Phosphorus management publication now available

Abstract

Agricultural Phosphorus Management and Water Quality Projection in the Midwest is the title of a new publication developed by the Heartland Regional Water Coordination Initiative. The initiative is a partnership of Iowa State University, Kansas State University, the University of Missouri, the University of Nebraska-Lincoln, and United States Department of Agriculture Cooperative State Research, Education, and Extension Service. Matt Helmers and Antonio Mallarino from Iowa State University co-authored the publication.

Disciplines

Agricultural Education | Agricultural Science | Agriculture | Agronomy and Crop Sciences

Phosphorus management publication now available

Agricultural Phosphorus Management and Water Quality Projection in the Midwest is the title of a new publication developed by the Heartland Regional Water Coordination Initiative. The initiative is a partnership of Iowa State University, Kansas State University, the University of Missouri, the University of Nebraska–Lincoln, and United States Department of Agriculture Cooperative State Research, Education, and Extension Service. Matt Helmers and Antonio Mallarino from Iowa State University co-authored the publication.

This publication is a resource that nutrient management planners can use to understand the risk of phosphorus (P) delivery to surface waters, assessment of this risk, and P management options for reducing this risk. Information is targeted to the U.S. Environmental Protection Agency Region 7, which is made up of Iowa, Kansas, Missouri, and Nebraska.
