I. FOREWORD ................................................. 1

II. ANNOUNCEMENTS ........................................... 3

III. REPORT OF SOYBEAN GENETICS COMMITTEE ............... 4

IV. RESEARCH NOTES FROM CONTRIBUTORS ....................... 6

- Soybean Breeding in Austria. R. Gretzmacher and L. Tanasch ........................................... 7
- Soybean Linkage and Allelism Tests. R. I. Buzzell .......... 11
- Determinate-Dt2 Effects on Soybean Characteristics. R. I. Buzzell, B. R. Buttery and D. A. Littlejohns .......... 14
- Genetic Studies of Soybean Host Cultivar Interactions with Rhizobium Strains. T. E. Devine .......... 19
- Vegetative Propagation of Soybeans. J. S. Piaskowitz and T. E. Devine ........................................... 21
- Evidence of a Second Gene Controlling a Short Internode (Zigzag Stem) Character. H. R. Boerma and B. G. Jones .......... 22
- Inheritance of a Second SBTL-A2 Variant in Seed Protein of Soybeans. J. H. Orf and T. Hymowitz .......... 26
- The Gene Symbols Sp1a and Sp1b Assigned to Larsen and Caldwell's Seed Protein Bands A and B. J. H. Orf and T. Hymowitz .......... 27
- Glycine Germplasm Resources. T. Hymowitz .......... 29
- Polyploids Among the Progeny from Male Sterile (ms1ms1) Soybeans. R. G. Palmer and H. E. Heer .......... 35
- Linkage Studies with a Chromosomal Interchange. R. G. Palmer .......... 38
- Environmental Influence on Total Pollen Grains per Flower from Normal and Sterile Plants of the Urbana Male Sterile. M. C. Albertsen and R. G. Palmer .......... 39

I. FOREWORD

We are gratified by the enthusiastic response of our contributors to Volume 3 of the Soybean Genetics Newsletter. Our printing order for this volume is 600; the mailing list covers 48 countries and 34 states.

The variety, scope and excellence of the articles in this volume indicate a growing acceptance of the Newsletter as a medium for the exchange of ideas and information among soybean scientists around the world. Suggestions for improvement of the SGN are requested and appreciated.

The details of producing the SGN involve our whole staff--technicians, secretaries and graduate students. Those "volunteered" for duty this year include Hollys E. Heer, Carol Winger, Linda Martin, Marc Albertsen and David Stelly.

ACKNOWLEDGEMENT

We wish to express our appreciation to the Iowa-Missouri area director of the USDA-ARS for the financial support which made this issue of the Soybean Genetics Newsletter possible.

Reid G. Palmer
