Seed Production Experience

Prepare for a career in agriculture with DEKALB Genetics Corporation, an international leader in seed research, production and marketing.

The company offers summer internships and full-time management training in seed production. You will gain hands-on experience with various aspects of seed production.

During the summer, interns will gain field training in supervising field crews, field quality inspection and plant maintenance. Intern experience is supplemented by interaction with salesmen, researchers, regional agronomists and company management.

Trainees are involved with the entire production cycle. You will work with seed growers, assist in planting and prepare field reports. Trainees supervise the detasseling process, help with harvest, assist with seed conditioning and gain experience in product distribution.

Visit about these training opportunities and a rewarding career in the seed industry with DEKALB recruiters during Career Days.

An ethos Creative Effort

For February, ethos goes in search of the creative genius inside every student with our second annual "creative issue." Artwork and literary submissions from Iowa State students and faculty will be included. For information on how your work can be included, check out the ad on the back cover of this issue. Don't just sit there, be a part of what is sure to be the biggest creative effort on campus.

Oh, To Be an Author

ethos copy editor Ingrida Pelhs does a background check on the making of a writer with interviews from published authors in the English Department. Also, David Collins, circulation director, tells the trials and tribulations of getting a book published.

Plus...

ethos will not be publishing in December and January. Have a safe and happy holiday season, see you in February.
