Marriages

James W. Thornton, fall '43, was married to Miss Lois McIntyre of Anita, Iowa, March 20, 1943.

Another marriage in the senior class was that of Edward J. Foley to Miss Alice Gage, Dietetics, '42, of Rochester, N. Y., at Ames, March 19, 1943.

Allen N. Lang, '44, was married to Miss Elsie Melhop, H. Ec. '42, of Renset, Iowa, March 18, 1943.

Allen C. McCone, '45, was married to Miss Jean Boyack of Afton, Iowa, March 18, 1943.

Wayne H. Thompson, members of the Veterinary Student staff, at the annual journalism picnic in the Collegiate Press Building March 5, 1943.

Gamma Sigma Delta

The following members of the Division of Veterinary Medicine initiated March 9, 1943, into Gamma Sigma Delta, Agricultural and Veterinary honorary were J. Bradley Crundwell, Terrance A. Dorsey, Raymond P. Fistler, Robert D. Loften, John L. O’Hara, and Gerald C. Vande Garde, all of winter '43.

Engagements

Maurice W. Moore, fall '43, announced his engagement to Miss Marian Freeman of Geneva, Ill., March 21, 1943.

Another engagement in the senior class was that of Melvin R. Nelson to Miss Ada Hodges of Ames, Iowa, March 23, 1943.

Eldon J. Janson, fall '43, announced his engagement to Miss Helen Lucille Henderson, H. Ec. Jr., of Seymour, Iowa, April 10, 1943.

Orlyn G. Feuerbach, '45, announced his engagement to Miss Doris A. Kucera of Elberon, Iowa.

Larry L. Espenson, fall '43, announced his engagement to Miss Mary Jean Phipps, H. Ec. Fr., of Winnebago, Minn., April 25, 1943.

Faculty

Dr. Margaret Sloss, national president of Sigma Delta Epsilon, attended a meeting of the national officers of that organization in Chicago April 23-25, 1943.

Dr. Gabel H. Conner, associate professor of surgery, received his masters degree at the winter quarter graduation exercises March 19, 1943. Dr. Conner majored in Veterinary Surgery-Veterinary Pathology, and his thesis was, “Prognostic Value of Blood Determinations in Certain Surgical Conditions of Horses.”

Dr. George R. Fowler, head of the Department of Surgery, presented journalism "T" awards to Lester E. Fisher, Clarence H. Mannsmith, A. Mack Scott, and
How to Keep a Champion in Sound Health

Ch. Prune's Own Maximilian—like thousands of other dogs of all sizes and breeds—maintains robust, vigorous health on economical kibbled Red Heart Dog Biscuits.

These time-tested biscuits are crispy, crunchy, and nourishing. Fed alone, they provide essential gnawing exercise, help protect teeth and gums. Mixed with water, milk, or broth—or as a base in formulas such as the Red Heart Feeding Plan*—they furnish abundant supplies of Vitamins A, B Complex, D, E, and unsaturated fatty acids, as well as calcium, phosphorus, iron, copper, iodine, and other necessary trace minerals.

Feed and recommend Red Heart Dog Biscuits with confidence. Heart-shaped or kibbled in 25-, 50-, and 100-lb. bags, 3 delicious flavors (beef, fish, and cheese) in every package. If your dealer cannot supply you, write: John Morrell & Co., General Offices, Ottumwa, Iowa.

*Mix equal parts by volume of kibbled Red Heart Dog Biscuits, water, and new Red Heart DEHYDRATED Dog Food.

RED HEART DOG BISCUITS

Spring, 1943
Jr. A.V.M.A.

Dr. M. D. Johnson, a former member of the Department of Surgery, spoke at the April 14 meeting of the Jr. A.V.M.A. Dr. Johnson gave a very interesting talk on the restraint of large animals in the field.

Mr. Oderkirk, associate professor in the Dept. of Agricultural Economics, spoke to the society April 28, 1943, on the grading of poultry and eggs. Mr. Oderkirk is head of the division on the grading of poultry and eggs for the O.P.A. in Washington, D. C.

The Jr. A.V.M.A. society has appropriated $400.00 for the establishment of a medical library in the clinic reading room. An additional $250.00 has been withdrawn from the treasury for the purchase of war bonds. Any money remaining from the library fund will be used to purchase additional war bonds.

Cardinal Key

Robert J. Kirkpatrick, winter '43, was initiated into the Cardinal Key, men's major honorary society, March 11, 1943.

BOSTON HUMANE SOCIETY

(Continued from page 171)

The public schools regularly to give instruction through lectures and marionette shows in the conservation and the proper care of animals. The Animal Rescue League conducts a summer training school for the benefit of agents and executives of animal welfare organizations throughout the country, and for instruction in animal care and conservation to public school teachers and directors of humane education. These classes have been attended by hundreds of people from all over the United States.

The Animal Rescue League cooperates with the Eastern Livestock Loss Prevention Association in the improvement of handling and shipping conditions which tend to produce injuries to livestock in transit.

A stable and good pastures are maintained in Dedham, Massachusetts for the benefit of work horses which have become pavement sore, or which need a rest during the summer months. There is a cemetery for small animals and a crematory adjoining the farm. In this cemetery are buried many famous dogs as well as many beloved pets. Here, perpetual care of the graves is maintained.

ACKNOWLEDGEMENT: I acknowledge with gratitude the work of Miss Marion D. Caspole in verifying the figures used in this article and for her help in typing.—H.M.T.

The cuts accompanying this article were loaned to us by Dr. Tabbut.

CLINICAL MEDICINE

(Continued from page 175)

drainage is poor or absent, the animal will show symptoms of general intoxication.

Sulfanilamide treatment of the condition in the acute febrile stage may be used. After necrosis has begun, radical treatment is required to provide free and continuous drainage for the toxic fluids. In the early stages drainage can be made by amputation of the teat near its base. The amputation is done with the animal in lateral recumbency; 2 percent procaine infiltrated above the line of incision is given for local anesthesia. Hemorrhage is controlled with hemostats or interrupted overlapping sutures. Drainage of the quarter may also be produced by making a vertical incision through the udder wall extending to the bottom of the milk cistern in the teat.

If extensive necrosis of the quarter has occurred, amputation of the part is necessary. For this, local anesthesia is not necessary since the sensory nerves to the part are inactivated by necrosis and toxic materials. Amputation is made well within the area of necrotic material.

Intravenous administration of dextrose solutions may be employed to aid in systemic detoxification.

—Wendell J. Kopp, fall '43
