MARRIAGES

Mr. C. J. Bierschwal, Jr., V.M. 3, of Nevada, Ia. and Miss Beryl Nelson of Wayne, Nebr., were married Dec. 27, 1948, at the Lutheran Church in Wayne, Nebr.

• •

BIRTHS

A son, James Mc., to Mr. and Mrs. Charles Towers on Dec. 3, 1948, at Mary Greeley hospital in Ames, Ia.

A son, Perry Allen, to Mr. and Mrs. John J. Edenburn on Dec. 29, 1948, at Mary Greeley hospital in Ames, Ia.

A daughter, Nancy Lynne, to Mr. and Mrs. Robert Urbatsch on Jan. 27, 1949, at Mary Greeley hospital in Ames, Ia.

A son, Thomas Val, to Mr. and Mrs. Gerald Peacock on Feb. 2, 1949, at Iowa Methodist hospital in Des Moines, Ia.

A daughter, Carolyn Cree, to Mr. and Mrs. Ben Schlegel on Feb. 13, 1949, at Mary Greeley hospital in Ames, Iowa.

FACULTY

Dean H. D. Bergman, dean of the Division of Veterinary Medicine, recently received word from Dr. George C. Faville, '80, of Emporia, Va. Dr. Faville is the oldest living graduate of the Division of Veterinary Medicine, Iowa State College. Dr. Faville is sending the college several volumes of the Journal of the American Veterinary Medical Association which will help to complete the series he sent some years ago.

Dr. E. A. Benbrook, head of the Department of Pathology and Parasitology, gave an illustrated talk at a meeting of the East Central Iowa Veterinary Medical Association on Jan. 13, 1949, at Cedar Rapids, Iowa. His topic was “Diagnosis, with Special Emphasis on Parasitic Diseases.”

Dean H. D. Bergman presented a talk on “Current Trends in Veterinary Education” to the annual meeting of the Iowa Veterinary Medical Association in Des Moines on Jan. 19, 1949. He listed the student enrollment in our American Veterinary colleges for the 1948-49 academic year as follows: in the 12 accredited colleges, including the 2 in Canada, there are 2,992 students, which is an increase of 422 over the year 1947-48. There is also a total of 497 students in the 7 new schools now in operation in the United States.
JR. A.V.M.A.

On Dec. 8, 1948, members of the Iowa State Student Chapter of the AVMA were guests of Phi Zeta, national honorary veterinary fraternity. Dean H. D. Bergman spoke briefly concerning the qualities and requirements upon which selections for membership in Phi Zeta are based. The principle speaker of the evening was Harry D. Linn, Secretary of Agriculture for the State of Iowa, who narrated some of his experiences while hunting game in the forests of Montana.

Professor Arthur Anderson of the Department of Animal Husbandry, was the speaker at the January meeting. Professor Anderson is recognized throughout the nation as an authority on swine husbandry and is in constant demand as a swine judge. He acquainted the group with "Swine Practices in Iowa." Mr. Anderson had as his guest, Dr. Louw, Professor of Animal Nutrition at Anderslepoort Institute for Veterinary Research, South Africa. Dr. Louw spoke for a few minutes on the problems encountered by veterinarians in South Africa.

At the February meeting, Dr. Ted W. Millen, a staff member of the College of Veterinary Medicine at the University of Illinois, told of his experiences in India where he served for six years as professor of animal husbandry at Allahabad University. By the use of colored slides and moving pictures, he described in a most interesting manner the livestock situation in India and the handicaps which he encountered in his efforts to improve the various breeds. Dr. Millen is credited as being the first person to successfully artificially inseminate an Indian buffalo. He is also one of the first men to artificially inseminate a queen bee. At the business meeting which followed, Rollin Cowles succeeded Stanley King as president of the student chapter. A revised Honor Code, which governs the academic activities of veterinary students, was approved and adopted by the Chapter. An election resulted in the following new officers: Keith Giese, president-elect; John Siemens, vice-president; Otto VanRoekel, secretary; and William Preston, critic.

GENERAL NEWS

Keith M. Giese, V.M. 3, has been recently elected State Director of Iowa for the Collie Club of America. He assumed his new position Feb. 4, 1949, and will serve for one year.

Dr. F. Paredis, of the Veterinary College, State University, Gent, Belgium, visited the clinic from Jan. 31, 1949 to Feb. 5, 1949. He has a six month's fellowship in the United States to study obstetrics and diseases of reproduction. His stay here was spent observing methods used in the Department of Obstetrics.

Dr. H. Halverson, '36, of Flandreau, S. Dak., spent several days on the campus during January while his wife was confined to an Ames hospital. They are now vacationing in Florida.

Dr. J. M. Gooch, '44, presently engaged in public health work in Hawaii, addressed the freshman class on his experiences in gaining a license to practice in the Islands. He also described the conditions and opportunities for graduate veterinarians to prevailing in Hawaii.

The I.S.C. Student Chapter Of The A.V.M.A. Will Sponsor a Dog Show During Veisha, May 13, 14, 15
Last summer many of the senior class members worked with veterinarians or were employed by veterinary pharmaceutical companies. The following list gives the location of each student and the veterinarian or firm by whom he was employed:

J. W. Erickson
W. J. Kilpatrick
E. S. Scobell
M. A. Nelson

R. K. Morrison
Arthur R. Skewes
Franklin W. Bredhal
Paul L. Thompson
Kenneth M. Tabberon
Paul A. Pinkert

Earl E. Maxwell
S. C. Benbrook

R. R. Biller
L. E. Witt
W. B. Water

Livestock Preparations

Steps to assure more effective use of medicines in treating animal diseases have been recommended to the AVMA by a special committee on therapeutic agents and appliances.

The committee suggested a series of rules under which a national committee of veterinary authorities could pass on the value of medicines and appliances submitted to it. The authorities would check such products for composition, identification, therapeutic claims, properties and other general information. Preparations not in the best interest of livestock health, as determined by the authorities, would not be accepted by the group.

By methods such as those outlined by the committee, the distribution of agents of inferior value could conceivably be reduced.
