1943 CLASS REUNION
AT IOWA STATE UNIVERSITY
HOMECOMING
for
the March Veterinary Graduates of 1943
25 YEARS
Plans are being made for an informal evening together on October 25 to catch up on the happenings of 25 years.
We need current addresses for everyone in the class. Please advise if you have moved recently or if you know of a classmate who has changed location. By dropping us a note, we'll know for sure where you are.
More to come on specific plans.
Join with us in making this a memorable occasion.
1943 Reunion Co-Chairmen
Bill Calhoun Bob Kirkpatrick
Riceville 3900 River Oaks Dr.
Iowa 50466 Des Moines,
A/C 515 985-2951 Iowa 50312
515 279-6685

The charge for this is as follows:
Blanket charge for all vaginal smears $4.00
Collection of semen-$2.00-done 3 times $6.00
Inseminating bitch-$2.00-done 3 times $6.00
Room and board $1.50/day for 3 days $4.50
Total charge $20.50

This charge covers insemination on three consecutive days. This does not cover the stud fee which may range from the pick of the litter to a $200 stud fee.
The average range is from $25–$30. Also it costs $2.00 to register the litter.
Antibiotics are not used as a rule unless problems arise such as metritis.

E. SUMMARY

From the above it is seen that artificial insemination in dogs is done and is practical. In a small animal practice a knowledge of this is essential for one never knows what logical or ridiculous reason a client may come up with to call for artificial insemination of a bitch. And of course, the client is always right—if you want to keep that person as a client.

The use of artificial insemination over natural mating is not to be encouraged. The percent conception in artificial insemination is quite variable, ranging from 50%–70%. Natural mating under controlled conditions may have as high as 80% conception.

But as stated in the first part of this report—artificial insemination does have its place when for some reason natural mating cannot be done.
