Twenty-three Honored by Phi Zeta

Phi Zeta, an honor society devoted to veterinary medicine, held its annual initiation banquet April 23, 1963. Twenty-three new members were initiated at that time. Those initiated were:

Seniors
Lawrence E. Evans
Richard H. Jaspers
Joseph E. Wagner
Edwin R. Lindner
Marvin A. Elliott
Alden O. Droivold
Glenn A. Sutter
Edwin L. Boote
James F. Lucas
Merritt W. Pitcher
Thomas P. Johnson
Ronald H. Isaacson
Judson R. West

Juniors
Leland F. Velicer
David V. Grimes
Larry D. Hauptmeier
Clyde K. Kislingbury
David H. Nelson
Roger W. Kuffel
David D. Nighswonger

Dr. Bernard H. Skold and Dr. Raymond F. Sis, both members of the Veterinary Anatomy staff, were initiated as active faculty members. Dr. William J. Zimmerman from the Veterinary Medical Research Institute was initiated as an honorary member.

Phi Zeta was originated as a local society by a group of Seniors of the class of 1925 in the New York State Veterinary College at Cornell University. In seeking a suitable name, they sought the help of a learned Greek Scholar, Professor George P. Bristol of Cornell University. Professor Bristol suggested a Greek word, which in the Latin form is spelled PHILOZOI and means "love for animals." The abbreviation Phi Zeta was adopted as the name.

In 1929 Phi Zeta became a national organization. The same year a petition was granted to the School of Veterinary Medicine of the University of Pennsylvania. In 1931 the national executive committee approved the petition of a group from Iowa State College. Since 1931 eleven new chapters have been installed, bringing the total to fourteen chapters in the national society of Phi Zeta.

From the beginning, it has been the aim of Phi Zeta to stand for the constant advancement of the veterinary profession, for higher educational requirements, and for high scholarship. As stated in the National Constitution, "the object of the society shall be to recognize and promote scholarship and research in matters pertaining to the welfare and diseases of animals."
Pitman-Moore Trip

During the past spring quarter break, the junior class was the guest of the Pitman-Moore division of Allied Laboratories and Eli Lilly and Company. Forty-one members of the class made the trip. They were accompanied by Dr. Howard, Dr. Bristol, Dr. Seaton, Dr. Van Der Maaten and Dr. Mare, who served as advisors.

The group left Ames by bus at 7:00 a.m. on February 24, and arrived at the Washington Hotel in Indianapolis that evening.

Monday morning was spent touring the Research Center of Pitman-Moore. The class viewed the various aspects of research, including products development, pathology, quality control, and viral research. During the afternoon the class toured the biological laboratories there. Particularly interesting were the techniques of canine cardiac bleeding, tissue culture, vaccine production, and the manufacture of gamma globulin from human placental tissue.

The group was the guest of both Pitman-Moore and Eli Lilly on Tuesday. The morning was spent touring Pitman-Moore's pharmaceutical plant, and the afternoon was spent touring Eli Lilly's Kentucky Avenue Pharmaceutical Plant. The techniques at these plants with their mass production methods were of particular interest to the class.

Eli Lilly's Greenfield Laboratory, the agricultural research facilities, and the McCarty Street Plant were toured on Wednesday. The exactness of research was very impressive.

The class traveled back to Ames Thursday, stopping at Purdue University for a short time to tour the veterinary college there.

Class of '64

Robert Christensen became engaged to Linda Thorp of Iowa Falls, Iowa. Linda is a graduate student in Home Economics at Iowa State and a member of Gamma Phi Beta sorority.

Andy Straley became engaged to Ailsie Rogan of Rogersville, Tennessee during the past Easter vacation. The wedding date is July 20.

Jim Grover married Marian Parker, ISU '62, of LeMars, Iowa, on April 14.

Twin boys, David Lee and Daniel Scott, were born to Mr. and Mrs. Don Fick on April 11.

On January 12, a daughter, Dana Lynn was born to Mr. and Mrs. Lee Hodoval.

Class of '65

Marlin Frank is engaged to Judith Carstens of Manilla, Iowa.

Donn Simonson is engaged to Julia Meneough of Des Moines, Iowa.

Jerry Thompson became engaged to Julie Anderson of Sutherland, Neb.

A son, Victor Manuel, was born to Mr. and Mrs. Victor Aguilar on February 21.

Mr. and Mrs. Tom Eganhollse became the parents of a son, Joseph Thomas, on March 2.

On March 21, a son, Michael John was born to Mr. and Mrs. Leon Wernimont.

Class of '63

Dick Kirchgatter is engaged to Elaine Broadbent of West Henrietta, New York.
Norden LACTONOC® is a new product and a different concept, for the treatment and prevention of scours in young animals. The concept is based on the principle of invading the digestive tract with "friendly" bacteria which, in turn, produce a biological barrier against enteric pathogens.

LACTONOC provides live *Lactobacillus acidophilus*, a component of the normal intestinal flora, preserved by desiccation and supplied in either bolette or powder form. Inoculation of the G.I. tract is easily attained by oral administration of the bolette, or by sprinkling the powder in milk or feed. *L. acidophilus* multiplies in overwhelming numbers in the gut, and its abundance, plus the likely benefits from its growth by-products, prevents most pathogens from gaining or maintaining a foothold.

Excellent to good results were obtained in over 90% of 200 pigs and in 82% of 335 calves treated with LACTONOC for enteritis in clinical tests. This product is also highly effective when used to render the healthy gut unreceptive to bacterial pathogens or to re-establish normal intestinal flora following antibiotic therapy. Availability: 10 vials of 4 bolettes; 10 vials of 12 Gm powder.
Fifty-seven Men

In 1963 Graduating Class

Fifty-seven Men in 1963 Graduating Class

The College of Veterinary Medicine at Iowa State University will confer the degree of Doctor of Veterinary Medicine upon fifty-seven men on May 25, 1963. Other degrees earned by members of this class include nine Bachelor of Science degrees, two Bachelor of Arts degrees and two Masters of Science degrees.

This class has an average age of 25.6 with a range from twenty-two to thirty-eight years of age.

Thirty-eight members are married and they have a total of thirty-seven children. Twenty members of the class are veterans.

A major portion of the class have made plans for their professional future at this time. Of those going into practice, eight list large animal practice, seven list small animal practice and seventeen will be in mixed practices. Nine will enter military service with all but one joining the Army Veterinary Corps. Two men plan to enter graduate school and one will enter medical school. One man plans to work in the U.S.D.A. Meat Inspection Division.
