## Creating and Embedding Maps into a Webpage: Google Maps

Welcome to the Essential ArcGIS Task Sheet Series. This series supplements the Iowa State University Geospatial Technology Training Program short course series. The task sheets are designed to provide quick, easy instructions for performing mapping tasks.

Embedding a custom Google map into a webpage is a fast and easy way to show map content on a website. Google's *My Maps* can display a range of content such as points, lines or shapes and allows customization of place markers and line colors. This task sheet demonstrates creating a Google map that can be embedded into a webpage. The only requirement to make a custom Google map is a Gmail account.

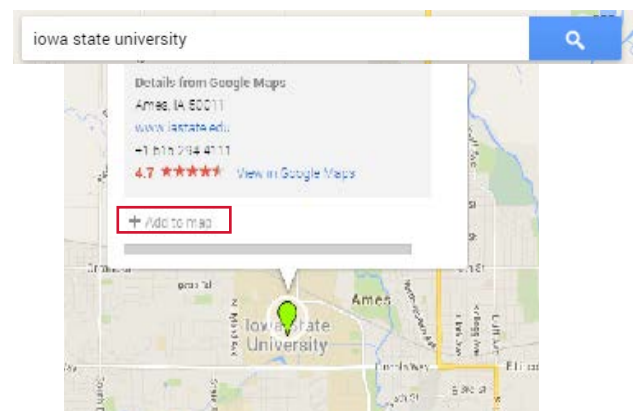

### 1. Sign In to Google Maps

- In a web browser, navigate to the Google Maps website at [www.maps.google.com](http://www.maps.google.com).
- Make sure you are signed in with a Google account, and open the menu in the upper left corner of the map. Select **My Maps**, and then select **CREATE MAP**.

### 2. Adding Content to the Map

- Give the map a title and description.
- Add a Marker.** You can do this two ways:
  - Select the **Add marker** tool located in the toolbar at the top of the map, then click on the map.
  - Use the Google search bar to search for a place or location. Click on the marker and select **Add to map**.
- Add a Line or Polygon.**
  - Click on the **Draw a line** tool located in the toolbar at the top of the map, select **Add line or shape**.
  - To create a line, click to add vertices and double-click to end the line. To create a polygon, enclose the shape by clicking on the first vertex.
- Add a Route.**
  - Click on the **Draw a line** tool and select **Add a driving route** (or biking or walking) and click on the map to start tracing the route. Double-click to end the route.

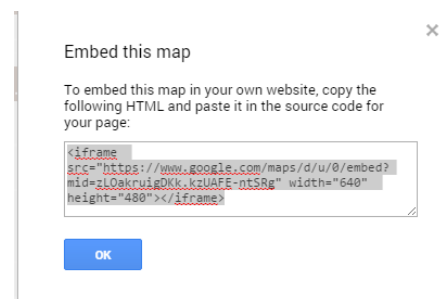

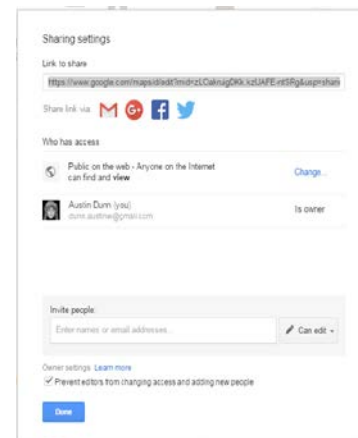

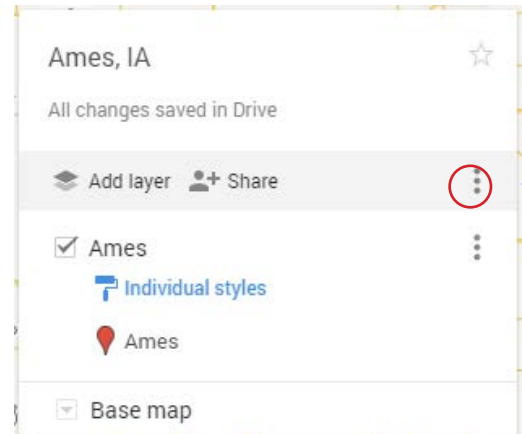

### 3. Editing Markers, Lines, and Shapes

- Editing style:** To edit a marker, line or shape, click on the graphic to open a pop-up window.
- Moving:** To move a marker click and drag the marker to the desired location. To move a line or shape, click and drag one or more vertices.
- Renaming:** To rename, select the marker, line, or polygon and click on the pencil icon.
- Add Photo/Video:** To add a photo or video, select the marker, line, or polygon and click on the camera icon. You can enter URL or upload media from your computer.
- Deleting:** To delete a marker, line or shape, select the feature then click on the trash can icon.

### 4. Change Sharing Settings and Embed Map

- First, click on the **Share** icon to change who has access to your map. Here, you can change who has access to view and edit your map. To embed on a website, sharing should be set to public.
- Click on the three dots to the right of the share button to expand the menu. Here, you should **Set default view** for your map. This is the view that will be seen when the public views your map.
- In the same menu, click **Embed on my site** to open a box with the HTML for your map. Copy this text and paste it in the source code for your webpage.
- Your Google map is now embedded on your webpage.

...and justice for all

The US Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, genetic information, political beliefs, reprisal, or because all or part of an individual's income is derived from any public assistance program. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at 202-720-2600 (voice and TDD). To file a complaint of discrimination, write to USDA, Director, Office of Civil Rights, 1400 Independence Avenue SW, Washington, DC 20250-9410, or call 800-795-3272 (voice) or 202-720-6382 (TDD).

Issued in furtherance of Cooperative Extension work, Acts of May 8 and June 30, 1914, in cooperation with the US Department of Agriculture. Cathann Kress, director, Cooperative Extension Service, Iowa State University of Science and Technology, Ames, Iowa.
