visualize and analyze data. Credit for only one of the following courses may be applied toward graduation: Stat 101, 104, 105, 226.

Stat 226A, B, C. S.S. Prereq: Math 150 or 165. Statistical procedures. Credit may not be applied for graduation. Significant external project in process improvement. Nonmajor graduate credit.

Stat 322. Probabilistic Methods for Electrical Engineers. (Cross-listed with E E) (3-0) Cr. 3. S. Prereq: EE 224. Introduction to probability with applications to electrical engineering. Sets and events, probability space, conditional probability, total probability and Bayes’ rule. Discrete and continuous random variables, cumulative distribution function, probability mass and density functions, expectation, moments, moment generating functions and their properties, joint and marginal distributions. Elements of statistics. Credit for both Stat 322 and ENGR 322 may not be applied for graduation. Credit for both Stat 226 and ENGR 226 may not be applied toward graduation.

Stat 341. Introduction to the Theory of Probability and Statistics I. (Cross-listed with Math) (3-0) Cr. 3. S. Prereq: Math 265 or 265SH. Probability; distribution functions and their properties; classical discrete and continuous distribution functions; multivariate probability distributions and their properties; moment generating functions; simulation of random variables and use of the R statistical package. Credit for both Stat 341 and 447 may not be applied toward graduation.

Stat 418. Statistical Design and Analysis of Microarray Experiments. (3-0) Cr. 3. S. Prereq: Stat 407. Introduction to two-color microarray technology and single-channel platforms (Affymetrix GeneChips); the role of blinding, randomization, and biological and technical replication in microarray experiments; design of single-channel and two-color microarray experiments with factorial treatment structure; normalization methods for single-channel and two-color microarray data; methods for identifying differentially expressed genes including mixed linear model analyses, empirical Bayes analyses, and resampling based procedures; controlling false discovery rate for multiple testing; mixture models for multiple testing problems for microarray data; testing gene categories; emphasis on practical use of methods. Nonmajor graduate credit.

Stat 421. Survey Sampling Techniques. (2-2) Cr. 3. S. Prereq: 231 or 328 or 401. Concepts of sample surveys and the survey process; methods of designing sample surveys, including: simple random, stratified, and multistage sampling designs; methods of analyzing sample surveys including ratio, regression, domain estimation and nonresponse. Nonmajor graduate credit.

Stat 430. Empirical Methods for Computer Science. (3-0) Cr. 3. S. Prereq: Stat 350 or an equivalent course, Math 166, knowledge of linear algebra. Programs and systems as objects of empirical studies; exploratory data analysis; selected topics from analysis of designed experiments - analysis of variance, hypothesis testing and estimation among variables; linear regression, logistic regression, Poisson regression; parameter estimation, prediction, confidence regions, dimension reduction techniques, model diagnostics and sensitivity testing. Markov chains and processes; simulation techniques and bootstrap methods; applications to performance assessment - comparison of multiple systems; communicating results of empirical studies. Statistical software: R. Nonmajor graduate credit.

Stat 447. Statistical Theory for Research Workers. (4-0) Cr. F. S.S. Prereq: Math 151 and permission of instructor; or Math 285. Primarily for graduate students not majoring in statistics. Emphasis on aspects of the theory underlying statistical methods. Probability, probability density and mass functions, distribution functions, moment generating functions, sampling distributions, point and interval estimation, maximum likelihood ratio tests, introduction to posterior distributions and Bayesian analysis, linear model theory, use of simulation. Credit for both Stat 341 and 447 may not be applied toward graduation. Nonmajor graduate credit.

Stat 457. Applied Categorical Data Analysis. (3-0) Cr. 3. S. Prereq: 341 or 401. Marasinghe. Structure, content and programming aspects of the Statistical Analysis System (SAS) software package. Advanced techniques in the use of SAS for data analysis including statistical graphics, regression diagnostics, and complex analysis of variance models. If time permits, the SAS macro programming language will be introduced. Nonmajor graduate credit.

Stat 479. Computer Processing of Statistical Data. (3-0) Cr. 3. F. Prereq: 401. Marasinghe. Structure, content and programming aspects of the Statistical Analysis System (SAS) software package. Advanced techniques in the use of SAS for data analysis including statistical graphics, regression diagnostics, and complex analysis of variance models. If time permits, the SAS macro programming language will be introduced. Nonmajor graduate credit.

Stat 493. Workshop in Statistics. (2-0) Cr. 2. Alt. S. offered 2011. Prereq: 101 or 104 or 226. Off-Campus only. Introduction to data analysis for students and the public. Critical thinking and data analysis from surveys and experiments. Summarizing data, analysis of data from simple random samples and more complex survey designs, experimental design, estimation and hypothesis testing for data from simple experiments, good and bad graphical presentation of results. Designed for master of agriculture program only. Nonmajor graduate credit.

Stat 495. Applied Statistics for Industry I. (3-0) Cr. 3. Alt. F. offered 2010. Prereq: 101 or 104 or 105 or 226; Math 186 or 186H. Graduate students without an equivalent background in statistics. Statistical thinking applied to industrial processes. Assessing, monitoring and improving processes using statistical methods. Analytic/ enumerative studies; graphical displays of data; fundamentals of six sigma; process monitoring; control charts; capability analysis. Nonmajor graduate credit.

Courses primarily for graduate students, open to qualified undergraduate students

Stat 501. Multivariate Statistical Methods. (3-0) Cr. 3. S. Prereq: 500 or 402; 447 or 542; knowledge of matrix algebra. Statistical methods for analyzing and displaying multivariate data; simultaneous analysis of multiple responses, multivariate analysis of variance; summarizing high dimensional data with principal components, factor analysis, canonical correlations, multidimensional similarity items, with cluster analysis; classification methods; dynamic graphics. Statistical software: SAS, S-Plus or R, and GGobi.

Stat 503. Exploratory Methods and Data Mining. (2-2) Cr. S. offered 2011. Prereq: 401, 341 or 447. Approaches to finding the unexpected in data; pattern recognition, classification, association rules, graphical methods, classical and computer-intensive statistical techniques, and problem solving. Emphasis is on data-centered, non-inferential statistics for large or high-dimensional data, topical problems, and building report writing skills.

Stat 506. Statistical Methods for Spatial Data. (3-0) Cr. 3. Alt. S., offered 2011. Prereq: 447 or 542. The analysis of spatial data; geostatistical methods and spatial prediction; discrete index random fields and Markov random field models; models for spatial point processes.

Stat 511. Statistical Methods. (3-0) Cr. S. Prereq: 500 or 402 or 404; 447 or 542 and current enrollment in 543; knowledge of matrix algebra. Introduction to the general theory of linear models, least squares and maximum likelihood estimation, hypothesis testing, interval estimation and prediction, analysis of unbalanced designs. Models with both fixed and random factors. Introduction to non-linear and generalized linear models; Bayesian computation; smoothing methods. Requires use of R statistical software.

Stat 512. Design of Experiments. (3-0) Cr. 3. S. Prereq: 511. Basic ideas of experimental design and analysis; completely randomized, randomized complete block, and Latin Square designs; factorial experiments, confounding, fractional replication; split-plot and incomplete block designs.

Stat 516. Spatial Surface Methodology. (3-0) Cr. 3. S. offered 2010. Prereq: 402 or 512, knowledge of elementary matrix theory and matrix formulation of regression. Morris. Analysis techniques for locating optimum and near-optimum operating conditions; standard experimental designs for first- and second-order response surface models; design performance criteria; use of data transformations; mixture experiments; optimization for multiple-response problems. Requires use of statistical software with matrix functions.

Stat 516. Statistical Design and Analysis of Microarray Experiments. (3-0) Cr. S. Prereq: Stat 500, 447 or 542. Introduction to two-color microarray technology including cDNA and oligo microarrays; introduction to single-channel (Affymetrix GeneChips); the role of blocking, randomization, and biological and technical replication in microarray experiments; design of single-channel and two-color microarray experiments with factorial treatment structure; normalization methods; methods for identifying differently expressed genes including mixed linear model analyses, empirical Bayes analyses, and resampling based approaches; adjustments for multiple testing; clustering and classification problems for microarray data; emphasis on current research topics in microarray statistics.

Stat 522. Advanced Applied Survey Sampling. (3-0) Cr. 3. F. offered 2009. Prereq: Stat 521 or both Stat 421 and Stat 477 Advanced topics in survey sampling and methodology; clustering and stratification in practice, adjustments and imputation for missing data, variance estimation in complex surveys, methods of panel and/or longitudinal surveys, procedures to increase response rates, and computing. Examples are taken from large, well-known surveys in various subject areas. Prior exposure to mathematiccal statistics, probability, and at least one course in survey sampling theory is assumed.

Stat 528. Applied Business Statistics. (2-2) Cr. 3. F.S.S. Prereq: enrollment in MBA program, not for STAT majors. Application of statistical methods to problems in business and economics; simulation and multiple linear regression; residual analysis; model building; analysis of variance; introduction to experimental design concepts; time series analysis and forecasting.

Stat 531. Quality Control and Engineering Statistics. (Cross-listed with I E). (3-0) Cr. 3. Alt. S. offered 2011. Prereq: Stat 401, 342 or 447. Wu. Statistical methods and theory applicable to problems of industrial process monitoring and improvement. Statistical issues in industrial measurement; Shewhart, CUSUM, and other control charts; design of experiments; process characterization studies; estimation of product and process characteristics; acceptance sampling, continuous sampling and sequential sampling; economic and decision theoretic arguments in industrial statistics.

Stat 533. Reliability. (Cross-listed with I E). (3-0) Cr. 3. Alt. S., offered 2010. Prereq: 342 or 432 or 447. Meeker. Probabilistic modeling and inference in engineering reliability; lifetime models, product limit estimator, probability plotting, maximum likelihood estimation for censored data, Bayesian methods in reliability, system reliability models, competing risk analysis, acceleration models and analysis of accelerated test data; analysis of recurrence data; planning studies to obtain reliability data.
Markov chains on discrete spaces in discrete and
Prereq: Stat 542. (Cross-listed with Math). Cr. 3. F .

Stat 536. Statistics for Population Genetics. (Cross-
listed with GDCB) (3-0) Cr. 3. Alt. F ., offered 2010.
Prereq: 401, 447, Gen 320 or Biol 313. Statistical
models, inference, and computational tools for
linkage analysis and population evolution. Topics
include: quantitative trait models, variance component
mapping, interval and composite-inverse mapping, and phylogenetic
tree reconstruction.

Stat 542. Theory of Probability and Statistics I (4-
0) Cr. 414 or 469. Sample spaces, probability, conditional probability; Random
variables, univariate distributions, expectation, medi-
an, and other characteristics of distributions, moment
generating functions; Joint distributions, conditional
distributions and independence, correlation and cova-
riance; Probability laws and transformations; Introduc-
tion to the Multivariate Normal distribution; Sampling
distributions, order statistics, Convergence concepts,
the law of large numbers, the central limit theorem and delta method.

Stat 543. Theory of Probability and Statistics II. (3-
0) Cr. S. Prereq: 542. Point estimation including
method of moments, maximum likelihood estimation, exponential family, Bayes estimators, Loss function and Bayesian optimality, unbiasedness, sufficiency, completeness; Basu’s theorem; Interval estimation including confidence intervals, prediction intervals, Bayesian interval estimation; Hypothesis testing including Neyman-Pearson Lemma, uniformly most
powerful tests, likelihood ratio tests; Bayesian tests.

Specification of probability models; subjective,
conjugate, and noninformative prior distributions;
Hierarchical models; analytical and computational techniques for obtaining posterior distributions; model checking, model selection, diagnostics; comparison of Bayesian and traditional methods.

Stat 546. Nonparametric Methods in Statistics. (3-
0) Cr. Alt. F ., offered 2010. Prereq: 511, 542, Chen,
Opesron. Overview of parametric versus nonpara-
metric methods of inference; introduction to nonpara-
metric smoothing methods for estimating density and
regression functions; nonparametric parameter selection; applications to semiparametric models and goodness-
of-fit tests of a parametric model.

Stat 551. Time Series Analysis. (3-0) Cr. 3. F . Prereq: 447 or 542. Concepts of trend and dependence in
time series data; stationarity and basic model struc-
tures for stationary processes; applications and parameter selection; applications to semiparametric models and goodness-
of-fit tests of a parametric model.

Stat 557. Statistical Methods for Counts and
Proportions. (3-0) Cr. F. Prereq: 500 or 401, 543 or 447. Statistical methods for analyzing simple random samples when outcomes are counts or proportions; measures of association and relative risk, chi-squared tests, loglinear models, logistic regression and other generalized linear modeling methods. Ex-
tensions to longitudinal studies and complex designs, models with fixed and random effects. Use of statisti-
cal software: SAS, S-Plus or R.

Stat 556. Methods in Biostatistics. (Cross-listed with Tox) (3-0) Cr. Alt. F ., offered 2009. Prereq: Stat 500 or 401; Stat 543 or 447. Statistical methods useful for biomedical problems. Topics include analysis of cohort studies, case-control studies and randomized
clinical trials, techniques in the analysis of survival
data and longitudinal studies, approaches to handling missing data, and meta-analysis. Examples will come
from recent studies in cancer, AIDS, heart disease,
psychiatry and other human and animal health stud-
ies. Use of statistical software: SAS, S-Plus or R.

Stat 566. Survival Analysis for Biomedical Applica-
tions. (3-0) Cr. Alt. F ., offered 2010. Prereq: Stat
543 and Stat 511. Statistical methods for analyzing time
to event and estimation of survival and hazard functions, proportional hazards models, diagnostic procedures, time dependent covariates. Extensions to cases with multiple or correlated end points. Applications include analysis of cancer treatments, liver and bladder diseases, auto-
immune disorders, bone fractures, surgery mortality rates. Implementation of SAS, S Plus, and R.

Stat 568. Bioinformatics II (Advanced Genome Informatics). (Cross-listed with BCB, GDCB, Com S) (3-
0) Cr. S. Prereq: BCB 567, BBMB 301, Biol 315, Stat 430, credit or enrollment in Gen 411. Advanced
sequence models. Basic methods in molecular phylology. Hidden Markov models. Genome annota-
tion. DNA and protein motifs. Introduction to gene expression analysis.

Stat 570. Bioinformatics IV (Computational Func-
tional Genomics and Systems Biology). (Cross-
listed with BCB, GDCB, Com S, Cpr E) (3-0) Cr. S.
Prereq: BCB 567 Biol 315, Com S 311 and either 208 or 228, Gen 411, Stat 430. Algorithmic and statistical
techniques in computational functional genomics and systems biology. Topics may include: sequence models. Basic methods in molecular phylology. Hidden Markov models. Genome annota-
tion. DNA and protein motifs. Introduction to gene expression analysis.

Stat 579. An Introduction to R. (0-2) Cr. 1. F. Prereq:
Enrollment in 500. An introduction to the logic of pro-
gramming, numerical algorithms, and graphics. The R
statistical programming environment will be used to
demonstrate how data can be stored, manipulated, plotted, analyzed using both built-in functions and user extensions. Concepts of modularization, loop-
ing, vectorization, conditional execution, and function
construction will be emphasized.

Stat 580. Statistical Computing. (3-0) Cr. S. Prereq: 579 and 447 or 542. Introduction to scientific
computing and basic concepts in R: programming tools, modern programming meth-
ods, modularization, design of statistical algo-
rithms. Introduction to C programming for efficiency;
interfacing R with C. Building statistical libraries. Use of
algorithms in modern subroutine packages, optimi-
ation and integration. Implementation of simulation
methods; inversion of probability integral transform,
rejection sampling, importance sampling. Monte Carlo integration.

Stat 590. Special Topics. Cr. arr. Repeatable. A. Theory
B. Methods
C. Design of Experiments
D. Sample Surveys

Stat 598. Cooperative Education. Cr. R. F.S.S.
Prereq. Permission of the department chair. Offi-
campus work periods for graduate students in a field of
statistics.

Stat 599. Creative Component. Cr. arr.

Courses for graduate students

Stat 601. Advanced Statistical Methods. (3-2) Cr. 4.
F. Prereq: 511, 543. Emphasis on the approaches
statisticians take toward the statistical formulation of
scientific problems. Students should develop an
understanding of the way that various concepts of
probability are used in problem formulation, analysis and
inference, and the ability to develop one or more
appropriate analyses for a variety of problems. Specific
methodological topics include permutation procedures and design-based analysis; model building
with single and multiple stochastic components; estimation based on least-squares, likelihood func-
tions, modified likelihood functions, sample reuse,
and Bayesian analysis; inference in the sample space, parameter space, and belief space. Development of
various analyses for real problems, including statistical
formulation and necessary computations.

Stat 606. Advanced Spatial Statistics. (3-0) Cr. 3.
of advanced topics in spatial statistics, including areas
of current research. Topics may include construction
of non-stationary covariance structures, in-
trinsic random functions, examination of edge effects,
general formulation of Markov random field models,
spatial subsampling, use of pseudo-likelihood and empirical likelihood concepts in spatial analysis, the
applicability of asymptotic frameworks for inference, and a discussion of appropriate measures for point
processes.

Stat 611. Theory and Applications of Linear Models. (3-
0) Cr. F. Prereq: 500 or 402 or 404, 542 or 447, a
course in matrix algebra. Wu. Matrix preliminari-
ies, estimability, theory of least squares and of best
linear unbiased estimation, analysis of variance and
covariance, distribution of quadratic forms, extension of
theory to mixed and random models, inference for
variance components.

Stat 612. Advanced Design of Experiments. (3-
theory of factorial experiments. Design optimality
criteria, approximate design and general equivalence
toery, computational approaches to constructing
optimal designs for linear models. Advanced topics
currently important in the design of experiments, includ-
ing one or more of: distance based design criteria and
construction of spatial process models, screening
design strategies for high-dimensional problems, and
design problems associated with computational experi-
ments.

Stat 615. Mixed Models: Theory, Methods and
Applications. (3-0) Cr. Alt. S., offered 2010. Prereq:
Stat 601 and Stat 611. The linear mixed effects (LME)
model, the generalized linear mixed effects model
(GLMM), quasilikelihood estimation, generalized
estimating equations, nonlinear mixed effects (NLM)
model, application in longitudinal data analysis,
growth curve analysis and small area estimation, method of model diagnostics and influential analysis.
The knowledge of general statistical inference is
assumed.

Stat 621. Advanced Theory of Survey Statistics. (3-
0) Cr. Alt. F ., offered 2009. Prereq: 521 Advanced
topics of current interest in the design of surveys
and analysis of survey data, including: asymptotic
toery for design and model-based estimators, use of
auxiliary information in estimation of variance estima-
tion techniques, small area estimation, nonresponse
modeling and imputation.
Supply Chain Management
(Administered by the Department of Logistics, Operations and Management Information Systems)

Graduate Study

The Department of Logistics, Operations, and Management Information Systems participates in three graduate degree programs: the M.S. in Business, the M.B.A. full-time and part-time programs and the Ph.D. program in Business and Technology. The M.S. degree in Business is a 30-credit curriculum culminating in a thesis. The M.B.A. program is a 48-credit, nonthesis, noncredit component curriculum. Twenty-four of the 48 credits are core courses and the remaining 24 are graduate electives. The Ph.D. program is a 56-credit curriculum that culminates in a dissertation. The department also participates in the interdepartmental transportation major.

Students can obtain a Specialization in Supply Chain Management in the MBA program by taking 12 credits of graduate courses from a selected set of courses.

Students can also obtain a Ph.D. in Business and Technology with Supply Chain Management as the major area of specialization. They need to take 9 credits of the Ph.D. core curriculum 12 credits of doctoral seminars in the area of specialization, 9 credits in a minor area of the student's choice, and 12 credits from a recommended list of research methods courses.

Supply chain management is a program of study concerned with the efficient and timely flow of materials, products, and information within and among organizations. It involves the integration of business processes across organizations, from material sources and suppliers through manufacturing and processing to the final customer. Supply chain management encompasses a wide variety of activities that have a significant influence on customer service, including the planning, control, and implementation of the processes used to transform inputs into finished goods and services, transportation, warehousing, facility location, and the processes of order processing, inventory management, and packaging. Benefits of and obstacles to the integration of these functions.

SCM 502. Decision Models for Supply Chain Management. (3-0) Cr. 3. Prereq: SCM 502 or permission of instructor. The application of decision models for supply chain management to real-world problems. Topics include applications of decision theory, inventory theory, business forecasting, optimization models, network models, and project management.

SCM 522. Supply Chain Planning and Control Systems. (3-0) Cr. 3. Prereq: SCM 502 or permission of instructor. An integrated analysis of planning and control systems for supply chains. Master production scheduling, material requirements planning, enterprise resource planning, capacity planning, shop floor control, competitive analyses of modern supply chain systems, and implementation of information technologies related to these topics.

SCM 524. Strategic Process Analysis and Improvement. (3-0) Cr. 3. Prereq: SCM 502 or permission of instructor. Analysis, management, and improvement of the business processes used to produce and deliver products and services that satisfy customer needs. Process attributes that managers can control to influence the key operational performance measures of throughput time, inventory, cost, quality, and flexibility are discussed. Topics such as theory of constraints, lean production, and six sigma are included.

SCM 560. Strategic Logistics Management. (3-0) Cr. 3. Prereq: SCM 502 or permission of instructor. Positions logistics vis-à-vis supply chain management (SCM). Presents different perspectives on SCM vs. logistics. Describes primary logistics functions: transportation, warehousing, facility location, customer service, order processing, inventory management, and packaging. Benefits of and obstacles to the integration of these functions.

SCM 561. Transportation Management and Policy. (3-0) Cr. 3. Prereq: SCM 502 or permission of instructor. Analysis of contemporary issues and strategies in transportation management and policy. Emphasis on evaluation of the impacts of transportation policies, new technologies, and strategic carrier and shipper management practices on the freight transportation industry and logistics systems.

SCM 563. Purchasing and Supply Management. (3-0) Cr. 3. Prereq: SCM 502 or permission of instructor. Mechanics, procedures and tools used in purchasing. Recruiting, selecting, developing and managing supply chain partners in order to achieve competitive advantage via superior supply chain management. Factors and information needs for making supply chain management decisions.

SCM 585. Strategic Demand Planning. (3-0) Cr. 3. Prereq: SCM 502 or permission of instructor. Synchronizes demand with manufacturing and distribution. Emphasis on the strategic advantages of linking business plans and demand forecasts, both vertically within the organization and collaboratively among supply chain partners.

SCM 590. Special Topics. Cr. arr. Repeatable. Prereq: Graduate classification and permission of instructor. For students who wish to do individual research in a particular area of supply chain management.

SCM 601. Theoretical Foundations of Supply Chain Management. (3-0) Cr. 3. Prereq: Mgmt 601 or permission of instructor. An overview of the development of supply chain management (SCM) theory, including review of seminal articles in logistics, operations, and purchasing management and theories from allied disciplines (e.g., economics, marketing, sociology, strategic management). Analysis of trends in SCM research topics and methodologies. Identification of emerging and future areas for research and theory development.
SCM 602. Seminar in Supply Chain Strategy. (3-0) Cr. 3. Prereq: SCM 601 or concurrent enrollment. Review of research literature on supply chain strategy, including the impact of technology, global economic and social factors, and intra- and inter-organizational integration on supply chain strategy formation. The role of SCM in overall corporate strategy and the impact of SCM on firm performance will also be addressed.

SCM 603. Seminar in Purchasing. (3-0) Cr. 3. Prereq: SCM 601 or concurrent enrollment. Review of classic purchasing theories. Discussion of contemporary supply management strategy; the role of supply management and its relationship with other functional areas; its impact on logistics and transportation issues; management of supply uncertainties.

SCM 604. Seminar in Logistics Management. (3-0) Cr. 3. Prereq: SCM 601 or concurrent enrollment. Integration of network, economic, and systems theory in the design, management, and control of logistics systems in the context of integrated supply chain management. Functional areas addressed include transportation, inventory order fulfillment, distribution, and warehousing. Facility location analysis will also be covered.

SCM 605. Seminar in Operations Management. (3-0) Cr. 3. Prereq: SCM 601 or concurrent enrollment. Review of the research literature on methods of organizing, planning, controlling, and improving manufacturing systems to achieve the desired performance objectives related to cost, quality, speed, and flexibility. The relationship between the performance of the manufacturing system and the performance of the supply chain system will also be discussed.

SCM 650. Research Practicum I. (1-0) Cr. 1. Prereq: enrollment in the PhD program. Preparation of a research manuscript to be submitted to a peer-reviewed academic journal. Students will work with a faculty mentor on a research project.

SCM 651. Research Practicum II. (1-0) Cr. 1. Prereq: enrollment in the PhD program. Preparation of a second research manuscript to be submitted to a peer-reviewed academic journal. Although students work under the supervision of a faculty mentor, the students will take independent responsibility for the research project.

Sustainable Agriculture
(Interdepartmental Graduate Major)
www.sust.ag.iastate.edu/gpsa/
Program Leadership: M. Duffy, Chair and Director of Graduate Education.

The graduate program in sustainable agriculture is an interdepartmental major offered through faculty in sixteen participating departments: Agricultural and Biosystems Engineering; Agricultural Education and Stastics; Animal Science; Community and Regional Planning; Ecology, Evolution and Organismal Biology; Economics; Entomology; Food Science and Human Nutrition; Horticulture; Landscape Architecture; Natural Resource Ecology and Management; Philosophy and Religious Studies; Plant Pathology; Political Science; and Sociology. Both M.S. and Ph.D. degrees are offered within the major.

Master’s students must have a bachelor’s degree in one of the life, social, or engineering sciences, or a bachelor’s degree plus equivalent experience in these areas. Doctoral students must have a master’s degree and either an undergraduate or master’s degree major in the College of Agriculture and Life Sciences or its equivalent. Graduates of the program will be able to design and manage agricultural systems that increase food security, enhance human communities, and protect environmental quality. To achieve these objectives, students learn agricultural and ecological principles, study social relations underlying sustainable farming and food systems, and gain experience with practical techniques of sustainable agriculture. The program seeks to balance depth in disciplinary knowledge and perspectives with broader, systems-level thinking. It integrates technical and social sciences through a sequence of team-taught interdisciplinary core courses emphasizing higher-order critical thinking skills and active, collaborative approaches to learning.

Graduates of the program are qualified to work in a variety of settings, including university research, education, extension, agribusiness, governmental and non-governmental organizations, and farming. Information on applications procedures, research interests of the faculty, and specific requirements of the major may be obtained at http://www.sust.ag.iastate.edu/gpsa/ or by contacting gpsa@iastate.edu.

Courses for graduate students

SusAg 509. Agroecosystem Analysis. (Cross-listed with Agron, Anthr, Soc). (3-0) Cr. 3. F. Prereq: Senior or above classification. Experimental, interdisciplinarian examination of Midwestern agricultural and food systems, emphasizing field visits, with some classroom activities. Focus on understanding multiple elements, perspectives (agronomic, economic, ecological, social, etc), and scales of operation.

SusAg 515. Integrated Crop and Livestock Production Systems. (Cross-listed with A E, Agron, An S). (3-0) Cr. 3. Alt. F., offered 2009. Prereq: SusAg 509. Methods to maintain productivity and minimize the negative ecological impacts of agricultural systems by understanding nutrient cycles, managing manure and crop residue, and utilizing multispecies interactions. Crop and livestock production within landscapes and watersheds is also considered. Course includes a significant field component, with student teams analyzing Iowa farms.

SusAg 530. Ecologically Based Pest Management Strategies. (Cross-listed with Agron, Ent, Pi Pi). (3-0) Cr. 3. Alt. F., offered 2010. Durable, least-toxic strategies for managing weeds, pathogens, and insect pests, with emphasis on understanding ecologically processes.

SusAg 546. Organizational Strategies for Diversified Farming Systems. (Cross-listed with Agron, Hort, Soc). (3-0) Cr. 3. Alt. S., offered 2010. Prereq: SusAg 509. Examination of the organization and operation of complex, diversified farming systems using tools and perspectives drawn from ecology, agronomy, and sociology. The course includes a significant field component focused on an Iowa farm.

SusAg 584. Organic Agricultural Theory and Practice. (Cross-listed with Agron, Hort). (3-0) Cr. 3. Alt. S., offered 2010. Prereq: 9 cr. in biological or physical sciences. Delicate & Delicate. Understanding the historical origins and ecological theories underpinning the practices involved in organic agriculture. Interdisciplinary examination of crop and livestock production and socio-economic processes and policies in organic agriculture from researcher and producer perspectives.

SusAg 590. Special Topics. Cr. arr. Repeatable. F.S.SS. Prereq: Graduate classification, permission of instructor. For students wishing to conduct in-depth study of a particular topic in sustainable agriculture.

SusAg 599. Creative Component. Cr. arr. F.S.SS. Pre-enrollment contract required. For MS students pursuing the non-thesis degree option. Final product is a creative component.

SusAg 600. Sustainable Agriculture Colloquium. (1-0) Cr. 1. Repeatable. F.S.SS. Weekly seminar for graduate students in the Sustainable Agriculture program.

SusAg 610. Foundations of Sustainable Agriculture. (Cross-listed with Agron, A E, Anthr, Soc). (3-0) Cr. 3. F. Prereq: Graduate classification, permission of instructor. Historical, biophysical, socioeconomic, and ethical dimensions of agricultural sustainability. Strategies for evaluating existing and emerging agricultural systems in terms of the core concepts of sustainability and their theoretical contexts.

Systems Engineering
(Interdepartmental Graduate Major)

Supervisory Committee: D. Gemmill (Chair), D. Jacobson, and A. Mann

Work is offered for the master of engineering with a major in systems engineering. The graduate major in Systems Engineering is primarily an off-campus program. It is an interdisciplinary program that allows students to take courses across a variety of departments. Graduates of the program will possess the analytical abilities needed to design, evaluate, and build complex systems involving many components and demanding specifications. They will have the ability to work across disciplinary boundaries, as the practice of modern engineering often requires. Graduates will have developed management capabilities and extended their disciplinary knowledge.

The program is broadly based and uses courses in the various departments of the College of Engineering and courses in other departments of the university. The 30 credits necessary for graduation includes 27 semester credits of formal coursework and 3 credits for a creative component. Completion of the program requires two courses in systems engineering, two courses in the major discipline of the student, three engineering courses with a systems engineering emphasis, and a creative component. Courses are delivered to off-campus students both with the instructor present and through various distance education systems, including video-streaming, podcasting, ftp downloading and CD-ROMs.

The program of study committee, in consultation with the student, determines the courses to be taken and the acceptability of transfer credits. The major professor should be selected from the discipline where a concentration of coursework will be taken.

Admission to the program requires a baccalaureate degree in engineering and admission to the graduate college. Students with degrees in other areas will be considered on an individual basis.
Teacher Education

David Whaley, Associate Dean, Teacher Education

Teacher Education Faculty: Geoff Abelison (C I), Linda Quinn Allen (WLC), Thomas Andreoni (C I), Alex Andrew (C I), Janine Baker (KIN), EunJin Bang (C I), Leslie Bloom (C I), Julie Brown (C I), Warren Blumenfeld (C I), Mary Jane Brotherson (HD FS), Katherine Richardson Bruna (C I), Patricia Carlson (C I), Mike Clough (C I), James Colbert (BIO), Karen Colbert (HD FS), Ana Correa (C I), Sedahlia Crase (HD FS), Corey Drake (C I), Dianne Draper (HD FS), Rich Engelhorn (KIN), Levon Estes (AgEds), Annie Feoegen (C I), Michael Golomo (Music), Thomas Greenbowe (Chem), Connie Hargrave (C I), Cheryl Hausaufl (AESHM), Sue Hegland (HD FS), Beth Herbel-Eisenmann (C I), Kere Hughes (HD FS), Leah Keino (AESHM), Mimi Lee (C I), Patricia Leigh (C I), John Levis (EngI), Gayle Lule (HD FS), Robert Martin (AgEds), James McShay (C I), Donna Merkley (C I), Greg Miller (AgEds), Wade Miller (AgEds), Koudier Mokhari (C I), Susan Naude (HD FS), Sylvia Munsen (Music), Donna Nidy (EngI), Dale Niederhauser (C I), Lori Norton-Meier (C I), Joanne Olson (C I), Carla Peterson (HD FS), Gary Phye (C I), Mark Recktan (WLC), Michael Retaliak (Music), James Rodde (Music), Connie Ringeel (EngI), Marcia Rosenbusch (C I), Elizabeth Schabel (EngI), Frank Schabel (KIN), Kevin Schilling (Music), Denise Schmidt (C I), Jennifer Seymour (C I), Carl Smith (C I), Katherine Thomas (KIN), Ann Thompson (C I), Margaret Torrie (HD FS), Robert Tremmel (EngI), Michael Tremmel (EngI), Roberta Venn (EngI), Kerry Whisnant (PhyI), Kenneth Windom (Geo)

The mission of University Teacher Education is to develop educators who are caring, competent, and certified. Students who successfully complete the requirements for any of the endorsement areas offered at ISU must demonstrate the skills and knowledge required of beginning teachers. (See Iowa Teaching Standards and Criteria section.)

University Teacher Education is a shared responsibility that spans three colleges. For most licensure areas, students major in a content area while taking additional education courses. All students who are recommended by Iowa State University for teacher licensure must meet the requirements of University Teacher Education and be recommended by their department, college, and the ISU recommending official.

Undergraduate Teacher Licensure Areas

An undergraduate student seeking a bachelor’s degree must be enrolled in the department in which he or she plans to major and must meet the graduation requirements of that department and college.

Currently, there are sixteen undergraduate teacher licensure areas listed below. These areas and their corresponding grade levels are listed below:

- Early Childhood Education (birth-grade 3)
- Elementary Education (grades K-6)
- Agricultural Education (grades 5-12)
- Biology (grades 5-12)
- Chemistry (grades 5-12)
- Earth Science (grades 5-12)
- English (grades 5-12)
- Family and Consumer Sciences (grades 5-12)
- Health Education (grades 5-12)
- History-Social Sciences (grades 5-12)
- Mathematics (grades 5-12)
- Music (grades K-12)

Physical Education (grades K-12)
- Physical Science (grades 5-12)
- World Languages and Cultures (French, German, Latin, Russian, and Spanish) (grades 5-12)

Additional Endorsements

Students must fulfill the requirements for one of the licensure areas listed above to add any of the following endorsements:

- Art (K-8)
- Basic Science (K-8)
- Coaching Interscholastic Athletics (grades K-12)
- English and Language Arts (K-8)
- English as a Second Language (grades K-12)
- General Science (grades 5-12)
- Health (K-8)
- History (K-8)
- Instructional Strategist I: Mild/Moderate Disabilities (grades K-8 or 5-12)
- Instructional Strategist II: Behavior Disorders/Learning Disabilities (K-12)
- Mathematics (K-8)
- Middle School (5-8)
- Reading (grades K-8 or 5-12)
- Social Sciences (K-8)
- Speech Communication (grades 5-12)
- World Languages and Cultures (French, German, Latin, Russian, and Spanish) (grades K-8)

Post-Bachelor’s Teacher Licensure Areas

Students already holding an appropriate bachelor’s degree may pursue teacher licensure in any of the undergraduate licensure areas listed above. Interested students should consult with the coordinator of the area in which they plan to specialize so that an individualized program of study can be developed.

Graduate Teacher Licensure Areas

Currently, there are five graduate initial teacher licensure programs. These programs are designed for students who do not currently hold a teaching license. The programs are listed below:

- Agricultural Education (M.S.)
- Family and Consumer Sciences Education (M.Ed. or M.S.)
- Mathematics Education (M.Ed.)
- Physical Education (M.S.)
- Secondary Sciences Education (M.A.T.)

Iowa State University also offers Master’s programs for practicing teachers. The Mathematics Department offers a Masters in School Mathematics. (See Mathematics in Courses and Programs section of this catalog.) The Curriculum and Instruction Department offers a Master’s degree program and a certificate program that lead to a special education endorsement. (See Curriculum and Instruction in Courses and Programs section of this catalog.)

Graduate programs are also available for those who seek licensure in Educational Administration as PK-12 school principals or PK-12 superintendents. (See Educational Administration in Courses and Programs section of this catalog.)

Standards

University Teacher Education has a rigorous standards-based curriculum. Two sets of standards are used throughout the program, one that is targeted for pre-service teachers (Standards for University Teacher Education Programs/Candidates which originates from the Iowa Administrative Code, Chapter 79, Standards for Practitioner Preparation Programs) and the other set that is targeted for in-service teachers (the Iowa Teaching Standards and Model Criteria adopted by the State Board of Education). Both are listed below in full.

Standards for University Teacher Education Programs/Candidates

a. Content/subject matter specialization. The candidate demonstrates an understanding of the central concepts, tools of inquiry, and structure of the discipline(s) the candidate teaches, and creates learning experiences that make these aspects of the subject matter meaningful for students. This is evidenced by a completion of a 30-semester-hour teaching major which must minimally include the requirements for at least one of the basic endorsement areas, special education teaching endorsements, or secondary level occupational endorsements. Each elementary candidate must also complete a field of specialization in a single discipline or a formal interdisciplinary program of at least twelve semester hours.

b. Student learning. The candidate demonstrates an understanding of human growth and development and of how students learn, and receives learning opportunities that support intellectual, career, social, and personal development.

c. Diverse learners. The candidate demonstrates an understanding of how students differ in their approaches to learning and creates instructional opportunities that are equitable and adaptable to diverse learners.

d. Instructional planning. The candidate plans instruction based upon knowledge of subject matter, students, the community, curriculum goals, and state curriculum models.

e. Instructional strategies. The candidate demonstrates an understanding and use of a variety of instructional strategies to encourage student development of critical and creative thinking, problem-solving, and performance skills.

f. Learning environment/classroom management. The candidate uses an understanding of individual and group motivation and behavior; creates a learning environment that encourages positive social interaction, active engagement in learning, and self-motivation; maintains effective classroom management; and is prepared to address behaviors related to substance abuse and other high-risk behaviors.

g. Communication. The candidate uses knowledge of effective verbal, nonverbal, and media communication techniques, and other forms of symbolic representation, to foster active inquiry, collaboration, and support interaction in the classroom.

h. Assessment. The candidate understands and uses formal and informal assessment strategies to evaluate the continuous intellectual, social, and physical development of the student, and effectively uses both formative and summative assessment of students, including student achievement data, to determine appropriate instruction.

i. Foundations, reflective practice and professional development. The candidate develops knowledge of the societal, historical, and philosophical foundations of education. The candidate continually evaluates the effects of the candidate’s choices and actions on students, parents, and other professionals in the learning community; actively seeks out opportunities to grow professionally; and demonstrates an understanding of teachers as consumers of research and as researchers in the classroom.

j. Collaboration, ethics and relationships. The candidate fosters relationships with parents, school colleagues, and organizations in the larger community to support students learning and development; demonstrates an understanding of...
educational law and policy, ethics, and the profession of teaching, including the role of boards of education and education agencies; and demonstrates knowledge and dispositions for cooperation with other educators, especially in collaborative/co-teaching as well as in other educational team situations.

k. Technology. The candidate effectively integrates technology into instruction to support student learning.

Iowa Teaching Standards and Criteria

Standard 1: Demonstrates ability to enhance academic performance and support for implementation of the school district student achievement goals.

The teacher:

a. Provides evidence of student learning to students, families, and staff.
b. Implements strategies supporting student, building, and district goals.
c. Uses student performance data as a guide for decision-making.
d. Accepts and demonstrates responsibility for creating a classroom culture that supports the learning of every student.
e. Creates an environment of mutual respect, rapport, and fairness.
f. Participates in and contributes to a school culture that focuses on improved student learning.
g. Communicates with students, families, colleagues, and communities effectively and accurately.

Standard 2: Demonstrates competence in content knowledge appropriate to the teaching position.

The teacher:

a. Understands and uses key concepts, underlying themes, relationships, and different perspectives related to the content area.
b. Uses knowledge of student development to make learning experiences in the content area meaningful and accessible for every student.
c. Relates ideas and information within and across content areas.
d. Understands and uses instructional strategies that are appropriate to the content area.

Standard 3: Demonstrates competence in planning and preparing for instruction.

The teacher:

a. Uses student achievement data, local standards, and the district curriculum in planning for instruction.
b. Sets and communicates high expectations for social, behavioral, and academic success of all students.
c. Uses student developmental needs, background, and interests in planning for instruction.
d. Selects strategies to engage all students in learning.
e. Uses available resources, including technologies, in the development and sequencing of instruction.

Standard 4: Uses strategies to deliver instruction that meet the multiple learning needs of students.

The teacher:

a. Aligns classroom instruction with local standards and district curriculum.
b. Uses research-based instructional strategies that address the full range of cognitive levels.
c. Demonstrates flexibility and responsiveness in adjusting instruction to meet student needs.
d. Engages students in varied experiences that meet diverse needs and promote social, emotional, and academic growth.
e. Connects students’ prior knowledge, life experiences, and interests in the instructional process.
f. Uses available resources, including technologies, in the delivery of instruction.

Standard 5: Uses a variety of methods to monitor student learning.

The teacher:

a. Aligns classroom assessment with instruction.
b. Communicates assessment criteria and standards to all students and parents.
c. Understands and uses the results of multiple assessments to guide planning and instruction.
d. Guides students in goal setting and assessing their own learning.
e. Provides substantive, timely, and constructive feedback to students and parents.
f. Works with other staff and building and district leadership in analysis of student progress.

Standard 6: Demonstrates competence in classroom management.

The teacher:

a. Creates a learning community that encourages positive social interaction, active engagement, and self-regulation for every student.
b. Establishes, communicates, models, and maintains standards of responsible student behavior.
c. Develops and implements classroom procedures and routines that support high expectations for student learning.
d. Uses instructional time effectively to maximize student achievement.
e. Creates a safe and purposeful learning environment.

Standard 7: Engages in professional growth.

The teacher:

a. Demonstrates habits and skills of continuous inquiry and learning.
b. Works collaboratively to improve professional practice and student learning.
c. Applies research, knowledge, and skills from professional development opportunities to improve practice.
d. Establishes and implements professional development plans based upon the teacher’s needs aligned to the Iowa Teaching Standards and district/building student achievement goals.

Standard 8: Fulfills professional responsibilities established by the school district.

The teacher:

a. Adheres to board policies, district procedures, and contractual obligations.
b. Demonstrates professional and ethical conduct as defined by state law and individual district policy.
c. Contributes to efforts to achieve district and building goals.
d. Demonstrates an understanding of and respect for all learners and staff.
e. Collaborates with students, families, colleagues, and communities to enhance student learning.

Standards Assessments

The State Board of Education requires each teacher candidate to demonstrate acquisition of the knowledge, skills and dispositions designated by the standards above for an Iowa teaching license at a level appropriate for a novice teacher. See licensure area coordinator for requirements.

The General Education Requirement

All prospective teachers are required to meet general education requirements as a part of their preparation.

Undergraduate Students

Undergraduate students must complete studies in the following general education groups. General education courses may be found in many departments. Specific departments and/or colleges may require additional credits. Credits used to satisfy these general education requirements typically satisfy department and college general education requirements. (See licensure area coordinator for more information.)

Core:
- 8 Natural sciences
- 3 Mathematics or Statistics
- 9 Social Sciences
- 6 Humanities
- 9 Communication Skills
- 0.5 Library Skills (Lib 160)
- 33.5 Total

The above requirements must include:
1. Engl 150 and 250, or equivalent
2. One course that develops interpersonal or group presentation
3. HD FS 102 or Psych 230
4. One course in American history or government (see approved list.)

Post-Bachelor’s Students

Students holding an appropriate bachelor’s degree who wish to pursue teaching licensure must have at least one course in each of the following five general education groups identified for undergraduate students in the preceding section: Natural Sciences, Mathematics or Statistics, Social Sciences, Humanities, and Communication Skills. Individual departments preparing teachers may require additional credits in general education. (See licensure area coordinator for more information.)

Master’s Students

Each Master’s program will determine what, if any, general education requirements Master’s students must fulfill beyond a bachelor’s degree from a regionally accredited institution. (See licensure area coordinator for more information.)

Professional Teacher Education Requirement (Professional Core)

Field Experience Requirement

All students must satisfactorily complete a minimum of 80 hours of pre-student teaching laboratory experience. This requirement may be met through a pre-student teaching course (e.g., CI 280, CI 480, CI 680) or, in certain endorsement areas, a course designated to provide an equivalent experience. Students complete a background check before initial placement in schools and other appropriate locations.

Undergraduate Students

Prospective teachers must complete certain studies related directly to the profession of teaching. All undergraduate students in teacher education must take the following courses prior to student...
teaching, unless the student’s licensure area has an approved content-area course deemed to be equivalent (see specific Licensure Area Requirements section below for details.)

Early Childhood Education and Elementary Education:

Cr.
3 CI 201—Digital Learning in the PK-8 Classroom
3 CI 204—Social Foundations of American Education
2 CI 245—Strategies in Teaching
1 CI 288—Strategies Practicum
3 CI 322—Educational Psychology of Young Learners
3 CI 406—Multicultural Foundations of Schools and Society: Introduction
3 Sp Ed 250—Education of the Exceptional Learner in a Diverse Society
16 Student teaching (16 weeks)

Secondary Education and K-12:

Cr.
3 CI 202: Digital Learning in the 7-12 Classroom
3 CI 204—Social Foundations of American Education
3 CI 333—Educational Psychology
3 CI 406—Multicultural Foundations of Schools and Society: Introduction
3 Sp Ed 450—Teaching Secondary Students with Exceptionalities in General Education Classrooms
14-16 Student teaching (minimum 14 weeks) (See teacher licensure area coordinator for more information).

Students in K-12 licensure areas and secondary education (grades 5-12) licensure areas must also complete the course listed below unless the student’s licensure area has an approved equivalent. Areas with approved equivalents include: Agricultural Education, Physical Education and all Secondary Sciences. (See licensure area coordinator for more information).

Cr.
3 CI 426—Principles of Secondary Education

Post-Bachelor’s Students

Students who hold an appropriate bachelor’s degree and seek a teaching license must complete the professional education requirements listed above through course work or examination.

Master’s Students

Prospective teachers must complete certain studies related directly to the profession of teaching. All students enrolled in Master’s programs that lead to initial licensure must take the following courses prior to student teaching, unless the student’s licensure area has an approved content area course deemed to be equivalent. (See Master’s Programs section below for details.)

Cr.
3 Sp Ed 501—Teaching Students with Exceptionalities in General Education
3 CI 505—Using Technology in Learning and Teaching
3 HPC 504—Studies in the Foundations of American Education
3 CI 506—Multicultural Foundations of School and Society: Advanced
3 CI 526—Principles of Secondary Education
3 CI 529—Educational Psychology in the Secondary Classroom
14-16 Student teaching (minimum 14 weeks) (See teacher licensure area coordinator for more information).

Admission to University Teacher Education (Checkpoint 1)

The University Teacher Education Office monitors the progress of teacher education students. Admission to University Teacher Education is the first of three checkpoints. At this time, the requirements listed below will be checked. Students will not be able to progress to Student Teaching (Checkpoint 2) and Licensure (Checkpoint 3) unless full admission to University Teacher Education (Checkpoint 1). Departments may have higher eligibility requirements for each checkpoint (see licensure area coordinator for more information).

Students transferring from other institutions with a minimum of 2.50 GPA or above may be admitted tentatively; full admission may be granted upon completion of nine semester credits averaging 2.50 or above at Iowa State University. Students who receive tentative admission are required to reapply the following semester by using the application for admission. A minimum of 20 semester credits averaging 2.50 or above must be earned at Iowa State University to receive institution licensure approval (nine of the required 20 semester hours must precede student teaching).

A student seeking admission to University Teacher Education must be accepted by a selection committee for the specific licensure area which the student seeks to enter. Factors considered in evaluating applications (in addition to the requirements listed below) may include professional dispositions, scholarship, interest in teaching, character, interpersonal skills, and physical and mental health.

Recommendations by selection committees must be confirmed by the University Teacher Education Coordinating Council before admission is granted. Students may apply as early as four semesters before the one in which they plan to enroll for student teaching; however, they must be fully admitted into University Teacher Education at least one year prior to the semester they complete the Request for Student Teaching Placement.

Requirements for full admission to University Teacher Education as an undergraduate:

1. A minimum 2.5 cumulative grade point average.
2. Successful completion of one of the following basic skills tests:
   A composite Praxis I (PPST) score of 522, with a minimum of 170 for each test (reading, writing, and mathematics.) Some licensure areas may require higher Praxis I scores.
3. A report from a criminal background check initiated by ISU’s recommending official.

Requirements for full admission to University Teacher Education as a post-bachelor’s student:

1. A bachelor’s degree from a regionally accredited institution and a minimum 2.5 cumulative grade point average from that institution.
2. Successful completion of one of the following basic skills tests:
   Minimum GRE scores (400 on each of the Verbal and Quantitative sections.)

3. Documented completion of ISU approved 10 hours of pre-student teaching field experience.
4. All Curriculum and Instruction (C I), Human Development and Family Studies (HD FS) and Special Education (Sp Ed) courses required for licensure have a minimum grade requirement of C (pedagogy coursework). Courses in the department of the major specifically required for teacher licensure have a minimum grade requirement of C- (content coursework).

5. A report from a criminal background check initiated by ISU’s recommending official.

Mailing Program Eligibility

Standards Assessments: In order to be recommended for licensure, all students must have demonstrated satisfactory performance across the teacher education competencies, as defined by their specific area. (See the teacher licensure area coordinator for more information.) Students progress is monitored throughout the program Standards are assessed multiple times. More information is available online: www.teacher.hs.iastate.edu.

GPA: All students admitted to the University Teacher Education Program must maintain a minimum of a 2.5 cumulative grade point average through completion of their licensure requirements.
Grades: For teacher education students, all Curriculum and Instruction (C I), Human Development and Family Studies (HD FS) and Special Education (Sp Ed) courses required for licensure have a minimum grade requirement of a C. Courses in the department or major specifically required for teacher licensure have a minimum grade requirement of a C-. Note: Individual departments preparing teachers may have higher eligibility requirements (see teacher licensure area coordinator for more information).

Student Teaching (Checkpoint 2)
Student teaching is the culminating experience. To ensure that students are prepared for this experience, the following requirements must be met prior to submitting your “Request for Student Teaching Placement” form:

1. Full admission to University Teacher Education is required a minimum of 1 year before the start of the student teaching semester. Students in accelerated graduate programs must be fully admitted by mid-semester prior to the student teaching semester.

2. Completion of the “Request for Student Teaching Placement” by the deadline in the fall semester for spring student teaching and by the deadline in the spring semester for fall student teaching. Details regarding this application are available in the University Teacher Education Office.

3. A minimum 2.5 cumulative grade point average.

4. A passing grade as determined by the licensure area must have been earned in all required professional teacher education requirement courses and selected courses in the student’s licensure area. All Curriculum and Instruction (C I), Human Development and Family Studies (HD FS) and Special Education (Sp Ed) courses required for licensure have a minimum grade requirement of a C (pedagogy coursework). Courses in the department of the major specifically required for teacher licensure have a minimum grade requirement of a C (content coursework).

Teacher Licensure (Checkpoint 3)
The Iowa Board of Educational Examiners issues teaching licenses that are valid for specific ages or grades. Students preparing for certification to teach in the Iowa State University, K-6 for elementary teachers and 5-12 for secondary teachers). Endorsements on a teaching license indicate which subject areas a teacher is qualified to teach. Completion of student teaching and required coursework does NOT guarantee recommendation for a teaching license. The Iowa License may be recommended for students who hold a bachelor’s degree from Iowa State University or another regionally accredited institution and who have completed the following:

1. All requirements of an approved licensure area, including the general education requirement and professional teacher education requirement listed above. Note: Specific courses to be used for licensure may not be taken pass/no pass.

2. Additional requirements as designated by the State of Iowa that include, but are not limited to, a special education component and 50 hours of pre-student teaching field experience, 40 of which are to be taken after admission to the University Teacher Education Program.

3. A minimum ISU cumulative grade point average of 2.50 or higher through graduation (or completion of the University Teacher Education Program). (Some licensure areas may require a higher cumulative grade point average.)

4. A minimum grade of C (not C-) must be earned in student teaching to be recommended for licensure.

5. Documentation from the student teaching supervisor that the student has successfully completed the final assessment documenting the student’s mastery of the skills and knowledge included in the Iowa Teaching Standards.

Undergraduate and Post-Bachelor’s (non-Master’s) Teacher Licensure Area Requirements
Certain competencies are required of those who plan to teach at the early childhood, elementary or secondary level. Those preparing to teach at the secondary level must develop a depth of understanding in one or more subject matter areas. For full-time teaching in secondary schools a major in an endorsement area or an approved subject matter concentration of at least 30 semester hours is required. Students interested in adding an additional endorsement area should consult with the coordinator or advisor of the additional area (see the following website for the contact information for the advisor or coordinator that works with students on teacher licensure: www.teacher.hs.iastate.edu). Persons interested in teaching in one of the following endorsement areas should also consult with the appropriate advisor or coordinator. Specific requirements for each teacher licensure area are described below (these requirements are in addition to the General Education Requirements and the Professional Teacher Education Requirements that were listed earlier).

Agricultural Education
The Department of Agricultural Education and Studies is responsible for preparing Agricultural Education teachers for grades 5-12. For specific content area requirements see Curriculum in Agricultural Education and Studies (Teacher Certification Option).

Professional required courses are: AgEds 110A, 211A, 310, 401, 402, 416, 417 (14 Cr.)

Required content courses are: C I/LAS 417D, Engl 396, 397, 417, and 494.

Earth Sciences
The Department of Geological and Atmospheric Sciences and the Department of Curriculum and Instruction share the responsibility for preparing teachers to work with children from birth to age 8 (PK-3 including special education).

For specific course requirements, see College of Human Sciences, Curriculum in Early Childhood Education.

Earth Sciences
The Department of Geological and Atmospheric Sciences and the Department of Curriculum and Instruction share the responsibility for preparing Earth Science teachers for grades 5-12.

Required professional courses are: C I 280M, 347, 418, 419, 468J, 468K, C I 417J.

Required content courses are: Geol 100, 100L, 102, 102L, 301, 315, 356, 365, 368 and a three credit geology elective; Mteor 206; Astro 120, 150; Chem 177, 177L, 178L, 211, 211L, 331, 331L, 332, 332L or Chem 163, 163L, 164, 164L, 211, 211L, 231, 231L.

Students with no natural science endorsement who seek approval to teach chemistry as an additional subject area must earn credits in the following courses (15 minimum credits):

Chem 177, 177L, 178L, 211, 211L, 331, 331L, 332, 332L or Chem 163, 163L, 164, 164L, 211, 211L, 231, 231L.

Early Childhood Education
The Department of Curriculum and Instruction and the Department of Human Development and Family Studies in the College of Human Sciences share the responsibility for preparing teachers to work with children from birth to age 8 (PK-3 including special education).

For specific course requirements, see College of Human Sciences, Curriculum in Early Childhood Education.
Required content courses are: see Curriculum, English.

Students seeking to add English as an additional endorsement area must earn 46 credits in the following courses:

2. Rhetoric: Engl 310
3. Language: Engl 220

For specific content area course requirements, see Curriculum, English.

Students with an endorsement in a natural science who seek approval to teach physical science as an additional area must earn credits in the courses listed below. Students with no other science endorsement, but who seek an additional endorsement in this area, must take the listed courses plus additional credits in the area to total at least 24. See coordinator for approval prior to taking additional courses.

Astro 120 or 150 or 342 or 346
Chem 163, 163L
Geol 100, 100L
Mteor 206
Phys 111, 112, or 221, 222

World Languages and Cultures

The Department of World Languages and Cultures prepares World Language teachers for grades 5-12.

World Language teachers can earn an endorsement in French, German, Latin, Russian or Spanish.

For specific content area course requirements, see Curriculum, World Languages and Cultures.

Required professional courses are: C I 280L, WLC/C I 480, WLC 417 and WLC 487.

Students seeking approval to teach a world language as their first endorsement must have a major in the target language. For an additional endorsement in a world language, students must earn 25 credits in that language. Nine (9) credits must be at the 300 level or above with six (6) of these credits in composition and conversation. Courses at the 100 level are not counted in the 25 required credits. For an endorsement in Latin, 10 of the 25 credits must be at the 300 or 400 level and must include Hist 430 (CI St 403). All students seeking to teach a world language must demonstrate their proficiency in the language by taking the ACTFL OPI (Oral Proficiency Interview). Students are responsible for the cost of the administration of the OPI and must request that their scores from the OPI be added to their transcript.

Requirements for Additional Endorsements

Students may elect to add additional endorsements to their teaching license by completing the necessary requirements. All “Undergraduate Teacher Licensure Areas” listed above can be pursued as an additional endorsement. Below are the additional endorsements only options that require students to pursue one of the undergraduate, post-bachelor’s or graduate teacher licensure areas listed above. Detailed requirements for any endorsement may be obtained from the University Teacher Education Office.

Art (grades K-8)

Students seeking an additional endorsement in Art (K-8) should see an adviser in the Department of Curriculum and Instruction.

Basic Science (grades K-8)

Students seeking an additional endorsement in Basic Science (K-8) should see an adviser in the Department of Curriculum and Instruction.

Coaching Interscholastic Athletics (grades K-12)

The Department Kinesiology offers courses that can lead to a K-12 athletic coach endorsement.

Students seeking approval for the Iowa State University endorsement to coach interscholastic athletics must satisfy the requirements of an endorsement area listed above and earn credits in the following:
Biol 155, Psych 230, KIN 220, and KIN 315

English and Language Arts (grades K-8)

Students seeking an additional endorsement in English and Language Arts (K-8) should see an adviser in the Department of Curriculum and Instruction.

**English as a Second Language (grades K-12)**

The Department of English offers courses that can lead to a K-12 ESL Teacher endorsement.

To add a K-12 teaching endorsement in English as a Second Language, students must fulfill the requirements of an endorsement area listed above and earn credits in the following courses. In some cases, relevant special topics courses or experimental course work may be substituted. Some courses have prerequisites.

- Engl/Ling 219 or Engl/Ling 511
- Engl/Ling 220
- Engl/Ling 425 or Engl/Ling 517
- Engl/Ling 514 or CI 420/520
- Engl/Ling 518 or Engl/Ling 524 and Engl/Ling 525
- Engl/Ling 588

**General Science (grades 5-12)**

General Science is an interdepartmental additional area of endorsement for grades 5-12

Students seeking approval to teach general science must earn credits in the following courses:

- Biol 211, 211L, 212, 212L
- Chem 177, 177L, 178, 178L, 231, 231L
- Geol 100, 100L
- Phys 111, 112; or 221, 222
- Math 151 or 160 or 165 or 181

At least 6 credits from courses numbered 300 or above in astronomy and astrophysics, biochemistry and biophysics, biology, botany, chemistry, genetics, geology, meteorology, microbiology, or physics.

**Health (grades K-8)**

Students seeking an additional endorsement in Health (K-8) should see an adviser in the Department of Curriculum and Instruction.

**History (grades K-8)**

Students seeking an additional endorsement in History (K-8) should see an adviser in the Department of Curriculum and Instruction.

**Mathematics (grades K-8)**

Students seeking an additional endorsement in mathematics (K-8) should see an adviser in the Department of Curriculum and Instruction.

**Middle School (grades 5-8)**

Students seeking an additional endorsement in Middle School (5-8) should see an adviser in the Department of Curriculum and Instruction.

**Reading (grades K-8, 5-12)**

The Curriculum and Instruction Department offers courses that can lead to a reading endorsement for grades K-8. This department collaborates with the English Department to offer the necessary coursework for a 5-12 reading endorsement.

Students seeking an additional endorsement to teach elementary reading (K-8) should see a Department of Curriculum and Instruction adviser.

Students seeking endorsement to teach reading (5-12) as an additional endorsement must earn credits in the following courses:

- Foundations of Reading and Reading in the Content Area: CI 395/595 or CI 551 and C (Eng) 494.
- Practicum: C (Eng) 488/588

**Technology and Social Change**

**Advisory Committee:** Eric Abbott, coordinator; Robert Mazur, graduate coordinator.

**Undergraduate Study**

Technology and social change is a cross-disciplinary program examining the relationships between technologies and the social and cultural environments. The program has a national and international perspective, with courses addressing the interrelationships, policies, and impacts created by the international exchange of technologies. Through TSC, students will better understand the institutional and sociocultural consequences of technological change from differing perspectives and will become sensitive to the issues attending the use of technology to improve people’s lives. Work in the program can also serve as preparation for advanced study in this field.

The program requirement for a minor in technology and social change is a minimum of 15 credits. One of the courses must be TSC 341. An additional 3 credits must be taken from TSC cross-listed courses. The remaining 9 may be selected from TSC cross-listed courses or from the list of TSC approved courses. At least 9 of the 15 credits must be in courses numbered 300 or above. Because technology and social change is an interdisciplinary study, minor programs must include coursework in at least two departments. Students seeking a minor should develop a specific program of courses either with the TSC faculty representative in their department or with their adviser in the Department of Curriculum and Instruction.

**Speech Communication (grades 5-12)**

The Department of Speech Communication offers courses that can lead to 5-12 speech/theatre endorsement.

Students seeking endorsement to teach speech as an additional area must earn credits in the following courses:

- Sp Crn 110 or ComSt 102, Sp Crn 212, 313, 322, 412, 495A, 495B;
- Thre 255 or 360 or 455; Thre 358; Jl MC 101.

**World Languages and Cultures (French, German, Latin, Russian, and Spanish) (grades K-8)**

Students seeking an additional endorsement World Languages and Cultures (K-8) should see an adviser in the Department of Curriculum and Instruction.

**Master’s Programs that Lead to Initial Teacher Licensure**

**Agricultural Education**

The Agricultural Education and Studies Department offers a Master’s of Science program that prepares Agricultural Education teachers for grades 5-12.

See coordinator for program requirements.

**Mathematics**

The Curriculum and Instruction Department offers a Master’s of Education program that prepares Mathematics teachers for grades 5-12.

See coordinator for program requirements.

**Physical Education**

The Department of Kinesiology offers a Master’s of Science program that prepares Physical Education teachers for grades K-12.

See coordinator for program requirements.

**Secondary Sciences**

The Department of Curriculum and Instruction offers a Master’s of Arts in Teaching program that prepares Secondary Science teachers for grades 5-12.

See coordinator for program requirements.

**Reading Assessment and Oral Communication:** CI 452/552

**Written Communication:** C I 395/595 and Engl 397

**Adolescent Nonfiction and Fiction:** Engl 396 or CI 584

**Reading Instructional Strategies:** C I 456/556 or 553

**Social Sciences (grades K-8)**

Students seeking an additional endorsement in Social Sciences (K-8) should see an adviser in the Department of Curriculum and Instruction.

**Special Education (grades K-8, 5-12, K-12)**

The Department of Curriculum and Instruction offers courses that can lead to special education endorsements (Instructional Strategist I: Mild/ Moderate Disabilities (grades K-8 and grades 5-12) and Instructional Strategist II: Behavior Disorders/ Learning Disabilities (K-12)). Students seeking 5-12 special education endorsement must have a current teaching license.

Students seeking an additional K-8 endorsement to teach special education should see an adviser in the Department of Curriculum and Instruction.

**Health (grades K-8)**

Students seeking an additional endorsement in Health (K-8) should see an adviser in the Department of Curriculum and Instruction.

**Technology and Social Change**

Literacy:

- Engl/Ling 518 or Engl/Ling 524 and Engl/Ling 525
- Engl/Ling 588

**General Science (grades 5-12)**

General Science is an interdepartmental additional area of endorsement for grades 5-12.

Students seeking approval to teach general science must earn credits in the following courses:

- Biol 211, 211L, 212, 212L
- Chem 177, 177L, 178, 178L, 231, 231L
- Geol 100, 100L
- Phys 111, 112; or 221, 222
- Math 151 or 160 or 165 or 181

At least 6 credits from courses numbered 300 or above in astronomy and astrophysics, biochemistry and biophysics, biology, botany, chemistry, genetics, geology, meteorology, microbiology, or physics.

**History (grades K-8)**

Students seeking an additional endorsement in History (K-8) should see an adviser in the Department of Curriculum and Instruction.

**Mathematics (grades K-8)**

Students seeking an additional endorsement in mathematics (K-8) should see an adviser in the Department of Curriculum and Instruction.

**Middle School (grades 5-8)**

Students seeking an additional endorsement in Middle School (5-8) should see an adviser in the Department of Curriculum and Instruction.

**Reading (grades K-8, 5-12)**

The Curriculum and Instruction Department offers courses that can lead to a reading endorsement for grades K-8. This department collaborates with the English Department to offer the necessary coursework for a 5-12 reading endorsement.

Students seeking an additional endorsement to teach elementary reading (K-8) should see a Department of Curriculum and Instruction adviser.

Students seeking endorsement to teach reading (5-12) as an additional endorsement must earn credits in the following courses:

- Foundations of Reading and Reading in the Content Area: CI 395/595 or CI 551 and C (Eng) 494.
- Practicum: C (Eng) 488/588
Courses primarily for undergraduate students

H. Honors Section. (Honors Program students only.)

T SC 343. Philosophy of Technology. (Cross-listed with Phil). (3-0) Cr. 3. F. Prereq: 6 credits of social science or T SC 341 and 3 credits of social science. Moral and other philosophical problems related to developments in technology. Topics may include conditions under which technological innovations contribute to human emancipation, relationship of technology and democracy, utility and limits of technical rationality, and problems of ensuring that benefits of technological advance are communally shared. Topics discussed with reference to such issues as contemporary developments in microelectronics, technology transfer to the Third World, etc. Nonmajor graduate credit.

T SC 474. Communication Technology and Social Change. (Cross-listed with Jl MC). (3-0) Cr. 3. Prereq: Junior classification. Examination of historical and current communication technologies, including how they shape and are shaped by the cultural and social practices into which they are introduced.

Courses primarily for graduate students, open to qualified undergraduate students

T SC 543. Technological Innovation, Social Change, and Development. (3-0) Cr. 3. Alt. F, offered 2010. Prereq: 6 credits in social sciences. Sources, theories and models of technological innovation; social and institutional contexts of technology transfer; appropriate/intermediate technology; issues and methods of impact assessment; planning technology related social change; development control of technological innovations and application; local and international case studies.

T SC 574. Communication Technologies and Social Change. (Cross-listed with Jl MC). (3-0) Cr. 3. Prereq: 6 credits in social science. Personal, organizational, and social implications of the use of communication technologies. Includes theories and empirical research across the continuum of perspectives, from technopatriotism through an anti-technology stance.

Technology Systems Management

(Administered by the Department of Agricultural and Biosystems Engineering)

Rameshwar Kanwar, Chair of Department
Distinguished Professor: Brown
Distinguished Professor (Emeritus): H. Johnson
University Professor: Bern
University Professors (Emeritus): Baker

Professors: Chen, Downing, Glanville, Harmon, Hoff, Hurburgh, L. Johnson, Kanwar, Misra, Schwab, Van Leeuwen, Xin

Professors (Emeritus): Beer, Bekkum, Buchele, Bundy, Hazen, Hoerner, Keeney, Lovely, Maney, Mangold, Marley, Melvin, Miller, Pedersen, Riley, R. Smith

Professor (Collaborator): Laijen

Associate Professors: Anex, Bhandari, Birrell, Brumm, Burns, Freeman, Koziel, Mickelson, Raman, Stewart, Tim

Associate Professors (Emeritus): Anderson, Greiner, Lorimer

Associate Professor (Collaborator): Han

Assistant Professors: Grewell, Helmers, Kaleta-Forbes, Keren, Kim, Soupir, Tang, Yu

Assistant Professors (Emeritus): Boyd, Bradshaw

Assistant Professors (Adjunct): Ianyang, Shaham, Tong

Assistant Professors (Collaborators): Dunn, Malone

Lecturer: Snell

Undergraduate Study

The Department of Agricultural and Biosystems Engineering offers work for the bachelor of science degree with majors in agricultural systems technology and industrial technology, (see College of Agriculture, Curricular).

Goals: The mission of the Agricultural Systems Technology program is to prepare women and men for careers that integrate and apply agricultural and biosystems engineering technology to lead and manage human and natural resource systems for producing, processing, and marketing food and other biological products worldwide.

The mission of the Industrial Technology is to prepare women and men for careers that integrate and apply industrial technology to lead and manage human, manufacturing, and safety systems.

Objectives: At two to five years after undergraduate graduation, through the professional practice in technology, graduates should:

1. Have demonstrated competence in methods of analysis involving use of mathematics, fundamental physical and biological sciences, technology, and computational tools needed for the professional practice in the field of agricultural systems technology or industrial technology.

2. Have developed skills necessary to contribute to the design process; including the abilities to think creatively, to formulate problem statements, to communicate effectively, to synthesize information, and to evaluate and implement problem solutions.

3. Be capable of addressing issues of ethics, safety, professionalism, cultural diversity, globalization, environmental impact, and social and economic impact in professional practice.

4. Have demonstrated continuous professional and technical growth, with practical experience, so as to be licensed in their field or achieve that level of expertise, as applicable.

5. Have demonstrated the ability to:
   a. be a successful leader of multi-disciplinary teams.
   b. efficiently manage multiple simultaneous projects.
   c. work collaboratively.
   d. implement multi-disciplinary systems-based solutions.
   e. apply innovative solutions to problems through the use of new methods or technologies.
   f. contribute to the business success of their employer, and
   g. build community.

Outcomes: At the time of graduation, students of the Agricultural Systems Technology or Industrial Technology programs should have:

a) an ability to apply knowledge of mathematics, science, technology, and applied sciences;

b) an ability to design and conduct experiments, as well as to analyze and interpret data;

c) an ability to formulate or design a system, process or program to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability;

d) an ability to function on multi-disciplinary teams;

e) an understanding of professional and ethical responsibility;

f) an ability to communicate effectively;

g) the broad education necessary to understand the impact of solutions in a global, economic, environmental, and societal context;

i) a recognition of the need for, and an ability to engage in life-long learning;

j) a knowledge of contemporary issues; and

k) an ability to use the techniques, skills, and modern scientific and technical tools necessary for professional practice.

Graduates have developed and demonstrated workplace competencies, and have completed a professional internship. They are able to communicate effectively, have problem-solving skills and awareness of global, economic, environmental and societal issues.

Agricultural Systems Technology graduates have the ability to apply science and technology to problems related to agriculture; they manage complex agricultural systems for sustainability. They find careers within a variety of agriculturally-related industries, businesses, and organizations, including: agricultural machinery, environment, government, farm builders, grain, feed, seed, fertilizer, chemical, food, biorenewable resources, and production agriculture.

Industrial Technology graduates understand commonly-used manufacturing processes, lean manufacturing principles, continuous improvement, quality management, safety, regulatory issues affecting manufacturing, and the properties of manufacturing materials. They find careers within a variety of industries, businesses, and organizations focusing in manufacturing (e.g., quality control, production supervision, and process and facility planning) or occupational safety (e.g., development, management, and evaluation of safety programs and systems; and hazard identification and mitigation).

Certificate: The Department of Agricultural and Biosystems Engineering offers a undergraduate certificate in occupational safety which may be earned by completing a minimum of 20 credits of technology systems management courses, which includes TSM 27, 272, 370, 372, 470, and 4930, plus an additional 6 credits from a departmentally approved list.
learns, interconnectedness of the individual, the community, and the world.

TSM 114. Developing Responsible Learners and Effective Leaders. [Cross-listed with FS HN, Hort, NREM]. (2-0) Cr. 2. S. Focus on team and community leadership; application of fundamentals of human learning; evidence of development as a responsible learner; intentional mental processing as a habit of mind; planning and facilitating learning opportunities for others; responsibility of the individual to the community and the world; leading from within; holding self and others accountable for growth and development as learners and leaders.

TSM 115. Solving Technology Problems. (2-2) Cr. 3. F. Problem solving and presenting solutions through technical reports. Unit conversions, unit factor method, SI units, significant digits, graphing and curve fitting. Use of spreadsheet programs to solve and present technology problems. Solution of technology problems using computer programming languages.

TSM 116. Introduction to Technology. (2-2) Cr. 3. F. 2D projections and 3D representations of objects, national and international standards for documentation, manufacturing processes, design projects, and teamwork. Free-hand sketching techniques and parametric solid modeling will be covered.

TSM 201. Entrepreneurship and Internship Seminar. (Cross-listed with A E, BSE, HNB, Cr. 1. Prereq. Sophomore standing in AE, AST, or IE. 8 week course. Overview of the entrepreneurial process and its importance in the economy and the engineering/technical workplace. Preparation for internship experiences. Relationship of workplace competencies to entrepreneurship, intrapreneurship, and internships; portfolios.

TSM 210. Fundamentals of Technology. (3-0) Cr. 3. F. Principles and management of objects, national and international standards for documentation, manufacturing processes, design projects, and teamwork. Free-hand sketching techniques and parametric solid modeling will be covered.

TSM 240. Introduction to Manufacturing Processes. (1-4) Cr. 3. F. A study of selected materials and related processes used in manufacturing. Lecture and laboratory activities focus on materials, properties, and processes. This includes plastics and metals.

TSM 270. Principles of Injury Prevention. (3-0) Cr. 3. F. Basic foundations of injury causation and prevention in home, motor vehicle, public, and work environments.

TSM 272. Occupational Safety Management. (2-0) Cr. 2. F. Introduction to occupational safety and health administration and management. Focus on development and management of safety programs and obtaining employee involvement in occupational safety programs.

TSM 276. Fire Protection and Prevention. (3-0) Cr. 3. F. Understanding the current problems and technologies in the fields of fire protection and fire prevention, with emphasis on industrial needs, focusing on the individual with industrial safety responsibilities.

TSM 301. Leadership and Ethics Seminar. (Cross-listed with A E, BSE). (1-0) Cr. 1. F. Prereq. 201. 8 week course. Leadership and ethics experiences through case studies and seminar presentations by practitioners. Relationship of workplace competencies to leadership and ethics; portfolios.

TSM 310. Total Quality Improvement. (3-0) Cr. 3. S. Prereq. Stat 101 or 104, junior classification. Introduction to the fundamental concepts of TQM - Deming style of management, statistical studies to understand the behavior of products, processes, or services, and how to define and document processes and customer focus. Introduction to continuous improvement tools and methods - DMAIC, SPC, and Design of experiments; emphasis on team work and problem solving skills.

TSM 322. Preservation of Grain Quality. (2-3) Cr. 3. S. Prereq. Math 140 or higher. Principles and management for grain quality preservation. Grain drying and storage. Fans and airflow through grain. Grain handling methods and system planning. Grain quality measurement and end-use value analysis.

TSM 324. Soil and Water Conservation Management. (3-0) Cr. 3. S. Prereq. Math 140 or higher. Principles of management for soil and water control structures, water quality management, and drainage and irrigation systems.

TSM 325. Biorenewable Systems. (Cross-listed with A E, Agron, An S, Engr, BusAd, Econ). (3-0) Cr. 3. F. Prereq. Econ 101, Chem 159 or higher, Math 140 or higher. Converting biorenewable resources into bioenergy and biobased products. Biorenewable concepts as they relate to drivers of change, feedstock production, processes, products, co-products, economics, transportation/logistics, and marketing.

TSM 330. Agricultural Machinery and Power Management. (3-0) Cr. 3. S. Prereq. Math 140 or 160. Introduction to technology and conservation principles applied to the planning of erosion control systems, water control structures, water quality management, and drainage and irrigation systems.

TSM 335. Tractor Power. (3-3) Cr. 4. F. Prereq. 210, Math 142 or higher. Theory of tractor engines, mechanical power trains and hydraulic systems. Introduction to traction, chassis mechanics, and hydraulic power.

TSM 370. Occupational Safety. (3-0) Cr. 3. S. Prereq: 270, junior standing. Identifies safety and health risks in industrial work environments. Focus on how managers and supervisors meet their responsibilities for providing a safe workplace for their employees. Includes the identification and remediation of workplace hazards. Nonmajor graduate credit.

TSM 372. Legal Aspects of Occupational Safety and Health. (3-0) Cr. 2. F. Prereq: 272. Legal implications of legislation as it applies to health and safety in the workplace. Includes OSHA regulations, worker’s compensation, and workplace liability.

TSM 397. Internship in Technology. Cr. F. F.S.S. Prereq: At least 45 credits of coursework, in AST or I Tec major, and approval of internship coordinator. A supervised work experience in an approved learning setting with application to technology practices and principles. Reporting during work experience and self and employer evaluation required. Minimum GPA requirement.

TSM 399. Work Experience in Technology. Cr. 2. Repeatable. F.S.S. Prereq: 397 and approval of instruc- tor. Written reports and reflection on work experience. A maximum of 4 credits of TSM 399 may be used toward the total credits required for graduation.

TSM 408. Interdisciplinary Problem Solving. (Cross-listed with I E, E E). (3-0) Cr. 3. F. S. Prereq: Junior or senior classification. Use of the Theory of Constraints as a way of approaching problem solving, win-win negotiation, project planning and effective delegation in the context of engineering/business systems. Team process in improving design outcomes. Nonmajor graduate credit.

TSM 409. Interdisciplinary Systems Effectiveness. (Cross-listed with I E, E E). (3-0) Cr. 3. F. S. Prereq: Junior or senior classification. Focus on functions that determine the effectiveness of an entire organization. Generic Theory of Constraints solutions to production, distribution, and manufacturing. Systems are compared to traditional solutions. Strategy for improvements discovered using simulations. Nonmajor graduate credit.

TSM 415. Technology Capstone I. (1-2) Cr. 2. F. S. Prereq: senior classification. Team development, communica- tions, and presentation of current technological problems in agricultural and industrial systems. Development of alternate solutions using creativity, critical analysis, and planning techniques.

TSM 416. Technology Capstone II. (1-2) Cr. 2. F. S. Prereq: 415. Selection of promising potential solutions to technology problems identified in 415 for development and analysis by student teams. Preparation of project through oral presentations, written reports, and working prototypes.

TSM 424. Impacts of Agriculture on Water Quality. (3-0) Cr. 3. F. Prereq: Math 140 or 160, one of the follow- ing: 324, Agron 154. Water use and water quality standards; characteristics of surface and groundwater resources; types of agricultural water pollutants and their impacts on water quality; how agricultural pollutants move and enter water resources; manage- ment practices to reduce ag pollutant movement and protect water resources. Nonmajor graduate credit.

TSM 443. Statics and Strength of Materials for Technology. (2-2) Cr. 3. F. S. Prereq: AE 271 or 272; Phys 111. Application of standard analytic and com- puter based techniques of solving problems related to force and moment. The properties of material and how to select appropriate materials for a particular design is reviewed.

TSM 444. Facility Planning. (3-0) Cr. 3. S. Prereq: 216 and 240; Stat 101 or 104. Principles and practices in designing, evaluating, and organizing existing facilities or creating new facilities. Use of AutoCAD- based new facility design project - product design, production flow analysis, activity relationship analysis, layout deployment, materials handling, office and other service requirement design, and the necessary cost analysis for the new facility.

TSM 445. Polymer and Composite Processing. (2-2) Cr. 3. S. Prereq: 240 or equivalent. Design and pro- duction of plastic parts including thermoplastics and thermoset/composites. A study of plastic properties and their relationships to processing parameters and control techniques. Applying advanced CAE technol- ogy to check process feasibility, determine optimal process conditions, evaluate part and mold designs, and estimate the cost of plastic injection processes.

TSM 470. Industrial Hygiene: Physical, Chemical, and Biological Hazards. (3-0) Cr. 3. S. Prereq: 272; Math 160 or higher. A qualitative and quantitative introduction to health effects of chemical, biological, and physical hazards in a workplace. Nonmajor graduate credit.

TSM 471. Safety Laboratory. (2-0) Cr. 1. S. Prereq: 470 (can be taken concurrently). Introduction to equipment, methods, and strategies to measure, evaluate, control, and research hazards and risk in the workplace.

TSM 477. System Safety Analysis. (Dual-listed with 577). (3-4) Cr. 3. F. Prereq: Math 160, Stat 101 or 104. System safety focuses on developing a safety orient- ed pattern of thinking that is appropriate for today’s complex systems. The tools that will be gained in this course will be helpful in recognizing, understanding, and analyzing hazards in modern complex systems.

TSM 490. Independent Study. Cr. arr. Repeatable. Prereq: Junior or senior classification, permission of instruc- tor, and completion of an independent study contract and approval by department. A maximum of 4 credits of TSM 490 may be used toward the total credits required for graduation.

H. Honors
I. Manufacturing
J. Agriculture and Biosystems Management
M. Machine Systems
O. Occupational Safety

TSM 491. Seed Science Internship Experience. (Cross-listed with Agron, Hort). Cr. arr. Repeatable. F.S.SS. Prereq: Agron 338, advanced approval and par- ticipation of employer and instructor. A professional work experience and creative project for seed science secondary majors. The project requires prior approval and participation of the employer and instructor. The student must submit a written report.

Courses primarily for graduate students, open to qualified undergraduate students

TSM 541. Comprehensive Modern Manufactur- ing Systems. (3-0) Cr. 3. S. Prereq: Permission of instructor. The study, design, and implementation of PULL manufacturing systems and their integra- tion with functions of the production system for the manufacture of superior quality, low cost products. Topics include lean manufacturing system design, cost estimation/justification, JIT manufacturing, integrated quality and process control, automation, and CAD/CAM.

TSM 545. Manufacturability of Plastics. (2-2) Cr. 2. Prereq: Permission of instructor. Overview of current business environment and issues related to design for manufacturability of plastic products. Provide understanding of available materials and processes in manufacturing plastic products and molding. Focus on using modeling techniques for an in-depth study of five elements for making suc- cessful plastic products; consumer input, part design, mold design, material selection, and manufacturing process. Computer-aided engineering exercises and laboratory practices included.

TSM 575. Safety and Public Health Issues in Mod- ern Society. (2-9) Cr. 2. Exploration and analysis of current safety and public health issues impacting soci- ety. The focus will be on topics that impact individuals in work, public, and home environments.

TSM 577. System Safety Analysis. (Dual-listed with 477). (3-0) Cr. 3. F. Prereq: Math 160, Stat 101 or 104. System safety focuses on developing a safety orient- ed pattern of thinking that is appropriate for today’s complex systems. The tools that will be gained in this course will be helpful in recognizing, understanding, and analyzing hazards and risks in modern complex systems.

TSM 590. Special Topics in Technology. Cr. arr. Re- peatable. Prereq: Graduate classification in industrial and agricultural technology, permission of instructor, and completion of an independent study contract approved by major professor. A. Agriculture and Biosystems Management B. Machine Systems
TSM 699. Technical Communications for a Doctoral Work Period. Satisfactory-fail only.

TSM 655. Academic Leadership in Technology and Engineering. (3-0) Cr. 3. Prereq: Permission of instructor. A definition of the faculty role in technology and engineering disciplines, including strategies for dealing with programs, personnel, and constituencies. Leadership skills involving team formation, team operation, and conflict resolution are addressed.

TSM 660. Graduate Seminar. (Cross-listed with A E) Cr. 1. F.S.S. Cr. arr. Repeatable. F .S.SS. A technical paper draft based on dissertation is required of all Ph.D. students. This paper must be in a form that satisfies the requirements of some specific journal. Satisfactory-fail only.

Textiles and Clothing
(Administered by the Department of Apparel, Educational Studies, and Hospitality Management)

Robert Bosselman, Chair of Department
Distinguished Professors (Emeritus): Fanslow, Moyer, Winiker
University Professor (Emeritus): Farrell-Beck
Professors: Bosselman, Damhorst, Fiore, Kadolph
Professors (Emeritus): Anderson, Beavers, Brun, Burnett, Cowan, Crabtree, Gilmore, Smith, Stone, Williams
Associate Professors: Baltzer, Hausafus, Niehm, Parsons
Assistant Professors (Emeritus): Amos, Brackelsberg, Brown, Ebert, Huss, Kundel, Kunz, Walsh
Associate Professor (Adjunct): Stroehbehn
Assistant Professors: Barker, Hurst, Karpova, Keino, Y. Lee, Marchetti, Rajagopal, Wohldorf-Arendt, Zheng
Assistant Professor (Adjunct): Glock
Instructor (Adjunct): Fratzke
Lecturers: Ackerman, Burger, Christensen, Fihrt, Fitzpatrick, Kramer, M. Lee, Sanger, Trost, Wirth, Wise

Undergraduate Study
The program offers study for the degree of bachelor of science with a major in apparel merchandising, design, and production (AMDP). The program offers students a broad understanding of textile and apparel products, merchandising and marketing strategies, technical and creative design, product development, production processes, and business practices leading to a wide range of careers at state, national, and international levels in business and industry. Courses in the program provide scientific, technical, and humanistic knowledge about textiles, apparel, and related products basic to career preparation. Courses also provide knowledge applicable to the development and use of apparel and textile products by individuals, families, and institutions. The program provides a foundation for graduate study. Graduates understand the production, distribution, and use of textiles and apparel, aesthetic expression, and communication. They are prepared to plan, develop, and present textile and apparel products to meet the needs of consumers. They understand the issues involved in textile and apparel production and marketing, both nationally and internationally. Graduates appreciate the interdependence of nations and cultures as producers and consumers of textile products.

The AMDP major provides a broad-based program of study with flexibility in creating an individualized program. To complete the program, a student combines general education, AMDP core classes, and structured clusters of courses to form an option in merchandising, creative design, technical design, product development, or production and sourcing management.

An option in merchandising prepares students for the planning, development, and presentation of market-oriented product lines and events. Career opportunities are in product development, buying, promotion, and management in both manufacturing and retailing sectors with a focus on the textile and apparel industry. An option in creative design is appropriate for those interested in the aesthetic and creative aspects of design, product or line development, or promotion of textiles and apparel.

An option in technical design prepares students for careers in technical design, product development, and quality assurance. An option in product development is appropriate for those interested in both designing and merchandising products or lines for consumer groups. Students in design have a review of their design skills after T C 225 and T C 278.

In addition, a student in merchandising or production and sourcing management selects a secondary option from business and entrepreneurship, consumer behavior/marketing, communications/publications, history/museum studies, human resource management, international trade, or public relations/management. The combinations of primary and secondary options allow students to individualize their programs.

For additional courses of interest, see Apparel, Educational Studies, and Hospitality Management.

The program offers a minor in apparel merchandising, design, and production. The minor can be earned by taking T C 131 or 165; 204; 231, 245, or 275; 6 credits at the 300-400 level; for a total of 16 to 17 credits.

Graduate Study
The program offers work for the master of science and doctor of philosophy with a major in textiles and clothing. The program also participates in the Master of Family and Consumer Sciences degree by offering a specialization within that program. For all programs the field of study is highly interdisciplinary; programs of study are tailored to students’ background and interests.

Graduates understand how textiles and apparel are essential in meeting individual and societal needs and understand the interdependence of nations and cultures as producers and consumers. Graduates understand diverse philosophies of scholarship and apply multiple methods to creative activity, research, and teaching. Strong writing and oral communication skills help graduates disseminate scholarship and compete successfully for awards and grants.

Graduates accept positions relevant to their academic experience. All doctoral graduates have teaching experience. Masters and doctoral graduates have experience working in team-oriented and interactive environments. Graduates are prepared to adapt to future changes in their professions and to provide leadership in professional and public practice. They bring a strong sense of ethics to research, teaching, and business endeavors.

Program emphases for graduate study include consumer behavior; entrepreneurship; merchandising and marketing aspects of textiles and clothing; acquisition and use of textiles and apparel within cultural, state, or university conference/event as long as the presentation content and form conforms to normal expectations. Satisfactory-fail only.

The program participates in the interdepartmental gerontology minor.

**Courses primarily for undergraduate students.**

T C 131. Overview of the Fashion Industry. (3-0) Cr. 3. F.S. Introduction to fashion industry, industry structure from concept to consumer. Focus on fashion-driven consumer goods.

T C 165. Dress and Diversity in Society. (3-0) Cr. 3. F.S.SS. Examination of diversity among consumers and forecasting future trends in consumer behavior. Social responsibility issues related to appearance.

T C 221. Apparel Assembly Processes. (1-4) Cr. 3. F.S.SS. Prereq: 204 or concurrent. Principles of garment assembly. Use of mass production equipment and methods to analyze, develop and assemble garments.

T C 278. Fashion Illustration. (0-8) Cr. 3. F.S. Prereq: 131, 245 or concurrent enrollment. Permission of instructor. Development of drawing skills, including line, shape, perspective and value. Introduction to drawing the fashion figure and apparel using a variety of media. Fashion presentation and introduction to portfolio development.

T C 301. Basic Design Concepts Review. Cr. 1. Repeatable maximum of 2 credits. F.S. Prereq: Completion or enrollment in 225, 278. Permission of instructor. Project review and skill assessment related to 2-dimensional and 3-dimensional visualization, apparel assembly, basic product knowledge, design problem solving. Review of fashion illustration, textiles, flat pattern, basic apparel assembly, design problem solving. Satisfactory-fail only.

T C 326. Creative Design Processes. (Dual-listed with 526). (2-2) Cr. 3. F.S. Prereq: 325 or concurrent enrollment. Permission of instructor. Exploration of the creative process and sources of inspiration with emphasis on fashion presentation and design development for a variety of markets. Continued development of fashion illustration techniques. Use of traditional and non-traditional materials to create innovative garments.

T C 354. History of European and North American Dress. (3-0) Cr. 3. F. Prereq: 3 credits from Hist or Art H. Survey of history of dress from ancient times through present; focus on European and North American dress. Emphasis on connection of dress to the social, cultural, environmental, and technological contexts of the Western world. Nonmajor graduate credit.

T C 356. History of Twentieth Century Fashion. (Dual-listed with 556). (3-0) Cr. 3. S. Prereq: 3 credits from Hist or Art H. C T 204 recommended. Survey of major design and technological developments in 20th Century fashion. Emphasis on fashion as a system of design and production, culture of consumption, fashion change, and trends in art, society, and culture.

T C 362. Cultural Perspectives in Dress. (3-0) Cr. 3. S. Prereq: 165 or 3 credits in anthropology, psychol or sociology. Analysis of multiple factors related to dress in selected societies, including technology, aesthetics, social organization, ritual, stability and change. Applications to apparel business.

T C 372. Sourcing and Global Issues. (3-0) Cr. 3. F.S. Prereq: 231, AESHM 275; Econ 101 or 102 recommended. Evaluation of key issues facing textile and apparel businesses in global markets considering ethical, economic, political, social, and professional implications. Sourcing strategies in a global environment. Corporate and consumer social responsibility.

T C 376. Merchandise Planning and Control. (2-2) Cr. 3. F.S. Prereq: AESHM 275; Acct 284. Assortment planning, model stocks, budget development, retail math, buying concepts and strategies.

T C 377. Brand Management and Promotions. (3-0) Cr. 3. F.S. Prereq: 245; AESHM 340 or Mkt 340. Principles of brand image development and management; focus on experiential marketing, promotions, store design/layout, visual merchandising concepts.

T C 380. Field Study. Cr. arr. Repeatable. F.S.SS. Prereq: 9 credits in T C, junior classification, minimum 2.0 GPA. Permission by application. Study of and tours of textile and apparel manufacturers, forecasting firms, design studios, showrooms, markets, retailers, museums, testing laboratories, trade seminars and exhibitions, and other areas of interest within the textile and apparel industry. Countries vary. A. Pre-trip Orientation. Cr. R. Orientation to the international locations during semester preceding trip. B. Field trip. Cr. 1. Trip to international location under supervision of faculty member. Reports required.

T C 381. International Field Study. Cr. arr. Repeatable. Alt. S., offered 2010. SS. Prereq: 9 credits in T C, junior classification, minimum 2.0 GPA. Permission by application. Study of and tours of textile and apparel manufacturers, forecasting firms, design studios, showrooms, markets, retailers, museums, testing laboratories, trade seminars and exhibitions, and other areas of interest within the textile and apparel industry. Countries vary. A. Pre-trip Orientation. Cr. R. Orientation to the international locations during semester preceding trip. B. Field trip. Cr. 1. Trip to international location under supervision of faculty member. Reports required.

T C 398. Cooperative Education. Cr. R. F.S.SS. Prereq: Permission of department chair, junior classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

T C 404. Textile Science II. (Dual-listed with 504). (3-0) Cr. 3. Alt. F., offered 2010. Prereq: 204, 245; one natural science course. Theories and principles of textile science; emphasis on fiber chemistry, performance and smart textiles, dyeing, and detergency.

T C 467. Consumer Behavior. (3-0) Cr. 3. F. Prereq: Start 101 or 104 or 226; T C 165. Application of concepts and theories from the social sciences to the study of consumer behavior related to appearance. Experience in conducting market and consumer research.

T C 470. Supervised Experience. Cr. 3. Repeatable. F.S.SS. Prereq: 311 and minimum 2.0 GPA; permission by application; junior or senior classification. Supervised work experience with a cooperating firm or organization.

A. Textile Industry. Prereq: 305.

B. History of Dress and Textiles. Prereq: 6 credits from 257, 354, 356 or 362; 3 credits in anthropology or history recommended.

M. Museum. Prereq: 257.

N. Apparel Production Management. Prereq: 431

Q. Quality Assurance. Prereq: 305.

T. Public Relations and Publishing. Prereq: T C 275 and Advt 230; JI MC 220 or JI MC 305.

V. Sourcing and Global Issues. Prereq: T C 372

T C 475. Retail Information Analysis. (2-2) Cr. 3. F.S. Prereq: 3/6. Forecasting, customer demand, assortment planning, market research, analysis of customer databases, data mining, database interface, pattern recognition, retail technology applications and supply chain/logistics management.
Courses for graduate students
T C 510. Philosophical Issues of Textiles and Clothing Scholarship. (3-0) Cr. 3. Alt. F., offered 2010. Prereq: 2 courses in research methods, 6 graduate credits in textiles and clothing. Models, theory, alterative philosophies, and ethics of science as applied in textiles and clothing scholarship. Grant writing and research program development.

T C 565. Social Science Theories of Appearance. (3-0) Cr. 3. Alt. S., offered 2011. Prereq: 6 credits in sociology or psychology. Analysis of social science theories and concepts applicable to clothing and appearance research. Emphasis on qualitative research and philosophy of knowledge, including postmodern, symbolic interaction, semantic, and feminist theories.

T C 575. Research in Merchandising. (3-0) Cr. 3. Alt. F., offered 2009. Prereq: AESHM 275 or equivalent. Merchandising and related marketing theory, research processes, and methods. Experience in conducting research; prepare manuscripts for academic, industry and lay audiences.

T C 590. Advanced Topics. Cr. arr. Repeatable. Prereq: Enrollment in doctoral program, permission of instructor, and approval of D.O.G.E.

Theatre and Performing Arts
www.theatre.iastate.edu
(Administered by the Department of Music)
Performing Arts graduates will understand and demonstrate: 1) Knowledge of the cultural heritage and history of the Performing Arts 2) A theoretical and experiential background in the areas of performance, theatrical design, music, and dance 3) Knowledge of creative problem solving and artistic collaboration 4) Skills necessary to perform in or design for a variety of periods, styles, and genres in theatre and dance 5) Awareness of the diversity of expression in the Performing Arts throughout the world's cultures 6) A practical understanding of the rigors of the field.

Assessment measures include the semester exhibit of design work or audition pieces, graduating senior seminar and exit interviews, public performances or design courses, exhibited convention work, and internship evaluations.

Undergraduate Study
Students interested in theatre as a major area of concentration declare a major in Performing Arts and select an emphasis in Theatrical Design or Acting/Directing. Students implement the theories and principles explored in the classroom by participating in production work. During the academic year, Iowa State University Theatre presents up to ten mainstage and second stage productions in Fisher Theater, and works in close collaboration with ISU Music and Dance.
The major in Performing Arts offers the undergraduate student a cross-disciplinary concentration in Music, Dance and Theatre. The core curriculum consists of 24 credits in the three areas. Students select a 24-credit emphasis in either Dance, Theatrical Design or Acting/Directing. In addition to coursework, Performing Arts majors and minors participate in concert (Orchests, Footfalls), workshop (Opera Studio, Minority Theatre Workshop) and production (Barchie, Stars Over Veishea, ISU Theatre/Music/Theatre/Second Stage and Studio) experiences.

Performing Arts graduates, in addition to a solid theoretical and experiential background in the areas of performance, theatrical design, dance and music, are prepared to meet the challenges of the work force or graduate school with their strengths in collaboration, creative problem solving, meeting deadlines and processing diverse input to yield cohesive output. Two required professional internships prior to graduation are vital to the student's appreciation and practical understanding of the rigors of the field.

The theatre area offers a wide variety of courses. Students may select from courses in acting, design (costume, scenic, lighting/sound), make-up, stage direction, playwriting, stage management, and theatre history. Independent study and special topics courses supplement formal course offerings to provide opportunities to intensify study in a particular aspect of theatre.

Auditions for ISU Theatre productions are open to all students irrespective of academic major. Similarly, participation in areas of production other than acting is open to both majors and nonmajors. Qualified students also present experimental, laboratory, and Minority Theatre Workshop productions. Student actors, directors, designers, and technical crew heads are required to maintain a grade point average of at least 2.0 to participate in productions.

Theatre scholarships are awarded on a yearly basis to students who make significant contributions to Iowa State University Theatre.

Bachelor of Arts - Performing Arts Major (Perf)

The Core for the Performing Arts Major (24 cr)

(For individual Dance and Music course descriptions, see Index for individual department listing.)

Music 101, 102
Dance 120-Modern Dance, 130–Ballet I, 220-Modern Dance Composition
Dance 270–Dance Appreciation

Thre 255, 263, 365
Perf 105–(six semesters), Perf 310 (2), Perf 401
Emphasis in Theatrical Design (24 cr)

Thre 250 (2 cr), 360, 366, 451, 461, 465, 466, 467
Music 133
Emphasis in Dance (24 cr)

Art 292, Music 133, Ex Sp 355
Dance 222, 224 (2 cr), 232, 360, 370
Select 2 credits from: Dance 140, 150, 160, 170, 211 (instead of 160, 170)
Select 2 credits from: Dance 223, 233, 242, 243, 262
Select 3 credits from: Dance 320, 384, 385, 386
All students enrolled in the Dance Emphasis must register for one dance technique course every semester of residence up to a total of 8 credits

and must complete one computer course (CS 103, 107, 207, C 1 201).

Emphasis in Acting/Directing (24 cr)

Thre 151, 250 (2 cr), 251, 351, 451, 455, 465, 466
Music 133

Minor in Performing Arts (21 cr)

Perf 105 (three semesters)
Mus 101, 102
Dance 120 or 130, 270
Thre 255, 263 or 251
plus six credits 300+ in Dance, Thre or Perf

Graduate Study

The department offers graduate courses as supporting work in other fields.

Performing Arts

Courses primarily for undergraduate students.

Perf 105. Issues in the Performing Arts. (1-8) Cr. R.

Cross-disciplinary analysis and discussion of topics in the performing arts. Six semesters required of performing arts majors.

Perf 310. Performing Arts Internship. Cr. R.

Required of performing arts majors. A job or internship with a professional or semi-professional performing arts organization. Satisfactory-fail only.

Perf 401. Performing Arts Seminar. (2-0) Cr.

S. Intensive collaborative study and practice of topics in music, dance and theatre. Required of performing arts majors. Nonmajor graduate credit.

Theatre

Courses primarily for undergraduate students.

Thre 106. Introduction to the Performing Arts. (3-0) Cr. Cr. F.

An audience oriented, broad-based, team-taught survey of the performing arts which emphasizes theatre and includes segments on television, radio, film, dance, and music.

Thre 110. Theatre and Society. (3-0) Cr.

F.

An introduction to Theatre focusing on its relationship with society throughout history.

Thre 151. The Actor's Voice. (3-0) Cr.

S. Study and practice of fundamentals of vocal production; breathing, quality, articulation, projection, and expressiveness for the performing artist.

Thre 224. Concert and Theatre Dance. (Cross-listed with DANCE). (0-3) Cr. arr.

Repeatable. F.

Cross-listed with DANCE. (0-3) Cr. arr.

Repeatable. F. Prerequisite: Engl 250; non open to freshmen. Progresses from production of scenes to fully developed one-act plays. Emphasis on action, staging, writing, analytical reading, workshop criticism, and individual conferences. Nonmajor graduate credit.

Thre 351. Acting II. (3-0) Cr.

S. Prerequisite: 251. Dance 120 recommended. Theory and practice of techniques of acting with emphasis on character and scene analysis.

Thre 352. Stage Combat. (2-0) Cr.

S. Prerequisite: 351. Theory, history, and practice of theatrical combat. Includes tumbling, hand-to-hand, quarterstaff, broadsword, rapier, and dagger.

Thre 354. Musical Theatre I. (2-0) Cr.

Prerequisite: 251 or Music 232 or 3 credits in Dance. Theory, history and practice of musical theatre techniques. Designed to develop the musical theatre performance skills of singers, dancers, and actors.

Thre 355. Musical Theatre II. (2-0) Cr.

Prerequisite: 354. Theory, history and practice of musical theatre techniques. Designed to develop the musical theatre performance skills of singers, dancers, and actors.

Thre 357. Stage Make-up. (2-0) Cr.

F. Theory and practice of make-up and hair-styling techniques for the performing arts: Theatre, Opera, Dance, Television and Film. Lab required.

Thre 358. Oral Interpretation. (3-0) Cr.

S. Prerequisite: 3 credits in theatre. Offered to explore special topics.

A. Minority Theatre B. Repertory C. Children's Theatre D. Musical Theatre E. Creative Dramatics F. International Storytelling

Thre 451. Acting III. (3-0) Cr.

F. Prerequisite: 351 and permission of instructor. Analysis and practice of period scenes.

Thre 455. Directing I. (3-0) Cr.

F. Prerequisite: 255; 263; 270. Recommended. Theory, techniques and practice of directing.

Thre 456. Directing II. (2-2) Cr.

S. Prerequisite: 455. Practical and theoretical experience in directing the stage play.

Thre 461. Theatrical Design Studio. (3-2) Cr.

F. Prerequisite: Permission of instructor. Focuses on the art and craft of specific areas of theatrical design. Each semester the student will focus on one or two of the following: scenic, costume, or lighting design.

Thre 465. History of Theatre I. (3-0) Cr.

F. Prerequisite: Hist 201 or equivalent. Theatre history from ancient times to 1800. Nonmajor graduate credit.
Courses primarily for graduate students, open to qualified undergraduate students

Tox 501. Principles of Toxicology. (3-0) Cr. 3. F. Prereq: BBMB 404 or equivalent. Principles of toxicology governing entry, fate, and effects of toxicants on living systems. Includes toxicokinetics and foreign compound metabolism as they relate to toxicification or detoxification. Fundamentals of foreign compound effects on metabolism, physiology, and morphology of different cell types, tissues, and organ systems.

Tox 502. Toxicology Methods. (0-6) Cr. 3. Alt. S., offered 2010. Prereq: Tox 501. Provides demonstrations or laboratory experience in the application of methods used in toxicology, including safety procedures, calculation and data analysis, teratologic and morphologic evaluation, electrophysiologic measures, in vitro enzyme induction/biotransformation, and behavioral toxicology testing.

Tox 504. Toxicology Seminar. (1-0) Cr. 1. Repeatable. F.S.S.S. Prereq: Permission of instructor required. Presentation of a seminar about a current topic in toxicology as part of a weekly series of seminars by graduate students, faculty, and guest lecturers from off campus.

Tox 515. Regulatory Toxicology. (Cross-listed with FS HN). (1-0) Cr. 1. Alt. F., offered 2010. Prereq: BBMB 404 or FSHN 403. Regulation in the real world. Approaches used by toxicologists in regulatory agencies for generating, enforcing and complying with laws and regulations in an unambiguous, defensible manner. Different obligations of scientists in research and regulatory settings. Perform simple risk assessments and suggest ways of dealing with data gaps. Examine strengths and weaknesses of common approaches used by regulatory agencies.

Tox 519. Food Toxicology. (Cross-listed with FS HN, NutS). (3-0) Cr. 3. Alt. F., offered 2010. Prereq: A course in biochemistry. Basic principles of toxicology. Toxicants in the food supply: modes of action, toxicant defense systems, toxicant and nutrient interactions, risk assessment. Only one of Tox 419 and 519 may count toward graduation.

Tox 526. Veterinary Toxicology. (Cross-listed with VDPAM). (3-0) Cr. 1. Alt. F. Prereq: Permission of instructor. A study of disease processes in animals caused by toxicants and the use of differential diagnostic and therapeutic procedures. Emphasis is on use of clinical cases to define mechanism of poisoning, diagnostic and management procedures and public health and food safety issues.

Tox 554. General Pharmacology. (Cross-listed with B M S). (3-0) Cr. 3. S. Prereq: BMS 549 and 552, BBMB 404, 405. General principles: drug disposition; drugs acting on the nervous, cardiovascular, renal, gastrointestinal, and endocrine systems.

Tox 565. Methods of Biostatistics. (Cross-listed with STAT). (3-0) Cr. 3. Alt. F., offered 2009. Prereq: Stat 500 or 401, Stat 543 or 447. Statistical methods useful for biostatistical problems. Topics include analysis of cohort studies, case-control studies and randomized clinical trials, techniques in the analysis of survival data and longitudinal studies, approaches to handling missing data, and meta-analysis. Examples will come from recent studies in cancer, AIDS, heart disease, psychiatry and other human and animal health studies. Use of statistical software: SAS, S-Plus or R.

Tox 575. Cell Biology. (Cross-listed with B M St). (3-0) Cr. 3. F. Prereq: 10 credits in biological science and permission of instructor: A lecturer. Multi-instructor course covering major topics in cell structure and function, including: fundamentals of prokaryotic and eukaryotic cells, types of utilization and conversion of energy, genetic control of cell shape and functionality, internal organization of cells, communication between cells and their environment, development of multicellular systems. Students have to write a term paper.

Tox 590. Special Topics. Cr. arr. Repeatable. Contact individual faculty for special projects or topics. Graded.

Courses for graduate students

Tox 626. Advanced Food Microbiology. (Cross-listed with FS HN, Micro). (3-0) Cr. 3. Alt. S., offered 2011. Prereq: FS HN 420 or 421 or 504. Topics of current interest in food microbiology, including new foodborne pathogens, rapid identification methods, effect of food properties and new preservation techniques on microbial growth, and mode of action of antimicrobials.

Tox 627. Rapid Methods in Food Microbiology. (Cross-listed with FS HN, Micro). (2-0) Cr. 2. Alt. S., offered 2010. Prereq: FS HN 420 or 421 or 504. Provides an overview of rapid microbial detection methods for use in foods. Topics include historical aspects of rapid microbial detection, basic categories of rapid tests (phenotypic, genotypic, whole cell, etc.), existing commercial test formats and kits, automation in testing, sampling, and "next generation" testing formats now in development.

Tox 656. Cellular and Molecular Pathology II. (Cross-listed with V PTH). (3-0) Cr. 3. Alt. S., offered 2010. Prereq: Graduate course in biochemistry, genetics, or cell biology. Cellular and molecular mechanisms of carcinogenesis.

Tox 675. Insecticide Toxicology. (Cross-listed with ENT). (3-3) Cr. 3. Prereq: 501 or Ent 555. Principles of insecticide toxicology; classification, mode of action, metabolism, and environmental effects of insecticides.

Tox 697. Graduate Research Rotation. (0-12) Cr. arr. Repeatable. F.S.S. Prereq: Admission to Toxicology graduate program. Graduate research projects performed under the supervision of selected faculty members in the graduate Toxicology major.

Transportation

www.ctre.iastate.edu/mstrans/
(Interdepartmental Graduate Major)

Supervisory Committee: K. Gkritza, Chair; D. Johnston, M. Crum

Work is offered for the degree master of science with a major in transportation under a cooperative arrangement with various departments including Civil, Construction and Environmental Engineering (CCEE), Community and Regional Planning (CRP), and Logistics, Operations and Management Information Systems (LOMIS). Opportunities are afforded for research in such areas as modeling and performance of transportation systems, highway safety and information systems, remote sensing, environmental analysis, techniques for urban and regional transportation system planning, environmental and social policy analysis of transportation systems, transportation policy analysis, analysis of transportation technologies, commodity distribution, public administration of the transportation planning process, regional development and transportation system interrelationships, transportation economics and finance, and planning for logistics management.

Students majoring in transportation will develop a program of study under the guidance of a program of study committee selected by the student in consultation with and approved by the chair of the faculty supervisory committee. For administrative purposes, the student’s home department will be the department originally admitting the student. A major professor may be selected from any of the three participating departments. A student must designate at least one member of the POS committee from his or her home department, and at least one member from outside the home department.

A student must complete at least 36 credits of acceptable work including preparation of a 6 credit thesis or a 2-3 credit creative component. A structured minor requires 12 credits of approved transportation courses and a thesis or creative component on a transportation related topic.

A required core includes C E 551, Trans 691, Stat 401 and at least one course from all three cooperating departments (CRP, CCEE and LOMIS). Detailed requirements are available from the chair of the supervisory committee.

Graduate students pursuing a major in any of the cooperating departments who have an interest in transportation are encouraged to consider a formal declared minor in transportation. Students considering a declared minor should consult with the chair of the supervisory committee about the requirements for it.

Students typically focus their program of study to support a career in one of five areas: transportation consulting, regional and statewide transportation planning, transportation service operations and management, transportation policy and economic analysis, and transportation planning and operation for local and state governments. Graduates will have specific knowledge in one or more of these focus areas and the skills to conduct research and analysis of transportation issues. These skills allow graduates to be productive immediately in positions related to a focus area or to continue in more advanced transportation graduate work.

Courses primarily for graduate students

Trans 555. Economic Analysis of Transportation Investments. (3-0) Cr. F. Prereq: C E 350 or 355. Application of economic analysis methodologies to evaluate transportation projects. Multi-modal approaches to evaluate impacts of transportation investments and maximize economic efficiency while considering equity and other social issues related to investment options.

Trans 691. Seminar in Transportation Planning. Cr. arr. Repeatable. S. Provides an overview of current transportation issues; lecturers provide seminars on a variety of timely transportation topics.

University Studies

Associate Provost for Academic Programs

Certain interdisciplinary courses are offered through university studies, at the discretion of the associate provost for academic programs and upon the advice of the Faculty Senate Curriculum Committee. No major is available in university studies, but credit obtained through university studies offerings may be applied toward a degree in any of the colleges, consistent with the stipulations of the student’s curriculum.

Requests to make use of U St 290, 490, 590 should be directed to the associate provost for academic programs and should be accompanied by a positive recommendation from the department heads and deans of the instructors making the request. The associate provost for academic programs will refer requests to the Faculty Senate Curriculum Committee which will make recommendations to the associate provost for academic programs regarding their disposition after consultation with appropriate college and university committees.

Courses primarily for undergraduate students.

U St 106. Carver Academy Seminar. (1-0) Cr. 1. F. Prereq: Acceptance in Carver Academy Program, George Washington Carver scholarship recipient. Introduction for Carver Academy students to resources at ISU to supplement classroom learning. Exploration of multicultural communities and leadership opportunities at ISU. Satisfactory-fail only.

U St 115. MVP Seminar. (1-0) Cr. 1. F. Prereq: Recipient of the MVP Award. Orientation to Iowa State University and the MVB Program. Satisfactory-fail only.

U St 116. MGP Seminar. (1-0) Cr. 1. S. Prereq: Recipient of the MGP Award. Orientation to Iowa State University and the MGP Program. Satisfactory-fail only.

U St 120. Student Support Services Program Seminar. (1-0) Cr. 1. S. Prereq: Acceptance in Student Support Services Learning Community. Designed to assist students in developing successful academic strategies to meet demands of college and achieve desired goals. Satisfactory-fail only.

U St 160. Gender Justice. (2-0) Cr. 1. F. Half semester course. Examines the socialization process in the United States and how our perspectives are formed. An introduction to patriarchy, sexism, and all other forms of discrimination. Skills to enhance communication and understanding among women and men will be developed. Satisfactory-fail only.

U St 170. Leadership ISU. (0-2) Cr. 1. F. Prereq: Freshman or sophomore classification. An introductory leadership course for first-year and second-year students. Students will gain a basic understanding of leadership skill development and resources available to student leaders at Iowa State University. Satisfactory-fail only.

University content will be delivered through a variety of methods such as guest speakers, team building exercises, and small group discussions. Students will be expected to
complete several out of class assignments to apply the leadership skills they have learned. Satisfactory-fail only.

U St 290. Independent Study. Cr. arr. Prereq: Permission of the associate provost for academic programs. Independent study on topics of an interdisciplinary nature. Intended primarily for freshmen and sophomores.

U St 301. McNair Scholars Seminar: Orientation to the McNair Program and to Academic Research. (0-2) Cr. 1. F. Prereq: New fall admit to the Ronald E. McNair Postbaccalaureate Achievement Program. Covers program guidelines and requirements, the basics of preparing for the graduate admissions process, and the formulation of a research topic to begin the required research project. Satisfactory-fail only.

U St 302. McNair Scholars Seminar: The Review of Literature and the Methodology. (0-2) Cr. 1. S. Prereq: 301. Covers the review of literature and the methodology components of the required research project. Satisfactory-fail only.

U St 305. Carver Academy Seminar: Community Leaders. (1-0) Cr. 1. F. Prereq: Intended primarily for juniors. Leadership development for Carver Academy students; frameworks for multicultural leadership. Students will research and assess needs for community enhancement projects under faculty supervision. Satisfactory-fail only.

U St 306. Carver Academy Seminar: Community Leaders. (1-0) Cr. 1. S. Prereq: Intended primarily for juniors. Leadership development for Carver Academy students; self-directed development of leadership abilities. Implement student-directed community enhancement projects under faculty supervision. Begin preparation for graduate and professional schools and career placement. Satisfactory-fail only.

U St 311. Leadership Seminar I. (1-0) Cr. 1. Repeatable. Prereq: 111, 115. For students serving as peer mentor first-year seminar leaders under faculty supervision. Development of course facilitation and peer leadership skills. Satisfactory-fail only.

A. Leaders in MVP Seminar
B. Leaders in MVS Seminar

U St 312. Leadership Seminar II. (1-0) Cr. 1. Repeatable. Prereq: 311. For students serving as leaders in Hixson Seminar or MVS Seminar under faculty supervision. Development of course facilitation and peer leadership skills. Satisfactory-fail only.

A. Leaders in Hixson Seminar
B. Leaders in MVS Seminar

U St 336. International Perspectives in Career Development. (3-0) Cr. 3. Students will examine the career development process in the context of pursuing an international career. Topics will include career exploration, the job search, and cultural differences from international points of view. Faculty members will guest lecture on culture, history, economics, environment, and art of the selected country. Following the spring seminar students will participate in a study tour of the selected country where they will visit international employers and historical and cultural sites. Satisfactory-fail only.

U St 401. McNair Scholars Seminar: Data Collection and Data Analysis. (0-2) Cr. 1. F. Prereq: 302. Covers the data collection and data analysis sections of the required research project. Satisfactory-fail only.

U St 402. McNair Scholars Seminar: Final Project. (0-2) Cr. 1. S. Prereq: 401. Final course for second year scholars. Covers data analysis, data clean up, and the writing of the final project. Satisfactory-fail only.

U St 405. Carver Academy Seminar: Fellows. (1-0) Cr. 1. F. Prereq: Intended primarily for seniors. Continued preparation for graduate school, professional school, and career choice. Satisfactory-fail only.

Courses primarily for graduate students, open to qualified undergraduate students

U St 590. Special Topics. Cr. arr. Repeatable. Prereq: Permission of graduate college. Independent study on topics of an interdisciplinary nature. Intended primarily for graduate students.

Veterinary Clinical Sciences

Claire Andreassen, Interim Chair of Department

Professors: Andreassen, Betts, Evans, Hoeffle, Hopkinson, Jergens, Kraus, Merkley, Noux, D. Riedesel, Toombs, Ware, Whiteley

Professors (Emeritus): Carithers, Clark, Eness, Grier, Jackson, Mc Gee

Professor (Collaborator): Carpenter

Associate Professors: Baldwin, Booth, Fox, McClure, Miles, O'Brien, Reinertson, E. Riedesel, Wagner

Instructors (Adjunct): Alcott, Claude, Clemons, Dujoivich, Gerber, Gimman, Gross, Koshino, Krebs, L'Heureux, Madron, E. Miller, Morgan, Olsen, Parker, Sakai, Schoeffler, Schutte, Severin, Waller, Willmore, Wynne

Senior Clinician: King

Lecturer: Howard-Martin

Clinicians: Berryessa, Buttrick, Caston, Cerfogli, Galow-Kersh, Howard, Kaufman, Kraus, D. Miller, Morrison, Prickett, Beatrice Sponser, Thompson, Zacharias

Professional Program of Study

For the professional curriculum in veterinary medicine leading to the degree doctor of veterinary medicine, see Veterinary Medicine, Curriculum.

The curriculum of veterinary clinical sciences explores the preventive health care, and diagnosis and treatment of diseases of companion and competitive animals. Veterinary specialists lead didactic and laboratory based learning in the clinical sciences. Experiential based courses, conducted through the Veterinary Medical Center during the fourth year provide the student an opportunity to participate in the application of clinical skills and knowledge.

Graduate Study

The department offers work for the degree master of science with major in veterinary clinical science, and minor work for students majoring in other departments. Within the veterinary clinical sciences major, the student may specialize in veterinary medicine, surgery, or theriogenology. The D.V.M. degree or equivalent is prerequisite to a major graduate work.

Both thesis and nonthesis options are available and require the completion of a minimum of 30 graduate credits and a final examination.

World languages and cultures requirements may be established by the student’s program of study committee.

Courses primarily for professional curriculum students

V C S 305. Shelter Medicine. Cr. 1. S. Prereq: First year classification in Veterinary Medicine or with permission of instructor. An elective course designed to educate the veterinary student about issues of relevance to companion animal population and shelter medicine and welfare. Students may concurrently be enrolled in VCS 206X.

V C S 311. Veterinarian in Society I. Cr. 1. F. Prereq: First-year classification in veterinary medicine. Introduction to the veterinary profession and the various career opportunities available.

V C S 312. Veterinarian in Society II. (Cross-listed with VDPAM). (0-1) Cr. 1. S. Prereq: First-year classification in veterinary medicine. A continuation of the Veterinarian in Society series. This course is designed to provide an introduction to the topics of animal behavior, animal welfare, and the human animal bond.

V C S 314. Veterinarian in Society IV. (1-0) Cr. 1. F. Prereq: Third-year classification in veterinary medicine. A continuation of the Veterinarian in Society series. This course will focus on helping students develop their communication, leadership, team building and conflict resolution skills.

V C S 385. Seminar. Cr. R. Repeatable. FS. Prereq: Classification in veterinary medicine. Seminars and case discussions on selected clinical subjects by staff and fourth-year students of the College of Veterinary Medicine. Attendance is required for a passing grade. Satisfactory-fail only.

V C S 391. Clinical Imaging. (1-0) Cr. 1. F. Prereq: First-year classification in veterinary medicine. Evaluation of morphologic anatomy of the dog and cat utilizing clinical imaging methods - radiography, ultrasonography, computed tomography, magnetic resonance imaging and nuclear imaging. Emphasis will be placed on normal radiographic anatomy.

V C S 393. Principles of Surgery. (3-0) Cr. 3. F. Prereq: Second year classification in veterinary medicine. General principles of surgery of companion animals.

V C S 398. Anesthesiology. (1-0) Cr. 1. S. Prereq: Second-year classification in veterinary medicine. Anesthetic equipment, agents, and procedures for domestic animals.

V C S 401. Advanced Small Animal Orthopedics. (1-0) Cr. 1. S. Prereq: Third or Fourth-year classification in veterinary medicine. Lecture course covering advanced diagnosis and treatment of small animal orthopedic conditions. Medical and surgical options are covered.

V C S 402. Clinical Cardiology. (1-0) Cr. 1. F. Prereq: Third or fourth-year classification in veterinary medicine; 444 or concurrent enrollment in 444. Elective course in diagnosis and management of cardiac diseases. Emphasis on interpretation of electrocardiography.

V C S 407. Feline Internal Medicine. (1-0) Cr. 1. F. Prereq: Third year classification in veterinary medicine. Elective course in feline internal medicine.

V C S 436. Small Animal Internal Medicine. (3-0) Cr. 3. F. Prereq: Third year classification in veterinary medicine. Clinical diagnosis and treatment of diseases of small animals.

V C S 440. Introduction to Clinics. (Cross-listed with VDPAM) Cr. R. F. Prereq: Third-year classification in veterinary medicine. Rotating assignments through multiple sections within the Veterinary Teaching Hospital.

V C S 443. Equine Lameness. (1-2) Cr. 2. S. Prereq: Second or third-year classification in veterinary medicine. Orthopedic diseases of the equine.

V C S 449. Junior Surgery Laboratory. (1-6) Cr. 3. F. Prereq: Third-year classification in veterinary medicine. Pre-laboratory presentations and laboratories introduce the student to surgical technique principles that can be applied to all animal species. A. Alternative Curriculum - consists of only neutering humane society animals throughout the laboratory experience. B. Traditional Curriculum - provides a broader range of surgical experiences throughout the laboratory experience, including humane society neutering.

V C S 450. Disturbances of Reproduction. (Cross-listed with VDPAM) (4-0) Cr. 4. F. Prereq: Third-year classification in veterinary medicine. General principles of diseases causing disturbances in reproduction.

V C S 451. Advanced Junior Surgery Laboratory. (1-6) Cr. 2. S. Prereq: 449. 8 weeks. Continuation of surgical laboratory experience. Techniques and advanced principles learned are applicable to all animal species. A. Alternative Curriculum - consists of only neutering humane society animals throughout the laboratory experience. B. Traditional Curriculum - exposure to more advanced surgical techniques with most surgical principles useful in all animal species. Also includes some humane society neutering. C. Traditional Curriculum - a second repeat for students with a special interest in small animal surgery. Limited space is available.

V C S 452. Clinical Dermatology. Cr. 2. Repeatable. Prereq: Fourth-year classification in veterinary medicine, small animal option. Study of clinical dermatological problems via computer-aided instruction, case simulations, and/or lectures. Clinical management of cases presented to Veterinary Teaching Hospital.

V C S 459. Small Animal Overpopulation Medicine and Surgery. Cr. 2. Prereq: Fourth year classification in Veterinary Medicine. A 2-week surgical emphasis, elective rotation at a humane society that addresses the issues facing veterinarians and non-veterinary humane society personnel who deal with small animal overpopulation issues. Each section can be taken for credit once.

V C S 468. Intensive Care. Cr. 4. Prereq: Fourth-year classification in veterinary medicine. Clinical assignment to provide supervision of hospital cases requiring intensive care and including emergency cases.

V C S 480. Veterinary Dentistry. Cr. 1. F. Prereq: Third or Fourth-year classification in veterinary medicine. All aspects of veterinary dentistry, prophylaxis, endodontics, and orthodontics.

V C S 483. Advanced Small Animal Surgery. Cr. 2. Repeatable. Prereq: Fourth-year classification in veterinary medicine and V C S 472. Elective clinical assignment in small animal surgery. One or both sections offered can be taken more than once.

V C S 492. Orientation for International Experience. (2-0) Cr. 1. Repeatable. S. Prereq: Classification in veterinary medicine. 8 weeks. Predeparture orientation for group study abroad. Cultural considerations for the study abroad experience and a conversational language introduction. Out of class work may be assigned.

V C S 495. Seminar. Cr. R. S. Prereq: Fourth-year classification in veterinary medicine. Seminars and case discussions on selected subjects by staff of the College of Veterinary Medicine and others, including student presentations. Completion of the seminar is required for graduation. Satisfactory-fail only.

V C S 496. International Preceptorship. (0-40) Cr. arr. Repeatable. S. Prereq: Second-year classification in veterinary medicine. International Preceptorships and Study Abroad Group programs. Provides opportunities for students to be involved in applied clinical, production, and/or research experiences in international locations. The course consists of 40 hour per week experiential learning opportunities.

Courses primarily for graduate students, open to qualified undergraduate students

V C S 590. Special Topics. Cr. arr. Repeatable.
A. Medicine
B. Surgery
C. Theriogenology
D. Radiology
E. Anesthesiology

V C S 596. International Preceptorship. (0-40) Cr. arr. Repeatable. E. S. S. S. Prereq: Admission to graduate college. International Preceptorships and Study Abroad Group programs. Provides opportunities for students to be involved in applied clinical, production, and/or research experiences in international locations. The course consists of 40 hour per week experiential learning opportunities.

V C S 599. Creative Component. Cr. arr. Prereq: Enrollment in nonthesis master’s degree program.

Courses for graduate students

V C S 604. Seminar. Cr. 1. Repeatable. F.S.

V C S 671. Advanced General Surgery. (1-3) Cr. 2. Prereq: Permission of instructor. Course designed to discuss and perform advanced surgical procedures in soft tissue, orthopedic and neurological surgery. Minimally invasive surgical procedures and organ transplantation will be included.

V C S 672. Advanced Special Surgery. (1-3) Cr. 2. Prereq: Permission of instructor. Innovative techniques in microvascular, thoracic, gastrointestinal, neurological and reconstructive surgery will be investigated.

A. Medicine
B. Surgery
C. Theriogenology
E. Anesthesiology

Veterinary Diagnostic and Production Animal Medicine

Patrick Halbur, Chair of Department
University Professor: McKeen
Professors: Evans, Halbur, Harris, Hoffman, Hopkins, Hyde, Janke, Osweiler, Shearer, Thomson, Trampe, Uhlenhopp, Yoon, Zimmerman
Professors (Emeritus): Carson, Hartwig, Hopper, Kunesh, Wass
Professor (Collaborator): Thacker
Associate Professors: Engelken, Frana, Kurd, Kersting, Main, Millman, O’Connor, Thompson, Timms, Youngs
Associate Professors (Collaborators): Apley, Polson
Assistant Professors: G. Dewell, Holtkamp, Karriker, Opriessing, Ramirez, Wang
Assistant Professors (Adjunct): Harmon, Imerman, Kinyon
Assistant Professors (Collaborators): Erdman
Instructors (Adjunct): Clothier, Irwin, Madson, Patterson, Vander Ley
Senior Clinicians: Baker, Cooper, Gorden
Lecturers: Bickett-Weddle, C. Plummer, Sweiger
Clinicians: R. Dewell, Enslay, Gauger, Johnson, Kim, Leuschen, P. Plummer, Ramamoorthy, Rathej, Schwartz, Strait, West

Professional Program of Study

For the professional curriculum in veterinary medicine leading to the degree doctor of veterinary medicine, see Veterinary Medicine, Curriculum. Courses in veterinary diagnostic and production animal medicine provide students with basic and advanced skills in diagnostics, reproduction, medicine, surgery, production, and health management of the major livestock species. Students in the fourth year of the curriculum in veterinary medicine may elect to take advanced courses in beef, dairy, swine, poultry or sheep production medicine. Elective courses may include preceptorships in private practices, at other veterinary schools, in research and disease control laboratories, or in related agribusinesses.

Production animal medicine emphasizes the integration of veterinary medicine with nutrition, genetics, economics, food safety, and other disciplines, enabling graduates to acquire and use a broad knowledge base to support the health and improve the production and efficiency of the food supply chain.

Graduate Study in Veterinary Preventive Medicine

Veterinary Preventive Medicine is a multidisciplinary program focused on the study of health and disease in populations. The various disciplines represented in the program are unified by a common approach based on the application of statistical methods to problem solving in populations. Through their research and course work, students will learn to understand and apply a variety of disciplines, principles, and techniques to population health issues involving environmental, ecological, nutritional, genetic, infectious, or non-infectious diseases.

Graduate study in Veterinary Preventive Medicine will provide valuable skills and experience to persons interested in public health, food safety, food policy, emerging infectious diseases, wildlife health management, and livestock health assurance. A degree in Veterinary Preventive Medicine may be valuable for individuals considering a future in the biological or pharmaceutical industries, government regulatory agencies, public veterinary practice, or international service agencies responsible for population health.

Veterinary Preventive Medicine is an interdepartmental major administered by the Department of Veterinary Diagnostic and Production Animal Medicine (VDPAM) with participating faculty from colleges and departments across the University and collaborators from the National Animal Disease Center (USDA:ARS) and the National Veterinary Services Laboratories (USDA:APHIS) located in Ames, Iowa.

Both thesis and nonthesis options are available and require the completion of a minimum of 30 graduate credits for thesis and 36 graduate credits for nonthesis and a final examination.

Graduate Study in Veterinary Diagnostic and Production Animal Medicine

Veterinary Diagnostic and Production Animal Medicine masters degree is a program focused on the assessment of health and disease in populations of animals and the development of methods to study populations of animals. The various disciplines represented in the program are unified by a common approach based on the application of epidemiological and statistical methods to enable quantitative evaluation and critical appraisal of clinical and research data to continuously establish best production practices for health assurance; further to provide the principles and tools for design and execution of hypothesis-based research in production animal units or in research trials supporting animal health issues. Through their research and course work, students will learn to understand and apply a variety of disciplines, principles, and techniques to population health issues involving environmental, ecological, nutritional, genetic, infectious, or non-infectious diseases. This includes gaining knowledge of current principles of diagnostic evaluation and critical to best support decisions about animal health programs and practices.

Graduate students will be provided experiences in production animal medicine by involvement in the animal health and food supply decision making processes of modern production systems. Graduate study in Veterinary Diagnostic and Production Animal Medicine will provide valuable skills and experience to persons interested in public health, food safety, food policy, emerging infectious diseases, wildlife health management, and livestock health assurance. A degree in Veterinary Diagnostic and Production Animal Medicine may be valuable for individuals considering leadership positions in food supply veterinary medicine.

Veterinary Diagnostic and Production Animal Medicine is administered by the Department of Veterinary Diagnostic and Production Animal Medicine (VDPAM) with participating faculty from colleges and departments across the University and collaborators from the National Animal Disease Center (USDA:ARS) and the National Veterinary Services Laboratories (USDA:APHIS) located in Ames, Iowa.

Both thesis and nonthesis options are available and require the completion of a minimum of 30 graduate credits for thesis and 36 graduate credits for nonthesis and a final examination.
Courses primarily for professional curriculum students

VDPAM 309. Intro to Production Animal Informatics. (1-0) Cr. 1. T. The fundamentals of how clinical, diagnostic, production and financial information is obtained and used by production animal operations. Students will be able to create and use spreadsheets for manipulating and summarizing data. They will also acquire knowledge of where to find inexpensive and readily available resources with information on how to use spreadsheets and other software. Students will also have the opportunity to work with different record keeping programs used by swine, beef and dairy operations.

VDPAM 310. Intro to Production Medicine. Cr. 2. S. Prereq: Currently enrolled in Vet Med III. The role of the veterinarian in the management of animal health and production in dairy and beef cattle herds, beef feedlots and swine herds. Provides veterinary students with a starting point to understand the principles and techniques that are the basis of food-animal health management programs.

VDPAM 311. Introduction to Food Animal Clinics. (1-1) Cr. 1. Repeatable. S. Prereq: Vaccinated for rabies, enrollment in Veterinary Medicine. A one hour per week discussion of current cases in the food animal hospital and topics of interest. Student will learn physical examination of the food animal as well as animal handling techniques and record keeping procedures. Students will be able to participate in activities related to cases in the food animal hospital and the VDPAM Department. Satisfactory-fail only.

VDPAM 340. Clinical Foundations I. (0-40) Cr. 1. F.S.S. Prereq: Classification in veterinary medicine. One week course at Great Plains Veterinary Educational Center in Clay Center, Nebraska. An introduction to Food Supply Veterinary Medicine covering industry (beef, dairy, pork, sheep) overviews, production systems, behavior, welfare, handling and restraint and examination techniques, biosecurity, epidemiology and food safety.

VDPAM 350. Basic Livestock Nutrition and Feeding. (1-0) Cr. 1. S. Prereq: Classification in veterinary medicine. Introductory course on livestock (beef, dairy, swine, sheep, and equine) nutrition and feeding principles. Students will apply scientific facts and principles to problem-solving procedures in determining nutritious and economical livestock feeding programs.

VDPAM 402. Advanced Dairy Production Informatics. (1-1) Cr. 2. Repeatable. S. Prereq: 309 or permission of instructor: Advanced coverage of concepts related to collection, manipulation, analysis and reporting of information used by dairy farms and their consultants. Hands on experience with Dairy Comp 305 and PC Data as well as other dairy management and information software. Integrates this data with dairy operations’ financial situations.

VDPAM 402L. Advanced Dairy Production Informatics Lab. Cr. arr. Repeatable. S. Prereq: Permission of instructor: Continued practice in computer data records. Experience with sample herd performance and providing written report with graphs/tables as the final assignment.

VDPAM 407. Evidence Based Clinical Decision Making. (Dual-listed with 507). (1-0) Cr. 1. S. Prereq: Permission of instructor: Discussion, lectures and laboratory to assess the quality and significance of medical evidence in making informed decisions about the treatment of individual animals and animal populations.

VDPAM 414. Veterinary Practice Entrepreneurship. (Dual-listed with 514). Cr. 2. S. Prereq: Graduate Veterinarian. To provide a formal exposure to the entrepreneurial and business skills necessary to own and operate a successful veterinary practice.

VDPAM 416. Bovine Reproduction Evaluation Laboratory. Cr. 1. (Cross-listed with 510) Third year classification in veterinary medicine. 10 students per section. Bovine rectal palpation techniques will be repetitively taught in 7 four-hour sessions. Students will also learn techniques of epidural anesthesia, artificial insemination, and ultrasonic imaging. University-owned cattle will be used.

VDPAM 419. Advanced Swine Production Informatics. (1-0) Cr. 1. F. Prereq: 309. Advanced coverage of concepts related to collection, manipulation, analysis and reporting of information used by swine production companies. Production, financial, diagnostic and clinical data will be covered in the course. Hands-on experience with computer software and information systems used in swine production will be provided. Students will learn to objectively evaluate the validity of information that is presented to them and also be able to make practical and useful recommendations regarding the types of information tools that can/should be used. The students will learn what software and information systems are available and be able to critically evaluate them.

VDPAM 426. Veterinary Toxicology. (Dual-listed with 526). (3-0) Cr. 3. S. Prereq: Third-year classification in veterinary medicine. Study of toxicological diseases of domestic animals emphasizing clinical recognition, circumstances of poisoning, differential diagnosis with clinical and laboratory data, therapeutic procedures, preventive management and public health implications. Supplemented with case-based materials.

VDPAM 436. Beef Records Analysis. (0-30) Cr. 3. F.S. Prereq: Classification in Veterinary Medicine, VM1-VM3 or special permission of instructor. The class will have both a lecture and lab component and students can enroll in one or both. Lectures will emphasize current production and evaluation techniques for beef cow/calf operations and students will learn to conduct and critically assess production and financial data using a standardized approach. Lab activities will allow students an opportunity to work with individual beef cattle producers to identify areas for improving profitability, health, and sustainability. Enrollment in the class for multiple semesters will be encouraged.

VDPAM 437. Basic Clinical Skills for Production Medicine (MS 623-701): Dairy Herd Problem Identification. (7-33) Cr. 2. F.S.S. Prereq: Fourth-year classification in veterinary medicine. Seven hours recitation/discussion and 33 hours clinical experience per week. Course taken for two weeks at University of Wisconsin, Madison, on a space-available basis. Learn to interpret DHIR records and use them to identify and monitor herd problems of productivity, mastitis reproduction, and replacement heifer management. Evaluate rates and treatment protocols of common dairy herd diseases. Assess dairy housing including ventilation and freestalls. Estimate costs of herd problems and develop partial-budgets.

VDPAM 440. Introduction to Clinics. (Cross-listed with V C S). Cr. 2. F. Prereq: Third-year classification in veterinary medicine. Rotating assignments through multiple sections within the Veterinary Teaching Hospital.

VDPAM 451. Clinical Embryo Transfer. (1-40) Cr. F.S.S. Prereq: Fourth year classification in veterinary medicine. Elective clinical assignment in techniques of embryo transfer. Primary species studied will be bovine but equine and small ruminant embryo transfer will be covered during appropriate seasons. Enrollment is limited to four students per two week session.

VDPAM 455. Diagnostic Laboratory Practicum. Cr. 2. Repeatable. F.S. Prereq: Fourth-year classification in veterinary medicine. Practical experience in diagnosis of infectious and toxic diseases of livestock through exposure to cases in the ISU Veterinary Diagnostic Laboratory.

VDPAM 456. Veterinary Diagnostic Lab Methods & Applications. (16-0) Cr. 1. F. Prereq: VM 2, VM 3 or VM 4. Cases materials are used to develop diagnostic questions and to better understand the value of diagnostic tests. Testing methods and interpretation of diagnostic tests are coupled with sampling strategy and objective assessment of available evidence to provide accurate diagnosis.

VDPAM 476. Food Animal Field Service. (4-0) Cr. 2. F. Prereq: Fourth year classification in Veterinary Medicine or Permission of Instructor. Elective course in food animal field services. Students will assist the University veterinarian in delivering health care production management services to the ISU livestock farms and other selected farms in the region. Focus will be on delivery of individual animal care and establishment of best practices for herd management of dairy production systems at the university and in the region.
VDPAM 477. Food Animal Medicine and Surgery. Cr. arr. Repeatable. Prereq: Fourth-year classification in veterinary medicine. Clinical assignment focused on the management of food animal medicine and surgery cases. Specific instruction in clinical evaluation of cases coupled with appropriate diagnostic testing and therapeutic intervention will be emphasized. Additional instruction will be provided in disease prevention, intensive care, and management of food animal species. Particular emphasis will be placed on appropriate on-label and extra-label drug usage in food animal species.

VDPAM 479. Applied Swine Production Medicine. (4-0) Cr. arr. Repeatable. F.S.S. Prereq: 310. Advanced course in Swine production medicine with emphasis on herd management, production analysis, and problem solving. Forty hours clinical experience per week. Assignments will include preceptorships with a practicing veterinarian and/or a production unit.

VDPAM 480. Swine Production Medicine. (15-25) Cr. 2. Repeatable. F.S.S. Prereq: 310 or permission of instructor. Two week clinical rotation in swine production medicine. Students will be assigned to take the lead in investigating field based client cases with supervision of the instructors. Develop critical thinking skills that will allow students to apply concepts of herd management, production analysis, economic analysis, and disease prevention in addressing client cases. Variable amounts of travel to farm sites will be required with the potential for rare overnight stays.

VDPAM 482. Applied Beef Production Medicine. (4-0) Cr. arr. Repeatable. F.S.S. Prereq: 310. Advanced course in beef production medicine with emphasis on herd management, production analysis, and problem solving. Forty hours clinical experience per week. A. Assignment with practicing veterinarian and/or production unit B. Bull Breeding Soundness at Great Plains Veterinary Educational Center (GPVEC) C. Calving at GPVEC D. Feedlot Management at GPVEC E. Weaning Management at GPVEC F. Pregnancy Examination at GPVEC G. Bovine Reproduction at GPVEC I. Stocker/Feedlot Management

VDPAM 483. Beef Production Medicine, (15-20) Cr. 2. F.S. Prereq: 310. Two week advanced clinical rotation in beef production medicine. Fifteen hours recitation/discussion and 20 hours clinical experience per week. This course is designed to expose students to cow-calf and feedlot production concepts. The activities scheduled for the rotation depend greatly on the time of year. When possible, the class incorporates field trips. Students should anticipate that travel is required and overnight stays may be required. These field trips can vary in length from several hours to several days and may include weekends. As of 2006, one week of the rotation is spent at the Great Plains Veterinary Education Center, Clay Center, NE. Students should, therefore, plan accordingly and contact the instructor, immediately, if they anticipate a conflict. Students should not schedule Grand Rounds during this rotation.

VDPAM 484. Dairy Production Medicine. (15-20) Cr. 2. F.S. Prereq: Fourth-year classification in veterinary medicine, 310. Two week course in dairy production medicine combining class time with multiple on-farm visits to various dairy operations. (DHA, DC305 & PC Desk record analysis, calf rearing through lactating cows, reproduction programs,udder health and milk quality, biosecurity, welfare, nutrition and cow comfort) for a wide variety of dairy operations. Students will learn the latest in dairy management by reviewing current topic articles and gain experience in farm evaluation through a group project. Fifteen hours recitation/discussion and 20 hours clinical experience per week.

VDPAM 485. Applied Dairy Production Medicine. (4-0) Cr. arr. Repeatable. F.S.S. Prereq: VDPAM 484. Advanced course in dairy production medicine with emphasis on herd management, production analysis, and problem solving. Forty hours clinical experience per week. Assignments will include preceptorships with a practicing veterinarian and/or a production unit.

VDPAM 486. Introduction to Small Ruminant Production Medicine, (13-6) Cr. 1. S. Prereq: Classification in Veterinary Medicine. Herd health, disease monitoring and production management systems will be emphasized in lecture. Students will be required to learn and demonstrate proficiency at typical veterinary procedures such as blood collection, breeding soundness exams and parasite evaluation with Students will also be expected to develop herd health programs for individual producers. Field trip required.

VDPAM 487. Livestock Disease Prevention. (3-0) Cr. 3. F. A survey of diseases of large domestic animals, including discussion of causes, transmission, and control. Designed for students majoring in agricultural sciences.

VDPAM 489. Issues in Food Safety. (Cross-listed with An H, FS HN, HRI). (1-0) Cr. 1. S. Prereq: Credit or enrollment in FS HN 201 or 272 or HRI 233; FS HN 419 or 420; FS HN 403. Capstone seminar for the food safety minor. Case discussions and independent projects about safety issues in the food system from a multidisciplinary perspective.

VDPAM 491. Advanced Ruminant Nutrition. (3-0) Cr. 3. F. Prereq: 350 recommended. Beef and dairy nutrition from the calf to the adult, lactating cow. Balanced rations for beef cow-calf, feedlot & dairy operations. Introduces different feedstuffs and forage varieties to determine those that are best suited for bovine diets.

VDPAM 492. Orientation for International Experience. (2-0) Cr. 1. S. Prereq: Classification in veterinary medicine. Predeparture orientation for group study abroad. Cultural considerations for the study abroad experience and a conversational language introduction. Out of class work will be assigned.

VDPAM 494. Advanced Dairy Production Medicine II. (2-0) Cr. 2. S. Prereq: 484 or permission of instructor. Advanced in investigating dairy herd problems relating to milk quality or nutrition. Milk quality and nutrition troubleshooting will be taught through the combination of lecture and on-farm investigations. Students will combine lecture knowledge, data acquired from on-farm investigations and record analysis to generate management plans.

VDPAM 496. International Preceptorship. (4-0) Cr. arr. Repeatable. F.S.S. Prereq: Second-year classification in veterinary medicine. International Preceptorships and Study Abroad Group programs. This course will provide opportunities for students to be involved in applied clinical production, and/or research experiences in international locations. The course consists of 40 hour per week experiential learning opportunities.

Courses primarily for graduate students, open to qualified undergraduate students.

VDPAM 507. Evidence Based Clinical Decision Making. (Dual-listed with 407). (1-0) Cr. 1. S. Prereq: Permission of instructor. Discussion, lectures, and laboratories to assess the quality and significance of medical evidence in making informed decisions about the treatment of individual animals and animal populations.

VDPAM 514. Veterinary Practice Entrepreneurship. (Dual-listed with 414). Cr. 2. S. To provide a formal exposure to the entrepreneurial and business skills necessary to own and operate a successful veterinary practice.

VDPAM 526. Veterinary Toxicology. (Dual-listed with 426). (Cross-listed with Tox). (3-0) Cr. 3. S. Prereq: Permission of instructor: A study of the disease processes in animals caused by toxoids and the use of differential diagnostic and therapeutic procedures. Emphasis is on use of clinical cases to define mechanism of poisoning, diagnostic and management procedures and public health and food safety issues.

A. DNA Techniques. Includes genetic engineering procedures, sequencing, PCR, and genotyping. (F.S.S.) B. Protein Techniques. Includes fermentation, protein isolation, protein purification, SDS-PAGE, Western blotting, NMR, confocal microscopy and laser microdissection, immunophenotyping, and monoclonal antibody production. (S.S.S.)

C. Cell Techniques. Includes immunophenotyping, ELISA, flow cytometry, microscopic techniques, and image analysis. (F.S.)

D. Plant Transformation. Includes Agrobacterium and particle gun-mediated transformation of tobacco. Arabidopsis, and maize, and analysis of transformants. (S.)

E. Proteins. Includes two-dimensional electrophoresis, laser scanning, mass spectrometry, and database searching. (F)

VDPAM 551. Advanced Veterinary Diagnostic Medicine. (0-3) Cr. arr. Repeatable. F.S.S. Prereq: 455. Necropsy techniques of animals with emphasis on gross and microscopic lesion description and microbiological diagnosis of disease in food animals.

VDPM 590. Special Topics. Cr. arr. Repeatable. Prereq: Permission of instructor. Topics in medicine, surgery, theriogenology, beef, swine, dairy, or sheep production medicine.

VDPM 596. International Preceptorship. (2-0) Cr. arr. Repeatable. F.S.S. Prereq: Admission to graduate college. International Preceptorships and Study Abroad Group programs. Provides opportunities for students to be involved in applied clinical, production, and/or research experiences in international locations. The course consists of 40 hour per week experiential learning opportunities.

Courses for graduate students

VDPM 650. Swine Diagnostic Medicine. Cr. arr. SS. Prereq: Permission of instructor. A detailed study of swine diseases emphasizing the pathogenesis and diagnosis of swine respiratory, enteric, reproduction, metabolic, and septicemic diseases.

VDPM 655. Advanced Swine Production Medicine. Cr. arr. SS. Prereq: Permission of instructor. Detailed overview of applied techniques used in swine production medicine, production modeling and record analysis, production economics and financial analysis, therapeutic and vaccination strategies, quality control procedures and food safety.

Veterinary Microbiology and Preventive Medicine

Michael Wannemuehler, Interim Chair of Department

Distinguished Professors: Roth

Distinguished Professors (Emeritus): Beran, Cheville, Kaeberle, Ross, Switzer

Professors: Minion, Nolan, Phillips, Platt, Reynolds, Rosenbusch, Thoen, Uihleinhopf, Wannemuehler, Yoon, Zhang, Zimmerman

Professors (Emeritus): Hogle, Kramer, Moon

Professors (Collaborators): Carpenter, Kehrl, Nystrom-Dean, Schultz, Tabatabai, Thacker

Associate Professors: Cornick, Davis, Griffith

Associate Professors (Collaborators): Frey, Harp, Panighrahy, Richt, Sacco, Sharma, Zuemer

Assistant Professors: Bellaire, Bittwich, Miller, Sponseller

Assistant Professors (Collaborators): Anderson, Bannantine, Brockmeier, Fasberg, Hailing, Lager, Register, Root, Scupham, Stabel, Stanton, Vaughn, Vincent, Waters, Wesley

Instructor (Collaborator): Schlater

Lecturer: Brown

Clinician: Plummer

The Department of Veterinary Microbiology and Preventive Medicine offers instruction in the areas of bacteriology, mycology, virology, immunology, epidemiology and public health at the graduate level.

Microbiologic, immunologic, regulatory, and preventive medical aspects of infectious diseases of animals are emphasized in courses for students in the veterinary curriculum.

Professional Program of Study

For the professional curriculum in veterinary medicine leading to the degree of doctor of veterinary medicine, see Veterinary Medicine, Curriculum.

The Department of Veterinary Microbiology and Preventive Medicine provides instruction on pathogenic bacteria, fungi, and viruses and their interaction with host animal species. Principles and applications of infectious diseases, immunity to disease, diagnostic methods for infectious diseases, and vaccination are covered. Principles and applications of epidemiology, public health, preventive veterinary medicine, regulatory veterinary medicine and food safety are also emphasized.

Graduate Study

The department offers opportunities for the degree doctor of philosophy with a major in veterinary microbiology. A specialization in preventive medicine is an option for this degree. Graduates in the Veterinary Microbiology and Preventive Medicine programs have a broad understanding of the fundamental processes involved in infectious diseases, pathogenesis and immunology. They are able to effectively establish research programs, which involve complex biological systems and disease syndromes. They are also prepared to address microbial-based social, ethnic and environmental problems. Graduates acquire effective written and oral communication skills which lead to successful research and teaching careers in the medical and veterinary sciences. The department also offers work towards the master of science with majors in veterinary microbiology or veterinary preventive medicine. A non-thesis master’s option is available for majors in preventive medicine. Courses are open for students majoring in other graduate programs.

Prerequisite to graduate study is completion of coursework in general microbiology, biology, biochemistry, mathematical sciences, and physics. Candidates for the majors in veterinary microbiology should possess an undergraduate degree in biomedical science with emphasis in medical microbiology or the D.V.M. degree. Candidates for the major in preventive medicine should possess the D.V.M. degree.

The department also participates in the interdepartmental majors and programs in genetics, immunobiology, and MCDB (molecular, cellular, and developmental biology; see Index).

Each graduate student must demonstrate proficiency in English composition within two semesters in residence.

Courses primarily for professional curriculum students

V MPM 378. Case Study IV. (2-0) Cr. 2. S. Prereq: Second-year classification in veterinary medicine. Case-based applied learning that relates to the basic science courses. Emphasis on early integration of basic and clinical science concepts.

V MPM 380. Veterinary Immunology. (2-0) Cr. 2. S. Prereq: First-year classification in veterinary medicine. Structure and function of the immune system in animals.

V MPM 386. Veterinary Microbiology. (3-5) Cr. 5. F. Prereq: Second-year classification in veterinary medicine. Bacteria and fungi of veterinary importance with emphasis on mechanisms of disease production and laboratory diagnostic procedures.

V MPM 388. Public Health and the Role of the Veterinary Profession. (3-0) Cr. 3. S. Prereq: Second-year classification in veterinary medicine. Fundamental epidemiology, zoonotic diseases, infectious diseases, food safety, other public health topics.

V MPM 390. Topics in Veterinary History. (2-0) Cr. 1. S. 8 weeks. Significant persons, noteworthy events, and pivotal scientific discoveries in the course of the development and advancement of veterinary medicine from ancient times to the present.

V MPM 437. Infectious Diseases and Preventive Medicine. (3-0) Cr. 3. S. Prereq: Third-year classification in veterinary medicine. Etiology, epidemiology, laboratory diagnosis, regulatory control and preventive medicine aspects of the infectious diseases of swine, sheep, goats, cattle and horses.

V MPM 491. CDC Epidemiology Elective Preceptorship. Cr. 6. F.S.SS. Introduction to preventive medicine, public health and the principles of applied epidemiology within the working atmosphere of the Centers for Disease Control.

V MPM 496. International Preceptorship. (2-0) Cr. arr. Repeatable. F.S.SS. Prereq: Second-year classification in veterinary medicine. International Preceptorships and Study Abroad group programs. This course will provide opportunities for students to be involved in applied clinical, production, and/or research experiences in international locations. The course consists of 40 hour per week experiential learning opportunities.

Courses primarily for graduate students, open to qualified undergraduate students

V MPM 500. Medical Immunology I. (4-0) Cr. 4. F. Prereq: Micro 310 or V MPM 386, 3 credits in biochemistry. Nature of the immune system and its role in health and disease. Credit for either V MPM 520 or 575, but not both may be applied toward graduation.

V MPM 536. Zoonoses and Environmental Health. (3-0) Cr. 3. Alt. S., offered 2010. Prereq: 386, 387 and 388 or equivalent or permission of instructor. Pathogenesis and control of zoonotic diseases. Factors influencing transmission and survival of pathogenic microorganisms in the environment.

A. DNA Techniques. Includes genetic engineering procedures, sequencing, PCR, and genotyping. (F.S.S.S.)
B. Protein Techniques. Includes fermentation, protein isolation, protein purification, SDS-PAGE, Western blotting, NMR, confocal microscopy and laser microdissection, immunoprotentotyping, and monoclonal antibody production. (S.S.S.)
C. Cell Techniques. Includes immunophototyping, ELISA, flow cytometry, microscopic techniques, and image analysis. (F.S.)
D. Plant Transformation. Includes Agrobacterium and particle gun-mediated transformation of tobacco, Arabidopsis, and maize, and analysis of transformants. (S.)
E. Proteomics. Includes two-dimensional electrophoresis, laser scanning, mass spectrometry, and database searching. (F.)

V MPM 565. Professional Practice in the Life Sciences. (Cross-listed with PI, P, Agron, An S, BCB, Hort, Micro,). Cr. arr. Repeatable. S. Prereq: Graduate classification. Professional discourse on the ethical and legal issues facing life science researchers. Offered in modular format; each module is four weeks. A. Professional Practices in Research. (Cr. 1.0) Good scientific practices and professional ethics in the life sciences. B. Intellectual Property and Industry Interactions. (Cr. 0.5) Ethical and legal issues facing life science professionals involved in research interactions with industry. V MPM 575. Immunology. (Cross-listed with MIRCRO). (3-0) Cr. 3. S. Prereq: 310 Human and cellular immune functions, interactions between cells and factors of the immune system that result in health and disease. Micro 475P optional. Credit for either V MPM 575 or V MPM 520, but not both, may be applied toward graduation.

V MPM 586. Medical Bacteriology. (Cross-listed with MICRO). (4-0) Cr. 4. F. Prereq: credit or enrollment in 586 or 625. Procedures used in isolation and identification of pathogenic bacteria, including molecular and genetic techniques used in research.

V MPM 587. Animal Virology. (4-0) Cr. 4. Prereq: Permission of instructor. The biology of animal viruses and pathogenic mechanisms in viral diseases.

V MPM 587L. Laboratory in Animal Virology. (0-6) Cr. 2. F. Prereq: credit or enrollment in 586 or 625. Procedures used in isolation and identification of pathogenic bacteria, including molecular and genetic techniques used in research.

V MPM 590. Special Topics. Cr. arr. Repeatable. F.S.S.S. Prereq: Permission of instructor.

V MPM 596. International Preceptorship. (0-40) Cr. arr. Repeatable. F.S.S.S. Prereq: Admission to graduate college. International Preceptorships and Study Abroad Group programs. This course will provide experiential learning opportunities. Abroad Group programs. This course will provide experiential learning opportunties. A. Preceptorships and Study Abroad Group programs. This course will provide A. Experiential learning opportunities. B. International Preceptorships and Study Abroad Group programs. This course will provide B. Experiential learning opportunties. V MPM 596. International Preceptorship. (Cross-listed with Micro). (4-0) Cr. 4. S. Prereq: Credit in Biochemistry and Microbiology. Review of current concepts in specific areas of microbial pathogenesis including the genetic basis for bacterial disease, genetic regulation and control of virulence factors and their mechanisms of action, and host-pathogen interactions at the cellular and molecular levels. The application of microbial genetics to understanding pathogenesis will be included.

V MPM 690. Current Topics. Cr. arr. Repeatable. F.S.S.S. Prereq: Permission of instructor. Colloquia or advanced study of specific topics in a specialized field. A. Immunology B. Infectious Diseases

V MPM 698. Seminar in Molecular, Cellular, and Developmental Biology. (Cross-listed with MCD, BBMB, GDCB, Micro,). (2-0) Cr. arr. Repeatable. F.S. Student and faculty presentations.

Veterinary Pathology

www.vetmed.iastate.edu/departments/vetpath/
Claire Andreassen, Chair of Department
Distinguished Professor (Emeritus): Cheville University Professor (Emeritus): Kluge
Professors: Ackermann, Andreassen, Bender, Halbur, Haynes, Hyde, Janke, Myers, Osweiler
Professors (Emeritus): Carson, Greve, Hagemoser, Holter, Hopper, Jeska, Ledet, Miller, Moon, Niyo, Seaton, Stahl
Professors (Collaborators): Arp, Brogden, Meador, Sasseville
Associate Professors: Beetham, Jarvinen, Jones, Yaeger
Associate Professors (Collaborators): Olsen, Perry
Assistant Professors: Danielson, Fales, Garcia-Tapia, Hostetter, Petersen
Assistant Professors (Adjunct): van Geelen
Assistant Professors (Collaborators): Greenlee, Harris, Meyeholz, Palmer, Thacker, Thomsen
Instructors (Adjunct): Burrough, Johnson, Olivier, Ostojic, Pillatzki, Plattner
Lecturer: Florherty

Professional Program of Study

For the professional curriculum in veterinary medicine leading to the degree of veterinary medicine, see Veterinary Medicine, Curriculum. The Department of Veterinary Pathology offers a systematic study of basic disease mechanisms with emphasis on the changes in gene expression, cells, tissues, organs, and body fluids associated with disease. The theory and practice of veterinary pathology, veterinary clinical pathology, veterinary parasitology, veterinary toxicology, and related disciplines provide the basis for accurate diagnosis and a rational approach to the treatment and prevention of animal diseases.

Graduate Study

The department offers work for the degree master of science and doctor of philosophy with a major in veterinary pathology. As an option, students may choose an area of specialization in pathology, veterinary anatomic pathology, veterinary clinical pathology, veterinary toxicology, or veterinary parasitology. (See iastate.edu/) and the interdepartmental major in collaborative work is recommended in other departments in the College of Veterinary Medicine and are skilled at carrying out research, communicating research results, and writing concise and competitive grant proposals. Collaborative work is recommended in other departments in the College of Veterinary Medicine and are skilled at carrying out research, communicating research results, and writing concise and competitive grant proposals.

A veterinary degree (doctor of veterinary medicine or equivalent) is required for training in Veterinary Anatomic Pathology and Veterinary Clinical Pathology. Other specializations do not require the veterinary degree. A minimum score of 550 paper-based (213 computer-based; 79 internet based) is required on the TOEFL examination for students whose native language is not English. Scores on the standardized Graduate Record Examination (GRE) General Test are required of students not having a veterinary degree from the United States or Canada. The GRE General Test is strongly recommended for all other applicants. A foreign language requirement will be determined by the
Courses primarily for professional curriculum students

V Pth 342. Anatomic Pathology I. (Dual-listed with 542). (2-2) Cr. 3. S. Prereq: First-year classification in veterinary medicine. Basic pathology with emphasis on disease in animals and introduction to diseases by system.

V Pth 372. Anatomic Pathology II. (3-3) Cr. 4. F. Prereq: 342. Response to injury by each body system.

V Pth 377. Case Study III. (0-4) Cr. 2. F. Prereq: Second-year classification in veterinary medicine. Clinical applications of the basic sciences taught concurrently in the fall semester of the second year curriculum in veterinary medicine.

V Pth 401. Basics of Medical Terminology. (1-0) Cr. 1. F. 8 weeks, offered first half semester only. Discussion of prefixes, suffixes, and roots (mostly from Latin and Greek) that comprise medical terms.

V Pth 409. Introduction to Veterinary Cytology and Laboratory Techniques. (0-0) Cr. 1. S. Prereq: Third-year classification in veterinary medicine. Description, interpretation, and technical aspects of cellular preparations from tissues and body fluids.

V Pth 410. Llama Medicine. (1-0) Cr. 1. S. Prereq: Second or third year classification in veterinary medicine. Offered first half semester only. Introduction to basic camelid medicine, including anatomy, behavior, restraint, husbandry, health, common diseases, surgical conditions, and anestheisa protocols.

V Pth 478. Global Protozoology - Molecular Biology of Protozoa. (Dual-listed with 578). (Cross-listed with Ent). (2-1) Cr. 3. F. Prereq: Special permission of instructor. Analysis of cellular systems, molecules, and organelles of pathogenic protozoan parasites. Emphasis is placed on processes and systems that are unique to protozoa, important to understanding vector-parasite-host biology/ ecology, or are targets of disease prevention/treatment programs for international disease control. Nonmajor graduate credit.

V Pth 492. Orientation for International Experience. (2-0) Cr. 1. Repeatable. S. Prereq: Classification in veterinary medicine. 8 weeks. Predeparture orientation for group study abroad. Cultural considerations for the study abroad experience and a conversational language introduction. Out of class work will be assigned.

V Pth 496. International Preceptorship. (0-40) Cr. 1-12. Repeatable. F.S.SS. Prereq: Second-year classification in veterinary medicine. International Preceptorships and Study Abroad Group programs. This course will provide opportunities for students to be involved in applied clinical, production, and/or research experience in international locations. The course consists of 40 hour per week experiential learning opportunities.

Courses primarily for graduate students, open to qualified undergraduate students

V Pth 530. Teaching and Learning in Veterinary Medical Education. (3-0) Cr. 3. F. Study of principles of teaching and learning as they relate to veterinary medical education. These include: theories of learning, analyzing content/learners/context, identifying goals, identifying appropriate instructional strategies (specific to medical education), matching assessment processes to goals and strategies, common curricular approaches and decision-making processes in medical education, and the scholarship of teaching and learning for veterinary medical educators.

V Pth 542. Anatomic Pathology I. (Dual-listed with 342). (2-2) Cr. 3. S. Prereq: Graduate classification and Biol 352 or equivalent for graduate credit; permission of instructor. Basic pathology with emphasis on disease in animals and introduction to diseases by system.

V Pth 548. Diagnostic Parasitology Laboratory. Cr. 1-3. F.S.SS. Prereq: 376 or 576. Contact hours are (0-3 to 0-9). A laboratory experience in the technical and applied aspects of veterinary parasitology.

V Pth 549. Clinical Pathology Laboratory. (0-3) Cr. 1. Repeatable. F.S.SS. Prereq: 457; permission of instructor. Laboratory procedures and clinical interpretsations with emphasis on hematology, cytology, and clinical chemistry. Satisfactory-fail only.

V Pth 550. Surgical Pathology Laboratory. Cr. 1-3. Repeatable. F.S.SS. Prereq: 570 or 571; permission of instructor. Contact hours are (0-3 to 0-9). Diagnosis of lesions in biopsy specimens; classification of neoplasms. Course includes rotation through departmental biopsy service and review of selected cases from departmental archives. Satisfactory-fail only.

V Pth 551. Postmortem Pathology Laboratory. Cr. 1-3. Repeatable. F.S.SS. Prereq: 542; permission of instructor. Contact hours are (0-3 to 0-9). Necropsy techniques of animals with emphasis on gross and microscopic lesions and diagnosis. Satisfactory-fail only.

V Pth 554. Ethics in Scientific Research and Writing. (1-0) Cr. 1. Alt. SS. offered 2010. Prereq: Grad student classification. Ethical conduct in biomedical research, criticism, writing, and adherence to regulations. Satisfactory-fail only.

V Pth 571. Systemic Pathology II. (2-4) Cr. 4. Alt. F., offered 2009. Prereq: 342 or 542; permission of instructor. Pathology of the integumentary, urinary, digestive, lymphoid, and nervous systems and special senses. Emphasis on pathogenesis and anatomic pathology correlated with interpretive clinical pathology where appropriate.

V Pth 576. Veterinary Parasitology. (Dual-listed with 376). (3-3) Cr. 4. F. Prereq: Graduate classification and 542. Parasitic diseases of domestic animals and their control.

V Pth 578. Global Protozoology - Molecular Biology of Protozoa. (Dual-listed with 478). (Cross-listed with Ent). (2-1) Cr. 3. F. Prereq: Permission of instructor. Analysis of cellular systems, molecules, and organelles of pathogenic protozoan parasites. Emphasis is placed on processes and systems that are unique to protozoa, important to understanding vector-parasite-host biology/ ecology, or are targets of disease prevention/treatment programs for international disease control.

A. Veterinary Pathology
B. Veterinary Parasitology
C. Veterinary Toxicology
Women's Studies

Intermediate Program
Diane Price Herndi, Program Director
Julie Snyder-Yuly, Assistant Director
Core Faculty: Leslie Bloom (Curriculum & Instruction), Chrisy Moutsatsos (Anthropology), Anastasia Prokos (Sociology).

Undergraduate Study
Women's Studies in the College of Liberal Arts and Sciences is a cross-disciplinary program in which students may elect a minor or a major. Women's Studies provides an opportunity for students to examine women's roles, contributions, and status in social and cultural context and to investigate a variety of disciplines from feminist perspectives. Women's Studies creates an understanding that interrelated factors—e.g., race, ethnicity, class, age, disability, religion, national origin, and sexual orientation—inform knowledge of women's history, culture, and social roles. Women's Studies seeks to improve critical thinking and to provide students with the intellectual means to question prevailing assumptions. This course will encourage students to explore the contexts and ideological origins of knowledge and to examine the relationship between knowledge and power in society. It promotes social responsibility by examining the connections between personal experience and political activity, and validates student contributions and voices. Women's Studies graduates are skilled in critical thinking, research methods, and effective communication. Because they have developed a thorough understanding of gender, race, and class, they can understand and work effectively with employers, colleagues, and clients to analyze and address complex social problems. Women's Studies graduates acquire strong backgrounds for careers in such areas as counseling, education, human resources, public policy, politics, business, or law. The program includes core courses in Women's Studies and cross-listed courses in anthropology, art history, classical studies, economics, English, history, health and human performance, political science, psychology, religion, sociology, speech communication, and world languages and cultures. An undergraduate major requires 33 credits of core, cross-listed, and independent study courses.

Women's Studies majors must satisfy the following requirements:

1. 21 credits selected from women's studies core courses (W S).
   A. Required core courses: W S 201, 301, 401 and 402. Students must also choose between a thesis, W S 499 (3 cr.) or an internship, W S 491 (3 cr.)
   B. The remaining 6 credits should be chosen from the Women's Studies core courses: W S 203, 205, 302, 350, 425, 435, 450 (may be taken more than once), and 490.
   C. No more than 6 credits of W S 490 may be counted toward the W S major.

2. 12 credits selected from W S cross-listed courses or W S core courses.

Women's Studies majors must also declare either a minor or a second major in a different program or department. Communication Proficiency requirement: The Women's Studies major requires an average grade of C- or better in English 150 and 250 (or 250H) and W S 301.

Undergraduate students may minor in Women's Studies by taking 15 semester hours of Women's Studies classes, including W S 201, 301 and one 400 level core Women's Studies course, plus 6 additional credits of core or cross-listed courses.

Any student interested in a minor or major in Women's Studies should contact the Assistant Director of the program.

Graduate Study
The graduate minor in Women's Studies is designed to provide students with knowledge of theories and methods within a variety of approaches in feminist scholarship. The program seeks to integrate and synthesize knowledge from many disciplines and to offer students opportunities for systematic study of gender and women's experiences and perspectives in all knowledge fields. Students will be prepared to take leadership roles in supporting gender equity and diversity in their careers in education, social service work, business, law, public policy, governmental and non-governmental organizations, and research.

The graduate minor requires 12 credits for students enrolled in a master's or a doctoral degree program. Students are required to take either W S 510 or W S 620; taking both is strongly recommended. Students will also take two or three electives selected from the list of core and cross-listed Women's Studies courses approved for graduate study. At least one member of the Women's Studies faculty will serve on the program of study for doctoral students. A list of eligible faculty members may be obtained from the Director of the Women's Studies program. Women's Studies has 70 affiliated faculty members from departments and programs throughout the University.

Courses primarily for undergraduate students
W S 201. Introduction to Women's Studies. (3-0) Cr. 3. Introduction to the interdisciplinary field of Women's Studies. Contemporary status of women in the U.S. and worldwide from social, economic, historical, political, philosophical and literary perspectives. Analysis of intersection of gender, race, class, and sexuality. Subject matter includes work, health, sexuality, and violence. Foundation for the other courses in the program.

W S 203. Introduction to Lesbian Studies. (3-0) Cr. 3. Study of contemporary and historic lesbian cultures and communities from a U.S. and international perspective. Addresses issues of race, class, and gender identity and sexuality as they intersect with the formation of lesbian identities. Explores who identifies as lesbian and how that dis/enables political resistance and formation of community.

W S 205. Introduction to Queer Studies. (3-0) Cr. 3. F. Prereq: Eng 160. Interdisciplinary study of issues relating to lesbian, gay, bisexual, transgender, and queer identities in the U.S. Attention will be given to race and socioeconomic class.

W S 222. Leadership Styles and Strategies in a Diverse Society. (Cross-listed with LAS). (3-0) Cr. 3. Prereq: Sophomore classification. Develop and practice leadership skills through understanding personal leadership styles, leadership theory and communication theory, including how they relate to gender issues and cultural diversity, exploring personality types, communication styles, and leadership styles, networking and developing mentoring relationships, setting goals and participating in leadership opportunities and service.

W S 258. Human Reproduction. (Cross-listed with Biol). (3-0) Cr. 3. F. Prereq: Biol 101, or 155, or 211. Anatomy and physiology of human reproductive systems, including fertility, pregnancy, and delivery.
leadership, gender differences in leadership styles, and the perceptions and expectations about women's leadership. Multiple perspectives of women's leadership will be highlighted through lectures, readings, videos, guest speakers, and class projects.

W S 336. Women and Religion. (Cross-listed with Relig.) (3-0) Cr. 3. F. Prereq: Relig 105, 210 or W S 201 recommended. Examines the status of women in various religions, feminist critiques of religious structures and belief systems, and contemporary women's spirituality movements. Nonmajor graduate credit.

W S 338. Feminist Philosophy. (Cross-listed with Phil.) (3-0) Cr. 3. F. Prereq: 3 credits in philosophy or women's studies recommended. A critical, theoretical examination of the oppression of women, especially as it relates to issues of race, class, and sexual orientation. How concepts such as sex and gender, self and other, complicate our understanding of what it means to be a woman. Historical and contemporary feminist philosophers addressing topics such as violence, sexuality, pornography, political power, family structure and women's paid and unpaid labor. Nonmajor graduate credit.

W S 339. Goddess Religions. (Cross-listed with Relig.) (3-0) Cr. 3. F. Prereq: Relig 205 recommended. Exploration of the foundational myths of Goddess spirituality, including historical and cross-cultural female images of the divine and their modern usage by American women. Nonmajor graduate credit.

W S 340. Women's Literature. (Cross-listed with Engl.) (3-0) Cr. 3. F. Prereq: Engl 250. Historical and thematic survey of literature by and about women. May include autobiographies, journals, letters, poetry, fiction, and drama. Nonmajor graduate credit.

W S 342. American Indian Women Writers. (Cross-listed with Am Ind.) (3-0) Cr. 3. Prereq: Engl 250. Literature of American Indian women writers which examines their social, political, and cultural roles in the United States. Exploration of American Indian women's literary, philosophical, and artistic works aimed at recovering elements of identity, redefining stereotypes, resisting colonization, and constructing femininity. Nonmajor graduate credit.

W S 345. Women and Literature: Selected Topics. (Cross-listed with Engl.) (3-0) Cr. 3. S. Prereq: Engl 250. Literature by women and/or dealing with the images of women, e.g., study of individual authors or related schools of authors; exploration of specific themes or genres in women's literature; analysis of recurrent images of women in literature. Nonmajor graduate credit.

W S 346. Psychology of Women. (Cross-listed with Psych.) (3-0) Cr. 3. S. Prereq: 2 courses in psychology including 101. Survey of psychological literature relating to biological, temperamental, and sociocultural determinants of the behavior of women.

W S 350. African American Women. (Cross-listed with Afr Am.) (3-0) Cr. 3. S. Prereq: 3 credits in Women's Studies or African American Studies. Economic, social, political and cultural roles of African American women in the U.S. Includes literary, philosophical, and artistic expressions. Myths and realities explored. Nonmajor graduate credit.

W S 352. Gay and Lesbian Literature. (Cross-listed with Engl.) (3-0) Cr. 3. Prereq: Engl 250. Literary portrayals of gay and lesbian lives and relationships from many different genres. Attention to changing definitions and representations of sexual orientation and gender identity over time.

W S 370. Studies in English Translation. (3-0) Cr. 3. Readings, discussions, and papers in English. F. French topics on women or feminism (cross listed to Frnc 370F) G. German topics on women or feminism (cross listed to Ger 370G) R. Russian topics on women or feminism (cross listed to Rus 370R) S. Hispanic topics on women or feminism (cross listed to Span 370S)

W S 374. Women in the Ancient Mediterranean World. (Cross-listed with Cl St, Hist.) (3-0) Cr. 3. S. Prereq: Any one course in Cl St, Hist, W S or Lat. Greek, Chronological survey of the status of women in the Ancient Mediterranean world; study of constructs of the female and the feminine. Readings from ancient and modern sources. Emphasis on either the Greek world and Hellenistic Egypt, or Hellenistic Egypt and the Roman Empire. A. Hellenic World and Hellenistic Egypt B. Roman World including Roman Egypt

W S 380. History of Women in Science, Technology, and Medicine. (Cross-listed with Hist.) (3-0) Cr. 3. Prereq: Sophomore classification. History of women's relationship to the fields of science, technology, and medicine, as students and professionals, consumers, subjects and patients, family members, workers and citizens. Concentrates especially on 19th and 20th century United States, concluding with an examination of current issues of special interest to women in science, technology, and medicine.

W S 385. Women in Politics. (Cross-listed with Pol St.) (3-0) Cr. 3. S. Examination of the entry and participation of women in politics in the United States and other countries including a focus on contemporary issues and strategies for change through the political process.

W S 386. History of Women in America. (Cross-listed with Hist.) (3-0) Cr. 3. Prereq: Sophomore classification. A survey of social, economic, and political aspects of women's role from colonial era to present; emphasis on employment, education, concepts of sexuality, and changing nature of the home.

W S 401. Feminist Theories. (3-0) Cr. 3. Prereq: W S 201 or 3 credits in Women's Studies at the 300 level or above. Current theories of feminism, the feminine and sexual difference. Topics in race, class, sexuality, and ethnicity as they are addressed in diverse feminisms. May include readings in lesbian, Black, postcolonial, psychoanalytic and postmodern thought. Nonmajor graduate credit.

W S 402. Feminist Research in Action. (3-0) Cr. 3. S. Prereq: W S 201 and 202. Feminist research methods and scholarship. Class collaborates on a community research and action project to improve women's lives. Nonmajor graduate credit.

W S 422. Women, Men, and the English Language. (Cross-listed with Engl, Ling.) (3-0) Cr. 3. S. Prereq: Engl 219. The ways men and women differ in using language in varied settings and the ways in which language both creates and reflects gender divisions. Nonmajor graduate credit.

W S 425. Intersections of Race, Class, and Gender. (Dual-listed with 525.) (3-0) Cr. 3. Prereq: W S 201 and one additional W S course. Race, ethnicity, class and gender distinctions and intersections lead to inequitable distributions of power, social well-being, and resources. Explores how inequities are institution- alized and how multiple identities are experienced by women in daily life.

W S 435. Women and Development. (Dual-listed with 535.) (3-0) Cr. 3. Prereq: W S 201 or 3 credits in Women's Studies at the 300 level or above. Cross-cultural study of development utilizing both case studies and theoretical works. Explores the nature of women's roles in developing countries and the ways women and their needs have been excluded/defined in development approaches, policies, and projects. Includes discussion of actual development projects as well as women's organizing.

W S 444. Sex and Gender in Cross-cultural Perspective. (Dual-listed with 444.) (Cross-listed with Anthr.) (3-0) Cr. 3. S. Prereq: Anthr 201; Anthr 306
needs have been excluded/included in developments in Women's Studies in the U.S. and around the world. The theoretical understanding of and practical experience in language underlines many intellectual disciplines that try to meet the complex problems of contemporary society. Courses offered by the Department of World Languages and Cultures are designed to develop students' understanding of a second culture through the language spoken by that culture.

Upon the completion of their program of studies in the Department of World Languages and Cultures, majors with a concentration in French, German, Russian Studies, or Spanish will demonstrate proficiency in five goal areas: Communication, Cultures, Connections, Comparisons, and Communities. Students will be able to: (a) use the concentration language to present and interpret information and to communicate both orally and in writing; (b) demonstrate an understanding of the relationships among the products, practices, and perspectives of the culture(s) in which their concentration language is spoken; (c) demonstrate their ability to acquire information and further their knowledge through their concentration language; (d) demonstrate an understanding of the nature of the language and the concept of culture by making comparisons with their own language and culture(s); and (e) demonstrate a desire to become a life-long learner of their concentration language.

Graduates will achieve both linguistic proficiency and cultural literacy through the study of the language and culture of their program. Linguistic proficiency entails the ability to function effectively in the target language and the ability to communicate competently with native speakers of the target language. Students of Latin and Ancient Greek demonstrate proficiency by becoming able to read the lanaguage fluently and to translate from these languages into clear and idiomatic English. Cultural literacy includes a general knowledge of the culture’s history, familiarity with its literature, and basic knowledge of its social and political institutions.

The Department offers a major in World Languages and Cultures with two options, leading to the Bachelor of Arts degree: 1) Languages and Cultures with a Concentration in French, German, Russian Studies, or Spanish; 2) Languages and Cultures for Professions (as a second major only) with a Concentration in French, German, Russian Studies, or Spanish. The Department offers minors in Chinese Studies, French, German, Latin, Russian Studies, and Spanish instruction in Arabic, Classical Greek, and Portuguese. The Department also houses the College of Liberal Arts and Sciences’ Program in Classical Studies.

A full statement of requirements for majors and minors may be obtained from the Department. For a complete statement of all the college degree requirements, see Liberal Arts and Sciences, Curriculum. Current and detailed information about the Department, including placement information, is available on-line at www.language.iastate.edu.

Policies

Students who have had formal training in world languages offered at Iowa State may obtain credit by passing appropriate examinations. Students with native fluency in languages taught at Iowa State may not enroll in or take the Exam for Credit
in elementary or intermediate courses (100 and 200 level) in their native language. Students are considered to have native fluency if their ethnic first language as indicated on the matriculation form is the language in which they wish to enroll. Students are also considered to have native fluency if they have had substantial attendance at a secondary school or university where the language of instruction is the language in which they wish to enroll at ISU. Students with native fluency may be eligible to enroll in literature and civilization courses in their native language at the 300 level or above; such students must also consult the department office to determine eligibility for advanced composition and conversation courses (300 level and above). Students who have completed three or more years of high-school world language study may not enroll in or receive credit for 101-200 level courses, although exceptions may be obtained by passing the appropriate Exam for Credit or by completing an advanced sequence (200-level or higher) in that language. 101-102 may not be taken on a remedial basis.

Students who have completed two years but less than three years of a single high-school world language may not enroll in a 101 course in that language. These students may enroll in either a 102 course in that language, or in the case of Spanish, Span 97. Before enrolling in either Span 97 or a 102 language course, students are recommended to take the on-line placement test available at www.language.iastate.edu. Span 97 is designed for students who need additional remediation in the language at the first-year level (101-102) and are not planning to continue their language study at the second-year 201-202 level. Students who complete Span 97 with a passing grade will have fulfilled the LAS world language requirement. Students who have completed Span 97 and wish to pursue further study in Spanish at the 201-202 level may enroll in 102.

Students with disabilities who need to satisfy the world language requirement may direct questions to their academic adviser and the Disability Resource Office.

Credit by examination in the Department of World Languages and Cultures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the Department is not normally available.

The Department of World Languages and Cultures participates in the Iowa Regents’ world language summer study programs in France, Brazil, Peru, and Spain. The Department also offers summer programs in Greece, Russia, Spain and Mexico; and semester study abroad programs in Mexico and Spain. Information concerning these programs can be obtained directly from the Department.

Language and literature courses numbered 300 and above are principally taught in the target language; courses numbered in the 270s, 370s, and 470s are taught in English. For courses taught in English about Ancient Greek and Rome, see Classical Studies. Students may not take intermediate (200 level) courses for credit after successfully completing any intermediate (300/400 level) course, except those in the 370 series or courses taught in English translation. Students who have successfully completed any course in the intermediate (200 level) sequence may not take a lower-numbered course in that sequence for a grade.

Students at all levels of foreign language study will have access to the Language Studies Resource Center, located in 3142 Pearson. The Resource Center contains an extensive collection of world language materials, including audio-visual materials, electronic resources, music, books, language specific software and hardware, and other course-related materials.

Materials fees: Each student enrolled in a 100- through 400-level world language course is assessed a materials and professional support fee of $25.00 per course. No student will be charged more than $50.00 per semester, regardless of the number of world language courses in which she or he is enrolled for the semester. If a student drops a course subject to the fee by the 15th day of the semester the fee for that course will not be assessed.

Communication Proficiency requirement: The Department requires a grade of C- or better in each of Engl 150 and 250 (250H), and a grade of C or better in any course numbered between 370 and 379 (with the exception of Rus 375) taught by the Department of World Languages and Cultures or the interdepartmental program in Classical Studies.

Languages and Cultures for Professions (LCP)

Students with primary majors in the College of Business or the College of Engineering are encouraged to complete an LCP second major option in World Languages and Cultures with a concentration in French, German, Russian Studies, Spanish, or Chinese Studies (minor only). The primary objective of this collaboration is to provide learning environments within which students can achieve global literacy, linguistic proficiency, and inter-cultural competence. In the LCP curriculum, students will learn how professions are shaped by social and cultural forces and, alternatively, how professions shape society. In courses on contemporary culture and society, students will identify and analyze issues dealing with the complex interrelationships of languages and cultures and consider how they may affect their chosen profession. Students will experience living and working in diverse cultural settings through study abroad and internship opportunities offered through the LCP program and/or in collaboration with the Colleges of Business and Engineering. Students enrolled in the LCP second major option may receive non-graded academic credit for the successful completion of internships (VLC courses numbered 499 in each language area).

For the LCP second major option, students will complete 30 credits within their language concentration beyond the fourth-semester level, selected from the list of approved LCP core courses and electives designated for their respective college curricula in either Business or Engineering. Students may only enroll in the LCP option as a second major and may not graduate with the LCP option in the WLC major alone.

Students in the College of Business may combine completion of an LCP Minor in International Business with a Secondary Major with course work in LCP by selecting from a list of approved options. Students should consult their academic adviser in the College of Business and the WLC advisor for coursework and international experience that fulfill requirements in both the IB and LCP major options. IIB Major

Graduate Study

The Department of World Languages and Cultures offers course work leading to a graduate minor in French, German, Latin, Russian Studies or Spanish. The graduate minor in each of these languages is designed to provide an opportunity for graduate students to further their knowledge of that language to complement work in their major disciplines. The graduate minor provides formal recognition of student achievement and expertise in one of the languages above. Graduate minor credits are also offered in Greek.

Graduate Minor

Program Requirements:

a. Prerequisites: Graduate students who wish to minor in one of the languages above must have 400-level proficiency in that language. When this is not the case, the student may be required to take a language course below the 400-level, which would not count towards the graduate minor requirements.

b. Course Requirements: For the M.A. or M.S.: Three courses in the language of the minor. No more than three credits may be in courses numbered 401, 402, and 403. For the Ph.D.: Four courses in the language of the minor which must include at least one three credit course at the 500 level. No more than three credits may be in courses numbered 401, 402, or 403. At least two courses for the M.A. and the Ph.D. minors must be taken in residence at Iowa State University. Papers written for these courses are expected to have a content and depth commensurate with the graduate status of the student.

Arabic (Arabic)

Arab 101. Elementary Arabic I. (4-0) Cr. 4. F. Introduction to modern standard Arabic. Development of reading, writing, listening comprehension, and speaking skills. Attention to use of the Arabic alphabet. Presentation of culture and social customs in Arabic-speaking countries.

Arab 102. Elementary Arabic II. (4-0) Cr. 4. S. Introduction to modern standard Arabic. Development of reading, writing, listening comprehension, and speaking skills. Attention to use of the Arabic alphabet. Presentation of culture and social customs in Arabic-speaking countries.

Chinese Studies (Chin)

Chinese Studies Minor Option 1: Chinese Studies

Minors in Chinese Studies are required to take Chin 202-202 (Intermediate Chinese), and 9 credits at the 300 level; of these at least 3 additional credits are in Chinese (courses taught in Chinese or English) and 3 credits in one of the following: Chin 375 (China Today, 3 cr.) Hist 337 (History of Modern China I, 3 cr.)

The remaining 3 credits are chosen from: Anthr 326 (Peoples and Cultures of East and Southeast Asia, 3 cr.)

Arch 427 (History, Theory, and Criticism of Chinese Architecture, 3 cr.)

Chin 301 (Advanced Chinese Readings I, 3 cr.)

Chin 302 Advanced Chinese Readings II, 3 cr.)

Chin 370 (Contemporary Chinese Film & Fiction, 3 cr.)

Chin 375 (China Today, 3 cr.)

Chin 490 (Independent Study, 1-6 cr.)

Hist 336 (History of Modern China I, 3 cr.)

Hist 337 (History of Modern China II, 3 cr.)

Chin 375 (China Today, 3 cr.)

Chin 490 (Independent Study, 1-6 cr.)

Hist 336 (History of Modern China I, 3 cr.)

Hist 337 (History of Modern China II, 3 cr.)

Chinese Studies Minor Option 2: Languages and Cultures for Professions

A. International Business Secondary Major and Languages and Cultures for Professions Minor Emphasis in Chinese Studies (18 credits) Required Core Courses: (12 cr.)

Chin 202 (Intermediate Chinese, 5 cr.)

Chin 304 (Chinese for Business and Professions, 4 cr.)

Chin 499 (Internship, 3 cr.)

Electives: (6 cr. – choose from only one of the following categories)
Category 1

Chin 272 (Chinese Cultural Tradition, 3 cr.)

Chin 370 (Contemporary Chinese Film & Fiction, 3 cr.)

Chin 375 (China Today, 3 cr.)

Category 2

Chin 272 (Chinese Cultural Tradition, 3 cr.)

Chin 337 (Modern China I, 3 cr.)

Hist 336 (History of Modern China I, 3 cr.)

Hist 479 (China and the Cold War, 3 cr.)

Pol S. 341 (Politics of Asia, 3 cr.)

B. Languages and Cultures for Professions (Business without International Business Secondary Major) [30 credits]

Required Core Courses: (12 cr.)

Chin 202 (Intermediate Chinese, 5 cr.)

Chin 304 (Chinese for Business and Professions, 4 cr.)

Chin 499 (Internship, 3 cr.)

Electives (6 cr. –choose from only one of the following categories)

Category 1

Chin 272 (Chinese Cultural Tradition, 3 cr.)

Chin 370 (Contemporary Chinese Film & Fiction, 3 cr.)

Chin 375 (China Today, 3 cr.)

Category 2

Chin 272 (Chinese Cultural Tradition, 3 cr.)

Chin 337 (Modern China, 3 cr.)

Hist 336 (History of Modern China I, 3 cr.)

Hist 337 (History of Modern China I, 3 cr.)

Hist 479 (China and the Cold War, 3 cr.)

Pol S. 341 (Politics of Asia, 3 cr.)

C. Engineering Major and Languages and Cultures for Professions Minor Emphasis in Chinese Studies [18 credits]

Required Core Courses: (12 cr.)

Chin 202 (Intermediate Chinese, 5 cr.)

Chin 304 (Chinese for Business and Professions, 4 cr.)

Chin 499 (Internship, 3 cr.)

Electives (6 cr. –choose from only one of the following categories)

Category 1

Chin 272 (Chinese Cultural Tradition, 3 cr.)

Chin 370 (Contemporary Chinese Film & Fiction, 3 cr.)

Chin 375 (China Today, 3 cr.)

Category 2

Chin 272 (Chinese Cultural Tradition, 3 cr.)

Chin 337 (Modern China, 3 cr.)

Hist 336 (History of Modern China I, 3 cr.)

Hist 337 (History of Modern China I, 3 cr.)

Hist 479 (China and the Cold War, 3 cr.)

Pol S. 341 (Politics of Asia, 3 cr.)

Courses primarily for undergraduate students

Chin 101. Elementary Mandarin Chinese I. (5-0)
Cr. 5. F. Prereq: 102. Development of speaking, writing, reading, and listening skills. Review and expansion of grammar skills, introduction to traditional characters and simplified characters; intensification of character acquisition. Credit by examination in the Department of World Languages and Cultures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the Department is normally not available.

Chin 202. Intermediate Mandarin Chinese II. (5-0)
Cr. 5. S. Prereq: 201. Development of speaking, writing, reading, and listening skills. Review and expansion of grammar skills, introduction to traditional characters and simplified characters; intensification of character acquisition. Credit by examination in the Department of World Languages and Cultures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the Department is normally not available.

Chin 304. Chinese for Business and Professions. (4-0)
Cr. 3. S. Prereq: 202 or equivalent. Introduc tion to professional language and culture in China and Chinese-speaking regions in Asia. Development of all four language skills, focusing on practical applications in the professional contexts. Development of global awareness and cross-cultural understanding. Prepara tion for internships.

Chin 370. Chinese Literature in English Translation. (3-0)
Cr. 3. F. Prereq: Engl 150 or equivalent. Topics may include modern and contemporary literature, Chinese novels, short fiction, and poetry. Credit by examination in the Department of World Languages and Cultures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the Department is normally not available.

Czech (Czech)

Courses primarily for undergraduate students

Czech 101. Elementary Czech I. (3-2) Cr. 4. F. Introduction to the language, grammar and syntax. Practice in the four basic skills (speaking, listening, reading, and writing) within the context of Czech culture. Offered as part of Russian, Eurasian, and East European Distance Learning Consortium via electronic technology and extensive use of Internet and digital materials. Credit by examination in the Department of World Languages and Cultures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the Department is normally not available.

Czech 201. Intermediate Czech I. (3-2) Cr. 4. F. Prereq: Czech 102 or permission of instructor. Review of grammar with expanded study of vocabulary. Development of reading, writing, listening comprehension, and speaking in Czech within the context of Czech culture. Offered as part of Russian, Eurasian, and East European Distance Learning Consortium via electronic technology and extensive use of Internet and digital materials. Credit by examination in the Department of World Languages and Cultures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the Department is normally not available.

French (French)

World Languages and Cultures majors with a concentration in French have two options.

WLC Option I: French Studies

Under WLC Option I, students with a concentration in French Studies must complete at least 30 credits beyond the intermediate (201-202) level.

A. French Studies Required Core Courses (24 credits)

Frm 301 (Reading and Writing French I, 3 cr.)

Frm 302 (Reading and Writing French II, 3 cr.)

Frm 310 (French Pronunciation and Phonetics, 1 cr.)

Frm 326 (Studies in French and Francophone Art or Film, 3 cr.) or Frm 333 (Topics in Contemporary French and Francophone Literature, 3 cr.)

Frm 334 (Topics in Early Modern and Modern French Literature, 3 cr.)

Frm 440 (Seminar in French or Francophone Studies, 3 cr.)

Frm 471 (Foundations of French Civilization, 4 cr.)

Frm 472 (Modern France and French Civilization, 4 cr.)

B. Electives (6 credits)

Six additional credits at the 300 or 400 level in courses instructed in French.

Curricular Notes: Frcm 440 and either Frm 471 or Frm 472 must be completed on campus and may not be fulfilled through transfer or study abroad.

Minor in French

The French Minor requires a total of 16 credits in French beyond the 102 level, 10 credits of which must be at the 300-level.
Option 1: 16 credits in French, at least 10 of which at the 300-level, including 301, 302, 310 and one of the following courses: 304, 333, 334.

Option 2: 16 credits in French, at least 10 of which at the 300-level, including 395.

Curricular Notes: Frcn 395 (8 credits) counts towards the minor and may be allocated as follows: generic 300-level credits (1-8 cr.), Frcn 310 (1 cr.), Frcn 320 (3 cr.). French courses instructed in English, including Frcn 370, 375, 378, 471, 472, do not count toward the minor.

WLC Option II: Languages and Cultures for Professions

Under WLC Option II, students with a concentration in French must complete at least 30 credits beyond the intermediate (Frcn 201-202) level.

A. Languages and Cultures for Professions (Business)

Students with a primary major in the College of Business may select from one of the following options:

Business Option 1

International Business Secondary Major and French LCP Minor Emphasis (27 credits total)

I. International Business Secondary Major (12 credits from approved list)

II. LCP Minor Emphasis Courses (15 credits)

Frcn 301 (Reading and Writing French I, 3 cr.)
Frcn 302 (Reading and Writing French II, 3 cr.)
Frcn 304 (French for Business and Professions, 3 cr.)
Frcn 320 (France Today, 3 cr.)
Frcn 499 (Internship, 3 cr.) or Frcn 395 (Study Abroad, 3 cr.) or other study abroad program (3 cr.)

Curricular Notes: Frcn 395 or 499 fulfills the IB 3-month international experience requirement. Frcn 304, 395 and 499 may be double counted under Business Option 1.

Business Option 2

International Business Secondary Major and LCP Major Option (42 credits total)

I. International Business Secondary Major (12 credits from approved list)

II. LCP Second Major (30 credits)

A. Required Core Courses (24 cr.)

Frcn 301 (Reading and Writing French I, 3 cr.)
Frcn 302 (Reading and Writing French II, 3 cr.)
Frcn 304 (French for Business and Professions, 3 cr.)
Frcn 320 (France Today, 3 cr.)
Frcn 499 (Internship, 3 cr.) or Frcn 395 (Study Abroad, 3 cr.) or other study abroad program (3 cr.)

B. Electives (6 credits)

Six additional credits at the 300 or 400 level including 471, 472 or courses instructed in French.

Additional credit from an approved study abroad program may be applied to the major.

Curricular Notes: Students may enroll in the Languages and Cultures for Professions (LCP) Option in French as a Second Major only. They may not graduate with the Second Major alone.

IV. Languages and Cultures for Professions (Engineering)

Engineering students pursuing the second major option in French are required to take at least 30 credits beyond the intermediate (Frcn 201-202) level.

A. LCP Required Core Courses (24 credits)

Frcn 301 (Reading and Writing French I, 3 cr.)
Frcn 302 (Reading and Writing French II, 3 cr.)
Frcn 304 (French for Business and Professions, 3 cr.)
Frcn 320 (France Today, 3 cr.)
Frcn 333 (Topics in Contemporary French and Francophone Literature, 3 cr.) or Frcn 334 (Topics in Early Modern and Modern Frcn Literature, 3 cr.)
Frcn 440 (Seminar in French or Francophone Studies, 3 cr.) (May be repeated once for 6 credits maximum.)
Frcn 471 (Foundations of French Civilization, 3 or 4 cr.) or Frcn 472 (Modern French Civilization, 3 or 4 cr.)
Frcn 499 (Internship, 3 cr.) or Frcn 395 (Study Abroad, 3 cr.) or other study abroad program (3 cr.)
B. Electives (6 credits)

Six additional credits at the 300 or 400 level including 471, 472 or courses instructed in French.

Additional credit from an approved study abroad program may be applied to the major.

Curricular Notes: Students may enroll in the Languages and Cultures for Professions (LCP) Option in French as a Second Major only. They may not graduate with the Second Major alone.

Courses primarily for undergraduate students

Frcn 101. Elementary French I. (4-0) Cr. 4. F.S.S.

Beginning level development of reading, writing, listening comprehension, and speaking in French within the context of French culture. Credit by examination in the Department of World Languages and Cultures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the Department is normally not available.

Frcn 102. Elementary French II. (4-0) Cr. 4. S.S.

Beginning level development of reading, writing, listening comprehension, and speaking in French within the context of French culture. Credit by examination in the Department of World Languages and Cultures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the Department is normally not available.

Frcn 201. Intermediate French I. (4-0) Cr. 4. F. Prereq: 102. Intermediate level development of reading, writing, listening comprehension, and speaking in French within the context of French culture. Credit by examination in the Department of World Languages and Cultures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the Department is normally not available.

Frcn 202. Intermediate French II. (4-0) Cr. 4. S. Prereq: 201. Intermediate level development of reading, writing, listening comprehension, and speaking in French within the context of French culture. Credit by examination in the Department of World Languages and Cultures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the Department is normally not available.

Frcn 301. Reading and Writing French I. (3-0) Cr. 3. F. Prereq: 202. Emphasis on developing functional language skills in reading and writing. Selective review of grammar within the context of cultural and literary prose. Concurrent enrollment in Frcn 310 is encouraged.

Frcn 302. Reading and Writing French II. (3-0) Cr. 3. S. Prereq: 301. Readings in French prose, theater and poetry. Introduction to close reading and analysis. Development of reading and writing skills for upper-level courses. Concurrent enrollment in 310 is encouraged.

Frcn 320. France Today. (3-0) Cr. 3. F. Prereq. Credit or concurrent enrollment in 301. Practice and theory of correct pronunciation of sounds in French. Techniques of teaching French pronunciation. Correlation between sound and spelling in French. Relationship between pronunciation and grammar.

Frcn 333. Topics in Contemporary French or Francophone Literatures. (3-0) Cr. 3. Alt. F, offered 2010. Prereq. 302. Repeatable. In-depth study of a selected topic, genre, movement, or writer in 19th, 20th, and/or 21st century literature, civilization or culture. Emphasis on close reading and discussion.

Frcn 334. Topics in Early Modern and Modern French Literature. (3-0) Cr. 3. S. Prereq. 302. Repeatable. In-depth study of a selected topic, genre, movement, or writer in French literature, civilization or culture from the late 15th to the early 19th century. Emphasis on close reading and discussion.

Frcn 370. French Studies in English. (3-0) Cr. 3. Repeatable. Topics vary according to faculty interest. Author, genre or period study in French or Francophone literature, women writers, or contemporary theory. Readings, discussions, and papers in English. F. French topics on women or feminism (cross listed with W S 270F)
Ger 370. Contemporary France and the Francophone World in English. (3-0) Cr. 3. Readings, discussions, and papers in English on contemporary French or Francophone thought, politics, history, anthropology, arts, etc.

Ger 378. French Film Studies in English. (3-0) Cr. 3. Repeatable. Analysis and interpretation of film in twentieth-century French society. Topics vary according to faculty interest. Film directors, genres, movements (e.g. The New Wave), historical survey, aesthetics, and cinematography. Readings, discussions, and papers in English.

Ger 395. Study Abroad. Cr. arr. Prereq. 2 years university-level French. Supervised instruction in language and culture of France; formal class instruction at level appropriate to student’s training, augmented by practical living experience.

Ger 440. Seminar in French or Francophone Studies. (3-0) Cr. 3. Repeatable. F. Prereq. 333 or 334. Seminar in French or Francophone literature, civilization, or cultural studies. Nonmajor graduate credit.

Ger 471. Foundations of French Civilization. (3-1) Cr. 3-4. F. Prereq: for fourth credit, six credits in 300-level courses instructed in French. Study of French history and culture (e.g. art, architecture, music) from Charlemagne to the French Revolution. Readings, discussions and papers in English. Fourth credit: taught in French; supplementary readings and compositions. Nonmajor graduate credit.

Ger 472. Modern France and French Civilization. (3-1) Cr. 3-4. S. Prereq: for fourth credit, six credits in 300-level courses instructed in French. Study of French history and culture (e.g. art, architecture, music) from the Napoleonic era to the present. Readings, discussions and papers in English. Fourth credit: taught in French; supplementary readings and compositions. Nonmajor graduate credit.

Ger 490. Independent Study. Cr. arr. Repeatable. Prereq. Permission of French staff and department chair. Designed to meet the needs of students who wish to focus on areas other than those in which courses are offered. No more than 9 credits in French 490 may be counted toward graduation.

Ger 499. Internship in French. Cr. arr. Repeatable. Prereq: permission of advisor and WLC Internship Coordinator. Work experience using French language skills in the public or private sector, combined with academic work under faculty supervision. Credits may be applied only to LCP major. No more than 3 credits of Ger 499 may be applied to the major. Satisfactory-fail only.

Courses primarily for graduate students, open to qualified undergraduate students

Frcnh 590. Special Topics in French. Cr. 2-4. Repeatable. Prereq. Permission of instructor; 6 credits of 400 level French. A. Literature or Literary Criticism B. Linguistics C. Language Pedagogy D. Civilization

German (Ger)

WLC Option I: German Studies
Under WLC Option I, students with a concentration in German must complete at least 30 credits beyond the intermediate (Ger 201-202) level. Students electing the German Studies option may count only one of the following courses towards the major: Ger 370, Ger 371, Ger 375, Ger 378.

A. German Studies Required Core Courses: (24 credits)
Ger 301 (Reading: Problems of the Early Twentieth Century, 3 cr.)
Ger 302 (Composition, 3 cr.)
Ger 305 (Conversation: The City in Contemporary Europe, 3 cr.)

or Ger 320 (Germany Today, 3 cr.)
or Ger 330 (Introduction to German Literature, 3 cr.)
Ger 440 (Colloquium in German Studies, 4 cr.)
Ger 475 (Foundations of German Civilization, 4 cr.)
Ger 476 (Topics in German Cultural Studies, 4 cr.)

B. Electives:
The remaining 6 credits may be chosen from the following courses:
Ger 301 (Reading: Problems of the Early Twentieth Century, 3 cr.)
Ger 304 (German for Business and Professions, 3 cr.)
Ger 320 (Germany Today, 3 cr.)
Ger 330 (Introduction to German Literature, 3 cr.)
Ger 370 (German Studies in English, 4 cr.)
Ger 371 (The Holocaust in Text, Image, and Memory, 4 cr.)
Ger 375 (Grimms’ Tales, 4 cr.)
Ger 378 (German Film and Media Studies, 4 cr.)
Ger 395 (Study Abroad, 1-10 cr.)
Ger 440 (Colloquium in German Studies, 4 cr.)

C. Study Abroad: The department strongly recommends that all students of German participate in an approved study abroad program based in a German-speaking country.
Curricular Notes: Ger 475 (4 cr.) and Ger 476 (4 cr.) are required for the WLC major option in German Studies. Majors must enroll in each of these courses for 4 credits. Majors choosing the German Studies option may select one additional course for 4 cr. from the following: Ger 370, 371, 375, or 378.

Minor in German
The minor in German requires at least 15 credits, nine of which must be at the 300 level or higher, of these, three credits must be in literature or culture taught in German (320, 330 or 440). Eligible courses for the minor are: Ger 301, 302, 304, 305, 320, 330, and 440.

WLC Option II: Languages and Cultures for Professions
Under WLC Option II students with a concentration in German must complete a minimum of 30 credits beyond the intermediate (Ger 201-202) level. Students electing the LCP option may not count the following courses toward the major: Ger 370, Ger 371, Ger 375, Ger 378.

I. Languages and Cultures for Professions (Business)
Students with a primary major in the College of Business may select from one of the following options:

Business Option 1
International Business Secondary Major and German LCP Minor Emphasis (27 credits total)

A. International Business Secondary Major (12 credits from approved list)
B. LCP Minor Emphasis Courses (15 credits):
Ger 304 (German for Business & Professions, 3 cr.)
Ger 305 (Conversation: The City in Contemporary Europe, 3 cr.)
Ger 320 (Germany Today, 3 cr.)
Ger 440 (Colloquium in German Studies, 4 cr.)
Ger 475 (Foundations of German Civilization, 4 cr.)
Ger 476 (Topics in German Cultural Studies, 4 cr.)
Ger 499 (Internship, 3 cr.)

Business Option 2
International Business Secondary Major and LCP Major Option (42 credits total)

A. International Business Secondary Major (12 credits from approved list)
B. LCP Second Major (30 credits)
I. LCP Required Core Courses (20 credits)
Ger 304 (German for Business & Professions, 3 cr.)
Ger 305 (Conversation: The City in Contemporary Europe, 3 cr.)

or Ger 320 (Germany Today, 3 cr.)
or Ger 440 (Colloquium in German Studies, 4 cr.)
Ger 475 (Foundations of German Civilization, 4 cr.)
or Ger 476 (Topics in German Cultural Studies, 4 cr.)
Ger 499 (Internship, 3 cr.)

II. Electives (10 credits)
Ger 301 (Reading: Problems of the Early Twentieth Century, 3 cr.)
Ger 302 (Composition, 3 cr.)
Ger 330 (Introduction to German Literature, 3 cr.)
Ger 395 (Study Abroad, 2-6 cr.)*

* Additional credit from an approved study abroad program may be applied to the major.

Curricular Notes: students may only enroll in the Languages and Cultures for Professions (LCP) Option as a Second Major. They may not graduate with the Second Major in LCP alone.

Business Option 3
Languages and Cultures for Professions (without International Business Major) (30 credits total)

I. LCP Required Core Courses (20 credits)
Ger 304 (German for Business & Professions, 3 cr.)
Ger 305 (Conversation: The City in Contemporary Europe, 3 cr.)
Ger 320 (Germany Today, 3 cr.)
Ger 440 (Colloquium in German Studies, 4 cr.)
Ger 475 (Foundations of German Civilization, 4 cr.)
or Ger 476 (Topics in German Cultural Studies, 4 cr.)
Ger 499 (Internship, 3 cr.)

II. Electives (10 credits)
Ger 301 (Reading: Problems of the Early Twentieth Century, 3 cr.)

Ger 330 (Introduction to German Literature, 3 cr.)
Ger 395 (Study Abroad, 2-6 cr.)*

* Additional credit from an approved study abroad program may be applied to the major.

II. Languages and Cultures for Professions (Engineering)
Engineering students pursuing the second major option in German are required to take at least 30 credits beyond the intermediate (Ger 201-202) level.

Engineering LCP: Second Major Option in German (30 credits total)

A. Required Core Courses (20 credits)
Ger 304 (German for Business & Professions, 3 cr.)
Ger 305 (Conversation: The City in Contemporary Europe, 3 cr.)
Ger 320 (Germany Today, 3 cr.)
Ger 440 (Colloquium in German Studies, 4 cr.)
Ger 475 (Foundations of German Civilization, 4 cr.)
or Ger 476 (Topics in German Cultural Studies, 4 cr.)
Ger 499 (Internship, 3 cr.)

B. Electives (10 credits)
Ger 301 (Reading: Problems of the Early Twentieth Century, 3 cr.)
Ger 302 (Composition, 3 cr.)
Ger 330 (Introduction to German Literature, 3 cr.)
Ger 395 (Study Abroad, 2-6 cr.)*

* Additional credit from an approved study abroad program may be applied to the major.

Curricular Notes: students may only enroll in the Languages and Cultures for Professions (LCP) Option as a Second Major. They may not graduate with the Second Major in LCP alone.

Courses primarily for undergraduate students

Ger 101. Elementary German I. (4-0) Cr. 4. F.S.S. Introduction to German language within the context of German culture; practice in the basic skills. Credit by examination in the Department of World Languages and Cultures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the Department is normally not available.
Ger 101. Elementary German I. (4-0) Cr. 4. SS.
Prereq: 101. Continuation of German 101. Credit by examination in the Department of World Languages and Cultures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the Department is normally not available.

Ger 201. Intermediate German I. (4-0) Cr. 4. F.
Prereq: 102. Review of grammar, selected readings, further practice in oral and written communication. Credit by examination in the Department of World Languages and Cultures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the Department is normally not available.

Ger 202. Intermediate German II. (4-0) Cr. 4. S.
Prereq. 201. Continuation of German 201. One section will emphasize the use of German in professional contexts. Credit by examination in the Department of World Languages and Cultures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the Department is normally not available.

Ger 301. Reading: Problems of the Early Twentieth Century. (3-0) Cr. 3. F. Prereq 202. Emphasis on the development of reading skills through a variety of text types with a focus on German culture from circa 1900 to 1933.

Ger 302. Composition. (3-0) Cr. 3. S. Prereq. 202. Emphasis on writing skills, with further development of grammar and reading skills using a variety of current and historical materials.

Ger 305. Conversation: The City in Contemporary Europe. (3-0) Cr. 3. S. Prereq. 202 minimum. Recommended. Intensive conversational and listening practice in German with an emphasis on a major German-speaking city.

Ger 320. Germany Today. (3-0) Cr. 3. S. Prereq. 301 or 304. Selected topics dealing with contemporary German society. May be repeated with topic changes. No major credit.

Ger 330. Introduction to German Literature. (3-0) Cr. 3. F. Prereq. 301 or permission of instructor. Selected readings in German literature from Classicism to present. Emphasis on techniques of reading and analysis of literary texts.

Ger 370. German Studies in English. (3-0) Cr. Repeatable. Prereq: 370. Sophomore classification. For fourth credit, 6 credits in German at the 300 level. Topics vary according to faculty interest. Author, genre or period study, women writers, cinema, or contemporary theory. May be repeated with topic changes. No major credit.

Ger 375. Grimm's Tales. (3-0) Cr. Prereq: Sophomore classification. For fourth credit, 6 credits in German at the 300 level. Introduction to Germanic antiquities, mythology, and heroic legends; Herder's concept of Nationalpoesie. Emphasis on the Grimm tales: theoretical approaches to the tales from the late 19th and early 20th centuries; perversions of these traditional tales by the National Socialists (Nazis). Readings in contemporary scholarship within the context of German culture; reading knowledge through texts adapted from classical authors. Credit by examination in the Department of World Languages and Cultures for courses numbered 101, 102, and 201 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the Department is normally not available.

Ger 376. German Film and Media Studies. (3-0) Cr. Prereq. 375. Sophomore classification. For fourth credit, 6 credits in German at the 300 level. Analysis and interpretation of film or media in German society. Study of media production and reception within multicultural and global contexts. Thematic emphasis based on faculty and student interest including: 1) film directors, genres, movements (e.g. New German Cinema), aesthetics, and cinematography or 2) media studies (e.g. television, mass press, popular culture). Three credits: English, open to all students. Four credits: required for German concentration credit, supplementary readings and compositions in German.

Ger 378. German Film and Media Studies. (3-0) Cr. Prereq. 376. Sophomore classification. For fourth credit, 6 credits in German at the 300 level. Analysis and interpretation of film or media in German society. Study of media production and reception within multicultural and global contexts. Thematic emphasis based on faculty and student interest including: 1) film directors, genres, movements (e.g. New German Cinema), aesthetics, and cinematography or 2) media studies (e.g. television, mass press, popular culture). Three credits: English, open to all students. Four credits: required for German concentration credit, supplementary readings and compositions in German.

Ger 383. Foundation of German Civilization. (3-0) Cr. Prereq: Sophomore classification. For fourth credit, six credits in 300-level courses instructed in German. Study of various aspects of German history and culture from the Germanic tribes and Christianization to 1870. Three credits: English, open to all students. Four credits: required for German concentration credit, supplementary readings and compositions in German. Nonmajor graduate credit.

Ger 457. Advanced Topics in German Literature. (3-0) Cr. Prereq: 442. Sophomore classification. For fourth credit, six credits in 300-level courses instructed in German. Continuation of 475 and will cover German history and culture up to the modern era. Three credits: English, open to all students. Four credits: required or German concentration credit, supplementary readings and compositions in German. Nonmajor graduate credit.

Ger 476. Topics in German Cultural Studies. (3-0) Cr. Prereq. Sophomore classification. For fourth credit, six credits in 300-level courses instructed in German. Continuation of 475 and will cover German history and culture up to the modern era. Three credits: English, open to all students. Four credits: required or German concentration credit, supplementary readings and compositions in German. Nonmajor graduate credit.

Ger 490. Independent Study. Cr. Repeatable. Prereq: 6 credits in German and permission of depart- ment chair. Designed to meet the needs of students who seek work in areas other than those in which courses are offered, or who desire to integrate a study of language or literature with special problems in major fields. No more than 9 credits of Ger 490 may be counted toward graduation.

Ger 499. Internship in German. Cr. Repeatable. FS. Prereq: 9 credits of German at the 300 level; permission of advisor and the World Languages and Cultures Internship Coordinator. Work experience using German language skills in the public or private sector, combined with academic work under faculty supervision. Available only to majors and minors. Ger 499 may be repeated to a maximum of 6 credits. No more than 3 credits of Ger 499 may be applied to the major. Satisfactory-fail only.

Courses primarily for graduate students, open to qualified undergraduate students

900. Special Topics in German. Cr. Repeatable. Prereq: Permission of instructor; 6 credits of 400 level German.
A. Literature or Literary Criticism
B. Linguistics
C. Language Pedagogy
D. Civilization

Designed to meet the needs of students who seek to work in areas other than those in which courses are offered, or who desire to integrate a study of literature or language with special problems in major fields. No more than 9 credits of Port 490 may be counted toward graduation.

Courses primarily for graduate students, open to qualified undergraduate students

Port 590. Special Topics in Portuguese. Cr. arr. Repeatable. Preq: Permission of instructor; 6 credits of 300-level Portuguese. A. Literature or Literary Criticism B. Linguistics

Russian Studies (Rus)

World Languages and Cultures majors with a concentration in Russian Studies have two options:

WLC Option 1: Russian Studies

Required Core Courses: (12 credits)

Rus 301 (Composition and Conversation, 3 cr.)
Rus 314 (Reading Russian Literary and Cultural Texts, 3 cr.)
Rus 481 (Advanced Composition and Conversation, 3 cr.)
Rus 440 (Seminar in Russian Studies, 3 cr.)

Electives: (18 credits)

Hist 421 (History of Russia I, 3 cr.)
Hist 422 (History of Russia II, 3 cr.)
Hist 530 (Proseminar in Modern Russia/Soviet History, 3 cr.)
Pol S 349 (Politics of Russia and Soviet Successor States, 3 cr.)
Rus 304 (Russian for Business and Professions, 3 cr.)
Rus 320 (Russia Today, 3 cr.)
Rus 370 (Russian Studies in English Translation, 3 cr.)
Rus 378 (Russian Film Studies in English, 3 cr.)
Rus 395 (Study Abroad, 1-6 cr.)
Rus 401 (Advanced Composition and Conversation, 3 cr.)
Rus 490 (Independent Study, 1-6 cr.)
Rus 590 (Special Topics in Russian, 2-4 cr.)

Of these courses at least three credits must be taken outside the Russian curriculum.

Minor in Russian Studies

Minors in Russian Studies are required to complete 201 and 202. The remaining 9 credits must be at the 300 level and above, including at least 3 additional credits in Russian (courses taught in English or Russian) and at least 3 credits outside the Russian curriculum.

WLC Option II: Languages and Cultures for Professions

Business Option 1

International Business Secondary Major and Languages and Cultures for Professions Minor Emphasis (27 cr. total)

I. International Business Secondary Major (12 credits from approved list)

II. LCP Courses (15 credits)

Rus 301 (Advanced Composition and Conversation, 3 cr.)
Rus 304 (Russian for Business and Professions, 3 cr.)
Rus 320 (Russia Today, 3 cr.)
Rus 370 (Russian Studies in English Translation, 3 cr.)
Rus 395 (Study Abroad, 3 cr.)
or Rus 499 (Internship 3 cr.)
Curricular notes: Rus 395 or 499 fulfills the IB 3-month international experience requirement. Rus 304, 395 and 499 may be double counted under

World Languages and Cultures 389
I. International Business Secondary Major (12 credits from approved list)

II. LCP Core Courses: (15 credits)

Rus 301 (Advanced Composition and Conversation, 3 cr.)
Rus 304 (Russian for Business and Professions, 3 cr.)
Rus 320 (Russia Today, 3 cr.)
Rus 370 (Russian Studies in English Translation, 3 cr.)
Rus 395 (Study Abroad, 1-6 cr.) or
Rus 499 (Internship in Russian, 1-3 cr.)

II. LCP Electives: (15 credits)

Rus 314 (Reading Russian Literary and Cultural Texts, 3 cr.)
Rus 378 (Russian Film Studies in English, 3 cr.)
Rus 395 (Study Abroad, 1-6 cr.)
Rus 401 (Advanced Composition and Conversation, 3 cr.)
Rus 440 (Seminar in Russian Studies, 3 cr.)
Rus 590 (Special Topics in Russian, 2-4 cr.)
Hist 421 (History of Russia I, 3 cr.)
Hist 422 (History of Russia II, 3 cr.)
Hist 530 (Seminar in Modern Russia/Soviet History, 3 cr.)
Pol S 349 (Politics of Russia and Soviet Successor States, 3 cr.)

Curricular Notes: Students may only enroll in the LCP Option as a Second Major. They may not graduate with the Second Major in LCP alone.

Courses primarily for undergraduate students

Rus 101. Elementary Russian I. (4-0) Cr. 4. F. Introduction to the Russian language, grammar and syntax. Practice in the four basic skills (listening, speaking, reading, and writing) within the context of Russian culture. Credit by examination in the Department of World Languages and Cultures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the Department is normally not available.

Rus 102. Elementary Russian II. (3-0) Cr. S. Prereq: 101. Introduction to the Russian language, grammar and syntax. Practice in the four basic skills (listening, speaking, reading, and writing) within the context of Russian culture. Credit by examination in the Department of World Languages and Cultures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the Department is normally not available.

Rus 201. Intermediate Russian I. (4-0) Cr. F. Prereq: 102. Thorough review of grammar and growth of vocabulary. Selected readings. Credit by examination in the Department of World Languages and Cultures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the Department is normally not available.

Rus 202. Intermediate Russian II. (4-0) Cr. S. Prereq: 201. Thorough review of grammar and growth of vocabulary. Selected readings. Credit by examination in the Department of World Languages and Cultures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the Department is normally not available.

Rus 301. Composition and Conversation. (3-0) Cr. 3. F. Prereq: 202. Thorough study of the Russian language, with emphasis on strengthening proficiency in writing, speaking, reading, and listening. Increased focus on syntax and word formation.

Credit by examination for other courses in the Department is normally not available.

**Spanish (Span)**

World Languages and Cultures majors with a concentration in Spanish have two options: WLC Option I: Hispanic Studies

Under WLC Option I, students with a concentration in Spanish must complete a minimum of 33 credits beyond the intermediate (201-202) level.

A. Hispanic Studies Required Core Courses: (12 cr.)

- Span 301 (Spanish Grammar and Composition, 3 cr.)
- Span 303 A or B (Spanish Grammar and Conversation, 3 cr.)
- Span 314 (Introduction to Reading Hispanic Texts, 3 cr.)
- Span 352 (Introduction to Spanish Phonology, 3 cr.)

B. Electives: Students must take at least 15 credits chosen from a, b, and c below (minimum of 3 credits from each section).

a) At least 3 credits of literary studies chosen from the following:

- Span 330 (Studies in Spanish Literature to 1700, 3 cr.)
- Span 331 (Studies in Spanish Literature to 1700 to the Present, 3 cr.)
- Span 332 (Studies in Latin American Literature from Pre-Columbian Times through the Nineteenth Century, 3 cr.)
- Span 333 (Studies in Latin American Literature from the Twentieth Century to the Present, 3 cr.)

b) At least 3 credits of cultural studies chosen from the following:

- Span 304 (Spanish for Business and Professions, 3 cr.)
- Span 321 (Spanish Civilization, 3 cr.)
- Span 322 (Latin America Today, 3 cr.)
- Span 324 (Latin American Civilization and Culture, 3 cr.)
- Span 326 (Studies in Hispanic Art or Film, 3 cr.)

c) At least 3 credits of applied language and linguistics chosen from the following:

- Span 351 (Introduction to Spanish-English Translation, 3 cr.)
- Span 401 (Advanced Composition and Grammar, 3 cr.)
- Span 462 (Contrastive Analysis of Spanish/English for Translators, 3 cr.)
- Span 463 (Hispanic Dialectology, 3 cr.)
- Span 499 (Internship in Spanish, 3 cr.)

Students may apply up to 6 credits of Span 395 (Study Abroad) to section a, b, or c above (appropriate section based upon course content and assigned by the WLC adviser).

C. Students must take at least 6 credits of literature and/or culture at the 400 level, chosen from the following:

- Span 440 (Seminar on the Literatures and Cultures of Spain, 3 cr., repeatable to 6 cr.)
- Span 441 (Seminar on Cervantes and the Golden Age, 3 cr., repeatable to 6 cr.)
- Span 445 (Seminar on the Literatures and Cultures of Latin America, 3 cr., repeatable to 6 cr.)

D. Study Abroad: The department strongly recommends that all students of Spanish participate in an approved study abroad program based in a Spanish-speaking country. Under Option I, any student who chooses to participate in a department-approved program will be required to take 3 additional elective credits of Spanish at or above the Span 321 level (for a total of 36 credits beyond the intermediate 201-202 level).

E. Communication Proficiency Requirements: Degree-seeking students must earn a grade of C- or better in a sequence of English composition courses, usually Engl 150 and 250. The department will certify Communication Proficiency for students who receive a C or better in a WLC or Classical Studies course numbered 370-379. Because of the cultural affinities, historical traditions and geographic boundaries shared between the Spanish-speaking and Portuguese-speaking populations of the Iberian Peninsula and in the Americas Spanish majors are strongly encouraged to fulfill the requirement through Port 370. Such a course will also fill an LAS Group I (Arts and Humanities) requirement.

**WLC Option II: Language and Cultures for Professions**

Under WLC Option II students with a concentration in Spanish must complete a minimum of 30 credits beyond the intermediate (201-202) level.

A. Languages and Cultures for Professions (Business)

Students with a primary major in the College of Business may select from one of the following options:

**Business Option 1** International Business Secondary Major And Languages And Cultures For Professions Minor Emphasis (27 credits total)

I. International Business Secondary Major: (12 credits from approved CoB list)

II. LCP Minor Emphasis Courses: (15 credits)

- Span 303 B (Spanish Conversation for Professionals, 3 cr.)
- Span 304 (Spanish for Business and Professions, 3 cr.)
- Span 351 (Introduction to Spanish-English Translation, 3 cr.)
- Span 323 (Latin America Today), 3 cr. or Span 324 (Latin America Today), 3 cr.
- Span 499 Internship or Span 395 (Study Abroad, 3 cr.)**

*Students taking Span 330 or 331 in Category 1 should choose Span 440 or 441 from Category 2; students taking Span 332 or 333 in Category 1 should choose Span 445 from Category 2.*

** Additional credit from an approved study abroad program may be applied to the major.

**Business Option 2** International Business Secondary Major And Language And Cultures For Professions Major (42 credits total)

I. International Business Secondary Major: (12 credits from approved CoB list)

II. LCP Second Major (30 credits)

A. Required LCP Core Courses: (12 credits)

- Span 303 B (Spanish Conversation for Professionals, 3 cr.)
- Span 304 (Spanish for Business and Professions, 3 cr.)
- Span 351 (Introduction to Spanish-English Translation, 3 cr.)
- Span 499 (Internship, 3 cr.) or Span 396 (3 cr.)**

B. Literature and Culture Courses: (12 credits)

- Span 301 (Spanish Grammar and Composition, 3 cr.)
- Span 314 (Introduction to Reading Hispanic Texts, 3 cr.)
- Span 323 (Spain Today, 3 cr.) or Span 322 (Spanish Civilization and Culture, 3 cr.)
- Span 324 (Latin America Today, 3 cr.) or Span 322 (Latin American Civilization, 3 cr.)

C. Electives: (6 credits)

Select one course from each of the following two categories:

**Category 1:**

- Span 330 (Studies in Spanish Literature to 1700, 3 cr.)
- Span 331 (Studies in Spanish Literature 1700 to the Present, 3 cr.)
- Span 332 (Studies in Latin American Literature from Pre-Columbian Times through the Nineteenth Century, 3 cr.)
- Span 333 (Studies in Latin American Literature from the Twentieth Century to the Present, 3 cr.)

**Category 2:**

- Span 440 (Seminar on Literatures and Cultures of Spain, 3 cr.)
- Span 441 (Seminar on Cervantes and the Golden Age, 3 cr.)
- Span 445 (Seminar on Literatures and Cultures of Latin American, 3 cr.)

* Additional credits from an approved study abroad program may be applied to the major.

**Business Option 3** Languages and Cultures for Professions (Business without International Business Secondary Major) (30 credits)

A. Required LCP Core Courses: (12 credits)

- Span 303B (Spanish Conversations for Professionals, 3 cr.)
- Span 304 (Spanish for Business and Professionals)
- Span 351 (Introduction to Spanish-English Translation, 3 cr.)
- Span 323 (Latin America Today, 3 cr.) or Span 324 (Latin America Today, 3 cr.)
- Span 499 (Internship, 3 cr.)

B. Literature and Cultural Courses: (12 credits)

- Span 301 (Spanish Grammar and Composition, 3 cr.)
- Span 314 (Introduction to Reading Hispanic Texts, 3 cr.)
- Span 323 (Spain Today, 3 cr.) or Span 322 (Latin American Civilization, 3 cr.)
- Span 324 (Latin America Today, 3 cr.) or Span 322 (Latin American Civilization, 3 cr.)

C. Electives: (6 credits)

Select one course from each of the following two categories:

**Category 1:**

- Span 330 (Studies in Spanish Literature to 1700, 3 cr.)
- Span 331 (Studies in Spanish Literature 1700 to the Present, 3 cr.)
The department strongly recommends that all students of Spanish participate in an approved study abroad program based in a Spanish-speaking country. Any student who chooses not to participate in a department-approved study abroad program will be required to take 3 additional credits in culture chosen from the following: 321, 322, 323, or 324. Note: students taking either 321 or 323 must take either 322 or 324; students taking either 322 or 324 must take either 321 or 323.

Courses primarily for undergraduate students

Span 097. Accelerated Spanish Review. (3-2) F.S. Prereq: Two years but less than three years of high-school Spanish. For students who require additional review at first year (101-102) level. Core components include a compact review of 101 and the essential elements of 102. Course completed with a passing grade fulfills the LAS foreign language requirement. Not recommended for students who wish to continue language at the second year (201-202) level without completing 102.

Span 101. Elementary Spanish I. (4-0) Cr. F.S. A communicative approach to grammar and vocabulary within the context of Hispanic culture. Credit by examination in the Department of World Languages and Cultures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the Department is normally not available.

Span 102. Elementary Spanish II. (4-0) Cr. 4. S.S. Prereq: 101, 97 or placement by departmental exam. Continuation of Spanish 101. A communicative approach to grammar and vocabulary within the context of Hispanic culture. Credit by examination in the Department of World Languages and Cultures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the Department is normally not available.

Span 195. Study Abroad. Cr. 3. S.S. Supervised instruction in Spanish and Hispanic culture; formal class instruction at level appropriate to student's training, augmented by practical living experience. Taught in Spanish. Credit by examination: the department regarding equivalency with SPAN 101 or 102.

Span 201. Intermediate Spanish I. (4-0) Cr. 4. F. Prereq: 102 or placement by departmental exam. Intensive review of basic grammar and conversation. Practice in oral and written communication. Development of fluency with idiomatic expressions. Selected readings on culture and literature. Credit by examination in the Department of World Languages and Cultures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the Department is normally not available.

Span 202. Intermediate Spanish II. (4-0) Cr. 4. S. Prereq: 201 or placement by departmental exam. Continuation of Spanish 201. Intensive review of basic grammar. Practice in oral and written communication. Development of fluency with idiomatic expressions. Selected readings on culture and literature. Credit by examination in the Department of World Languages and Cultures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course.

Span 295. Study Abroad. Cr. 3. S.S. Prereq: 102 or equivalent. Supervised instruction in Spanish and Hispanic culture; formal class instruction at level appropriate to student's training, augmented by practical living experience. Taught in Spanish. Consult the department regarding equivalency with Span 201 or 202.

Span 301. Spanish Grammar and Composition. (3-0) Cr. F.S. Prereq: 201 or placement by departmental exam. Review and application of grammatical concepts in the development of writing skills within the context of Hispanic culture. Taught in Spanish.

Span 303. Spanish Grammar and Conversation. (3-0) Cr. 3. F. Prereq: 202 or placement by departmental exam. Intensive oral practice and improvement of oral proficiency. Application of specific grammatical concepts for development of conversational skills within the context of Hispanic culture. Taught in Spanish.

A. Conversation through Culture

B. Conversation for Professionals

Span 304. Spanish for Business and Professions. (3-0) Cr. F. S. Prereq: 202 or placement by departmental exam (301 recommended). Introduction to professional communication within a cultural context. Grammar review as needed. Individual projects will focus on special interests. Taught in Spanish. Nonmajor graduate credit.

Span 314. Introduction to Reading Hispanic Texts. (3-0) Cr. 3. F. Prereq: 301. Critical reading of Hispanic literary and cultural texts. Presentation of techniques and terminology of literary criticism. Study of basic genres such as: narrative, poetry, drama, essay. Taught in Spanish. Required as prerequisite for 330, 331, 332 and 333.

Span 321. Spanish Civilization. (3-0) Cr. 3. F. Prereq: One course at the 300 level. A survey of the social, political, religious, and cultural history of Spain. Taught in Spanish.

Span 322. Latin American Civilization. (3-0) Cr. 3. S. Prereq: One course at the 300 level. A survey of the social, political, religious, and cultural history of Spanish America. Taught in Spanish.

Span 323. Spain Today. (3-0) Cr. 3. Prereq: One course at the 300 level. A survey of social, political, economic, and cultural topics relevant to contemporary Spain. Taught in Spanish.

Span 324. Latin America Today. (3-0) Cr. 3. Prereq: One course at the 300 level. A survey of social, political, economic, and cultural topics relevant to contemporary Latin America. Taught in Spanish.

Span 326. Studies in Hispanic Art or Film. (Dual-listed with 526). (3-0) Cr. 3. Prereq: One course at the 300 level. Survey of major currents and figures in Spanish and Latin American art and/or film. Taught in Spanish.

Span 330. Studies in Spanish Literature to 1700. (3-0) Cr. 3. F. Prereq: 314. Introduction to Spanish literature from the earliest times to the Golden Age; techniques of literary criticism. Lectures, discussion, and analysis of individual selections in Spanish. Taught in Spanish. Nonmajor graduate credit.

Span 331. Studies in Spanish Literature from 1700 to the Present. (3-0) Cr. 3. S. Prereq: 314. Introduction to Spanish literature from the eighteenth century to the present; techniques of literary criticism. Lectures, discussion, and analysis of individual selections in Spanish. Taught in Spanish. Nonmajor graduate credit.

Span 332. Studies in Latin American Literature from Pre-Columbian Times through the Nineteenth Century. (3-0) Cr. 3. F. Prereq: 314. Introduction to Latin American literature from the earliest times to circa 1900; techniques of literary criticism. Lectures, discussion, and analysis of individual selections in Spanish. Taught in Spanish. Nonmajor graduate credit.

Span 333. Studies in Latin American Literature from the Twentieth Century to the Present. (3-0) Cr. 3. S. Prereq: 314. Introduction to Latin American literature from the twentieth century to the present; techniques of literary criticism. Lectures, discussion, and analysis of individual selections in Spanish. Taught in Spanish. Nonmajor graduate credit.

Span 351. Introduction to Spanish-English Translation. (3-0) Cr. 3. F. Prereq: 301, 303 or 304. Introduction to the theory, methods, techniques, and problems of translation. Consideration of material from business, literature, and the social sciences. Taught in Spanish. Nonmajor graduate credit.
Courses primarily for graduate students, open to qualified undergraduate students

Span 501. Advanced Composition and Grammar. (Dual-listed with 401). (3-0) Cr. 3. F. Prereq: 314 and one course at the 320-level or above. Advanced study of Spanish grammar and syntax. Students’ writing of compositions incorporates an advanced understanding of grammar, syntax, and principles of organization of thought and ideas. Taught in Spanish. 

Span 526. Studies in Hispanic Art or Film. (Dual-listed with 326). (3-0) Cr. 3. Prereq: 6 credits in Spanish literature or culture at 400 level. Survey of major currents and figures in Spanish and Latin American art and/or film.

Span 540. Seminar on the Literatures and Cultures of Spain. (Dual-listed with 440). (3-0) Cr. 3. Prereq: Six credits in Spanish literature or culture at 400 level. Discussion and analysis of selected topics in Spanish literature and culture from the Middle Ages to the Present. Taught in Spanish.

Span 541. Seminar on Cervantes and the Golden Age. (Dual-listed with 441). (3-0) Cr. 3. Prereq: Six credits in Spanish literature or culture at 400 level. Discussion and analysis of selected works of Cervantes within the social and cultural context of the Golden Age. Taught in Spanish.

Span 545. Seminar on the Literatures and Cultures of Latin America. (Dual-listed with 445). (3-0) Cr. 3. Prereq: Six credits in Spanish literature or culture at 400 level. Discussion and analysis of selected topics in Latin American literature and culture from Pre-Colonial Times to the Present. Taught in Spanish.

Span 580. Graduate Seminar in Hispanic Literature or Culture. Cr. ar. Repeatable. Prereq: 6 credits of 400 level Spanish. Topics may include a particular period, a genre, an author, a theme, or a particular type of cultural production. Taught in Spanish.

Span 590. Special Topics in Spanish. Cr. ar. Repeatable. Prereq: Permission of instructor; 6 credits of 400 level Spanish. A. Literature or Literary Criticism B. Linguistics C. Language Pedagogy D. Civilization

Special Courses in World Languages and Cultures (WLC)

Courses primarily for undergraduate students

WLC 119. Introduction to World Languages. (Cross-listed with Ling.). (3-0) Cr. 3. Study of language diversity and the personal, social and political effects of diversity. Language families, attitudes toward language and dialects, language and culture, multilingualism, foreign language learning, written codes, official languages, and language policy.

WLC 417. Student Teaching. (Cross-listed with C I, Ling.). Cr. ar. F.S. Prereq: Admission to teacher education, approval of coordinator during semester before student teaching. Evaluation of instruction, lesson planning, and teaching in the liberal arts and sciences.

WLC 484. Technology, Globalization and Culture. (Dual-listed with 584). (Cross-listed with M E). (3-0) Cr. 3. F. Prereq: senior classification for 484, graduate classification for 584. Cross-disciplinary examination of the present and future impact of globalization with a focus on preparing students for leadership roles in diverse professional, social, and cultural contexts. Facilitate an understanding of the threats and opportunities inherent in the globalization process as they are perceived by practicing professionals and articulated in debates on globalization. Use of a digital forum for presenting and analyzing globalization issues by on-campus and off-campus specialists.

The Faculty

Distinguished Professor denotes those faculty members who have been recognized for having attained outstanding national and international reputations within their professional disciplines.

University Professor denotes those faculty members who have been recognized for having made outstanding contributions to the quality of education at Iowa State University. Inquiries concerning the faculty list should be directed to the Office of the Provost, 1550 Beardshear Hall.

ACHTER, CHARLES T., Lecturer in Curriculum and Instruction. B.A., 1969, St. John’s; M.S., 1975, St. Cloud State.

ADAMS, DIMITRI, Associate Professor of Biomedical Sciences; University Professor. A.B., 1960, California (Davis); M.A., 1967, Chico State; Ph.D., 1970, California (Davis).

ADURU, JAY DAY, Professor of Marketing. B.E., 1979, Roorkee (India); M.S., 1980, California (Davis); Ph.D., 1986, M.A., 1986, Ohio State.

AITCHISON, GARY, Emeritus Associate Professor of Management. B.A., 1956, Northern Illinois; M.A., 1961, Northern Colorado; Ph.D., 1972, Iowa State.

ALCORN, JANET W., Emeritus Associate Professor of Music. B.Mus., 1956, Northwestern; M.Mus., 1960, Boston University.

ALIPRANTIS, DIONYSIOS, Emeritus Professor of Electrical and Computer Engineering. B.S., 1999, National Technical-Athens, Greece; Ph.D., 2003, Purdue.

ALLEN, BEVERLYN LUNDY, Emeritus Associate Professor of Sociology. B.A., 1975, M.S.W., 1977, Temple; M.P.H., 1996, Iowa State.

ALLEN, LINDA, Emeritus Professor of World Languages and Cultures. B.A., 1978, Purdue; M.A., 1982, Ball State; Ph.D., 1994, Purdue.

AMARASINGHE, GAYA, Emeritus Professor of Biochemistry, Biophysics and Molecular Biology. B.S., 1997, City University of New York; Ph.D., 2001, Maryland (Baltimore County).

AMBROSIO, LINDA, Emeritus Associate Professor of Biochemistry, Biophysics and Molecular Biology. B.S., 1976, New York (Stony Brook); Ph.D., 1985, Princeton.

ANDERSON, JERRY, Emeritus Professor of Veterinary Microbiology and Preventive Medicine (Collaborator). B.S., 1975, Iowa Wesleyan; M.S., 1983, Western Illinois.

ANDERSON, LLOYD LEE, Emeritus Professor of Animal Science; Professor of Biomedical Sciences; Charles F. Curtiss Distinguished Professor in Agriculture and Life Sciences. B.S., 1957, Ph.D., 1961, Iowa State.

ANDERSON, KEVIN, Emeritus Professor of Veterinary Microbiology and Preventive Medicine (Collaborator). B.S., 1975, Iowa Wesleyan; M.S., 1983, Western Illinois.

ANDERSON, NADIA, Emeritus Professor of Apparel, Educational Studies and Hospitality Management. B.S., 1941, Iowa State; M.S., 1947 Washington.

ANDERSON, KEVIN, Emeritus Professor of Veterinary Microbiology and Preventive Medicine (Collaborator). B.S., 1975, Iowa Wesleyan; M.S., 1983, Western Illinois.

BARTON, TOMMY J., Professor of Chemistry; Distinguished Professor in Liberal Arts and Sciences. B.S., 1962, Lamar; Ph.D., 1967, Florida.

BASMAJIAN, CARLTON, Assistant Professor of Community and Regional Planning. A.B., 1996, Chicago; M.P., 2000, Georgia Institute of Technology; Ph.D., 2008, Michigan.

BASSLER, BRUCE LEE, Associate Professor of Architecture. B.S., 1972, Iowa State; M.Arch., 1975, Texas A&M.

BASSLER, EUNICE M., Senior Lecturer in Food Science and Human Nutrition. B.A., 1974, Northern Iowa; M.S., 1979, Kansas State.

BASTAWROS, ASHRAF, Associate Professor of Aerospace Engineering; Associate Professor of Mechanical Engineering. B.Sc., 1988, M.Sc., 1991, Cairo (Egypt); M.S., 1995, Ph.D., 1997 Brown.

BASTAWROS, HALA FAROUK, Lecturer in Genetics, Development and Cell Biology. M.D., 1992, Cairo University School of Medicine; M.S., 2007, Iowa State.

BASU, SAMIK, Assistant Professor of Computer Science. B.E., B.Tech., 1998, Jadavpur (India); M.S., 2001, Ph.D., 2003, New York (Stony Brook).

BERGAN, CLIFFORD, Professor of Mathematics; Professor of Computer Science. B.S., 1975, Brown; Ph.D., 1982, California (Berkeley).

BERN, CARL JOSEPH, Professor of Agricultural and Biosystems Engineering. University Professor. B.S., 1963, M.S., 1964, Nebraska; Ph.D., 1973, Iowa State.

BERNARD, JAMES EDWARD, Professor of Mechanical Engineering; Anson Marston Distinguished Professor in Engineering; Interim Dean of the College of Engineering. B.S., 1966, M.S., 1968, Ph.D., 1971, Michigan State.

BERNARD, ROBERT W., Emeritus Professor of World Languages and Cultures. B.A., 1958, St. Thomas, M.A., 1962, Ph.D., 1968, Kansas.

BERRYESSA, NICOLAS A., Clinician in Veterinary Clinical Sciences. B.S., 2000, California (Davis); D.V.M., 2004, Cornell.

BESSER, TERRY L., Professor of Sociology. B.S., 1969, Iowa State; M.A., 1975, Northern Iowa; Ph.D., 1991, Kentucky.

BHANDARI, ALOK, Associate Professor of Agricultural and Biosystems Engineering; Associate Professor of Civil, Construction and Environmental Engineering. B.Tech., 1990, Jawaharlal Nehru Tech; M.S., 1992, Ph.D., 1996, Virginia Polytechnic.

BHATTACHARYA, JOYDEEP, Associate Professor of Economics. B.S., 1989, St. Xavier's College; M.A., 1991, Delhi School of Economics (India); Ph.D., 1996, Cornell.
BHATTACHARYYA, JAHNABIMALA, Lecturer in Statistics. B.Sc., 1976, Colton College; M.Sc., 1979, Gauhati (India); M.Sc., 1984, Western Ontario.

BHATTACHARYYA, MADAN KUMAR, Associate Professor of Agronomy. B.Sc., 1975, Assam Agricultural (India); M.Sc., 1977, Punjab Agricultural (India); Ph.D., 1987, Western Ontario.

BIGELOW, TIMOTHY, Assistant Professor of Electrical and Computer Engineering; Assistant Professor of Mechanical Engineering. B.S., 1998, Colorado State; M.S., 2001, Ph.D., 2004, Illinois.

BIRSKYTE, LUCIJAS, Assistant Professor of Political Science. B.A., 1988, Livia State (Latvia); M.P.P., 2001, Minnesota; Ph.D., 2008, Indiana.

BIRT, DIANE FEICKERT, Professor of Food Science and Human Nutrition; Mary B. Welch Distinguished Professor in Family and Consumer Sciences. B.A., 1972, Whittier College; Ph.D., 1975, Purdue.

BLOOM, LESLIE R., Associate Professor of Curriculum and Instruction. B.A., 1979, Boston University; M.A., 1985, Delaware; Ph.D., 1993, Indiana.

BLOCH, DOUGLAS, Emeritus Professor of Psychology. B.A., 1964, Wellesley; Ph.D., 1976, Iowa.

BOLLE, HEATHER ANNE, Senior Lecturer in Mathematics. B.S., 1995, Ph.D., 2000, Iowa State.

BOLLMAN, JAMES, Assistant Professor of Philosophy. B.S., 1990, Ball State; Ph.D., 1996, Iowa State.

BONACORSI, CRISTINA, Lecturer in Chemistry. B.S., 1997, Universita Degli Studi Di Pisa (Italy); Ph.D., 2005, Swiss Federal Institute of Technology.

BOND, PAUL RILEY, Emeritus Associate Professor of Electrical and Computer Engineering. B.S., 1952, John Brown; M.S., 1958, Ph.D., 1963, Iowa State.

BONNET, DOUGLAS G., Professor of Psychology and Chair of the Department. Professor of Statistics. B.A., 1974, California State (Fresno); M.A., 1978, California State (Long Beach); M.A., 1980, Ph.D., 1983, California (Los Angeles).

BONNET, RHONDA, Senior Lecturer in Psychology. B.A., 1975, California State (Fresno); M.S., 1979, California State (Long Beach); Ph.D., 1990, Wyoming.

BONNING, BRYONY C., Professor of Entomology. B.S., 1995, Ph.D., 2000, London School of Hygiene and Tropical Medicine.

BOOTH, LARRY C. JR., Associate Professor of Veterinary Clinical Sciences. V.M.D., 1973, Iowa State; M.S., 1976, Michigan State.

BORICH, TIMOTHY O., Associate Professor of Community and Regional Planning; Associate Dean of the College of Design. B.S., 1975, South Dakota State; M.A., 1978, South Dakota; Ph.D., 1992, Iowa State.

BORISOVA, GINKA, Assistant Professor of Finance. M.B.A., 2000, National and World Economy (Bulgaria); M.S., 2004, Ph.D., 2004 Oklahoma.

BORSA, FERDINANDO, Emeritus Professor of Physics and Astronomy. B.S., 1961, Ph.D., 1969, Pavia.

BOSSELMA, ROBERT, Professor of Apparel, Educational Studies and Hospitality Management and Chair of the Department. B.A., 1976, New York (Buffalo); M.S., 1982, Florida International; Ph.D., 1985, Oklahoma State.

BOUILLON, MARVIN L., Associate Professor of Accounting and Chair of the Department. B.A., 1974, M.B.A., 1982, Northern Iowa; M.S., 1984, Ph.D., 1986, Kansas.

BOVON, BONNIE SUE, Adjunct Assistant Professor of Ecology, Evolution and Organismal Biology. B.S., 1972, Cornell; Ph.D., 1978, California (Berkeley).
BOWEN, GEORGE H., Emeritus Professor of Physics and Astronomy. B.S., 1949, Ph.D., 1953, California Institute of Technology.

BOWER, DUSTIN T., Adjunct Instructor in Military Science and Tactics.

BOWLER, NICOLA, Associate Professor of Materials Science and Engineering; Associate Professor of Electrical and Computer Engineering. B.Sc., 1990, Nottingham (UK); Ph.D., 1994, Surrey (UK).

BOYD, MORTON MCKEE, Emeritus Professor of Agricultural and Biosystems Engineering. B.S., 1954, Pennsylvania State; M.S., 1962, Massachusetts.

BOYLES, NORMAN L., Emeritus Professor of Electrical and Computer Engineering; Anson Marston Professor in Engineering. B.E.E., 1946, Georgia Institute of Technology; B.S., 1946, Ph.D., 1946, Illinois.

BROGGEN, SUSAN L., Associate Professor of Animal Science. B.S., 1961, North Dakota State; M.S., 1965, Iowa State; Ph.D., 1972, Iowa State.

BROWN, BRENDA N., Emeritus Professor of Psychology; Emeritus Professor of Curriculum and Instruction; University Professor. B.A., 1964, M.A., 1965, Wisconsin; Ph.D., 1968, Minnesota.

BROWN, NANCY EVELYN, Emeritus Associate Professor of Hotel Restaurant and Institution Management. B.S., 1960, Vermont; M.S., 1964, Kansas State; Ph.D., 1972, Iowa State.

BROWN, JOHN D., Emeritus Professor of Mechanical Engineering; Professor of Chemical and Biological Engineering; Professor of Agricultural and Biosystems Engineering; Anson Marston Distinguished Professor in Engineering. B.E., 1976, B.S., 1979, Missouri; M.S., 1977, Ph.D., 1980, Michigan State.

BROWN, JUDY KAY, Emeritus Professor of Apparel, Educational Studies and Hospitality Management; Emeritus Professor of Curriculum and Instruction. B.S., 1964, Michigan State; M.S., 1967, Ph.D., 1970, Iowa State.

BRUNN, LOIS, Emeritus Professor of Curricular and Interdisciplinary Studies. B.A., 1999, Iowa State; M.S., 2000, Wisconsin; Ph.D., 2001, California (Davis).

BRUEN, JAY, Emeritus Professor of Architectural Engineering; Emeritus Professor of Civil, Construction and Environmental Engineering. B.S.C.E., 1960, M.S., 1961, Kansas State; Ph.D., 1968, Texas A&M.

BUCELL, C. ROBIN, Assistant Professor of Genetics, Development and Cell Biology (Collaborator). B.S., 1985, Maryland M.S., 1988, Washington State; Ph.D., 1992, Utah State.

BUGEJA, DIANE FAYE, Lecturer in Greenlee School of Journalism and Communication. B.S., 1981, M.S., 1988, Oklahoma State.

BUGEJA, MICHAEL J., Professor of Greenlee School of Journalism and Communication and Director of the School. B.A., 1974, Saint Peters College; M.S., 1976, South Dakota State; Ph.D., 1985, Oklahoma State.

BURKART, MICHAEL R., Associate Professor of Geological and Atmospheric Sciences (Collaborator). B.S., 1964, Wisconsin; M.S., 1969, Northern Illinois; Ph.D., 1976, Iowa.

BURKE, BENJAMIN, Assistant Professor of Geophysical and Atmospheric Sciences (Collaborator). Ph.D., 2006, Dartmouth College.

BURLINGTON, N. L., Emeritus Professor of Music; Ph.D., 2006, Dartmouth College.

BURKE, BENJAMIN, Assistant Professor of Geological and Atmospheric Sciences (Collaborator). B.S., 1967, Nebraska; M.S., 1969, Ph.D., 1976, Iowa State.

BURKHALTER, N. L., Emeritus Professor of Music; Emeritus Professor of Curriculum and Instruction. L.T.C.L., 1939, Trinity (London); B.S.M., 1947, Bluffton; Emeritus Professor of Curriculum and Instruction. B.S., 1975, Maryland; Emeritus Professor of Curriculum and Instruction. B.S., 1990, Iowa State; M.S., 1992, Florida.

BURKE, BENJAMIN, Assistant Professor of Geophysical and Atmospheric Sciences (Collaborator). Ph.D., 2006, Dartmouth College.

BURKE, BENJAMIN, Assistant Professor of Geophysical and Atmospheric Sciences (Collaborator). Ph.D., 2006, Dartmouth College.

BURLINGTON, N. L., Emeritus Professor of Music; Emeritus Professor of Curriculum and Instruction. L.T.C.L., 1939, Trinity (London); B.S.M., 1947, Bluffton; Emeritus Professor of Curriculum and Instruction. B.S., 1975, Maryland; Emeritus Professor of Curriculum and Instruction. B.S., 1990, Iowa State; M.S., 1992, Florida.

CAMPBELL, BILLY M., Emeritus Professor of Physics and Astronomy; Distinguished Professor in Liberal Arts and Sciences. B.S., 1980, Virginia; Ph.D., 1990, M.S., 1990, California (Los Angeles).

CAREAGA, PETRUMA CARMEN, Assistant Professor of Statistics. B.S., 1997, Bucuresti (Romania); Ph.D., 2003, North Carolina.

CARDINALPETT CLARE, Associate Professor of Architecture. B.A., 1975, Holins; M.Arch., 1982, Utah.

CARITHERS, ROBERT W., Emeritus Professor of Veterinary Clinical Sciences. D.V.M., 1956, Iowa State; M.S., 1968, Missouri; Ph.D., 1972, Iowa State.

CARLSON, DAVID L., Emeritus Associate Professor of Electrical Engineering. B.S., 1959, Minnesota; M.S., 1961, Ph.D., 1964, Iowa State.

CARLSON, PATRICIA M., Associate Professor of Curriculum and Instruction. B.S., 1975, Nebraska; M.S., 1977, Indiana; Ph.D., 1990, Nebraska.

CARPENTER, JAMES, Professor of Veterinary Clinical Sciences (Collaborator). B.S., 1967 Cornell; M.S., 1970, Ph.D., 1974, Oklahoma State.

CARTER, RICHARD B., Emeritus Professor of Agricultural Education and Studies; Emeritus Professor of Curriculum and Instruction. B.S., 1966, M.S., 1968, Oklahoma State; Ph.D., 1976, Iowa State.

CARTER, RICHARD, Emeritus Professor of Agricultural Education and Studies; Emeritus Professor of Curriculum and Instruction. B.S., 1966, M.S., 1968, Oklahoma State; Ph.D., 1976, Iowa State.
COCHRAN, JAMES, Associate Professor of Physics and Astronomy. B.S., 1985, Georgia Institute of Technology; M.A., 1987, Ph.D., 1993, New York (Stony Brook).

CODY, ROBERT, Emeritus Associate Professor of Geology and Astrogeomatic Sciences. B.S., 1960, St. Louis; M.A., 1962, Wyoming; Ph.D., 1968, Colorado.

COFFMAN, CLARK, Assistant Professor of Genetics, Development and Cell Biology. B.S., 1986, Iowa State; Ph.D., 1993, California (La Jolla).

COLBERT, JAMES, Associate Professor of Ecology, Evolution and Organismal Biology; Associate Professor of Genetics, Development and Cell Biology. B.S., 1978, Iowa State; M.S., 1981, Ph.D., 1985, Wisconsin.

COLLETTI, JOE PAUL, Professor of Natural Resource Ecology and Management; Senior Associate Dean of the College of Agriculture and Life Sciences. B.S., 1972, Humboldt; M.S., 1974, Ph.D., 1978, Wisconsin.

CROSS, SUSAN ELAINE, Associate Professor of Psychology. B.S., 1979, Texas A&M; M.A., 1982, Ohio State; Ph.D., 1990, Michigan.

COURTS, ROGER W., Emeritus Professor of Human Development and Family Studies; Emeritus Professor of Curriculum and Instruction. B.A., 1942, M.A., 1949, Ph.D., 1958, Iowa.

CRAWLEY, HENRY BERT, Professor of Physics and Astronomy. B.S., 1962, Louisiana Tech; Ph.D., 1966, Iowa State.

CROSS, SUSAN ELAINE, Associate Professor of Psychology. B.S., 1979, Texas A&M; M.A., 1982, Ohio State; Ph.D., 1990, Michigan.

CUNNALLY, JOHN, Associate Professor of Art and Design. B.A., 1972, Temple; M.S., 1976, Drexel; Ph.D., 1984, Pennsylvania.

CUNNINGHAM, JOHN E., Associate Professor of Animal Science; Associate Professor of Psychology. B.S., 1979, McPherson; Ph.D., 1987, Kansas State.

COOK, DIANNE H., Professor of Statistics. B.S., 1979, New England (Australia); M.S., 1990, Ph.D., 1993, Rutgers.

COON, STEPHEN C., Emeritus Associate Professor of Greenlee School of Journalism and Communication. B.A., 1967, Iowa; M.S., 1970, Iowa State.

COOPER, ERIC E., Associate Professor of Psychology. B.S., 1988, Kansas; Ph.D., 1993, Minnesota.

CORNELLE, JAMES, Emeritus Professor of Mathematics; University Professor. B.S., 1955, West Texas; M.A., 1959, Ph.D., 1962, Texas.

CORNICK, NANCY, Associate Professor of Veterinary Microbiology and Preventive Medicine. B.S., 1980, Colorado; M.S., 1981, Ph.D., 1995, Iowa State.

COUPLING, ROGER W., Emeritus Professor of Human Development and Family Studies; Emeritus Professor of Curriculum and Instruction. B.A., 1942, M.A., 1949, Ph.D., 1958, Iowa.

COURTNEY, GREGORY W., Professor of Entomology; Professor of Ecology, Evolution and Organismal Biology. B.S., 1982, Oregon State; Ph.D., 1989, Alberta (Canada).

COWLES, HAROLD A., Emeritus Professor of Industrial and Manufacturing Systems Engineering; Anson Marston Distinguished Professor in Engineering. B.S., 1949, M.S., 1953, Ph.D., 1957, Iowa State.

DILTS, HAROLD E., Emeritus Professor of Curriculum and Instruction. B.S., 1951, M.A., 1958, Northern Iowa; Ph.D., 1963, Iowa.

DIMITROVA, DANIELA, Assistant Professor of Greeenee School of Journalism and Communication. B.A., 1997 American (Bulgaria); M.A., 1999, Oregon; Ph.D., 2003, Florida.

DINKELMAN, ANDREA L., Assistant Professor, Library. B.B., 1984, Nebraska Wesleyan; PHARM, 1991, Nebraska Medical Center; M.S., 2003, Illinois.

DISNEY, RICHARD L., Emeritus Professor of Greeenee School of Journalism and Communication. B.A., 1937, Oklahoma.

DOAK, PAUL D., Emeritus Associate Professor of Economics. B.S., 1957, M.S., 1960, Missouri; Ph.D., 1965, Iowa State.

DOBBS, DRENA LEIGH, Professor of Genetics, Development and Cell Biology. B.S., 1977, Georgia; Ph.D., 1983, Oregon.

DOBREZ, WILLIAM N., Associate Professor of Agricultural and Biological Engineering. Assistant Professor of Chemical and Biological Engineering. B.S., 1999, Xi-dian (China); Ph.D., 2004, Tsinghua (China).

DRAISAWAMY, L., Emeritus Professor of Chemical and Biological Engineering; Anson Marston Distinguished Professor in Engineering. B.S., 1946, Nizam (India); M.S., 1950, Ph.D., 1952, Wisconsin.

DOMAN, KARIN, Associate Professor of Statistics; Associate Professor of Genetics/Development and Cell Biology. B.S., 1994, Indiana; Ph.D., 2001, California (Los Angeles).

DUBIN, PAUL, Professor of Aerospace Engineering. B.S.E., 1974, Princeton; Ph.D., 1979, Cambridge.

DUSSELIER, JANE, Assistant Professor of Anthropology. B.A., 1979, Avila; M.A., 1999, Sarah Lawrence; Ph.D., 2005, Maryland.

DUVICK, JONATHAN PAUL, Adjunct Associate Professor of Genetics, Development and Cell Biology. B.A., 1976, Earham College; Ph.D., 1982, Wisconsin.

DYER, DONALD CHESTER, Emeritus Professor of Biomedical Sciences. B.S., 1961, Ph.D., 1965, Kansas State.

EBERT, GLADYS M., Emeritus Associate Professor of Apparel, Educational Studies and Hospitality Management; Emeritus Associate Professor of Curriculum and Instruction. B.A., 1942, Northern Iowa; M.S., 1967, Ph.D., 1978, Iowa State.

EDELMAN, MARK ALAN, Professor of Economics. B.S., 1975, M.S., 1978, Kansas State; Ph.D., 1981, Purdue.

EKKEKAKIS, PANTELEIMON, Associate Professor of Kinesiology. B.S., 1992, Athens; M.S., 1996, Kansas State; Ph.D., 2000, Illinois.

ELIA, NICOLA, Associate Professor of Electrical and Computer Engineering. Ph.D., 1996, Massachusetts Institute of Technology.

ELLINWOOD, NORMAN MATTHEW, Assistant Professor of Animal Science; Assistant Professor of Veterinary Clinical Sciences. B.A., 1985, Washington (St. Louis); D.V.M., 1997 Ph.D., 2000, Colorado State.

ELLIS, TIMOTHY G., Associate Professor of Civil, Construction and Environmental Engineering. B.S., 1984, Drexel; M.S., 1988, Georgia Institute of Technology; Ph.D., 1999, Clemson.

ELSTON, SCOTT E., Senior Lecturer in Management. B.S., 1984, M.S., 1990, Iowa State.

EMERSON, JAMES, Emeritus Professor of Greenlee School of Journalism and Communication. B.S., 1960, M.S., 1964, Iowa State; Ph.D., 1973, London School of Economics.

ENGELBRECHT, MARK C., Professor of Architecture; Dean of the College of Design. B.Arch., 1963, Iowa State; M.Arch., 1964, Columbia.

ENGEN, RICHARD L., Emeritus Professor of Biomedical Sciences. B.S., 1954, Iowa State; M.S., 1958, Colorado State; Ph.D., 1965, Iowa State.

EPSTEIN, ABRAHAM H., Emeritus Professor of Plant Pathology. B.S., 1952, Cornell; M.S., 1954, Rhode Island; Ph.D., 1969, Iowa State.

ESPONSON, JAMES H., Emeritus Professor of Chemistry; Distinguished Professor in Liberal Arts and Sciences. B.S., 1958, California Institute of Technology; Ph.D., 1962, Wisconsin.

ESSNIE, JEFFREY JEROME, Assistant Professor of Genetics, Development and Cell Biology. B.S., 1987, Iowa; Ph.D., 1996, Minnesota.

ESTERS, LEVONT, Assistant Professor of Agricultural Education and Studies; Assistant Professor of Curriculum and Instruction. B.S., 1995, Florida A&M; M.S., 2000, North Carolina A&T State; Ph.D., 2003, Pennsylvania State.

ESTES, SIMON, Adjunct Professor of Music. B.A., 1963, Iowa.

EULENSTEIN, OLIVER, Associate Professor of Computer Science. Ph.D., 1998, Bonn (Germany).

FLETCHER, LEHMAN, Emeritus Professor of Economics. B.S., 1954, Florida; Ph.D., 1960, California (Berkeley).

FLORA, CORNELIA B., Professor of Sociology; Charles F. Curtis Distinguished Professor in Agriculture and Life Sciences. A.B., 1968, California (Berkeley); M.S., 1966, Ph.D., 1970, Cornell.

FLOROS, IOANNIS, Assistant Professor of Finance. B.Sc., 1996, Piraeus (Greece); M.Sc., 1999, Warwick (Poland); Ph.D., 2008, Pittsburgh.

FLORY, DAVID, Lecturer in Geological and Atmospheric Sciences. B.A., 1992, Michigan (Flint); M.S., 2003, Iowa State.

FOEGEN, ANNE MARIE, Associate Professor of Curriculum and Instruction. B.S., 1986, Winona State; M.A., 1987, Ohio State; Ph.D., 1995, Minnesota.

FORD, CLARK FUGIER, Associate Professor of Food Science and Human Nutrition. B.A., 1975, California (Los Angeles); M.S., 1977, Ph.D., 1981, Iowa.

FOREMAN, CHARLES F., Emeritus Professor of Animal Science. B.S., 1948, M.S., 1949, Kansas State; Ph.D., 1953, Missouri.

FORKER, BARBARA E., Emeritus Professor of Kinesiology; Distinguished Professor in Education. B.S., 1942, Eastern Michigan; M.S., 1950, Iowa State; Ph.D., 1957, Michigan.

FOUAD, ABD_EL-AZIZ A., Emeritus Professor of Electrical Engineering; Anson Marston Distinguished Professor in Engineering. B.S., 1950, Cairo; M.S., 1953, Iowa; Ph.D., 1956, Iowa State.

FOWLER, GILES MERRILL, Emeritus Associate Professor of Greenlee School of Journalism and Communication. B.A., 1955, Westminster; M.S., 1956, Columbia.

FOX, LESLIE ELIZABETH, Associate Professor of Veterinary Clinical Sciences. B.A., 1972, Hollins College; D.V.M., 1984, Michigan State; M.S., 1989, Wisconsin.

FOX, RODNEY O., Professor of Chemical and Biological Engineering. B.S., 1982, M.S., 1985, Ph.D., 1987, Kansas State.

GARY, ROBERT FRANK, Assistant Professor of Accounting. B.S.E.E., 1988, New Mexico State; M.S.E.E., 1971, Southern Methodist; M.B.A., 2000, New Mexico; Ph.D., 2005, Arizona State.

GASSMANN, AARON JOHN, Assistant Professor of Entomology. B.A., 1997, Saint Thomas; Ph.D., 2003, New York (Stony Brook).

GAUGER, CARLYLE J., Emeritus Professor of Agricultural Education and Studies. B.S., 1939, M.S., 1955, Iowa State.

GAUTESEN, ARTHUR, Emeritus Professor of Mathematics. B.E., 1965, Cooper Union; Ph.D., 1968, Northwestern.

GEIGER, LOUIS G., Emeritus Professor of History. B.S., 1934, Central Missouri; M.A., 1940, Ph.D., 1948, Missouri.

GEMMILL, DOUGLAS D., Associate Professor of Industrial and Manufacturing Systems Engineering. B.S., 1972, M.S., 1986, Iowa State; Ph.D., 1988, Wisconsin.

GIRTON, JACK RICHARD, Professor of Biochemistry, Biophysics and Molecular Biology; University Professor. B.A., 1973, Oregon; Ph.D., 1979, Alberta.

GKRITZA, KONSTANTINA, Assistant Professor of Civil, Construction and Environmental Engineering. M.S.C.E., 2003, Virginia Polytechnic; Ph.D., 2006, Purdue.

GLADON, RICHARD J., Associate Professor of Horticulture. B.S., 1969, Ohio Northern; M.S., 1974, Ph.D., 1977, Ohio State.

GLANVILLE, THOMAS D., Professor of Agricultural and Biosystems Engineering. B.S., 1972, M.S., 1975, Ph.D., 1987, Iowa State.

GIBBONS, FREDERICK X., Professor of Psychology (Collaborator); Distinguished Professor in Liberal Arts and Sciences. B.A., 1972, Colgate; Ph.D., 1976, Texas.

GIBSON, DEBRA SOLBERG, Clinician in Greenlee School of Journalism and Communication. B.S., 1961, Iowa State.

GILBERT, STEPHEN, Lecturer in Psychology. B.S.E., 1992, Princeton; Ph.D., 1997, Massachusetts Institute of Technology.

GOGGIN, ALCIRA S., Assistant Professor of Agronomy. B.S., 1982, De Buenos Aires (Argentina); M.S., 1987, Ph.D., 1990, Mississippi.

GOLDMAN, ALAN I., Professor of Physics and Astronomy; Distinguished Professor in Liberal Arts and Sciences. B.S., 1979, M.A., 1980, Ph.D., 1984, New York (Stony Brook).

GOODWIN, JEAN, Associate Professor of English. B.A., 1979, J.D., 1984, Chicago; Ph.D., 1996, Wisconsin.

GORDON, MARK STEPHEN, Professor of Chemistry; Distinguished Professor in Liberal Arts and Sciences. B.S., 1963, Rensselaer; Ph.D., 1968, Carnegie Mellon.

GOUDY, WILLIS J., Emeritus Professor of Sociology; University Professor. B.A., 1964, St. Thomas; M.S., 1967, Ph.D., 1970, Purdue.

GRANT, DAVID, Associate Professor of Agronomy (Collaborator). B.S., 1971, New York (Stony Brook); Ph.D., 1977, Chicago.
GRANT, MICHAEL, Assistant Professor. B.S., 1973, Seattle; M.S., 1976, Ph.D., 1979, Iowa State.
GRAVES, DONALD JOHN, Emeritus Professor of Biochemistry; Charles F. Curtiss Distinguished Professor in Agriculture and Life Sciences. B.S., 1965, Illinois; Ph.D., 1959, Washington.
GREENBOWE, THOMAS J., Professor of Chemistry; Professor of Curriculum and Instruction. B.A., 1972, New Jersey; M.S., 1974, Indiana State; M.S., 1979, Ph.D., 1983, Purdue.
GREENLEE, JUSTIN J., Assistant Professor of Biomedical Sciences (Collaborator); Assistant Professor of Veterinary Pathology (Collaborator). B.A., 1995, Northern Iowa; D.V.M., 1999, Ph.D., 2003, Iowa State.
GREENLEE, MARY WEST, Assistant Professor of Biomedical Sciences. B.S., 1994, Ph.D., 1999, Iowa State.
GREGORY, DAVID JAMES, Associate Professor, Library. Associate Dean, Library. B.A., 1977, Iowa; M.A., 1979, Yale; M.A., 1986, Iowa.
GREINER, THOMAS H., Emeritus Associate Professor of Agricultural and Biosystems Engineering. B.S.A.E., 1967, Iowa State; M.S., 1972, Minnesota; Ph.D., 1980, Iowa State.
GREWELL, DAVID, Assistant Professor of Agricultural and Biosystems Engineering; Assistant Professor of Civil, Construction and Environmental Engineering. B.S., 1989, M.S., 2002, Ph.D., 2005, Ohio State.
GRIER, RONALD LEE, Emeritus Professor of Library; Associate Dean, Library. B.A., 1977, Iowa; M.A., 2007, Iowa State.
GRIFFITH, RONALD W., Associate Professor of Civil, Construction and Environmental Engineering; Assistant Professor of Biosystems Engineering. B.S., 1976, Butler; M.A., 1966, Ph.D., 1969, Northwestern.
GROHEK, CHRISTOPHER JACOB, Assistant Professor of Greenlee School of Journalism and Communication. B.S., 2000, Wisconsin (Stout); M.A., 2003, Marquette; Ph.D., 2008, Indiana.
GROSS, WILLIAM, Adjunct Instructor in Veterinary Clinical Sciences. B.S., 1990, Nebraska; M.S., 1997, M.S., 2000, California (Davis); D.V.M., 2005, Colorado State.
GROSDANIC, SINISA, Assistant Professor of Veterinary Clinical Sciences. D.V.M., 1998, Belgrade (Serbia); Ph.D., 2002, Iowa State.
GU, XUN, Professor of Genetics, Development and Cell Biology. B.S., 1985, M.S., 1987, Fudan (China); Ph.D., 1996, Texas.
GUAN, HANPING, Assistant Professor of Agronomy (Collaborator). B.S., 1983, Hua-Zhong Agricultural; M.S., 1986, Beijing Agricultural; Ph.D., 1990, Rutgers.
GUAN, YONG, Associate Professor of Electrical and Computer Engineering. B.S., 1980, M.S., 1986, Peking (China); Ph.D., 2002, Texas A&M.
GUERRA-DE CASTILLO, ZOILA, Associate Professor of Industrial and Manufacturing Systems Engineering (Collaborator). B.S., 1987, M.S., 1999, Universidad Tecnologica De Panama; Ph.D., 2006, Iowa State.
GUNDLACH, KATHRYN E., Lecturer in Kinesiology. B.S., 1975, St. Olaf College; M.S., 1977, Wisconsin (Lacrosse).
GUNNSETT, FIELDS, Associate Professor of Animal Science (Collaborator). B.S., 1975, California (Davis); M.S., 1977, Idaho; Ph.D., 1989, Wisconsin.
GUTHRIE, WILBUR D., Emeritus Professor of Entomology. B.S., 1950, M.S., 1951, Oklahoma State; Ph.D., 1958, Ohio State.
GUTOWSKI, WILLIAM J., Professor of Geological and Geophysical Sciences; Professor of Agronomy. B.S., 1976, Yale; Ph.D., 1984, Massachusetts Institute of Technology.
GUYYL, MAX E. JR., Assistant Professor of Psychology. B.S., 1985, Lehigh; M.S., 1990, Utah; Ph.D., 1998, Rutgers.
HALBUR, PATRICK G., Professor of Veterinary Diagnostic and Production Animal Medicine and Chair of the Department; Professor of Veterinary Pathology. D.V.M., 1986, M.S., 1992, Ph.D., 1995, Iowa State.
HALLE, HARRY W., Emeritus Professor of Electrical and Computer Engineering. B.S., 1942, M.S., 1949, Ph.D., 1953, Purdue.
HALL, CHARLES VIRDUS, Emeritus Professor of Horticulture. B.S., 1950, M.S., 1953, Arkansas; Ph.D., 1960, Kansas State.
HALL, RICHARD BRIAN, Professor of Natural Resource Ecology and Management and Interim Chair of the Department. B.S., 1969, Iowa State; Ph.D., 1974, Wisconsin.
HALLAM, J. ARNE, Professor of Economics and Chair of the Department: B.S., 1977 Brigham Young; M.S., 1980, Ph.D., 1983, California (Berkeley).
HALLAUER, ARNEL ROY, Emeritus Professor of Agronomy; Charles F. Curtiss Distinguished Professor in Agriculture and Life Sciences. B.S., 1954, Kansas State; M.S., 1958, Ph.D., 1960, Iowa State.
HALLING, SHIRLEY M., Assistant Professor of Veterinary Microbiology and Preventive Medicine (Collaborator). B.S., 1965, M.S., 1967, South Dakota State; Ph.D., 1975, Iowa.
HALLMARK, SHAUNA L., Associate Professor of Animal Science (Collaborator). B.S., 1981, Brigham Young; M.S., 1996, Utah State; Ph.D., 1999, Georgia Institute of Technology.
HAMILTON, EARL G., Emeritus Professor of Food Science and Human Nutrition; Emeritus Professor of Biochemistry, Biophysics and Molecular Biology; University Professor B.S., 1948, M.A., 1950, Texas; Ph.D., 1953, Minnesota.

HARSHF, Associate Professor of Agricultural and Biosystems Engineering (Collaborator). B.S., 1985, Zejian (China); B.S., 1992, Illinois.

HARY, RICHARD L., Emeritus Professor of Civil, Construction and Environmental Engineering; Anson Marston Distinguished Professor in Engineering. B.S., 1951, M.S., 1953, Ph.D., 1956, Iowa State.

HANNEMAN, LARRY F., Adjunct Associate Professor of Chemical and Biological Engineering. B.S., 1968, Iowa State; M.S., 1972, Kansas State.

HANNUM, THOMAS E., Emeritus Professor of Psychology. B.S., 1941, M.S., 1949, Iowa State; Ph.D., 1952, Nebraska.

HANSEN, SCOTT W., Associate Professor of Mathematics. B.S., 1983, Southwest Missouri; Ph.D., 1988, Wisconsin.

HARDING, CHRIS, Assistant Professor of Geological and Atmospheric Sciences; Assistant Professor of Computer Science. M.Sc., 1993, Free (Berlin); Ph.D., 2001, Houston.

HARMAVAGE, CONNIE P., Associate Professor of Educational Leadership and Policy Studies. B.S., 1962, Iowa State; M.S., 1964, Ph.D., 1972, Texas A&M.

HARTZLER, ROBERT G., Professor of Agronomy. B.S., 1977, California (Los Angeles); M.S., 1982, Montana; M.S., 1985, California (Riverside); Ph.D., 1996, Georgia.

HARRIS, BETH, Assistant Professor of Veterinary Pathology (Collaborator). B.S., 1984, Nebraska; M.S., 1986, Maryland; Ph.D., 2002, Nebraska.

HARRIS, DELBERT LINN, Professor of Animal Science; Professor of Veterinary Diagnostic and Production Animal Medicine. D.V.M., 1962, Ph.D., 1970, Iowa State.

HARRIS, MARY A., Adjunct Assistant Professor of Natural Resource Ecology and Management. B.A., 1977, California (Los Angeles); M.S., 1982, Montana; M.S., 1985, California (Riverside); Ph.D., 1996, Georgia.

HARRIS, WILLIAM ROY, Emeritus Professor of Entomology; Emeritus Professor of Natural Resource Ecology and Management. B.A., 1959, Cornell College; M.Ed., 1965, Ph.D., 1972, Texas A&M.

HARTLEY, RICHARD L., Emeritus Professor of Agricultural and Biosystems Engineering. B.S., 1947, Oklahoma State; M.S., 1950, Purdue; Ph.D., 1956, Iowa State.

HEIDEL, THEODORE JOHN, Professor of Mechanical Engineering. B.S.M.E., 1988, Wisconsin; M.S.M.E., 1990, Ph.D., 1994, Purdue.

HEILAND, JAMES R., Emeritus Professor of Architecture. B.Arch., 1952, Iowa State; M.Arch., 1958, Cranbrook.

HEILAND, SUSAN M., Associate Professor of Human Development and Family Studies. B.A., 1970, St. Olaf; M.S., 1972, Iowa State; Ph.D., 1977, Ohio State.

HEINDEL, THEODORE JOHN, Professor of Mechanical Engineering. B.S.M.E., 1988, Wisconsin; M.S.M.E., 1990, Ph.D., 1994, Purdue.

HEISE, JAMES ARTHUR, Lecturer in Mechanical Engineering. B.S., 1988, M.S., 2005, Iowa State.

HEISEN, CAROLYN D., Professor of Industrial and Manufacturing Systems Engineering. B.S., 1974, California (San Diego); Ph.D., 1978, Stanford.

HELD, SHIRLEY ELAINE, Emeritus Professor of Art and Design. B.S., 1945, M.S., 1952, Iowa State.

HELWICH, RICHARD II, Assistant Professor of Entomology (Collaborator). B.S., 1977, Depauw; M.B.A., 1985, California (Los Angeles).
HENDRICH, SUZANNE, Professor of Food Science and Human Nutrition. B.S., 1976, California (Los Angeles); Ph.D., 1985, California (Berkeley).

HENNESSY, HONGLI FENG, Emeritus Professor of Economics. B.S., 1995, Beijing Agricultural; Ph.D., 2001, Iowa State.

HERMAN, PAUL JACOB, Emeritus Associate Professor of Aerospace Engineering. B.S., 1947 M.S., 1951, Iowa State.

HERRELL, JAMES CHRISTIAN, Professor of Chemical and Biological Engineering; Associate Professor of Chemistry. B.S., 1990, Nebraska; Ph.D., 1995, Minnesota.

HIRA, LABH S., Professor of Accounting; Dean of the College of Business. B.S., 1986, M.S., 1987, Ludhiana; Ph.D., 1975, Missouri.

HIRA, TAHIRA K., Professor of Human Development and Family Studies; Executive Assistant to the President. B.A., 1963, Lahore; M.A., 1966, Panjab; M.S., 1974, Ph.D., 1976, Missouri.

HOLM, KAI-MING, Professor of Physics and Astronomy; Distinguished Professor in Liberal Arts and Sciences. B.S., 1923, Hong Kong; Ph.D., 1978, California (Berkeley).

HODGES, CLINTON, Emeritus Professor of Horticulture; Emeritus Professor of Agronomy; Emeritus Professor of Plant Pathology. B.S., 1962, M.S., 1964, Ph.D., 1967, Illinois.

HOLLIS, JAMES, Assistant Professor of Food Science and Human Nutrition. B.S., 1999, Ph.D., 2003, Oxford Brookes (UK).

HOLME, THOMAS, Professor of Chemistry. B.S., 1983, Loras College; Ph.D., 1987, Rice.

HOLLISTER, JOHN HEMMINGSON, Professor of Plant Pathology. B.A., 1963, Carleton; M.S., 1966, Minnesota; Ph.D., 1971, California (Davis).
IN YANG, ANIEFIIO, D., Adjunct Assistant Professor of Agricultural and Biosystems Engineering. B.S., 1976, Kansas; M.S., 1978, Ph.D., 1982, Oklahoma.

JARBOE, LAURA, Assistant Professor of Chemical and Biological Engineering. B.S., 2000, Kentucky; Ph.D., 2006, California (Los Angeles).

JEFFREY, CYNTHIA G., Associate Professor of Accounting. B.S., 1975, M.S., 1979, Iowa State; Ph.D., 1989, Minnesota.

JEFFINJA, SRDJUA, Associate Professor of Biomedical Sciences; Associate Professor of Animal Science. D.V.M., 1972, M.S., 1976, Belgrade; Ph.D., 1982, Iowa State.

JENKS, WILLIAM S., Professor of Chemistry. B.S., 1986, California (Los Angeles); Ph.D., 1991, Columbia.

JENSEN, HELEN HANNAY, Professor of Economics. B.A., 1968, Carleton; M.S., 1974, Minnesota; Ph.D., 1980, Wisconsin.

JERNIGAN, ROBERT L., Professor of Biophysics, Biophysics and Molecular Biology. B.S., 1963, California Institute of Technology; Ph.D., 1967, Stanford.

JIA, YAN-BIN, Associate Professor of Computer Science. B.S., 1988, Science and Technology (China); M.S., 1993, Ph.D., 1997 Carnegie Mellon.

JILES, DAVID C., Professor of Electrical and Computer Engineering. B.S., 1975, M.S., 1979, Iowa State; M.S., 1981, Iowa State.

JOENSEN, ALFRED W., Emeritus Associate Professor of Mechanical Engineering. B.S., 1957, M.S., 1966, Iowa State.

JOHANSEN, KRISTEN M., Professor of Biochemistry, Biophysics and Molecular Biology; Professor of Genetics, Development and Cell Biology. B.A., 1982, Pennsylvania; M.Phil., 1985, Ph.D., 1989, Yale.

JOHNSON, DENNIS C., Emeritus Professor of Chemistry; Distinguished Professor in Liberal Arts and Sciences. B.A., 1965, Bethel; Ph.D., 1967, Minnesota.

JOHNSON, HOWARD E., Emeritus Professor of Agricultural and Biosystems Engineering; Anson Marston Distinguished Professor in Engineering. B.S., 1949, M.S., 1960, Iowa State; M.S., 1984, Iowa; Ph.D., 1999, Iowa State.

JOHNSON, MARGARET S., Emeritus Assistant Professor of World Languages and Cultures. B.A., 1956, Oregon; M.A., 1974, Drake.

JOHNSON, STANLEY R., Emeritus Professor of Economics; Charles F. Curtiss Distinguished Professor in Agriculture and Life Sciences. B.A., 1961, Western Illinois; M.S., 1962, Texas Tech; Ph.D., 1966, Texas A&M.

JOHNSON, DAVID C., Professor of Physics and Astronomy; Distinguished Professor in Liberal Arts and Sciences. B.A., 1989, California (Santa Barbara); Ph.D., 1975, California (San Diego).

JOHNSON, DOUGLAS MARSHALL, Professor of Landscape Architecture and Chair of the Department; Professor of Community and Regional Planning and Chair of the Department. B.S., 1979, B.L.A., 1980, SUNY; M.L.A., 1982, Harvard; Ph.D., 1986, Washington.

KEREN, NIR, Assistant Professor of Agricultural and Biosystems Engineering. B.Sc., 1990, M.Sc., 1998, Ben Gurion (Israel); Ph.D., 2003, Texas A&M.

KING, ALEXANDER, Professor of Materials Science and Engineering. B.S., 1975, Sheffield (England); Ph.D., 1979, Oxford.

KING, DOUGLAS S., Professor of Kinesiology; Professor of Biomedical Sciences. B.A., 1980, California (Berkeley); M.A., 1981, Wake Forest; Ph.D., 1984, Ball State.

KINNEY, KATHRYN, Associate Professor of Educational Technology. B.A., 1979, Sheffield (UK); M.A., 1981, Teachers College; M.S., 1982, Rochester; Ph.D., 1988, Iowa State.

KLAIBER, FRED WAYNE, Professor of Civil, Construction and Environmental Engineering; Anson Marston Distinguished Professor in Engineering. B.S., 1962, M.S., 1964, Ph.D., 1968, Purdue.

KLIEMANN, WOLFGANG H., Professor of Mathematics and Chair of the Department. Dr.rer.nat, 1980, Bremen.

KLING, CATHERINE L., Professor of Economics. B.B.A., 1981, Iowa; Ph.D., 1988, Maryland.

KOCHE, STEVEN, Professor of Geological and Atmospheric Sciences (Collaborator). B.S., 1972, M.S., 1974, Wisconsin; Ph.D., 1979, Oklahoma.

KOELLNER, KENNETH J., Professor of Statistics and Chair of the Department; University Professor. B.S., 1972, Wisconsin (Parkside); Ph.D., 1977, Minnesota.

KOFOED, ROLF R., Assistant Professor of Ecology, Evolution and Organismal Biology (Collaborator); Assistant Professor of Natural Resource Ecology and Management (Collaborator). B.S., 1970, California (Davis); Ph.D., 1979, California (Berkeley).

KOGAN, VLADIMIR G., Adjunct Associate Professor of Physics and Astronomy. B.S., 1956, M.S., 1961, State Pedagogical Institute (Russia); Ph.D., 1977, Israel Institute of Technology.

KOHUT, MARIAN L., Associate Professor of Kinesiology. B.A., 1951, Purdue; M.S., 1986, Pennsylvania State; Ph.D., 1996, South Carolina.

KONAR, ARTHUR H., Senior Lecturer in Psychology. B.A., 1979, Oberlin College; M.A., 1980, Teachers College; Ph.D., 1985, Missouri.

KONG, SONG-CHANG, Assistant Professor of Mechanical Engineering. B.S., 1987, National Tsing-Hua (Taiwan); M.S., 1992, Ph.D., 1994, Wisconsin.

KOPPUL, JULIUS O., Emeritus Professor of Electrical and Computer Engineering. B.S., 1949, Wisconsin; M.S., 1954, Ph.D., 1958, Purdue.

KOSHIRO, AKIKO, Adjunct Instructor in Veterinary Clinical Sciences. B.V.Sc., 2005, Tokyo (Japan); D.V.M., 2008, Louisiana State.

KOTHARI, SURAJ C., Professor of Electrical and Computer Engineering; Professor of Computer Science. B.S., 1970, Poona; Ph.D., 1977, Purdue.

KOZIEL, JACEK ADAM, Associate Professor of Agricultural and Biosystems Engineering; Associate Professor of Civil, Construction and Environmental Engineering. M.S., 1989, Warsaw Technological (Poland); M.S., 1992, Alaska; Ph.D., 1998, Texas.

KRAFT, ALLEN ABRAHAM, Emeritus Professor of Food Science and Human Nutrition. B.S., 1947, M.S., 1949, Cornell; Ph.D., 1953, Iowa State.

KRAMER, MATTHEW J., Adjunct Associate Professor of Materials Science and Engineering. B.S., 1979, M.S., 1982, Rochester; Ph.D., 1988, Iowa State.

LAWSON, KAREN GRUBER, Associate Professor, Library; Associate Dean, Library. B.A., 1974, M.L.S., 1976, New York (Buffalo).

LEANDRO, LEONOR F., Assistant Professor of Plant Pathology. B.S., 1996, Universidade Tecnica De Lisboa, M.S., 1997, Nottingham (UK); Ph.D., 2002, Iowa State.

LEE, DAH-YINN, Emeritus Professor of Civil, Construction and Environmental Engineering. B.S., 1958, Chen Kung; Ph.D., 1964, Iowa State.

LEE, GYUNGHU, Professor of Engineering. B.S., 1977, Sogang (Korea); M.S., 1979, Korean Institute of Science and Technology; Ph.D., 1986, Illinois.

LEEMAN, ROBERT E., Professor of Political Science. B.A., 1966, Hankuk; M.A., 1971, California State (Sacramento); Ph.D., 1975, Colorado.

LEE, YOUNG-A, Assistant Professor of Apparel, Educational Studies and Hospitality Management. B.S., 1997, Yeungnam (South Korea); M.A., 2001, Ph.D., 2005, Michigan State.

LEIGH, PATRICIA, Associate Professor of Curriculum and Instruction. B.A., 1968, Ohio State; M.Ed., 1978, Arkansas; M.S., 1988, Oklahome; Ph.D., 1997, Iowa State.

LEONARD, KATHY S., Professor of World Languages and Cultures. B.A., 1979, California (Riverside); M.A., 1979, Santa Clara; B.A., 1983, Nevada (Las Vegas); Ph.D., 1991, California (Davis).

LESAR, RICHARD ALAN, Professor of Materials Science and Engineering and Chair of the Department. B.S., 1975, Michigan; Ph.D., 1981, Harvard.

LEVITAS, VALERY, Professor of Mechanical Engineering; Professor of Aerospace Engineering; Professor of Materials Science and Engineering. M.S., 1978, Kiev Polytechnic Institute (UISSP); Ph.D., 1981, Institute For Superhard Materials (USSR); Sc.D., 1984, Institute For Electronic Machinebuilding; Eng.D., 1995, Hannover (Germany).

LONGHES, ROBERT, Emeritus Professor of Civil, Construction and Environmental Engineering; University Professor. B.S., 1959, Ohio State; M.S., 1961, Ph.D., 1964, Iowa State.

LOPES, JOHN A, Assistant Professor of Food Science and Human Nutrition (Collaborator). B.S., 1980, M.S., 1983, Bombay (India); Ph.D., 1989, Water- loot (Canada).

LORD, WILLIAM, Emeritus Professor of Electrical and Computer Engineering; Anson Marston Distinguished Professor in Engineering. B.S., 1961, Ph.D., 1964, Nottingham.

LORENZ, FREDERICK O., Professor of Statistics; Professor of Psychology; Professor of Sociology; University Professor. B.S., 1970, Mankato; M.S., 1972, South Dakota State; Ph.D., 1980, Iowa State.

LORIMOR, JEFFERY C., Emeritus Associate Professor of Agricultural and Biosystems Engineering. B.S., 1967 Iowa State; M.S., 1970, Nebraska; Ph.D., 1996, Iowa State.

Lowe, Mark HOWARD, Associate Professor of Food Science and Human Nutrition. B.S., 1967, Ohio State; M.S., 1969, Ph.D., 1975, Michigan State.
LOVE, ROBERT D., Emeritus Associate Professor of Industrial and Manufacturing Systems Engineering. B.S., 1948, M.S., 1965, Iowa State.

LOVELY, WALTER G., Emeritus Professor of Agricultural and Biosystems Engineering. B.S., 1949, Maine.

LOWERY, JENNIFER, Senior Lecturer in English. B.S., 1974, Tennessee (Martin); M.A., 1981, South Carolina.

LOWITT, RICHARD, Emeritus Professor of History. B.S.S., 1943, City University of New York; M.A., 1945, Ph.D., 1950, Columbia.

LUBBERSTEDT, THOMAS, Associate Professor of Agriculture and Biosystems Engineering. B.A., 1949, M.A., 1956, Ph.D., 1962, Chicago.

LUEcke, GLENN R., Professor of Mathematics; Professor of Electrical and Computer Engineering. B.S., 1968, Michigan State; Ph.D., 1970, California Institute of Technology.

LUEcke, GREG R., Associate Professor of Mechanical Engineering. B.S., 1979, Iowa State; M.S., 1987, Yale; Ph.D., 1992, Pennsylvania State.

LUTZ, JACK HAROLD, Professor of Computer Science; Professor of Mathematics. B.S., 1976, M.A., 1979, M.S., 1981, Kansas; Ph.D., 1987, California Institute of Technology.

LYNCH, DAVID, Emeritus Professor of Physics and Astronomy; Distinguished Professor in Liberal Arts and Sciences. B.S., 1954, Rensselaer; M.S., 1955, Iowa State.

MALDONALD, RUTH SEAMAN, Professor of Food Science and Human Nutrition and Chair of the Department. B.S., 1979, Western Maryland College; M.S., 1981, Ph.D., 1985, Minnesota.

MACK, BARBARA M., Associate Professor of Greenlee School of Journalism and Communication. B.S., 1974, Iowa State; J.D., 1977, Drake.

MADDEN, BEVERLY S., Emeritus Associate Professor of Food Science and Human Nutrition. B.S., 1960, M.S., 1970, Iowa State.

MADDOX, ROGER D., Professor of Mathematics; Professor of Computer Science. B.A., 1969, Pomona; Ph.D., 1978, California (Berkeley).

MARTIN, RICHARD J., Professor of Biomedical Sciences. B.S./B.S.C., 1972, Ph.D., 1977, Liverpool (UK); D.Sc., 1997, Edinburgh (UK).

MARTIN, ROBERT ALLEN, Professor of Agricultural Education and Studies and Chair of the Department; Professor of Curriculum and Instruction. B.S., 1968, M.S., 1974, Purdue; Ph.D., 1981, Pennsylvania State.

MARTIN, RYAN, Assistant Professor of Mathematics. B.S., 1995, Delaware; Ph.D., 2000, Rutgers.

MASHAW, LANCE HICKS, Emeritus Professor of Civil, Construction and Environmental Engineering. B.S., 1946, Illinois; M.S., 1950, Iowa.

MASON, TERRY WAYNE, Adjunct Assistant Professor of Psychology. B.A., 1977, Cornell College; Ph.D., 1982, Texas Tech.

MASTERSON, CHARLES P., Adjunct Associate Professor of Architecture. B.Arch., 1969, Boston Architectural Center; M.Arch., 1971, New York (Buffalo).

MATAVA, TOBIE, Assistant Professor, Library. B.A., 1992, M.A., 1995, Missouri (Kansas City); M.L.S., 2006, Maryland.

MATHEWS, ELEANOR R., Emeritus Associate Professor. Library. B.A., 1958, Wheaton (Massachusetts); M.A., 1975, Iowa.

MATZAVINOS, ANASTASIOS, Assistant Professor of Mathematics. B.Sc., 1998, Crete (Greece); M.Sc., 2001, Athens (Greece); Ph.D., 2006, Dundee (Scotland).

MAVES, JOHN H., Assistant Professor of Architecture. B.Arch., 1968, Notre Dame; M.Arch., 1972, Minnesota.

MAYORDOME, ELVIRA, Associate Professor of Computer Science (Collaborator). B.S., 1990, Zaragoza (Spain); Ph.D., 1994, Polytechnic (Spain).

MAZE, THOMAS H., Professor of Civil, Construction and Environmental Engineering. B.S., 1975, Iowa State; M.E., 1977, California (Berkeley); Ph.D., 1982, Michigan State.

MAZUR, ROBERT EDWARD, Associate Professor of Sociology. B.S., 1976, Iowa; M.A., 1979, Ph.D., 1982, Brown.

McCALL, JAMES D., Professor of Electrical and Computer Engineering. B.S., 1982, M.S., 1986, Ph.D., 1992, Georgia Institute of Technology.

McCALLUM, RALPH W., Adjunct Professor of Materials Science and Engineering. B.A., 1969, Carleton; Ph.D., 1977, California (San Diego).

MCCARLEY, ROBERT E., Emeritus Professor of Veterinary Clinical Sciences. B.S., 1948, M.S., 1958, Ph.D., 1961, Iowa State.

MCCRAIL, MAURA, Adjunct Assistant Professor of Genetics, Development and Cell Biology. B.S., 1988, Massachusetts; Ph.D., 1996, Minnesota.

MCLARATH, TIMOTHY J., Emeritus Associate Professor of Art and Design. B.A., 1966, Dominican (Wisconsin); M.S., 1969, Wisconsin.

MCNILLAN, THELMA J., Emeritus Professor of Food Science and Human Nutrition. B.S., 1940, Arizona; M.S., 1942, Nebraska; Ph.D., 1951, Cornell.

MCMINN, HOWARD STEPHEN, Assistant Professor, Library. B.S.A.A.E., 1984, Purdue; M.L.S., 1993, Indiana.

MCMABB, HAROLD S. JR., Emeritus Professor of Plant Pathology; Emeritus Professor of Natural Resource Ecology and Management; University Professor. B.S., 1949, Nebraska; M.S., 1951, Ph.D., 1954, Yale.

MC SHAY, JAMES C., Adjunct Assistant Professor of Curriculum and Instruction. B.A., 1993, New York (Osage); M.S., 1996, Ph.D., 2000, Iowa State.

MEEEK, WILLIAM Q. JR., Professor of Statistics; Distinguished Professor in Liberal Arts and Sciences. B.S., 1972, Clarkson; M.S., 1973, Ph.D., 1975, Union.

MEYERS, WILLIAM H., Emeritus Professor of Chemistry; Distinguished Professor in Liberal Arts and Sciences. B.S., 1948, California Institute of Technology; M.S., 1950, Ph.D., 1952, Wisconsin.

MEYER, WALTER THOMAS, Adjunct Professor of Physics and Astronomy. B.A., 1969, Wesleyan; Ph.D., 1971, Cornell.

MICKELSON, STEVEN K., Associate Professor of Agricultural and Biosystems Engineering. B.S., 1982, M.S., 1984, Ph.D., 1991, Iowa State.

MILLEN, PAMELA W., Lecturer in Curriculum and Instruction. B.S., 1969, Iowa State; M.S.T., 1971, Drake.

MILLER, CATHY, Assistant Professor of Veterinary Microbiology and Preventive Medicine. B.A., 1993, Ph.D., 2001, Missouri.

MILLER, ELIZABETH S., Emeritus Professor of Art and Design; Distinguished Professor in Design. B.F.A., 1951, Nebraska; M.F.A., 1967, Drake.

MILLER, GERALD AREY, Professor of Agronomy; Associate Dean of the College of Agriculture and Life Sciences. B.S., 1985, Virginia Polytechnic Institute; M.S., 1971, Ph.D., 1974, Iowa State.

MILLER, GORDON J. JR., Professor of Chemistry. B.S., 1982, Rochester; Ph.D., 1986, Chicago.

MILLER, GREGORY SCOTT, Professor of Agricultural Education and Studies; Professor of Curriculum and Instruction. B.S., 1987, M.Ed., 1990, Auburn; Ph.D., 1992, Ohio State.

MILLER, KATHRYN M., Emeritus Associate Professor of Human Development and Family Studies. B.S., 1959, Iowa State; M.S., 1964, Cornell.

MILLER, RICHARD KEITH, Emeritus Professor of Mathematics; Distinguished Professor in Liberal Arts and Sciences. B.S., 1961, Iowa State; M.S., 1962, Ph.D., 1964, Wisconsin.

MILLER, WILLIAM WADE, Professor of Agricultural Education and Studies; Professor of Curriculum and Instruction. B.S., 1974, Texas A&M; M.Ed., 1976, Stephen F. Austin; Ph.D., 1980, Texas A&M.

MILLER, WYATT A., Professor of Plant Pathology; Professor of Biochemistry, Biophysics and Molecular Biology. B.A., 1978, Carleton; Ph.D., 1984, Wisconsin.

MILLMAN, SUZANNE, Associate Professor of Animal Science. B.S., 1981, Drake; Ph.D., 1985, Arizona.

MILLEN, PAMELA W., Lecturer in Curriculum and Instruction. B.S., 1969, Iowa State; M.S.T., 1971, Drake.

MILLER, CATHY, Assistant Professor of Veterinary Microbiology and Preventive Medicine. B.A., 1993, Ph.D., 2001, Missouri.

MINION, FRANK C., Professor of Veterinary Microbiology and Preventive Medicine. B.S., 1972, M.S., 1977, Memphis; Ph.D., 1983, Alabama (Birmingham).

MITRA, AMBAR, Associate Professor of Aerospace Engineering. B.S., 1969, M.S., 1972, Calcutta; Ph.D., 1979, Indian Institute of Science.

MOORE, KENNETH J., Professor of Agronomy. B.S., 1980, South Carolina; M.A.E., 1972, Washington (St. Louis); Ed.D., 2005, B.S.

MOORE, EMILY K., Associate Professor of Industrial and Manufacturing Systems Engineering. B.S., 1942, Iowa State.

MOORMAN, ROBERT B., Emeritus Professor of Natural Resource Ecology and Management. B.S., 1939, M.S., 1942, Ph.D., 1953, Iowa State.

MORGAN, DEAN, Adjunct Instructor in Veterinary Clinical Sciences. B.S., 1996, Montana State; D.V.M., 2007, B.S.

MORGAN, PAUL EMERSON, Emeritus Professor of Civil, Construction and Environmental Engineering. B.S., 1944, M.S., 1966, Iowa State.

MORRICAL, DANIEL GENE, Professor of Animal Science. B.S., 1977, Purdue; M.S., 1982, Ph.D., 1984, New Mexico State.

MORRIS, ALISON L., Assistant Professor of Psychology. B.S., 1980, M.S., 1982, Wisconsin; Ph.D., 2000, Boston.

MORRIS, JOHN CHARLES, Assistant Professor of Agricultural Education and Studies. B.S., 1974, M.S., 1975, Ph.D., 1996, Iowa State.

MORRIS, JOSEPH E., Associate Professor of Natural Resource Ecology and Management. B.S., 1979, Iowa State; M.S., 1982, Texas A&M; Ph.D., 1988, Mississippi State.

MORROW, PAULA C., Professor of Management; University Professor. B.A., 1973, Maryland; M.S., 1975, Virginia Polytechnic Institute; Ph.D., 1978, Iowa State.

MORTON, LOIS WRIGHT, Associate Professor of Sociology. B.S., 1972, Bowling Green; M.S., 1977, Syracuse; Ph.D., 1998, Cornell.

MOSCHINI, GIANCARLO, Professor of Economics. B.S., 1978, Catholic (Italy); Ph.D., 1986, Guelph.

MOYER, RUTH P., Emeritus Professor of Apparel, Educational Studies and Hospitality Management; Emeritus Professor of Curriculum and Instruction; Mary B. Welch Distinguished Professor of Family and Consumer Sciences. B.S., 1941, M.S., 1949, Ph.D., 1969, Cornell.

MU, ALLI, Associate Professor of World Languages and Cultures. B.A., 1982, M.A., 1984, Shandong (China); Ph.D., 1996, New York (Stony Brook); M.S., 2001, Marist College.

NAKADATE, NEIL EDWARD, Emeritus Professor of World Languages and Cultures. B.A., 1979, M.S., 1982, Ph.D., 1985, Iowa State.

NAMBIKOVIL, GARY P, Associate Professor of Plant Pathology. B.S., 1986, M.S., 1988, Illinois; Ph.D., 1992, California (Davis).

MULFORD, CHARLES L., Emeritus Professor of Sociology. B.S., 1958, M.S., 1959, Ph.D., 1962, Iowa State.

MULLEN, RUSSELL E., Professor of Agronomy. B.S., 1971, M.S.E.D., 1972, Northwest Missouri; Ph.D., 1975, Purdue.

MUSZYNSKI, MICHAEL GERARD, Adjunct Assistant Professor of Genetics, Development and Cell Biology. B.A., 1985, Toledo; Ph.D., 1992, Iowa State.

MOYER, RUTH P., Emeritus Professor of Apparel, Educational Studies and Hospitality Management; Emeritus Professor of Curriculum and Instruction; Mary B. Welch Distinguished Professor of Family and Consumer Sciences. B.S., 1941, M.S., 1949, Ph.D., 1969, Cornell.

MU, ALLI, Associate Professor of World Languages and Cultures. B.A., 1982, M.A., 1984, Shandong (China); Ph.D., 1996, New York (Stony Brook); M.S., 2001, Marist College.

ONG, SAV K., Professor of Civil, Construction and Environmental Engineering. B.E., 1980, Malaya (Malaysia); M.S., 1987, Vanderbilt; Ph.D., 1990, Cornell.

OPRIESSNIG, TANJA I., Assistant Professor of Veterinary Diagnostic and Production Animal Medicine. D.V.M., 2002, Veterinary Medicine (Austria); Ph.D., 2006, Iowa State.

ORAZEM, PETER FRANCIS, Professor of Economics; University Professor. B.A., 1977, Kansas; M.Phil., 1990, Ph.D., 1983, Yale.

OVIEDO, PEDRO MARCELO, Assistant Professor of Economics. B.S., 1993, M.S., 1995, Nacional De La Organismal Biology (Collaborator); Professor of Industrial and Manufacturing Systems Engineering. B.S., 1993, Orissa Veterinary College; M.S., 1988, Ph.D., 1992, Michigan State.

PALMER, MITCHELL VAN, Assistant Professor of Veterinary Pathology (Collaborator). B.S., 1985, Alma College; M.S., 1988, Ph.D., 1992, Michigan State.

PAN, JUN, Lecturer in Mathematics. M.S., 1984, Henan Normal (China); Ph.D., 2000, Magdeburg (Germany).

PARRISH, FREDERICK C., Emeritus Professor of Agricultural Engineering; Anson Marston Distinguished Professor of Engineering. B.S., 1974, Pennsylvania State; M.S., 1989, Ph.D., 1998, Maryland.

PATTERSON, PATRICK E., Emeritus Professor of Industrial and Manufacturing Systems Engineering. B.S., 1972, Springfield; M.S., 1978, Cleveland State; Ph.D., 1984, Texas A&M.

PAULSEN, ARNOLD ALLEN, Emeritus Professor of Economics. B.S., 1951, Ph.D., 1959, Iowa State.

PAVLAT, JOHN R., Emeritus Associate Professor of Electrical and Computer Engineering. B.S., 1955, South Dakota School of Mines; M.S.E.E., 1961, Iowa State.

PAYNE, JACK, Professor of Natural Resource Ecology and Management; Vice President. B.A., 1969, Temple; M.S., 1979, Ph.D., 1983, Utah State.

PAYNE, WILLIAM DONALD, Associate Professor of English; Associate Professor of Curriculum and Instruction. B.A., 1967, Louisville; M.A., 1968, Ph.D., 1980, Illinois.

PEARCE, ROBERT BRENT, Emeritus Professor of Agronomy. B.S., 1963, California (Davis); M.S., 1965, Ph.D., 1967, Virginia Polytechnic Institute.

PECHARKY, VITALI K., Professor of Materials Science and Engineering; Anson Marston Distinguished Professor in Engineering. M.S., 1976, Ph.D., 1979, USSR.
PETERS, JOHN H., Emeritus Professor of Agricultural and Biosystems Engineering. B.S., 1951, Cornell; M.S., 1952, Ph.D., 1955, Iowa State.

PENDAR, NICK, Assistant Professor of English. B.A., 1992, Aard (Iran); M.A., 2000, Ph.D., 2005, Toronto (Canada).

PERRY, RICK, Associate Professor of Veterinary Pathology (Collaborator). B.S., 1979, Columbus State; D.V.M., 1986, Ph.D., 1990, Georgia.

PESEK, JOHN T. JR., Emeritus Professor of Agronomy; Charles F. Curtiss Distinguished Professor in Agriculture and Life Sciences. B.S., 1943, M.S., 1947, Texas A&M; Ph.D., 1950, North Carolina State.

PETERS, DAVID J., Assistant Professor of Sociology. B.S., 1994, Minnesota; M.S., 1996, Ph.D., 2006, Missouri.

PETERS, JUSTIN, Professor of Mathematics. B.A., 1968, Reed; Ph.D., 1973, Minnesota.

PETERS, REUBEN J., Associate Professor of Biochemistry, Biophysics and Molecular Biology. B.S., 1992, California (San Diego); Ph.D., 1996, California (San Francisco).

PETERSON, CARLA ANN, Professor of Human Development and Family Studies; Associate Dean of the College of Human Sciences. B.S., 1975, Iowa State; M.A., 1981, South Dakota; Ph.D., 1991, Minnesota.

PETERSON, FRANCIS, Emeritus Professor of Physics and Astronomy. B.E.E., 1964, Rensselaer; Ph.D., 1968, Cornell.

PETERSON, JANE W., Professor of Greenlee School of Journalism and Communication. B.A., 1972, Iowa; M.S., 1982, Ph.D., 1987 Iowa State.
PRITCHARD, JAMES, Adjunct Assistant Professor of Military Science and Tactics. B.S., 2005, Iowa State.

PORTER, MARIAH CLARISE, Adjunct Instructor in Military Science and Tactics. B.S., 2005, Iowa State.

POTTER, ALLAN GEORGE, Emeritus Professor of Electrical Engineering. B.S., 1955, Kansas State; M.S., 1959, Ph.D., 1966, Iowa State.

POTTER, ALLAN GEORGE, Emeritus Professor of Chemistry. B.S., 1943, Monmouth; Ph.D., 1952, Iowa State.

POTTER, JEFFREY LYNN, Professor of Music. B.S., 1973, Iowa State; Ph.D., 1994, Cornell.

PROKOS, ANASTASIA HELENE, Assistant Professor of Sociology. B.S., 1992, Ph.D., 2001, Florida State.

PROZOROV, RUSLAN, Assistant Professor of Physics and Astronomy. M.Sc., 1992, Institute of Steel and Alloys (Moscow); Ph.D., 1998, Bar-Ilan (Israel).

PRUDA, JACOB, Associate Professor of Occupational Science. B.S., 1979, Fort Hays; M.S., 1980, Ph.D., 1983, Kansas State.

PRUSA, KENNETH JOHN, Professor of Food Science and Human Nutrition; Professor of Animal Science. B.S., 1979, Fort Hays; M.S., 1980, Ph.D., 1983, Kansas State.

PRUSI, MARIE, Associate Professor of English. M.S., 1977, Nicholas Copernicus (Poland); Ph.D., 1981, Nicholas Copernicus (Poland).

PURSEY, DEREK L., Emeritus Professor of Physics and Astronomy. B.S., 1948, Ph.D., 1952, Glasgow.

QIAO, DAIJ, Assistant Professor of Electrical and Computer Engineering. B.S., 1994, Tsinghua (China); M.S., 1998, Ohio State; Ph.D., 2004, Michigan.

QUIGLEY, JAMES, Professor of Animal Science Collaborator. B.S., 1979, M.S., 1982, New Hampshire; Ph.D., 1985, Virginia Polytechnic.

RAJAGOPAL, LAKSHMAN, Assistant Professor of Apparel, Educational Studies and Hospitality Management. B.S., 1998, SIES College (India); M.A., 2004, Ph.D., 2007, Nebraska.

RAJU, SEKAR, Assistant Professor of Marketing. B.E., 1991, Bharathiar (India); M.B.A., 1994, Bharathidasan (India); M.A., 2001, Ph.D., 2002, Ohio State.

RAMAMOORTHY, ADITYA, Assistant Professor of Electrical and Computer Engineering. B.Tech., 1999, Indian Institute of Technology; Ph.D., 2005, California (Los Angeles).

RAMAN, DAVE, Associate Professor of Agricultural and Biosystems Engineering. B.S., 1986, Rochester Institute of Technology; Ph.D., 1994, Cornell.

RAMIREZ, ALEJANDRO, Assistant Professor of Veterinary Diagnostic and Production Animal Medicine. B.S., 1989, Iowa State; M.Ph., 2004, Iowa.

RANDALL, JESSE ALLEN, Assistant Professor of Natural Resource Ecology and Management. B.S., 1999, Cornell; Ph.D., 2006, Michigan State.

RANDIC, MIRJANA, Emeritus Professor of Biomedical Sciences. M.D., 1959, Ph.D., 1962, Zagreb.

RAO, ARAGULA GURURAJ, Professor of Biochemistry, Biophysics and Molecular Biology and Chair of the Department. M.S., 1974, Gauhati (India); Ph.D., 1981, Mysore (India).

RAMUSSEN, JOREN S., Emeritus Professor of Political Science; Emeritus Professor of Curriculum and Instruction; Distinguished Professor in Liberal Arts and Sciences. A.B., 1957, Indiana; M.A., 1958, Ph.D., 1962, Wisconsin.

RECTANUS, ELIZABETH S., Lecturer in World Languages and Cultures. B.S., 1972, Mississippi; J.D., 1974, M.A., 1979, Mississippi State.

RECTANUS, MARK W., Professor of World Languages and Cultures and Chair of the Department. B.A., 1975, Valparaiso, M.A., 1977, Ph.D., 1983, Washington (St. Louis).

REDDY, MANJU B., Associate Professor of Food Science and Human Nutrition. B.S., 1976, M.S., 1978, Osmania (India); Ph.D., 1987, Texas A&M.

REDMOND, JAMES R., Emeritus Professor of Ecology, Evolution and Organismal Biology. B.S., 1949, Cincinnati; Ph.D., 1954, California (Los Angeles).

REECE, WILLIAM O., Emeritus Professor of Biomedical Sciences; University Professor. D.V.M., 1954, Ph.D., 1965, Iowa State.

REECEY, JAMES M., Associate Professor of Animal Science. B.S., 1990, South Dakota State; M.S., 1992, Missouri; Ph.D., 1995, Purdue.

REGIS, KAREN B., Assistant Professor of Veterinary Microbiology and Preventive Medicine (Collaborator). B.S.M.T., 1981, Western Carolina; Ph.D., 1996, North Carolina.
ROBERTS, DONALD M., Emeritus Professor of Mechanical Engineering. B.Sc., 1945, Alberta; M.Sc., 1949, Ph.D., 1953, Purdue.

ROBERTS, RONALD A., Adjunct Associate Professor of Aerospace Engineering. B.S., 1979, Purdue; M.S., 1981, Ph.D., 1985, Northwestern.

ROBERTSON, ALISON E., Assistant Professor of Plant Pathology. B.S., 1991, Natal (South Africa); M.Phil., 1995, Zimbabwe (Africa); Ph.D., 2003, Clemson.

ROBERTSON, DONALD S., Emeritus Professor of Genetics, Development and Cell Biology. A.B., 1947, Stanford; Ph.D., 1951, California Institute of Technology.

ROBSON, RICHARD M., Professor of Animal Science; Professor of Biochemistry; Biophysics and Molecular Biology; Professor of Food Science and Human Nutrition. B.S., 1964, M.S., 1966, Ph.D., 1969, Iowa State.

ROBYT, JOHN F., Professor of Biochemistry, Biophysics and Molecular Biology. B.S., 1958, St. Louis; Ph.D., 1962, Iowa State.

RODDE, KATHLEEN, Adjunct Assistant Professor of World Languages and Cultures. A.B., 1995, Whitman College; M.A., 1998, Ph.D., 2006, Iowa State.

ROE, KEVIN J., Adjunct Assistant Professor of Natural Resource Ecology and Management; Adjunct Assistant Professor of Education and Organizational Biology. B.S., 1988, M.S., 1994, Georgia; Ph.D., 1999, Alabama.

ROETTGER, CHRISTIAN G., Lecturer in Mathematics. M.S., 1989, Augsburg (Germany); Ph.D., 2000, East Anglia (UK).

ROGERS, CARL, Assistant Professor of Landscape Architecture. B.Arch., 1993, Kansas State; M.L.A., 1997, Rhode Island School of Design.

Rollels, Derrick K., Professor of Chemical and Biological Engineering; Professor of Statistics; Assistant Dean of the College of Engineering. B.S., 1979, Kansas; M.S., 1976, M.S., 1979, Ph.D., 1980, Ohio State.

Rosa, Anna, Associate Professor of Physics and Astronomy. B.S., 1985, La Sapienza (Italy); Ph.D., 1992, McGill (Canada).

Rosenbusch, Marcia H., Adjunct Associate Professor of World Languages and Cultures; Adjunct Associate Professor of Curriculum and Instruction. B.S., 1965, Oregon State; M.S., 1966, Ph.D., 1987, Iowa State.

Rosenstock, Martin, Lecturer in World Languages and Cultures. M.A., 2002, John F. Kennedy; Wolfgang Goethe (Germany); Ph.D., 2007, California (Santa Barbara).

Ross, Dennis Kent, Emeritus Professor of Physics and Astronomy. B.S., 1964, California Institute of Technology; Ph.D., 1968, Stanford.

Ross, Jason W., Assistant Professor of Animal Science. B.S., 2000, Iowa State; M.S., 2003, Ph.D., 2006, Oklahoma State.

Roth, James Allen, Professor of Veterinary Microbiology and Preventive Medicine; Clarence Hartley Covaught Distinguished Professor in Veterinary Medicine. D.V.M., 1975, M.S., 1979, Ph.D., 1981, Iowa State.

Rothschild, Max F., Professor of Animal Science; Charles F. Curtiss Distinguished Professor in Agriculture and Life Sciences. B.S., 1974, California (Davis); M.S., 1975, Wisconsin; Ph.D., 1978, Cornell.

Rover, Diane Thiede, Professor of Electrical and Computer Engineering; Associate Dean of the College of Engineering. B.S., 1984, M.S., 1986, Ph.D., 1989, Iowa State.

Rowe, Eric W., Assistant Professor of Biomedical Sciences. D.V.M., 1999, Ph.D., 2005, Iowa State.

ROVLING, MATTHEW J., Assistant Professor of Food Science and Human Nutrition. B.S., 1999, Nebraska (Kearney); Ph.D., 2004, Iowa State.

RUIAN, LU, Assistant Professor of Computer Science. B.E., 1996, Tsinghua (China); M.S., 1999, Ph.D., 2001, Minnesota.

RUDOLPH, WILLIAM B., Emeritus Professor of Mathematics; Emeritus Professor of Curriculum and Instruction. B.A., 1960, Bethany (West Virginia); M.S., 1965, Ph.D., 1969, Purdue.

RUEDENBERG, KLAUS, Emeritus Professor of Chemistry; Emeritus Professor of Physics and Astronomy; Distinguished Professor in Liberal Arts and Sciences. Abitur, 1938, Bielefeld; M.S., 1944, Fribourg; Ph.D., 1950, Zurich; Ph.D., 1975, (Hon) Basel.

RULE, LITA C., Associate Professor of Natural Resource Ecology and Management. B.S., 1975, M.S., 1982, Philippines; Ph.D., 1988, Texas A&M.

RUSSELL, DANIEL W., Professor of Human Development and Family Studies. B.S., 1975, Tulsa; Ph.D., 1980, California (Los Angeles).

RUSSELL, MARTHA E., Emeritus Adjunct Associate Professor of Chemistry B.S., 1945, Rochester; M.A., 1947, New York (Buffalo); Ph.D., 1954, Purdue.

RUSSELL, WILBERT A., Emeritus Professor of Agronomy, Charles F Curtiss Distinguished Professor in Agriculture and Life Sciences. B.S.A., 1942, Manitoba; M.S., 1947, Ph.D. 1952, Minnesota.

RUST, ROBERT E., Emeritus Professor of Animal Science; Emeritus Professor of Food Science and Human Nutrition. B.S.A., 1951, Wisconsin; M.S., 1954, Michigan State.

SACCO, RANDY E., Associate Professor of Veterinary Microbiology and Preventive Medicine (Collaborator). B.S., 1981, M.S., 1983, Iowa State; Ph.D., 1987, Texas A&M.

SADOW, AARON DAVID, Assistant Professor of Chemistry. B.S., 1997 Pennsylvania State; Ph.D., 2003, California (Berkeley).

SAGAKUCHI, DONALD S., Associate Professor of Genetics, Development and Cell Biology; Associate Professor of Biomedical Sciences. B.S., 1979, Ph.D., 1984, New York (Albany).

SAKAI, MARY R., Adjunct Instructor in Veterinary Clinical Sciences. B.S., 2003, California (Berkeley); D.V.M., 2007 Kansas State.

SANDERS, DONALD E., Emeritus Professor of Mathematics. B.A., 1949, Cornell College; M.S., 1951, California Institute of Technology; Ph.D., 1953, Wisconsin.

SANDOR, ELLEN, Associate Professor of Art and Design (Collaborator). B.A., 1983, Brooklyn College; M.F.A., 1975, School of the Art Institute of Chicago.

SANDOR, JONATHAN A., Professor of Agronomy; Professor of Geophysical and Atmospheric Sciences. B.A., 1974, California (Santa Barbara); M.S., 1979, Ph.D., 1983, California (Berkeley).

SCALES, COLIN GUY, Professor of Animal Science (Collaborator). B.S., 1969, Hull; Ph.D., 1972, Wales.

SCHALINSKE, KEVIN A., Associate Professor of Food Science and Human Nutrition. B.S., 1983, M.S., 1988, Ph.D., 1992, Wisconsin.

SCHALLER, FRANK W., Emeritus Professor of Agronomy. B.S., 1937 Wisconsin; M.S., 1940, Ph.D., 1948, West Virginia.

SCHIEF, KAREN R., Senior Lecturer in Psychology. B.A., 1982 California (Santa Cruz); Ph.D., 1999, Iowa.

SCHILLING, KEVIN, Associate Professor of Music; Associate Professor of Curriculum and Instruction. A.B., 1969, Southern California; M.M., 1971, D.M., 1985, Indiana.

SCHMIALIAN, JOERG, Professor of Physics and Astronomy. M.S., 1990, Merseburg (Germany); Ph.D., 1993, Berlin (Germany).

SCHMERR, LESTER W. JR., Professor of Aerospace Engineering. B.S., 1965, Massachusetts Institute of Technology; Ph.D., 1970, Illinois Institute of Technology.

SCHMIDT-RÖHR, KLAUS, Professor of Chemistry. Ph.D., 1991, Mainz (Germany).

SCHNEIDER, LEO R., Emeritus Professor of Kinesiology; Emeritus Professor of Curriculum and Instruction. B.S., 1949, Iowa State; M.S., 1950, Washington State.

SCHNEIDER, PIA, Assistant Professor of Art and Design (Collaborator); Assistant Professor of Architecture (Collaborator). B.Arch., 1965, Swiss Federal Institute of Technology; M.Arch., 1987, Southern California Institute of Arch.

SCHNEIDER, STEPHAN Q., Assistant Professor of Chemical and Biological Engineering; Anson Marston Distinguished Professor in Agriculture and Life Sciences. B.S., 1943, Saskatchewan; Ph.D., 1949, Cornell.

SCHRETER, JOHN R., Professor of Economics. B.S., 1973, California Institute of Technology; Ph.D., 1981, Minnesota.

SCHRADER, GLENN L., Emeritus Professor of Chemical and Biological Engineering. B.S., 1972, Iowa State; Ph.D., 1976, Wisconsin.

SCHROETER, JOHN R., Professor of Economics. B.S., 1973, California Institute of Technology; Ph.D., 1981, Minnesota.

SCHUH, JOHN H., Professor of Educational Leadership and Policy Studies; Distinguished Professor in Education. B.A., 1989, Wisconsin (Oshkosh); M.S., 1972, Ph.D., 1973, Arizona State.

SCHWAB, CHARLES V., Professor of Agricultural and Biosystems Engineering. B.S., 1979, M.S., 1982, Ph.D., 1989, Kentucky.

SCHWARTZ, JAMES W., Emeritus Professor of Greekl School of Journalism and Communication. B.S., 1941, M.S., 1943, Iowa State.

SCHWENKEN, KATHERINE, Professor of Architecture; Associate Dean of the College of Design. B.A., 1978, M.Arch., 1980, Iowa State.

SCOTT, ALBERT DUNCAN, Emeritus Professor of Agronomy. B.S.A., 1943, Saskatchewan; Ph.D., 1949, Cornell.

SCOTT, LARRY R., Adjunct Instructor in Military Science and Tactics.

SCOTT, MARVIN PAUL, Associate Professor of Agronomy (Collaborator). B.S., 1986, Iowa State; Ph.D., 1992, Purdue.

SCOTT, THOMAS MARVIN, Emeritus Associate Professor of Electrical Engineering. B.S., 1953, Maryland; Ph.D., 1962, Wisconsin.

SCUPHAM, ALEXANDRA, Assistant Professor of Veterinary Microbiology and Preventive Medicine (Collaborator). B.S., 1994, Ph.D., 2000, Wisconsin.

SEABRIDGE, RICHARD C., Emeritus Professor of Chemical and Biological Engineering; Anson Marston Distinguished Professor in Engineering. B.S., 1957, Rhode Island; M.S., 1959, Ph.D., 1961, Iowa State.

SEVERSKE, LEVERNE K., Emeritus Associate Professor of Aerospace Engineering. B.S., 1958, M.S., 1961, Ph.D., 1964, Iowa State.

SHAHAN, JAMES CLINTON, Adjunct Assistant Professor of Agricultural and Biosystems Engineering. B.S., 1979, M.S., 1985, Iowa State.

SHANE, JENNIFER, Assistant Professor of Civil, Construction and Environmental Engineering. B.S., 2000, Colorado School of Mines; M.S., 2003, Ph.D., 2006, Colorado.

SHANK, WESLEY IVAN, Emeritus Professor of Architecture. B.A., 1961, California (Berkeley); M.Arch., 1968, McGill.

SHANKS, BRENT H., Professor of Chemical and Biological Engineering. B.S., 1983, Iowa State; M.S., 1985, Ph.D., 1988, California Institute of Technology.

SHANKS, JACQUELINE V., Professor of Chemical and Biological Engineering. B.S., 1983, Iowa State; Ph.D., 1989, California Institute of Technology.

SHARMA, VIJAY K., Associate Professor of Veterinary Microbiology and Preventive Medicine (Collaborator). B.S., 1977 M.S., 1978, Panjab (India); Ph.D., 1987, Toledo.

SHARP RICKEE LEE, Professor of Kinesiology; Professor of Food Science and Human Nutrition; Professor of Biomedical Sciences. B.A., 1974, California State (Chico); M.Ed., 1976, Nevada (Las Vegas); Ph.D., 1983, Ball State.

SHAW, ROBERT HAROLD, Emeritus Professor of Agronomy; Charles F. Curtiss Distinguished Professor in Agriculture and Life Sciences. B.S., 1941, M.S., 1942, Ph.D., 1949, Iowa State.

SHEELLER, JOHN B., Emeritus Associate Professor of Civil, Construction and Environmental Engineering. B.S., 1959, Ph.D., 1966, Iowa State.

SHELLEY, JACK, Emeritus Professor of Greenlee School of Journalism and Communication. B.J., 1935, Missouri.

SHELLEY, MACK CLAYTON, Professor of Statistics; Professor of Political Science; University Professor. B.A., 1972, American; M.S., 1973, Ph.D., 1977, Wisconsin.

SHEN, SHELTON SHIH-TA, Professor of Genetics, Development and Cell Biology. B.S., 1989, Missouri; Ph.D., 1974, California (Berkeley).

SHERMAN, PETER JAMES, Associate Professor of Aerospace Engineering; Associate Professor of Statistics. B.S., 1974, M.S., 1975, Ph.D., 1984, Wisconsin.

SHHLOERKE, WALLACE C., Emeritus Professor of Engineering. B.S., 1935, M.S., 1936, Ph.D., 1942, Ball State.

SHEMIK, YOSSEF, Emeritus Professor of Education; Associate Professor of Systems Science. B.Tech., 1970, Tel-Aviv; M.B.A., 1973, Tel-Aviv.

SIEGL, CHARLES J., Emeritus Professor of Meteorology. B.S., 1972, M.S., 1975, University of Missouri; Ph.D., 1980, Iowa State.

SIEGL, WILLIAM, Emeritus Professor of Education; University Professor. B.S., 1935, M.S., 1936, Ph.D., 1942, Ball State.

SINGH, RAJVINDRA N., Associate Professor of Computer Science. B.Sc., 1955, M.S., 1956, Ph.D., 1965, Iowa State.

SMITH, FRANCES, Emeritus Professor of Apparel, Educational Studies and Hospitality Management; Emeritus Professor of Curriculum and Instruction. B.S., 1952, Southwestern (Oklahoma); M.S., 1958, Southwestern (Oklahoma); Ph.D., 1966, Iowa State.

SMITH, FREDERICK G., Emeritus Professor of Genetics, Development and Cell Biology. B.S., 1939, Chicago; M.S., 1941, Ph.D., 1943, Wisconsin.

SMITH, JOHN F., Emeritus Professor of Materials Science and Engineering. B.A., 1948, Missouri (Kansas City); Ph.D., 1953, Iowa State.

SMITH, STEVEN, Associate Dean in Military Science and Tactics. B.S., 2003, Texas A&M.

SOCIETY-MUNSON, ANN CLARE, Assistant Professor of Architecture; Assistant Professor of Art and Design. B.A., 1991, Central College; M.Arch., 2000, Iowa State.

SOMANI, ARUN K., Professor of Electrical and Computer Engineering and Chair of the Department; Anson Marston Distinguished Professor in Engineering. B.E., 1973, Bit (India); M.Tech., 1979, Iit (India); M.S.E.E., 1983, Ph.D., 1985, McGill (Canada).

SONG, GUANG, Assistant Professor of Computer Science. B.S., 1992, Jilin (China); M.S., 1998, Ph.D., 2003, Texas A&M.

SONG, JONG, Associate Professor of Electrical and Computer Engineering. B.S., 1983, M.S., 1988, Nanjing (China); Ph.D., 1993, Michigan State.

SONG, SUNG YELL, Associate Professor of Mathematics. B.S., 1974, Seoul; Ph.D., 1987, Ohio State.

SONG, XUEYI, Associate Professor of Chemistry. B.S., 1984, Nankai (China); Ph.D., 1995, California Institute of Technology.

SOSNICKI, ANDRZEJ A., Associate Professor of Animal Science (Collaborator). M.S., 1978, Mickiewicz (Poland); Ph.D., 1984, Academy of Agriculture (Poland).

SOUKOULIS, COSTAS M., Professor of Physics and Astronomy; Professor of Aerospace Engineering; Professor of Electrical and Computer Engineering; Distinguished Professor in Liberal Arts and Sciences. B.S., 1973, Athens; M.S., 1975, Ph.D., 1978, Chicago.

SOUPIR, MICHELLE LYNN, Assistant Professor of Agricultural and Biosystems Engineering. B.S., 1999, Kansas State; M.S., 2003, Ph.D., 2007, Virginia Polytechnic.

SPALDING, BEATRIX M., Lecturer in Ecology, Evolution and Organismal Biology. B.S., 1976, Napoli (Italy); M.S., 1986, Iowa State.

SPALDING, MARTIN H. II, Professor of Genetics, Development and Cell Biology and Chair of the Department. B.S., 1974, M.S., 1976, Washington State; Ph.D., 1979, Wisconsin.

SPINRAD, BERNARD I., Emeritus Professor of Mechanical Engineering. B.S., 1942, M.S., 1944, Ph.D., 1945, Yale.

SPONSELLER, BRETT A., Assistant Professor of Veterinary Clinical Sciences; Assistant Professor of Veterinary Microbiology and Preventive Medicine. B.S., 1990, Virginia Polytechnic; D.V.M., 1994, Cornell; Ph.D., 2003, Iowa State.

STADLER, JOAN K., Emeritus Professor of Genetics, Development and Cell Biology; University Professor. B.A., 1951, Wellesley; Ph.D., 1954, Missouri.

STAHN, HENRY M., Emeritus Professor of Veterinary Pathology. B.S., 1956, South Dakota State; M.S., 1960, Union; Ph.D., 1976, Iowa State.

STALDER, KENNETH J., Associate Professor of Animal Science. B.S., 1987, Iowa State; M.S., 1992, Western Kentucky; Ph.D., 1995, Iowa State.

STANFORD, JOHN L., Emeritus Professor of Physics and Astronomy. B.S., 1960, Texas; Ph.D., 1965, Maryland.

STANTON, THADDEUS BRIAN, Assistant Professor of Veterinary Microbiology and Preventive Medicine (Collaborator). B.A., 1972, Thomas More; Ph.D., 1980, Massachusetts.

STARLEF, DENNIS R., Emeritus Professor of Economics. B.A., 1959, California (Berkeley); M.A., 1960, California (Los Angeles); Ph.D., 1967, Vanderbilt.

STAUFAF, HANS, Assistant Professor of Chemistry. Ph.D., 2000, Cornell.

STEPHENSON, MATTEth WAYNE, Adjunct Instructor in Military Science and Tactics. B.S., 2003, Iowa State.

STEPHENSON, W. ROBERT, Professor of Statistics; University Professor. B.A., 1974, Gettysburg; M.S., 1976, Ph.D., 1979, Connecticut.

STEWARD, ROBERT M. JR., Emeritus Professor of Electrical and Computer Engineering; Emeritus Professor of Computer Science. B.S., 1945, Ph.D., 1954, Iowa State.

STEWARD, SUSAN DIANE, Associate Professor of Sociology. B.A., 1990, New York (Fredonia); M.A., 1996, Ph.D., 2000, Bowling Green State.

STIEHL, CORY KATHERINE, Lecturer in Chemical and Biological Engineering. B.S., 1985, Rochester; Ph.D., 1990, Massachusetts.

STONE, RICHARD T., Assistant Professor of Industrial and Manufacturing Systems Engineering; Assistant Professor of Mechanical Engineering. B.S., 1999, M.S., 2001, Rochester Institute of Technology; Ph.D., 2008, New York (Buffalo).

STONE, VERNON F., Emeritus Professor of Architecture. B.Arch., 1948, Washington (St Louis).

STOUT, JANEANN, Associate Professor of Art and Design. B.S., 1971, M.A., 1974, Iowa State.

STRITZEL, JOSEPH A., Emeritus Professor of Biophysics and Molecular Biology (Collaborator); Emeritus Professor of Veterinary Microbiology and Preventive Medicine; Clarence Hartley Covault Distinguished Professor in Veterinary Medicine. D.V.M., 1948, Texas A&M; M.S., 1951, Ph.D., 1954, Iowa State; Dr.H.C., 1979, Vienna.

TABATAIBAI, LOUISA, Professor of Biochemistry, Biophysics and Molecular Biology (Collaborator); Professor of Veterinary Microbiology and Preventive Medicine (Collaborator). B.A., 1962, California (Berkeley); M.S., 1966, Ph.D., 1976, Iowa State.

TABATAIBAI, MAHDI, Professor of Agronomy. B.S., 1958, Baghdad; M.S., 1960, Oklahoma State; Ph.D., 1965, Iowa State.

TAYLE, GENE S., Professor of Agronomy; Professor of Geological and Atmospheric Sciences; Professor of Aerospace Engineering. B.A., 1966, Luther; Ph.D., 1971, Iowa State.

TAYLE, GENE S., Professor of Agronomy; Professor of Geological and Atmospheric Sciences; Professor of Aerospace Engineering. B.A., 1966, Luther; Ph.D., 1971, Iowa State.

TAOULET, JEAN-PIERRE, Senior Lecturer in World Languages and Cultures. B.A., 1989, Saint Joseph (Lebanon); M.A., 1993, Sorbonne Nouvelle (France).
TARTAKOV, CARLIE C., Emeritus Assistant Professor of Curriculum and Instruction. B.A., 1963, California State (San Francisco); M.A., 1973, Massachusetts; Ph.D., 1996, Iowa State.
TAVANAPONG, WALLAPA K., Associate Professor of Computer Science. B.S., 1992, Thammasat (Thailand); M.S., 1995, Ph.D., 1999, Central Florida.
TAYLOR, ADRIAN SEAN, Lecturer in Curriculum and Instruction. B.S., 1992, Brigham Young; M.S., 1996, Iowa State.
TAYLOR, GARY D., Assistant Professor of Community and Regional Planning. B.S., 1985, Northwest Missouri State; J.D., 1988, Nebraska; M.C.R.P., 1996, Iowa State.
TAYLOR, PETER C., Adjunct Assistant Professor of Civil, Construction and Environmental Engineering. Ph.D., 1995, Cape Town.
TAYLOR, ROD K., Adjunct Instructor in Military Science and Tactics.
TAYLOR, STELLING E., Professor of Agronomy. B.S., 1966, Utah State; Ph.D., 1970, Washington (St. Louis).
TEAS, ROY KENNETH, Emeritus Professor of Marketing; Distinguished Professor in Business. B.S., 1969, Augustana (South Dakota); M.A., 1970, Ph.D., 1975, Oklahoma.
TERANDO, WILLIAM D., Assistant Professor of Chemical Engineering; Ph.D., 1995, M.S., 1999, Iowa State.
THOMAS, KATHERINE T., Associate Professor of Natural Resource Ecology and Management (Collaborator). B.S., 1971, Mississippi; M.S., 1977, Alabama (Birmingham); Ph.D., 1981, Santa Barbara.
THOMPSON, JAMES R., Associate Professor of Veterinary Diagnostic and Production Animal Medicine. B.S., 1974, M.S., 1975, Iowa State.
THOMPSON, MICHAEL L., Professor of Agriculture; Professor of Agricultural and Biological Sciences. B.S., 1974, Illinois; Ph.D., 1980, Ohio State.
THOMPSON, R. BRUCE, Professor of Natural Resource Ecology and Management; Professor of Agricultural Engineering; Anson Marston Distinguished Professor in Engineering. B.A., 1949, M.S., 1950, Ph.D., 1953, Iowa.
THOMPSON, ELIZABETH A., Professor of Curriculum and Instruction; University Professor. B.A., 1965, Pomona; M.A., 1966, Stanford; Ph.D., 1981, California (Santa Barbara).
THOMPSON, WILLIAM H., Emeritus Professor of Animal Science and Tactics.
TIBBAPUR, SRIKANTA, Associate Professor of Animal Science; Associate Professor of Veterinary Diagnostic and Production Animal Medicine. B.S., 1978, Cornell; M.S., 1982, Ph.D., 1984, Wisconsin.
TIPTON, CARL L., Emeritus Professor of Biochemistry, Biophysics and Molecular Biology. B.S., 1948, Ph.D., 1957, Nebraska; Ph.D., 1961, Illinois.
TIWANA, AMIR, Associate Professor of Logistics, Operations and Management Information Systems.
TOLLEFSON, JON J., Professor of Entomology. B.A., 1967, Gustavus Adolphus; Ph.D., 1975, Iowa State.
TOMAN, BETTY, Emeritus Professor of Kinesiology; Distinguished Professor in Education. B.S., 1948, Wisconsin; M.S., 1957, Iowa State.
TOMER, MARK D., Associate Professor of Natural Resource Ecology and Management (Collaborator); Associate Professor of Geological and Atmospheric Sciences (Collaborator). B.S., 1981, Montana; M.S., 1986, Montana State; Ph.D., 1994, Minnesota.
TOOMBS, JAMES PRITCHETT, Professor of Veterinary Clinical Sciences. B.A., 1972, Iowa; D.V.M., 1976, Illinois; M.S., 1980, Minnesota.
TOPEL, DAVID GLEN, Emeritus Professor of Animal Science; Emeritus Professor of Food Science and Human Nutrition. B.S., 1960, Wisconsin; M.S., 1962, Kansas State; Ph.D., 1968, Michigan State.
TOWNSSEND, ANTHONY M., Professor of Curriculum and Instruction. B.S., 1969, Concordia (Canada).
TREALEY, KIRILL, Assistant Professor of Physics and Astronomy. B.Sc., 1992, Ph.D., 1997, Barcelona.

TRENKLE, ALLEN H., Emeritus Professor of Animal Sciences; Charles F. Curtiss Distinguished Professor in Agriculture and Life Sciences. B.S., 1956, Nebraska; M.S., 1958, Ph.D., 1960, Iowa State.

TRULIN, DARRYL JON, Emeritus Associate Professor of Aerospace Engineering. B.S., 1961, Iowa State; M.S., 1963, Oklahoma State; Ph.D., 1968, Iowa State.

TUCKER, ROBERT D., Associate Professor of Genetics, Development and Cell Biology (Collaborator). B.S., 1969, Nebraska; Ph.D., 1976, Minnesota; M.D., 1978, Nebraska Medical Center.

TUTTLE, GARY L., Associate Professor of Electrical and Computer Engineering. B.S., 1983, M.S., 1985, Iowa State; Ph.D., 1991, California (Santa Barbara).

TVRDIK, DEBRA FROHLING, Lecturer in Curriculum and Instruction. B.A., 1972, Northern Iowa; M.A., 1988, Iowa State.

TYLKA, GREGORY L., Professor of Plant Pathology. B.S., 1983, M.S., 1985, California (Pennsylvania); Ph.D., 1990, Georgia.

UHLENHOPF ELDON KARL, Professor of Veterinary Diagnostic and Production Animal Medicine; Professor of Veterinary Microbiology and Preventive Medicine; Associate Dean of the College of Veterinary Medicine. D.V.M., 1972, M.S., 1986, Iowa State.

ULMER, MARTIN J., Emeritus Professor of Ecology, Evolution and Organismal Biology; Distinguished Professor in Liberal Arts and Sciences. B.S., 1942, M.S., 1943, Ph.D., 1950, Michigan.

ULRICHSON, DEAN, Emeritus Professor of Chemical and Biological Engineering. B.S., 1962, Nebraska; M.S., 1963, Illinois; Ph.D., 1970, Iowa State.

URBATSCH, ROBERT B., Associate Professor of Political Science. B.S., 2000, Iowa State; Ph.D., 2006, Harvard.

USTUNDAG, ERSAN, Associate Professor of Materials Science and Engineering. B.S., 1980, Bogazici (Turkey); Ph.D., 1995, Cornell.

VAKNIN, DAVID, Adjunct Professor of Physics and Astronomy. B.S., 1964, Georgia.

VANDERVAAL, SUZANNE C., Senior Lecturer in English. B.A., 1971, Windsor (Ontario); M.A., 1994, Iowa State.

VARDEN, STEPHEN B., Professor of Statistics; Professor of Industrial and Manufacturing Systems Engineering; University Professor. B.S., 1971, M.S., 1973, Iowa State; Ph.D., 1975, Michigan State.

VASWANI, MADHUKAR, Assistant Professor of Electrical and Computer Engineering. B.Tech., 1999, Indian Institute of Technology (India); Ph.D., 2004, Maryland.

VAUGHN, ERIC MARTIN, Assistant Professor of Veterinary Microbiology and Preventive Medicine (Collaborator). B.S., 1988, M.S., 1990, Ph.D., 1994, Iowa State.

WEERASINGHE, ANANDA, Professor of Mathematics. B.S., 1979, Colombo; Ph.D., 1986, Minnesota.

WEI, MEIFEN, Associate Professor of Psychology. B.A., 1983, Soochow (Taiwan); M.A., 1985, Tunghai (Taiwan); M.A., 1998, Ph.D., 2000, Missouri.

WELLS, GARY L., Professor of Psychology; Distinguished Professor in Liberal Arts and Sciences. B.S., 1973, Kansas State; Ph.D., 1977, Ohio State.

WENINGER, QUINN R. A., Associate Professor of Chemical and Biological Engineering; Emeritus Professor of Agronomy. B.S., 1949, Ph.D., 1958, Iowa State.

WHISNANT, KERRY LEWIS, Professor of Physics and Astronomy. B.S., 1976, Missouri (Rolla); Ph.D., 1982, M.S., 1982, Wisconsin.

WHITAKER, JAMES W., Emeritus Associate Professor of Biochemistry, Biophysics and Molecular Biology; University Professor. B.S., 1958, Portland; M.A., 1961, Ph.D., 1963, Oregon.

WILSON, DOYLE EDWARD, Emeritus Professor of Physical Education and Studies; University Professor. B.S., 1959, Oklahoma State; Ed.D., 1969, Oklahoma State.

WILSON, LEE ANNE, Professor of Physics and Astronomy. B.S., 1954, Nebraska Wesleyan; Ph.D., 1962, Rensselaer.

WILSON, WENDY S., Associate Professor of Food Science and Nutrition. B.S., 1989, Cornell; Ph.D., 1992, Massachusetts General; M.S., 1986, Ph.D., 1990, Cornell.

WHITEFORD, MICHAEL B., Professor of Anthropology; Dean of the College of Liberal Arts and Sciences. B.A., 1967 Beloit; M.A., 1970, Ph.D., 1972, California (Berkeley).

WHITEHEAD, ROBERT, Lecturer in Architecture. B.Arch., 1993, Iowa State; M.Arch., 1997 Texas.

WHITHAM, STEVEN ALAN, Associate Professor of Plant Pathology. B.S., 1990, Iowa State; M.S., 1992, Ph.D., 1995, California (Berkeley).

WICKERT, JONATHAN ADAM, Professor of Mechanical Engineering and Chair of the Department. B.S., 1985, M.S., 1987 Ph.D., 1989, California (Berkeley).

WILLIAM, RICHARD L., Emeritus Professor of Animal Science; Charles F. Curtiss Distinguished Professor in Agriculture and Life Sciences. B.S., 1954, Oklahoma State; M.S., 1955, Ph.D., 1960, Iowa State.

WILLIAMS, DAVID LEWIS, Emeritus Professor of Curriculum and Instruction; Emeritus Professor of Agricultural Education and Studies; University Professor. B.S., 1959, Oklahoma State; M.S., 1965, Kansas State; Ed.D., 1969, Oklahoma State.

WILLIAMS, LEO, Emeritus Professor of Physics and Astronomy. B.S., 1954, Nebraska Wesleyan; Ph.D., 1962, Rensselaer.
WILSON, LESTER A., Professor of Food Science and Human Nutrition; University Professor; B.S., 1969, M.S., 1971, Oregon State; Ph.D., 1975, California (Davis).

WINAKOR, THORA GEITEL, Emeritus Professor of Apparel, Educational Studies and Hospitality Management; Mary B. Welch Distinguished Professor of Family and Consumer Sciences. A.B., 1950, Illinois; M.S., 1951, Drexel; Ph.D., 1960, Iowa State.

WINDUS, THERESA L., Professor of Chemistry. B.S., 1988, Minot State; Ph.D., 1993, Iowa State.

WINER, ELIOT H., Assistant Professor of Mechanical Engineering. B.S., 1992, Ohio State; M.S., 1994, Ph.D., 1999, New York (Buffalo).

WINTERSTEEN, WENDY, Professor of Entomology; Dean of the College of Agriculture and Life Sciences. B.S., 1978, Kansas State; Ph.D., 1988, Iowa State.

WIRTH, DANIELLE M., Lecturer in Philosophy and Religious Studies; Dean of the College of Arts and Sciences. B.A., 1988, Slippery Rock; Ph.D., 1996, Iowa State.

WOLF, JOHN WILLIAM CLARK, Associate Professor of Philosophy and Religious Studies; Associate Professor of Political Science. B.A., 1986, Oberlin College; M.A., 1989, Ph.D., 1993, Arizona.

WOO, LEE KEITH, Professor of Chemistry. B.S., 1977. Harvey Mudd; Ph.D., 1984, Stanford.

WOOD, SHIRLEY JEAN, Emeritus Associate Professor of Kinesiology. B.S., 1957, M.S., 1959, Indiana; Ph.D., 1971, Illinois.

WOODMAN, WILLIAM F., Professor of Sociology; University Professor. B.S., 1968, M.A., 1970, West Texas; Ph.D., 1972, Oklahoma State.

YAEGER, MICHAEL J., Associate Professor of Philosophy. M.A., 1985, Huazhong (China); Ph.D., 1991, Rice.

YOUNGQUIST, GORDON R., Emeritus Professor of Human Development and Family Studies. A.B., 1957, Cornell; Ph.D., 1972, California (Berkeley).

YOUNG, BING-LIN, Emeritus Professor of Physics and Astronomy. B.S., 1959, National Taiwan; Ph.D., 1966, Minnesota.

YOUNG, DONALD F., Emeritus Professor of Aerospace Engineering; Anson Marston Distinguished Professor in Engineering. B.S., 1951, M.S., 1956, Ph.D., 1956, Iowa State.

YOUNGQUIST, GORDON R., Emeritus Professor of Chemical and Biological Engineering. B.S., 1958, Minnesota; M.S., 1960, Ph.D., 1962, Illinois.

YOUNGS, CURTIS R., Associate Professor of Animal Science; Associate Professor of Veterinary Diagnostic and Production Animal Medicine. B.S., 1981, Ph.D., 1985, Minnesota.

YU, CHENXU, Assistant Professor of Agricultural and Biosystems Engineering. B.S., 1993, Nanjing (China); M.S., 1998, Dalian (China); Ph.D., 2003, Wisconsin.

YU, CINDY LONG, Assistant Professor of Statistics. B.S., 1995, Sichuan (China); M.S., 2000, Ph.D., 2005, Cornell.

YU, EDWARD WA-ON, Assistant Professor of Physics and Astronomy; Assistant Professor of Biochemistry, Biophysics and Molecular Biology. B.S., 1989, M.S., 1991, Southern Illinois; Ph.D., 1997, Michigan.

ZHABOTINA, OLGA, Assistant Professor of Biochemistry, Biophysics and Molecular Biology. M.S., 1982, Kazan State (Russia); Ph.D., 1987 Kazan Institute of Biology (Russia).

ZACHARY, LOREN W., Professor of Aerospace Engineering; Assistant Dean of the College of Engineering. B.S., 1966, M.S., 1974, Ph.D., 1976, Iowa State.

ZBARACKI, RICHARD J., Emeritus Professor of Curriculum and Instruction; Emeritus Professor of English. B.A., 1953, St. Thomas; M.A., 1954, Northwestern; Ph.D., 1970, Nebraska.

ZEBAGNER, RICHARD J., Emeritus Associate Professor of Economics. B.A., 1959, Lawrence; Ph.D., 1965, Minnesota.

ZENG, CHARLES ZHOUCHENG, Associate Professor of Economics. B.A., 1993, Lawrence; Ph.D., 1999, Minnesota.

ZHENG, YAN, Associate Professor of Chemistry. Ph.D., 1996, Northwestern.

ZHENG, QIJING, Professor of Veterinary Microbiology and Preventive Medicine. D.V.M., 1983, Shandong Agricultural (China); M.S., 1986, National Control Institute of Veterinary; Ph.D., 1994, Iowa State.

ZHENG, SONG, Assistant Professor of Mechanical Engineering. B.S., 2000, Sciences and Technology (China); M.S., 2003, Ph.D., 2005, Stony Brook.

ZHENG, TING, Assistant Professor of Computer Science. B.S., 1996, Peking (China); M.S., 2001, Ph.D., 2006, Stanford.

ZHENG, WENCHENG, Assistant Professor of Computer Science. B.S., 1997, Tongji (China); M.S., 2000, Chinese Academy of Science; Ph.D., 2005, Pennsylvania State.

ZHANG, QIJING, Professor of Veterinary Microbiology and Preventive Medicine. D.V.M., 1983, Shandong Agricultural (China); M.S., 1986, National Control Institute of Veterinary; Ph.D., 1994, Iowa State.

ZHANG, SONG, Assistant Professor of Mechanical Engineering. B.S., 2000, Sciences and Technology (China); M.S., 2003, Ph.D., 2005, Stony Brook.

ZHANG, TING, Assistant Professor of Computer Science. B.S., 1996, Peking (China); M.S., 2001, Ph.D., 2006, Stanford.

ZHANG, WENSHENG, Assistant Professor of Computer Science. B.S., 1997, Tongji (China); M.S., 2000, Chinese Academy of Science; Ph.D., 2005, Pennsylvania State.

ZHAO, YAN, Associate Professor of Chemistry. Ph.D., 1996, Northwestern.

ZIMMERMAN, JEFFREY J., Professor of Veterinary Diagnostic and Production Animal Medicine; Professor of Veterinary Microbiology and Preventive Medicine. B.A., 1978, Nebraska (Omaha); D.V.M., 1984, M.S., 1986, Ph.D., 1990, Iowa State.

ZIMMERMAN, ZORA DEVINNA, Professor of English; Associate Dean of the College of Liberal Arts and Sciences. B.A., 1967, Ph.D., 1974, New York (Buffalo).

ZMOWE, WILLIAM G., Emeritus Professor of Animal Science. B.S., 1944, M.S., 1951, Iowa State.

ZOU, QINGZE, Assistant Professor of Mechanical Engineering. B.S., 1994, Electronic Science and Technology (China); M.S., 1997 Tsinghua (China); Ph.D., 2003, Washington.

ZUER, RICHARD L., Associate Professor of Veterinary Microbiology and Preventive Medicine (Collaborator). B.A., 1980, California State (Chico); M.S., 1983, Ph.D., 1986, West Virginia.
