This Fall, Once Again... 
Girl Meets Boy on Campus

There are men to dress up for at college again! Not that you're going to have a man on your mind in every selection you make—but it does put a gleam on things to know they'll be there to look this Fall. So we expect you to be more than a little fussy about your campus clothes—and ever so choosy over date fashions. But we're ready for the challenge...

WOLF'S
realized. This led to a series of studies on what the various proteins do for the body. As Dr. Swanson puts it, "what protein is good for what."

A preference for certain foods in some areas over others equally as good has long been a headache to nutritionists. Dr. Ercel Eppright, head of the Department of Foods and Nutrition, is directing a program to learn the food preferences of people in all corners of Iowa. Fifteen hundred persons are being interviewed as part of a nationwide research program conducted by the quartermaster corps of the army. The army hopes to compile an economical standard diet that will be acceptable to drafted youth from all parts of the United States.

"We plan to use this same information as a basis for improving the nutrition of the people in parts of Iowa," observed Dr. Eppright.

"Some food considered a good source of riboflavin may contain the riboflavin in such a form that the body cannot use it. Therefore it has less value," pointed out Dr. Gladys Everson, of the Department of Foods and Nutrition. "We need information about the availability of the vitamin in common foods that appear often in our diets."

A group of women working on the riboflavin problem with Dr. Everson are studying the availability of this vitamin in foods like ice cream, whole grain biscuit and green beans.—Elizabeth Adams
