Dr. W. H. Timms, '41, of Macomb, Ill., collided head on with a truck while on a call. His car was badly damaged, but Dr. Timms fortunately escaped injury.

Dr. C. D. Van Howeling, '42, of the Illinois Agricultural Association recently addressed a meeting of the Rural Youth, at Decatur, Ill. He discussed animal diseases communicable to man and showed a film on brucellosis.

Dr. R. W. Finch, '43, formerly located at Marengo, Iowa, has moved to Grimes, where he has taken over the practice of Dr. M. R. Flickenger, '43, of Aurora, Iowa, recently took over the practice of Dr. R. A. Minor, '38, of Sigourney, Iowa, so the latter could undergo surgery.

Dr. C. H. Mannasmith, '43, with Dr. C. A. Hawthorne, of Clarinda, Iowa, completely remodeled their office in the early fall.

Dr. and Mrs. R. W. Young, '43, of Parkersburg, Iowa, built a new home, which was completed early last fall.

Dr. Don DeValois, '44, has just returned from the service and relocated in Sanborn, Iowa, for practice.

Dr. Harlen Engelbricht, '44, who has been associated with Dr. W. H. Marks, '11, at Lake Park, is now employed by the Fort Dodge Laboratories as a diagnostician.

Dr. and Mrs. R. M. Hollen, '44, of Creston, Iowa, left by plane Aug. 15, 1947, for Mexico City, Mexico. Dr. Hollen, a member of the United States Bureau of Animal Industry, stationed in Union County, since 1944, expects to be in Mexico for 2 years, assisting in the campaign for the eradication of foot and mouth disease.

Dr. O. P. Idsvoog, '44, has moved from Waconia to Norwood, Wis.

Dr. Rodney Kleaveland, '44, was recently discharged from the Army and is now associated with his father, Dr. I. J. Kleaveland, '21, at Sioux Rapids, Iowa.
Dr. M. R. Seymour, '44, of St. James, is moving to Hawley, Minn., to practice.

Dr. Duane Wehler, '44, has returned from the Army, and at present is associated with Dr. William Moermend, '22, of Enerly, Iowa.

Dr. R. A. Hauser, '45, is building a hospital and apartment combination at La Crosse, Wis.

Dr. V. A. Thieleke, '45, formerly of Cleveland, Wis., has located in Howards Grove, Wis.

Dr. Emmet Full, '46, has moved from Fredrick to Mount Airy, Md.

**Study Wild Life Disease**

An investigation of the role of wild animals in spreading foot-and-mouth disease has been urged by the American Veterinary Medical Association's special committee on diseases in wild animals.

In the 1924 outbreak of foot-and-mouth disease in California, 22,000 deer were slaughtered. Ten percent were found to show lesions of the disease.

Urging of the investigation was prompted by the current outbreak of foot-and-mouth disease in Mexico. The committee declared that the true relationship between deer and cattle in regard to foot-and-mouth disease has not been adequately studied in this country, largely due to lack of opportunity.

The committee warned that if the present epizootic should spread from Mexico to the United States, that the veterinary profession must be ready to give just and well-founded recommendations for dealing with wild life.
